ing camps, to winter in the city and incidentally obtain work where it is possible. This naturally increases the supply of labour over the demand. At the same time the volume of work, especially in the building lines, done, is above expectations. As yet, there are no reductions in wages reported, though in some quarters they were expected. Collections among traders are stated to be very favourable, and everything in the ranks of organized labour is satisfactory.

The city has passed a sign by-law. It provides that signs illuminated by electric lights shall not be of greater area than 50 square feet, and the total illuminating power thereof shall not be less than 10 candle power for each square foot of surface of such illuminated sign.

The city may borrow \$130,000, under a by-law introduced to that effect, for sewers. The hospital by-law has been passed to raise \$50,000 by debentures, bearing interest at 4 per cent, said debentures to run 40 years. The city's indebtedness now amounts to about \$3,000,000. A by-law regulating the number of passengers allowed to be carried on street cars is also before the city council, having passed the committee stage. It provides that no person shall be allowed to travel on the forepart of any car, excepting in the open cars with a seat in front part, when in such case no more than five persons shall be allowed to travel. The by-law also provides against expectoration in cars. Any violation of the by-law is punishable by a fine not exceeding \$100 and costs or two months' imprisonment in default of payment of same.

Mining.—The general manager of the Cariboo Consolidated Hydraulic Gold Mining Company, has stated to the press :—

'That, owing to the unusually dry season and consequent lack of water, the season's operations have been disappointing. Hydraulic mining was carried on for only 53 days and on August 4th, the mines were forced to shut down, owing to lack of water. The clean-up for that period amounted to about \$60,000. In September heavy rains were

general throughout Cariboo, and there was a plentiful supply of water, but it was too late then to gather the men together again and resume operations. The water has been stored, however, in huge reservoirs and it is estimated that there is 108 days' supply on hand, so that with the coming winter's precipitation, there should be plenty of water for next season.

'During the past summer a large amount of development work has been done and the surrounding country has also been thoroughly surveyed for sources of new water supply. Two lakes and creeks have been found, one 10 miles distant and the other 15 miles off.'

Considerable activity has been in progress of late in Cariboo mining, and it is not unlikely that a large number of prospectors from these parts will leave in the early spring for this district, especially in view of the fact that the Grand Trunk Pacific will run through the northern portion of the placer mining section.

In the Yukon.—Mining expert Temple, recently engaged by the government, will begin work shortly with diamond drills. Commissioner Congdon announces the fact that he will begin work where the property, already located and held by companies or individuals, is the most promising. Mr. Temple will also do some prospecting for the government with placer drills, such as are used extensively in California and elsewhere. However, quartz development is the chief object at which the government is aiming at present, and he will confine his work to that line for the time being.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building trades for this season, generally speaking, are well employed.

Metal, engineering and shipbuilding trades.—Iron moulders are busy and the outlook promising. Electrical workers report that contractors have plenty of jobs and that the men are well employed. Blacksmiths are all at work. Jewellers all at work, some are working overtime.

Woodworking and furnishing trades.—Woodworkers report trade quiet and work dull. A large number of shingle weavers are out of work and some mills are closed down.

Clothing trades.—Tailors report work good, seamstresses being especially in demand.

Food and tobacco preparation.—With bakers and confectioners trade is poor and there are plenty to do the work.

Miscellaneous.—There are plenty of clerks on the ground for the holiday extra work. Among stenographers the supply exceeds demand. Laundry workers are all at work.

Transport.—Among steamboat men and firemen, it is reported that there is plenty of room for good men. Longshoremen report a surplus of men. All work is done by the hour. Teamsters and expressmen are fairly busy; a large number own their own teams and wagons.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month has not been so favourable as for the month of October. In some lines, however, men are well employed, viz., stove moulders, plumbers and cigarmakers. Owing to wet weather, outside work has not been very brisk. With the exception of the stove moulders the metal trades have had a quiet month. Owing to a reduction in the force employed on sewer extension, the supply of unskilled labour more than equals the demand. There has been no trouble between employers and employees during the month. The report of the British Columbia Electric Railway Company, Limited, for the year ending June 30 last, states that business has largely increased in all departments, and the profits made show a corresponding increase. The company has a profit-sharing arrangement with its employees, and the financial state-

ment shows the sum of \$7,260.85 as the employees' share of the profits for the year.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The final figures of the salmon pack of British Columbia for the year 1903 have been arrived at, showing the smallest grand total since 1892. The total of the whole province including the Fraser river and northern points, is 473,547 cases. The varieties put up were as follows: Sockeyes, 368,709 cases; red and white springs, 25,533 cases; humpbacks, 25,537 cases; Cohoes, 53,570 cases. In 1892 the total pack was 228,470 cases, and at that time there were only eleven canneries on the Fraser, and sixteen on the northern waters, while this year there were thirty-five canneries operated on the Fraser and twenty-five in the northern waters. The pack for the past nine seasons is as follows: 1895, 566,395 cases; 1896, 601,570 cases; 1897, 1,150,470 cases; 1898, 484,106 cases; 1899, 732,437 cases; 1900, 585,418 cases; 1901, 1,235,156 cases; 1902, 625,982 cases; 1903, 473,547 cases.

Railroad construction and employment.—The Victoria sealing fleet has returned to port, having had a fairly successful season. Twenty-four schooners were operated. Of these one was disabled after having taken three pelts, and returned home, another having been lost after securing 29. The total catch for the year was 13,940 skins. The average per schooner is a big improvement over that of last year, when 35 vessels obtained 13,166 pelts. The greatest success was achieved in Behring Sea, where 8,166 skins were taken; 1,910 were taken off Copper islands, and the balance (3,864) were caught off the British Columbia and California coast. The catch made by the Indians, and also that of the two vessels sent to Faulkland islands is not included in the above.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and stone-masons are fairly well employed, and lathers and plasterers have all the work they can attend to. Carpenters report work very dull. Painters are not as well employed as

they were last month. With plumbers trade is very brisk, owing to the great amount of work in connection with the sewer extension. Stonecutters report work very scarce. Builders' labourers are fairly well employed.

Metal, engineering and shipbuilding trades.—Moulders are well employed, particularly in the stove department. Machinists and engineers report work as fair, a few being out of employment, and the same conditions exist for electrical workers and linemen. Blacksmiths, boilermakers and shipwrights and caulkers all report trade as dull, and many out of employment. Horseshoers are fully employed.

Printing and allied trades.—Work is slack with printers, but pressmen and bookbinders are well employed.

Clothing trades.—Journeyman tailors complain of a scarcity of employment. Garment workers are still very busy, and the factories are continually adding to their plants to keep up with the requirements of the trade.

Food and tobacco preparation.—Bakers report trade as good, and all hands employed. Butchers and cigarmakers report similar conditions.

Leather trades.—Harnessmakers are busy.

Miscellaneous.—Barbers are fully employed, and report trade as good. The master barbers have organized an association for the better protection of their interests.

Transport.—The conditions existing among transport workers may be summarized as follows: Steamboat men and steamboat firemen, good; longshoremen, fair; street railway employees, good; cab-drivers and dray-men, fair; teamsters and expressmen, good.

Unskilled labour.—Owing to inclement weather and a partial closing down of sewer extension, there are many labourers idle.

DISTRICT NOTES.

Chemainus.—The saw-mills are running night and day, the output being principally for the foreign market. The British ship

Semantha sailed on the 10th with one of the best timber cargoes ever shipped by the Chemainus mills. Some of the sticks are wonderful samples of the size and quality of British Columbia timber, a large percentage of the cargo running 22 x 22, 110 feet long, and 24 x 24, 90 to 100 feet long. The shingle mill is running with a small crew. The demand in the North-west has fallen off for the winter months, and very few cars are being shipped.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district during the month has not been as good, in some branches of labour, as it was during October, as there has been very little outside work during the month, owing to bad weather. In commercial circles business is quiet, but fairly good for the time of year. There have been no changes in the rates of wages during the past month, but the mills are working short time.

Everything is quiet among the labour unions.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is nothing doing in the fishing industry at present.

Lumbering.—In the lumbering trade work in the woods has been greatly hampered by bad weather. In the mills the local mill has stopped one shift altogether, and are only working short time on the day shift for local consumption, the mill owners claiming to have lost their trade in the North-west. At the other mills they are only working in the day time, owing to a scarcity of logs caused by bad weather.

Mining.—In the coal mining industry matters are normal, the mines running steadily, but there are a great many idle men still on the island. The different companies are, however, pushing development work, which, it is expected, will give employment to a good many of those now idle. In the quartz mines, matters are quiet for the winter, some of the mines are working full time and the smelters are running steadily.

Building trades.—Bricklayers and masons report hardly anything doing. Carpenters report work as very scarce. Painters report business quiet. Labourers report work as very scarce.

Metal, engineering and shipbuilding trades.—Machinists and engineers report business as fair. Blacksmiths and carriage makers report business good for the time of year.

Printing and allied trades.—Printers report business as fair.

Clothing trades.—Tailors report business as slack.

Transport.—Express men and teamsters report work as scarce.

Unskilled labour.—There is very little work for unskilled labour at the present time.

DISTRICT NOTES.

On *Texada Island* there is quite a lot of development work going on in a quiet way on the different properties there.

Everything is quiet from a labour standpoint at *Alberni* and the west coast.

At *Cumberland* the coal company is rushing work on the new field of anthracite coal there, and expect to have some on the market soon.

THE HOURS OF LABOUR IN CANADA—SPECIAL INVESTIGATION BY THE DEPARTMENT OF LABOUR,

I.—INTRODUCTORY.

THE term, 'hours of labour,' is commonly used to signify the length of an average

working day, exclusive of time allowed for meals and of overtime. A distinction, however, is made in many trades and localities between the time worked on each of

the first five days of the week, and the time worked on Saturdays, and to enable a complete return, accordingly, of hours of labour to be made in any particular industrial branch, a statement of the weekly as well as the daily average hours is required.

Importance of the Subject.

It will be easily understood that the question of the hours of labour, or what constitutes an average working day, is one of the most important in modern industry. Its practical bearing, in relation to the productivity and remuneration of labour, is appreciable at once. It is a fact, moreover, that the hours of employment prevailing in a trade or locality are an important criterion of the entire status of labour in a community at any given time. Since the evolution of the modern industrial system, the question of the hours of labour has therefore naturally been one with which economic opinion has been deeply engaged; it remains one of the most involved and complicated problems of both economics and industry. Any statement or return, accordingly, in the way of furnishing material for an intelligent examination of the subject will be of value, especially when it relates to a country of such wide geographical extent as Canada, presenting economic and industrial condition of the most varied character. The field, moreover, is one which, so far as Canada is concerned, has never before been covered in a systematic way.

Previous Investigations of the Department.

The Department of Labour has, from time to time, collected and published much statistical information relating to hours of employment. An investigation into the subject, and the kindred one of wages, was one of the earliest duties to which the Department turned its attention after its establishment in 1900, the results of this investigation being published in a series of articles in which the printing trades ⁽¹⁾,

cigarmaking trade ⁽²⁾, metal trades ⁽³⁾, building trades ⁽⁴⁾, woodworking trades ⁽⁵⁾, carriage and wagon making trades ⁽⁶⁾, and coopering trades ⁽⁷⁾, were dealt with in turn, the information given being based for the most part on returns received from employers and trade unions in various localities throughout the Dominion. Statistical tables were prepared to accompany each of these articles, the investigation reflecting condition prevailing during the period during which the articles appeared, namely, a portion of 1900, the whole of 1901 and a portion of 1902. The eighteenth and last of the articles in question appeared in the *Gazette* for May, 1902. There have also appeared in the *Gazette* from time to time special articles dealing with conditions in particular trades and industries, in which the subject of hours of employment have received due attention. Another important series of articles relating to hours of labour published in the *Gazette* has been that in which current changes in the prevailing rates of wages and hours of employment have been reviewed from time to time. In this connection attention may be specially directed to an article which appeared in the September issue of the *Gazette*, 1903, reviewing the changes which have taken place since the opening of the present calendar year, and to the series of monthly articles and tables which have appeared as a regular feature of the *Gazette* since that date.

Apart altogether, however, from the information relating to hours of employment collected in this way, the Department has been gradually accumulating through other channels a quantity of material relating to this important subject. The monthly reports of the correspondents of the *Gazette*, for example, from the beginning, abounded

(2) See *Labour Gazette*, Vol. I, page 310.

(3) See *Labour Gazette*, Vol. I, pages 355, 429, 501.

(4) See *Labour Gazette*, Vol. I, page 571; Vol. II, page 45; Vol. III, pages 227., 741.

(5) See *Labour Gazette*, Vol. II, pages 299, 345, 399.

(6) See *Labour Gazette*, Vol. II, pages 452, 516, 619.

(7) See *Labour Gazette*, Vol. II, page 659.

(1) See *Labour Gazette*, Vol. I, page 233.

in references, incidental and otherwise, to the hours of labour prevailing in their several localities. Similarly, in the article dealing with trade disputes, which has appeared from month to month in the *Gazette*, there have been many authentic references to hours of employment current in different sections of the country, disagreements concerning which, between employers and employees, have constituted a not infrequent cause of industrial unrest. The numerous fair wages schedules prepared by officers of the Department for insertion in government contracts, and which have been published periodically in the *Gazette* may also be considered as a valuable return relating to the hours as well as the wages of labour. Every issue of the *Gazette*, in fact since its establishment, has contained numerous references, specific and otherwise, and under a variety of headings, to this important feature of the condition of labour.

Special Investigation by Department.

It has seemed to the Department that this and other information of the kind already in its possession, might be made of greater value to the public, if collected and published in a form suitable for ready reference, the presentation of this material to be made the occasion for instituting a further and special investigation into the whole subject of hours of labour in the Dominion. It will be noted that in all previous investigations of the Department the question of working time was dealt with only in connection with the subject of rates of wages, and no separate inquiry made into the hours of labour alone.

The present article is intended to serve as an introduction to a series of articles which the Department now proposes to publish in this connection, and it is the question of the hours of labour in the various trades throughout the Dominion disassociated from any other consideration that will receive attention. The various sources of information above mentioned have been carefully gone over, and the results collected into tables under the headings of

the various classes of trades into which, for the general purposes of the *Gazette*, the Department has classified the different groups of workpeople of the Dominion. In addition to these statistics the Department has obtained from its correspondents in the different cities of Canada, carefully prepared reports of the hours of employment of the workpeople represented in their several localities. A special letter has also been addressed to the secretaries of the different trade unions of the Dominion, of which the Department has now some 1,600 in its directory of labour organizations, requesting a statement as to the hours of labour current in their trades. The returns from these various sources will be presented in tables relating to the trades in the following order :—

- (1) Building trades.
- (2) Metal, engineering and shipbuilding trades.
- (3) Woodworking trades.
- (4) Printing, clothing, food and tobacco preparation, unskilled labour and miscellaneous trades.
- (5) Transport.

Each of the above tables will be accompanied with a brief analysis and explanation, the entire series to be concluded with a general summary and analysis of the results of the investigation as a whole.

Other Features of the Investigation.

There will in this way be presented to the readers of the *Gazette* a basis of comparison in connection with the subject of hours of labour, both between Canada as a whole and other countries, and between the several provinces and localities within the Dominion. The investigation will thus possess the two-fold value of presenting a practical guide to working conditions in the Dominion in a very important particular, and an illustration of the influence of locality, population and other economic and industrial factors upon this vital phase in modern labour conditions.

It may be further stated that an historical view of the tendencies in regard to the working hours of labour in force throughout the Dominion over the past fifteen years will be given, in so far as the report of the Royal Commission on labour and capital appointed in 1886 contains information relating to this subject.

II.—LEGISLATION REGULATING THE HOURS OF LABOUR.

Before proceeding to a consideration of the special statistics of hours of labour prevailing in the several trades, the extent to which the subject has been made a matter for legal regulation in Canada may be referred to. No specific legislation applying to the entire body of workpeople in the Dominion has been enacted in this connection. There are, however, a number of provisions in the factories, shops and mines Acts of certain provinces inserted with a view to protect women and children from excessive hours of employment, and though these cannot properly be regarded as legislation affecting working time in Canada in the true sense of the term, they may be briefly summarized here both as throwing light upon the general conception of what constitutes a proper working day, as well as furnishing information as to the hours in certain employments of a specific class of work-people.

Limitation of Hours in Factories.

Ontario ⁽¹⁾, Quebec ⁽²⁾, Manitoba ⁽³⁾, and Nova Scotia ⁽⁴⁾, are the provinces which have enacted factory legislation and in all four of the Acts in question, provisions regulating the duration of employment of children, young girls and women are inserted.

Terms.—As a preliminary, it may be stated that in all four provinces the term 'week' is understood to mean the period between midnight on Sunday and midnight

on the Saturday following, in recognition of the principle of Sunday observance.* The term 'woman' likewise is defined usually as meaning a female of 18 years of age and over. With regard to the terms 'child or young girl,' different provinces have different definitions. In Ontario and Nova Scotia a person under the age of fourteen is a child. In Manitoba the limit is raised to sixteen years, and in the Quebec Act a child is taken to include boys under fourteen years of age. In Ontario, Manitoba and Nova Scotia, a 'young girl' means a girl of the age of fourteen and under eighteen years; in Manitoba it means one of sixteen and under eighteen.

The general rule.—As to the limitation of the length of the working day in factories for the above classes, the provisions of the law may be stated as follows: In Ontario, Quebec and Nova Scotia, it is not lawful for a child, young girl or woman to be employed for more than ten hours in one day, or for more than sixty hours in a week, unless some different apportionment of the hours of labour per day is made for the purpose of giving a shorter day on Saturday. In Quebec, provisions are added that the day in no case must commence before six in the morning or end after nine at night. In Manitoba the rule is more strict, the limit being placed at eight hours for the day and forty-eight hours for the week. In all four provinces it is provided that an hour, not to be considered in the total of the day's employment, shall be allowed at noon, though in Quebec this provision is qualified by a clause placing the matter at the discretion of the factory inspector.

Exemptions.—Certain exemptions to the above regulations are allowed under particular circumstances. The Ontario, Manitoba and Nova Scotia statutes have identical provisions in this respect under which an inspector in the case of an accident to motive power or to machinery, or in cases where the customs or exigencies of certain

1. R.S.O., 1897, Chap. 256.
2. Q.S., 57 Vic., Chap. 30.
3. Man., 63-64 Vic. Chap. 13.
4. N.S., 1901, Chap. 1.

* For a special article on Sunday Labour in Canada, see *Labour Gazette* for January, 1902, Vol. II, page 415.

trades require it, may grant permission for such exemption from the observance of the Act as may make up for the loss of labour resulting from the accident, or meet the requirements of the trade custom referred to. These exemptions, however, are carefully guarded in all three provinces by rules preventing the employment of a woman or young girl before six in the morning or after nine in the evening, and providing that in no case shall they work more than twelve and a half hours in any one day or more than seventy-two hours in any one week. (In Manitoba the limit is placed at ten and sixty per day and week respectively). It is added that such exemption must not be extended over more than thirty-six days in any one year, and that where the day is prolonged to a later hour than seven in the afternoon an allowance of forty-five minutes for an evening meal between five and eight o'clock must be made. In Quebec overtime to the amount of 12 hours per day or seventy-two hours per week may be required for a period not exceeding six weeks (the day in no case to commence before six in the morning or end after nine in the evening) in the case of an accident to motive power or machinery 'or when any stoppage occurs whatsoever'. In Ontario and Nova Scotia a special exemption is made to enable persons engaged in canning or desiccating fruits or vegetables during the months of July, August, September and October, to be carried on as expeditiously as possible. Women may be employed at this labour until a later hour than nine o'clock, though not for more than twenty days in the whole. Where employed till later than seven p.m., an allowance is to be given in addition to the noon hour of forty-five minutes between five and eight p.m. for the evening meal.

Posting of notices.—In all of the provinces due provisions are made for the hanging up in factories of various notices relating to the hours between which children, girls and women may be employed, such notices to remain in a conspicuous place during the period affected thereby. The keeping of a register of the hours by

the employer in this connection is also enjoined by the acts of Ontario, Manitoba and Nova Scotia.

Hours of Labour in Shops and Stores.

As in the case of the factories acts, the hours of labour in shops and stores are regulated only by way of restricting the duration of employment for persons under a certain age for women. Ontario (¹), Manitoba (²), Nova Scotia (³) and British Columbia (⁴), are the provinces that have Shops Regulation Acts. In Ontario the definition of the terms 'child,' 'young person' and 'woman' are the same as in the factories acts of that province. In Manitoba, Nova Scotia and British Columbia the application of the acts is limited to 'young persons' who are defined in the two first mentioned provinces as including boys under fourteen years of age and girls under sixteen years of age. In British Columbia a 'young person' means any boy or girl under sixteen years of age.

In Ontario none of the classes mentioned may be employed before seven a.m. or after six p.m., except on Saturdays or on a day immediately preceding a statutory holiday, in which cases employment is permitted until ten p.m. An hour is permitted for the midday meal and on Saturday a further interval of forty-five minutes for the evening meal. Employment may be continued until ten p.m. on any other day than Saturday provided that work is closed on the Saturday of the same week at six p.m. The period between December 14th and December 24th each year is exempted from the application of the Act. It is not permitted for a child, young girl, or woman employed in a factory for the number of hours specified in the Factory Act, to work also in a shop on the same day, though if the full number of hours has not been put in in the factory in question,

1. R.S.O., 1897, Chap. 256.

2. R.S.M., 1891, Chap. 140.

3. N.S.S., 58 Vic., Chap. 19.

4. B.C.S., 1900, Chap. 34.

the balance may be devoted to employment in a shop.

In *Manitoba*.—Duration of employment for a 'young person' (persons employed as drivers of delivery wagons excepted) is not permitted about a shop for longer than seventy-four hours in any week, or for more than twelve hours including meal times on any day except Saturday when fourteen hours of employment is permissible. A different apportionment of the daily working time, however, may be made for the purpose of giving a shorter day's work on some other day of the week. An hour is allowed for the midday meal, and, in cases where employment is continued after 7 p.m., an additional forty-five minutes for a 'second' meal between five and eight o'clock.

In *Nova Scotia* a twelve hour day, ordinarily, with a fourteen hour day on Saturdays or a seventy-two hour week is made the rule, with the same provisions as to the apportionment of the hours of labour for the purpose of giving a shorter day's work on another day, and as to an allowance for an evening meal, made as in the *Manitoba* and *Ontario* Acts.

Exemption of the application of the acts is made in all of the above mentioned provinces in cases where the only persons employed in the shop are members of the same family dwelling there or are members of the employer's family dwelling in a house to which the shop is attached.

In *British Columbia* sixty-six and a half hours is provided as the maximum week, and eleven hours as the maximum average day, including meal times, though on Saturdays the time may be lengthened to thirteen hours. Provisions relating to the different apportionment of hours and to an evening meal time allowance are the same as above quoted.

An amendment to the *British Columbia Act of 1900*, has specific reference to *Bake shops*. The hours of the employees are fixed at not more than twelve hours in any one day, or more than sixty hours in any one

week, except by permission of the inspector. Sunday labour is especially prohibited. Persons under the age of eighteen years are not to be permitted to work in a bake shop between nine p.m. and five a.m.

Hours of Labour in Mines.

Nova Scotia, *Quebec*, *Ontario* and *British Columbia* are the provinces in which the Mining Acts take special cognizance of hours of labour.

With regard to *terms* one or two points are of importance in this connection in addition to the definitions referred to above. The term 'week' in the *Nova Scotia* and *British Columbia* Mining Acts is defined as the period between midnight of Saturday and midnight on the succeeding Saturday night. In *Quebec* and *Ontario*, however, the working day does not include Sunday, the term week applying to the period between midnight on Sunday night and midnight on the succeeding Saturday night. In *Nova Scotia*, *Ontario* and in the coal mines in *British Columbia*, the period of employment of boys below ground is considered to begin at the time of leaving the surface and end at the time of returning to the surface.

In *Nova Scotia* a boy between the ages of 12 and 16 may not be employed about a mine of any kind, either below or above ground for more than 10 hours per day, nor for more than 55 hours per week, except in cases of accident or emergency (1).

In *Quebec* the limit per week is set at 48 hours for boys between the ages of 15 and 17 years (2).

In *Ontario* the age restriction specified is the same as in *Quebec* and the time limit is placed at 8 hours per day or 48 hours per week. Sunday labour below ground being expressly prohibited (3).

In *British Columbia* a distinction is made between metalliferous and coal mines as

(1) N.S., 56 Vic., Chap. 9, Sec. 14.

(2) *Quebec*, 55-56 Vic., Chap. 20, Sec. 1548.

(3) R.S.O., 1897, Chap. 36, Sec. 61.

regards provisions applying to hours of labour. In the former no person may be employed under ground for over 8 hours in any 24 hours. In coal mines a boy of the age of 13 years or under 14 may not, as a rule, be employed under ground at all, though the Minister of Mines may permit such employment in mines where the thinness of the seams may render it necessary. In such cases, however, the boy may not be employed for more than 5 days in the week or for more than 6 hours in any one day. Provision is also made for an interval of not less than 16 hours between each period of employment, though this interval may be reduced to 8 hours as between Fridays

and Saturdays. With regard to employment above ground, women, young persons and children may not be employed between the hours of 9 at night and 5 on the following morning, or on Sunday, or after 2 o'clock on Saturday afternoons. Intervals for meals must amount to at least half an hour for each period of employment which exceeds 5 hours and to at least one and one half hours for each period of employment exceeding 6 hours. The provision relating to the stopping of work at two o'clock on Saturday afternoons may be abrogated by order of the Minister of Mines in writing.

LEGISLATION IN CANADA IN REGARD TO ALIENS.

I.—THE IMMIGRATION LAWS.

The Subject Defined.

IN the present article dealing with the legislation that has been enacted in Canada in regard to Aliens, publication is resumed of the series of reviews of the Labour Laws of Canada, the compilation of which was one of the first matters to which the Department directed its attention after its establishment in 1900. The subject here dealt with follows in order an article on the law relating to apprenticeship which appeared in the March, 1902, issue of the *Gazette* :—*

* As was explained in connection with the article referred to the Department had, at that time, covered in its survey the labour legislation of the Dominion in so far as it had been framed with reference to particular classes of employment, (viz., employees in factories, shops and mines, about machinery, and on ships and railways) and had now to deal with the laws affecting the relations of employers and employees as such and by virtue solely of the labour contract, in existence between them whatever the nature of the service to which that contract had reference. The labour contract, it was pointed out, was governed by the law of contracts in general; at the same time the fact that it existed for the performance of personal service had served to differentiate the law relating to it in many important particulars. One of the first subjects to arise in this connection was the question, who might be the parties to the labour contract, and it was in definition of this aspect of the case that the status of minors and aliens had to be taken into consideration. The first of these classes was dealt with in the article on apprenticeship already mentioned, and it is to the second, or the subject of alienage as it affects the entering into a contract for the performance of labour under the Canadian law, that attention is now directed.

The question of the legal status of the Alien Labourer in Canada arises chiefly in two connections, namely, in connection with the subject of immigration—a most important one in a new country capable of great expansion in population—and in connection with the hiring of labour in a foreign country under contract to perform service in the Dominion. What is commonly spoken of as the Alien Labour Law has reference to the latter division of the subject only, and it is frequently taken for granted that this is the only aspect of the law regarding Aliens that has any direct bearing on the condition of labour. This, however, is to a degree misleading, for although the immigration laws do not ostensibly partake of the nature of legislation in the interests of any particular class as apart from the whole community, it will be found, as a matter of fact, that inasmuch as the great body of immigrants into a new country is composed of artisans and labourers, (though agricultural labourers are the only class especially recruited for by the immigration agents of the Dominion in foreign countries) any legal enactments governing their entrance into the country belongs in a marked degree to the class of legislation which may be designated as particu-

larly affecting the interests of labour. It is desirable, accordingly, that this aspect of the case, more particularly in so far as the laws in question may have been designed for the protection of the Canadian workman, should first be dealt with, leaving the other branch of the subject, namely that which has to do with the legal status in Canada of a citizen of a foreign state while remaining to all intents and purposes a *bona fide* citizen of that state (in which connection the hiring of foreign labour under contract is the most important subdivision from the present point of view) for future treatment in the *Labour Gazette*.

Definition of the Term 'Alien.'

Before proceeding to a detailed review of the laws relating to immigration and the subject of Alienage generally, it will be well to attempt some definition in its broadest significance of the term 'Alien.' Though, this is necessary chiefly in connection with the second branch of the subject, it will be a benefit in this place as well, in connection more particularly with a passing reference to the process of naturalization.

No express definition of the term 'Alien' appears in the Canadian Statutes, but from various provisions of the Naturalization Act ⁽¹⁾ and its amendments, it may be said to include the following:—

(1.) All persons born out of the Dominion of the Crown of Great Britain, who have never become naturalized citizens of Canada in accordance with the forms prescribed by law.

(2.) British born subjects, who have voluntarily become naturalized citizens of a foreign country, ⁽²⁾ the terms 'statutory Alien' being applied to such as have thus given up their British connection ⁽³⁾. So likewise all legally naturalized citizens of Canada, who may have by a subsequent declaration of alienage returned to their

original status as citizens of a foreign country, are Aliens.

(3.) A woman under the law of Canada is regarded as of the same nationality as her husband, and if married to an alien becomes a subject of the state to which her husband has acknowledged his allegiance. Her status as an alien thus acquired is not in any way affected by the subsequent death of her husband, and an alien's widow even though herself a natural born British subject remains, in virtue of her marriage, an Alien ⁽⁴⁾.

(4.) The children of aliens, whether statutory or otherwise, are aliens, and follow generally, in regard to naturalization processes, the status of their parents ⁽⁵⁾.

Naturalization of Aliens.

A statement of the qualifications which entitle an alien to become a duly qualified British subject within Canada may be of assistance in further illustrating the meaning in the term 'Alien.' The procedure ⁽⁶⁾ of naturalization, which need not be referred to in any detail, consists in the main in the taking of an oath, supported by evidence, in which the Alien sets forth his intention of residing in Canada or of serving under the government either of the Dominion itself or of any of the provinces. The Alien is then given a certificate of citizenship in accordance with certain forms. It is, however, the grounds of past conduct on the part of the Alien upon which he is entitled to apply for the certificate in question that are of interest here. These are, ⁽⁷⁾ that he should have resided in Canada for a term not less than three years, or have been in the service of the government of Canada or the government of any of the provinces for a term not less than three years. A woman, as above stated, ceases to be an alien upon the natura-

(1) R.S. Canada, 1886, Chap. 113, Sec. 22 & 23.

lization of her husband or on her admission during widowhood by certificate, and children also cease to be aliens upon the naturalization of their parents. Statutory Aliens may receive their status on admission by certificate under various provisions of the Act ⁽⁸⁾.

An alien to whom a certificate of naturalization has once been granted, is entitled to all the political rights, powers and privileges and is subject to all the obligations of the natural born British citizen. An exception of some importance, however, is made in the case of a naturalized alien in the event of his temporary return to the state to which he was a subject previously to his obtaining a certificate of citizenship in Canada. While within the limits of that state, he is not in the eye of the Canadian law a British subject unless he has also ceased to be deemed a subject of that state either by the law of that country or in pursuance of a treaty or convention to that effect ⁽⁹⁾.

A somewhat similar provision is inserted in the clause ⁽¹⁰⁾ relating to the repatriation of Canadians, by which a Canadian who has become naturalized in a foreign country may remain a British subject in Canada, on making what is termed 'a declaration of British nationality,' though still forfeiting his British status while within the limits of the foreign state in which he has become naturalized.

Dominion and Provincial Authority.

Coming to the subject proper of immigration, one of the first questions that arises for explanation, in a matter which is at once local and federal in its interest, is the definition of authority as between the Dominion and provincial parliaments. The question of alienage, it will be readily understood, is from its inherent nature one that effects the Dominion as a whole ; as

such accordingly, it will fall more particularly within the legislative control of the federal authorities. This is clearly indicated in the British North America Act of 1867, which in uniting the provinces into a single federal body, defines the division of legislative authority as between the Dominion and the provinces, especially conferring on the Federal Parliament and Government, in the clauses dealing with the relations of Canada with foreign countries, all powers necessary for the performance of treaty obligations between Canada as a part of the British Empire and other states. The powers of the provinces in this respect, accordingly, are merged in those of the Dominion as a whole. The Act, however, is conceived in a less restrictive spirit when it specifically approaches the subject of immigration, permission being granted to the provincial legislatures to make laws in regard to immigration, with this proviso only, that provincial laws are to be binding only when they do not conflict with the provisions of any Act of the Dominion parliament on the same subject ⁽¹¹⁾. The Dominion parliament remains therefore the supreme legislative body in Canada in all matters pertaining to immigration, and prescribes the general principles upon which immigration into the several provinces must be carried out. It is in the Dominion Act accordingly that such phases of the subject as the maintenance of immigration offices in foreign countries, regulations governing the masters and crews of vessels bringing immigrants to Canada, measures for the protection of immigrants on their arrival, &c., &c., will be found treated, while the legislation enacted by the different provinces is left to concern itself in the main with aspects of the situation which are primarily of a particular or local bearing. The division of functions described above is of course somewhat arbitrary, and, as recent experience ⁽¹²⁾ shows, has not in-

(12) In the case of the disallowance by the Dominion government of the Act restricting the immigration of Japanese passed by the British Columbia legislature.

variably been interpreted alike by the Dominion and provincial authorities, though the principle of the paramount jurisdiction of the federal power has been uniformly sustained.

Establishment of Immigration Offices.

As above pointed out, it is the Dominion authority that takes cognizance of the main channels of communication between the Old World and Canada as regards immigration. The familiar medium through which this work is regulated is the immigration offices, the establishment and maintenance of which are provided for in the opening clause of the Canadian statute. The location of these offices, in the wording of the statute, is designated as London, Eng., and elsewhere in the United Kingdom and at Quebec, Montreal, Kingston, Toronto, Hamilton, Ottawa, Halifax, St. John and elsewhere in Canada, as the Governor in Council may direct. Permission is also granted for the opening of immigration offices on the continent of Europe, and for the maintenance of quarantine stations at Halifax, St. John and Grosse Isle. To the agents stationed at these points is intrusted, among other powers, the use of any money granted by local governments for the purpose of securing food, clothing, transportation or other help for immigrants ⁽¹³⁾.

Protection Against Diseased Immigrants.

Protection against the importation of immigrants, other than those in sound health is one of the first objects aimed at in the immigration legislation of the Dominion and the provinces. By the terms of the Dominion Act the sanction of the Imperial Commissioners of England to the clearing of a vessel carrying immigrants, the carrying of a surgeon on board and the taking of other precautionary measures for the preservation of the health of the passengers are insisted upon, under a penalty of a duty of \$2 per head for each immigrant destined for Canada, payable to the col-

lector of customs where such regulations have not been observed, ⁽¹⁴⁾ the vessel not being admitted to entry until the duty has been paid. The provinces may also take action in a similar direction at the discretion of the Dominion government ⁽¹⁵⁾. There are also strict provisions in the way of regulating procedure at quarantine stations. The duties of medical superintendents at these stations are, briefly, to examine the passengers on board an immigrant vessel and report to the collector of customs as to the presence among the number, of any 'lunatic, idiot, deaf and dumb, blind or infirm' person likely, if permitted to enter the country, to become a permanent public charge. If any such person is found on board, the master of the vessel is required to execute a bond or otherwise give security to the Finance Department of the Dominion ⁽¹⁶⁾ before the passenger is permitted to land. A master of a vessel, however, is freed from this responsibility if the objectionable condition of the passenger in question was not existing or discernible at the time of the departure of the vessel from the port at which the passenger embarked ⁽¹⁷⁾. Provisions are also added in the Dominion statutes for the deportation ⁽¹⁸⁾ of the diseased immigrant to the place from which he was brought under various regulations as to the expenses thus incurred. By an Act of 1902, the Governor General may prohibit the landing in Canada of any person suffering from a loathsome or infectious disease, the prohibition being either absolute or accompanied by permission to land for medical treatment for a stated period. The same amendment allows the arrest without warrant, and removal, by force if necessary, to the vessel, of any immigrant landing in contravention of this provision, the master of a vessel who is accessory to such landing to be liable to a penalty ranging from \$100 to \$1,000.

(14) R.S.C., Chap. 65, Sec. 4.

(15) R.S.C., Chap. 65, Sec. 5, 6 & 7.

(16) R.S.C., Chap. 65, Sec. 17 and 21.

(17) R.S.C., Chap. 65, Sec. 17.

(18) R.S.C., Chap. 65, Sec. 18.

(13) R.S.C., Chap. 65, Sec. 3.

Mention may be made under this heading of a number of provisions of the Dominion Act in further definition of the obligations in this connection of the masters of vessels bringing immigrants to Canada. A detailed and descriptive report of passengers must be made by all masters within twenty-four hours of the arrival of the vessel in port and before the passengers leave the vessel, ⁽¹⁹⁾ and a penalty is imposed for carrying passengers not entered on this list. Passengers under certain circumstances may leave the vessel before her arrival at her final port of destination, but a strict account must be kept of all such cases by the master who is held liable for all missing passengers ⁽²⁰⁾. The pilot of a vessel ⁽²¹⁾ is required to report any contravention of the Act in this regard that may fall under his notice.

Pauper and Vicious Immigrants.

The importation of pauper and vicious immigrants is also made in a special degree prohibitory by the Canadian law. Under the Dominion Act the landing of destitute immigrants may be forbidden by proclamation of the Governor General until the master of the vessel bringing them pays into the hands of a Canadian immigration agent a sufficient sum of money to pay for their transport to their place of destination and their support during the interval, due measures being taken to secure a sanitary condition of the vessel during any detention of the immigrants which may occur in carrying out this regulation ⁽²²⁾. Criminal and vicious immigrants if landed in Canada, must be retransported with the least possible delay to the port whence they came or elsewhere ⁽²³⁾.

Several of the provincial legislatures have supplemented these provisions of the general Act with others more explicit. New

Brunswick ⁽²⁴⁾ has a special statute on the subject which was called into existence by rather peculiar circumstances, and which may be noticed in passing as a good illustration of the special conditions to which legislation of the provinces on immigration as a general rule refers. The shipping of cattle through New Brunswick on their way to England necessitates the employment of a class of labour known popularly as 'cattlemen,' to take care of the cattle on their transit by rail and water. These 'cattlemen,' after supervising the transportation of the animals to Europe, are brought back by the steamship companies, and often landed, as experience has proved, without money or other means of return to the places from which they originally came. They, accordingly, in many cases, become a public charge upon the city or town in which they are landed, and have been a cause in the past of much inconvenience and injury to the inhabitants of the province. The legislature, therefore, in order to meet the situation, has prohibited the importation into New Brunswick of all persons likely to become a public charge, the individual or company bringing any undesirable person of this character into the province to be liable to a charge of \$2 for each day that the person in question remains within the province. Power is at the same time given to the steamship or other companies affected to convey, by force if necessary, any such person to the boundary of New Brunswick ⁽²⁵⁾.

An old Act of the Assembly of Prince Edward Island makes it a punishable offence to import felons from Newfoundland or elsewhere in America into the province ⁽²⁶⁾. Insane persons brought into the province of Manitoba may be seized and deported into the province or country from which they came ⁽²⁷⁾. In British Columbia the Immigration Act goes a step further in imposing an educational test.

upon intending immigrants ⁽²⁸⁾. Any person, who, when requested by a provincial agent appointed under the Act, proves unable to sign his name in the characters of some language of Europe, is not allowed to enter the province of British Columbia. Illiterate immigrants who have succeeded in evading the test, are punishable by a fine of \$500 or twelve months' imprisonment, with the alternative of leaving the provinces within one month. Persons who assist immigrants to evade the Act are liable to the same penalty.

Protection of Immigrants.

Reference should perhaps be made in this place to the provisions, on the other hand, for the protection of immigrants under the Canadian law. This was to a degree involved in certain of the clauses quoted above, especially those defining the obligations of masters of vessels bringing immigrants to Canada. There are, however, a number of other provisions contained in the Act which are more explicitly for the protection of immigrants. Thus, passengers on immigrant vessels are entitled to remain on board without any removal of berths or other accommodation for forty-eight hours after the arrival of the vessel in port ⁽²⁹⁾. Passengers, moreover, are entitled to be landed with their luggage free of expense and at a reasonable hour, that is, between six in the morning and six in the afternoon ⁽³⁰⁾. Proper shelter and accommodation are also to be provided for immigrants until they can be forwarded to their place of destination, the appointment of landing places being by proclamation of the Governor General ⁽³¹⁾. Special measures are taken for the protection of immigrants from a European port not within the United Kingdom, whereby any violation of the law of the country from which the immigrant comes, regarding the duties of a master of crew towards passengers, or any

breach of the contract which the passengers may have made with the master or owner of the vessel, is guarded against ⁽³²⁾. Further, only licensed persons are privileged to solicit immigrants, either orally or in any other way on behalf of transportation companies, boarding house keepers or tavern keepers, or for any purpose connected with the immigrant's passage to his final place of destination in Canada or the United States. A license to engage in such business is granted by the municipality on the person producing a recommendation from the nearest immigration agent and giving bonds, the license not being valid for longer than one year and the fee being placed at \$100 or less, as the municipality may determine ⁽³³⁾. Even when a license has been given runners are not allowed to board vessels before the passengers are landed, except by permission of the immigration agent ⁽³⁴⁾, who is required to visit the vessel before permitting entry to the port ⁽³⁵⁾. The selling of transportation tickets by license to immigrants at an advance on the rate charged by the companies or the purchasing of a ticket from any immigrant for less than its value is punishable with a penalty of \$20 ⁽³⁶⁾. A hotel or a boarding house keeper doing business with immigrants within three months of the latter's arrival in Canada must keep a list of prices for board and lodging conspicuously posted up in the public rooms of his house and printed upon his business cards, a minimum penalty of \$5 being imposed for each contravention to this rule. No lien for board or lodging on any immigrant's goods beyond \$5 is permissible ⁽³⁷⁾. Full provision is also made for inquiry into complaints ⁽³⁸⁾ preferred by immigrants, for the protection of immigrant children ⁽³⁹⁾ whose parents may have died on the

voyage, and governing the relations of the officers and crews of vessels towards female immigrant passengers ⁽⁴⁰⁾.

Immigration Aid Societies.

Two statutes in regard to immigration aid societies, one of the Dominion, ⁽⁴¹⁾ and the other of the province of Ontario, ⁽⁴²⁾ are worthy of reference in the present survey, on account of certain provisions which have a direct bearing on the question who the parties to the labour contract may be. The defined purpose of such societies, namely, to assist immigrants to reach Canada from Europe and to secure employment for them on their arrival here, thus enabling persons in Canada in want of labourers, artisans, or servants, to obtain them by immigration, ⁽⁴³⁾ brings such legislation at once within the scope of the present article, and makes the sections of the Act which regulate conduct of these societies of considerable importance to the Canadian workingman. With regard, first, to the organization of such societies, both the Dominion and the provincial Act affirms that they must consist of at least twenty-five persons with a capital of not less than \$500. They may be organized in any one of the various immigration districts into which the province has been divided for the purpose by the Department of Agriculture, and full instructions for their formation, constitution and by-laws and methods of procedure are given at length in the Acts ⁽⁴⁴⁾. What is chiefly of interest in the present connection, however, is the portion of the Acts which empowers such societies to receive applications from persons desiring workmen from the United Kingdom or Europe and to enter into a contract with such persons to employ the immigrants applied for on their arrival in Canada ⁽⁴⁵⁾. The

society may take action upon such applications by forwarding them to the immigration agent of the district, with the amount the society has undertaken to advance to defray the expenses incidental to the bringing out of the immigrants in question to Canada. The applications, together with the money, are then again forwarded to the proper immigrant agent in Great Britain or elsewhere abroad ⁽⁴⁶⁾. The money so advanced is recoverable or not as the case may be; that is, agents in Europe are allowed to take security from immigrants for the return of such advances if so instructed, ⁽⁴⁷⁾ and the immigrant has power to bind himself to the nominee of the society for the amount advanced to cover the expenses of his transportation to the country, ⁽⁴⁸⁾ the employed deducting, from time to time, according to the terms agreed upon in the contract, certain sums from the wages of the immigrant and paying them over to the society or agent making the advances. Such an instrument as the indenture just mentioned may be enforced by the society against the immigrant, and on the other hand the failure of the person who has applied to the society to have such immigrant brought into the country to carry out his share of the contract, is also punishable, and the damages to which he is liable may be stipulated, if so desired, in the contract between him and the immigrant ⁽⁴⁹⁾. An immigration society, in short, may in all ways act as the accredited intermediary between the Canadian employers, on the one hand, and the immigrant employee on the other. There is, of course, in the Dominion Immigration Act, a clause providing for the enforcement of contracts entered into directly between an immigrant and an employer, whereby the former is liable to a penalty of \$20 for

refusing to discharge obligations that may have been occurred by him ⁽⁵⁰⁾.

The legislature of Quebec, in 1890, ⁽⁵¹⁾ sanctioned the incorporation of 'The Belgian Benevolent and Immigrant Protection Society,' for the purpose of assisting needy persons of Belgian origin and nationality, and of protecting Belgian immigrants and assisting them on their first settlement in the province of Quebec.

Immigrant Children.

The treatment of immigrant children by the law of Canada has a number of features that contribute to make it a part of the body of legislation directly of interest to labour. Nearly every province in the Dominion has dealt from time to time with one aspect or another of the case. The Dominion statute relating to immigration does not directly touch the subject further than to provide that in the case of death of the parents or of last surviving parent of a child or children brought with them in a vessel bound for Canada, or while yet in the care of a Canadian immigrant agent, the effects of the parents shall be disposed of for the benefit of the child, or shall be handed over for disposal to the institution or society assuming the care of the child ⁽⁵²⁾. More express legislation on the subject is found in the statutes of the several provinces. New Brunswick has a law ⁽⁵³⁾ which provides for the appointment by the Governor in Council of a person in each county of the province to act as the guardian of immigrant children who have no known parents within the province, the guardian so appointed to have power to bind such children as apprentices up to the age of eighteen years, in the case of females, and to the age of twenty-one years in the case of males. In the Ontario Act ⁽⁵⁴⁾ regulating the immigration of children into the province the age limit is set

at eighteen years for both sexes ⁽⁵⁵⁾. The Lieutenant Governor, moreover, may authorize the importation of indigent, neglected or dependent children ⁽⁵⁶⁾, those of criminal or vicious tendencies excepted, for the purpose of placing them out in foster homes, binding them as apprentices, &c. A strict watch is kept by the law on those to whom such authority is given, and the duties of societies or agents bringing children into the province are fully explained ⁽⁵⁷⁾. Each child must be visited personally at least once in every year, and the general responsibilities of a guardian are demanded of the society or agent until the child has attained the required age ⁽⁵⁸⁾. Persons with whom such children are placed must furnish to the society or agent, whenever required to do so, full particulars as to the child's health, conduct and general welfare ⁽⁵⁹⁾. A permanent home or shelter must be provided by the society or agent for the child in case of his return after having been placed out in a foster home or bound as an apprentice ⁽⁶⁰⁾. In the case of a child's return for bad conduct to such home or shelter, the society or agent must state, before again placing him out, or apprenticing him to another person, the circumstances of his former return, under penalty of forfeiture of his license and a fine of not more than \$100 ⁽⁶¹⁾. Many of these provisions of the Ontario Act are embodied in the Quebec statute which deals with the subject ⁽⁶²⁾, and the general effect of the two is very similar. The Manitoba statute likewise has few distinctive features, the legal significance of the term 'child' being defined as any one under sixteen years of age ⁽⁶³⁾. Nova Scotia provides for the transfer of immigrant children under a special act which permits

indentures of apprenticeship and transfer agreements in respect to infants to be entered into the United Kingdom and held as binding in the province, and any transfer or guardianship is made binding by the law in the case of males until they attain the age of twenty-one, and in the case of females until they attain the same age unless sooner married ⁽⁶⁴⁾.

Chinese and Japanese Immigration—The Original Chinese Immigration Act.

The laws relating to the status of Chinese and Japanese in Canada lend themselves suitably to separate treatment, and form a most important branch of the subject of alien labour legislation. The Dominion law here as, elsewhere, in regard to immigration, takes precedence of that of the provinces, and the Act of the Revised Statutes of Canada, 1868, ⁽⁶⁵⁾ with its subsequent revisions, contains the general regulations under which the whole Dominion in this respect is governed. The most noteworthy feature of this statute, which has since been revised and modified to a very considerable extent, but which is of interest from the historical point of view, was the provision ⁽⁶⁶⁾ which compelled the payment of a tax of \$50 per head by every person of Chinese origin, except members of the diplomatic corps and their retinues, consuls, duly certified tourists, men of science, merchants, &c., on entering Canada, whether from a vessel or otherwise. Further, no vessel bringing Chinese immigrants to any port in Canada was allowed to carry more than one such immigrant for every fifty tons of its tonnage under a penalty of fifty dollar for each violation of the provision ⁽⁶⁷⁾. Strict regulations as to quarantine, bills of health, &c., were added ⁽⁶⁸⁾. The duty, however, was payable only once, and if a Chinese person left Canada and returned again, the tax collected on his

second entry was, after certain formalities had been complied with, refunded ⁽⁶⁹⁾. Masters of vessels were made personally liable for the payment of the duty ⁽⁷⁰⁾. Masters of vessels who might land Chinese before this duty has been paid or who might misrepresent the number of persons on board were held liable to a penalty of not more than \$1,000 and not less than \$500 for each Chinese thus landed or made the subject of misrepresentation, with an alternative of imprisonment for not more than twelve months, with forfeiture of vessel ⁽⁷¹⁾. Any Chinese person seeking to avoid the Act, incurred liability to a fine not exceeding \$500 or to imprisonment for not more than twelve months, or both ⁽⁷²⁾. The organization of Chinese courts or tribunals or the taking part in the proceedings of any such court or tribunal was forbidden, though the Act was not hostile to the settlement of disputes of Chinese by arbitration ⁽⁷³⁾. All revenues derived from the operation of the Act were made payable to the Dominion treasury, though one-fourth of the entry dues paid by Chinese was, at the end of every fiscal year, to be returned to the province in which such dues were collected ⁽⁷⁴⁾.

Revisions of the Act.

Subsequent revisions have, as above stated, very materially altered the force of this statute, with the final result of largely increasing its restrictive effect. By an addition attached in 1887, any woman of Chinese origin, who is the wife of a person not of Chinese origin, is exempted from payment of the duty, and the same Act allows of the passage of Chinese through Canada in bond, stringent regulations governing the railway or other transport companies being added ⁽⁷⁵⁾. One quarter of the net proceeds only, of the operation of the capita-

tion tax provisions of the original Act, were by this amendment to be returned to the provinces in which the dues were collected ⁽⁷⁶⁾. A further amendment of 1892 provides for the more careful regulation of Chinese leaving Canada with the intention of returning ⁽⁷⁷⁾.

All these various regulations, however, were repealed by the Dominion Act of 1900, which raised the tax on Chinese to \$100 a head on entering Canada ⁽⁷⁸⁾, and while re-enacting the different provisions referred to above, added a number of new ones. In the list of exemptions were now included children born in Canada of Chinese parents who had left the country for educational purposes and subsequently were desirous of returning ⁽⁷⁹⁾. Chinese students were also allowed a refund of the tax, on production within eighteen months from the date of their arrival in Canada of certificates from teachers in any school or college in Canada showing that they had been for at least one year *bona fide* students in attendance at the school or college in question ⁽⁸⁰⁾. A further restriction as to the number of Chinese immigrants allowed on vessels was added by a section forbidding Chinese immigrants to enter Canada coast-wise or overland who had arrived in transit from any place in America, from any vessel entering at such place in excess of the number which would have been allowed to land from such vessel had it come direct to Canada ⁽⁸¹⁾. Stricter regulations as to the health of immigrants were also put in force ⁽⁸²⁾, and the immigration of pauper, idiotic, insane, diseased or prostitute Chinese are forbidden ⁽⁸³⁾. Conductors on railway trains having Chinese on board were made responsible for the payment of the head tax in the same manner, practi-

cally, as matters of vessels ⁽⁸⁴⁾. Moreover, it was added that Chinese who had left Canada must return within six months if they wished to escape the second payment of the capital tax ⁽⁸⁵⁾.

In 1902, a further amendment to the Act made one-half of the net proceeds of the tax on Chinese payable at the end of each fiscal year to the province in which it was collected ⁽⁸⁶⁾.

British Columbia Legislation.

The above may be stated as the leading provisions of the Canadian law as it existed prior to the legislation of the last session of the Dominion parliament in relation to the object of Chinese immigration. It will be necessary, however, before referring to the final Act of the Dominion on the subject to note the legislation relating to oriental immigration enacted by the legislature of British Columbia, which is the only province which has legislated separately in this connection. In that province it is not lawful for any Chinese to buy or receive any crown lands or to be granted authority to record or divert water from the natural channel of any stream, lake or river of the province ⁽⁸⁷⁾. No Chinese or Japanese further, by an Act of 1898, were to be allowed employment on works carried on under franchise by private Act of the legislature, under a penalty of a fine of from ten to twenty-five dollars, payable by the contractors, who should engage such Chinese or Japanese labour in violation of the Act ⁽⁸⁸⁾. In an Act ⁽⁸⁹⁾ to incorporate the Cariboo-Omineca Chartered Company, the employment of Chinese or Japanese in the construction of the work of the company was forbidden, and a penalty of five dollars a day assessed for each and every Chinese or Japanese person so employed, and in amendments to the British Colum-

British Public Works Loan Act ⁽⁹⁰⁾ and the Tramway and Transportation Act ⁽⁹¹⁾ sections of similar import were inserted. The provisions, however, of the British Columbia statutes in which the restrictions are applied to Chinese and Japanese alike, were subsequently disallowed by the Canadian Parliament.

By an Act passed at the session of the British Columbia legislature of 1902, a provision was inserted into the Coal Mines' Regulation Act, prohibiting the employment of any Chinaman, Japanese or person unable to speak English in any position of trust about a mine, whereby through his ignorance or carelessness he might endanger the life or limb of his fellow workmen ⁽⁹²⁾. A fuller Act, passed at the same time to regulate the employment of labour on subsidized works, prohibits the aid by government to any undertaking unless the promoters thereof agree as to the classes of labour to be employed with the Lieutenant Governor in Council ⁽⁹³⁾.

The Present Law.

It will readily be understood from the above that the status of the Chinese and Japanese immigrants under the Canadian law during the past few years and until the passing of the final Act on the subject by the Dominion Parliament during the session of the present year, might be considered as more or less indeterminate, as a result largely of the feeling in British Columbia regarding the restriction or complete exclusion of both these classes of immigrants. It was in response to this feeling that the Dominion government in September, 1900, appointed a Royal Commission to investigate the entire question of oriental immigration. A review of the

findings of this commission has already appeared in the *Gazette* ⁽⁹⁴⁾. Briefly, they were to the effect that a further immigration of Chinese into Canada ought to be prohibited, and that with this end in view the capitation tax should be raised to \$500. It was in carrying out the view of this commission that the Act 'Respecting and Restricting Chinese Immigration' was passed at the recent session of the Dominion parliament. As this Act has already been reviewed at length in the *Gazette* ⁽⁹⁵⁾ for August of the present volume, the reader is referred to that issue for a full statement of its provisions.

With regard to Japanese immigration, its practical exclusion has resulted from the action of the government of Japan taken on August 2, 1900, whereby the governors of the Prefectures were instructed to prohibit entirely for the time being the emigration of Japanese labourers to the Dominion of Canada. The objection of the Japanese government to the anti-Japanese legislation of the province of British Columbia, which lead through the intervention of the colonial office to the disallowance of the Acts in question by the Dominion government, was not so much to the practical exclusion of Japanese from Canada as their exclusion nomination which specifically stamped the whole nation as undesirable persons. With the inauguration of a policy of restriction by the Japanese government itself, the practical necessity of action on the part of British Columbia was removed, and the situation accordingly remains satisfactory to all parties during the continuance of the policy in question.*

COST OF LIVING IN CANADA.—INVESTIGATION BY OFFICERS OF THE DEPARTMENT OF LABOUR.

IN the present article, which is the seventh published in connection with a special investigation into cost of living in Canada, by the Department of Labour, a number of tables are presented embodying information relating to prices of provisions, groceries, dry goods, ready-made clothing, &c., and to rents as collected by personal investigation on the part of officers of the department.*

As was explained in the initial article of the series which appeared in the April *Gazette*, the statistical information collected by the department in this connection arranged itself under two headings according as the method of obtaining the same was by correspondence or by personal investigation by representatives of the department. The results of the inquiries made by correspondence have already appeared in the *Gazette*, special instalments being devoted to prices of provisions, groceries, dry goods, clothing, &c., and to rents respectively. The sources of the information contained in these articles were for the most part the returns made by retail dealers, real estate agents, &c., in the more important localities of the several provinces who sent in the information in question on schedules in response to the written request of the department to that effect.

Explanation of Table.

The investigation undertaken by officers of the Department was divided into two parts, relating respectively to Canada and to the United States, inquiry in both fields being limited to the more important industrial centres as best affording a basis of comparison of conditions in the two countries. It is to the first of these divisions only that the tables included in the present article relate.

The expense and time involved in an investigation of this character necessarily limited the personal inquiry by the Department to a few localities. In choosing the localities for the Dominion, the cities

of Montreal and Toronto were selected as the two most important centres both of population and industry in the Dominion. The cities of Ottawa, London and Kingston, Ont., were taken next in order, as representing localities of less importance from the standpoint of industry and population, while Berlin was selected as one of the larger and Clinton as one of the smaller towns of the province, the former having a population of upwards of 10,000 and the latter a population of under 3,000 inhabitants.

The series of returns made by the correspondents of the *Gazette* for their several localities which have already been published in the previous articles and are distinguishable from other statistics in the tables in which they appear by the use of italics, may also properly be regarded as part of the investigation conducted personally by officers of the Department.

As in the previous statistical tables published in this connection, no attempt has been made to reconcile differences as between the several authorities quoted. In the case of each town or city appearing on the list the prices quoted were obtained by a representative of the Department through conversation with both wholesale and retail dealers and business men of the most representative class, the returns being entered on schedules similar to those sent out by the Department in the other division of its investigation exactly as received from the dealers themselves. The reference numbers which appear in the table are inserted for the convenience of the Department in filing this information for purposes of reference.

It should be remembered that the majority of the returns presented in this table were collected during the spring months of the present year and while at the time they were regarded as fair average rates, no account has been taken of changes that may have occurred since.

The tables containing the information collected by the Department as the cost of living in the United States, together with articles in the way of comment and generalization as to the entire investigation will appear in subsequent issues of the *Gazette*.

*Note.—See *Gazette* for May, page 869; June, p. 979; July, p. 57; September, p. 239; November, p. 429.

THE AGRICULTURAL INDUSTRY IN ONTARIO.

The series of bulletins relating to the agricultural industry in the several provinces of the Dominion, which has been in course of preparation by the Census Department, Ottawa, for some time, was continued during the past month with the publication of a report relating to conditions in the industry in Ontario.* As in previous bulletins of the series the statistics are arranged in eight tables, classed as farm and lot holdings, farms and farm lots, fruits, grains, roots, live stock, animals and their products, and values. Areas of five acres and over as previously are recorded as farms; under five acres as lots. The bulletin, accordingly, permits of comparison between the several provinces with a minimum of difficulty, the uniform methods of classification adopted affording, as the bulletin points out, a basis for a study of comparative agriculture as well as some phases of its economics.

Agricultural Areas.

Ontario has an area above tide level of 166,951,636 acres, of which 25,826,306 acres are water surface. Of the land 15'13 per cent is occupied as farms and lots, the average size of the former being 114'91 acres, and of the latter 1'13 acres. There are 38,712 lots, of which 51'85 per cent are less than an acre, and 185,415 farms, of which 4'03 per cent are five to ten acres, 18'83 per cent, 11 to 50 acres, 41'08 per cent, 51 to 100 acres, 28'33 per cent, 101 to 200 acres and 7'73, 201 acres or more. The farm land owned constitutes 85'14 per cent of the whole, while of the area occupied as lots 77'93 per cent is owned, the balance in each case being leased or rented. Practically, the whole of the land occupied by lots is in an improved state, with 33'7 per cent of it in crops, and 42'8 per cent in orchard or garden. Of farm land 62'06 per cent is in

an improved state, the unimproved consisting of 4,823,079 acres in forest, and 3,259,322 acres in various conditions unfit for cultivation. The improved land for the most part is occupied by field crops, fruits, vegetables, and pasture. Trees, to the number of 3,036,809, have been planted on farms and lots, or an average of 13 to each farm and lot.

Fruit Growing.

The number of acres in orchard in Ontario is 266,015, of which 10,520 acres is, on lots. The return shows a decrease of 23,269 acres in the decade, though land under vegetables and small fruits has increased from 34,365 acres to 65,303 acres and in vineyard from 4,956 to 5,440 acres. The total number of apple trees in the province is 9,541,619, of peach trees 1,282,497, of pear trees 844,973, of plum trees 1,685,719, of cherry trees 684,348, of other fruit trees 48,780 and of grape vines 2,620,036. The whole number of fruit trees in the province is 14,087,936, being an average of 63 to every farm and lot. The yield of fruit trees in the last census year was 15,167,898 bushels; in the former census year it was 5,779,533 bushels. The crop of apples shows an increase of 170'27 per cent, of peaches 1,227'92 per cent, of pears 133'5 per cent, of plums 96'75 per cent, of cherries 23'93 per cent, and of grapes 97'49 per cent; but the crop of other fruit trees shows a decrease of nearly 81 per cent.

Field Crops.

The chief field crops in Ontario are hay, oats, wheat, pease, barley, corn, potatoes, and roots. Of the whole area devoted to field crop culture in 1900, hay occupied 28'29 per cent, oats 29'39 per cent, wheat 16'15 per cent, pease 6'27 per cent, barley 6'36, corn 3'60 per cent, and potatoes and roots 3'75 per cent. The present census shows an area of 2,606,316 acres under hay, with a yield of 2,852,465 tons as against 2,528,894 acres with a yield of 3,465,633 tons in 1891. Wheat shows an increase

* Statistics for the province of Prince Edward Island, British Columbia, Nova Scotia, Manitoba, the North-west Territories and New Brunswick, have already been referred to in the January, February, March, April and May, 1903, numbers of the *Labour Gazette*, respectively.

from 1,430,532 acres with a yield of 21,314,-82 bushels in 1890, to 1,487,633 acres, having a yield of 28,418,907 bushels according to the present census.

The following table shows the average yield per acre of the principal crops for the years 1890 and 1900 :—

| | 1900. | 1890. |
|-----------------|--------|--------|
| Wheat.....bush. | 19.10 | 14.90 |
| Oats....." | 32.56 | 22.97 |

| Barley....." | 19.34 | 13.70 |
| Trifolium....." | 27.45 | 19.70 |
| Corn....." | 73.77 | 50.40 |
| Peas....." | 374.10 | 360.48 |
| Hay.....tons. | 1.09 | 1.37 |

Live Stock and Animal Products.

Increases in all classes of live stock on farms and lots, with the exception of horses over three years old, and bees, are shown, as compared with the former census. The averages in round numbers per farm are horses 3, milch cows 5, other horned cattle 7, sheep 5, swine 8, and poultry of all kinds 50. There was an increase in the number of cattle killed, or sold for slaughter or export, and in the number of pigs and sheep. The number of milch cows shows a large increase, but there is a decrease in the production of home-made butter. The number of butter factories has increased, however, by 230 during the past decade, and the value of their output by \$227,822. Eggs show a production of 49,-9,845 dozen, valued at \$5,756,221.

Agricultural Values.

The bulletin shows a total valuation for farms and lots in the province as follows:—For lands and buildings \$747,962,568, for

implements and machinery \$52,697,739, for live stock \$131,827,762, and for the crops and animal products of the census year, \$196,952,362. The total value of farm property is \$921,106,731, of which sum land represents 58.11 per cent, buildings 22.84 per cent, implements and machinery 5.67 per cent, and live stock 13.38 per cent. Reduced to a farm of the average size (114.91 acres, whereof 71.32 acres is improved and 43.59 unimproved) the value of the property is \$4,967.31, made up of \$4,-021.24 for land and buildings, \$281.88 for implements and machinery, and \$664.69 for live stock. The gross value of farm products for the census year shows a return of 20.94 per cent of the investment.

Other statistics relating to agricultural valuations in Ontario are as follows :—

The average value of horses on farms per head is \$75.31, milch cows \$30.39, other horned cattle \$17.35, sheep \$5.28, and swine \$6.76; and the average value of horses per farm is \$263.30, milch cows \$166.93, other horned cattle \$131.82, sheep \$29.66, swine \$55.79, and poultry and bees \$17.20.

In the value of dairy products is included the milk and cream sold to cheese, butter and milk condensing factories, amounting to \$15,070,922. There were in operation in the province during the census year 1,336 factories, of which 172 made cheese and butter, 1,061 made cheese only, and 103 made butter only. The cheese product was 131,967,612 lbs., worth \$13,440,937, and the butter product 7,559,542 lbs., worth \$1,527,935, making a total value of \$14,968,922—the remainder being the value of condensed milk. In the former census year there were 893 cheese and 45 butter factories in the province, and the total value of product was \$7,569,338. The increase in the value of factory dairy products from the year 1890 to the year 1900 in Ontario was therefore \$7,501,584, or nearly 100 per cent.

The rent value of leased farms is \$1.64 per acre, and the rate of wages for farm labour is \$5.15 per week, including board.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

MOST of the attention directed to immigration by the press during November was in the way of reviews of the season's operations and forecasts as to the probable extent of the movement in 1904. There were, however, a considerable number of arrivals reported, several vessels having landed immigrants at Canadian ports. Reported statistical returns for October are

referred to below. The following are among the more important other features in this connection discussed during the month.

It was stated by the Canadian Immigration Commissioner that of the 50,000 immigrants which crossed from the western states to Canada during the year, the majority were of Swedish and German na-

tionality. The continuance of this movement on a more extensive scale is anticipated from the number of applications already filed for land. With regard to emigration from Europe, the Immigration Department is planning a vigorous canvas in the United Kingdom and among the rural population of France and Belgium, special literature having been prepared to assist in the work in the latter countries. The Department has also arranged with the civic authorities at St. John, N.B., for new quarters on a suitable scale of size and comfort for the accommodation of immigrants during the winter season.

With the closing of navigation on the St. Lawrence, it is reported from the city of Quebec, that in the neighbourhood of 70,000 immigrants from European nations landed at that port during the past summer season. This is the largest aggregation of settlers from European countries, via the St. Lawrence route in any one season, being 22,000 more than last year. About 30 per cent of the number were booked for the United States, leaving 49,000 as the quota for Canada, via the St. Lawrence route during the past year. The stringent policy regarding the rejection of foreign passengers suffering from contagious diseases as carried into practice by the Canadian government, is thought to have prevented the above total from assuming much larger proportions. Perfected arrangements in the carrying out of this policy are announced for the approaching season.

At Lloydminster, N.W.T., an officer of the Immigration Department is supervising the construction of the government buildings and taking general charge of the colony during construction. On the whole, conditions in the colony are satisfactory, though some cases of poverty among the residents are reported to exist. The colonists, however, are covered by a regular patrol and relief granted, in cases of need.

A number of weavers, being for the most part young women from Lancashire, Eng., are reported to be emigrating to Canada

with the prospect of securing employment in Canadian mills.

Homesteading on an active scale was stopped by the snow in the latter part of the month.

Provincial Colonization.

The nine agencies engaged in the work of securing homes for Scotch and English children in Ontario, report a most successful year, having brought out 1,700 children and placed them in good foster homes. Only children of good character and of fit condition physically, were included in this number. The various receiving stations of the societies engaged in the work were periodically visited by the provincial superintendent of neglected and dependent children and found to be satisfactory. The superintendent reports also that homes for a much larger number could easily have been secured.

The Provincial Immigration Department of the Dominion states that about 3,000 farm labourers were placed with farmers during the season. With regard to the continuance of the immigration policy of the province, the Prime Minister stated that only agricultural labourers and not artisans or mechanics would be sought by the Department.

The various surveying parties engaged in laying out townships in the Abitibi district beyond the height of land have all returned. They report that ninety per cent of the land surveyed in the new township is of good quality.

At a monthly meeting of the council of the Society of Colonization of Quebec, it was stated that the number of colonists placed during October was 123, of which 54 were from Montreal. The colonists were placed in the following places, 83 in the district north of Montreal; 18 in the north of Ontario, 11 in Temiskaming, 9 in Metapedia, 1 in the North-west, and 1 in Lake St. John district. The total number showed a falling off from the month of October last year.

Members of the Canadian Veteran's Incorporated Association will each receive a grant of 160 acres from the government of Quebec.

October Immigration Returns.

Immigration arrivals during October as supplied by courtesy of the Department of the Interior show that arrivals from the United States numbered 4,844 and that arrivals of English and Scotch numbered 2,677 and 585 respectively—the three making up the majority of the total of 10,047 arrivals for the month. Irish, and returned Canadians, ranked next in order.

Homestead Entries of September.

The following statement, published by courtesy of the Department of the Interior shows the number of homestead entries, according to the various agencies, made during the month of October, 1903, as compared with the month of October, 1902 :—

TABLE OF HOMESTEAD ENTRIES FOR OCTOBER.

| Agency. | 1903. | 1902. | Increase. | Decrease |
|--------------------|-------|-------|-----------|----------|
| Alameda..... | 195 | 237 | | 132 |
| Battleford..... | 44 | 37 | 7 | |
| Brandon..... | 51 | 140 | | 89 |
| Calgary..... | 201 | 118 | 83 | |
| Dauphin..... | 25 | 32 | | 7 |
| Edmonton..... | 229 | 249 | | 20 |
| Kanloops..... | 5 | 15 | | 10 |
| Lethbridge..... | 101 | 119 | | 18 |
| Minnedosa..... | 13 | 14 | | 1 |
| New Westminster | 1 | 2 | | 1 |
| Prince Albert..... | 100 | 176 | | 76 |
| Regina..... | 598 | 453 | 145 | |
| Red Deer..... | 99 | 105 | | 6 |
| Winnipeg..... | 81 | 83 | | 2 |
| Yorkton..... | 215 | 272 | | 57 |
| Total | 1,958 | 2,142 | 235 | 419 |

TABLE OF HOMESTEAD ENTRIES JULY-OCTOBER.

| Month. | 1903. | 1902. | Increase. | Decrease. |
|----------------|-------|-------|-----------|-----------|
| July..... | 3,435 | 2,622 | 816 | |
| August..... | 2,288 | 1,901 | 384 | |

| Total | 9,529 | 8,084 | 1,629 | 184 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of October, 1903, were as follows :—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS.

| Nationalities. | No. of entries. |
|--|-----------------|
| Canadians from Ontario..... | 303 |
| " Quebec..... | 31 |
| " Nova Scotia..... | 11 |
| " New Brunswick..... | 7 |
| " Prince Edward Island..... | 6 |
| " Manitoba..... | 49 |
| " North-west Territories..... | 38 |
| " British Columbia..... | 3 |
| Persons who had previous entry..... | 159 |
| Canadians returned from the United States | 49 |
| Americans..... | 647 |
| Newfoundlanders..... | |
| English..... | 226 |
| Scotch..... | 66 |
| Irish..... | 22 |
| French..... | 15 |
| Belgians..... | 6 |
| Swiss..... | 3 |
| Italians..... | |
| Roumanians..... | 1 |
| Greeks..... | |
| Syrians..... | |
| Germans..... | 79 |
| Austro-Hungarians..... | 133 |
| Hollanders..... | 1 |
| Danes (other than Icelanders)..... | 1 |
| Icelanders..... | 13 |
| Swedo-Norwegians..... | 59 |
| Russians (other than Mennonites and Doukhobors)..... | 26 |
| Mennonites..... | 1 |
| Doukhobors..... | 1 |
| Chinese..... | |
| Total..... | 1,958 |

Representing 5,195 souls.

Of the total number of entries made during October by persons coming from the United States into Canada, 191 were from

It will be seen that there was a net decrease of 184 in the number of entries during the month, although the following table will indicate there has been a net increase in the total, of 1,445 entries, since the beginning of the present fiscal year, as compared with the same period in 1902.

Table showing entries for first four months of fiscal year of 1903-4:—

Dakota, 171 from Minnesota, 39 from Iowa, 35 from Nebraska, 30 from Illinois, 29 each from Washington and Wisconsin and 21 from Montana.

Lands Patented in October.

The following is an abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of October, 1903:—

TABLE OF LAND PATENTS FOR OCTOBER.

| Nature of Grant. | No. of Patents. | No. of Acres. |
|---|-----------------|---------------|
| British Columbia homesteads..... | 5 | 757 39 |
| Coal lands sale..... | 1 | 48 00 |
| Commutation grants..... | 1 | 26 94 |
| Homesteads..... | 349 | 55,401 62 |
| Manitoba Act grants..... | 1 | 5 90 |
| Mineral rights..... | 1 | 1,038 50 |
| North west Half-breed grants..... | 11 | 2,102 34 |
| Quit claim special grants..... | 4 | 640 00 |
| Railways:— | | |

| Qu'Appelle, Long Lake and Sask. Ry. and Steamboat Co..... | 7 | 3,617 49 |
| Sales..... | 33 | 6,444 73 |
| School lands sales..... | 3 | 800 00 |
| Special grants..... | 4 | 583 00 |
| Yukon Territory sales..... | 3 | |
| Total..... | 537 | 283,213 36 |

SHEET METAL WORKERS' AGREEMENT AT WINNIPEG, MAN.

THE Winnipeg branch of the Amalgamated Sheet Metal Workers' International Alliance composed of about sixty members went out on strike on the morning of November 11, 1903. Their object was recognition of the union. Fifteen firms signed the following agreement the same day and ended the strike:—

1st. That 59 hours shall constitute a week's work; that 10 hours shall constitute a day's work; that the hours shall be from 7 a.m. till 12 noon, and from 1 p.m. till 6 p.m.; Saturday, from 7 a.m. till 12 noon, and from 1 p.m. till 5 p.m.

2nd. All time other than herein mentioned shall be considered overtime and shall be paid for at the rate of time and a half until midnight; after midnight, all statutory holidays and Sundays shall be double time.

3rd. The employees in all shops are classed as journeymen and improvers and apprentices. Six

months the term limit for improvers, and if not competent, then they will apply for an extension of time to the organization.

4th. The term of apprenticeship to any branch of sheet metal work shall be four years. One apprentice allowed to every three journeymen. Existing arrangements not to be disturbed.

5th. Helpers may be employed for all work not requiring skilled labour, such as general labour work.

6th. If employers are in need of more help the association, if applied to, will endeavor to supply extra men.

7th. Employers will pay all car fare, and time at regular rate of wages, board and extra necessary expenses when out of the city.

8th. It is agreed between the parties that no discrimination shall be used against any member who may be on a committee to interview employers.

9th. This agreement shall continue in force and effect for one year unless three months' notice be given by either party, in writing, that changes are desired. If no notice be given, it shall continue in force and effect for another year.

FIELD PRODUCTS OF CANADA.

THE following comparative table of the field products of Canada for the years 1880, 1890 and 1900 respectively, was supplied by the Department of the Census and is subject to final revision:—

FIELD PRODUCTS OF CANADA IN THE CENSUS YEARS 1881, 1891 AND 1901, BEING FOR THE SEASONS OF 1880, 1890 AND 1900 RESPECTIVELY.

| Kinds. | 1880. | 1890. | 1900. |
|---------------------------|-------------|-------------|-------------|
| Wheat.....bush. | 32,350,269 | 42,223,372 | 55,572,368 |
| Barley....." | 16,844,868 | 17,222,795 | 22,224,366 |
| Oats....." | 70,493,131 | 83,428,202 | 151,497,407 |
| Rye....." | 2,097,180 | 1,341,325 | 2,316,793 |
| Corn in ear....." | 9,025,142 | 10,711,380 | 25,875,919 |

| Hay and forage.....tons. | 5,053,008 | 7,693,733 | 9,104,058 |
| Tobacco and hops.....lbs. | | 5,404,166 | 12,270,948 |

Note.—In the Census of 1891, minots were not converted into bushels for the Province of Quebec. The conversion has been made in the foregoing table, with the result of increasing the aggregate quantities of products in that year.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1903.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency.

THE Department has received notice through its correspondents and from other reliable sources, of accidents to workmen during the month of November, in different parts of the Dominion, resulting in the loss of 61 lives and in severe injuries to other workmen to the number of 87.

By industries and groups of trades the record was as follows :—

| Trade or Industry. | Killed. | Seriously injured. |
|------------------------------|---------|--------------------|
| Agriculture | 3 | 5 |
| Fishing | 2 | 0 |
| Lumbering | 2 | 2 |
| Mining | 2 | 4 |
| Building trades | 3 | 7 |
| Metal trades | 6 | 12 |
| Woodworking trades | 2 | 4 |
| Railway service | 20 | 14 |
| General transportation | 17 | 19 |
| Miscellaneous | 4 | 20 |
| | 61 | 87 |

Nature of Fatalities and Injuries.

By reference to the table published herewith it will be seen that with one exception, that namely of the loss of the schooner *Emerald*, in Lake Ontario, no single accident of the month resulted in the loss of more than two lives. There were, however, 7 accidents in which 2 men were killed as well as a number injured in several cases. Three of these were the results of boiler explosions, occurring at Newmarket, Lévis, and on board the Dominion government dredge *J. Israel Tarte*, in Lake St. Peter, respectively. The explosion of a 100 horse power boiler in the factories of the United Factories Company at Newmarket, Ont., was perhaps the most serious accident of the month from the standpoint of those injured in addition to the numbers killed. In the case of the explosion of a donkey engine on board of the steamship *Congal* at Lévis, Que., there

were 7 injured in addition to two killed. At Newmarket, however, there were a large number receiving injuries of a minor nature which have not been entered on the table, and the destruction to property was also considerable. By the explosion on the *J. Israel Tarte*, one man was injured, in addition to two being killed. The other accidents of the month, in which more than one workman was killed were, that by which two railway labourers while returning from work on a handcar were struck by a train near Strathroy; that caused by the collision of a working train with a number of cars on an open switch at Newdorf, Man.; and the drowning of two fishermen at Mink Island, Ont. In no other case was more than a single life lost by an accident, and the above reference includes also the more important accidents from the standpoint of numbers injured.

Referring to the summary of accidents by industries and groups of trades as given above, the following explanation may be added :—

In the *agricultural industry* two of the fatal accidents reported were the result of the upsetting of loads, the third being due to injuries received in operating a corn-shredder, which was also the cause of two other serious accidents during the month, while a third resulted somewhat similarly from a workman being caught in the cylinder of a threshing machine. Two other cases of severe injuries were occasioned by the overturning loaded wagons.

In the *fishing industry* the only accident of the month reported to the Department was the drowning at Mink Island, already referred to.

The accidents to *lumbermen* were fatal in two instances, the result of workmen being lost in the woods.

In *mining* there were two fatal accidents reported, and four resulting in serious injuries. Three accidents, of which one resulted fatally, were caused by a fall of stone or coal.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------------------|-----------------------|--------|---------|----------|--|--|
| <i>Agriculture—</i> Farmer | Trowbridge, Ont. | Nov. 3 | 1 | 1 | Shoulder blade and ribs broken with internal injuries. | Farmer while driving a cow in a wagon was thrown out, the animal falling on him. |
| " | Toronto, Ont. | " 2 | 2 | 1 | Leg fractured. | Farmer while delivering produce was run over by a street car. |
| " | Tilbury, Ont. | " 7 | 1 | 1 | " | Killed by load of lumber falling on him. |
| " | Cumden, Ont. | " 12 | 1 | 1 | " | Farmer while feeding a corn husker was caught and drawn in by the rollers. |
| " | Union, Ont. | " 18 | 1 | 1 | Hand badly crushed. | Workman's hand caught in a corn shredder. |
| " | Brighton, Ont. | " 20 | 1 | 1 | " | While delivering produce, wagon upset, falling on driver. |
| Thresher | Alvinston, Ont. | " 25 | 1 | 1 | Loss of hand above wrist. | Workman was caught in the rollers of a corn shredder. |
| " | Harvey, N.B. | " 25 | 1 | 1 | Loss of arm below elbow. | Caught in cylinder of threshing machine. |
| <i>Fishing</i> Fishermen | Mink Island, Ont. | " 5 | 2 | 2 | " | Man went out in a shod boat to lift nets and did not return. |
| <i>Lumbering</i> Lumberman | Rumford Falls, Que. | " 17 | 1 | 1 | Double fracture of leg. | While working in the woods. |
| Shantymen | Mattawa, Ont. | " 1 | 1 | 1 | " | Missing for several weeks; believed to have been devoured by wolves. |
| <i>Mining</i> Repeider | Kaministiquia. | " 27 | 1 | 1 | Badly frozen. | Men were lost in the woods and became demented from cold and hunger. |
| Miner | Morrissey, B.C. | " 10 | 1 | 1 | " | Workman crushed by a coal car. |
| " | Sydney, N.S. | " 16 | 1 | 1 | Badly crushed. | By a fall of stone in No. 3 slope. |
| " | Extension Mines, B.C. | " 10 | 1 | 1 | Three ribs broken and kidney injured. | " |
| " | " | " 20 | 1 | 1 | Wrist badly cut. | By a fall of coal. |
| " | " | " 21 | 1 | 1 | Collar bone broken and badly crushed. | While pushing a box. |
| Employee of mines. | Morrissey, B.C. | " 11 | 1 | 1 | " | Fell 36 feet off a trestle connecting coal bins with coke ovens. |
| <i>Building Trades</i> Bricklayer | Windsor, Ont. | " 19 | 1 | 1 | Bad shaking up. | Workman by the giving way of a scaffold was precipitated 40 feet. |
| Construction foreman | Hochelega, Que. | " 12 | 1 | 1 | Hip broken. | Accident caused by a fall from a scaffold. |
| Carpenter | Halifax, N.S. | " 4 | 1 | 1 | " | By a falling plank from a building under construction. |
| " | Victoria, B.C. | " 4 | 1 | 1 | Internal injuries. | Workman fell from a scaffold and was instantly killed. |
| " | Windsor, Ont. | " 19 | 1 | 1 | Wrist badly cut. | Precipitated 50 ft. by collapse of a scaffold. |
| " | St. John, N.B. | " 23 | 1 | 1 | " | A window sash which workman was placing in position fell. |
| Sheet metal workers. | Cornwall, Ont. | " 3 | 2 | 2 | Broken legs; one requiring amputation above ankle. | Scaffold upon which four men were at work covering the front of a building with iron gave way. |

| | | | | | | | |
|--------------------------|-----------------------|---|----|---|-----------------------------------|--|---|
| Sheet metal roofer | Montreal, Que. | " | 16 | 1 | 1 | Head cut | Workman fell 50 ft. from scaffolding. |
| Building contractor | Winnipeg, Man. | " | 14 | 1 | | Deceased, while inspecting a building, fell into the basement and received injuries resulting in death. | |
| Painter | St. Hyacinthe, Que. | " | 19 | | Several ribs broken and head cut. | Fell from a ladder suspended on a cable. | |
| Metal — | St. Thomas, Ont. | " | 4 | 2 | 2 | Severe scalp wounds. | A large piece of iron fell from the roof of workshop striking workmen on the head. |
| Blacksmith | Ottawa, Ont. | " | 4 | 1 | | Workman was struck by a loose wire dropped by a fellow workman which crossed a live wire as it fell. A jury found that by a proper enforcement of rules requiring employees to wear gloves accident might have been avoided. | |
| Lineman | Montreal, Que. | " | 25 | 1 | | Workman lost balance while on a pole and his hands came in contact with a live wire; jury recommended underground system of wires. | |
| Stationary engineer | Wallaceburg, Ont. | " | 17 | 1 | | Workman while lacing a belt was drawn around a shaft. | |
| " | Petrolia, Ont. | " | 11 | 1 | | Workman thought to have been caught in driving belt and crushed between pulley wheel and husk block. | |
| " | Fredricton, N.B. | " | 24 | 1 | 1 | Injured about head and internally. | Caught in belting and carried around the circuit. |
| Fireman | Valleyfield, Que. | " | 17 | 1 | 1 | Seriously burned | Furnace door blew open enveloping workman in flame. |
| Metal worker | London, Ont. | " | 16 | 1 | 1 | Head cut | By bursting of an emery wheel. |
| " | New Westminster, B.C. | " | 16 | 1 | 1 | Leg injured | Workman fell from superstructure of bridge striking a scow. |
| " | Owen Sound, Ont. | " | 10 | 1 | 1 | Arm shattered necessitating amputation above elbow. | Accident caused by bursting of an emery wheel which workman was operating. |
| Foundry foreman | Berlin, Ont. | " | 26 | 1 | 1 | Leg broken in three places and other injuries. | Steam box which workman was testing exploded. |
| Firemen | Newmarket, Ont. | " | 28 | 2 | 4 | Scalds and bruises of varying degrees of severity but all serious. | Explosion of 100 h. p. boiler in the factory of the United Factories, Ltd., causing the wrecking of boiler room and machine shop. Cause undetermined at close of month. |
| Woodworking Trades | Lindsay, Ont. | " | 11 | 1 | | Several others slightly injured. | Workmen while operating a butting saw was drawn into the saw. |
| Mill hand | London, Ont. | " | 13 | 1 | | A piece of timber was thrown back striking workman, who was operating a band saw, on the head. | |
| Car builder | Malbaie, Que. | " | 12 | 1 | 1 | Loss of three fingers. | While operating a circular saw. |
| Mill hand | Pt. St. Charles, Que. | " | 12 | 1 | 1 | Hand cut off. | Caught in circular saw. |
| Mill foreman | St. Ephrem, Que. | " | 17 | 1 | 1 | Loss of two fingers. | Hand slipped on a saw table. |
| Mill hand | Rumford Falls, Que. | " | 17 | 1 | 1 | Loss of arm. | Was caught in a defective machine. |
| Railway Service — | Maniwaki, Que. | " | 16 | 1 | | Workman fell while coupling cars. | |
| Conductor (construction) | Windsor, Ont. | " | 3 | 1 | | Deceased while attempting to board a yard engine fell and was run over. | |
| " (freight) | St. Hyacinthe, Que. | " | 7 | 1 | | Run over by a train. | |
| Station agent | Chatham, Ont. | " | 23 | 1 | 1 | Scalp wound and shoulder injured. | In a collision between a mixed train and a beet root special the fireman of the former was killed and the engineer injured. |
| Engineer and fireman | DeLothbrière, Que. | " | 25 | 1 | 1 | In a collision on the I. C. R., between express and freight trains. The engineer and fireman of the express received injuries from which the former died. | |
| " | Beaverton, Ont. | " | 2 | 1 | | In a wreck supposed to have been caused by a defective coupling | |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER—Continued.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |

| Diver. | " | 11 | 1 | Hungarian employed on Ontario Power Co.'s works, struck on head by piece of falling rock. Caught by current and held down under 20 feet of water for three hours. Rescued at point of death. |

There were 10 accidents reported in the *building trades*, all but two being the result of falls from scaffolding at a height from the ground, four carpenters and two sheet metal roofers being among the number.

In the *metal and engineering trades*, accidents to stationary engineers occupied the most prominent place, there being 3 on the list, of which two were fatal, all resulting from the workmen being caught in belting. There was in addition to the accident to firemen at Newmarket above referred to, a second accident involving serious injury to a fireman at Valleyfield. Two linemen were killed by coming in contact with live wires, and 4 metal workers, of whom one was a foundry foreman, are on the list of injured, two being injured from the bursting of emery wheels, and one by the bursting of a steambox during a test. Two blacksmiths at St. Thomas received injuries from the fall of a piece of iron.

Under the heading of the *woodworking trades* two fatal accidents were reported to a mill-hand at Lindsay, Ont., and a car-builder at London, Ont., respectively. Two mill-hands and a mill foreman at different points in Quebec made up the list of the injured.

In the *railway service* there were two accidents in which freight conductors lost their lives. Two collisions also occurred in which an engineer in the one case and a fireman in the other lost their lives, while the remaining fireman and engineer in each case were seriously injured. There were in addition five other accidents to firemen, two of them fatal. Three brakemen were also killed and one injured. The number of railway labourers killed was exceptionally large, reaching the total of six killed and seven injured.

Under the heading of *general transport*, the accident at Lévis was the most important. There were three accidents to longshoremen, none of them fatal but all of a serious nature and three fatal accidents to

sailors in addition to the loss of the *Emerald* already mentioned.

Under the heading of *miscellaneous* the most important accident was that by which two employees of a carbide manufactory at Shawinigan, Que., lost their lives by coming in contact with an electric heater. Accidents to labourers number 3, one of them fatal. There were three serious accidents to caretakers of public buildings, two of which were caused by a fall while cleaning windows, and the third by an explosion of an acetylene gas machine.

Disasters on the Great Lakes.

The unusually severe storms of the marine season of 1903 on the Great Lakes rendered it particularly hazardous to the men engaged in that important branch of the transportation industry. Though complete returns of the losses of life were not procurable the following list of the vessels wrecked up to November 1, together with a statement as to the cargo, place of stranding and insurance will throw light on the nature of this class of employment from the standpoint of the danger to crews :—

April 30—Steamer 'Belle P. Cross', stranding, Superior, lumber; hull, \$9,000; cargo, \$5,000.

June 11—Schooner 'H. H. Badger', collision, Erie, coal; hull, \$2,000; cargo, \$3,000.

June 13—Steamer 'C. H. Davis', foundered, Erie, stone; hull, \$5,000; cargo, \$3,000.

June 25—Steamer 'John Craig', stranding, Michigan, grain; hull, \$65,000; cargo, \$50,000.

June 23—Tug 'O. W. Cheney', collision, Erie; hull, \$7,000.

June 30—Steamer 'T. D. Stimson', fire, St. Clair, lumber; hull, \$22,000; cargo, \$7,500.

July 13—Barge 'Champion', collision, St. Clair; hull, \$5,000.

July 18—Schooner 'Gen. Franz Sigel', foundered, Huron, coal; hull, \$3,500; cargo, \$3,000.

July 22—Steamer 'Waverley', collision, Michigan, coal; hull, \$25,000; cargo, \$6,000.

July 25—Steamer 'V. Swain', foundered, Superior; hull, \$18,000.

August 8—Steamer 'Metropole', foundered, Huron, staves; hull, \$8,000; cargo, \$3,000.

August 30—Steamer 'Fittsburg', fire, Huron; hull, \$60,000.

September 15—Tug 'Champion', fire, Erie; hull, \$18,000.

Sept. 15—Schooner 'Moonlight', foundered, Superior, ore; hull, \$9,000; cargo, \$6,000.

September 16—Steamer 'Welcome', stranding, Michigan; hull, \$10,000.

September 17—Steamer 'Joe', stranding, Michigan, merchandise; hull, \$3,500; cargo, \$2,500.

September 19—Steamer 'A. A. Parker', foundered, Superior, ore; hull, \$55,000; cargo, \$10,000.

October 4—Steamer 'E. L. Hackley', foundered, Green Bay; hull, \$5,000.

October 4—Barge 'H. W. Sage', foundered, Michigan, ore; hull, \$10,000; cargo, \$6,000.

October 7—Steamer 'Adventure', fire, Erie, lime; hull, \$2,500; cargo, \$1,500.

October 9—Steamer 'J. N. Glidden', collision, St. Clair, ore; hull, \$33,000; cargo, \$7,500.

October 15—Steamer 'Marquette', foundered, Superior, ore; hull, \$30,000; cargo, \$10,000.

October 19—Steamer 'C. W. Peck', stranding, Ontario; hull, \$2,500.

October 22—Barge 'Saveland', stranding, Superior; hull, \$10,000.

October 23—Schooner 'John Marks', foundered, Erie, stone; hull, \$2,000; cargo, \$1,500.

October 26—Barge 'Grace Whitney', stranding, Huron, coal; hull, \$3,000; cargo, \$1,500.

October 26—Tug 'Silver Spray', fire, Erie; hull, \$5,000.

October 26—Steamer 'Advance', fire, Superior, merchandise; hull, \$50,000; cargo, \$50,000.

October 26—Steamer 'W. F. Sauber', foundered, Superior, ore; hull, \$75,000; cargo, \$12,000.

October 27—Steamer 'Manhattan', fire, Superior, grain; hull, \$50,000; cargo, \$65,000.

Total value of hulls lost, \$603,000; cargoes, \$254,000.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE MONTH OF NOVEMBER.

THERE were 10 instances of changes in the rates of wages or hours of labour during the month of November concerning which the Department was able to obtain more or less detailed information as presented in the accompanying table.* Of the changes recorded, 5 were in the nature of an increase in wages, 1 of a decrease in wages, and 5 of a decrease in the hours of labour. The decreases in hours, it will be noted, are chiefly of importance as indicating seasonal changes in the amount or other condition of employment.

Increases in Wages.

An important increase of the month was that by which conductors, baggagemen and brakemen on the Interecolonial Railway received substantial advances. Full particulars of this change of an official nature were not obtainable by the Department at the close of the month, but from other sources it was stated that conductors will, roughly, receive an increase of 50 cents per day with a detention rate of 35 cents per hour; baggagemen an increase of 40 cents per day, with an allowance for baggagemasters on express trains of 20 cents a day for handling baggage; baggagemasters on the English mail train will receive \$65 a month; brakemen received increases amounting to from \$1.20 to \$2.40 per week.

Brakemen on passenger trains are allowed two uniforms a year, with a detention rate per hour after ten hours of 25 cents. Yardmen and switchmen also, as will be seen from the table, received a substantial increase. The change will date from July 1, 1903. The official decision in the matter was arrived at after a discussion at Moncton between the Honourable the Acting Minister of Railways and Canals and the general manager of the railway and a delegation representing the employees affected.

An increase reported to have been granted by the Canadian Pacific Railway Company in the closing week of the month to its engineers and firemen from Winnipeg east was an important change not included by the Department in the accompanying table on account of inability to receive a detailed and official report in time.

Increases to printers at St. Thomas, to civic carters at Montreal, and to piano workers, at Hamilton, are accordingly the only increases in wages included in the list for November, of which full particulars are given. Among the last mentioned, sounding board makers were increased from 20 cents per hour to \$4.80 per board; finishers, from 18 to 23 cents per hour; machine hands, from 20 to 23 cents per hour; veneer hands, from 12½-15 to 15-17½ cents per hour; case makers, a 15 per cent increase; gluers, from 17½ to 18½ cents per hour; and action makers, from \$8.71 per week to 23 cents per hour.

* See also the agreement governing the wages and hours of sheet metal workers at Winnipeg, Man., published under a separate heading in the present issue.

TABLE OF CHANGES IN RATES OF WAGES AND

Decreases.

An important reduction in wages which went into effect at Sydney during November was that by which employees of the Dominion Iron and Steel Company received reductions varying from 10 to 33½ per cent. The notice to the men as posted, was as follows :—

November 17.—Beginning with December 1, 1903, all wages and salaries of the employees of the Dominion Iron and Steel Company will be reduced from ten to thirty-three and one-third per cent. Common labourers will be paid \$1.25 per diem.

DAVID BAKER,
General Manager.

The bulletin issued to the machinists and furnace men notified them of a reduction of 15 per cent and 20 per cent respectively. The reduction will affect every man on the plant from officials to common labourers. Representations were made by the Provincial Workmen's Association in order to secure, if

possible, a revision of the new schedule and the good offices of the Honourable the Minister of Finance and the Honourable the Premier of Nova Scotia were sought in the course of the negotiations between the company and the men. Particular objection was expressed by the men to the reduction of the labourers' wages, which amounted to a decrease from \$1.40 per day to \$1.26. On December 27 the Grand Subcommittee of the P. W. A. met for a final discussion of the matter. After several interviews between the company and the association, it was resolved by the latter to accept the terms of the company. As negotiations were not finally concluded at the end of the month detailed information has been held over until the January *Gazette*, when complete and official returns will be available.

Another change of the month which affected a considerable reduction in the weekly wage bill was that by which 975

| 9.00 | 7.50 | | | | 1.50 | | | |

labourers employed in connection with the power construction work going on at Niagara Falls were affected. A strike followed the announcement of the decreases by the company, but at the close of the month the men had either been replaced or had returned to work at the new rate.

Notes.

In Toronto an agitation amongst bartenders was reported against the work of sorting and cleaning up on Sundays.

The salaries of teachers engaged in the Winnipeg public schools were raised during the month, representing an increase of approximately 10 per cent.

The General Officer Commanding the Canadian Militia made an announcement to the effect that the C. M. R. at Winnipeg would in future receive the same rate of remuneration as the N. W. M. P.

Loggers in some localities in British Columbia received a reduction in the hours of

labour from 10 to 8 with proportionate decrease in pay. The change represents the dullness prevailing in this branch of industry noted elsewhere in the present issue of the *Gazette*.

In spite of the close of the season of greatest activity in the agricultural industry, no marked decreases in the wages of labour have been reported, and in the province of Ontario particularly, the outlook for employment at good wages throughout the winter is bright. A rate of from \$16 to \$18 is stated to be the average wage for the coming season.

A number of changes in hours in the building trades at various points in Canada were reported as the result of the diminishing hours of daylight and the general lessening of employment in the out-of-door trades. The change reported from Chatham may be regarded as a typical in-

cident of this, a complete record of which the Department was unable to obtain at the end of the month.

An important decision by the city council of Toronto was that which followed the judgment of Chancellor Boyd, quoted in extenso in the present issue of the *Gazette*, under the heading of recent legal decisions in reference to the appearance of the union label on clothing manufactured for the city. In order to insure the payment of fair

wages to labour employed in this connection it was decided by the council that a standing scale, should be paid to all tailors doing work for the city.

In the matter of the wages of customs clerks at Vancouver, it has been arranged that \$3 a night will be paid to clerks to issue clearance papers for boats. Formerly a clerk received \$2.50 for each boat, four clerks taking turns at the work.

TRADE DISPUTES DURING THE MONTH OF NOVEMBER.

THERE were only four new disputes of importance during the month of November, three of which involved large numbers of men, and one of them reached serious dimensions. In the disputes existing prior to the beginning of the month there was little change in the majority of cases, and none of them greatly affected industrial conditions. The place of greatest disturbance was Quebec, where a prolonged lock-out of boot and shoe workers, involving almost all the shoe factories there, affected indirectly many subsidiary industries, as well as the retail trade of the district. The other disputes were at Niagara Falls, Ont., St. Mary's Ont., and at Springhill, N.S.

Analysis of Trade Disputes During the Month.

Number and magnitude.—The total number of disputes reported to the Department as being in existence during November was eleven, the same number as in the previous month and as in November, 1902. Of the eleven, seven began before November 1st, and four after. The old ones include two in which only the employees continued to be concerned, the firms involved having succeeded in filling their places, and one which was omitted from the November *Gazette* as it involved originally not more than five men. Two old disputes and two new ones were definitely settled in the course of the month, leaving three old and two new ones affecting both employers and

employees in existence on December 1st. The number of establishments involved was approximately 53, and the number of men directly concerned was about 6,550.

Loss of time in working days.—The loss of time in working days by men directly affected was approximately 75,174, an increase of about 61,000 over the previous month. This large number was due to the lockout of shoe workers in Quebec, which involved 5,000 men, with a loss of 70,000 working days.

Trades affected by new disputes.—The industries affected by new disputes included building construction, shoe manufacturing, mining and textile manufacturing.

Causes of new disputes.—The following were the causes of the new disputes:—

| | |
|---|---|
| Reduction in wages..... | 2 |
| Demand payment by pièce-work instead of by day..... | 1 |
| Demand for payment by measurement, instead of by tally..... | 1 |
| Lock-out due to strike in violation of agreement..... | 1 |

Disputes Commenced Prior to the Beginning of the Month.

Of the seven disputes which were in existence before November 1, one concerning iron moulders at Smith's Falls resulted in favour of the company, and one of piano workers at Hamilton was settled by arbitration. Striking ironmoulders at Toronto

were reported to be still out of work, but the companies had all resumed operations. No change was reported with regard to a strike of boilermakers at London, Ont. A small strike of shoe-machine workers at Quebec developed into the largest and most serious lockout of the year, an account of which is given below, under the heading of 'New Disputes.'

In the case of a strike of quarrymen at Shirkston, Ont., the company claimed that they had succeeded in filling the places of the strikers.

By the end of the month, 81 contractors in all were reported by the union to have signed an agreement with the union of carpenters and joiners at Winnipeg.

Settlement of Strike of Piano Workers at Hamilton, Ont.

In the October number of the *Gazette* is given an account of a strike of piano workers of the firm of Ennis & Co., Limited, of Hamilton, Ont. As stated, the firm declared its intention to re-open its establishment on November 2nd as an 'open shop,' on account of the union failing to arbitrate promptly. A few days later, the strikers received instructions from the headquarters of their union, authorizing them to seek arbitration. They accordingly approached the company again and were informed that the firm was willing to adjust its differences by arbitration, provided the men returned to work. The strikers refused to do so, and eventually the firm yielded the point, and nominated one of its members as arbitrator for the company. The strikers named one of themselves as their representative, and the two chose a third. On November 21st, the arbitrators made their award, giving all the employees an increase of from 3 to 5½ cents per hour, and to the piece-workers an increase of about 15 per cent. They also decided that the men should work 55 hours a week. On going to the factory the strikers discovered that they would not all be taken back, the company having engaged some non-union men, whom it was unwilling to dismiss.

The strike was continued in consequence. On the 27th, a statement was signed by representatives of the men and the company to the effect that all differences between the company and its employees was called off, and any union man was justified in working in the factory, that the company would discharge all non-union men then in its employ, and to engage strikers who wished to return, at the wages assigned by the arbitrators. There were only four strikers who were willing to accept the terms of the arbitration award, the rest of them, seventeen in number, sought work elsewhere.

Strikes at London, Ont.

The attention of the Department of Labour has been called to a misunderstanding which has arisen in connection with the reports of the strikes of cigarmakers and machinists at London, Ont., in the October issue of the *Gazette*. In the table of that month, it was stated that these disputes had 'lapsed.' This expression, it might be explained, has been used in the *Gazette* to indicate cases where strikes have not been declared at an end, but where industrial conditions have ceased to be affected, either on account of all the strikers having obtained work on the conditions demanded, even when some employers failed to agree to the terms, or on account of the employers succeeding in filling the places of the strikers, although some of the latter might still be on strike. Reports received by the Department indicate that the strike of cigarmakers belongs to the former category, and that of the machinists to the latter, but in neither case has the strike been officially declared off. A strike of boilermakers in the factory of E. Leonard & Sons, which began on September 1, continued throughout the month with no change. With reference to these disputes might be mentioned the prosecution of four strikers on the charge of besetting certain premises, in order to induce men engaged by the company to refrain from going to work. On November 30, the magistrate found one of them guilty on one

charge, but suspended sentence. On another count the defendants were bailed to appear at the December sessions, and other charges were enlarged until the following week.

New Disputes.

The only new disputes of much importance were a strike of day labourers at Niagara Falls, Ont., and a lockout of boot and shoe workers at Quebec. An account of these disputes is given below.

With regard to the other disputes of the month, a strike of flax mill workers at St. Mary's, Ont., was declared on November 16, owing to reduction in their wages from \$1.50 to \$1.25 per day. On the 23rd they returned to work at the reduced rates. No union was involved. On November 30, 1,000 coal miners at Springhill, N.S., declared a strike on account of a decision of the company to pay them according to the number of the trams filled instead of according to the area of coal dug out.

Strike and Lockout of Shoe-workers at Quebec.

On Friday, October 30, five shoe machine workers, engaged as edge trimmers in the factory of Wm. A. Marsh & Co., Limited, of Quebec, went out on strike, being dissatisfied with the conditions of their employment. The strikers declared that they were the only employees in the factory who were paid by the day, and demanded payment by piece-work instead. They also complained of the treatment accorded to them by the foreman, alleging that they were continually being found fault with for no sufficient cause, and that on one occasion three days' pay had been unfairly deducted. The company stated that on October 30, without any previous notice, the five men informed the manager that they would no longer work by the day or week, but that the system had to be changed to piece-work, and because this change was not made they immediately stopped work. Owing to the minute specialization of work in this industry, the cessation of a few men can affect a whole factory, and a first re-

sult of the action of the five workers in going on strike was to throw out of employment all the men in the bottoming room, where they had been engaged, and the company alleges that eventually half the employees, or about 219 men had to be laid off.

The strikers were members of the Brotherhood of Shoe Machinists, which had made an agreement with the Shoe Manufacturers' Association in 1901, for the settlement of disputes by arbitration.*

In accordance with the terms of the agreement, the firm immediately appealed to the Committees of Conciliation and Claims. These committees, the former consisting of three employers and the latter of three employees, decided at a joint meeting, held on October 31, that the strikers should return to work at once. As they refused to do so, the president of the machinists' union was notified that the case would be brought up before the Commission of Arbitration. At a meeting of the Commission on November 11, the Manufacturers' Association complained that the union was abetting the five striking machinists, and requested that the clause in their agreement, giving preference to union men be rescinded. The president of the Brotherhood of Shoe Machinists stated that he had notified the men to return to work, but they had refused to do so, and he had also asked other machinists to replace them, but they had also refused. On the 13th, the Arbitration Commission rendered their decision, maintaining the complaint of the manufacturers, and condemning the Brotherhood of Shoe Machinists to pay the costs. They also declared that the manufacturers were justified in asking for the cancelling of the preferential clause. On that day, the following notice was posted up in all the factories of the Manufacturers' Association:

In default of engagements with the shoe machinists we will suspend all operations in our factories this evening. We will resume operations when we will have engaged a sufficient number of machinists to run a set of machines in each factory. Consequently work in all the

* See *Labour Gazette* for Feb. 1901, Vol. I, page 294, and for November, 1903, page 416.

departments will be suspended, and will be resumed in future only in proportion to the number of shoe machinists whom we will engage.

Commencing at noon on Saturday, blank forms of engagements between manufacturers and shoe machinists will be placed in our offices at the disposal of any of the latter who desire to sign.

(Signed) The members of the Quebec Boot and Shoe Manufacturers' Association.

This action of the Manufacturers' Association created a lockout in all of the factories belonging to members of the association, and affected directly some 5,000 employees.

The forms of engagement referred to in the above notice read as follows :—

Quebec, November, 1903.

I, the undersigned of Quebec, shoe machinist, do, by these presents, engage myself in the same capacity to shoe manufacturer, of Quebec, for six months from the 16th November instant, at the rate of per week of 60 hours, or at per day, or by piece work at the following scale...

I can engage help on the condition that the choice is approved by my employer.

I shall be punctual, and fulfil the duties and obligations of a good workman.

It is hereby understood that..... shall only be obliged to furnish me with work in such proportion as may have, and as may judge fit to give me, and that shall only be bound to pay me, in cases where the week may not be complete, for the time actually made, in proportion to the rate of my wages by the week.

And I have signed

Witness :

Accept the above agreement.

As none of the machinists would sign this agreement, the manufacturers made the following changes in it on November 21st. Instead of stating that the employer should only be obliged to furnish work in such proportion as he might judge fit to give, a clause was inserted reading 'And according to the customs in force until now in the factories, as regards the distribution of work,' and the following clause was added 'In case my employer would furnish me work during less than four days a week, during four consecutive weeks, the present engagement will be null, and I shall have the right to leave the factory after giving my employer eight days' notice.'

These concessions of the manufacturers, however, had, up to the end of the month, no effect, and none of the men had signed the agreement at that time. On the 26th,

the women workers who were shut out held a meeting and appointed delegates to interview both parties and to petition them to bring an end to the dispute, but they failed to accomplish anything as both sides remained firm.

The dispute involved directly twenty factories and as already mentioned almost 5,000 employees. In addition the tanners, leather dealers, and box manufacturers of the neighbourhood, were more or less indirectly affected.

Strike of Labourers at Niagara Falls, Ont.

On November 2nd, contractors engaged in construction work for the new electrical power companies at Niagara Falls, Ont., decided to reduce the wages of unskilled labourers from 20 to 17½ cents per hour. About 200 men employed by the Niagara Construction Company at once stopped work, and it is alleged that by threats of violence on the part of the 200, about 850 men, employed by six other firms were compelled to abandon their work also. The strikers, composed of negroes and foreigners became so threatening that requisitions were sent for troops, and precautions were taken to protect the property of the companies from destruction. Several assaults were committed by the rioters, but the arrival of the militia, and the arrest of many of the leaders quelled the disturbance, and on November 5, construction work was begun again. Many of the strikers returned at the reduced wages, and others left the country.

Minor Industrial Disturbances.

In addition to the disputes enumerated above, two strikes of brief duration occurred at Winnipeg. On November 11, the local branch of the Amalgamated Sheet Metal Workers' International Alliance declared a strike, in order to enforce a demand for recognition of the union and terms of an agreement. Fifteen employees immediately signed the agreement presented, and the strike was thus speedily ended. An account of the settlement will be found on another page of the present number of the *Gazette*.

TABLE OF TRADE DISPUTES OF THE MONTH OF NOVEMBER.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No. of Firms or Establishments affected. | Approximate No. of Employees affected. | | Date of commencement. | Date of termination. | Remarks. |
|---|-----------------|-------------------------|---|--|--|--------|-----------------------|----------------------|---|
| | | | | | Di- | Indi- | | | |
| | | | | | rectly | rectly | | | |
| | | | | | | | | | |
| DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH. | | | | | | | | | |
| Ontario..... | Toronto .. | Ironmoulders..... | Demand for 9-hour day..... | 3 | 25 | | June 12..... | | Strike not declared off, but companies claim to be no longer affected. |
| Ontario | London..... | Boilermakers..... | Discharge of an employee..... | 1 | 6 | | Sept. 21..... | | No settlement reported at end of month. |
| Ontario | Smith's Falls. | Iron moulders..... | Refusal of the company to discharge a union member in arrears for dues. | 1 | 25 | | Oct. 6 Nov. 2..... | | Strike not declared off, but company re-opened shop, as an open shop. Some strikers returned, about half left the town. |
| Ontario..... | Sherkston | Quarrymen | Change in method of wage payment, and other grievances. | 1 | 84 | 20 | " 6..... | | No settlement reported at end of month, but company allege they are no longer embarrassed |
| Ontario..... | Hamilton | Piano workers..... | Demand for increase in wages and shorter hours. | 1 | 21 | 10 | " 19 Nov. 27..... | | Settled by arbitration but only four strikers returned to work. Increase awarded $3\frac{1}{2}$ to $5\frac{1}{2}$ cts. per hour, piece-workers got 15 per cent over old prices. |
| Manitoba .. | Winnipeg. | Carpenters and joiners. | Demand for minimum wage of 35 cents an hour, 9-hour day, and recognition of unions. | 20 | 175 | | " 20..... | | Industrial conditions ceased to be greatly affected, all but 8 contractors having signed agreement by end of month. |
| Quebec..... | Quebec..... | Shoe machine workers. | Demand for payment by piecework instead of by day. | 1 | 5 | 212 | " 30..... | | No settlement reported at end of month. Strike resulted in lockout on Nov. 13. |

DISPUTES WHICH BEGAN DURING THE MONTH.

| | | | 7 | 200 | 850 | Nov. 2 | Nov. 5 | |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

On November 17th, forty-two operators and officials of the Canadian Pacific Railway Company's telegraph office in Winnipeg went out on strike as a protest against the dismissal of four men, who were stated to be members of the Commercial Telegraphers' Union. After a few hours, in the course of which the commercial operators at Swift Current, Medicine Hat and Calgary were reported as being on strike in sympathy with them, a conference was arranged with the superintendent of telegraphs in Winnipeg. The strikers were informed by him that the dismissals were made because it was necessary to reduce the staff. The men went back to work on the understanding that the dismissed men would be reinstated, and that any reduction in the staff that was necessary would be made by discharging juniors and the most recent additions to the staff.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of November, and which have been reported to the Department.

UNIONS FORMED DURING THE MONTH OF NOVEMBER, 1903.

The Department has received notice of the following organizations as having been formed during the month of November, 1903 :—

New Brunswick—

Moncton : Blacksmiths.

Quebec—

Grand Mere : Machinists.

" Carpenters.

" Paper makers.

Montreal : Gravel roofers.

" Brass workers.

" Building Trades Council.

Quebec : Hotel and restaurant employees.

" Civil employees.

Riviere du Loup : Machinists.

Ontario—

Brockville : Butcher workmen.

Hamilton : Waiters and restaurant employees, delivery drivers.

Niagara Falls : Steam engineers.

Paris : Retail clerks.

Toronto : Ratan workers.

British Columbia—

Victoria : Laundry workers.

" Stationary engineers.

GOVERNMENT CONTRACTS FOR THE MONTH OF NOVEMBER.

(Information supplied by the Department of Public Works and Marine and Fisheries.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signatures of both parties to them, during the month of November, together with the minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule inserted in each contract.

Construction of a post office and customs building, Bowmanville, Ont., date of contract, 2nd November, 1903; amount of contract, \$17,768.80.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. |
|-----------------------------------|-------------------------------------|
| | Not less than : |
| Foreman bricklayer.. . . . | 55 cents per hour—10 hours per day. |
| “ mason.. . . . | 50 “ 10 “ |
| “ carpenter.. . . . | 35 “ 10 “ |
| Masons.. . . . | 40 “ 10 “ |
| Bricklayers.. . . . | 40 “ 10 “ |
| Stonecutters.. . . . | 50 “ 10 “ |
| Builders' labourers.. . . . | 16 “ 10 “ |
| Carpenters.. . . . | 17½ “ 10 “ |
| Joiners.. . . . | 20 “ 10 “ |
| Lathers.. . . . | 03 per yard. |
| Plasterers.. . . . | 40 cents per hour—10 hours per day. |
| Painters.. . . . | 20 “ 10 “ |
| Blacksmiths.. . . . | 20 “ 10 “ |
| Labourers.. . . . | 15 “ 10 “ |
| Plumbers and steamfitters.. . . . | 25 “ 10 “ |
| Sheet metal workers.. . . . | 20 “ 10 “ |
| Electrical wiremen.. . . . | 20 “ 10 “ |
| Driver, horse and cart.. . . . | 20 “ 10 “ |
| “ and 1 horse.. . . . | 20 “ 10 “ |
| “ 2 horses and wagon.. . . . | 35 “ 10 “ |
| “ and 2 horses.. . . . | 35 “ 10 “ |
| Timekeeper.. . . . | 20 “ 10 “ |

Between October 15 and November 30, 1903, the Department of Marine and Fisheries awarded the following contracts, containing a schedule of minimum rates of wages to be paid, and of maximum number of hours to be worked by the different classes of labour engaged upon the works.

The 'fair wage' schedules inserted in each of these different contracts were as follows:—

The construction of a wooden fog-alarm building at Cape Sharp Light Station, in the county of Cumberland, N.S. Date of contract, September 21, 1903. Amount of contract, \$1,307.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. |
|---------------------------|-----------------------------|
| | Not less than : |
| Carpenters.. . . . | \$1.50 per day of 10 hours. |
| Painters.. . . . | 1.50 “ “ |
| Masons.. . . . | 2.25 “ “ |
| Labourers.. . . . | 1.25 “ “ |

The construction of a wooden lighthouse tower at Providence Bay, Manitoulin Island, Ont. Date of contract, October 31, 1903. Amount of contract, \$1,237.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|-------------------------------|-----------------|----------------------|
| | Not less than : | |
| Carpenters.. | \$2.50 | per day of 10 hours. |
| Masons.. | 3.00 | " " |
| Stonecutters.. | 3.00 | " " |
| Painters.. | 2.00 | " " |
| Blacksmiths.. | 2.50 | " " |
| Labourers.. | 1.50 | " " |
| Driver and 2 horses.. | 3.00 | " " |

The construction of a wooden fog-alarm building on Tiner Point, in the county of St. John, New Brunswick. Date of contract, 3rd of November, 1903. Amount of contract, \$1,800.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|---------------------------|-----------------|----------------------|
| | Not less than : | |
| Carpenters.. | \$1.50 | per day of 10 hours. |
| Masons.. | 2.25 | " " |
| Painters.. | 1.50 | " " |
| Blacksmiths.. | 1.75 | " " |
| Labourers.. | 1.25 | " " |

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the number of the *Canadian Patent Office Record*, issued by the Department of Agriculture during the month of November.

IN order to examine the tendencies and progress of new inventions and discoveries, with especial reference to industrial conditions, it is convenient to divide them into seven classes, namely, those relating to electricity, metallurgy, agriculture, manufactures, means of locomotion, office utilities, and those miscellaneous inventions which do not fall within any of the other classes. During the month of August there were issued in Canada 455 patents in all. These included 21 electrical inventions, 22 having reference to metallurgy, 22 to agriculture, 37 to means of locomotion, 27 to manufacturing apparatus and machines, 14 to manufacturing processes, and 23 to office utilities.

One of the problems relating to electricity at present engaging the minds of inventors is to transform this force into heat cheaply enough for industrial purposes. Three patents were issued for electric furnaces in August, which were attempts to solve this problem. Among the other electrical inventions were a process for recovering and refining metals, three lamps, and two brakes.

The greatest number of fatal accidents is probably due to railway collisions, and inventors have long been endeavouring to devise some system for their prevention. The patents issued for this purpose in August included six railway signals, an electric semaphore, and six brakes.

The rapid depletion of forests suitable for the manufacture of paper in many countries has led to the invention of a process of converting peat into paper pulp. The means adopted consists in treating the

raw material with water, and disintegrating it at the same time. Then after the fibrous matter has been allowed to settle, it is mixed with wood pulp, crushed and disintegrated, and finally fed to paper-making machines.

There were also three new patents during the month for the manufacture of peat fuel.

The metallurgical inventions included processes for the treatment of fine iron ores for blast furnaces, for the elimination of sulphur from sulphide ores, for chlorinating and brominating ores, and two for the manufacture of alumina. In connection with agriculture there were a power plough, a potato cutting and planting machine, three grain drills and two threshing machines. Among office utilities were three book-keeping forms, three calculating machines, manifolded sales books, &c.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, NOV., 1903.

During the month of November the following orders were given by the Post Office

Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the workingmen and women of fair wages, and the performance of the work under proper sanitary conditions:—

| Nature of Order. | Amount of Order. | |
|--|------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other hand stamps; also type and brass crown seals..... | 385 | 27 |
| Making and repairing rubber dating and other hand stamps and type..... | 31 | 40 |
| Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and postmarking and cancelling ink..... | 470 | 91 |
| Repairing post office scales..... | 1 | 50 |
| Supplying mail bags..... | 275 | 00 |
| Repairing mail bags..... | 1,053 | 60 |
| Repairing mail locks and supplying mail bag fittings..... | 594 | 55 |
| Supplying mail clerks tin boxes and repairing portable and mail clerks' tin boxes..... | 53 | 75 |
| Miscellaneous orders for making and repairing postal stores..... | 3 | 20 |
| Making up and supplying articles of official uniform..... | 145 | 30 |

REPORTS OF DEPARTMENTS AND BUREAUS.

THE following reports of Departments and Bureaus were received at the Department of Labour during November, 1903:—

CANADIAN REPORTS.

Irrigation in the North-west Territories.

Irrigation in the North-west Territories of Canada, 1902. King's Printer, Ottawa, 137 pages.

The object of the report on irrigation prepared under the Commissioner of Public Works of the North-west Territories, and issued by the Department of the Interior of Canada, is to deal with the subject in such a manner as to be of value to the rapidly increasing number of immigrants interested in this question. In the

introduction it is stated that the first attempts at irrigation in western Assiniboia and southern Alberta were made a few years after the settlement of that part of the country by colonists from the United States where irrigation was practised. It was found necessary, owing to a succession of dry seasons, which prevented the growth of crops in those districts without artificial supplies of water. At present there are in the Territories 169 canals and ditches in operation, comprising a total length of about 469 miles, capable of irrigating 614,684 acres of land, and increasing its value by at least \$1,850,000. The semi-arid region comprises an area of 99,108 square miles, or 64,621,169 acres. The soil is fertile and produces an excellent crop of grass, watered by spring rains and melting snow, which renders it an excellent ranching country.

The climate is dry and healthy and the cold of the winters is modified by warm chinook winds from the west. Irrigation seems to have had the effect of diminishing the risk of summer frosts, but sufficient data have not yet been obtained for the drawing of definite conclusions on this point. An analysis of the available water supply in this region shows that not more than 15 per cent of the area is capable of being irrigated; the remaining 85 per cent must therefore always be devoted to grazing. The report contains a list of the irrigation canals and ditches, with special accounts of the most important ones, reports from irrigators on the results of their work, tables of the temperature and water supply in various localities and numerous maps and diagrams of the semi-arid region.

Canadian Shipping.

Reports of the Harbour Commissioners for Toronto, Montreal, Quebec, Three Rivers, Belleville, North Sydney and Pictou, the Pilotage Authorities, the Harbour and Shipping Masters, certain Port Wardens, together with statements of wrecks and casualties, chiefly up to December 31, 1902. King's Printer, Ottawa. 193 pages. Price, 15 cents.

In the reports of the Harbour Commissioners, issued as a supplement to the thirty-fifth annual report of the Marine Branch of the Department of Marine and Fisheries, the following statistics are given with regard to Canadian shipping:—

The total number of vessels on the register books of the Dominion on December 31, 1902, was 6,836, with a tonnage of 652,613, an increase of 44 vessels, and a decrease of 11,870 tons compared with the previous year.

The number of new vessels built and registered in Canada during 1902, was 296, measuring 30,216 tons register tonnage.

At the present time Canada ranks eighth among the maritime nations of the world, according to the total net tonnage of vessels registered in the different countries.

There were 10,153 arrivals of vessels at the port of Montreal in 1902, compared with 9,192 in 1901.

ONTARIO REPORT.

Insurance in Ontario.

Detailed Report of the Inspector of Insurance and Registrar of Friendly Societies. Transactions for the year, 1902. King's Printer, Toronto. 514 pages.

The report of the Inspector of Insurance of Ontario for 1902, is divided into three parts, of which the first deals with companies operating under the Insurance Act of Canada, and registered in the province of Ontario, the second with companies licensed, inspected and registered by the province for the transaction of insurance, and the third with friendly societies registered by the province. With respect to each company and society, there is given a list of officers and shareholders, with a statement of assets and liabilities, the Acts of parliament governing them, and other information. Attached to the report are two appendices, the first being an address on Adjustment of Losses, delivered by Mr. J. Howard Hunter, M.A., Inspector of Insurance, at the annual meeting of the Mutual Fire Underwriters' Association, held on February 27, 1903, and the second being the Judgment of Mr. J. Howard Hunter, refusing the application for registry made by L'Association St. Jean Baptiste de Montreal, Caisse Nationale d'Economie.

Among the friendly societies enumerated in the third portion of the report, there are seven branches of trade unions, twenty employees' mutual benefit associations, seven benefit associations of civil servants and other public officers, and seven benefit societies of particular industries, not classified under the other heads. The trade unions which have registered are the Cigar-makers' unions of Toronto, Hamilton and Brantford, the Typographical unions of Toronto and Ottawa, the Toronto Railway Employees' Union and Benefit Society, and the Bricklayers' and Masons' Union No. 1, of Hamilton. Annual statements of all the friendly societies registered for the year 1902 are given in the report.

UNITED STATES REPORTS.

Cost of Living in the United States.

Bulletin of the Bureau of Labour, No. 49.—November, 1903. United States Department of Commerce and Labour, Washington, D.C.

In the first five pages of the Bulletin of the United States Bureau of Labour for November, a brief summary is given of the Eighteenth Annual Report of the Bureau, which has just been completed, but which will not be ready for distribution for several months. This report presents the results of an investigation into the cost of living of workingmen's families, and the retail prices of the principal articles of food used by them. The Bulletin states that figures of income and expenditure were furnished in detail by 2,567 families in 33 States, and other data not so complete were collected with regard to 25,440 families. Taking the 2,567 families scattered throughout the country, the average size of each consisted of 5.31 persons, the average annual income was \$827.19, the average annual expenditure for all purposes, \$768.54, of which an average of \$326.90 was spent for food. The largest families were in the South Central States, the largest incomes were in the Western States, and the highest expenditure in the North Atlantic States. Statistics are given of the average cost of food per family for each year from 1890 to 1902, which varied from \$296.76 in 1896, the year of lowest prices, to \$344.61 in 1902. Particulars were not obtained for other classes of family expenditure, but an examination of wholesale prices leads to the conclusion that other articles purchased by workingmen's families in 1902 could have been but little, if at all, above the level indicated by food. The increase in the cost of living, therefore, it is concluded, was not over 16.1 per cent in 1902, when compared with the year of lowest prices.

Stock-raising and Dairying Industry of the United States.

Nineteenth Annual Report of the Bureau of Animal Industry for the year 1902. Government Printing Office, Washington, 1903. 651 pages.

The nineteenth annual report of the United States Bureau of Animal Industry

contains a large number of articles, technical, statistical and of general interest. There are ten articles on diseases of domestic animals, including scabies, the foot and mouth diseases, bovine tuberculosis, &c. Statistics are given of imports and exports of animals and animal products, live stock and the markets, the wool product of the United States in 1902, and the distribution and magnitude of the poultry and egg industry. The exports of animals and animal products from the United States to Great Britain amounted to the value of \$151,611,753 in 1902, a decrease of \$29,785,970 compared with the previous year. The shrinkages were in live cattle, fresh beef and bacon. There was also a falling off in tallow, lard and dairy products. Imports of animals and animal products in 1902 were valued at \$127,909,594, being \$14,723,537 in excess of 1901. Imports of wool and wool manufactures accounted largely for the increase.

Race in Industry.

From the Thirty-fourth Annual Report of the Massachusetts Bureau of Statistics of Labour, pages 1-120. State Printers, Boston, 1903.

The first portion of the Report of the Massachusetts Bureau of Statistics of Labour for 1903, contains a full analysis of the foreign element in the State, with special reference to the particular occupations in which the foreigners are engaged. In the United States census of 1900, the number of foreign born in Massachusetts was given as 846,324, or 30.17 per cent of the entire population, and the number of alien parentage amounted to 57.95 per cent of the population. There were 83,656 French Canadians or of French Canadian descent, and 30,457 English Canadians, or of English Canadian descent. Nova Scotians, numbering 28,648, are placed under a separate classification, as also are natives of New Brunswick and Prince Edward Island, numbering respectively 9,487 and 4,725 persons. In the final summary of the report it is stated that in the 35 subdivisions of occupations considered, those of native birth or descent predominated in

11, while those of foreign birth or descent were in the ascendancy in 24, showing that 'the strong industrial condition of Massachusetts has been secured and is held not by the labour of what is called the 'native stock,' but by that of the immigrants from all climes.

Industrial Statistics of Rhode Island.

Sixteenth Annual Report of the Commissioner of Industrial Statistics of Rhode Island. State Printers, Providence, R.I., 1903. 535 pages.

The sixteenth annual report of the Bureau of Industrial Statistics of Rhode Island is divided into seven parts. The first part is devoted to statistics of textile manufactures of the State for the years 1899, 1900 and 1901. This is followed by tables showing the valuation of property owned by textile manufacturers. Part III. gives the imports and exports of merchandise for 1900, 1901 and 1902. Other subjects treated in the report are strikes, lockouts and shut-downs in 1902, the condition of national banks, State banks, saving banks, institutions for savings, and trust companies of Rhode Island, the work of free public employment offices of Illinois, Ohio and Connecticut, decisions of courts affecting labour, and the labour laws of Rhode Island.

Kansas Industrial Statistics.

First Biennial Report of the Bureau of Labour and Industry of Kansas for 1891 and 1902. State Printer, Topeka, 1903. 472 pages.

The first biennial report of the Bureau of Labour and Industry of Kansas contains information on the following subjects:—Statistics of wage-earners for 1901 and 1902, with tables showing earnings, cost of living, savings, investments, value of homes, &c., classified according to the various trades or crafts; salaries and wages of railway employees for the two years, labour organizations, factory inspection, strikes and labour difficulties, enforcement of labour laws and labour decisions, with special articles on the following industries: the production and manufacture of brick, tile and cement, lead and zinc, car manu-

facture, and oil and gas. The proceedings of the fifth annual convention of the State Society of Labour and Industry form an appendix to the volume.

Iowa Labour Statistics.

Tenth Biennial Report of the Bureau of Labour Statistics for the State of Iowa, 1901-1902. State Printer, Des Moines, 608 pages.

Among the subjects treated in the tenth biennial report of the Bureau of Labour Statistics of Iowa are a history of the bureau, a report on factory inspection, vital statistics, wages and hours of work, new industries for Iowa, advantages gained by trade unions in Iowa without strikes and lockouts, wages, scales and agreements, reports from wage earners on their wages, hours of work, earnings, savings, sanitation of workshops, insurance carried, &c., and special reports on telegraph operators and railroad employees. A number of recommendations for legislation are made, including the restriction of the employment of children, compulsory education, compulsory boiler inspection, the making it obligatory for employers to report all accidents to the Bureau of Labour Statistics, &c.

EUROPEAN REPORT.

Industrial Conditions in Belgium.

Rapports annuels de l'Inspection du Travail, Royaume de Belgique, 8me année, 1902. 304 pages.

The eighth annual volume issued by the Labour Bureau of Belgium comprises reports from the nine provincial labour inspectors, of the country, a report on the work of the medical inspectors, a general summary of prosecutions under the factories Acts and violation of the law, and a report on the carrying out of the law of 1889, with reference to the labour of women and children in mines. The number of actions taken against employers of labour for violation of the law was 309, for 483 infractions. There were 312 contraventions of the law relating to the employment of women and

children, 66 of which were for the employment of children under twelve years of age. A number of statistical tables are contained in the volume, indicating the conditions

of the establishments inspected with regard to the number of employees, their sex and age in each class of industry, the wages paid, industrial accidents, &c.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada :—

ONTARIO CASES.

Civic Corporations and Union Labels.

Some time ago, the city of Toronto passed a by-law enacting that all clothing bought by the city should bear the union label. In pursuance of this by-law, when tenders were called for firemen's clothing, the proposed contract contained a clause that each article should bear the label of the Journeymen Tailors' Union. A Mr. Anderson, who carries on business as 'The Crown Tailoring Company,' and who does not employ members of the Tailors' Union, considered himself aggrieved by this provision, and he therefore brought an action asking for an injunction which would have the effect either of eliminating this clause from the contract, or of having his goods taken without the union label.

The matters was gone into very fully, and the court came to the conclusion that the city had no right to say that all people tendering for such supplies must necessarily have their work done by members of the Journeymen Tailors' Union. The injunction asked for was therefore made perpetual. As the point is an important one, the judgment is here given in full. The remarks of the Chancellor having a bearing on fair wages stipulations in public contracts are also of general interest :—

Chancellor Boyd : This case has been very fully and ably argued by Mr. Lobb, and if it involved the consideration of conflicting authorities, I should look more fully into it than just listening to the case as now argued. Both counsel concede there is nothing which covers the point, and it

seems to me that is quite in accordance with what has been said. The cases cited, both from the States, Manitoba, and also from British Columbia, do not touch the matters with which we are concerned here. If it were correct as argued that this was a matter of discretion, or of internal economical distribution of funds on the part of the corporation, I should entirely accede to his argument, that unless some gross abuse were proved in the exercise of the powers the court would not interfere. It does not strike me, however, that this is a case of that character at all. This is a case which is to be judged of rather in the light of those authorities which deal with by-laws passed by a municipality where the matters concern the public. This action is not by Mr. Anderson, a contractor who wishes to get rid of the objectionable contract, or to have his goods taken. It is by Mr. Anderson the rate-payer on behalf of himself, and all others. And the broad question which comes before me is whether an injunction already granted should be continued with respect to this clause in the contracts that are put forth for the tenders for the firemen's clothing, that is, that each article of clothing supplied shall bear the label of the Journeymen Tailors' Union. That is the objectionable point. In this contract there is a provision which was sanctioned by the Manitoba courts as being a legitimate exercise of power, that is, that the minimum rate of wages as stipulated shall be 18 cents an hour. There is no minimum rate to be paid for each garment, expressed in this contract, though it has been in some of the others. That would probably be on the same footing as the 18 cents an hour, and under the authority of the Manitoba case that would

be a legitimate restriction exercised by the municipality, not only to secure good work, but to see that the people were reasonably well paid for their work. That is a matter in the public interest. That is not a matter which is before me in this litigation. I have not to pass upon it at all. It does seem to me right enough to have that stipulation in, that there shall be living wages paid, and that the garments shall be up to a certain standard. There is no objection to the municipality providing that there shall be a certain standard of workmanship, or that there shall be a certain standard for payment, but that is not the point which comes before me in this particular case. The question is the label of the Journeymen Tailors' Union being a pre-requisite before the contract can be effected. I am not concerned at present at all about how the amount is to be applied, or what is paid to these workmen. The evidence here is that the workmen have been paid more than 18 cents, or certainly as much as 18 cents per hour, and have been paid more than \$4.75. It is said that cannot be traced to the particular workmen. I am not concerned just now about that, because it is not one of the issues raised before me, and the employer was not prepared to explain where and how he was making his profit while tendering for the goods. The true way of securing what is wanted in this case seems to me to be what was done. That is, there was bad workmanship, then they insisted that the rate of wages should be increased, or a better rate should be paid per hour, a better rate should be paid per piece, and then a proper inspection after the work is done. That is the true way of securing a remedy, and although one of the witnesses says that the employment of this term, the label of the Journeymen Tailors' Union had a sort of magic operation, that all the work became immediately better after that, I cannot exactly give credit to that view of the case. You may have scamp work among journeymen tailors, as well as anywhere else. You may pay them good wages, and yet have improper and botched work.

You may pay them good wages and yet have inefficient men doing the work. There is no magic result. The test is, pay men fairly, see that the work is done properly, and have proper inspection. There is no short and efficacious course for the municipality to adopt. It seems to me that this stipulation in the contract is objectionable on the same ground that it would be objectionable in by-law. That is to say it is an unreasonable condition. There is a want of equality and fairness in inserting that stipulation, on many grounds. First of all, there is a restriction at once imposed upon the area from which the skilled labour can be obtained. I do not deal with this particular man who is making the complaint, but in his case one can see how it operates. He has a large factory there, well-equipped, able to do all the work under that roof, able, as he says, by the employment of up-to-date machinery, expensive machinery, to do better work, he says. I am not here to judge whether that is so or not. Mr. McGowan will have to look to that when he inspects the stitches and so on, as to whether it is better or not, but he says he is in a position to do better work and at a cheaper rate, and that the effect of his system is that there is more skill in the operators, and it can be done under the same roof.

One of the defences raised here upon which there has been a total failure of proof is that the label of the Journeymen's Union was inserted for sanitary purposes. That is an entire fiction. No evidence has been given upon it. The whole value of the evidence is the other way. That so far as sanitary purposes are concerned the work is much better done in a factory which is open to public inspection than it could be by these journeymen tailors who may take their work home to their own houses, which will not be up to the standard required by the inspection of factories. But, this particular man has all this machinery, has these workmen, has his concern going, has expended large money in that, and he can do all the work under his own roof.

Now, he and all others in his condition, and any one else tendering, could not rely upon what staff they might have on hand of operators, but would have to cast around and see where they could get journeymen tailors union people to do the work. The evidence shows here that only about one-half or a little more than one-half of all the tailors in the city belong to this union, so that those men out of the union are cast out altogether, and though it may be, as it is said in the evidence here, if there is a scarcity of workmen, the journeymen tailors may sanction the employment of outsiders, why should employers of labour be subjected to that restriction, of going to the labour union and asking whether they may employ other workmen? So at once there is a restriction, an unreasonable restriction it seems to me, imposed in the area from which the skilled labour can be drawn. Then again there is a restriction imposed upon the employer in regard to the rate of wages which he must pay. There is a minimum imposed here. I am not talking about that, but these labour unions have it in their hands to control the rate of wages, and while 18 cents may be the minimum which the corporation requires, it is in the power of this labour union to raise that scale, and to impose more and to raise it during the progress of the work. It is in evidence already about the three scales of wages for work done on three different streets in the city. I do not know anything more about this labour organization, what means they have of letting people in or out, or making their arrangements, but there is that much at least appears, that there are three scales of wages for different streets, and that the factory of this plaintiff is not in any of those streets, so that he does not know, and no one knows, I do not know and there has been no evidence given on the point, as to what he should have to pay to get work done, his factory being on Wellington street. So that there is a hampering of the employer. Then at once it gives a preference, a privilege or priority, to those who are union workers. They may not be as good work-

ers as outsiders, he may get better labour or better assistance from those who are not in the union, but under this the union workmen have priority, they have the prior rights, and it is only when there is any shortage perhaps he can go outside.

Now, that is all wrong in the public point of view. The test of a man's capacity should be whether or not he is a good workman, whether he has skill, and the employer should certainly be free to go where he can get the best work, giving good pay for it, but this gives the privilege to the union man at the expense perhaps of more competent workmen who are outside of it.

Then again, one cannot help seeing that this is an attempt, veiled it may be, but still an attempt to set up the virtue of hand labour against the beneficial employment of machinery where parts of the garments are made by that means. It is said by some of the witnesses called here that this hand-work is very much better done than machine work. Well, that is one of the questions that was discussed long ago at the beginning of this century when machines were brought into operation, and when the operations in the harvest field were effected by machinery instead of hand-work. There was a rebellion, an uproar and cry, just in the same direction, that those machines would undo the poor. It has turned out that those are the greatest benefits the poor could have, bettered the condition of the working classes, and this is a phase of the same struggle, that the men who are working by hand are going to be interfered with, and the city apparently has been trying to give effect to that by introducing this direction that the label of the Journeymen Tailors' Union, where the men only work by hand, shall be a prerequisite, so that the machinery by which the operations are done quickly, and more certainly, and it is said more effectually, are cut out. It is impossible to say upon this evidence that the work done by this particular plaintiff is inferior at all to the best hand-work that has been done. Machine seaming, sewing and stitching, is

employed by both of them at certain stages and all the advantages which are claimed by the hand-workers, as to fitting and shaping, and the canvas, and all this kind of thing. These burly firemen all look very well dressed, and I have no doubt when they have their garments fitted on they will see that proper fits are given to them just as well by Mr. Anderson as any other person. The work turned out will likely be as well done by the employment of machinery, although the men are not Journeymen Tailors' Union men. I do not take any stock, to use a familiar expression, in that argument, that better workmanship can be secured. The evidence fails entirely to prove that. Then again, there is the other evidence which has been given, that the only distinction, so far as I can see, between what is claimed on the part of the city, representing the working people, or representing the Journeymen Tailors' Union, is that the plaintiff's work is done in detachments, that is to say, one part of a garment is made by one person who makes all of that part, and the other parts are made by another set of workmen, instead of the whole garment and the whole suit being made by one hand. One man does the whole in the one case of the Journeymen Tailors' Union, that is in theory, but it is not practically so, because the work is turned over to female workmen. One hand may superintend it. Well, that is a contest rather between the plaintiff's work and some one else's. That is a matter that Mr. McGowan will have to look to when the results come to him, but upon this evidence better results may be expected from the plaintiff's way of doing things than the other. The evidence is that these women or men who are working on the parts of the garment become more skilful, they have greater experience in that particular way, and the result may be expected to be better than if one man does the whole. That is a matter of dispute. I do not know whether that is so or not, but that is really the only distinction there seems to be between the journeymen tailors' case and the plaintiff's workmen. That is all beside the ques-

tion, as to whether it is right to have the restriction put upon all people tendering, that they must have their work done by the Journeymen Tailors' Union. I touched upon the sanitary question. I can see no reason for disagreeing with Mr. Fullerton's advice given to the council, not this year, but some time ago. It is said that another complaint had been made about this before. They called for Mr. Fullerton's opinion some time ago, I do not know how long ago, but he gave them the same opinion he does now, a considered opinion, that this was an undue restriction which it was not possible for the city to carry out. I think he advised the city rightly, and they will not be surprised if I affirm his opinion in this action and grant the injunction, or continue the injunction, with costs.

Unions and Injunctions.

A new proceeding was recently taken in the case now pending between the Canada Foundry Company and the Moulders' Union. An injunction had been granted restraining the union from interfering with the company or the men in its employment. During the continuance of this injunction, certain members of the union gave some of the company's employees the money necessary to enable them to leave Toronto. The company sought to have the men who had advanced the money imprisoned on the ground that they had violated the terms of the injunction previously granted. The court, however, held that it was not a violation of the injunction to give such financial assistance if the men had already left the company's employment or desired of their own free will to do so.

(The Canada Foundry Company vs. The Moulders' Union. Judgment given at Toronto by Chief Justice Meredith, November 20, 1903.)

The Progress of the Gurney Company Cases.

The Gurney Foundry Company recently issued a writ against a number of members of the Toronto Trades and Labour Council for an injunction restraining them

from interfering with or intimidating the company's workmen ; from wrongfully interfering with the company's customers ; from boycotting its goods and from publishing wrongful statements that they are made by incompetent workmen, and from wrongfully and maliciously conspiring against the company ; and also for damages for having already committed these acts.

These actions have not yet been tried, but on the ground that the company made out a *prima facie* case, a temporary injunction to last until the trial, was granted.

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 7.

JANUARY, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,
OTTAWA, January 15, 1904.

The present number of the *Gazette*, with the exception of such features as appear regularly each month, is devoted almost exclusively to a series of reviews of industrial conditions and movements in Canada during the year 1903. Many of the facts contained in these reviews have already been recorded in the several numbers of the *Gazette* which were issued during the past year. Where such is the case, they have in the present issue been co-ordinated and classified, and their significance as part of the industrial movement of our time shown. Much information appears, however, for the first time in these reviews.

The first of the reviews is on industrial and labour conditions during the year. It follows in general outline the plan of similar reviews given in the *Gazettes* of January 1902 and 1903. Conditions in the

several trades and industries are dealt with particularly, the foreign, imperial and domestic trade, the revenues of the Dominion reviewed, mention made of the legislation affecting labour passed during the year, and an account given of the immigration and colonization movement, and other important economic and industrial features of the year.

An article on the trade disputes of 1903 classifies these disputes according to trades and localities in which they took place, numbers affected, causes, results and other important features, and comparisons are made with the records of trade disputes of previous years.

For the first time a review has been given by the department of the nature and the growth and development of labour organizations during the year, and in this connection account is taken not only of new organizations formed during the year, but also of organizations which have been discontinued. The facts have been classified in tables, which admit of their significance being readily appreciated.

Another feature of the present issue is a compilation of statistics relating to the agricultural industry in Canada, based upon returns published from time to time during the past year by the Census Department. The compilation is such as to afford almost at a glance a comprehensive and at the same time comparative review of the industry in the various provinces.

bushels; oats, of 1,042,000, and barley, of 3,141,170. The Department's report estimates the area prepared for the crop of 1904 at 2,385,505 acres.

The report of the Ontario Bureau of Industries on the crops of the province for 1903, as based on threshing returns, show that fall wheat, taking the yield and quality into consideration, had one of the best years in the history of the province. A large yield of oats was also reported, though a portion of the crop was rather light in weight. The pea crop return shows that injury from the weevil was less than in the previous year or two. Corn was an uneven crop. Rot considerably diminished the yield of potatoes, the damage varying in extent from 10 to 60 per cent. From the standpoint of fruit-growing, the heavy yield of plums was considered the most noteworthy feature, though there was a good yield of apples, pears, peaches, cherries and grapes. Scarcity of labour and of barrels were drawbacks to the proper handling of the fruit.

The farmers and lumbermen in the neighbourhood of Kingston, Ont., complained of a scarcity of water during the month, wells and creeks being very low. The counties of Lévis, Beauce, Megantic and Dorchester, in Quebec, are also reported as suffering from lack of rain, the drought having now lasted for eight weeks.

The winter fair at Guelph, Ont., was formally opened on December 8, and largely attended during its continuance. The Maritime winter fair held at Amherst, N.S., reported likewise a successful meeting.

At the annual meeting of the Niagara Peninsula Fruit-growers' Association, held at St. Catharines, Mr. C. M. Honsberger, Jordan Station, was elected president, and Mr. Carl E. Fisher, St. Catharines, secretary-treasurer. The annual meeting of the Ontario Bee Keepers' Association was held at Toronto, Ont., in the opening days of the month, when a number of papers were read by different members. The twenty-fifth annual meeting of the Ontario Agricultural and Experimental Union was held

at Guelph on December 7 and 8, and was largely attended. The number of experimenters engaged in the co-operative work of the union has increased from 12 in 1886 to about 3,845 in 1903. The Provincial Fruit Growers' Society of Quebec met at Hemingford on December 16.

The North-west Grain Growers' convention at Regina passed the following resolution relating to transportation:—

That in the opinion of the association no system of transportation can be considered adequate for the requirements of the west that fails to give such facilities at every individual shipping point as will enable the shippers to deliver less than 50 per cent of the crop at such point in each year at the great lakes before the close of navigation. That while recognizing the railway development in the west, both actual and prospective, during the past year, the convention desires again to draw attention to the total incapacity of the existing railways to properly handle western traffic, and to the necessity of compelling said railways to better equip their lines with rolling stock. To this end the association instructs the executive to take prompt steps to put the whole matter before the railway commission as soon as such body is constituted and organized.

The grain section of the Toronto Board of Trade passed a resolution asking for a return to the old method of government inspection.

Fishing.—Operations have practically ceased for the winter season throughout Canada. Varying reports from the herring fisheries were received from the maritime provinces. In British Columbia fair catches of halibut at several points were reported. During the month the Dominion Government decided to call for tenders for two new cruisers for the protection of Canadian fisheries, one for operation on the Atlantic coast, and the other for the lakes.

Reports from the Atlantic fisheries show that operations during the past season were greatly interfered with by the dog-fish, scarcely a locality having escaped. As the fish cannot be used for food, suggestions have been made in Nova Scotia looking to the establishment of a reduction factory where the fish can be turned into glue for fertilizing.

A Salmon Fisheries Congress will convene in Seattle on January 23, 1904.

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

Lumbering.—Work in the shanties in Ontario and the eastern provinces was actively proceeded with during the month, being facilitated by the bright, cold weather and plentiful falls of snow. In British Columbia general depression, however, continues both in the mills and among loggers.

Perhaps the most noteworthy event of the month in the industry was the sale on December 9 by auction at Toronto of timber limits belonging to the province, when 826 square miles of limits were sold at \$3,677,377.50, or an average price of \$4,450 per mile. The highest price per mile paid was \$31,500; the highest previous price per mile was \$17,500, bid at the 1892 sale. The previous record of total sales was \$2,315,000 in 1892. Definite steps were also taken by the Ontario Government in the matter of adding to the forestry reservation of the province. The territory added, amounting to 3,700 square miles, is in the neighbourhood of Lake Temiskaming and the Montreal river.

The Provincial Government of New Brunswick decided to increase the stumpage on lumber cut in the province from \$1 to \$1.25 per thousand and to double the charge for the renewal of leases, making it \$8 a square mile instead of \$4 as at present. The new stumpage rate will apply to this winter's cut, and the new charge of renewals will affect all future renewals. Better means for protection of forests from fires will also be adopted.

The total shipments of lumber to the United Kingdom had fallen considerably less than last year, the United States taking the greater portion of the Canadian sawn lumber. The average price this year is stated to have been 15 per cent higher than last year.

Mining.—The activity in the Nova Scotia collieries showed a slight decline for December, though large outputs were reported. The strike of miners at Springhill was an adverse circumstance. The record for the first eleven months of the year, however, showed an increase over 1902. In British Columbia employment in the col-

lieries was active. In metalliferous mining an important event of the month was the discovery of nickeliferous copper in large quantities in Cape Breton Island. The ore body is between 270 and 280 feet wide, carries gold and silver and contains high values in copper and gold. The discovery is of great importance, as it is said the property will prove to be among the largest copper mines in the world. New gold findings at Poplar Creek, B.C., and an important discovery of asbestos in Addington county, Ontario, were also reported during the month. For an interesting statement relating to conditions of employment in gold-mining in Nova Scotia the reader is referred to the report of the Halifax correspondent in the present issue.

The output of the metalliferous mines of Ontario during the first nine months of 1903 as reported to the bureau of mines, was as follows: Gold, 7,693 ounces, worth \$139,210; silver, 19,549 ounces, worth \$10,124; iron ore, 262,409 tons, worth \$376,103; pig iron, 59,783 tons, worth \$1,051,940; nickel, 5,393 tons, worth \$2,115,957; copper, 3,911 tons, worth \$330,263; zinc ore, 950 tons, worth \$7,600. Total value, \$4,030,197.

Manufacturing.—The industry generally continued active with conditions of employment favourable in most localities. On December 15 the assets of the Consolidated Lake Superior Company, held by Speyer & Co., New York, for a loan of \$5,500,000, were bought in at public auction by Speyer & Co. for \$4,500,000. It was stated, however, that the sale would not affect the negotiations in progress for the reorganization of the company.

The final separation of the Dominion Coal and the Dominion Iron and Steel companies was effected during the month, the Bill relating thereto having passed its third reading in the Nova Scotia House of Assembly on December 8. The new agreement may be summarized as follows:—The Coal Company takes over the Steel Company's business as on June 30, 1903, assumes all the expenditures and receives the

benefit of all returns since that date. The lease is surrendered and all the assets owned by the Steel Company in connection with the business carried on by it under the lease pass to the company. These assets as set out in the agreement amount to \$3,844,431.16, but of this sum \$1,714,137.10 represents moneys spent in the property during the currency of the lease, and \$2,130,294.06 the free assets. In consideration of the surrender of the lease, of the transfer of the assets above mentioned, and of the making of a new contract for coal for the Steel Company's use, the Coal Company assumes the current liabilities of the coal business, amounting to \$685,577.61, resumes outstanding bonds and debentures of \$590,503.24, and pays the Steel Company in cash \$2,635,000. Part of this cash payment will be represented by notes of the Steel Company now held by the Coal Company, amounting to \$655,000. The former company will make a large expenditure in development work, and the latter under the new arrangement is reported in a satisfactory position. It was announced that the company would engage in the manufacture of steel rails. The head office of the company will be removed from Montreal to Sydney.

Railway construction and transportation.—Little change in railway construction conditions was reported from last month, there being a general cessation of activity with the advent of the winter season. Very favourable reports from the Temiskaming and Northern Ontario Railway were received; it is expected that the railway will be ready for complete operation in November next. The new double track on the Grand Trunk Railway between Kingscourt Junction and Wyoming was opened for traffic during the month.

Railway transportation was heavy throughout December, and complaints from several localities were received of delays caused by the volume of Christmas trade, by snow storms and through car shortages. Grain shipments from the west were severely congested, and there was considerable

discussion of the recently enacted Grain Act. An advance in rates on grain and grain products was put into effect by the Canadian railroads during December, and will affect shipments from all points in Ontario to the larger American cities, as well as to the maritime provinces. Traffic on the Michigan Central Railroad was reported exceptionally heavy during the month. During the transportation year of the Canada Atlantic Railroad, which closed on December 7th, 3,000,000 bushels more of western grain was carried than last season, while the volume of tonnage in other respects was maintained. The increase in wages granted to the employees of the Intercolonial Railway was an important development of the month.

Several important returns relating to inland navigation during the year were received in December. At Fort William and Port Arthur, for instance, the total receipts from September 1, 1903, to December 6, 1903, were : Wheat received, 16,413,372.40 bushels ; shipped, 16,023,290.50. Oats received, 67,652.32 ; shipped, 127,180.08. Barley received, 59,755.80 ; shipped, 31,513.36. Flax received, 146,539.35 ; shipped, 152,123.54. The Canadian canal at Sault Ste. Marie was open for business 256 days, and carried 5,502,185 tons of freight, an increase of 16.04 per cent over last year. East-bound freight showed an increase of 7.07 per cent and west-bound freight an increase of 60 per cent. The increases in western traffic were chiefly in coal, iron and general merchandise. Of east-bound freight, fruit, copper, wheat, iron ore and pig iron show decreases, and flour, lumber and general merchandise increases. The United States canal on the other hand showed a falling off in business.

The transportation commission, consisting of Messrs. Bertram, Reaford and Fry, held their preliminary meeting on December 16 for organization purposes, several members of the Dominion Cabinet being present. The commission will hold its first meetings in Halifax and St. John early in January.

The increased volume of inland navigation traffic during 1903 is shown by the fact that whereas in 1902 some 3,665 vessels passed through the Lachine canal west-bound, the number for 1903 was 5,030, while the total registered tonnage had increased from 182,932 to 419,781. Freight carried through the Lachine canal increased from 436,656 to 674,503 tons; grain from 16,295,602 to 22,483,438 bushels; lumber from 143,892,237 to 172,485,018. In 1902 there was collected \$97,244.79 in rentals, wharf dues, &c. The amount of money earned in 1903, though not all collected on account of rentals being free, was \$156,009.76.

The trades.—Conditions were uniformly satisfactory, with possibly a slight diminution in the total amount of employment available, though at many points, as will be seen from the reports of correspondents to the *Gazette*, exceptional activity prevailed. In the *building trades* outdoor work was practically at a standstill with the exception of one or two localities, as for example, at Halifax, N.S., and Niagara Falls, Ont., where mild weather prevailed. Bricklayers and masons were in consequence generally idle. With the indoor branches, however, the month was a good one, and already the outlook for operations in the spring has been pronounced favourable. In this connection, the building record of the city of Montreal is of interest. Seventy-two building permits were issued in Montreal in November at a stated aggregate cost of \$131,170. The list includes 49 permits for new buildings, consisting of 8 houses, 27 tenements, 5 stores, 2 factories, 1 stable, 1 warehouse and 5 sheds. There were 23 permits for alterations or repairs to 7 houses, 4 tenements, 4 stores, 2 factories, 2 warehouses, 1 hotel and 3 sheds. There were 187 real estate transfers in the city proper, amounting to \$702,909, and sales in the suburbs amounting to \$119,650. A report by the Montreal building inspector for the first eleven months of 1903 showed a total expenditure of \$4,500,000 on new buildings, as against less than \$3,000,000 last year. During November

buildings to the value of \$100,000 were erected. The buildings included 44 houses, 77 tenements, 2 factories and 6 sheds.

The *metal and woodworking trades* were generally busy, and the *printing, clothing, and food and tobacco preparation* branches, owing to the holiday season, enjoyed, especially in the opening weeks of the month, very active conditions. The *leather trades* have improved somewhat in Quebec, though demoralization in consequence of the labour troubles there was a feature; elsewhere, however, and especially in Western Canada, the trade reported a good month. At the annual meeting of the tanners' section of the Toronto Board of Trade, the retiring chairman declared that the trade had not had a very good year. The high prices ruling for hides, skins and tanning material and the uncertainty of the labour supply even at high wages having, in spite of the active demand for leather, seriously militated against profits. Prospects for the coming season, and especially with regard to the trade in the west, were stated to be very favourable. *Unskilled* labour was generally quiet, though a considerable absorption of the labour thrown on the market in November with the advent of cold weather was accomplished. This branch also profited by the fact that the heavy snow fall considerably increased the amount of employment available during the month. The lack of girls for *domestic service* was keenly felt throughout Canada, especially in Nova Scotia and Ontario.

Canadian Revenue.

The revenue of the Dominion for November, according to the regular monthly statement of the Finance Department, reached \$5,431,188.70, or a total of \$29,166,903.77 for the first five months of the current fiscal year. The total for the month shows a decline of about \$470,000 from October, though it is greater by a like amount than the return for November, 1902. The betterment for the five months amounts to over \$3,262,000. The headings under which the leading items of these increases were re-

ported are shown in the following tables:—

For the month of November :

| | 1902. | 1903. |
|--|--------------|--------------|
| | \$ cts. | \$ cts. |
| Customs..... | 2,738,663 91 | 3,228,035 87 |
| Excise..... | 1,005,554 24 | 1,138,520 67 |
| Post Office..... | 340,000 00 | 380,000 00 |
| Public Works, includ- ing Railways..... | 552,913 52 | 420,194 99 |
| Miscellaneous..... | 322,709 85 | 264,437 17 |
| Total..... | 4,959,841 52 | 5,431,188 76 |

For the five months of the fiscal year
ending November 30 :

| | 1902. | 1903. |
|---|---------------|---------------|
| | \$ cts. | \$ cts. |
| Customs..... | 15,045,470 43 | 17,646,209 23 |
| Excise..... | 4,952,911 35 | 5,443,805 51 |
| Post Office..... | 1,530,000 00 | 1,730,000 00 |
| Public Works, includ- ing Railway..... | 3,114,504 46 | 3,188,710 25 |
| Miscellaneous..... | 1,261,688 76 | 1,158,178 78 |
| Total..... | 25,904,575 00 | 29,166,903 77 |

The total expenditure for November was \$5,963,383.54, as against \$4,701,033.23 in November, 1902. For the five months the total expenditure was \$15,191,302.76, as against \$16,155,893.05 a year ago.

The sum of \$1,237,862.72 was expended on capital account during the month, the

leading items of which were \$705,345.87 expended on public works, railways and canals, \$222,891 on railway subsidies, \$141,226.80 on Dominion lands, and \$128,704.66 in bounties on iron and steel.

Foreign Trade.

As in the case of the revenue, the foreign trade of Canada continues to show an advance upon reports for a similar period, as the accompanying table supplied by the courtesy of the Department of Customs will demonstrate.

During the month of November imports entered for consumption showed an increase of practically \$300,000, and for the five months ending November 30 an increase of \$17,000,000. Exports during the month increased by over \$1,500,000, while for the five months the increase was over \$6,000,000. The most notable increases in exports for the month fall under the heading of animals and their products, manufactures, the mine, and the fisheries, the forest and agriculture showing little variation from November, 1902. For the five months substantial gains are shown under every heading except the fisheries and the forest. This rate of increase in both departments, if maintained until the close of the fiscal year, will bring the aggregate total of Canadian foreign trade, it is estimated, to half a billion dollars.

IMPORTS.

| | MONTH OF NOVEMBER. | | FIVE MONTHS ENDING NOVEMBER. | |
|------------------------|--------------------|------------|---------------------------------|-------------|
| | 1902. | 1903. | 1902. | 1903. |
| | \$ | \$ | \$ | \$ |

| Coin and bullion..... | | 33,878 | | 83,695 | | 263,933 | | 229,542 |
| Grand total exports..... | 20,390,149 | 2,054,039 | 22,104,322 | 1,884,995 | 101,523,495 | 7,128,549 | 105,388,513 | 9,303,935 |

Attention was directed during the month to the prospect for an increased trade with Japan in Canadian wheat and flour.

Statistics issued by the United States Mint Bureau show that of a total of \$47,090,595 of gold exported, \$5,847,239 were sent to Canada. The stock of United States gold coin in Canadian banks on June 30, 1903, was \$10,875,899, while the stock in the Dominion treasury on the same date was \$34,430,384. There were large imports of gold from Canada during the year.

Cheese and Dairy Exports.

Statistics relating to the shipments of cheese and dairy products from the port of Montreal during the navigation season of 1903 throw much light on conditions in these branches of industry. In round numbers the total export business in these products approached closely to \$30,000,000, showing an average increase of over \$2,000,000 per year during the last five years, representing an increase of over 57 per cent in revenue derived from the output of Canadian herds. There was an increase in the quantity of cheese exported of over

13½ per cent, while compared with five years ago the gain is over 26 per cent, and with ten years ago over 42 per cent. These gains in the quantity of output have been secured without causing a serious decline in values, prices averaging 50 cents per box higher this year than last. Compared with five years ago there has been a gain of over 78 per cent in Canadian cheese exports, shipments of cheese from Montreal during 1903 having totalled 305,952 boxes, valued at \$21,563,386. In butter, however, there has been a heavy decline in exports during the past year; the shrinkage in farmers' revenue from butter exports is estimated at 65 per cent, total shipments being valued at \$4,803,533, as compared with \$7,936,121 last year.

Trade with Great Britain.

The imports to Great Britain from Canada for the month of November were as follows:—

| | | |
|----------------------------|-----------|----------|
| Cattle..... | 14,680 | £246,487 |
| Sheep and lambs..... | 15,676 | 25,119 |
| Wheat, cwt.s..... | 1,077,000 | 375,771 |
| Wheat, meal and flour..... | 356,700 | 190,376 |
| Pease, cwt.s..... | 34,040 | 16,582 |

| | | |
|---------------------------|---------|----------|
| Bacon, cwts. | 67,078 | £166,822 |
| Hams, cwts. | 17,443 | 44,314 |
| Butter, cwts. | 20,226 | 96,094 |
| Cheese, cwts. | 178,800 | 471,521 |
| Eggs, great hundreds..... | 236,661 | 91,228 |
| Horses, head. | 21 | 630 |

A report of the Board of Agriculture of Great Britain shows that since the English ports were closed to the Argentine Republic, imports of cattle and sheep from Canada have been greatly augmented, while United States supplies have declined. Imports of Canadian bacon have increased very largely and steadily during the past five years.

Domestic Trade.

The cold, clear weather of the opening weeks of the month was an important factor in domestic trade, with the result that a heavy volume of trade in holiday goods and staples was reported. Collections were satisfactory, with the exception of a few localities affected by local depression in particular industries. Features of the dry goods trade were a sharp advance in cottons and the satisfactory showing of spring orders. Linen sales also were large, and prices of woollens firm. In groceries trade was almost entirely confined to sorting. Weekly bank clearings for the most part showed increases, though a slight money stringency was reported from a few localities, owing to conditions of a local nature.

Insolvencies during November involved a larger amount of defaulted indebtedness than in November, 1902. The total commercial defaults numbered 89, with liabilities of \$620,513, compared with 89 failures a year ago for \$460,984. One failure exceptionally large was in the manufacture of machinery, involving about \$200,000. The total manufacturing defaults numbered 20, as against 24 last year. Five of the manufacturing classes reported no suspensions, and five others only one default each.

At the annual meeting of the Bank of Montreal, held on November 7, a very satisfactory report was presented, the rest fund now amounting to \$10,000,000. The Bank of Ottawa held its 29th annual meeting on November 29, when net profits amounting

to \$335,640 were declared and \$100,000 added to the reserve fund, which now amounts to only \$82,131 less than the paid-up capital. The bank added over two million to its deposits and still more to its current loans and discounts during the year. The amalgamation of the new City and Counties Bank of Ottawa with the Crown Bank of Canada was announced on December 14. The head office will be in Toronto, and business will be begun in a few months.

Proceedings of Labour Organizations.

The annual convention of the *National Union of Bricklayers and Masons of Ontario* was held at Brantford in December. Representatives of seventeen unions throughout the province were present. The principal questions discussed included the jurisdiction of unions, the inspection of buildings under construction, the proposed legislation in reference to the officers of international unions, and the open shop question. By referendum vote the union decided in favour of a death benefit feature of \$100 to members who have been six months in good standing. The following new officers were elected:—President, T. Izzard, Toronto; Vice-President, E. Chamberlain, Collingwood; Secretary, H. Rymill, London; Treasurer, C. E. Beard, St. Thomas.

The amalgamation of the five labour councils of the city of Toronto into a new council to be known as the Central Trades Council was decided upon in December, the fifty unions voting on the question being, with one exception, namely, the Stonecutters' Union, in favour of the scheme. The trades council affected are the District Labour Council, the Building Trades Council, the Woodworkers' Council and the Allied Printing Trades Council. About 16,000 union labourers will be represented in the new body, the final organization of which will be completed in January.

The suggestion of the Building Trades Council of Toronto that differences arising between contractors and workmen on build-

ings in process of erection in that city should be referred to arbitration, which was submitted to the Toronto Chapter of the Ontario Association of Architects, was rejected by that body, and a resolution passed in its place declaring that while the architects were heartily in favour of the principle of settling disputes by arbitration, they could not advocate the insertion of an arbitration clause in contracts so long as the Building Trades Council or its component unions could not be held legally responsible for any agreement into which it might enter.

Notes of the Month.

The chairman of the finance committee of the city council of Ottawa reported a surplus of \$10,000 for 1903, in spite of the fact that \$37,000 had been spent in meeting the fuel deficit and on fire relief.

The completion of *the breakwater at Port Colborne* at a cost of \$515,000 was announced by the Dominion Department of Public Works. The structure is 4,450 feet long and 50 feet wide, and protects the entrance to the Welland canal from south-west winds.

A meeting of *the unemployed of the city of Toronto* was held on December 24, when a resolution protesting against the encouragement of indiscriminate immigration and against the alleged misrepresentation of industrial conditions by employers, which was stated as the cause of much of the immigration in question, was passed.

The total expenditure by the city of Toronto, including expenditures on water-works, during 1903 was estimated at \$1,212,444.16, an increase of about 10 per cent over last year. Some 316 separate works were undertaken, and the construction of 51 private permanent works superintended. About 35 miles of permanent sidewalks were constructed.

It was reported that during the first eleven months of the year, 110 new post offices were opened in the Winnipeg district, which includes the territory lying between the town of Rat Portage and the Rocky

Mountains. The increase is the largest on record within a similar period, and indicates the progress of development in Western Canada.

On December 22 a commission was appointed by the Dominion Government to proceed to Europe to inspect the various plants that are using *the thermo-electric process for the smelting of iron ore and the making of steel*. There are five of these establishments in Europe, and these will be visited by the commission. The commission consisted of Dr. Haanel, Superintendent of Mines, and Mr. C. E. Brown, of Peterborough.

On December 1 the board of arbitration appointed by the Employers' Association of Toronto and by the employees affected in the case of a *strike of rubbers in the piano factory of the Gerhard-Heintzmann factory, Toronto*, gave out the following verdict:— 'On the evidence adduced the decision of this board is that matters shall remain as they are until May 1, 1904.' The evidence was taken at three evening sessions of the board.

The Associated Boards of Trade of Southern British Columbia held their annual convention at Rossland, B.C., in the opening week of the month. Resolutions were passed recommending the appointment of commissioners to report on the needs of the mining industry, the publication of government bulletins on new processes of treatment of refractory ores, the abolition of the 2 per cent tax on ores, and thanking the Federal Government for granting the lead bounty.

The charter of incorporation for *the Imperial Coal and Coke Company, Limited*, was granted by the Dominion Government, the company to be capitalized at \$4,500,000 and to operate coal areas in the East Kootenay district, B.C.

A company to be known as *Corundum Refiner, Limited*, and to be capitalized at \$1,000,000 has secured some 600 acres of corundum land in Renfrew county, Ont., and will work a large corundum plant there,

an agreement for the completion of the plant by July, 1905, having been signed. The company will be the third corundum company operating in Eastern Ontario.

The Employers' Association of Toronto was incorporated under the Ontario statutes during the month. The objects, as stated in the application for incorporation, are as follows :—

To protect its members in their rights to manage their respective businesses, in such lawful manner as they may deem proper.

The adoption of a uniform legitimate system whereby members may ascertain who is, and who is not, worthy of their employment.

The investigation and adjustment, by the proper officers or committees of the association, of any question arising between mem-

bers and the employees, when such questions shall be submitted to the association for adjustment.

To endeavour to make it possible for any person to obtain employment without being obliged to join a labour organization, and to encourage all such persons in their efforts to resist the compulsory methods of organized labour.

To protect its members in such manner as may be deemed expedient against legislative, municipal, and other political encroachments.

The organization of the *Quebec Master Printers' Association* for the purpose of mutual aid and to promote the general interests of the printing business in Quebec was effected during the month.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the past month was not so active as in November. Labour, skilled and unskilled, finds it hard to get work. This time last year labour was in great demand, but as there is always a large floating population in Cape Breton, the permanent workmen will not be much hampered by the non-residents, who will gradually find their way out of the island until summer brings the usual activity. While shipping has decreased, railway transportation has suddenly increased. Large quantities of coal are being rushed up to the northern part of the Intercolonial Railway before snow blockades prevent its entrance. Other orders are also being filled along the railway towns. Wholesale and retail trade has been a little better than last month, but much below the volume of the same month last year.

Springhill miners were on strike for eight days in the beginning of the month.

The method of payment was the cause of the dispute, the men wanting to be paid by cubic measurement of coal, the company insisting on paying the men by the box. A compromise was effected, the men agreeing to furnish a man to load the coal at the bottom of the coal chute, and not to dock for stone falling out of the roof of the chute.

CONDITION OF LOCAL INDUSTRIES.

Mining, while not dull by any means, is not so brisk as last month. The Nova Scotia Steel and Coal Company has single shifted in all its collieries, and it is not as anxious for large outputs. The development work, however, is being continued, so that the mines will be in readiness for better work when the spring shipping commences. The Dominion Coal Company has also placed two of its collieries on single shift. Development work will also be pushed ahead during winter at all 'Dominion' collieries. Banking the coal in heaps is now going on in Cape Breton because navigation is closed, railway transportation being too limited and costly to

permit of the whole output of the collieries being carried to market.

The new *steel rod mill* being constructed by the Dominion Iron and Steel Company is to be rushed as soon as the machinery arrives. In the meantime it is going up slowly.

The forces have been increased at New Campbellton *dolomite quarries*, while the numbers have been reduced at Marble Mountain.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons, carpenters and joiners, are not quite so active as last month. Lathers and plasterers have entered their dull season, and work is not so brisk. Steam-fitters are fairly well employed. Builders' labourers are not very busy.

Metal, engineering and shipbuilding trades.—Iron moulders are all fairly active. Iron workers and helpers are not up to the average of last month. Machinists and engineers have steady employment. Steam engineers are busy. Electrical workers and linemen are all very busy. Blacksmiths are kept well employed. Horseshoers are busy.

Woodworking and furnishing trades.—Woodworkers are fairly well employed.

Printing and allied trades.—Printers are fairly active.

Clothing trades.—Journeyman tailors are very busy.

Miscellaneous.—Barbers continue to get steady employment. Clerks and stenographers are not so active as last month.

Transport.—Railroad conductors are very busy. Locomotive engineers and firemen are also very busy. Railroad telegraphers are well employed. Railroad trainmen, switchmen, trackmen and freight handlers have plenty of work, and seemingly have in prospect a very busy season. Steamboat men and steamboat firemen are not quite so active owing to climatic con-

ditions. Ship labourers and longshoremen have little employment.

Unskilled labour is not in such great demand as it has been throughout the past two years.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of December has been a very busy one, and was fully as active as the previous month, due not only to the usual Christmas stir, but to the exceptionally mild weather. Industrial activity was fully as marked as the previous month, and while relaxation was manifest in some branches of the building trades, there were other phases of labour which were exceptionally busy. Steamfitters, plumbers, longshoremen and printers have had an excellent month. Commercial activity, too, shared largely in the business rush, the mail steamers and others causing much stir. The wholesale and retail trades have done a great December business, and while the stores as a whole did an exceptionally good trade, there were some who reported that their Christmas sales exceeded by 60 per cent their sales of last year.

The trackmen on the I.C.R. have had their pay increased from \$1.30 to \$1.40 per day, and from \$1.40 to \$1.50. The former increase was granted on smaller sections, and the latter on larger sections.

The labour field is free from unrest of any kind.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—This industry, for the season, is about normal, but in some cases it is even not so good.

Lumbering.—This industry in the lumbering districts of the province promises to be most successful, and a great amount of labour is afforded therefrom.

Mining.—Gold miners are very difficult to get just at present. The lumbering in-

dustry has made such a call upon all classes of labour in the vicinity of the gold mines that a large percentage of the miners went into the lumber woods, so that recent efforts of mine managers to secure additional labour in gold mining have met with great difficulty. In this department of mining in this province what is said of mining labour applies also to nearly all positions about the mine: managers, metallurgists, chemists, and nearly all men requiring technical knowledge have to be imported. As the treatment of ores is one of the most important problems affecting the future of the gold mining industry in Nova Scotia, this question of trained men for the work is an important one. On account of the legislation of the province favouring gold mining, that industry is likely to assume great importance in the near future; hence the necessity of impressing the situation with regard to all classes of labour upon the authorities.

In coal mining the continued growth and development of the business retains very well the large body of labour employed, and also, up to the present, has kept the price up to the unusually high figure at which it has ruled. All the large companies are preparing for an increased output. Should the price of coal fall considerably below the present rate, it will undoubtedly be followed by a decrease in wages. But the outlook just at present does not indicate that happening in the very near future. The improved outlook at the steel works in Sydney and the enormous development of the iron and steel plant at Sydney Mines, of which very little has been said, give expectation that a very large amount of the increased output of coal next year by the Dominion Coal Company and the Nova Scotia Steel and Coal Company will be consumed by the steel plants at the places mentioned. The large iron plant at Londonderry will be in operation and will take a large amount of coal from Springhill. The best indication of the improved appearance of things at Sydney is the fact that, within a couple of weeks, six hundred additional men have been taken on.

The labour situation in the coal mines is likely to be affected somewhat by the steady increase in the use of machines for cutting the coal. The difficulty hitherto experienced on coal lying at considerable angle from the horizontal will probably be overcome by the use of a new machine now being introduced for such a purpose by a company organized in Great Britain. What a machine means in the coal labour market can be best understood when it is stated that one machine will do the work of five pair of men, and this machine is operated by one man and a boy.

Speaking generally, there can be no doubt that all classes of mining in Nova Scotia will show an advance during the coming year in all departments. The coal output will be largely increased, probably by 750,000 tons. The three iron and steel plants will, in all likelihood, be operating on a fairly large scale. Gold mining, especially gold mining seeking to reach the deeper measures, will get greater attention than before. Copper mining at Cape D'Or, Cheticamp, and possibly one or two other places, will likely become a factor. Antimony will be mined on a large scale in Hants county. Gypsum, of which Nova Scotia supplies the United States with a large percentage of its requirements—New York what it requires altogether—will be shipped from one or two new places, while the quarry at Wentworth will probably increase its output by 25,000 tons. Brickmaking and business in building materials of various kinds, in which Nova Scotia is exceedingly rich, is being fairly well developed and will show a larger output next year than ever before.

CONDITION OF PARTICULAR TRADES.

Building trades.—The season for active work in the various branches of the building trades has about closed, but quite a few are yet well engaged. Carpenters are yet doing fairly well. Plumbers are busy. Stonecutters are fairly well employed. The other branches are dull.

Metal, engineering and shipbuilding trades.—Iron moulders continue busy.

Machinists are also busy. Horse-shoers are very active. Boilermakers fairly busy.

Woodworking and furnishing trades.—Upholsterers are busy. Carriage and wagon makers are normally active. Coopers fairly busy.

Printing and allied trades.—Printers have had a splendid month; pressmen also.

Miscellaneous.—Barbers, clerks, delivery employees, furriers, hotel and laundry help are fairly busy.

Transport.—Railroad and steamboat employees are very active. Longshoremen are enjoying a good season. Cab drivers and truckmen are normally busy.

Unskilled labour has been fairly active.

CHARLOTTETOWN AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During December the supply of labour in certain lines exceeded the demand—a natural condition in this province at this particular season. Work at the Hillsborough bridge and Murray Harbour railway and other public works closed down for the season about the middle of the month, and the building operations, especially exterior work, were materially reduced. The masonry of the new market house was completed and the roof laid on, thus enabling work at the interior to be carried on during the winter. The closing of summer navigation, and the laying up of sailing vessels for the winter necessarily ended the labours of many seafaring men, though the inauguration of the winter service furnished employment, especially in Charlottetown, to a large number of truckmen and dock labourers. Merchants report a busy month, particularly at the Christmas season, and the bank clearings have been equal to those of November.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy during the first part of the month handling

produce, and later marketing their meat, large shipments of which were sent away to Newfoundland and maritime province ports.

Fishing.—The fishing was restricted to the catching of smelts and eels, which were shipped in large quantities to the markets of Boston and New York.

Railroad construction.—With the exception of fifteen miles of ballasting, the railroad from Southport to Murray river was completed about the middle of the month, and surveys for another branch line started.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons had a quiet month. Carpenters and joiners were busy. Lathers and plasterers had a dull month. Gas and steam-fitters and plumbers were busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers, machinists and engineers, linemen, blacksmiths, had steady employment.

Woodworking and furnishing trades.—Carriage and wagon makers were fairly busy. Car builders and coopers were busy.

Printing and allied trades.—Printers and bookbinders had steady employment.

Clothing trades.—Journeymen tailors, boot and shoe workers were busy.

Food and tobacco preparation.—Bakers and confectioners, butchers, tobacco workers had a good month.

Miscellaneous.—Barbers were busy. Hotel employees were fairly busy.

Transport.—Railroad conductors, locomotive engineers, trainmen, trackmen, freight handlers, steamboat men and teamsters were busy.

Unskilled labour was fairly busy.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of December business was exceedingly brisk for this season

of the year, but owing to the severe cold weather during the latter part of the month the building trades had to suspend operations on outdoor work. The new pork factory of Dunn Bros. at Fairville is almost completed, and it is expected to be in running order by the first of the new year. The winter port business has been a record-breaker so far this season. Up to December 28 there were 11 steamers on the way to St. John, 6 in port, and 20 had sailed from here. Between the above date and January 3, 9 more steamers are booked to sail. The Canadian Pacific Railway steamer *Lake Manitoba* sailed on the 26th for Liverpool, having on board the largest general cargo ever taken from St. John, amounting to 10,000 tons. Bank clearings for the four weeks ending December 24 amounted to \$3,964,218, an increase of \$562,176 over the same period last year, and \$167,035 less than November of the current year. Wholesale and retail dealers report that business during December surpassed all previous years, the sales having been phenomenal during Christmas week. The engineers and firemen of the Intercolonial Railway have been granted an increase in pay, amounting to 50 cents per day for the former and 55 cents for the latter, to be in effect from July 1, 1903. The back pay of some of the men will amount to more than \$100. There have been no strikes during the month.

CONDITION OF LOCAL INDUSTRIES.

The *fishing* industry is at a standstill, but on the north shore a large business is being done in catching smelts.

The *manufacturing* industry is booming in the planing mills of the city, but all the large saw mills are closed down for the winter except one or two.

Building trades. — Bricklayers and masons are dull. Carpenters and joiners are well employed. Painters and decorators report conditions very good for this season. Plumbers, gas and steam-fitters are busy. Stonecutters and builders' labourers are dull.

Metal, engineering and shipbuilding trades.—Iron moulders, with machinists and engineers, electrical workers and linemen, boiler makers, sheet metal workers and horse-shoers, good conditions prevail.

Woodworking and furnishing trades.—Woodworkers are active. Shingle weavers are dull.

Printing and allied trades.—Printers and pressmen and bookbinders report good conditions.

Clothing trades.—Journeymen tailors are busy.

Food and tobacco preparation.—Ice cutters and drivers and cigar makers are fairly well employed.

Miscellaneous.—Broom makers are busy.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railroad trainmen and trackmen are very busy. Freight handlers, steamboat men and firemen are well employed. Ship labourers are extra busy, and street railway employees, teamsters and expressmen busy.

Unskilled labour reports fair conditions.

DISTRICT NOTES.

Fredericton.—The Scott Lumber Company will erect a large shingle mill, to run winter and summer, and about twenty dwellings for employees, with a large store.

Moncton.—The Exhibition Association contemplates erecting buildings at a cost of \$16,000. They have already spent in the vicinity of \$10,000 for thirty-one acres of ground and the race track.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, Correspondents, report as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month cannot be classed as a good one from a labour standpoint, the principal cause being the lock-out in the boot and shoe factories, which affected, broadly speaking, every line of industry more or less in the city. There have been no other

disturbances in the relations between capital and labour, but a demand was made by the printers to the effect that on and after January 18 a new scale of prices should go into effect, namely, an increase of \$2 per week in wages and a decrease of one hour in the time worked per day. This would make the new rates \$11 per week, and the work day eight hours. The employees of the Dominion arsenal also asked for an increase in pay, but have not as yet received a definite answer.

On the 21st of the month the proprietors of printing offices in Quebec held a meeting at which it was decided to form an association, to be known as 'The Quebec Master Printers' Association,' in order to 'mutually aid themselves and to promote the general interests of the printing business in Quebec, as well as to settle all questions that may affect said business.'

On December 7 the lightship *Lurcher*, No. 14, left for the maritime provinces. She is the last vessel to leave for sea this season.

CONDITION OF LOCAL INDUSTRIES.

There are two things to note in agricultural matters in this district; first, the exceptionally high prices ruling in the Christmas markets for poultry of all kinds, an increase over last year of from 20 to 25 per cent, and second, the nearly general lack of water, dry wells and springs being the rule.

Lumbering is in full operation, and the right kind of men, especially choppers, cannot be obtained in sufficient numbers to meet the demand, and this despite the fact that the highest rates are being paid for this class of labour.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had a very slack month, the extreme cold and snow rendering outside work in these lines almost impossible.

Metal, engineering and shipbuilding trades.—In these trades the month has been

a slack one, but boilermakers, machinists and iron workers report a busy month. Ordinarily activity in these lines only begins after the holidays. Electrical workers and linemen have had a fair month.

Printing and allied trades.—A continued slackness of work prevails. The Typographical Union No. 302 made a demand for an increase of wages and a reduction of hours on the 1st of the month, to go into effect on January 18, but up to the end of the month no reply to the circular has been received.

Clothing trades.—The lock-out of boot and shoe workers was broken on the 17th inst. The arbitrators have not given a decision at the time of writing this report. There is a very perceptible brightening up in the leather trades since the opening of the factories, few of which are as yet working full-handed. This is due to the fact that before the close-down most of these establishments finished as much stock as possible, and at present the first hands required are leather cutters, of whom there will be a shortage, as quite a large number left Quebec and obtained employment elsewhere.

Food and tobacco preparation.—Bakers, confectioners and butchers, as usual at this season, had a very busy month. Ice cutting has not yet commenced, but will in the first week of January, the heavy snowfall preventing the thickening of the ice, in spite of the cold weather. Cigarmakers report a very good month's work. The Royal Havana Cigar Company has gone into liquidation on the demand of Mr. J. B. Jarvis, manager of the company. A meeting of the creditors has been called.

Unskilled labour.—Men coming under this head have had a good month. Snow shovellers met during the month and formed a temporary organization, demanding and obtaining a rate of \$1.25 per day of ten hours. The rate last winter for this class of labour was \$1.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this city and district has changed but little during the month of December. The Christmas trade was exceptionally brisk, and merchants did a good business. The weather not being sufficiently cold to produce ice for cutting and other outside work, there is dearth in the employment of unskilled labour. The month of December has closed one of the most prosperous years in Three Rivers. Buying at the Christmas markets was extensive, and prices paid were high despite the large offering. The following are some quotations :—

Beef by the quarter, 5 and 5½ cents per pound; mutton per quarter, 7 and 8 cents per pound; turkeys 18 and 20 cents per pound; Chickens 8 to 12 cents per pound; geese \$1 to \$1.40 per pair.

Manufacturers are well satisfied with the result of the year, which has been 25 per cent more than last year. The wholesale trade have done exceptionally well, and merchants have increased their business on an average of 20 per cent over 1902. The traffic in the port of Three Rivers during the season of navigation of 1902 and 1903 was as follows :—

During 1902, 91 vessels, showing 169,326 tons.

During 1903, 106 vessels showing 253,796 tons.

An augmentation over last year of 15 vessels and 84,470 tons.

There has been exported to the United States this year from the port of Three Rivers 34,182 cords of pulp wood and 2,318,010 feet of wood; to England, 32,662,724 feet of wood and 4,599 tons of pulp paper.

Building trades. — Bricklayers and masons, carpenters and joiners, very quiet.

Lathers, plasterers and painters report only a few are working. Plumbers have much work at good wages.

Metal, engineering and shipbuilding trades.—Electrical workers are fairly well employed. Horse-shoers are very busy.

Woodworking and furnishing trades.—Carriage and wagon makers are well employed at good wages.

Printing and allied trades.—Printers have plenty of work and good wages. Steel and copper plate printers are dull.

Clothing trades. — Journeymen tailors report a fair month. There is only one glove factory here, employing 80 men and 40 girls, and they ask more hands. Wages are good; good men can have \$10 to \$18 per week. Boot and shoe workers have abundance of work, and wages are satisfactory.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, were busy. Cigar makers and tobacco workers had a fair month.

• *Leather trades.*—There are about 5 good tanneries here, giving work to 75 to 100 men. Wages are \$5 to \$25 per week. With leather workers and saddlers fair conditions prevailed.

SHERBROOKE, QUE., AND DISTRICT

Mr. H. Logie, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been exceptionally well employed during the month of December, and there are but few idle men. At this time of the year the demand for labour is often not equal to the supply, but the building trades, which generally suffer most at this time of the year, are fully employed, as there are some large contracts which are being rushed to completion. The prosperity which Sherbrooke has enjoyed for some time past in all branches of industry and business does not seem to abate, and the prospects are that good times are ahead for

some time yet, judging by the provisions that are being made for new industrial premises and extension of others.

The Modern Bedstead Co., which started in Sherbrooke a few months ago, is to be reorganized with a capital of \$50,000, and the company expects to increase the number of employees to forty. They are also applying to the city council for a bonus. The machine shops are exceptionally busy. The Jenckes Machine Co. have made some large shipments of mining machinery during the month, as well as Crocker turbines for electric light plants. The Rand Drill Co. have also several large contracts ready for shipment to various mining concerns in Canada. In both shops considerable overtime is being put in. The Paton Manufacturing Company are also very busy. This company has lately completed one of the most successful years in the history of the company. In addition to the heaviest output, a dividend of 6 per cent on a \$600,000 capital was paid.

The valuation roll of the city has just been homologated and shows an increase of about a quarter of a million in taxable real estate, which is a good indication of the continued prosperity of the city.

The city council have made an offer of \$200,000 to the Sherbrooke Heat, Light and Power Co. for its electric light plant and property. The question of municipal ownership has been engaging the attention of the city for some months past, and various offers have been made. The shareholders of the company will deal with the above offer at the annual meeting next month. The waterworks department, after providing for interest, sinking fund, &c., and \$2,000 towards reducing the debt of the city (the latter amount has to be provided for yearly), shows a net profit on the year's business of over \$1,300.

Retail merchants report a good average Christmas trade. In some lines it was better than for years past.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are still greatly inconvenienced by the low state of the

brooks and springs, caused by the drought which has been experienced in this section for months past. Previous to the snow they had to drive their stock or haul water long distances. Now most of them get water by melting the snow.

Lumbering.—The hard frost and snow which set in early in the month has been of great benefit to lumbermen, as the swamps are frozen hard and hauling can be done much more expeditiously. There is still a good demand for men in the lumber camps.

Manufacturing industries in nearly all departments are thriving. The Paton and Lomas mills have been retarded somewhat by the low water in the Magog river, and part of each of the factories mentioned have to run in the night, and part during the day.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades received a check by the extreme cold weather during the latter part of the month, but there are two fairly large contracts that are being rushed to completion, and every available bricklayer is sought after. The prospects for the spring are very bright. In addition to the court-house, there are several large contracts which will be started in the spring. The foundation work on the new court-house is all but completed, and work has been suspended until the spring. The year just closed has been an exceedingly busy one in the building trades. Plumbers and steamfitters are busy and report conditions better than last winter.

Metal, engineering and shipbuilding trades.—The metal and engineering trades are still active, with good prospects for the future.

Woodworking trades.—These trades are fully employed, and there are no idle men.

Printing and allied trades.—The printing trade reports a busy month.

Clothing trades.—Journeyman tailors and garment workers find ready employment. The wholesale trade is good, and custom tailors give ready employment to good men.

Food and tobacco preparation.—Bakers, confectioners and butchers had a busy month.

Unskilled labour.—Unskilled labour is still in good demand.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month has been satisfactory, though only certain branches of industry were very active. Retail merchants report business as having been very good, particularly towards Christmas. There has been no change in the hours of labour, but there has been a reduction in wages in one of the departments of the Penman Manufacturing Co. The machine stocking knitters were reduced one cent a dozen pairs; they formerly received three cents per dozen pairs. A number of them quit work, to be replaced by others, to whom the company used to pay \$1 per day while they were apprentices, and who will now work by the piece. In the above mentioned factory, work has been very slack since some time, especially in the weaving department, where there are 26 looms idle for the winter of the 50 which were running a fortnight ago. At the present time they are only making first class goods, and on account of this about 40 hands are idle. In the spinning and carding departments the employees are not working full time. Some of the workmen who were thrown out of employment have found positions elsewhere.

There have been no strikes or lockouts during the month.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The local factories are all well occupied. At the cigar factory work has been very brisk for some time. At present 63 hands are employed, divided as follows : 11 skilled workmen, 30 ap-

prentices, 15 strippers, 7 packers, besides the office staff.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons and construction carpenters have not had much work during the month, but house carpenters have been fairly busy.

Metal and engineering trades.—In these trades times have been fairly brisk.

Woodworking and furnishing trades.—Those engaged in the furnishing trades report good business. Carriage and wagon-makers say the month has been comparatively good.

Printing and allied trades.—Printers and pressmen have been fully occupied.

Clothing trades.—Journeyman tailors and garment workers report a satisfactory month. The boot and shoe workers in both our local factories have been very busy, and everything goes to show a good season for this branch.

Leather trades.—With tanners and curriers work continues regular.

Miscellaneous.—Delivery employees and clerks have been very busy, especially about Christmas time.

Transport.—Carters have been very busy since there have been good winter roads.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of December has been fairly active for labour in general, but owing to the weather, which has been very cold, there has been a slackening of work among bricklayers and stonemasons. With the exception of these the building trades have had no reason to complain. The statement that corporation labourers were earning \$1.50 per day for nine hours' work, made in the *December Gazette* was erroneous, as these labourers earn 15 cents per hour as before. In connection with the Slater-

matter, the Canadian Federation has had a good deal of trouble in reference to the employment of aliens. The federation alleges that it has the necessary proof to show that aliens are employed. The federation is also deeply interested in the settlement of existing labour differences in Quebec.

CONDITION OF PARTICULAR TRADES.

Building trades.—There has been a slight diminution in activity among these trades, but not in a very pronounced manner, and it may be said that everybody is satisfied with present conditions.

Metal, engineering and shipbuilding trades.—These trades report good conditions.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers and wood carvers are fully employed. Car builders and wagon makers and pattern makers are very busy.

Printing and allied trades.—There is abundance of work owing to the holidays.

Clothing trades.—Boot and shoe workers are very busy.

Food and tobacco preparation.—Cigar makers and tobacco workers have had plenty of work during the month.

HULL, QUE., AND DISTRICT.

Mr. Rod. Laferrière, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Matters have recovered somewhat in the labour market since last month. The temporary lull caused by the closing down of saw-mills was partly remedied by the re-opening for the balance of the winter of Mr. J. R. Booth's saw-mills. The supply of labour is well up to the demand, and there are scarcely any idle men at present. It is not expected that there will be any relaxation from this satisfactory condition of affairs for some months to come. A new source of employment will be afforded to the Hull workingmen early in January by

the opening up of a new factory. As an evidence of the prosperity of the workingman, it may be stated that the public charity committee has had but few cases of destitution to attend to so far. Grocers and merchants generally are very much pleased with their Christmas and New Year's trade. Tax collections at the city treasurer's office were well met, and monthly fees in mutual and benevolent societies were better paid than usual. To sum up, conditions have been good during December, with wages high and the demand slightly in excess of the supply.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—This industry in the saw-mills is giving employment to about 350 people at the Chaudière this winter. Wages vary between \$1.25 and \$1.50. Shantying operations are somewhat impaired by the over abundance of snow, not to any degree, however, noticeable in the families in town. Lumbering will receive a new impulse in this city by the starting after New year of a factory which will employ 15 hands the first year, and pay out \$20,000. The second year it will employ 50 hands. This factory will manufacture wooden handles for shovels, pitchforks, &c. Indirectly, hardwood shanties will have to be started on the Gatineau, where the raw material is plentiful, but for which there never was much demand hitherto.

Mining.—Mica mining in the country is closed down for winter, owing to extra cost of production at this season. Factories in town, however, will not be affected, owing to a large quantity of raw material they have in stock.

Manufacturing.—Eddy's shops are running to full capacity. About 150 men were laid off on December 21 until January 7 at the Portland Cement Co. construction works in Hull. About 40 are still working doing concrete work at 15 cents and 17½ cents per hour, for 9½ hours per day. After January 7, 200 men will be taken on.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters and joiners receive \$1.75 for ten-hour day. Painters,

decorators and paperhangers, \$2.25 for nine-hour day. Stonecutters, \$3 per day of nine hours. Builders' labourers, \$1.50 per ten-hour day. Quarrymen, about 100, receive \$1.50 for nine-hour day. Common labourers, \$1.25 per nine-hour day.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

With 1903 twelve months of prosperity closed in Ottawa, and the closing month was proportionately as busy as any. Labour was fairly well employed, and trade in all seasonable directions was splendid. Merchants were reported as pleased with the volume of trade for the Christmas season. The weather was exceptionally cold, but the good sleighing and other favourable conditions had an invigorating effect on business. The banks reported paper well met, and there were no failures or compromises of consequence. Unskilled labour was naturally unemployed to a larger extent, but extra work was provided in a number of ways, especially by the generous snowfall, and also the extreme cold gave the coal trade an unusual impetus, and gave employment to more hands.

CONDITION OF LOCAL INDUSTRIES.

During the month Mr. J. R. Booth started winter sawing at his mills, giving employment to about three hundred hands. The logs are supplied from the limits along the line of the Parry Sound division of the Canada Atlantic Railway, being brought to the mill by rail. General activity was reported from the lumber shanties, although there was a complaint of too much snow. There was some agitation against the maintenance of lumber piles in prohibited areas, but the police magistrate, in dealing with police court prosecutions, practically suspended operation of the civic by-law by adjourning cases against J. R. Booth and the W. C. Edwards Co. until March 31, in order to

give further chance to remove the piles. The lumber complained of has been sold, and it is expected that it will be shipped by March 31.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were all idle. Work on buildings in progress was suspended owing to the severity of the weather. The year 1903 was a very ordinary one so far as the number of houses built was concerned.

Metal, engineering and shipbuilding trades.—The metal trades were busy.

Woodworking and furnishing trades.—It is understood that the Ottawa Car Works will be enlarged, a new site having been purchased in the western limits of the city, near the Union station.

Printing and allied trades.—The printing trades were all well employed. Job offices reported a very busy month.

Clothing trades. — Tailors did a good Christmas trade.

Transport.—Railroaders were busy, and there was a large volume of freight. The holiday traffic was eminently satisfactory. Street railway employees had a slack time for a few days owing to a break down at the power-house. The water-power service was crippled by 'anchor' ice, and an armature broke in connection with the auxiliary plant, reducing the available power to 200 horse power. Only one car was operated on each line for a couple of days. The auxiliary plant break down was remedied in record time, several expert men doing in two days what was expected would take six or seven days to accomplish.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

With the practical suspension of building operations, there of course has been a large diminution in the demand for labour, but

the decrease has not been larger than usual. In other lines the demand was above the average during the month. While lack of sleighing somewhat retarded business, merchants report an excellent holiday trade, and that now that Christmas is over, the general depression is not as great as usual at this season.

Local banks report splendid business operations for the month. The wholesale trade was the best in years. There were no changes in the rates of wages or hours of labour during the month.

The labour market was quiet during the month with respect to strikes, lockouts, &c., none having occurred during the month. The effect of the increase of cartage rates by the Canadian Freight Association has been very marked in Kingston. Strong opposition has been made to the large increases, and the result is that the freight carriers are not doing so much business. Nearly all the wholesale houses and manufacturing places have put on special carters of their own, rather than pay the rates now charged. Where the railway freight wagons hitherto carted small boxes to the merchants, the latter transfer this work to their delivery men and boys. It is held that while the increased rate may be fair enough in larger centres, they are not fair to Kingston and places similar in size. Merchants contend that the rates should be graded as between various cities. On the other hand, freight carriers say that there is very little money in the business. A local representative opposed the increase at the meeting of the C.F.A., but the larger railway companies carried the motion to increase the rates.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The various manufacturing concerns here continue to be fully employed, and as yet there have not been any cuts or changes in the number employed, rates of wages, or hours of labour.

CONDITION OF PARTICULAR TRADES.

Metal, engineering and shipbuilding trades.—The metal, engineering and ship-

building trades continue to be fully employed. Shipbuilding is especially active.

Woodworking and furnishing trades.—The woodworking and furnishing trades had an especially good trade during the month.

Printing and allied trades.—Printers report a successful and busy month.

Clothing trades.—The clothing and kindred trades report exceptional business during the holiday season.

Food and tobacco preparation.—Bakers, butchers, cigarmakers, &c., had a very busy month.

Miscellaneous.—Barbers, clerks delivery employees, furriers, hotel and laundry workers have been rushed.

Transport.—The transport business was very brisk during December, and continues so.

Unskilled labour.—Unskilled labour is still greatly in demand.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of December was not a particularly active one in labour circles in this city or district, but compared very favourably with the same month last year. Nearly all the building operations have been concluded, consequently there are many idle men in these particular trades, such as bricklayers, plasterers, &c.

The principal change in industrial circles is the closing down of the works of The Belleville Iron and Steel Co. A large number of skilled artisans have been employed here for several months in getting the works overhauled, many new buildings being erected and new rolls being put in. The mills are expected to reopen about the middle of January, and there is no feeling of uneasiness.

The merchants and banks report business very brisk. The payments to the

farmers of this district for their season's cheese has had a distinctly favourable result upon the city's prosperity.

The new order which reached the Grand Trunk employees at this station in November, which meant thereafter a five-day week, has been rescinded, and the time is now as formerly. The rule was only in operation about two weeks.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Large quantities of rough fish are being caught in this vicinity.

Lumbering.—The lumber industry in this district was very brisk during December, a large number of men having left for the woods. Good pay is offered, and the demand for this class of labour was larger than the supply.

Mining.—The prospects for mining in the County of Hastings are very bright, and when spring opens there will be great activity. Several mining experts and capitalists are now in the northern parts of the county getting things in shape for spring work. Several new mines will be opened in the vicinity of Bancroft, and when the new I. B. and O. R. is built through that section it will add a great stimulus to this industry.

CONDITION OF PARTICULAR TRADES.

Building trades. — The painters and decorators had a good month. All the public schools throughout the city were painted, affording employment to a large number of men. Plumbers had a good month, and all are busy. Gas and steam-fitters had a very busy month, several firms, Albert College and the Carman Opera House, all having steam heating installed. There are no idle men in this line.

Woodworking and furnishing trades.—Woodworkers and upholsterers report a busy month, and a good demand for labour. Carriage and wagon makers are working full time, and report a busy month.

Printing and allied trades.—Printers have had a good month, and every printer in town is employed.

Clothing trades. — Journeymen tailors had an exceptionally good month, and report business brisk. Boot and shoe workers are all busy, and with no idle men.

Transport.—Locomotive engineers were very busy during the month, as traffic has been very heavy. Locomotive firemen were also very busy owing to the above cause. Freight handlers were also rushed owing to the holiday season. Cab drivers, hackmen, carters, draymen, all report a busy month.

Unskilled labour.—There are a few idle men in this particular branch of labour, but next month will see these men all at work getting out the ice harvest.

DISTRICT NOTES.

Work on the cement works at *Point Ann* is progressing rapidly, and many men are employed, mostly unskilled mechanics. A larger number will be added as soon as the weather moderates.

The stonecutters and quarrymen at the *Crookston quarries* had a very busy month, and are getting out large quantities of stone. Many men are employed there at good wages.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change in the conditions reported last month, excepting as the situation has been affected by the setting in of steady cold weather, and the unprecedentedly large volume of the holiday trade. The great activity in retail business gave temporary employment to many as clerks, salesmen, drivers, &c. A large number of unskilled and some skilled workers, mainly recent arrivals, are out of work. A meeting of the unemployed, called by the District Labour Council, was held on the 24th inst.,

which was attended by over 500 men, at which resolutions were passed protesting against the publication of false statements encouraging indiscriminate immigration. The T. Eaton Co., proprietors of the large departmental store, have reduced the hours of their staff, numbering about 5,200 persons, by closing the store and workshops at 5 o'clock every evening, instead of 6. The change goes into effect on January 2. There has been a noteworthy absence of trade disputes during the month.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing generally continues active, though in some cases works have been temporarily closed down or production slackened. Manufacturers are disposed to look forward confidently for a continuance of prosperity and in many cases are enlarging their factories or increasing their plant. The class of industries catering more especially to the holiday trade have been exceedingly busy. The Massey-Harris Co., agricultural implement manufacturers, are reducing wages on piece work about 10 per cent.

The *farmers* are generally in a prosperous condition, as the result of the good harvest. The question of the production of sugar beets on a more extensive scale next season is receiving some attention, as it has been found to be a profitable crop. At a recent Farmers' Institute meeting, held at Ellesmere, statistics were presented showing the average net profits per acre from sugar beet culture at \$16.

CONDITION OF PARTICULAR TRADES.

Building trades.—Employment in the building trades is slack and intermittent, owing to cold weather and conditions distinctly less favourable than during the corresponding month last year, as there are not so many large partially completed jobs on which men can work indoors. The prospects are favourable for plenty of work in the spring, as the need for dwellings and the present high rents will cause a large amount of building. The proposition made by the Building Trades Council to have a

clause inserted in all contracts that disputes between employers and employees should be submitted to arbitration was submitted to the Toronto Chapter of the Ontario Association of Architects. The latter body, however, declined to co-operate in the movement, holding that such a clause would be inoperative, as the unions were not legally responsible bodies and could not be held to account, if they refused to abide by the result of arbitration. The council consider that such a clause could be made effective, and have submitted the matter to the local unions.

Metal, engineering and shipbuilding trades.—Workers in these trades are fairly well employed. The Canada Foundry Co. closed down during holiday week for stock-taking, and it is expected that operations will be resumed early in the month. General conditions show little change. Jewellers and silversmiths were very actively engaged up to Christmas, and enlargements of premises will give opportunity for the employment of larger staffs in several establishments.

Woodworking and furnishing trades.—Carriage workers and cabinet makers have had a good month. Piano workers are busy.

The rubbers employed by the Gerhard-Heintzman Piano Co., eight in number, demanded an advance in wages last month (November). The case was reported to the Employers' Association and submitted to arbitration, P. W. Ellis and J. O. Thorne acting for the employers and R. J. Whitton and W. Hutchinson for the men. After an exhaustive inquiry, the arbitrators decided that wages were as high as the condition of the trade would warrant, and should remain as at present until May 1.

Printing and allied trades.—The printing trade shows an improvement, as compared with last month, though a number of men are out of work.

Clothing trades.—Custom tailors report trade fair, though hardly so good as during December, 1902, and slackening towards the end of the month, as is usually the case.

The garment workers are generally well employed. The Garment Workers Union complain that some employers have violated the agreement made last June and are working their men nine and a half hours per day, instead of nine, as agreed on. About 30 of the male employees of the Wyld-Darling Co. clothing factory struck on the 7th inst. for a reduction in the hours of labour from ten to nine on week days and from five to four on Saturday. They returned to work the following day, under the same terms as formerly. The boot and shoe workers have decided to ask for a revision of the present wage scale.

Food and tobacco preparation—The month has been a busy one for all classes in this department, more especially confectioners. One establishment turned out 7 tons of candy daily, and all the factories were overwhelmed with orders.

Miscellaneous.—An attempt is being made to reorganize the Waiters' Union which was disbanded three years since. At a preliminary meeting, held December 13, 110 members were enrolled. The union will be affiliated with the Hotel and Restaurant Employees' International Alliance.

Transportation.—All classes engaged in transportation have been unusually busy, owing to the enormous amount of traffic during the holiday season.

DISTRICT NOTES.

Toronto Junction.—At the Canadian Pacific Railway shops, employing about three hundred men, the working time has been reduced by closing the shops one day per week. In some departments the hours worked per day have also been reduced. It is understood that the arrangement is only of a temporary character.

The Rudd Harness Factory will shortly be removed from Toronto Junction to Parkdale.

Unionville.—A pickle manufacturing industry will be started next year. A meeting to interest the farmers was held on the 17th, when 12 acres of land were secured for growing cucumbers.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, Correspondent, reports as follows.—

GENERAL CONDITION OF THE LABOUR MARKET.

Skilled labour is fairly well employed considering the time of the year. Unskilled labour, on the other hand, owing to no outside and very little building work going on, is less well employed, quite a few idle men being in the city.

Wholesale and retail trade was very brisk, especially during the holiday season.

The Eastern Building Company, limited, with a capital of \$80,000, and headquarters in Hamilton, has been incorporated. It is understood that this is the company which is about to erect 100 houses in the east end of the city. The Canadian Consolidated Oil Company, limited, with headquarters in this city, has obtained a charter. The company is capitalized \$1,000,000, and the shares are \$100 each. The objects, in brief, are as follows: To produce, manufacture, refine, buy, sell, export, import, and deal generally in crude and refined petroleum oil and all other kinds of oil; to do the same with salt and natural gas, and also to prospect, develop, maintain and manage mineral mines. The company, which has been organized particularly to go into the oil business on an extensive scale, has rights to deal in salt and minerals.

The latter part of the month there was a large fire at the Aitcheson lumber mill, causing the loss of \$40,000 and throwing a large number of men out of employment, who also lost valuable kits of tools.

The strike between the Ennis piano workers was settled by arbitration.

During the Christmas week many of the manufacturing firms presented their employees with gifts of turkeys or cash. One firm, the Tuckett Cigar and Tobacco Company, continued a long established custom of presenting five of its employees who were with the firm for 21 years with a deed for a building lot and \$225 each.

CONDITION OF LOCAL INDUSTRIES.

There is nothing doing in *agriculture*, *fishing* or *lumbering*.

Manufacturing is also slightly affected by the after holiday season.

There is nothing doing in *railroad construction*.

All the new industries under way have more or less ceased operations owing to the extreme cold weather.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are slack just at present owing to cold weather, with the exception of plumbers and painters, who are fairly busy with interior work and work on general repairs.

Metal, engineering and shipbuilding trades.—Iron workers, such as moulders, stove plate and machinery, machinists, coremakers, stovemounters, &c., are fairly well employed. Electrical workers and linemen are not very busy. Metal workers, polishers, horse-shoers and jewellers are fairly well employed, and have enjoyed a good season.

Woodworking and furnishing trades.—Woodworkers of all classes in factories, carvers, patternmakers, furniture workers, &c., are fairly well in employment.

Printing and allied trades.—All printing trades were very busy during the month, the holiday trade giving it an additional impetus.

Clothing trades.—Journeyman tailors are slack, while garment workers are busy, but for the cessation of a few days during the holidays. Boot and shoe workers are fairly busy.

Food and tobacco preparation.—Bakers, confectioners butchers, cigarmakers and tobacco workers are busy, and have enjoyed a good month. Ice cutting has not as yet begun.

Leather trades.—Leather workers on horse goods are fairly well employed.

Miscellaneous.—Barbers, broommakers, clerks and delivery employees are very busy. Hotel, restaurant and laundry workers are busy.

Transport.—All railroad and transportation workers are fairly well employed. Freight handlers, ship labourers and long-shoremen are not very busy, waterfront being frozen over. Teamsters and expressmen fairly well employed.

Unskilled labour.—Unskilled labour not very busy at present.

DISTRICT NOTES.

Dundas.—Trade during holidays very brisk. The town is improving industrially. The new refrigerator works are installing their machinery, and will be in operation by first of February and will give employment to 50 men. The furniture, garment, machine and axe workers are all well employed. George Carruthers, of the John Bertram, Sons & Co. shops, had his hand hurt on a machine during the month.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Although cold weather came early in this district, necessitating the shutting down of certain industries and the reduction of staffs in others, no case of serious lack of employment is reported. There is no evidence of any number of idle men searching for employment at any point in the district.

All factories are running full, and some over-time. City improvements in the line of paving have ceased for the season, but sewer and gas pipes are being laid, and the work engages many labourers.

The general run of business is good. Wholesalers and retailers report a satisfactory holiday trade. The motive power of some of the principal railway lines between the east and west has been taxed to handle the traffic of all classes.

Wages are steady, and general quiet prevails in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have found an excellent demand at good prices for all the produce they have had to put on the market.

Manufacturing.—Manufacturers report heavy orders for holiday and winter trade and good prospects for the spring business. In no case are there any complaints as to the demand for manufactured goods.

Mining.—The several companies exploiting the natural gas fields have all struck more or less satisfactory wells, and a large number of new wells are now being put down.

Railroad construction.—The Michigan Central Co. is relaying its main line west from here with rails 25 per cent heavier than those which they replace. Men who follow railway construction, and trackmen are all busy.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were never busier at this season of the year. Bricklayers and masons are not so busy as during warmer seasons, as the cold prevents outdoor work. Painters are all engaged on interior work or in the car shops. Plumbers have had a great rush of work, but the heaviest part is now over. Plasterers, lathers and carpenters are working steadily and full time.

Metal, engineering and shipbuilding trades.—Moulders, machinists and all classes of labour in the metal trades find constant and remunerative employment. The reconstruction, improvement and extension of lines by several different telegraph and telephone companies have given work to large numbers of linemen, many of whom were brought from distant points. Linemen in the employ of local electric companies have been unable to keep up with their work.

Woodworking and furnishing trades.—The great rush of work for coopers is over, but all men of that craft are employed.

Printing and allied trades.—Printers of all classes have been in great demand, particularly hand compositors, but the vacancies are now pretty well filled.

Clothing trades.—All classes of employees in the clothing trades are busy, and there is sometimes a demand for journey-men tailors.

Food and tobacco preparation.—Bakers, confectioners, butchers and cigarmakers are all experiencing good times in this section.

Miscellaneous.—This is the dull season here for restaurant, hotel, shop and office employees, but more are employed in these lines this winter than ever before. There is a constant demand for domestic servants and occasionally for hotel help.

Transport.—The final closing of navigation has thrown all the freight business to the railways, and numbers of additional engine and train crews have been taken on by all the roads. More yard and roundhouse employees and freight office men are working than during the autumn. Steamboatmen and sailors are practically all out of employment till spring, but there is no complaint. This also applies to the Welland canal staff. Drivers of all classes are busy.

Unskilled labour.—Over a hundred labourers were discharged by one of the power companies when night work was abandoned for the winter and cold weather made concrete construction impossible. All those who failed to find other employment immediately left the place. Unskilled labour is well employed.

DISTRICT NOTES.

Port Colborne.—Canal and harbour improvement work has been abandoned for the winter. Several lake vessels are wintering here, in addition to harbour tugs, marine drills, &c.

Chippewa.—The building trades show unusual activity, and employment is plentiful.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The past month has been a good one for labour and business generally. Cold weather has caused a cessation of outside work in the building trades, otherwise, labour continues to be well employed. Factories have been running full time; two that manufacture electrical supplies have been working overtime. Transportation continues active, the railways reporting plenty of trade. Merchants report heavy sales, and one of the best Christmas trades they have ever had. There are no strikes or lockouts to report.

The Labour party are running a candidate for mayor and five candidates for aldermen, in a council of nine.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The canning factories have finished their season's work, which has been a very good one. The Rubber Factory Company of Pt. Dalhousie have in course of construction a number of buildings to house their employees.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons were well employed till stopped by cold weather. Lathers and plasterers have had steady work. Carpenters and joiners have been busy, securing inside work when it was too cold to work outside. Painters have had plenty of work. Plumbers, gas and steamfitters report trade good. Labourers report work as fair.

Metal trades.—Iron moulders, iron workers and helpers and machinists have been working full time. Electrical workers have been working overtime. Linemen have been very busy. Blacksmiths and horseshoers report trade as brisk, and an agitation is on foot for higher wages.

Woodworking and furnishing trades.—Carriage and wagon makers report trade as good.

Printing and allied trades.—Printers, pressmen and bookbinders have had all the work they could handle.

Clothing trades.—Journeyman tailors have had to work overtime to get out the work in hand.

Food and tobacco preparation.—Bakers and confectioners have been rushed with the usual Christmas trade. Butchers and meat cutters report trade as good. A branch store of the Davies Syndicate has been opened in this city. Cigarmakers and tobacco workers report a good month's trade.

Leather trades.—Tanners and curriers and leather workers are well employed.

Miscellaneous.—Barbers' trade is good. Clerks and delivery employees have been rushed with trade. Hotel and restaurant employees are in demand.

Transport.—Freight handlers have been busy. Street railway employees up till Christmas have been fully employed. Cab drivers, hackmen, teamsters and expressmen report trade good.

DISTRICT NOTES.

Pt. Dalhousie.—The rubber factory is running full time. The work on the buildings being erected by the rubber factory is being pushed on as rapidly as the weather will permit.

Merritton.—All the factories are working full time.

Thorold.—The building trades are a little quiet; otherwise trade is good.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month was about the same as during November, but does not compare

favourably with the corresponding month of last year. There are more idle men in the city than there were a year ago, and there is not the same certainty that the employment will be as steady or the present scale of wages maintained. Building operations are practically suspended. The Malleable Iron Works have been working about one-half their regular force. The Verity Plough Co. closed the factory on the 21st for ten days' stock-taking, and the installing of a new boiler. The Massey-Harris management received instructions from Toronto that there would likely be a readjustment of the present scale of wages, with reductions in some of the departments. The plough factories and the engine works were busy during the first part of the month, and large shipments left the several places. Retail merchants have experienced a brisk trade, fully up to the average of other Decembers. The Cockshutt Plough Co. presented each of their employees with a turkey, and the Waterous Engine Works paid their men for Christmas day. Friendly relations between employers and employees continued.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work in the rural districts is now limited to the care of stock and the marketing of produce, much of which reached the market during the month, the prices in some respects being unprecedented, eggs selling at 35 cents per dozen, and turkeys at from 17 cents to 20 cents per pound.

Railroad construction.—The work of the extension of the electric railway has continued; a survey has been run from St. George to Galt. This will connect Brantford with Galt, Preston, Hespeler, Berlin and Paris.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been slack, owing to the cold and inclement weather.

Carpenters and joiners have had a full month. Outside carpenters are now employed inside. Lathers and plasterers had a

fair month. Outside painters are slack. Inside painters, or those employed in factories, have had an average month. Plumbers, gas and steamfitters have had a satisfactory month.

Metal, engineering and shipbuilding trades.—Iron moulders and coremakers have been fully employed in the majority of the shops.

In the Malleable Iron Works there has been some short time. Machinists and electrical workers, particularly the latter, have been busy. Metal polishers and platers, stove-mounters, all blacksmiths and boiler-makers have been working full time. Sheet metal workers and horseshoers have had a busy month.

Woodworking and furnishing trades.—Carriage and wagon makers have worked full time, the latter working overtime. Pattern makers and millwrights have had a steady month. Coopers report plenty of work.

Printing and allied trades.—Printers and pressmen report all local men fully employed.

Clothing trades.—Journeyman tailors have experienced a busy month.

Food and tobacco preparation.—Bakers and confectioners, butchers, cigarmakers and tobacco workers report steady employment and a brisk Christmas trade.

Miscellaneous.—Barbers report trade as being normal. Clerks and delivery employees have had a busy month, particularly during Christmas week. Furriers are all steadily employed. Hotel and restaurant employees and laundry workers have had a full month.

Transport.—Freight handlers and street railway employees have all had steady employment. Carters and teamsters report a lull in trade which is only temporary. Draymen have had steady employment.

Unskilled labour.—Unskilled labour is not in demand; there are a number of idle men in this locality.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Nearly all classes of labour have been steadily employed during the month. No noticeable amount of time has been lost by any trade, with the exception of those employed at outdoor work, which is practically over for the season. A good winter's season is looked forward to in all lines of manufacturing. While there are no number of unemployed workers seeking work, there is still sufficient men to meet the requirements of trade here, especially of unskilled workers. A galvanizing plant, employing about 20 hands, was put in operation at the tube mills during the month. An American company shortly expects to commence manufacturing a cereal food. They will employ 40 or 50 hands. The winter fair and the Christmas season combined to give retail dealers and all those whose work it is to serve to the public a very busy month. There have been no noticeable changes in wages rates during the month, and there is no noticeable unrest amongst any class of wage earners.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this section stall feed large numbers of beef cattle, which makes the winter work heavier than it would otherwise be.

Manufacturing has had a busy month with a number of slight exceptions caused by the season.

Railroad construction and employment.—Engineers are still at work drawing up surveys for an extension of the Grand Trunk Railway to Goderich.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had a fair month. Some work will have to be left over until milder weather. Bricklayers and stonemasons have done a small amount of work during the month. Carpenters have had a good month, with

a slight demand for men. Painters have had a fair month. Stonecutters and builders' labourers have about finished for the season.

Metal, engineering and shipbuilding trades.—Iron moulders report a steady month's work. Machinists and machinists' helpers are steadily employed, with the exception of those in the cream separator factories, where there has been a slight slackness owing to the season. Sheet metal workers have had a fair month.

Woodworking and furnishing trades.—Woodworkers altogether have had a slightly better month than last, some small amount of overtime being worked early in the month. Carriage workers and trimmers are commencing on spring work. Piano workers have been busy, and there has been a betterment for organ workers. Upholsterers are very busy, and have been working overtime.

Printing and allied trades.—Printers are steadily employed, but are not so busy as last month.

Clothing trades.—Tailors report trade as very brisk.

Food and tobacco preparation.—Bakers, butchers, clerks, barbers, hotel employees and delivery employees have all had a very busy month, caused by the large number of visitors to the winter fair and by the Christmas season. The ice harvest is now on, giving considerable employment.

Miscellaneous.—Brussels carpet weavers were on strike for a few days owing to a dispute over apprentices learning certain parts of work. An agreement regarding apprentices was made on which men returned to work. Tube mill employees were working overtime at the beginning of the month, but at the end of month were slack owing to lack of skelps.

DISTRICT NOTES.

Berlin.—Building operations for the year totalled about \$475,000, which included ten factory additions and considerable public work.

Alma.—A strike of flax mill workers here for an increase of pay was settled in a day by the increase being granted.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. L. Carlin, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has remained the same as last month, excepting in the building trades and outdoor labour, which are at a standstill owing to the severe winter weather. The greater part, however, have found employment in the different factories and the Grand Trunk Railway shops, so that there are very few idle men in the city or district. The wholesale and retail merchants report trade very good, with an increase in business this month.

The same activity prevails in all industries, and no changes have occurred in the hours of labour or rate of wages, and the most satisfactory relations exist between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—All manufacturing establishments are active, with plenty of work on hand, but can supply their orders more readily than previous months, as they can secure help easier.

CONDITION OF PARTICULAR TRADES.

Building trades.—The men engaged in the building trades are fairly busy, finishing a number of buildings that are in course of construction. The plumbers, gas and steam-fitters are exceedingly busy.

Metal and engineering trades.—Iron moulders report having steady employment. Machinists and fitters are all working full time. Electrical workers and linemen report work as fairly good.

Woodworkers and furnishing trades.—The factory workers are very busy, especially the cabinet makers and finishers.

Printing and allied trades.—The printers have been very active this month, especially

the job hands and ad-setters, owing to the amount of work for the holiday trade.

Clothing trades.—All the tailors and garment makers are fully employed.

Food and tobacco preparation.—Bakers, confectioners and butchers have more than their usual amount of work this month. Cigarmakers are fairly well employed.

Leather trades.—Leather workers are busy, especially harness makers.

Transport.—The trainmen are extra busy this month, and the cab drivers and draymen report business good.

Unskilled labour is fairly well employed, there being a few idle men.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of December this year has been one of little or no work for those engaged in building or other outdoor callings. Winter set in the latter part of November, and severe weather and sleighing have continued throughout December. In the foundries and factories business has been good, but the usual shut down for stock-taking over the holiday season has taken place. At the McClary Manufacturing Company works (the largest employers of labour in the city) the shut down continues from December 23 to January 4. On the railroads business has been very active, an extra large amount of through freight being handled.

On January 4 the moulders, stove mounters and different foundry workers of the McClary Company will abandon their old works and report at the new foundry at the south end of the city, where all the stove work will be done in future. The old foundry will be used for a storehouse for the enamel ware department, and the company will move that department into a large new building just completed for it. It is expected that at the beginning of the year

this firm's employees will number almost 1,000.

Wholesale and retail trade has been more favourable this month than formerly, and merchants report an exceptionally good Christmas trade. The cold weather and snow has done wonders for the fur trade, and almost every sleigh and cutter in the city has been sold.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, painters, lathers and plasterers and building labourers are mostly all idle, owing partly to the severe weather, and also to the little building operations being carried on, the brickwork being finished at the armoury and at A. Talbot & Co.'s new printing office. Carpenters are about half employed. Plumbers and steamfitters are rushed, mostly with repair work.

Metal, engineering and shipbuilding trades.—Stove moulders, helpers and mounters are exceptionally busy, but have an enforced two weeks' holidays for stock taking and removal to new shop. Iron moulders in other shops, coremakers, machinists and metal polishers, are busy, and only shut down for two days. Linemen have little to do.

Woodworking and furnishing trades.—Carriage and wagon makers are busy, and see good times ahead owing to the large sale of cutters and sleighs. Car builders report business as fair, and owing to the introduction of electric lights in the shops they are working longer hours (50) than ever before at this time of the year. Coopers continue to be exceptionally busy, and a demand is still felt for them.

CONDITION OF PARTICULAR TRADES.

Printing and allied trades.—Printers, pressmen and bookbinders have all had an exceptionally busy month, and considerable overtime has been worked, calendars, novelties, &c., being the main cause for the rush.

Clothing trades.—Journeymen tailors report trade as dull, owing to people at

this season putting their money to other uses. Garment workers report trade as fair.

Food and tobacco preparation.—Bakers and confectioners have had an exceptionally busy Christmas season, as have also the butchers and meat cutters. Turkeys sold on the market here for 14 to 16 cents per pound. A number of men and teams have been engaged during the month cutting the supply of ice for next summer. Cigar-makers are all employed.

Miscellaneous.—Delivery employees have been exceptionally busy, as have also furriers.

Transport.—On the Grand Trunk Railway an unusual amount of through freight has been hauled, and several new large engines put on, making an extra amount of work for the train crews.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has not been any important change in the labour market during the past month in this district. Comparatively speaking, labour was fairly well employed for this season of the year. There was a limited number of unskilled and skilled workers for whom employment was intermittent.

Commercial activity was marked in the heavy traffic on the railways of through freight, but railway officials state that the volume of business was not equal to last year during the same season.

The holiday season brought its usual extra business, and merchants report a very satisfactory Christmas trade.

A noteworthy incident in the line of rates of wages was a petition from 28 public school teachers of the city to the Board of Education asking for an increase of salary on the basis of a uniform percentage rate. The reasons set forth why the increase should be granted were as follows:—1. That the cost of living has materially in-

creased. 2. That the salaries are now barely a living wage in most cases. 3. That in other cities of equal size teachers of equal qualification are receiving higher salaries for the same work. 4. That we think the present grading of teachers' salaries is a just one, according to work done and responsibility assumed. The petition was referred to a committee of the board. The male principals of the public schools were granted a raise of salary recently on a graded scale, according to qualifications held, the minimum salary to be \$800 per annum, and the maximum \$1,000. The previous salary was \$750 per year.

Peaceful relations continue to exist between employer and employed. In some instances good-will was manifested in the distribution of turkeys and other presents to employees at Christmas.

CONDITION OF LOCAL INDUSTRIES.

Farmers have had a good demand for poultry and other produce for the Christmas market. Large shipments of poultry were made for the British market, and good prices prevailed.

Manufacturing continues in the same healthy condition as reported during the entire year. Local firms have plenty of orders.

Railway construction is normal for the season of the year. A noteworthy improvement in equipment recently made is a coal hoist which the M.C.R. Co. has erected in the local yards. The hoist will prove a great time and labour saver and will displace about twenty shovel men formerly employed on the coal dock.

CONDITION OF PARTICULAR TRADES.

The building trades on the whole are quite slack. For outside workers there is little work, and the greater part of the inside work on new buildings is completed.

Plumbers and steamfitters are quite busy.

Metal, engineering and shipbuilding trades.—In the metal trades iron moulders,

machinists, blacksmiths and boilermakers are busy.

Woodworking and furnishing trades.—In this line factory workers are busy, but in the building supply department the slack season is on.

Printing trades.—Printers report trade steady and conditions normal.

Clothing trades.—Journeymen tailors report having had a busy month.

Garment workers are steadily employed.

Food and tobacco preparation.—Bakers and confectioners and butchers report a good Christmas trade. Cigarmakers report a steady trade.

Unskilled labour is in easy demand.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in this city during the past month have been of a fairly satisfactory nature, although not quite equal to the previous month, owing chiefly to climatic reasons. In the building trades the scarcity and high price of bricks is given as the reason for the quiet state of affairs prevailing at present. Work on several contracts has been suspended until next season.

The addition to the Wm. Gray & Sons' carriage factory is nearly completed, and will soon be in full operation. Special activity prevails in the coopering trade, there being quite a demand for barrels.

Wholesale and retail trade is brisk. Merchants report a good Christmas trade. Transportation is also exceptionally active, many railroad men having to work overtime. Rates of wages and hours of labour remain the same as the previous month. There is no unrest in the labour market. The demand for female labour at piece-work in the bean warehouses continues.

Two by-laws will be submitted to the ratepayers on the 4th of January next :

One to aid by way of a loan an electric road connecting Chatham with Wallaceburg on the north and Lake Erie shore on the south; another to assist in establishing a pork packing factory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy marketing their produce, the splendid condition of the roads being taken full advantage of.

Manufacturing.—All local manufacturing concerns are busy, most of them running to their full capacity.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons report trade quiet. Carpenters and joiners say work is rather scarce. Lathers and plasterers report trade fair. Plumbers and gasfitters are fairly well employed.

Metal and engineering trades.—Iron moulders, iron workers and helpers have plenty of work. Electrical workers and linemen are all busy.

Woodworking trades. — Carriage and wagon makers have steady employment. Coopers are very busy.

Printing and allied trades.—Printers and pressmen report plenty of work.

Clothing trades.—Journeymen tailors have steady employment all this month.

Food and tobacco preparation.—Bakers and confectioners are very busy. Cigar-makers have steady work, with no hands idle in the trade.

Transport.—All railroad men are very busy, many working overtime. Teamsters and expressmen have plenty of work.

Unskilled labour.—There is not so great a demand for this class of labour as there was in the earlier part of the season. There is, however, a demand for female labour in the produce warehouse to pick over beans, &c.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The season just closed has been a record-breaker in growth for Windsor, Walkerville and Sandwich. Buildings for various purposes have been put up, costing over half a million dollars. The population has increased materially, and the factories have been taxed to their utmost capacity to meet the demand of the market. Those in the iron business are still working full time with full staffs. In the building trade work has slackened off considerably on account of the cold weather, but there are a number of residences to be finished yet, which will keep most of the carpenters working until the new year. Wholesale and retail merchants have their hands full supplying the Christmas trade. The increases in wages in the various trades during the past year were from 10 to 35 per cent.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building trades are a little quiet at present, as the weather is unfavourable for outdoor work. Plumbers, gas and steamfitters have a month's work ahead.

Metal, engineering and shipbuilding trades.—All connected with the iron trades are fully employed.

Printing and allied trades.—The printing trade is active, and one office has been working overtime for the last week. The *Weekly Standard* Printing Co. is now publishing a daily newspaper called the *Daily Standard*. The first issue appeared on December 1, instant.

Clothing trades.—The journeymen tailors are all fully employed.

Food and tobacco preparation.—Workmen engaged in these trades have all they can do from now until the holiday season is over.

Miscellaneous.—Hotel, restaurant and laundry workers are in demand.

Transport.—All railroads running in and out of Windsor are working to their full capacity.

Unskilled labour.—There is a demand for unskilled labour here just now.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Compared with previous years, for the corresponding month, labour generally is employed to a larger extent than in any previous year. The general demand has been greater and the supply also. During November it was anticipated that the supply would exceed slightly the demand. This opinion was warranted by the exceedingly large numbers of work people apparently concentrating in Winnipeg. Gradually, however, the available supply in sight at the period mentioned has been absorbed by a steady movement to camps in the woods and to railroad construction work on the Canadian Pacific Railway between Port Arthur and Winnipeg. Prairie construction work is entirely abandoned during the winter months, but in the rock and mountainous territory progress is being made. The climate offers no obstacles of great moment in such localities. Large numbers of work people have also migrated east and south for the holiday season. The exceedingly favourable year for all classes of work people has placed them in a better position to avail themselves of the winter excursions.

The bush work, which draws so many work people from the city of Winnipeg, has been steadily augmenting its demands during the last two or three years. Several employment agents who devote special attention to this class of business were asked as to what in their opinion was the increase in the actual number of men now working in the woods as compared with the winter of 1902-3. A consensus of their opinions would place the number at about 2,000. Next year the increasing demand

for the products of the woods will require the services of still more men. This results in the bringing of green men into service, and the placing of a premium on good men who have had experience in the use of the axe. Wages are averaging slightly stronger than last year, and first class men are getting as high as \$40 per month and board.

Local manufacturers are busy, and several projects are being mooted for next spring.

Commercial activity continues, and preparations are being made to cope with a still greater volume of business during the ensuing year. Bank clearings and transportation show a big increase in regard to the former, and the latter is as great as can be handled by the facilities existing. Serious complaints are heard with regard to the difficulty of procuring shipments with reasonable promptitude. Retail business has been better during the holiday season than in any previous year. No changes in wages or hours of labour have taken place this month, and generally speaking the labour situation has been quiet.

The Winnipeg Electric Street Railway Company decided, as a mark of their appreciation of faithful service, to give a bonus as a Christmas gift to all employees who have been six months or more in their employ, such bonus to consist of 5 per cent on all moneys received by each employee during the year ending November 30, 1903.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters and plasterers are busy. The former are especially well employed for this particular season. All other building trade crafts who can pursue their calling indoors are busy.

Metal, engineering and shipbuilding trades.—The ironworkers generally are busy. Holiday making, however, has brought a slight relaxation of the business. Prospects are such as to give good reason for anticipating a larger volume of business for next year.

Woodworking and furnishing trades.—The woodworking mills are fully employed, and the cessation of building will scarcely enable them to get inside furnishing orders out of the way before the rush of building in the spring.

Printing and allied trades.—Printing and allied trades are busy, and prospects are bright.

Clothing trades.—Clothing trades of all kinds are enjoying as much business as they can handle.

Food and tobacco preparation.—Bakers and confectioners have had a splendid year, and this business is growing in dimensions corresponding with the increased population.

Leather trades.—The leather factories are busy, and working full staffs, with lots of business ahead.

Miscellaneous.—In all other classes of employment the conditions are favourable. There is a surfeit of clerks, copyists and other male labour looking for light indoor labour.

Unskilled labour.—Unskilled labour is abundant in the city. A large element refuse to go outside of the city to work.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of December skilled labour was well employed, as the weather was favourable to out door employment. With the exception of stone masons, men engaged in the building trades were steadily employed. The C. P. R. company will have employment for a large number of carpenters and joiners during the winter, finishing the new addition to the station, building an overhead bridge and completing the work on the new round-house. Throughout the city there is a number of buildings that were unfinished, giving employment to a large staff of carpenters. There is still a large number of men unemployed, who

were engaged throughout the district during the summer, and have come into the city, the majority of whom are old country men. No new industry has started or stopped during the last month, with the exception of the planing mill, which was closed for repairs, and also putting in new machinery. All factories are working full time. There is no special activity in any particular trade, excepting those engaged in railway work. Transportation companies are doing a very heavy business. Bankers report business paper throughout the district has not been met as satisfactorily as desired, owing chiefly to the slow movement of grain. Wholesale firms feel the effect also. Wholesale and retail merchants report trade fairly active. Heavy stocks are being laid in for the Christmas trade. No change has taken place in rates of wages or of hours of labour with the exception of railway engineers and firemen. The committee of engineers and firemen, who were in Montreal recently representing men in this division, have returned and have given a very favourable report of their interview with the officials, the company having granted a very substantial increase to engineers and firemen engaged between the Atlantic and Pacific coast.

CONDITION OF LOCAL INDUSTRIES.

Agricultural matters are quiet as is usual at this time of the year.

Lumber mills are a little slack now as the building season is over.

Several *factories* are closed till the first of the new year taking stock. The Brandon Creamery Co. has opened its new premises and is carrying on a more extensive business. Machine shops are slack at the present time; there are no openings for any more hands. The Brandon marble works will close after Christmas for some weeks. Men engaged in the Brandon tannery are fully employed.

Railroad construction has closed for the season, excepting three gangs employed on the Kirkella branch.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are idle. Carpenters and joiners are nearly all idle. Lathers and plasterers are also idle. Plumbers are exceptionally busy. Stone-cutters find work slack.

Metal, engineering and shipbuilding trades.—Machinists are busy, with no openings at present. Blacksmiths find trade good, so do jewellers and watch case makers.

Printing and allied trades.—Printers and pressmen are busy.

Clothing trades.—Journeymen tailors' trade is good. Shoe and boot makers are busy.

Food and tobacco preparation.—Bakers and confectioners are very busy. Butchers and meat cutters find work plentiful. Ice cutters and drivers are busily employed. Cigar makers and tobacco workers satisfactorily employed.

Leather trades.—Tanners and curriers are exceptionally busy. Harness makers find steady employment.

Miscellaneous.—Barbers' trade is excellent. Clerks and stenographers are very busy. The furriers and hotel and restaurant employees are busily employed.

Transport.—Men engaged in all branches of the railway service are exceptionally busy.

Unskilled labour.—Quite a number of unskilled labourers that arrived in the city are unemployed. A considerable number of old countrymen have gone home, but they have bought return tickets.

DISTRICT NOTES.

Owing to the slow movement of wheat merchants complain that business is somewhat unsatisfactory. The Assiniboia authorities and the Canadian Pacific Railway company are making a searching investigation into the fatal accident by which three men were killed and another one died since in Brandon hospital. It appears from the evidence already taken that some one

tampered with the switch. Several arrests have been made, and they are confined in Wolseley jail to stand their trial.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, Correspondent, reports as follows:—

DISTRICT NOTES.

Generally speaking, little, if any, alteration has taken place in the Kootenays during December in respect to conditions governing labour. A possible exception was the case of some East Kootenay lumber camps, where a few shut-downs were reported, the men from the lumber camps coming into the towns looking for work. This applies more especially to Moyie, where a number of lumbermen were stated to be seeking employment early in the month. Since then it is understood that all these men were employed as the result of enhanced activity at other points in East Kootenay. Lumber operators claim that the market in the Territories is disturbed as the outcome of an alleged policy of dumping surplus product into the market by American mills. On this ground, representations are being made to the Federal government for a duty on the Canadian manufactured lumber. More large lumbering plants will shortly join the working list, however, so that the demand for skilled labour in this line is likely to be maintained, even if some mills less advantageously situated with respect to their raw material are compelled to suspend work for the present. There seems to be no definite ground, however, to believe that this will be the case.

In *mining* practically nothing of importance as affecting the labour situation is reported. Winter has, of course, set in, and weather conditions always count in the interior economy of a mining country. In the case of the *Kootenays*, many men engaged in development work on properties unequipped for winter operations have been compelled to turn their attention elsewhere, but the advent of snow brought

about activity in new quarters, so that matters adjusted themselves. In the case of a number of properties, especially in the silver-lead district, snow is essential to the shipment of ore by raw-hiding, and the employment of men in this work took up the supply of labour in the market. A proposal of silver-lead, it is interesting to note that a statement made in the provincial legislature recently that the federal bounty on lead had done the country no good elicited a prompt denial from the owners of silver-lead mines. The outlook, accordingly, is good for a considerable increase in the number of skilled miners employed in the silver-lead producing sections of the country. The bounty has not achieved this end as yet, but it is pointed out that conditions cannot be remade in a few weeks, and that if the end in question is secured next spring the bounty will have accomplished its end.

In *Roseland* camp matters are practically in the same condition that has ruled for several months past. Approximately 800 men are engaged in and about the mines, the December pay roll at the combined mines being in excess of \$80,000. The outlook for considerable increases in the force of building artisans is excellent. One federal structure will be erected in the spring, at least one additional concentrator is on the list, and another mining company is preparing plans for reduction works requiring an outlay of \$40,000 or thereabouts, about 50 per cent of which will be distributed to workmen in the building trades.

In *Boundary* district matters are in an exceedingly satisfactory condition. The Boundary Falls smelting works suspended operations about the middle of the month through the stoppage of ore supplies from the Snowshoe mine after the mining company had asserted its intention of arranging for independent reduction works, but the announcement has been made that the suspension at the smelter is temporary only and no uneasiness is felt. Elsewhere the prospect of substantial expansions in the

mining and smelting industry is exceptionally bright.

The *metalliferous mining* sections of the Kootenays close the current year with the satisfactory record of a total absence of friction between workingmen and employers. There have been interruptions in the *coal mining* industry of *East Kootenay*, but these were satisfactorily arranged, and for many months the situation from end to end of the district has been entirely satisfactory in this respect.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. Geo. Hargreaves, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market for the month of December is very favourable. The building trade is slack owing to the wet weather. Unskilled labour for railroad construction is in demand.

Many branches of trade are exceptionally good, notably printers, retail clerks, for which a demand is made. A local firm is establishing and equipping a plant to supply the trade locally and for the eastern market for halibut. A number of men are at the present time preparing for the first trip north.

The Columbian Printing Company have issued a special Christmas number of 6,000 copies, with 300 illustrations, in the completion of which four tons of paper was used. The number of hands employed by this firm is 29, three times the number employed a few years ago. The staff employed on the production have been working overtime during the past two months.

Work was started upon the construction of a large dock on the water front for the Vancouver, Westminster and Yukon Railway, a large force preparing the railroad right of way and tracklaying. A local branch of the licensed victuallers is now formed. The objects are to protect the interests of its members. Similar branches

of the association are in existence in other cities of the province.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Very little is being done in this line at the present time. What men are fishing are placing fish with shippers for the eastern trade.

Lumbering.—This industry is fair at the present time. Shipments are being regularly made to the eastern provinces. Very few camps at the present time are running.

Railroad construction is exceptionally active. Several survey parties are at work, and this branch will be good for some time.

Manufacturing.—The various firms are employing full staffs, with prospects good for spring.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trade is very quiet, with the exception of the plumbers, who report work steady.

Metal, engineering and shipbuilding trades.—Iron workers report work fair, still no demand for additional help. Ship builders and caulkers report work quiet. Several rush jobs in neighbouring ports have found employment for some of the members of this craft.

Woodworking and furnishing trades.—Woodworkers in all branches report work steady, with good prospects for spring trade.

Printing and allied trades.—Printers and pressmen report work plentiful; both job and newspaper work.

Food and tobacco preparation.—Cigar-makers are working full time until holiday trade is completed. Usually it is very quiet in January.

DISTRICT NOTES.

The Lulu Island Gas Company of *Steveston* have a staff of men employed boring for oil. Though the indications of the presence of oil are the best, the company

does not expect a flow till they have sunk the pipe much deeper than it is at the present time. As yet they are down about 200 feet, and just clear of the quicksand.

VANCOUVER, B.C. AND DISTRICT.

Mr. Geo. Bartley, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been a steady demand for labour in almost all indoor occupations during the month. This has been particularly the case in the printing trade, the printers on the newspapers having had their wages advanced.

Regarding the building trades, some \$1,400,000, according to the building inspector's permits, were spent in buildings for eleven months. So far this month \$75,000 permits have been issued. This really is a starter for the new year. As usual large numbers of men have arrived from outside points to winter here. This is especially the case with loggers.

Commercially, the general report is that this season's trade for the holidays has been most gratifying and satisfactory, money has been freely spent and a good trade done in all lines by local dealers. Teas and coffees are firm and indications point to advances in prices. Eggs are firm, both fresh and pickled bringing high figures. Apples are very scarce, and choice fruit commands good prices. Feed stuffs are very firm, hay being \$17 to \$19 a ton. Ranchers who got their crops in before the rains in the early fall and held them are now reaping a rich harvest. As the building trades keep brisk, so does the demand for hardware for builders. Among the local building trades there is not even a murmur for increased wages for the new year. In response to inquiries everything in this regard appears to be satisfactory, and it is highly probable that there will be no demands for increases of wages or lessening of hours made during the opening of the coming season.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—About the only thing doing in fishing industry at present is by the New England Fish Company. This company has two steamers—the *New England* and *Kingfisher*—which sail between this port and the northern halibut banks, and do a good business. The halibut is shipped to New York and Boston via the Canadian Pacific Railway and good wages are paid the deep sea fishermen. Beyond the mere local demands for fish, the fishermen are practically out of employment.

Lumbering.—The trade is at a standstill. A large number of loggers are out of employment, and prospects are uncertain.

CONDITION OF PARTICULAR TRADES.

Building trades.—Plumbers report trade good, with all journeymen busy. With carpenters the demand for men is far less than the supply. While wages remain unchanged and work good, it is the arrival of outsiders for the winter and the wet season that is the cause of a large number being unemployed.

Metal, engineering and shipbuilding trades.—Electrical workers and linemen have had their wage schedule signed up with the New Westminster and Burrard Inlet Telephone Company, Limited, for the year. It is practically the same as last year. There is no demand for men. With blacksmiths work is good. Sheet metal workers report no demand for men.

Woodworking and furnishing trades.—Shingle weavers report trade dull, a large number of men being idle.

Printing and allied trades.—With printers work has been particularly brisk in all lines, but will slacken off after the holidays. Advertising in the daily press has far exceeded all previous records in space. The arbitration between the Typographical Union and the Master Printers' Association resulted as follows :

From this 28th day of November, 1903, to the 31st day of December, 1904, the following scale of wages shall be paid to the machine men,

advertisement men, and all other hand compositors and stone men, namely :

For day work, \$22 per week, 7½ hours' composition per day ; for night work, \$4 per day, 7½ hours' composition

To machinists there shall be paid \$25 per week.

To proofreaders there shall be paid \$21 per week day work, and \$22.50 per week night work.

Men working at night shall be paid night scale, although their product is used in afternoon papers, and men working day time shall be paid day scale, although their product is used in a morning paper.

The extra prices heretofore charged for composition on morning papers published on holidays, or the day subsequent, are hereby abolished.

From the 1st October, 1903, to the 28th day of November, 1903, the above scale shall be paid, but operators must have averaged 40,000 ems per day of 8 hours.

This award shall be binding until the 31st day of December, 1904, and thereafter until terminated by either party by a previous three months' notice in writing.

The publishers have issued the following notice :

In consequence of the increased cost of white paper and other materials, and the higher scale of wages paid compositors, as the result of the recent arbitration, the proprietors of the four daily newspapers published in Vancouver hereby give notice that the price of their newspapers will be advanced on or before August 1st, 1904.

Food and tobacco preparation.—Bakers report no demand for men.

Miscellaneous.—With barbers work for journeymen has been brisk, and prospects are very good. Clerks in stores report a good demand for competent men during the holidays, but the outlook for employment is not encouraging. Stenographers report no demand at all. A large number are desiring situations.

Transport.—With freight handlers work has been fairly good, and the prospects are good. There are about 200 teamsters in the business.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The generally satisfactory condition of the labour market has been well maintained through the month of December, activity prevailing in nearly all branches of industry. Work on the sewer extension

still continues, and gives employment to a considerable number of unskilled labourers. In the building trades business is much better than is usual at this time of the year, and there are few idle men in the city. The metal trades continue active, and all local factories are fairly busy. Cigarmakers and garment workers are enjoying a season of exceptional activity. Business in general has been good, the only noticeable slackness being in the tailoring trade. Wholesale and retail merchants report a good month's business, ahead of the corresponding month of last year. There has been no change in the rates of wages or hours of labour during the past month, and friendly relations exist between employers and employees.

A joint meeting of all building trades unions was held during the month to consider the formation of a Building Trades Council, and organization was perfected. On December 12 the bookbinders of the city formed a union, and applied for a charter to the international of this craft.

CONDITION OF PARTICULAR TRADES.

Building trades.—Nearly all bricklayers are working. Carpenters are fairly well employed, occasional rain interfering with outside operations. Lathers and plasterers are well employed. Painters and decorators report work as being fair for this season of the year. Plumbers are exceptionally busy, owing to the large amount of plumbing due to sewer extension. Steamfitters are also well employed. The few following the occupation of builders' labourers find steady employment.

Metal, engineering and shipbuilding trades.—Moulders are well employed. Iron workers and helpers are also fully employed, with good prospects for some time. Nearly all machinists are working. Electrical workers and linemen report favourable conditions. Blacksmiths and horse-shoers are well employed. Boilermakers report fair employment. With shipwrights and caulkers little work is being done, and many are idle.

Woodworking and furnishing trades.—Woodworkers are well employed. Carriage and wagon makers report business brisk.

Printing and allied trades.—Printers, pressmen and bookbinders are fairly well employed, but there are a few printers out of work.

Clothing trades.—The journeymen tailors report business dull, and many are unemployed. Garment workers are fully employed, and business is brisk for this season of the year.

Food and tobacco preparation.—Bakers are fully employed, and report business as being very good. Cigarmakers report business brisk, and all hands are fully employed.

Leather trades.—Harness-makers and saddlers report trade good, and nearly all employed.

Miscellaneous.—Barbers are well employed. Clerks have been well employed during the month.

Transport.—Steamboat men and steamboat firemen are well employed. Ship labourers and longshoremen report work as being good for the season. Street railway employees are well employed. Teamsters and expressmen are well employed.

Unskilled labour.—Work on the sewer extension continues, and as a result unskilled labour is fairly well employed. While there is no marked improvement in the preceding month, yet for the season conditions are exceptionally good.

NANAIMO. B.C., AND DISTRICT.

Mr. A. E. H. Spencer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district has shown no improvement since last month, business being very quiet, with very little demand for labour of any sort. The past year has been a very quiet one in all branches of labour. The coal mining industry, which is the principal in-

dustry in this district, has been very much disturbed during the first part of the year, and as the other trades are more or less dependent upon it, it has had a depressing effect on the general business of the district. In commercial circles there has been a very fair holiday trade, but not as rushing as in past years. There have been no changes in rates of wages in this district.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The herring fishery is in active progress, there being a very large run this year.

Lumbering.—The lumbering industry is quiet in this district. In the local mill they are working short time only. At Chemainus they are still working full, their product going principally to foreign markets. In the lumber camps work is slack owing to the continued wet weather.

Mining.—In the quartz mining districts work is quiet, although in some parts there is a good deal of work going on, but there are more men than there is work for. In the coal mines in this city, while work is steady for those who have places, the output of coal for the past year has been very small, but the Western Fuel Company is opening up new workings and expects soon to largely increase its output. The other collieries in the district are also working steadily for an increase in their outputs, and while the past year has not been a very

good one for the miners in general, the outlook is improving all the time.

Building trades.—There is hardly any thing doing in any branches of the building trades. Painters report business as very dull.

Metal, engineering and shipbuilding trades.—Blacksmiths and carriage makers report business as fair.

Printing and allied trades.—Printers report business as quiet.

Transport.—Teamsters and express men complain of poor work, there being very little doing.

Unskilled labour.—There is hardly any work for unskilled labour at present.

LEGAL DECISIONS AFFECTING LABOUR.

The Mines Inspector has been enforcing the law against employing Chinamen in the mines. The Union Coal Company have been fined in nearly 200 cases, but have appealed their case, and it is now in the courts for decision.

DISTRICT NOTES.

At *Cumberland* the company is pushing work on their seam of anthracite, and expect to soon be able to place it on the market.

The smelter at *Ladysmith* is working steadily.

REVIEW OF LABOUR AND INDUSTRIAL CONDITIONS IN CANADA DURING 1903.

THE general activity and prosperity which prevailed in almost every branch of trade and industry in Canada during 1903 is the feature which calls for immediate mention in any review of the labour and industrial situation during the year. With the exception of only a few localities among those from which regular reports were received by the Department of Labour throughout the year, and of a few branches of industry, notably the fishing

industry, the amount of employment available undoubtedly exceeded that of 1902, which in its turn constituted a record year in the history of Canada for the general prosperity of industry.

Though at the close of 1903 returns in the agriculture industry showed a falling off in certain of the leading products, no serious interruption to general activity was contemplated in consequence.

A feature of the year just past was the continuance of its activity over the several months. An exceptionally busy holiday season in 1902 was followed by an unusually early opening of the spring season which affected directly or indirectly almost every branch of employment. These conditions were continued throughout the summer months, and it was not until the closing two months of the year that any material abatement in the total amount of employment, and this largely attributable to seasonal causes, was observed.

Wage Increases, Decreases in Hours of Labour, Trade Disputes.

An important industrial feature was the marked tendency towards an increase in the rates of wages or a reduction in the hours of labour, or both, in many of the most important branches of industry, and in practically all of the provinces of the Dominion, though the movement was especially marked in Quebec, Ontario and Manitoba.*

The general prosperity of the country was checked in many localities by trade disputes, which in numbers and magnitude exceeded those which occurred during the two previous years.† The shipping trade at Montreal was seriously affected by a strike of longshoremen from the opening of navigation until May 11, and the effects of the dispute were felt by exporters in many localities throughout Ontario and Quebec.

Building operations were greatly impeded in the spring months in Toronto, Montreal and Calgary, and to a lesser degree at Vancouver, B.C., and St. Catharines, Ont. In July and August, there was a large strike of carpenters at Halifax, and in the autumn there were further strikes

in the building trades both at Montreal and Winnipeg.

At least equally disastrous were the numerous disputes among coal miners in British Columbia, which beginning with a strike at Fernie on February 11, extended to Ladysmith a month later and to Cumberland on May 4. The strike at Fernie came to an end on March 31, but the other two lasted until July, and great loss was occasioned to the industries dependent upon the mines at these places for fuel.

The city of Quebec also suffered heavily for a time on account of trade disputes. A small strike of shoe-workers developed into a lock-out affecting 5,000 employees from November 14 to December 17, and the prolongation of the dispute caused losses to many other industries of that place.

Shortage in the Coal Supply.

As a feature which more or less affected industrial conditions, particularly during the early part of the year, mention should be made of the effect of the strike of miners in the anthracite regions of Pennsylvania during 1902. Though the strike was begun in May and concluded in October, 1902, and was confined entirely to the United States, it was not until the month of March, 1903, that the supply of anthracite for domestic and commercial purposes reached its normal proportions. Though manufacturing and transport were adversely affected, the impetus imparted by the scarcity of fuel to coal mining in Nova Scotia and to the development of the lignite deposits scattered over Manitoba and the North-west Territories, may be regarded as having operated to the furthering of the coal mining industry in this country. The most important effect of the strike was upon the general social life of the provinces of Ontario and Quebec, resulting from the high price at which all sorts of fuel were held. The stimulus given to municipal and corporate action in meeting the heads of local communities, and the action brought at Brantford against the Ontario Coal Association for alleged conspiracy to lessen competition in the pur-

* The reader is referred for particulars on these points to the special article published in the September 1903 *Gazette*, on the subject of the changes in wages and hours during the past nine months of 1903, and to the detailed monthly reports on changes in wages and hours which have since appeared in the *Gazette*.

† The reader is referred to the special article in the present number for particulars as to the nature and extent of trade disputes during 1903.

chase and sale of coal were important incidents arising out of the situation.*

The Immigration and Colonization Movement.

The proportions reached by the immigration and colonization movement during the year was a very important feature affecting the whole industrial situation. Though the year 1902 exceeded all previous records in the number of immigrants reported as having arrived in Canada from Europe and the United States, reports for 1903 show an advance of fully thirty per cent upon the returns of that year. Accompanying this influx of immigrants, the opening up to settlement of new lands has been on a scale unprecedented in the history of the Dominion. The expansion of western Canada is to be noted, therefore, as one of the most significant features of the year.†

Similar developments on an unusually active scale were carried on under the auspices of the provincial governments, notably in Ontario, where the opening up of the Lake Temiscaming district was followed by a heavy influx of settlers. April, May and June were the most active months in the matter of arrivals of immigrants from foreign ports. For the fiscal year ended June 30, the total of 124,658 arrivals were reported, of whom 47,980 were from the United States, and 41,787 from the British Isles. Financial returns for the calendar year were not procurable on December 31, but were roughly estimated at 134,000. As in 1902, a large number of settlers, a most desirable class of immigrants from the western states of the American Union entered via Winnipeg. Another incident of the immigration movement of

1903 which received wide attention was the arrival of an all-British colony numbering over 1,900. This was the largest single party of emigrants that ever left Britain for this country. It located in the neighbourhood of Saskatoon, N.W.T., and organized a new municipality. The influx of immigrants, though consisting very largely of agricultural labour, included also a number of skilled artisans. Among the secondary influence of these arrivals may be mentioned the increased business to transportation companies, &c., which the handling of so large a mass of people involved.

The passing of an act by the Dominion parliament raising the head tax on Chinese immigrants from \$100 to \$500 had the immediate effect of increasing the number of Chinese arriving in Canada during the closing months of the year, the movement being in anticipation of the coming into effect of the Act on January 1, 1904.

Conditions in the Industries and Trades

The general condition of employment in the several trades and industries of the Dominion may be briefly summarized as follows :

Agriculture.—The year opened well, with good markets prevailing for the exceptionally heavy crops of 1902, the hauling and shipping of which provided employment on a considerable scale during January and February. A good winter season was reported in stock raising branches. The cutting and marketing of firewood during the winter was exceptionally heavy and remunerative as a result of the scarcity of anthracite, following the strike of the miners in Pennsylvania. With the opening at an unusual early date, of the spring season, there commenced an extreme scarcity of farm labour which continued throughout the year and resulted in the level of wages for this class being raised to a point higher than perhaps was ever before reached in Canada. The scarcity was particularly felt in the province of Ontario, where a number of delegations interviewed the provincial government on the subject and were promised the early commencement of active emigration.

*For a full account of the economic social effects of the strike upon conditions in Canada the reader is referred to a series of special articles in the *Labour Gazette* for November and December, 1902, and for January, February, March and April, 1903.

†Some idea of the proportions attained by this movement may be obtained by referring to the special returns relating to homestead entries which were published each month in the several issues of the *Labour Gazette* of 1903, and which, with the exception of November, show large increases over the returns of 1902.

propaganda in Great Britain with a view to the relief of the situation. A period of dry weather following the disappearance of the snow enabled seeding to be proceeded with under generally favourable conditions, though in a few localities the fall wheat suffered in consequence. Later, however, the continued dryness developed into something approaching a general drought in central and eastern Canada, which lasted until the latter part of June, when a series of general and copious rains prevented the damage that it was feared might be sustained. In July and August the weather continued broken, though little serious loss during harvesting resulted. The exceptional crop of apples and other fruits, especially in Ontario and Nova Scotia is worthy of special reference, as is also the heavy export trade in Canadian cheese and dairy products as indicating an increased scale of activity in these branches. In Manitoba and the North-west Territories a larger acreage was sown in field crops than in 1902, though with a smaller aggregate return. The year, however, following the exceptional harvests of 1902 and 1901 may be stated to have rendered the outlook for the speedy and permanent development of western Canada beyond question. A further indication of this may be found in the extension of railway lines referred to under a separate heading in the present article. The demand for labour for harvesting the crops in the west was well met, and weather conditions, in spite of a storm on September 12, which did considerable damage locally, were on the whole favourable. Threshing was continued under favourable circumstances, farmers preferring to utilize the good weather in ploughing operations, rather than in the marketing of their grain—a further indication of the prosperity of the agricultural classes. The year closed with some complaints as to lack of transportation facilities, especially after the close of navigation on the great lakes. Good reports were received from the dairying and ranching branches. In British Columbia satisfactory yields of both fruit and field crops were reported. A feature

of the year throughout Canada that might also be mentioned was the activity of various agricultural societies.

Fishing.—Stormy weather interfered considerably with the Atlantic fisheries during the opening months of the year. The result of the lobster season, however, was satisfactory, and the oyster fisheries of Prince Edward Island had good returns. The herring catch was likewise fair. A very pronounced falling off in cod and haddock, however, would have made the record for the year much below the average had not heavy catches of mackerel in the early autumn retrieved the situation. On the great lakes a fair season was reported. The concessions granted to the Manitou Fishing Company by the Ontario government, involving the establishment of hatcheries, the deposit of fry, restrictions regarding catch and size of fish to be taken, and a graded scale of rentals, may be referred to in this connection. In British Columbia the heavy snow fall of the winter by increasing the volume of water in the streams gave prospect of a good season. This expectation, however, was disappointed, the return in the salmon canning industry for the year totalling only 200,000 cases, as against 327,000 last year, and 990,000 in 1901. Prices, however, were satisfactory, and benefit is expected to result from the disposal of all held-over packs. The wages of fishermen suffered in consequence of the failure. The finding of the Royal Commission appointed in 1901, to inquire into conditions in the salmon fishing industries of British Columbia, permitted the use as an experiment of purse seines during the season. With regard to trap nets, however, the Commission held that the difficulties of operating on the shore of Vancouver island, and the large number of men relying on gill-netting, together with other considerations, were sufficient to render advisable the continuance of the present prohibition. The abolition of boat pullers' permits was recommended, and the erection of hatcheries at specified points approved. Good

catches of halibut were made in the Pacific early in the year, and the run of hump-backs in the Fraser was fair.

Lumbering.—The opening months of the year were characterized by pronounced activity in the woods in the central and eastern provinces, the high price and ready market for lumber proving an efficient stimulus. Large cuts were in consequence made in spite of a general stringency in the labour supply; the unusual depth of snow in some localities also impeded operations. The exceptionally early opening of the spring season and rapid disappearance of the snow, accordingly, was the cause of considerable inconvenience, both diminishing the total cut by shortening the season, and leaving a considerable quantity of logs and square timber in the woods as a result of the rapid falling of water in streams. The prolonged dry weather which followed in May and June also increased the difficulty experienced from this source, as well as constituting an added danger from forest fires. Skilled men for the drives were scarce, and the mills in many localities had, in consequence, to wait for the rains which followed later in the season before being able to obtain a sufficient number of logs to engage them to their full capacity. Once begun, however, the work of sawing was continued under high pressure, the mills for the most part working long hours until October, with prices for the product uniformly on a high level. On the whole, however, the total cut in eastern Canada will show a diminution from that of last year. A feature of the year was the early date at which preparations were begun for work in the woods during the coming winter, the lack of labour in spite of the high wages prevailing still continuing. In British Columbia conditions during the first half of the season were excellent, an exceptionally profitable market for the finished product being found in the North-west Territories as a result of the increased settlement and consequent developments in progress there. Later in the season, however, a marked

diminution in this market was encountered, owing chiefly, it was stated, to the completion of the American industry, and resulted in a general shut-down of the mills for a period in August, and a diminution of employment in the logging-camp. Mention may be made of the combine of lumber, alleged to have been in operation throughout western Canada, for the undue enhancement of prices, and which led to a civic inquiry being held at Winnipeg, Man., and a lengthy discussion in the House of Commons; also to the appointment of a commissioner to inquire into the same. The action of the Ontario government during October in inaugurating a policy for the preservation and continuance of forest reserves was an important measure of the year.

Mining.—Prominent features of the year were the activity in the Nova Scotia collieries, the labour troubles in the coal mines of British Columbia, the valuable strikes of oil in Ontario and New Brunswick, and the revival in general tone of metalliferous mining in British Columbia. The strike of the anthracite miners in Pennsylvania was a factor during the opening months of the year in marked activity which prevailed in the Nova Scotia coal fields, and in the development on a largely increased scale of the lignite deposits of Manitoba and the North-west Territories. In Nova Scotia, however, the activity was prolonged until the close of the year, and after the immediate effects of the shortage of Pennsylvania anthracite had ceased to be felt. The result was to materially increase the output of the different collieries, and to insure active conditions of employment in all branches. A disastrous fire, which broke out on March 19, in Dominion No 1 pit at Glace Bay, proved almost the only serious set back the industry received in Nova Scotia, with the exception, during December, of a strike of 1,600 miners at Springhill, which lasted six days. In the British Columbia coal mines, however, developments were otherwise. A strike of the

Coal Creek, Michel and Morrissey employees of the Crow's Nest Pass Company, to the number of 1,500, was declared on February 11, and continued over the following month into April. The immediate effects of this interruption were perhaps less serious than the indirect losses sustained by other industries, inasmuch as from 50 to 75 per cent of the metalliferous mines of the province dependent upon the Fernie coal fields for their supply of coke for smelting purposes were seriously embarrassed for some time. Had not a settlement come when it did a very serious crisis might have come upon the entire industries of the province. On Vancouver island a strike of short duration occurred at the Nanaimo collieries, and a strike involving over 1,000 men at Ladysmith and Cumberland fields extended for a period of over three months. With the cessation of these and other labour difficulties, owing largely to the investigation undertaken by the Royal Commission appointed to examine into the entire question of labour disturbances in British Columbia, the industry entered upon a period of activity in the summer and autumn months. In the metalliferous mines of the province the granting of a bounty on silver-lead ores by the Dominion government during the session of parliament caused a marked improvement in conditions, with the result that the closing months of the year witnessed a revival of a hopeful attitude in British Columbia mining. In Ontario and Quebec a fair year was reported from the metalliferous mines, the revival in mica mining in the latter province being a prominent feature.

An important event of the year was the organization in February of the British Columbia Mining Association, at a convention held in Victoria, representing the various interests dependent upon the industry in that province

Manufacturing.—A busy year was the experience in almost every branch, and in almost all sections of Canada, the general prosperity acting directly in the way of

increasing manufacturers' outputs. Especially notable was the number of new manufactures established, the record of the amount expended on new factory buildings in the more important industrial centres being considerably in excess of last year. Developments in this particular were most noticeable at Montreal, Toronto, Hamilton (where the Deering and Westinghouse companies erected buildings at a large aggregate expenditure), Winnipeg and Vancouver. Other manufacturing centres also showed expanding and busy conditions. The closing down, on September 18, of the Consolidated Lake Superior Company at Sault Ste. Marie, Ont., which threw some 3,500 men out of employment, was the most serious manufacturing failure of the year in Canada. Arrears of wages amounting to some \$200,000 were, however, met, and the pulp and saw mills of the company resumed operations, though definite arrangements as to the reorganization of the company and the continuance of the industry had not been fully concluded at the end of the year. The rearrangement of the terms of amalgamation of the Dominion Iron and Steel and the Dominion Coal companies was another important event, some depression in the steel industry in Ontario at Sydney being reported in November and December. Cotton and woollen manufactures reported varying conditions. Agricultural implements and machinery makers had an exceptional year. The beet sugar industry in Ontario began the season's run under favourable conditions; a new factory in this branch was opened at Raymond, Alberta, in October.*

Railway construction and the transportation industry.—The year just closed, like 1902, was one of extreme activity in all branches of the transportation industry. Inasmuch, moreover, as the facilities for transport were

*A special article on the beet sugar industry in Canada appeared in the April issue of the *Gazette*, p. 762.

considerably superior to those of the preceding year, the volume of traffic was greater, a fact which was evidenced by the materially increased earnings of the Canadian Pacific, Grand Trunk, Intercolonial, Canada Atlantic and other railway companies, the aggregate reaching a total unprecedented in the history of the industry in Canada. The general business of transport was, in fact, only limited by the capacity of the companies, and in spite of the important additions to rolling stock made, more particularly by the Canadian Pacific, Grand Trunk, and Canadian Northern Railway Companies (a movement which insured a very busy year in the various railway shops) serious car shortages were at intervals reported from several localities in the Dominion. This congestion of traffic, which in a number of instances caused more or less serious loss to merchants, was particularly a feature of the opening months of the year; the moving of the heavy western crop of 1902 and the increased shipments of coal which followed the conclusion of the strike in Pennsylvania operated as factors in the situation. In November and December also, with the beginning of the movement of the crop of 1903, which for various reasons was delayed until a later period than usual, a shortage of cars was reported both in the west and in Ontario. The heavy immigration movement and a fair season's tourist and excursion traffic also contributed to make the year a successful one from the standpoint of railway employment, including longshoremen and the various other branches dependent upon transportation. It should be noted, in passing, also, that street railway companies in several of the larger Canadian cities reported largely increased earnings. Wages in consequence, were generally high, and showed an upward tendency. Mention may be made of the decrease in wheat freight rates which went into effect on the Canadian Pacific Railway and the Canada Northern Railway on the opening of the active season of the present year. Lake and ocean traffic were likewise exceptionally heavy, as is shown by the returns of the port of Mont-

real, in which an increase in the tonnage of both sea-going and inland vessels is indicated, the shipment of corn, wheat, cattle, cheese and apples being exceptionally noteworthy, and by the additions made to the Canadian merchant marine operating on the lakes, as well as the increased returns received from the Sault Ste. Marie and St. Lawrence canals, the toll of $\frac{1}{2}$ c. per bushel charged on the latter having been abolished by the government. In this connection also attention may be drawn to the heavy custom returns for Toronto, Hamilton, London, Winnipeg, Vancouver and many other cities of the Dominion, as throwing light upon the volume of traffic in general merchandise during the year. The purchase by the Canadian Pacific Railway Company of the Elder-Dempster fleet, which went into operation on April 14, and the calling for tenders on the fast Atlantic service by the Dominion government were incidents worthy of mention.

With regard to railway construction, the season just closed has been without doubt the most active in the history of Canada. The number of branch lines building by the larger railway systems in western Canada was particularly noticeable, including lines undertaken by the Canadian Northern from Grandview to Edmonton, a distance of 620 miles, and from a point on the Prince Albert branch to Prince Albert, a distance of 100 miles. Additional evidences of the scale of railway development in Canada during the year is to be found in the fact that no less than 84 out of a total of 206 Acts passed by the Dominion Parliament during its lengthy session had directly to do with transportation, being chiefly in the way of granting new incorporations and enlarging the scope of existing companies. Most important of these measures, and of all similar projects of the year, was the Bill introduced by the Right Honourable the Prime Minister in the House of Commons on June 30, making provision for the construction of a second transcontinental railway system, the Grand Trunk Pacific. The passing of this Bill by Parliament aroused the most wide-spread

interest, involving as it does the most important undertaking of the kind in Canada since the building of the C.P.R. Work on the Temiscaming and Northern Railway progressed rapidly, being pushed with great activity throughout the year. Important also, from the standpoint of labour, among the Acts of the Dominion Parliament of the year affecting transportation was the consolidation and amendment of the Railway Act under which a Railway Commission was appointed,* an Act for the Settlement of Railway Labour Disputes,† framed with a view of preventing any possible derangement of the transportation system in consequence of strikes, and the appointment of a transportation commission of experts to take into consideration the entire problem of transportation in Canada, and report upon the needs of the existing situation.‡

The trades.—The several trades on the whole had a thoroughly satisfactory year, with an appreciable increase in the aggregate amount of employment over 1902. The early opening of spring extended the season of out-of-door employment in the *building trades*, and the extent of operations carried on at several points in Canada exceeded the record of all previous years. The city of Winnipeg lead in this respect, but in Montreal, Toronto, and in fact a majority of the cities of Ontario, the record for the year was materially in advance of 1902. Strikes at Toronto interfered seriously with employment during May and June, and at Halifax, Calgary, Winnipeg and other points labour disturbances were an adverse element in the year's record. During the closing months of the year, though activity in the outdoor branches had practically ceased, no diminution of employment was visible in the indoor branches. Increases

in wages and reductions in the hours of labour were especially noteworthy features of the building trades movement in many localities.

In the *metal trades* the year was one of widespread and continuous activity, more particularly in the province of Ontario, where, during the spring months, the question of the supply of labour was the subject of much discussion.

In the *woodworking* branches the year was characterized by general activity, coopers in particular during the summer and autumn months being rushed with employment on account of the heavy demand for fruit barrels and cases.

In the *printing trades* a pronounced scarcity of men was complained of in the Maritime Provinces throughout the spring and summer season, and elsewhere in Canada the trade has enjoyed a prosperous and active year.

Practically the same is true in the matter of general activity, of the *clothing, food and tobacco* and *miscellaneous* branches. In the *leather* trades the scarcity and high price of labour made conditions prosperous for the workingman, though a strike which occurred in Quebec in November exercised a demoralizing influence upon the record for the year.

Unskilled labour, in view of the general shortage of supply of skilled men, and of the amount of development work being undertaken, had an excellent year, wages having prevailed on a higher level than ever before experienced in Canada.

Foreign and Domestic Trade, Revenue, etc.

The record of activity in the various trades and industries above outlined will be found reflected in the returns of the foreign trade and revenue of the country to a degree which constitutes one of the most outstanding features of the year. High as was the trade record of the preceding fiscal year, it was exceeded by that of 1903, which reached the unprecedented total of \$459,-

*For a review of this Bill see the *Labour Gazette* for November, 1903, page 410.

†The full text of this Act was printed as an appendix to the August number of the *Gazette* 1903. A special article on the subject appeared in the same issue, p. 1903.

‡A special article descriptive of the scope of the commission appeared in the *Labour Gazette* for June, 1903, page 974.

640,260 (made up of \$225,849,724 exports and \$223,790,516 imports), an increase of no less than \$45,208,355 over 1902. Trade with Great Britain increased from \$166,625,283 in 1902 to \$190,099,222 in 1903; with the United States, from \$192,012,434 to \$209,389,119; with Newfoundland, from \$3,498,482 to \$3,714,157; with the West Indies, from \$5,472,747 to \$16,021,294. These returns relate of course to the year ending June 30 last; a reference, however, to the record of the past six months is contained in the 'General Summary' article of the present issue of the *Gazette*, and shows a continuance of the same high rate of increase until the close of the year. The returns for the port of Montreal during the season of navigation, referred to elsewhere in the present article, may be mentioned as a further index in this connection of the proportions reached by the foreign trade of Canada during 1903. An analysis of the various movements indicated in the totals given above would be beyond the scope of the present article, though special mention may be made of the heavy shipments of grain, cattle, cheese, apples and bacon which were prominent features of the year's trading. The inauguration of a Franco-Canadian steamship line, the operation of a monthly service between Canada and South Africa, and the prospects of enlargements offering in the trade with the West Indies and with Japan may be referred to in passing. In domestic trade circles the year opened well after the extraordinarily heavy holiday trade of 1902, with the result that unusually small stocks were for the most part carried over by retailers. The early opening of spring had also a beneficial effect on domestic trade, though the difficulty of securing sufficient transportation facilities, aggravated by the strike of the longshoremen of Montreal, was a contrary influence in some sections of the country. Throughout the summer and autumn likewise trade conditions remained satisfactory in view of the favourable weather, good agricultural prospects and returns and the prosperity of general industry, in which connection the activity

of the collieries in Nova Scotia, of manufacturing in Ontario, of agricultural and railway construction in Manitoba and the Territories, and the brightening outlook of mining in British Columbia on the settlement of the labour difficulties, were leading factors. The increase in Canadian trade with the Yukon and Atlin districts may be referred to, the balance in favour of Canada exceeding that of 1902 by \$77,669. Collections throughout the year were uniformly well met, and the record of failures compared very favourably with 1902. With regard to the situation as a whole, the following extract from a report on trade conditions prepared by a committee of experts and read at the 86th meeting of the shareholders of the Bank of Montreal on December 7, may be regarded as furnishing conclusive evidence within small compass:

Dry Goods—Exceptionally good year.
 Iron and hardware—Excellent year, showing good demand and strong prices.
 Leather exports—Big increase.
 Boots and shoes—A good year with a slight advance in prices.
 Lumber—Very satisfactory with and advance from ten to fifteen per cent in prices.
 Cheese—Best on record.

A feature of the year was the prosperity of banking, as indicated by the incorporation of new banks (for which purpose no less than eight special Acts were passed by the Dominion Parliament), the increase in capitalization of a number of the existing concerns (notably that of the Bank of Montreal by \$2,000,000 and that of Molson's Bank by \$2,500,000), the establishment of new branches on a large scale, the expansion in deposits and note circulation, and other features indicated in the annual reports. A marked decline in Canadian securities occurred during the spring months, accompanied by the failure of two large financial companies. Since that time, however, considerable recovery has been made, and a more healthy tone has been introduced into the general financial situation. The revenue of Canada has shown a continuous increase, customs duties alone showing an advance of \$5,684,822 for the year ended June 30, 1903. For the past five months the record will be found in the

'General Summary' article of the present issue. The cities of Montreal, Que., Toronto, Ont., Winnipeg, Man., and Vancouver, B.C., were prominent in the list of localities at which the amount of duty collected was largely in excess of that of last year. From these and other causes the annual financial statement delivered by the Minister of Finance on April 16 showed the largest surplus since Confederation. In the case of several of the provinces also an expanding revenue was reported; Nova Scotia, for example, reported the largest revenue for a single year in the history of the province, Quebec showed a surplus, and in Ontario the excess of receipts over expenditures for the current year were estimated by the Premier at \$4,000,000.

Legislation affecting Labour.

An account of industrial progress in Canada during 1903 would not be complete without mention of the body of legislation directly and indirectly affecting the condition of labour which was placed on the statute books of the Dominion and the provinces, and which both in bulk and from the point of view of importance of certain measures included in the number, exceeded that of any previous year since confederation. The session of the Dominion parliament which opened on March 12 and prorogued on October 24, being the longest on record, reflected, both in the volume and general character of its legislation the industrial and commercial progress of the country. Of the various Acts passed which may be regarded as of particular interest to the working classes that relating to the construction of a second transcontinental railway, the Grand Trunk Pacific should, perhaps, receive first mention, both on account of the magnitude of the undertaking and consequent effect upon the demand for labour for construction and operation, and also on account of the great development of trade and industry which is expected to follow the opening up of so vast an area of new territory to settlement and cultivation. For the same reason eight-five other measures of the session which had to do

chiefly with the *incorporation of new railway and other transportation companies*, or with the extension of the field of existing corporations were of great importance from the standpoint of labour, as were also the *subsidies*, totalling upwards of \$13,000,000, granted to numerous lines and branches of railways and for the construction of bridges. Among the single Acts of the session, however, the *consolidation of the Railway Act** and its amendments, with the insertion of a number of new and important clauses, was one of the most noteworthy of the year, abolishing, as it did, the old method of railway control by a committee of the Privy Council, and substituting therefor regulation by a railway commission of three members, whose constitution, jurisdiction, procedure, etc., are fully defined. Other alterations made were in the way of further providing for the safety of railway employees, and for the payment of fair wages to workmen engaged on any railway operations under a contract for the Dominion government or under subsidy of the government.† A very important Act also, was the *Railway Labour Disputes Act*, assented to on July 10, an outgrowth of the bill introduced by the Minister of Labour in 1902, which made provision for the appointment of a committee of conciliation in the event of a strike being threatened on any railway system, and for the establishment of a board of arbitration to act in the case of the failure of the conciliation committee, the whole constituting a system of compulsory investigation, the direct enforcement of the tribunal's award being left largely to the influence of public opinion.‡ Other measures passed by the House of Commons and of direct interest to labour were, that increasing the *head tax on Chinese* to \$500, with an increase in the

* For a review of this Bill see the *Labour Gazette* for November 1903, p. 410.

† For a review of the provisions of this Act see the *Gazette* for November, 1903, page 409.

‡ The full text of this Act was printed as an appendix to the *Gazette* for August, 1903. A special article on the subject appeared in the same issue, page 136.

penalty for violation of the Act;* the amendments to the *Manitoba Grain Act* in the way of increasing facilities for the marketing of grain; the granting of *bounties on steel, lead and binder twine manufactures*; an Act for the *incorporation of penny banks*, &c. &c.†

The legislatures of the several provinces also passed a large body of legislation affecting labour during 1903. *Nova Scotia* adopted a conciliation act modelled, on that of the Dominion and the province of Ontario, and adopted in certain cases provisions protecting the payment of wages on works contracted on government subsidy. The safety of employees in and about coal mines was further guarded by regulations governing the qualifications of those to be employed about hoisting machinery. A large list of new industrial companies were also incorporated, representing a marked increase in the amount of employment available in the province.‡ *New Brunswick* placed a Workmen's Compensation Act on its statute books, differing only in detail from the Acts of similar nature in existence in Ontario, British Columbia and other provinces.§ The salaries of officers and workmen in the employ of railway companies under construction or operation under government subsidy were made subject to the approval of the Lieutenant Governor in Council. There were in addition a number of Acts encouraging certain industries. In the province of *Quebec*** the Trades Disputes' Act received important amendments governing the method of procedure and duties of the registrar of councils of conciliation when called upon to intervene in a labour disturbance. The age limit for employ-

ment in industrial establishments was increased to thirteen years for boys and fourteen for girls, while added facilities for the incorporation of fishermen's bait associations were granted. The *Ontario** *Factories' Act* and *Children's Protection Act* were amended, and an Act governing the inspection of lodging houses and laundries passed. In *Manitoba* no Act directly affecting labour received final assent, though an Act respecting trades unions and an Act to amend the *Mechanics' Lien Act* were introduced into the legislature. The branding of cattle, the maintenance and improvement of public roads, and the sanitation of public houses, however, were the subject of special Acts.† The *British Columbia*‡ legislature reenacted certain measures of the session of 1902, which had been subsequently disallowed by the federal authority, requiring an educational test of immigrants coming into the province, and for workmen employed on franchises operated under an Act of the legislature, and preventing the employment of any Chinaman or person unable to speak English below ground in a coal mine. Acts were also passed affecting municipal rights and conditions in several industries.

Royal Commissions.

Associated more or less closely with legislation of the year may be regarded the appointment and operation of royal commissions under the Dominion Government, of which there were three which presented reports and one which organized for active work during 1903. The commission appointed on April 18 on the recommendation of the Honourable the Minister of Labour to investigate industrial disturbances in British Columbia was the direct result of the widespread industrial unrest affecting some of the most important industries of

*See *Gazette* for August, p. 139, for a résumé of the provisions of this Act.

†See *Gazette* for November, pages 411, 412.

‡For a full review of legislation passed in British Columbia during the year, see *Gazette* for July, p. 64.

the province, which had been in continuance during a considerable portion of 1902, and in the spring of 1903 was apparently in no immediate prospect of settlement. The duty of the commission was stated in general terms to be the making of a searching inquiry into the cause of these repeated conflicts, with the view of suggesting a remedy, if possible, whereby industrial harmony might be restored. Especially embarrassing had been the result of disputes between owners of metalliferous and coal mines and their employees and between transportation companies and their employees, and particular mention was made of these disputes in the terms of the Order in Council appointing the commissioners. The commission, which consisted of two members, began its investigation almost immediately after its appointment, and sittings for the taking of evidence were held at Ladysmith, Nanaimo, Extension, Cumberland, Victoria and Vancouver, extending over a period of some six weeks, during which time evidence of a most important character relating to the methods both of organized labour and of employers in British Columbia was elicited. The report of the commission was presented to the Minister on July 8 and was subsequently printed for public distribution. Separate chapters were devoted to the strike of the United Brotherhood of Railway Employees on the Canadian Pacific Railway, and the sympathetic strikes connected with it; to the strikes in the coal mines; to the strike at Ladysmith, and to the strike at Union, while in a final chapter the recommendations of the commission were set forth, being briefly, in condemnation of the sympathetic strike, the boycott, intimidation, blacklisting and picketing, as commonly practiced, while defending the right of workmen to combine. The strike for recognition, legitimate trade unions as opposed to secret political organizations, compulsory investigation, and many other topics of first importance were fully dealt with.*

*For a résumé of this report, see *Gazette* for August, 1903, p. 129.

The report of the commission appointed on May 3, 1902, to investigate conditions in the tobacco-growing industry was laid on the Table of the House of Commons on April 5, and embodied the information collected by the commission at sittings held at Windsor, London, Toronto, Ont., Montreal, Joliette, Que., and at St. John, N.B., during the autumn of 1902. The system of exclusive contracts as practiced by certain manufacturing concerns, which had furnished the original ground of complaint leading to the appointment of the commission, was found to be within the law, though undoubtedly placing competing companies at a disadvantage. The commissioner recommended that the whole question of how far trade may be interfered with by statutory enactment should be taken into consideration by Parliament. The report was the means of placing an interesting body of information with regard to the tobacco industry in Canada at the disposal of the public.

The special commission appointed on the recommendation of the Honourable the Minister of Marine and Fisheries in December, 1901, to investigate conditions in the salmon-fishing industry in British Columbia also handed in its report during the year. It recommended, briefly, that the use of purse seines be permitted as an experiment during the season of 1903; that the system of boat-pullers should be abolished and that hatcheries should be immediately erected at certain points. With regard to trap nets, the commission was of the opinion that their operation on the shore of Vancouver Island would be impracticable, not only on account of the heavy seas and tides and the fact that the fish do not ordinarily move sufficiently close inshore to be taken by such nets, but also because of the effect which their establishment would have on the large number of fishermen who rely for a livelihood on gill-netting in the estuary of the Fraser river.

In the Speech from the Throne with which the Dominion Parliament was opened on March 12, the appointment of a trans-

portation commission was announced, and on May 26 a statement with regard to the personnel and scope of the commission was made by the Right Honourable the Prime Minister in the House of Commons. Some difficulty was experienced in selecting competent and experienced experts as commissioners, and it was only in the closing month of the year, in consequence, that the commission was able to meet for purposes of organization and for determining the exact procedure to be followed in its investigation. The commission will take into consideration in its entirety the complicated and involved problem of the transportation of western products to the markets of the world, investigating thoroughly in this connection such questions as the storage capacity and requirements of various lake, river and ocean ports, harbour facilities, the St. Lawrence river route, and generally the efficiency of any Canadian channel of transportation, whether by land or water, with the view that Canada may be able to control the transportation of her own products in the most efficient method possible.

Legal Decisions.

A number of decisions affecting the condition of labour to an important degree were made by the Canadian courts during 1903. The great majority of these had to do with a closer definition of the liability of employers for injuries to workmen under the different provincial laws. Especially important, however, were the decisions rendered by different Ontario judges in regard to the legal status of trade unions.*

Proceedings of Organized Labour, Employers' Associations, &c.

The formation of new labour organizations† was on an active scale during 1903, there being 277 new unions reported to

the department up to December 31, every province, with the exception of Prince Edward Island, and practically all branches of employment being represented in the number. Referring more particularly to the central bodies, both the National Trades and Labour Congress and the Trades and Labour Congress of Canada held largely attended conventions, at Quebec, Que., and Brockville, Ont., respectively, during the month of September.* At the meeting of the former, resolutions were passed relating in a practical way to conditions of employment in several branches, while at the meeting of the latter the more important subjects discussed had reference to labour legislation, Sunday labour, the report of the British Columbia Labour Commission, the Department of Labour, assisted immigration and other subjects. The report of the secretary-treasurer of the Dominion Congress showed gains in the number of unions, membership and revenue in Ontario, New Brunswick and Nova Scotia, but losses in the number of unions and membership in British Columbia and Quebec, and losses in the number of unions and revenue in Prince Edward Island. In the latter province, however, there was a gain in the number of members, and in British Columbia a gain in revenue. A noteworthy action taken on the part of this congress was the memorializing of the Honourable the Prime Minister on the subject of the Department of Labour in connection with the criticisms of that department by the Canadian Manufacturers' Association, which held its annual meeting at Toronto a short time previous to the convention at Brockville. The National Trades and Labour Congress also held an interview with the Dominion government in October. The Manufacturers' Association, it may be added, besides dealing at length with the subject of the relations between capital and labour, passed resolutions favouring the incorporation of labour unions, the

*An account of these decisions appear in the several numbers of the *Gazette* issued during the year.

†On another page of the present issue of the *Gazette* a detailed statement will be found, accompanied by statistical tables, as to the progress of labour organizations in Canada during 1903.

* A full report of these meetings appeared in the *Labour Gazette* for October at pages 330 and 320 respectively.

amendment of the Alien Labour Law and technical education. Other important meetings of associations, &c., held during 1903 were, the annual convention of the International Association of Factory Inspectors, held in Montreal in August, the meeting of the fifth congress of the Chamber of Commerce of the Empire, also held in Montreal in August, the first annual conference of the Bricklayers' and Masons' Union of Ontario, and the first annual meeting of the Employers' Association of Toronto, held in April; the sixth Canadian congress of Charities and Corrections, held at Ottawa in September, the third annual convention of the Union of Canadian Municipalities, also held at Ottawa during September, and the convention held at Victoria, B. C., at which the British Columbia Mining Association was organized in April.

Notes.

The frequency of *railway wrecks* in Canada, especially during the first six months of the year, was much discussed.

The annual *reports of the assessment commissioners* of the leading Canadian cities showed large increases in the total assessments for 1902.

Canadian vessel owners organized at Ottawa on April 7, under the title of the *Dominion Marine Association*, with headquarters at Kingston, Ont.

A by-law was passed by the Toronto Civic Council in October, compelling manufacturers and others creating the *smoke nuisance* to use smoke consumers, or other similar appliances, after July 1, 1904.

In February a union formed among the members of the *Toronto Fire Brigade* was disbanded owing to the opposition of the chief of the brigade. Opposition to the union was also registered by the Toronto Board of Trade and by several members of the brigade itself.

Among notable instances of the employment of *arbitration* as a means of settling trades disputes may be mentioned the ar-

bitration of disputes in the brass working trades at Toronto, in the boot and shoe industry at Quebec, in the building trades, Halifax, and in the woodworking trades, Toronto.

A statement made to the House of Commons by the *Hon. the Postmaster General* showed that a surplus of \$292,702, including the Yukon deficit, was the result of the past year's operations. The announcement was made at the same time that the minimum salary allowed to postmasters in rural districts would be advanced from \$10 to \$25 per annum.

The consolidation of a number of the leading *fruit packers* of Ontario into one company, under the name of the Canadian Cannery Consolidated Company, Limited, with a capital of \$2,500,000, was announced. The company held its first meeting at Hamilton on June 17, when organization was completed, and about forty factories taken over.

Operations in the *beet sugar industry* in Ontario, which began in 1902, were actively continued during the past year. The organization of a company to operate at Peterboro, in addition to the four which have already erected plants, was completed, and at Raymond, Alta., also, a factory for the manufacture of this product began operations in October.

A meeting of considerable importance was held at Berlin, Ont., in February, consisting of representatives from the various municipalities in western Ontario interested in the development and transmission of cheap electric power from *Niagara Falls*. It was decided that the municipalities interested should take action to obtain from the legislature powers to enable them to carry on the work of development and transmission.

Among the *disasters* of the year affecting industry more or less seriously may be mentioned a rock slide at Frank, Alta., on April 29, by which over 60 people were killed and a number injured. Of the killed, about one-third were miners, and

the coal mines, which constitute the leading industry of the place, suffered severely from the disaster. A fire at St. Hyacinthe, which took place on May 20, caused a serious interruption to the manufacturing industry of that city, some 350 structures

being destroyed, including factories, hotels, schools and dwellings, and some 2,000 people being rendered homeless. A fire which occurred at Ottawa on May 10 destroyed some 200 buildings and about 10,000,000 feet of lumber.

REVIEW OF TRADE DISPUTES IN CANADA DURING 1903.*

THE year 1903 may be said to have begun without the existence of any important industrial disturbances in Canada, so far as the business community was concerned; for, although at the end of 1902 a few disputes existed which had not been definitely settled, industrial conditions had ceased to be affected by them.

Strikes of Coal Miners in British Columbia.

Among the most disastrous disputes in Canada during the year were those of coal miners in British Columbia. The first one was a strike of employees of the Crow's Nest Pass Coal Company at Fernie, Morrisey and Michel, which began on February 11, and was not terminated until March 31. About 1,463 men were directly and 6,000 indirectly affected by it. Nearly all the mining and smelting industries throughout the Kootenays and Boundary districts of British Columbia were compelled to close down, owing to lack of fuel, for which they were dependent upon the Crow's Nest Pass Coal Company. The stoppage of the mines and smelters reacted upon the transportation industry, and several crews were laid off by the Canadian Pacific Railway Company, on account of the diminished traffic. On February 16, another coal strike was declared, involving 854 men in all. This dispute was at Nanaimo, on Vancouver Island.

It only lasted ten days, however, and consequently its effect on other industries was not very great. A far more serious dispute commenced at Ladysmith on March 11, and was not concluded until July 4. On May 4, the trouble extended to Cumberland, where a sympathetic strike was declared, which gradually came to an end in the course of July. A result of these disputes was to produce a scarcity of fuel in the coastal cities of British Columbia, which depend for their supplies on the mines of Vancouver Island. Coal was imported from the United States and also from Japan to make up the deficiency, and the cost of fuel was increased.

Strike of Employees of the Canadian Pacific Railway Company.

The most widespread group of strikes of the year began at Vancouver, B.C., on February 27, when 151 members of the United Brotherhood of Railway Employees ceased work in the offices of the Canadian Pacific Railway Company, on account of the dismissal of one of their members and the refusal of the company to recognize the Brotherhood. On the same day three members went out at New Westminster. On March 5, the strikers were joined by 40 at Nelson, 3 at Rossland, 1 at Trail, 4 at Robson and 1 at Eholt, and on March 9, 18 went out at Calgary and 16 at Winnipeg.

In addition to the series of strikes of these different branches of the United Brotherhood of Railway Employees, a number of sympathetic strikes were declared by other organizations, the chief of which were the Longshoremen's Union with from 150

*The information contained in the present article is based on reports received from official correspondents of the *Gazette* and interested parties, relative to trade disputes which occurred during 1903. A comparison is also made with returns obtained in the two preceding years, an analysis of which appear in the issue of the *Gazette* for January, 1903.

to 200 members, the British Columbia Steamshipmen's Society, and the Teamsters' Union, all at Vancouver. The first two went out on March 4, and the teamsters on March 12, to the number of 200. There were in all about 1,000 men on strike, including members of the United Brotherhood and of the other unions in sympathy with them. The transportation of merchandise was greatly hampered at first, but conditions gradually improved, although at the conclusion of the strike, according to the statement of the company, there remained 294 members of the Brotherhood whose places had not been filled.

Other Strikes of Railway Employees.

A strike of employees of the Quebec Southern Railway Company was declared on January 20, and lasted until March 27. The cause of the dispute was the failure of the company to pay them their wages. About 130 men were directly involved, and traffic on the line was completely stopped for eighty miles from Sorel to Noyan Junction. Much loss was occasioned to twenty or more communities, which were dependent upon this railway for means of communication. The strikers eventually received their arrears of wages, and on March 27 the strike was declared off, the company having signed an agreement providing for the regular payment of wages in future, and promising not to discriminate against any of the strikers.

On April 6 occurred a strike of trackmen of the Canada Atlantic Railway Company, affecting 300 employees. The cause of the dispute was a demand for an increase in wages from \$1.20 to \$1.50 per day for labourers, and from \$1.75 to \$2 per day for foremen. The strike lasted until June 26, when it was officially declared off, and the men returned to work without receiving an increase in wages.

Strike of Longshoremen at Montreal.

With the opening of navigation in the spring at Montreal, there was declared a strike of longshoremen employed on the

docks there. The cause of the strike was the refusal of the men to sign an agreement presented to them by the Canadian Independent Labour Bureau, an association of stevedores, by whom they were employed. On March 31, forty longshoremen stopped work, and as the ships began to arrive in April the other members of the longshoremen's union, numbering 2,200 men, refused to work when called upon to sign the agreement.

In order to be able to unload their vessels, the steamship companies brought over large numbers of men from England, but through fear of the strikers they refused to work until granted strong military protection. During April, and the first week in May, several fruitless efforts were made to bring about a settlement, but eventually a satisfactory agreement was drawn up and signed, on May 11, by representatives of the steamship companies concerned and of the union. The effects of the strike were felt not only in Montreal, but also in all parts of Ontario and Quebec, from which goods were exported to Europe via Montreal, as the Grand Trunk and Canadian Pacific companies were compelled to refuse to accept any freight for Montreal except live stock and grain, owing to the congestion of goods at the docks.

On May 4, the longshoremen were reinforced by a sympathetic strike of 1,500 teamsters, who were joined two days later by 150 coal carters. On May 12, the employers stated that they had about 25 per cent of their full force of teamsters, and on the 16th the men declared the strike off and returned to work, having been granted an increase of about ten per cent in their wages.

Strikes in the Building Trades at Montreal.

Building operations were seriously interfered with at Montreal during the spring by strikes of carpenters and woodworkers, and later on, in August and September, they were again interrupted by disputes of iron roofers and builders' labourers. On

April 13, 120 carpenters declared a strike to enforce their demand for an increase in wages, and ten days later 600 more went out, and for a time delayed the erection of many projected buildings. On April 30, the demands of the carpenters were granted, but there still remained out 150 woodworkers in sash and door factories, who were demanding 22½ cents per hour and a nine hour day. This last strike was unsuccessful, and the men returned to work under the former conditions on June 26.

On August 29, twenty-five iron roofers were locked out by five establishments on account of their demand for 25 cents per hour and a nine hour day. This led to the declaration of a general strike on September 1, which involved eleven firms and 90 men including those concerned in the lockout. On September 22, the demands of the iron roofers were granted. On the 23rd of the month 600 builders' labourers, connected with about 150 firms declared a strike, having been refused their demand that overtime should count time and a half and Sunday labour double time. This dispute was never officially declared off, but many employers agreed to the demands almost immediately, and in the course of the following month practically all the strikers obtained employment on the terms demanded.

Strikes of Building Trades at Toronto.

Building operations suffered more severely in Toronto than anywhere else in Canada owing to trade disputes, during the past year. On May 1, 725 carpenters and 640 builders' labourers declared strikes, having been refused their demand for higher wages. The cessation from work of the labourers caused about 2,500 bricklayers and others to remain in idleness, and the work of building was completely blocked for a time. These two bodies were joined on June 1 by 250 painters, who protested against a reduction of wages from 35 cents, which they had been receiving for a short time, to 30 cents, which was the

rate of the previous season. In addition to the disputes in Toronto, a strike of carpenters, involving 200 men, was declared at Toronto Junction on May 1, and also a strike of 130 brickmakers was declared there on the same day, both of them with the object of securing higher wages. As soon as the strike of carpenters at Toronto was announced, several contractors, acting independently of the Builders' Exchange, agreed to the new scale of wages presented to them, and their employees, numbering about 300, were permitted by the union to return to work. Although negotiations between the employers' association and the various trade unions were of no avail, independent contracts were made from time to time with the unions by individual employers at the wages demanded, while the great stream of immigration from Great Britain enabled others to secure men on their own terms. It was reported that about 200 carpenters, 150 labourers and 38 painters left the town while the strike was in progress. On July 1, the labourers who were still out returned to work at the old rate of 25 cents per hour, and on the 16th of that month the carpenters at Toronto and Toronto Junction also agreed to accept the old scale of wages. A compromise was affected with the brickmakers at Toronto Junction. With regard to the striking painters, the employers' terms were accepted on August 3, but a number of firms had previously granted the demands of their men. It is difficult to estimate the consequences of these disputes, on account of their complexity. It was calculated that at least \$1,000,000 was tied up owing to the stoppage of building operations. Another noticeable result was a marked scarcity of houses, causing a considerable advance in rents, and compelling many families either to seek lodgings or to move several miles outside of the city. The allied trades of sash and door manufacturing, cabinet making and plumbing also suffered from the dearth of new buildings, and the effects of the strikes are still being felt by those classes, who are usually employed during the winter

months in work upon the interiors of buildings.

Other Disputes in Building Trades.

Building operations were brought to a standstill at various other places in Canada during the course of the year. A general strike of all the building trades at St. Catharines, Ont., affecting 25 employers and 300 men lasted from March 2 to March 24. The object of the strike was to obtain an increase in wages and an eight hour day. A compromise was eventually effected by the hours being reduced from 54 to 50 per week, and an increase in wages being granted, though not as large a one as was demanded.

A strike of carpenters for similar purposes occurred at Vancouver, B.C., on April 1, which involved seven employers and 280 men. Work was resumed on the following week, both sides having agreed to submit their differences to arbitration. The award which was delivered on April 22, was in favour of the men. Building construction was again impeded at Vancouver, B.C., and also at New Westminster, B.C., by strikes of woodworkers in sash and door factories, which lasted from June 1 to July 15. The strike, which was for a working day of 9 instead of 10 hours, was unsuccessful. One hundred men at Vancouver and 75 at New Westminster were directly affected by the dispute.

At Calgary, Alberta, 80 carpenters were locked out on June 3, on account of their sympathy with 30 teamsters, who had declared a strike on the first of the month. On July 14, the dispute was settled through the friendly mediation of the Department of Labour, the teamsters having returned to work in the meantime.

A strike involving 160 carpenters took place at Halifax on July 9, owing to the alleged violation of an agreement on the part of the employers. This agreement was the result of arbitration, and on the em-

ployers agreeing to abide by the arbitrators' award, work was resumed on August 7.

On October 20, about 700 carpenters and joiners at Winnipeg, Manitoba, declared a strike, owing to the refusal of the employers to sign an agreement containing provisions for a minimum wage of 35 cents per hour, a 9 hour day and recognition of the unions. Before the end of that month, about 69 out of 89 contractors had signed the agreement, and by the end of November, there remained only eight firms who had not signed. These firms claimed not to be affected by the strike.

Strike and Lockout of Shoeworkers at Quebec.

The last two months of the year were comparatively free from industrial disturbances in most portions of the Dominion, with the exception of the city of Quebec, where a small strike of shoe machinists, on October 30, ultimately resulted in a lock-out involving twenty factories and about five thousand employees, which lasted from November 14 to December 17. The origin of the dispute was the desire of five edge trimmers to be paid by piece work instead of by the day, and their dissatisfaction with the alleged treatment accorded to them by the foreman. On their refusal to work any longer, complaint was laid against them by their employer before the joint board of claims and conciliation for having struck work, contrary to the agreement between their fraternity and the Employers' Association. The strikers were ordered to return to work by the boards of claims and conciliation, and also by the president of the Fraternity of Shoe Machine Workers, but they refused to do so. As their absence severely crippled the factory of the Wm. A. Marsh Co., to which they belonged, the Manufacturers' Association determined to suspend all operations in their factories from November 14, until sufficient individual agreements might be signed with their employees, to enable them to resume work. Both sides remained firm, however, and

the protracted lock-out caused a depression among a number of subsidiary industries in Quebec. The dispute was eventually brought to an end on December 16 through the arbitration commission, and work was resumed on the following day. A fuller account of the settlement of this dispute is contained in the article on trade disputes during the month of December in the present number of the Gazette.

Magnitude of Trade Disputes.

The following table shows the magnitude of the disputes which were reported to the Department in 1903, according to the months in which they occurred. In two cases no particulars were obtained as to their size, but it would probably be safe to class them among those affecting less than twenty-five men.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E, No. 13.

TABLE SHOWING NUMBERS OF WORKMEN INVOLVED IN TRADE DISPUTES IN CANADA DURING 1903.

| Magnitude. | Number of Disputes. | | | | | | | | | | | | Total. |
|---------------------|---------------------|------|------|------|------|-------|-------|------|-------|------|------|------|--------|
| | Jan. | Feb. | Mar. | Apl. | May. | June. | July. | Aug. | Sept. | Oct. | Nov. | Dec. | |
| 2,000 and over..... | | 1 | 1 | | 1 | | 1 | | | | 1 | | 5 |
| 1,000 to 2,000..... | | 1 | | | 2 | | | | | | 1 | 1 | 5 |
| 500 to 1,000..... | | 1 | 3 | 1 | 2 | | | 1 | 1 | 1 | | | 10 |
| 300 to 500..... | | 1 | 2 | 3 | 2 | 1 | | | | | | | 9 |
| 200 to 300..... | 1 | 2 | 5 | 3 | 1 | 3 | 1 | 2 | | | | | 18 |
| 100 to 200..... | 2 | 2 | 1 | 3 | 7 | 1 | 3 | 1 | 1 | 1 | 1 | | 23 |
| 50 to 100..... | 1 | 1 | 2 | 1 | 5 | 2 | 3 | 1 | 2 | 1 | | | 19 |
| 25 to 50..... | 1 | 1 | 4 | 6 | 6 | 6 | 2 | 3 | 2 | 2 | | 1 | 34 |
| 6 to 25..... | 1 | 2 | 4 | 6 | 3 | 9 | 5 | 2 | 1 | 1 | 1 | 1 | 36 |
| Unknown..... | | | | | | 1 | | 1 | | | | | 2 |
| Total..... | 6 | 12 | 22 | 23 | 29 | 23 | 15 | 11 | 7 | 6 | 4 | 3 | 161 |

A comparison with the two previous years, of which a record has been kept, shows the following results :—

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E, No. 14.

TABLE SHOWING MAGNITUDE OF TRADE DISPUTES ACCORDING TO NUMBERS OF WORK PEOPLE INVOLVED IN 1901, 1902, 1903.

| | 1901. | 1902. | 1903. |
|--------------------------|-------|-------|-------|
| 2,000 and over..... | 3 | | 5 |
| From 1,000 to 2,000..... | 3 | 2 | 5 |
| " 500 to 1,000..... | 5 | 1 | 10 |
| " 300 to 500..... | 5 | 8 | 9 |
| " 200 to 300..... | 4 | 7 | 18 |
| " 100 to 200..... | 4 | 15 | 23 |
| " 50 to 100..... | 14 | 21 | 19 |
| " 25 to 50..... | 24 | 28 | 34 |
| Under 25..... | 31 | 37 | 36 |
| Total..... | 93 | 119 | 159 |

It will be seen from the above tables that the greater number of disputes involved less than 100 men. With regard to those involving large numbers, the year 1903 was exceptional, for of those affecting 500 or more men, there were 11 in 1901, 3 in 1902 and 20 in 1903.

Number of Disputes according to Trades affected.

The following table indicates by months the number of trades affected during the year :—

It will be seen that during 1903 by far the largest number of disputes occurred in the building trades, in which there were 44. The transportation industries came next in order, with 18 strikes, followed by 17 in the metal working trades.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E., No. 15.

TABLE SHOWING INDUSTRIAL DISPUTES BY TRADES IN CANADA DURING 1903.

| Trades. | Number of Disputes. | | | | | | | | | | | | Total. |
|-----------------------------------|---------------------|------|------|------|------|-------|-------|------|-------|------|------|------|--------|
| | Jan. | Feb. | Mar. | Apl. | May. | June. | July. | Aug. | Sept. | Oct. | Nov. | Dec. | |
| Building..... | | 1 | 4 | 8 | 9 | 10 | 4 | 3 | 2 | 2 | | 1 | 44 |
| Metal..... | 1 | 1 | 2 | 3 | 3 | 3 | | 1 | 2 | 1 | | | 17 |

| Textile..... | | | 2 | 1 | | | | | | | | | 5 |
| Clothing..... | | 3 | 1 | | 1 | | 3 | 1 | 1 | | 1 | | 11 |
| Food and tobacco preparation..... | | 1 | | 1 | 1 | 2 | | 1 | | | | | 6 |
| Leather..... | 1 | | 2 | | | | | | | 1 | | | 4 |
| Printing and book-binding..... | 1 | | | 1 | | | | | 1 | | | | 3 |
| Transport..... | 1 | 2 | 6 | 3 | 3 | 1 | 1 | 1 | | | | | 18 |
| Longshoremen..... | | | 1 | 2 | | | | | 1 | | | | 4 |
| Mining..... | 1 | 2 | 1 | | 1 | 1 | | 1 | | 1 | | 1 | 9 |
| Fishing..... | | | | | | | 1 | | | | | | 1 |
| Unskilled..... | | | 1 | 1 | | 2 | 4 | | | | 1 | | 9 |
| Miscellaneous..... | | 2 | 2 | 1 | 8 | 3 | 2 | 1 | | 1 | | | 20 |
| Total..... | 6 | 12 | 22 | 23 | 29 | 23 | 15 | 11 | 7 | 6 | 3 | 3 | 160 |

The following comparison with previous years shows that of the important industries, the largest number of disputes in the last three years has been in the building trades, the second largest in the metal trades, the third in the clothing industry, and the fourth in transportation.

TABLE SHOWING INDUSTRIAL DISPUTES BY TRADES IN CANADA IN 1901, 1902 AND 1903.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E., No. 16.

| Trades. | Number of Disputes. | | |
|--------------------------------|---------------------|-------|-------|
| | 1901. | 1902. | 1903. |
| Building..... | 14 | 28 | 44 |
| Metal..... | 23 | 31 | 17 |
| Woodworking..... | 4 | 10 | 9 |
| Textile..... | 6 | 1 | 5 |
| Clothing..... | 10 | 9 | 11 |
| Food, tobacco preparation..... | 9 | 10 | 6 |
| Leather..... | 1 | 3 | 4 |
| Printing and bookbinding..... | 2 | 3 | 3 |
| Transport..... | 4 | 4 | 18 |
| Longshoremen..... | 5 | 4 | 4 |
| Mining..... | 5 | 3 | 9 |
| Fishing..... | 2 | 1 | 1 |
| Unskilled..... | 11 | 6 | 9 |
| Miscellaneous..... | 8 | 10 | 20 |
| Total..... | 104 | 123 | 160 |

The above tables show that the number of strikes in the building trades has been steadily increasing, there being 14, 28 and 44 disputes in the years 1901, 1902 and 1903 respectively, the percentages to the total number of disputes for these years being 18.5, 22.7 and 27.5. A reference to table No. 15 indicates that 27 out of the 44 building disputes in 1903 took place during the months of April, May and June, while in the winter months of January, February, November and December there were only two. The percentages of disputes connected with the metal trades relative to the total number of disputes during the three years were, respectively, 22.1, 25.2 and 10.6, and those connected with the clothing industries amounted to 9.6, 7.3 and 6.9 per cent of the total numbers in each year.

Disputes by Localities affected.

Taking the disputes according to the provinces in which they took place, 83 occurred in Ontario, 33 in Quebec, and 24 in British Columbia, out of a total of 160 disputes. There were none in Prince Edward Island, and only one originated in Manitoba. The strike of employees of the Canadian Pacific

Railway Company, however, also spread to Winnipeg, Man., but this dispute is classed with those belonging to British Columbia. The following table shows the provinces in which the disputes occurred, according to the different months of the year.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E., No. 17.

TABLE SHOWING TRADE DISPUTES IN CANADA BY PROVINCES DURING 1901, 1902 AND 1903.

| Provinces. | Number of Disputes. | | | Total. |
|-----------------------------|---------------------|-------|-------|--------|
| | 1901. | 1902. | 1903. | |
| Nova Scotia..... | 5 | 12 | 7 | 24 |
| Prince Edward Island..... | | 2 | | 2 |
| New Brunswick..... | 3 | 7 | 7 | 17 |
| Quebec..... | 29 | 20 | 33 | 82 |
| Ontario..... | 53 | 65 | 83 | 201 |
| Manitoba..... | 3 | 8 | 1 | 12 |
| North-west Territories..... | | 1 | 5 | 6 |
| British Columbia..... | 10 | 8 | 24 | 42 |
| Total..... | 103 | 125 | 160 | 385 |

From this table it may be observed that Prince Edward Island has been remarkably free from industrial disturbances, while of the total number for the last three years more than half occurred in the province of Ontario. There were 82 out of a total of 385 in the province of Quebec, and 42 in British Columbia. Nova Scotia comes next, with the number of 24 disputes, followed by New Brunswick with 17, Manitoba with 12, the North-west Territories with 6 and Prince Edward Island with 2.

Disputes by Months.

From the tables which have already been given, it is evident that the period of greatest industrial disturbance during 1903 was in the spring, from the months of March to June, inclusive. The following table shows the number of disputes occurring in each month of the years 1901, 1902 and 1903.

Causes of Disputes.

TABLE SHOWING TRADE DISPUTES IN
CANADA BY MONTHS DURING 1901,
1902 AND 1903.

| Months. | Number of disputes. | | | Total. |
|----------------|---------------------|-------|-------|--------|
| | 1901. | 1902. | 1903. | |
| January..... | 7 | 8 | 6 | 21 |
| February..... | 3 | 5 | 12 | 20 |
| March..... | 13 | 12 | 22 | 47 |
| April..... | 12 | 20 | 23 | 55 |
| May..... | 7 | 27 | 29 | 63 |
| June..... | 23 | 18 | 23 | 64 |
| July..... | 14 | 7 | 15 | 36 |
| August..... | 5 | 6 | 11 | 22 |
| September..... | 5 | 9 | 7 | 21 |
| October..... | 5 | 4 | 6 | 15 |
| November..... | 7 | 7 | 3 | 17 |
| December..... | 3 | | 3 | 6 |
| Total | 104 | 123 | 160 | 387 |

The question of wages was by far the greatest factor in the disputes of 1903, no less than 97 being more or less concerned with it. Of this number, 58 were caused by demands for increase in wages alone, and 20 for an increase in wages and shorter hours. Thirty disputes were more or less due to demands for shorter hours. In 8, this was the sole question at issue, and in two it was combined with demands for recognition of the union and higher wages. There were 8 sympathetic strikes, as well as a lock-out on account of sympathy of employees with strikers.

The following table shows the causes of the disputes of the year arranged according to the months in which they occurred. The letter 'l' denotes that the nature of the dispute was a lock-out.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLES, SERIES E., No. 20.

TABLE SHOWING CAUSES OF TRADE DISPUTES IN CANADA DURING 1903.

[illegible]

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E., No. 21.

| Causes. | Number of disputes. | | |
|--|---------------------|-------|-------|
| | 1901. | 1902. | 1903. |
| For increase in wages | 48 | 54 | 60 |
| Against reduction in wages. . . . | 10 | 7 | 7 |
| For decrease in hours. | 1 | 7 | 8 |
| For increase in wages and decrease in hours. | 5 | 14 | 18 |
| Against employment of particular persons. | 13 | 8 | 13 |
| Against conditions of employment. | | 5 | 5 |
| For recognition of union. | | 5 | 5 |
| Sympathetic. | | 9 | 10 |
| Miscellaneous. | 16 | 12 | 29 |

In some of the cases enumerated above, the causes leading to disputes were too com-

plicated to admit of being briefly tabulated, and it has, therefore, been necessary to consider only the most important features leading up to the difference in question.

A comparison of the principal causes of disputes for the past three years is given above.

The disputes enumerated as being due to miscellaneous causes in 1903 are all classified separately in Table No. 19, immediately preceding the above one.

Methods of Settlement.

The subjoined tables show the methods by which disputes were brought to a close during 1903, with a comparison of the three years in regard to them.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E., No. 17.

TABLE SHOWING METHODS OF SETTLEMENTS OF TRADE DISPUTES IN CANADA DURING 1903.

| Method. | Number of Disputes. | | | | | | | | | | | |
|---|---------------------|------|------|------|------|-------|-------|------|-------|------|------|------|

TABLE SHOWING METHODS OF SETTLEMENT OF TRADE DISPUTES IN CANADA DURING 1901, 1902 AND 1903.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES E., No. 18.

| Method. | Number of Disputes. | | |
|---|---------------------|-------|-------|
| | 1901. | 1902. | 1903. |
| Arbitration. | 5 | 6 | 6 |
| Conciliation. | 6 | 5 | 14 |
| Negotiations between parties concerned. | 55 | 73 | 77 |
| Replacement of men. | 13 | 12 | 15 |
| Return to work on employers' terms. | 13 | 20 | 26 |
| Indefinite or unsettled. | 12 | 5 | 12 |

The strikes and lock-outs settled by arbitration in 1903, were two important disputes among shoe-machine workers at Quebec, carpenters and laundry workers at Vancouver, B.C., carpenters at Halifax, N.S., and batteau-men at Quebec. The number of disputes settled by conciliation in 1903 showed a large increase over the previous years. Of the fourteen terminated by this means, five were brought to an end through the mediation of the Royal Commission appointed by the Dominion Government to investigate the strikes in British Columbia, and four were settled by the friendly intervention of the Department of Labour. The

disputes settled by arbitration and conciliation included the most important ones of the year, among them being the strike of longshoremen at Montreal, the series of strikes arising out of the dispute between the Canadian Pacific Railway Company and its employees, and, as mentioned above, the lock-out of shoe-machine workers at Quebec. An account of all of these is given above.

Results of Disputes.

Information was received by the Department with regard to the results of 137 disputes which were settled during 1903. In addition to these, ten others were terminated, but the results were either kept secret, or the terms were not definitely settled at the end of the year. Among this number are included the five disputes connected with the strike of employees of the Canadian Pacific Railway Company, which came to an end in the month of June, and the

two disputes in the shoe manufacturing industry at Quebec, which were concluded on December 17 by the resumption of work and a reference of the differences to the Board of Arbitration.

The following table shows the results of the settlement of disputes in Canada during 1901, 1902 and 1903.

LABOUR ORGANIZATION IN CANADA DURING 1903.

THE Department of Labour presents herewith a detailed statistical return of the information collected during the past year in relation to labour organization within the Dominion. The period covered is the calendar year of 1903, and although it has been found somewhat difficult to obtain complete and detailed information with regard to certain of the unions organized or disbanded during the closing weeks of the year, the tables may be taken as accurately indicating the leading tendencies of the period dealt with.

The correspondents of the *Labour Gazette* located in the various cities of the Dominion have supplied the great bulk of the information presented, though many details were obtained or verified, after having first been noted in the press, by correspondence with the secretaries of the unions involved and other persons in a position to furnish accurate information.

Isolated instances may have occurred of unions in particular crafts and localities having been formed or disbanded without the fact having been reported to the Department, but every effort has been made to make the following statement as inclusive as possible and to indicate with accuracy the record of the year just closed, from this important point of view.

The information relating to this subject has been entered in two tables, one presenting a return of labour organizations formed, and the other a return of the unions which have disbanded during the year. A slight difference in form between these two tables was adopted on account of the varying nature of the information to be presented. The smaller tables which occur in the body of the article have been added by way of analysis and further explanation of the more detailed returns.

Organization by Localities.

The information of labour organizations in Canada during 1903 by provinces was as follows :—

| Province. | No. of Orga- nizations Formed. |
|-----------------------------|-----------------------------------|
| Nova Scotia..... | 26 |
| Prince Edward Island..... | 0 |
| New Brunswick..... | 22 |
| Quebec..... | 62 |
| Ontario..... | 125 |
| Manitoba..... | 10 |
| North-west Territories..... | 7 |
| British Columbia..... | 23 |
| Total..... | 275 |

It will be seen from the above that the provinces of Ontario, Quebec and British Columbia were the most active in labour organization during 1903. As was to be expected, also, the larger industrial centres within these and the other provinces are most prominent on the list reporting new unions. Montreal, Que., with 31 new unions, St. John, N.B., with 16, Hamilton, Ont., with 14, Quebec, Que., with 11, Victoria, B.C., and Sydney, N.S., with 9 each, and Winnipeg, Man., Vancouver, B.C., and Windsor, Ont., with 7 each, are the leading instances. Among smaller places in which labour organization was exceptionally active may be mentioned Collingwood, Ont., with 10 new unions, Owen Sound, Ont., with 6, Ottawa, Ont., Edmonton, Alta., Niagara Falls, Ont., Kingston, Ont., St. Catharines, Ont., and Sherbrooke, Que., with 5, and London, Ont., Brantford, Ont., and Grand'Mère, Que., with 4, other places mentioned in the table reporting only from 1 to 3 new organizations during the year.

Organization by Crafts.

Regarding the table of unions formed from the point of view of the several trades and industries, the following summary may be offered :—

Agriculture.—Thirteen unions were organized, all within the province of Ontario.

Twelve of this total were Threshers' Protective Associations, organized in April, May, June or July, with headquarters for the most part in the smaller towns of the province.

Fishing.—One new union was reported.

Mining.—Three new unions from British Columbia, two of which were affiliated with the Western Federation of Miners, were reported. In Nova Scotia ten miners' lodges of the P.W.A. were formed, bringing the total for the industry to 13.

Building trades.—A total of 48 unions were organized during the past year, of which 22 were reported from Ontario and 13 from Quebec. Bricklayers and masons reported 5 new unions; carpenters and joiners 16; lathers and plasterers 3; painters, decorators and paperhangers 4; plumbers, gas and steamfitters 5, and stonecutters, marblecutters, &c., 4. There were also 5 building trades' councils organized. The United Brotherhood of Carpenters and Joiners of America was the most prominent among the above list, with 13 new organizations.

Metal, engineering and shipbuilding trades.—These branches reported 42 new unions, to which total Ontario contributed 19, Quebec, 10, and New Brunswick 8. The more prominent returns included under this general heading were as follows :—Iron moulders, 3; machinists, 8; electrical workers, 7; blacksmiths and horseshoers, 4; boilermakers and iron shipbuilders, 3; stationary engineers and firemen, 6.

Woodworking and furnishing trades.—The new unions reported under this heading were chiefly organizations of woodworkers and carriage workers, to the number of 3 each; piano workers, pattern makers and upholsterers to the number of 2 each. There were in all 14 new unions reported, of which 7 were formed in Ontario, 4 in Montreal, Que., and 3 in British Columbia, of which 2 were reported from Vancouver and 1 from Victoria.

| Transport..... | 4 | | 7 | 16 | 27 | 3 | | 4 | 61 |
| General Labour..... | 4 | | 2 | 3 | 10 | | | 1 | 20 |
| Trades and Labour Councils..... | 1 | | | 1 | 4 | | 1 | 1 | 8 |
| Miscellaneous..... | 4 | | 1 | 9 | 13 | 3 | | 2 | 32 |
| Grand totals..... | 26 | | 22 | 62 | 125 | 10 | 7 | 23 | 275 |

Printing and allied trades.—St. John, N.B., Quebec, Que., Ottawa, Ont., Edmonton, Alta., and Victoria, B.C., reported the 5 new unions formed in the printing and allied trades during 1903.

Clothing trades.—Five out of a total of 9 new unions reported in the clothing trades were formed in Ontario, 2 in Quebec, and 1 each in New Brunswick and British Columbia, at St. John and Vancouver respectively.

Food and tobacco preparation.—Four new branches of the Amalgamated Meat Cutters and Butchers Workmen of North America were formed in Canada during 1903, three of which were reported from Ontario and the fourth from Winnipeg, Man. There were two new international unions of bakers formed at St. John and Montreal respectively, and a new clerk's national union at Quebec. The total for the group of trades was accordingly 7.

Leather trades.—New unions of leather trades at Vancouver and Victoria, and of tanners and curriers at Montreal make up the total for this branch.

Transport.—There were in all 61 transport unions organized in Canada in 1903,

representing the most active branch of the trades in this respect. To this total Ontario contributed 27, Quebec 16, New Brunswick 7, and Nova Scotia and British Columbia 4 each. Among the branches represented under this heading the most active in organization were as follows:—way freight and baggagemen with 14; railway clerks, with 3; railway maintenance-of-way men and railway telegraphers, with 2; longshoremen, with 3; teamsters, team drivers, &c., with 9; marine engineers and firemen, with 5; and the Canadian Association of Masters and Mates, with 3.

General labour.—Under this heading 20 new unions, of which 10 were formed in Ontario and 4 in Nova Scotia, were reported. Noticeable among the list, as it appears in the table, are the number of federal labour unions, namely 10, and of lodges of the P.W.A., namely, 4.

Trades and Labour Councils.—There were 8 trades and labour councils formed, of which 4 were in Ontario. The remaining ones were at Sydney, N.S., Edmonton, Alta., New Westminster, B.C., and a joint council for Quebec and Lévis, Que.

Miscellaneous trades.—Under the heading of miscellaneous trades it will be seen that

6 new unions of barbers, 4 of retail clerks, 2 of rubber workers, 3 of hotel and restaurant employees and 5 of bartenders are included. Ontario, as in every group of trade, with the exception of the leather and printing groups, was the field of chief activity with 13, out of a total of 32.

Central Organizations issuing Charters.

The more important central labour organizations chartering branches in Canada during the past year were the following, no mention being made of affiliations with either of the trades congresses of Canada:—

| Name of Organization. | Numbers of Charters Issued. |
|--|-----------------------------|
| Provincial Workmen's Association of Nova Scotia | 18 |
| Brotherhood of Railway Freight and Baggage-men | 14 |
| United Brotherhood of Carpenters and Joiners of America | 13 |
| Threshers' Protective Association of Canada .. | 12 |
| Brotherhood of Railway Carmen of America .. | 12 |
| Federal Labour Unions | 10 |
| International Association of Machinists | 8 |
| International Brotherhood of Electrical Workers .. | 6 |
| National Association of Marine Engineers of Canada | 6 |
| Journeymen Barbers' International Union | 6 |
| Bartenders' International League | 5 |
| United Association of Plumbers, Gas and Steam Fitters | 5 |
| International Brotherhood of Painters, Decorators and Paperhangers | 4 |
| Amalgamated Meat Cutters and Butcher Workmen of North America | 4 |
| Bricklayers and Masons International Union of America | 3 |
| Amalgamated Sheet Metal Workers International Alliance | 3 |
| International Brotherhood of Boilermakers and Iron Ship Builders | 3 |
| Amalgamated Woodworkers International Union of America | 3 |
| United Garment Workers' of America | 3 |
| International Brotherhood of Railway Clerks .. | 3 |
| Canadian Association of Masters and Mates .. | 3 |
| International Brotherhood of Maintenance-of-way Employees | 3 |

Progress of Organization by Months.

The total number of unions, the date of formation of which the department was able to obtain was 242. The following

table shows the activity of labour organizations by months in Canada during 1903:—

| Month. | Number of Unions Organized. |
|-----------------|-----------------------------|
| January | 25 |
| February | 17 |
| March | 39 |
| April | 43 |
| May | 25 |
| June | 22 |
| July | 21 |
| August | 11 |
| September | 9 |
| October | 17 |
| November | 9 |
| December | 5 |
| Total | 243 |

It will be seen that April and March were the two most active months of the year in this respect, with May and January following. June and July were also important months from the standpoint of formation of labour organizations, February and October coming in the next class with 17 each, and December presenting the lowest showing with five.

Disbanded Labour Unions.

No account of the movement of labour organization during a given period is complete without some reference to the number of unions that may have gone out of existence during the same interval, in addition to the record of unions formed. The department accordingly has, as above stated, prepared in the present connection a table in which, in somewhat different form to that employed in presenting the record of unions formed, the information collected during the year with regard to unions which have lapsed, is given to the public, details as to locality, history and other particular circumstances being included on account of the light thrown thereby upon the tendencies at present in operation in Canada, in the way of causing the absorption of one labour organization by another, or of the complete disappearance of such bodies.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLE, SERIES F., No. 5.

| Grand total. | 2 | 2 | 2 | 11 | 28 | | | 9 | 54 |

Sources of Information.

It will be readily understood that information of this kind, in a country of such geographical area as Canada, being largely local in interest, and of a nature that does not find its way readily into the press, has been somewhat difficult to arrive at—much more difficult, for example, than information relating to the formation of new unions—especially in detailed and systematic form and with reasonable promptness. The method followed by the department in collecting material for the present statement on the subject has been chiefly a careful watching the daily press of the country, more particularly the trade journals of the various organizations, the information thus obtained being supplemented by correspondence. No claim, accordingly, is made by the department as to completeness of the accompanying table, the particulars that are recorded having been received in some cases after a considerable interval of time, though it is hoped that the main features of the movement towards disbandment, especially in the maritime provinces and Ontario and Quebec, have been indicated.

Explanation of the Table

It should be borne in mind that the table must be taken in conjunction with that of

unions formed and not as indicating a net loss to the labour organization movement. Thus, take an example, in the case of the disbandment of the K. of L. Harmonic Assembly, Ottawa, Ont., the charter was allowed to lapse simply as a result of the affiliation of the members with other musical organizations. Still more important examples of this class are the three International Coremakers Unions which went out of existence in Montreal, Que., Ottawa, Ont., and Toronto, Ont., as a result of a resolution passed by the Iron Moulders' International Union which opened that organization to the admittance of coremakers. The Coremakers' International Unions have been in consequence merged into those of the Iron Moulders, and their disappearance does not represent a loss to unionism. In the case of certain other unions recorded as disbanded in the table, as for example, the Forest City Dairymen's Association, inasmuch as they were formed with some definite object in view, their disbandment represents simply the attainment of that object, and not a tendency in the movement in favour of or against the principle of organization.

It is accordingly difficult to estimate even approximately the exact nature of the forces making for the disintegration of labour unionism in Canada during the past

year. Further analysis, however, is presented in summarized form in the accompanying table.

From the larger table it will be seen that the province of Ontario takes the lead with 28 disbanded in 1903; Quebec comes second with 11; British Columbia third with 10; Nova Scotia and New Brunswick reporting two each; Prince Edward Island two and Manitoba and the North-west Territories none. By trades, general labour with 19, transport with 8, metal with 7, and the building and printing groups with 2 each are the most important, though 11 are grouped under the heading of miscellaneous. The total for the year, it will be seen, is 54.

With regard to important and interesting features of the year's development in this connection reference may be made to the number of federal labour unions, namely, six, which went out of existence and the number of unions whose charters were revoked in consequence on non-payment of the per capita tax. Some of the most important industrial and labour occurrences of the year are moreover directly or indirectly referred to in the table, as in the case of the disbandment of the Montreal Street Railway Union which, having been founded in the first instance during the continuance of a strike, as a purely local

organization, secured international affiliation later but was thrown into disorganization by the failure of the strike. An interesting process at law is also involved in the disbandment of the Musicians' Protection Association of London, Ont. The action also of the Trades and Labour Congress of Canada in requiring its charter members to secure affiliation, where circumstances permit, from international organizations, also figured as a cause for the dissolution of labor organizations in certain cases.

The Net Result.

Taken in conjunction the record of the labour organizations formed and that of organizations disbanded, the net result for the year has been an increase of 223 to the total number of organizations now in existence. To this total Nova Scotia contributed 24; New Brunswick, 20; Quebec, 51; Ontario, 97; Manitoba, 10; North-west Territories, 7, and British Columbia, 14. In Prince Edward Island there were no unions formed and two disbanded. With this exception, the proportion of disbanded unions to labour organizations formed was highest in British Columbia, where there were 23 instances of new organizations and nine of unions lapsed.

THE AGRICULTURAL INDUSTRY IN CANADA.—COMPILATION OF CENSUS STATISTICS.

WITH the appearance during December of Bulletin No. 18 of the Fourth Census of Canada, 1901, in which complete and finally revised statistics relating to agriculture in the province of Quebec were presented, the series of special reports prepared by the Census Department on the agricultural industry in the several provinces of the Dominion was brought to a close, previous bulletins having covered the field for Prince Edward Island, British Columbia, Nova Scotia, the North-west Territories, Manitoba, New Brunswick and Ontario, in the order named.*

Inasmuch as a uniform system of arrangement was adopted by the Census Department in the presentation of these statistics, the various tables prepared for each province relating to agricultural areas, fruits, field crops, live stock, animal products and values respectively, the compilation of some of the more important of these returns into a further series of tables allows a comparative and aggregate view of the agricultural industry in Canada to be obtained within the compass of a single article. With this end in view, the accompanying tables have been prepared by the Department of Labour.

In consulting the tables, it should be remembered that they present for the several provinces only a series of gross returns; they must further be interpreted with regard to the general characteristics of the provinces in question. Thus, in the case of British Columbia, the table of agricultural areas does not necessarily indicate by the figures contained in its column on total land area, a proportionate potentiality in agricultural resources, as might be surmised by the low returns of improved lands; the history of the process

of settlement, as well as the nature of the land itself, must also be taken into account in this connection. Much of the tendency to error will, moreover, be offset, if the several tables are taken in conjunction.

It may be further explained that in accordance with the nomenclature adopted by the census, the term 'farm' applies to all agricultural holdings and areas of five acres or over in extent, areas under five acres being designated as 'lots.' The division, as the census points out, is necessarily a conventional one, as a large majority of occupiers on less than five acres doubtless use the land in an agricultural sense only as an incidental occupation.

It should be noted also, that the term North-west Territories represents only the districts of Alberta, Assiniboia and Saskatchewan.

The following comments are not to be regarded as an exhaustive analysis of the tables, but only as an index to some of the more important and interesting features of the industry which they disclose.

Agricultural Areas.

In so far as total land acreage is concerned, the province of British Columbia stands first, Quebec second, the North-west Territories third and Ontario fourth. Prince Edward Island is the smallest of the provinces by a difference which makes it less than one-ninth the size of Nova Scotia, the second smallest province. The areas given in the table, however, inasmuch as they do not indicate the nature of the land surface, have a diminished value as statistics relating particularly to agriculture. Thus it is unquestioned that the large area of British Columbia does not, as pointed out above, represent a proportionate wealth in agricultural resources. Illustration of this may be seen in the fact that British Columbia falls lowest in the number of farms under cultivation, having less than one-half the number of Prince

*These publications have been noticed as they appeared under separate headings in the *Labour Gazette*, a review of the bulletin relating to Quebec being included in the present issue.

Edward Island, and only about one-thirtieth that of the number of Ontario. Water areas lend themselves better to comparison in this respect (though the interest relates primarily, of course, to the fishing industry). It will be seen from the table that Ontario has very markedly the advantage in this respect, having nearly four times the area of Quebec and Manitoba, and eight times that of the North-west Territories, which stands next. According to areas occupied as farms and lots, also, Ontario is considerably in the lead, with Quebec second, Manitoba third and the North-west Territories fourth. In this connection the percentages of areas occupied in the several provinces are interesting, as showing the extent to which settlement has been proceeded with, and to which possible developments, other things being equal, may be expected. From the standpoint of unoccupied lands alone, it will be seen that British Columbia, the Territories and Quebec offer the largest opportunity, Ontario and Manitoba following in order. Prince Edward Island, on the other hand, has only fifteen per cent of its total area unoccupied, and affords, therefore, comparatively little room for additional settlement. Nova Scotia, which has the next highest percentage to Prince Edward Island of unsettled lands, still has over sixty per cent unoccupied as farms. Nova Scotia and Prince Edward Island offer the best showing from the standpoint of the percentage of the holdings owned, with New Brunswick, the Territories and Quebec following, Ontario being the lowest in this respect. In the matter of improved areas, Ontario, Quebec, Manitoba and New Brunswick rank in the order named, British Columbia having less than two-thirds of the improved acreage of Prince Edward Island, the smallest of the provinces, and with only a total area of 1,397,991 acres, as compared with 236,922,177 acres of British Columbia. Of forest lands, Quebec has the largest acreage, Ontario, Nova Scotia and New Brunswick coming next, and the North-west Territories have least.

Fruit Growing.

The table relating to the fruit growing industry, which is arranged to illustrate the growth in acreage under orchard and yield in bushels during the past ten years, shows that Ontario has maintained its lead among the provinces, though with a falling off of 23,269 acres, British Columbia and Prince Edward Island alone showing anything approaching a proportionate increase in yield during the decade. Nova Scotia and Quebec are approximately equal both as to acreage in orchard and crop yield of the census year. In both, however, the industry is only about one-eighth as extensive as in Ontario. The lead of Ontario is most pronounced in the number of peach trees and grape vines. In apple trees the disparity is not so great, though Quebec, which stands next, has less than one-quarter as many. The figures for the entire Dominion would indicate that although a decrease has taken place in the total acreage of land under orchard, there was an increase of over 100 per cent in the yield of 1901 as compared with that of 1891.

Field Crops.

The table of field crop acreages shows the comparative acreages in 1901 and 1891 under wheat, oats, barley, rye, hay, potatoes and other roots. In the case of flax and tobacco no return was available from the previous census. Noting only the most salient facts illustrated by the table, the decrease of spring wheat acreage in the older provinces, except in Nova Scotia and New Brunswick, is significant of the change in the natural conditions observed during the past few years. The great increase in the acreage under the same crop in Manitoba and the North-west Territories on the other hand is a striking proof of the progress of settlement during the decade. Oats, barley and potatoes give evidences to the same effect in western Canada. Attention may be directed to the falling off in oats in Nova Scotia, and of

barley in Nova Scotia, Prince Edward Island, New Brunswick and Ontario; of rye in Quebec; of potatoes in Nova Scotia, Prince Edward Island, New Brunswick and Ontario, and of other roots in Nova Scotia and Quebec. Looking at the table from the point of view of particular developments given to the industry in the several provinces, it will be seen that in Nova Scotia hay and oats are the leading crops; in Prince Edward Island hay and oats; in New Brunswick hay and oats; in Quebec hay and oats; in Ontario hay and oats; in Manitoba wheat and oats; in the Territories wheat and oats, and in British Columbia hay and oats. Considering the table from the standpoint primarily of the several crops, it will be seen that spring wheat raising is most exclusively engaged in in Manitoba and the Territories; fall wheat raising in Ontario and British Columbia; the growing of oats in Ontario and Quebec; of barley in Ontario and Manitoba; of rye in Ontario and Quebec; of hay in Ontario and Quebec; of potatoes in Ontario and Quebec; of other roots in Ontario and Quebec; of flax in Manitoba and Ontario, and of tobacco in Quebec and Ontario.

Live Stock and Animal Products.

The tables relating to live stock and animal products should be taken in conjunction. A decade of material increase is indicated in almost every department, with the exception of sheep, which have shown a decided falling off. The number of horses has remained about stationary. In cattle raising, however, a large increase has taken place, especially in western Canada, as is shown both by the number of horned cattle and the returns of cattle sold for slaughter or export. Milch cows and dairy products have shown gains, as have also swine and poultry. It may be noted in the case of Quebec, that while the number of milch cows has increased from 549,544 to 767,825, and the number of horned cattle from 419,768 to 598,004, the number of cattle sold for slaughter or export has only in-

creased by 42,774, while the amount of butter manufactured has decreased from 30,113,226 pounds to 18,357,188 pounds.

Agricultural Values.

Ontario leads by a considerable margin in values of land, buildings, implements, live stock, and of crops and animal products of the census year. Approximately one-half of the total agricultural values in the Dominion may be set down to this province. Quebec is second with about one-half the total of Ontario, Manitoba stands third in land and implements, and crops and animal products of the census year. Nova Scotia, however, is third in buildings, and the North-west Territories in live stock. The fourth place is occupied by the Territories in land and implements. The proportionately low showing of buildings as against land and crops in Manitoba and the Territories compared with Nova Scotia, New Brunswick and other of the older provinces, reflects the newness of settlement of these sections, while the high relative showing of implements and machinery under the same heading follows from the fact of the immediate necessity of these as compared with buildings. The total valuation of the industry for the whole Dominion, including land, buildings, implements, live stock and animal products of the census year was \$2,169,086,269.

Reducing the above statistics of the terms of a farm of average size, some interesting comparisons are rendered available by the census. In Manitoba and the Territories the average farm is largest, British Columbia following, and New Brunswick coming fourth. Ontario, however, leads in values of land and buildings, British Columbia in the aggregate return, the Territories in live stock per farm, and Manitoba in implements and machinery. From the standpoint of the percentage on the investment, New Brunswick and Prince Edward Island show the leading returns, with Nova Scotia third and Ontario fourth, Manitoba falling the lowest with 16.07 per cent.

TABLE OF STATISTICS OF AGRICULTURAL AREAS IN CANADA BY PROVINCES.

THE AGRICULTURAL INDUSTRY IN QUEBEC.

BULLETIN No. 18 of the fourth census of Canada, 1901, in which the returns relating to agriculture in the province of Quebec are presented, was recently issued and a resumé is given below of the chief items of statistical information which it contains. 'As in previous bulletins of the series, the term 'farm' is applied to all areas of five acres and over, all areas under five acres being classed as 'lots.'

Agricultural Areas.

The province of Quebec comprises 225,198,561 acres, of which 6,474,874 are water surface. Of the land 6.6 per cent is occupied as farms and lots, the average size of the latter being .97 acres and of the former 110.82 acres. There are 20,441 lots and 130,158 farms. Of the latter, 15.40 per cent are from 11 to 50 acres, 35.20 per cent ; 51 to 100 acres, 33.97 per cent ; 101 to 200 acres and 12.58 per cent, 200 acres or more, 93.18 per cent of the farm land is owned and 84.30 of the area occupied as lots. Almost the whole extent of the land in lots is in an improved state, but 48.55 per cent of the farm lands is unimproved, consisting of 5,442,204 acres in forest and 1,560,960 acres in various conditions unfit for cultivation.

Fruit Growing.

There are 34,096 acres in orchard in Quebec, a decrease of 31,484 acres in the decade, but land under vegetables and small fruit has increased from 26,751 to 28,809 acres. There are 2,068,829 fruit trees in bearing and 986,976 in a non-bearing state, being an average of 20 for every farm and lot. Classified according to varieties, there are 2,256,752 apples trees, 332 peach trees, 11,823 pear trees, 364,280 plum trees, 394,090 cherry trees, 28,528 other fruit trees, and 143,150 grape vines. The total crop in 1901 was 2,323,129 bushels.

Field Crops.

The leading field crops of Quebec are hay, oats, wheat, mixed grain, barley, to-

bacco and potatoes. These crops occupied 94 per cent of the area devoted to field culture in 1900 in the following proportion :— hay, 54.18 per cent ; oats, 28.70 per cent ; wheat, 2.97 per cent ; mixed grain, 3.06 per cent ; barley, 2.21 per cent ; tobacco, 0.18 per cent, and potatoes 2.70 per cent. The acreage in hay has risen from 2,178,044 in 1891 to 2,548,450 in the last census, while the acreage under wheat has fallen from 168,929 to 139,826.

The following table shows the average yield per acre of the principal crops for the harvests of 1890 and 1900 :—

| | 1900. | 1890. |
|-------------------------|--------|--------|
| Wheat.. . . . bush. | 14.08 | 9.75 |
| Oats.. . . . " " | 24.84 | 15.35 |
| Potatoes.. . . . " " | 134.71 | 129.75 |
| Mixed grain.. . . . " " | 24.52 | ... |
| Barley.. . . . " " | 24.35 | 16.73 |
| Hay.. . . . tons. | 1.01 | 1.03 |

Live Stock and Animal Products

The averages of live stock per farm in Quebec are, horses, 2 ; milch cows, 5 ; other horned cattle, 4 ; sheep, 5 ; swine, 3, and poultry of all kinds 22. There have been increases in horses, cows, other horned cattle, swine and bees, as well as an increase in the number of cattle killed or sold for slaughter and export and in the number of swine. While the number of milch cows has increased, there is a decrease in the production of home-made butter, the number of butter factories having increased 674 during the decade, and the value of their output \$4,360,824. The total of home and factory products is 42,982,188 lbs. There were also produced 15,502,415 dozen eggs, valued at \$2,007,320.

Agricultural Values.

A total value of \$350,550,154 is shown for lands and buildings in Quebec, in addition to which implements and machinery are valued at \$27,038,205, live stock, \$58,488,457 and crops and animal products for the census year to the value of \$85,034,401 must be considered. For a farm of the average size, namely, 110.82 acres, the value

of the property amounts to \$3,304.86, which makes an aggregate return per farm amount to \$633.46, or 19.17 per cent of the investment.

The following further statistics on the subject of agricultural values may be quoted from the bulletin :—

The average value of horses on farms per head is \$73.60, milch cows \$26.79, other horned cattle \$11.09, sheep \$3.63, and swine \$7.71 ; and the average value of horses per farm is \$159.90, milch cows \$151.16, other horned cattle \$50.43, sheep \$18.12, swine \$23, and poultry and bees \$9.57.

The value of dairy products includes the milk and cream sold to cheese and butter factories, and the total is \$20,207,826. There

were in operation in the province during the census year 1,992 factories, of which 340 made cheese and butter, 1,207 made cheese only, and 445 made butter only. The cheese product was 80,630,199 lbs., worth \$7,957,611, and the butter product 24,625,000 lbs., worth \$4,916,756, making a total value of \$12,874,367. In the former census year there were 617 cheese and 111 butter factories in the province, and the total value of product was \$2,918,527. The increase in the value of factory dairy products from the year 1890 to the year 1900 in Quebec was therefore \$9,955,840, or nearly 341 per cent.

The rent value of leased farms is \$1.05 per acre, and the rate of wages for farm labour is \$5.05 per week, including board.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

CONSIDERING the season, immigrant arrivals during the month of December were on a large scale. On December 7, for example, the 138th extra immigrant train run by the Canadian Pacific Railway this year arrived at Winnipeg, Man., with 119 immigrants on board, consisting of families of intending settlers to be distributed in Manitoba. A number of steamships were also reported at Halifax and St. John with large bookings of immigrants bound for the most part for western Canada. Much of the activity of the month, however, was in the way of preparation in anticipation of the coming year's movements, for which prospects are very satisfactory. Reorganization of the various agencies of the Department of the Interior in the United States was effected and several improvements in the method of operations adopted, especially in the way of advertising and disseminating information. It was stated that the wet harvest experienced throughout the Western States obliged several hundreds of intending immigrants to Canada to postpone moving until the coming spring. Vigorous efforts will

also be put forth to obtain immigrants from northern France, as well as from the British Isles. Definite prospects for a considerable movement of immigration from the agricultural population of Yorkshire, Wiltshire and Lancashire, in England, and from various Scotch centres in the early spring were announced.

A conference between representatives of the Dominion Government and of the Canadian Pacific Railway Company was held in Montreal to discuss the possible diversion towards the Canadian North-west of the emigration which for some years past has been flowing from Quebec to the United States. The subject of repatriating French Canadians was also dealt with, and the adoption of a practicable method of operation advised.

The Women's National Immigration Society of Montreal held its annual meeting on December 14. The report of the society showed that upwards of 500 immigrants passed through the home of the society during the year, an increase of 144 over last year. Of the immigrants, 345 were English,

38 Scotch, 42 Irish, 58 Swedes, 5 Norwegian, 4 Canadians, 1 American, 2 French, 2 German, 2 Spanish and 1 Swiss.

By an arrangement of the Interior Department, United States settlers in the Edmonton district were granted reduced rates at Christmas by the railways in order to enable them to visit their former homes. The reduced rates applied to territory as far south as Kansas City.

November Immigration Returns

The total immigration returns for November were 5,891, composed of 1,736 British, 1,866 from the Continent of Europe, 2,289 from the United States. The total for the eleven months of the year is thus brought up to 128,980.

The number of emigrants leaving the British Isles during November was as follows:—English, 1,452; Irish, 7; Scotch, 108, and foreigners, 2,182. During the eleven months the numbers were: English, 47,246; Irish, 2,565; Scotch, 10,247, and foreigners, 30,682. Of these totals Canada and the United States received 119,907.

It was stated that during the month of October 927 persons left North Dakota for settlement in the Canadian North-west, bringing with them 109 cars of settlers' effects. During November 567 people, bringing with them 80 carloads of effects, settled in the west from North Dakota. The value of the effects brought into the country during these two months from this one State was stated to be over \$250,000, not including money which the settlers may have had.

Oriental Immigration.

A feature of the month was the number of Chinese landed in Canada in anticipation of the going into effect of the head tax of \$500 after January 1. These arrivals were chiefly noted in British Columbia, though a considerable number reached the central and eastern provinces. It is esti-

mated that over 1,700 Chinese have arrived in Canada during the past four months.

It may be noted also that the Wellington Colliery Company was convicted on 72 charges of employing Chinese under ground. Fines aggregating in the neighbourhood of \$2,000 were imposed.

A special commission was appointed by the British Columbia Legislature to inquire into the charges that government officials were aiding Japanese to evade the immigration laws and enter the country by making affidavits that they were travellers *en route* to the United States.

Homestead Entries for November.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of November, 1903, as compared with the month of November, 1902.

| Red Deer..... | 77 | 109 | | 32 |
| Winnipeg..... | 92 | 63 | 29 | |
| Yorkton..... | 654 | 355 | 299 | |
| Total .. | 2,406 | 2,482 | 449 | 525 |

It will be seen that there has been a decrease of 76 in the number of entries made during the month.

The statement of entries made for the first five months of the fiscal year 1903-4 is as follows:—

TABLE OF HOMESTEAD ENTRIES
JULY-DECEMBER.

| Month. | 1903. | 1902. | Increase. | Decrease. | Remarks. |
|----------------|--------|--------|-----------|-----------|---------------|
| July..... | 3,438 | 2,622 | 816 | | Net increase. |
| August..... | 2,288 | 1,904 | 384 | | |
| September..... | 1,845 | 1,416 | 429 | | |
| October..... | 1,958 | 2,142 | | 185 | |
| November..... | 2,406 | 2,482 | | 76 | |
| December..... | | | | | |
| Total..... | 11,935 | 10,566 | 1,629 | 260 | 1,369 |

Corresponding to the above statistics, a falling-off in the total receipts of about \$500,000 for land sales in Manitoba and the North-west Territories during November by the Canadian Pacific Railway Company was reported. In November, 1903, the sales of the company amounted to \$127,980, while during the same month last year they totalled \$598,787, a decrease of \$470,807. The decreases were as follows :—In Manitoba, 7,750 acres, or \$28,693 ; in Assiniboia, a decrease of 34,778 acres, or \$161,142 ; in Saskatchewan, a decrease of 36,368 acres, or \$139,924, and in Alberta, a decrease of 39,952 acres, or \$141,047. The falling-off is ascribed in part to the decreased demand by American settlers.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of November, 1903, were as follows :—

TABLE SHOWING NATIONALITIES OF
HOMESTEADERS.

| Nationalities. | No. of Entries. |
|-------------------------------|-----------------|
| Canadians from Ontario.. | 306 |
| " Quebec. | 33 |
| " Nova Scotia | 5 |
| " New Brunswick.. . . . | 8 |

| Nationalities. | No. of Entries. |
|---|-----------------|
| Canadians from Prince Edward Island. | 13 |
| " Manitoba.. . . . | 77 |
| " North-west Territories. | 29 |
| " British Columbia. | 5 |
| Persons who had previous entry | 183 |
| Canadians returned from the United States.. . . . | 51 |
| Americans.. . . . | 632 |
| Newfoundlanders.. . . . | .. |
| English.. . . . | 213 |
| Scotch.. . . . | 49 |
| Irish.. . . . | 25 |
| French.. . . . | 11 |
| Belgians.. . . . | 6 |
| Swiss.. . . . | 1 |
| Italians.. . . . | 1 |
| Roumanians.. . . . | .. |
| Greeks.. . . . | .. |
| Syrians.. . . . | 1 |
| Germans.. . . . | 99 |
| Austro-Hungarians.. . . . | 160 |
| Hollanders.. . . . | 9 |
| Danes (other than Icelanders).. . . . | 3 |
| Icelanders.. . . . | 15 |
| Swedo-Norwegians.. . . . | 49 |
| Russians (other than Mennonites and Doukhobors).. . . . | 10 |
| Mennonites.. . . . | 7 |
| Doukhobors.. . . . | 401 |
| Chinese.. . . . | 1 |
| Persians.. . . . | 1 |
| Total.. . . . | 2,406 |
| Representing 5,533 souls. | |

Of the total number of entries made during November by persons coming from the United States into Canada, 254 were from Dakota, 187 from Minnesota, 31 from Wisconsin and 30 from Iowa.

Lands Patented in November.

The following is an extract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of November, 1903 :—

TABLE OF LAND PATENTS FOR NOVEMBER,

| Nature of Grant. | No. of Patents. | No. of Acres. |
|---|-----------------|---------------|
| British Columbia homesteads..... | 3 | 398·00 |
| British Columbia sales..... | 3 | 320·00 |
| Homesteads..... | 167 | 26,423·99 |
| Manitoba Act grants..... | 1 | 9·30 |
| Military homesteads..... | 1 | 320·00 |
| North-west Half-breed grants..... | 24 | 5,442·38 |
| Railways : | | |
| Alberta Railway and Coal Co..... | 3 | 2,498·70 |
| Canadian Northern Railway Co..... | 2 | 320·00 |
| Canadian Pacific Railway grants..... | 134 | 268,749·01 |
| Canadian Pacific Railway nominees..... | 2 | 800·00 |
| Canadian Pacific Ry. roadbed and station grounds ... | 10 | 306·28 |
| Manitoba South-western Col. Ry. Co. | 47 | 11,208·73 |
| Qu'Appelle, Long Lake and Sask. Rd. and Steamboat Co..... | 8 | 1,760·00 |
| Sales..... | 23 | 3,022·40 |
| School lands sales..... | 2 | 36·05 |
| Special grants..... | 1 | 21·00 |
| Total..... | 431 | 337,858·84 |

INCREASES IN SALARIES OF POSTMASTERS IN CANADA.

During the month of December the salaries of postmasters, and of persons carrying on business in connection with the postal service of the country on a percentage of revenue basis, were increased by the Postmaster General, the Hon. Sir William Mulock. The allowances for rent paid to persons carrying on the postal business for the government have also been increased. The nature of these increases are as follows :—

Increases in Allowance for Services.

The minimum salaries of postmasters are raised from \$10 to \$25 a year, and the salaries of all those paid on a percentage of revenue increased by 10 per cent of the amount to which they would be entitled at the former scale. The commission paid for the transaction of money order and savings bank business has also been increased by 10 per cent, and the compensation for the sale of postal notes doubled.

Increases in Allowance for Rents.

Hitherto no compensation whatever has been given for the space occupied in post office work until a post office did a business returning \$800 a year revenue. As the

space required for post office purposes is great enough to call for some compensation long before the business reaches the point where the revenue is \$800 a year, the postmaster general has directed that the space occupied shall be paid for when the revenue reaches \$100 a year. The amount allowed for rent is \$5 a year for the first \$100 a year of revenue, and \$5 for each additional \$100, until the revenue is \$800 a year.

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the number of the *Canadian Patent Office Record*, issued by the Department of Agriculture during the month of December.

During the month of September, 539 patents were issued in Canada. They included thirty-five electrical inventions, twenty-four relating to agriculture, seventeen manufacturing machines and ten parts of machines, twenty industrial processes, twenty-four tools, and five relating to metallurgy and mining. There were, in addition, a large number connected with means of transportation, such as four wagons, two bicycles, one of them being a motor bicycle, four brakes, two car-couplers, six connected with the gearing of cars, two railway signals, and many others. There were thirteen new engines invented, five of which

work by explosives, four by steam, three by gas, and one by hot air and gas. There were seven furnaces for the purposes of smelting, brick-making and tube-welding.

Electrical Inventions.

The electrical discoveries patented included six relating to telephony, and two to wireless telegraphy. The most interesting of these was a telephonogram apparatus, the purpose of which is to produce, by means of an oscillating mirror, a permanent record of sounds received through a telephone. There were four electric switches, three electric motors, an electric stove, and an electric light and power system.

Agricultural Inventions.

Among the agricultural inventions were harrows, harvesters, ploughs, separators, and a pneumatic stacker, used in combination with threshing machines, a threshing machine, and a device used for shifting threshing machines.

Machinery.

Two new machines were for the purpose of *manufacturing articles from pulp*, two for engraving and three for moulding. There were three grinding machines, a tube-making machine, and one for making tubular articles.

A number of important manufacturing processes were patented during the month. Among them is a method of manufacturing cellulose by means of the electrolysis of metallic chlorides. Another method of forming sheets or films of cellulose consists in subjecting purified viscose to the action of caustic alkali, and treating it in a precipitating acid bath.

Electricity is used in a process for the *purification of raw sugar juice and molasses*, the current being passed through the juice, which is finely subdivided, and discharged over a metallic framework, connected with two electrodes. Then, while the juice is being maintained at a high temperature, sulphurous vapours are passed through it.

Tools.

There were three vices and six wrenches patented in September. A peculiar tool which was patented is a pair of barber's shears, to which are attached four combs, one on each handle and blade. Another tool is for the purpose of framing roofs. It is composed of arms fastened together with a hinge, so that they can be moved toward or from each other. A tube is pivoted at the free end of one arm, facing the other, on which is pivoted a graduated rod, which fits into the tube. Among other tools patented are calipers, a protracting square, a trowel for plaster, three planes, and a combination of a plumb, level and square.

Inventions Relating to Transportation.

There are many inventions connected more or less directly with steam locomotives. One of them is *an apparatus for laying railway tracks*, composed of a bar for loading ties and another for receiving them, which is provided with means automatically causing the loading car to deliver the ties. This second car is provided with a sliding frame supporting the ties, which can be unlocked, whereupon the car automatically deposits its load of ties upon the roadbed. There are two *patents for air-brakes*, two for *car couplers*, and one for a *railway switch*. This switch is so devised that the switch rail can be moved into position automatically by a train when in motion. It is composed of a saddle arranged underneath the roadbed, carrying rollers, to which is attached a bar connected with the switch rail. The car is provided with means to actuate a tilting bar, which in turn actuates the switch bar, to which it is attached.

Miscellaneous Inventions.

With a view to *preventing accidents in mines* through the falling of the skip or cage, a safety gear has been patented whereby the cage is kept in proper relation to the guides or runners, by means of dog wedges working in slots parallel to the guides.

Another invention devised for the protection of employees is an *apparatus for precipitating injurious fumes* from smelter gases. It consists of a succession of screens of vegetable matter interposed in the path of the gases, which are moved by means of a suitable mechanism over rollers in such a

way that a fresh surface is continually presented to the gases. At one end a hopper is provided for feeding the material of which the screens are composed, and at the other is a conveyor for removing the vegetable matter after it has absorbed the injurious fumes.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF DECEMBER, 1903.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency.

The Department of Labour has received notice through correspondents and other reliable sources of information of accidents to workmen during the month of December in different parts of the Dominion, resulting in the loss of 42 lives and in severe injuries to other workmen to the number of 52. By industries and groups of trades the record was as follows:—

| Trade or Industry. | Killed. | Injured. |
|------------------------------|---------|----------|
| Agriculture | 5 | 2 |
| Fishing | 2 | |
| Lumbering. | 2 | 2 |
| Mining | 2 | 5 |
| Building trades. | | 2 |
| Metal | 4 | 7 |
| Woodworking. | 1 | 5 |
| Railway service | 17 | 7 |
| General transportation. | 3 | 7 |
| Miscellaneous | 6 | 15 |
| Total | 42 | 52 |

scalded to death. An accident to the C.P.R. train near Killarney, Man., frozen snow having thrown the engine and several cars from the track, resulted in the killing of the engineer, the serious injury of the fireman and the slight injury of a baggage-man. Two miners were rendered deaf by an explosion of dynamite caused by the careless thawing of the explosive at Michel, B.C.; two women were injured in the same accident. Six firemen in jumping from a ladder to save their lives at Toronto escaped with slight injuries, a small frame building toppling over on the ladder on which the men were working. Two elevator employees at Port Arthur, Ontario, were injured while unloading lumber from a car by the rolling of a piece of timber. With the exception of these examples, no accident of the month resulted in the injury of more than one person.

The Record by Trades and Industries.

Referring to the subject by industries and groups of trades, the table shows the following record for the month:—

Nature of Fatalities and Injuries.

By reference to the table published herewith, it will be seen that only two accidents of the month resulted in the fatal injury of more than one person, namely, the drowning of two fishermen in Cape Breton, N.S., and an accident at Colwell, Ont., by which an engine with snow plough attached was thrown from the track by the wings of the plough catching in a switch and resulting in the engineer and fireman being

Agriculture.—Five men were killed and two were seriously injured during December. Three of these accidents were the result of the overturning of loads, and another fatality was the result of blood-poisoning from an injury received while packing apples. A fourth workman was killed by a bull, and a fifth frozen to death. One severe accident of the month was the result of the workman's hand being caught in a corn husker.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F, No. 3.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF DECEMBER.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|---------------------------------|--------------------------|--------------|------------|----------|--|--|
| <i>Agriculture—</i> | | | | | | |
| Farmer | Fingal, Ont. | Dec. 2 | 2 | 1 | Hand mangled | Hand caught in corn husker. |
| Thresher | Parkhill, Ont. | " 16 1 | 16 1 | 1 | | While driving a threshing machine it fell over on him. |
| Farmer | Islington, Ont. | " 14 1 | 14 1 | 1 | | Blood poisoning from thumb injured while packing apples. |
| Farm labourer | Brookville, Ont. | " 18 1 | 18 1 | 1 | | Gored by bull. |
| " | Owen Sound, Ont. | " 17 1 | 17 1 | 1 | | Frozen to death while attempting to reach home in a storm. |
| Farmer | Amherstburg, Ont. | " 3 1 | 3 1 | 1 | | Crushed between wagons while unloading logs from train. |
| " | Marlbank, Ont. | " 11 | 11 | 1 | Compound fracture of leg, and nose broken. | While unloading hay, team started and upset wagon. |
| <i>Fishing—</i> | | | | | | |
| Fishermen | Cape Island, N.S. | " 22 2 | 22 2 | 2 | | Drowned while fishing. |
| <i>Lumbering—</i> | | | | | | |
| Shantyman | Hull, Que. | " 5 1 | 5 1 | 1 | | Killed by falling of a tree. |
| Woodman | Chatham, Ont. | " 14 | 14 | 1 | Knee badly cut. | By slipping of axe while cutting wood. |
| Labourer | Boiestown, N.B. | " 12 1 | 12 1 | 1 | | Struck on head by falling tree. |
| Logger | Canaan Forks, N.B. | " 11 | 11 | 1 | Leg broken. | Slipped down a bank, a number of logs rolling on him. |
| <i>Mining—</i> | | | | | | |
| Coal miner | Sydney Mines, N.S. | " 19 1 | 19 1 | 1 | | While engaged in hauling coal, roof gave way, crushing workman. An inquest did not exonerate company. |
| Miners | Michol, B.C. | " 18 | 18 | 2 | | Explosion of dynamite while being thawed out; two men rendered deaf and slightly injured; two women and two children also injured. |
| Labourer | Port Arthur, Ont. | " 16 | 16 | 1 | Injuries to face and hand. | Discharge of powder blast. |
| Timberman | Cumberland, B.C. | " 3 | 3 | 1 | Leg cut off and internal injuries. | Workman tripped on wire rope, falling in front of loaded car which passed over him. |
| Mule driver | Burrard Inlet, B.C. | " 3 | 3 | 1 | Ankle crushed. | Run over by loaded coal car. |
| <i>Building Trades—</i> | | | | | | |
| Prospector | " | " 4 1 | 4 1 | 1 | | Slipped off a precipice to rocks several hundred feet below. |
| Carpenter | Kingston, Ont. | " 28 | 28 | 1 | Arm broken | While working on a factory building, arm was caught in shaft. |
| Builders labourer | Hamilton, Ont. | " 17 | 17 | 1 | | Injured while engaged tearing down a house, by the falling of a beam. |
| <i>Metal—</i> | | | | | | |
| Moulder | London, Ont. | " 19 | 19 | 1 | Bruised on arm and head | Caught in a lathe. |
| Machinist | " | " 31 1 | 31 1 | 1 | | Head beams caught between a knob and a post on a large steam plane which workman was operating. |
| Employee of rolling mills. | Hamilton, Ont. | " 23 1 | 23 1 | 1 | | Caught between rollers and dragged in. |
| Foundryman | Papineauville, Que. | " 18 | 18 | 1 | Burned about back and legs | While removing molten metal from furnace, workman was overcome by gas, spilling ladle of molten metal over his body. |

| Employee of Dominion Arsenal. | Quebec, Que. | " | 1 | Internal injuries. | Caught by shaft. |
|--|-----------------------------|---|----|---|--|
| Linenen. | Montreal, Que. | " | 16 | Internally injured. | Fell from telephone pole. |
| Employee of car shops. | New Westminster, B. C. | " | 1 | Thumb broken. | While repairing brakes of a car. |
| Stationary engineer. | Berlin, Ont. | " | 7 | Two fingers taken off. | Caught in belting and torn to pieces. |
| Machinist. | London, Ont. | " | 1 | Three fingers and part of hand taken off. | Hand caught in a crane. |
| " | " | " | 1 | Scaled to death. | Hand caught in a saw. |
| Stationary engineer. | Sault Ste. Marie. | " | 1 | Arm cut. | Fell into vat and died of scalds received. |
| Woodworking Trades—Employee of handle works. | London, Ont. | " | 1 | Arm cut. | While operating a dowelling machine, saw struck workman's arm, going through both bones between wrist and elbow. |
| Mill hand. | Shawinigan Falls, Que. | " | 2 | 1 | Workman struck by rebound of piece of wood thrown from a saw. |
| " | Kingston, Ont. | " | 28 | 1 | Caught in belting. |
| Employee of box factory. | Frankford, Ont. | " | 21 | 1 | While operating a machine. |
| Mill hand. | Hull, Que. | " | 1 | 1 | While operating a circular saw. |
| " | St. François de Salle, Que. | " | 9 | 1 | While working circular saw, workman slipped, striking saw. |
| Artillery Service—Fireman. | Scarboro' Junction. | " | 27 | 1 | While leaning out of engine cab widow, was struck on head by a car on a siding. |
| " | Winnipeg, Man. | " | 2 | 1 | While coupling engine. |
| Engineer. | Kilarney, Man. | " | 14 | 1 | Through overturning of engine caused by striking snow drift. |
| " | " | " | 14 | 1 | " |
| Baggage man. | " | " | 14 | 1 | " |
| " | Shakespeare, Ont. | " | 14 | 1 | Collision of two engines owing to storm. |
| Engineer and fireman. | Colwell, Ont. | " | 23 | 1 | Engine with snow plough attached was passing over switch when one of wings caught, pulling over plough and engine, workman being scalded to death. |
| Brakesman. | Moncton, N.B. | " | 9 | 1 | Foot slipped while boarding a car. |
| " | Barrie, Ont. | " | 5 | 1 | Jammed between engines in yard through misplaced switch. |
| " | London, Ont. | " | 25 | 1 | Seized with fainting spell while riding on pilot of yard engine and fell beneath cars. |
| " | St. Thomas, Ont. | " | 9 | 1 | Caught between bumpers while coupling cars. |
| " | Burlington, Ont. | " | 3 | 1 | While standing on top of cars, struck by water spout, which had not been swung back. |
| " | Fort Erie, Pa. | " | 6 | 1 | Run over in yard; home in Canada. |
| " | Montreal, Que. | " | 8 | 1 | Fell between cars. |
| Yardman. | Hamilton, Ont. | " | 17 | 1 | Struck by an express while crossing track. |
| Bridge watchman. | Guelph, Ont. | " | 16 | 1 | Run over by yard engine while shovelling snow. |
| Switchman. | Sevel Bridge, Man. | " | 12 | 1 | In a collision on bridge. |
| Foreman of construction gang. | Winnipeg, Man. | " | 23 | 1 | While on duty in railway yard. |
| Labourer. | Robinson's Farm, N.S. | " | 9 | 1 | Struck by a rock after firing a blast. |
| " | Gold River, N.S. | " | 5 | 1 | Crushed by large stone, which rolled upon him while working at foot of a slope. |
| Sectionman. | Port Hope, Ont. | " | 1 | 1 | Struck by express while walking to work. |
| " (station) | Toronto, Ont. | " | 15 | 1 | Struck by engine while cleaning out switches. |
| " | Whitby, Ont. | " | 26 | 1 | Struck by engine of freight train while walking home from work. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF DECEMBER—*Concluded.*

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Name of Injury. | Remarks. |
|----------------------------|---------------------|---------|---------|----------|--|---|
| <i>General Transport—</i> | | | | | | |
| Motorman | Vancouver, B.C. | Dec. 14 | 1 | 1 | Leg crushed and cut. | Collision of street cars. |
| Employee of Street Ry. Co. | Toronto, Ont. | " 23 | 1 | 1 | Scalded. | Steam valve burst in power house. |
| Employee of electric ry. | Halifax, N.S. | " " | 1 | 1 | Face scalded. | Tube burst while working on a boiler. |
| Teamster | St. Thomas, Ont. | " 10 | 1 | 1 | | While driving down a hill, load of wood upset, seriously injuring workman. |
| " | Dexter, Ont. | " 26 | 1 | 1 | Head crushed. | Workman's foot slipped while loading logs, leg striking him on head. |
| Dredge employee. | St. John, N.B. | " 8 | 1 | 1 | | Workman was working at a winch with an iron bar, when the bar flew back fracturing his skull. |
| Longshoreman | Sand Point, N.B. | " 22 | 1 | 1 | Injured in the head | Tripped while descending stairs in freight sheds while loading a car. |
| " | St. John, N.B. | " 2 | 1 | 1 | Injured in leg. | While wheeling cases of glass from freight shed to cars, case fell on leg. |
| Ship labourer. | " | " | 1 | 1 | Both wrists fractured. | In attempting to free a jammed load of lumber being placed on ship, workman fell from ship to wharf. |
| Sailor | Kingston, Ont. | " 3 | 1 | 1 | | Drowned while attempting to board his vessel, slipping from ladder. |
| <i>Miscellaneous</i> | | | | | | |
| Hotel porter. | Deloraine, Man. | " 10 | 1 | 1 | | Explosion of gas machine. |
| Night watchman | St. John, N.B. | " 10 | 1 | 1 | | Fell down elevator shaft. |
| Employee of coal sheds. | " | " 18 | 1 | 1 | Foot crushed. | Struck while tearing down shed. |
| Elevator boy. | Ottawa, Ont. | " 27 | 1 | 1 | | Believed to have attempted to step on elevator while running; head caught between floor and top of elevator cage. |
| Theatre employee. | Guelph, Ont. | " 7 | 1 | 1 | Leg broken. | Fell from flies to stage. |
| Employee of flax mill. | " | " 12 | 1 | 1 | Head mangled. | Caught in a machine. |
| Postal clerk. | Halifax, N.S. | " 20 | 1 | 1 | Fractured leg and scalp wounds. | While passing from one car to another, was thrown off by lurching of train. |
| Labourer. | Niagara Falls, Ont. | " 16 | 1 | 1 | | Slipped on ice and fell 160 feet into wheel pit at power works. |
| " | Guelph, Ont. | " 18 | 1 | 1 | | Fell into wheel pit. |
| " | " | " 4 | 1 | 1 | | Caving in of a gravel pit. |
| " | " | " | 1 | 1 | Very seriously injured. | " |
| Grist mill employee. | Port Elgin, Ont. | " 9 | 1 | 1 | Sight of one eye destroyed. | Struck by piece of metal from a trucker. |
| Elevator employee. | Port Arthur, Ont. | " 3 | 2 | 2 | One internally injured, the other badly cut. | Workman, other struck by piece of tile. |
| Fireman | Toronto | " 9 | 9 | 7 | | Injured while fighting fires; not dangerously. |

Fishing.—Two drownings were reported from Cape Breton.

Lumbering.—Two fatalities and two other serious accidents were reported, both of the former resulting from the workman being struck by a falling tree. The injuries were caused by the slipping of an axe in the workman's hand and by the rolling of a log on the workman's leg.

Mining.—There were two fatal accidents and nine serious injuries recorded in the mining industry. The fall of a prospector from a precipice constituted one fatality. Six persons were more or less seriously injured by an explosion of dynamite at Michel, B.C., caused by the careless thawing of dynamite. Another injury was caused by the discharge of a powder blast at Port Arthur. The two remaining accidents which were of a serious nature were caused by workmen being run over by loaded coal cars in the mines at Cumberland, B.C.

Building trades.—Only two injuries of a minor character were reported during December.

Metal trades.—There were four fatal accidents and seven accidents involving more or less serious injuries to workmen under this heading. The fatalities were reported in the case of a machinist at London while operating a steam planer; an employee of a rolling mill at Hamilton who was caught between rollers; a stationary engineer at Berlin who was caught in belting, and a stationary engineer at Sault Ste. Marie who was employed in a veneer mill and fell into a scalding vat. The other injuries of the month were caused by a moulder being caught in a lathe; a foundryman, while removing molten metal from a furnace, being overcome by gas and spilling the metal over his body; an employee of the Dominion arsenal at Quebec being caught in shafting; a lineman by falling from a telephone pole, and two machinists, one of whom had his hand caught in a crane, and the other in a saw.

Woodworking.—A mill-hand at Shawinigan Falls was struck by the rebounding of

a piece of wood from the saw and killed. The other five injuries reported under this heading were not very serious, and occurred in three cases to workmen operating saws, the fourth being caught by belting, and the fifth having his hand injured while operating a machine.

Railway service.—The railway service heads the list with regard to the number of accidents, with seventeen fatalities and seven serious injuries. Six fatalities were reported in the case of brakemen, two to firemen, two to engineers, one to a bridge watchman, one to a switchman, two to construction labourers and two to sectionmen. There were, in addition, three firemen, two brakemen, one yardman and one baggage-man injured.

General transport.—Ten accidents, three of which terminated fatally, were reported under this heading. A teamster was killed at Dexter, Ont., while loading logs; a dredge employee at St. John, N.B., while working at a winch, and a sailor at Kingston was drowned while attempting to board his vessel. Injuries were reported as received by a motorman, whose legs were crushed in a collision of street cars, by an employee of the Toronto Street Railway Company, who was scalded by the bursting of a steam-valve in the power-house; by a teamster at St. Thomas by the upsetting of a load of wood; by longshoremen at Sand Point and St. John, N.B.; by a ship labourer at Halifax, and by an employee of the Electric Railway Company at Halifax.

Miscellaneous.—Under this heading, fatalities to a hotel porter at Deloraine, Man., caused by the explosion of an acetylene gas machine; to a night-watchman at St. John, N.B., by falling down an elevator shaft; to an elevator boy at Ottawa; to two labourers at Niagara Falls, by a fall into a wheel-pit, and to a labourer at Guelph, Ont., through the caving-in of a gravel pit were reported. The list of injured includes an employee in coal sheds at St. John, N.B., who had his foot crushed while tearing down a shed; a theatre employee at

Guelph, Ont., who fell from the flies and broke his leg ; an employee of a flax mill at Guelph, who had his hand mangled in a machine ; a postal clerk at Halifax, whose leg was fractured by a fall from a moving train ; a labourer at Guelph, who was struck by a piece of metal and seriously injured ; two elevator employees at Port Arthur, Ont., who, while unloading timber from a car, were internally injured and cut ; a grist-mill employee who lost the sight of one eye by being struck with a piece of metal, and seven firemen at Toronto, who were injured, though not dangerously, while fighting fires.

UNIONS FORMED DURING THE MONTH OF DECEMBER, 1903.

The department has received notice of the following organizations as having been formed during the month of December, 1903 :—

Nova Scotia—

No. 3 Mine—Standard Lodge, Provincial Workmen's Association.

Glace Bay—Breton Lodge, Provincial Workmen's Association.

New Brunswick—

McAdam Junction—Machinists.

Quebec—

St. Hyacinthe—Reorganization of three lodges of Shoe Workers.

Sherbrooke—Bricklayers.

Ontario—

Hamilton—Silversmiths.

British Columbia—

Victoria—Building Trades Council.

“ Bookbinders.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, DECEMBER, 1903.

During the month of December, the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the workmen and women of fair wages, and the performance of the work under proper sanitary conditions :—

| Nature of order. | Amount of order. |
|---|------------------|
| Making and repairing metal dating and other hand stamps, also type and brass crown seals. | \$ 397 84 |
| Making and repairing rubber dating and other hand stamps and type. | 32 05 |
| Supplying stamping material, inclusive of making and repairing pads ; also wooden boxes and post marking and cancelling ink. | 674 31 |
| Making and repairing post office scale. . | 145 50 |
| Supplying mail bags. | 2,434 90 |
| Repairing mail bags. | 833 57 |
| Repairing mail locks and supplying mail bags fittings. | 145 15 |
| Making letter boxes and repairing portable letter boxes and mail clerks' tin boxes. | 1,073 50 |
| Miscellaneous orders for making and repairing postal stores. | 3 15 |
| Making up and supplying articles of official uniform. | 202 25 |

GOVERNMENT CONTRACTS FOR THE MONTH OF DECEMBER.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties during the month of December, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule in each contract :—

Construction of a public building at Sault Ste. Marie, Ont. ; 14th Dec., 1903 ; \$54,000.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rates of Wages. |
|--|-------------------------------|
| | Not less than the following:— |
| Contractor's foreman, bricklayer.. . . . | \$5.50 per day of 9 hours. |
| " " for masonry.. . . . | 5.00 " 9 hours. |
| " " carpentry.. . . . | 3.50 " 9 " |
| Masons.. . . . | 40c. per hour 9 " |
| Bricklayers.. . . . | 45c. per hour 9 " |
| Stonecutters.. . . . | 40c. per hour 9 " |
| Builders' labourers.. . . . | 22½c. per hour 9 " |
| Carpenters.. . . . | 2.50 per day of 9 " |
| Joiners.. . . . | 2.50 " 9 " |
| Stair builders.. . . . | 36 cts. per hour 9 hours. |
| Lathers.. . . . | 2.60 " 9 " |
| Plasterers.. . . . | 3c. per yard. |
| Painters.. . . . | 2.25 per day of 10 hours. |
| Paperhangers.. . . . | 2.35 " 10 " |
| Blacksmiths.. . . . | 22½c. per hour 10 " |
| Ordinary labourers.. . . . | 2.50 per day of 10 " |
| Plumbers.. . . . | 2.50 " 10 " |
| Steamfitters.. . . . | 2.50 " 10 " |
| Sheet metal workers.. . . . | 2.50 " 10 " |
| Writers.. . . . | 2.25 " 10 " |
| Electricians.. . . . | 2.50 " 10 " |
| Driver with one horse and cart.. . . . | 2.75 " 10 " |
| " two horses and wagon.. . . . | 4.00 " 10 " |
| Driver and one horse.. . . . | 2.75 " 10 " |
| " two horses.. . . . | 4.00 " 10 " |
| Timekeeper.. . . . | 2.25 " 10 " |

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, DECEMBER, 1903.

THERE were twelve instances of changes in rates of wages and hours of labour during the month of December, of which the Department was able to obtain more or less detailed information. Of the changes recorded, 10 were of the nature of increases in wages, 1 was a decrease in wages, and 3 showed decreases in hours of labour.

Among the increases in wages of the month, noted in the table, that of the employees of the Intercolonial Railway was perhaps the chief in importance, increases to policemen at Ottawa, Ont., and Montreal, Que., health officers and other civic employees of Montreal, Que., flax mill employees at Alma, Ont., printers at Vancouver, B.C., and bricklayers in the employ of the municipality at Victoria, B.C., making up the balance of the list.

The Department was unable to secure official details concerning the reduction in wages of the employees of the Iron and Steel Company at Sydney, N.S., and of the

Massey-Harris Company at Brantford and Toronto, Ont.

The decreases in hours granted during the month affected clerks, salesmen and saleswomen, to the number of 5,200, in the employ of the T. Eaton Company, Toronto, involving a reduction of 31,200 hours per week in working time. The reductions in the working time granted the printers in Vancouver was also a notable decrease of the month. The reduction in the hours of car workers at Toronto Junction is to be regarded, on the other hand, as an index primarily of a diminution in the amount of employment.

The more notable developments of the month are referred to in more detail below.

Increases to Intercolonial Railway Employees.

Detailed information as to the increases granted to conductors, baggagemen, yardmasters, yardmen and switchmen in the em-

ploy of the Intercolonial Railway will be found in the accompanying table. The change, it will be seen, is dated back to July 1, and the accumulated increases were paid during the past month. The change was the result of negotiations carried on for the most part in November between the Honourable Mr. Fielding, Acting Minister of Railways and Canals, and representatives of the men. Increases affected several classes of the company's employees, more particularly engineers, firemen, members of the mechanical, freight and traffic departments and maintenance-of-way men were also discussed, but final arrangements had not been concluded at the close of the month. Before leaving Moncton, at which point the negotiations were carried on, the Acting Minister of Railways and Canals authorized the publication of a statement to the effect that an indiscriminate increase of wages among the I.C.R. employees was not probable. It was added that individual cases would be dealt with as formerly, but claims for increases, according to the Minister, were very numerous, and some time would be required to investigate them. While bound to discourage a general de-

mand for increases, the government was prepared to remedy any real grievances that were found to exist.

Increases granted to Canadian Pacific Engineers and Firemen.

The negotiations which have been in progress for several weeks between the General Manager of the Canadian Pacific Railway and representatives of the engineers and firemen ended in a settlement on December 2 by which the engineers received a general advance of from 7 to 25 per cent, according to work and location, with shorter hours in certain cases. The firemen received a general advance of from 8 to 22 per cent, with the removal of certain duties hitherto incidental to firing. With both classes the largest increases applied to the west, where the cost of living is highest. The agreement took effect from December 1, and may be terminated at thirty days' notice, after which negotiations may be opened by either party.

The following is a copy of the schedule as arranged for the Central Division:—

ARTICLE 1.

| | Engineers. | | Firemen. | |
|--|------------|---------|----------|---------|
| | Senior. | Junior. | Senior. | Junior. |
| <i>Passenger Trains, per 100 miles, or per day of 10 hours, overtime pro rata.</i> | \$ cts. | \$ cts. | \$ cts. | \$ cts. |
| Consolidated engines..... | 4 50 | 4 50 | 2 90 | 2 90 |
| Mogul, Atlantic and ten wheeler, 125% or over..... | 4 25 | 3 75 | 2 75 | 2 35 |
| Mogul, Atlantic and ten wheeler less than 125%..... | 4 10 | 3 50 | 2 55 | 2 15 |
| All other engines..... | 4 00 | 3 50 | 2 35 | 2 00 |
| <i>Freight, mixed, work and snow-plough trains per 100 miles, or per day of 10 hours, overtime pro rata.</i> | | | | |
| Consolidated engines..... | 4 50 | 4 50 | 2 90 | 2 90 |

| Mogul, Atlantic and ten wheeler, less than 125%..... | 4 10 | 3 50 | 2 55 | 2 15 |
| All other engines..... | 4 00 | 3 50 | 2 35 | 2 00 |

ARTICLE 1—*Concluded.*

| | Engineers. | Firemen. |
|--|------------|----------|
| <i>Switching, (regularly assigned) per day of 12 hours or less.</i> | \$ cts. | \$ cts. |
| All engines..... | 3 30 | 2 00 |
| | | \$ cts. |
| <i>Hostlers, (regularly assigned) per day of 12 hours or less.....</i> | | 2 50 |
| | | \$ cts. |
| <i>Piloting, per 100 miles, or per day of 10 hours.</i> | | |
| Engineers.—Engineers' rates for class of engine..... | | |
| Firemen | | 3 50 |

SPECIAL SERVICES.

D. H. on Company's Orders.

100 miles or less.—Minimum passenger rates, actual mileage.

Distance in excess of 100 miles.—Half minimum passenger rates.

| | Engineers, Per hour. | Firemen, Per hour. |
|---|-------------------------|-----------------------|
| <i>Watching and caring for engines.</i> | Cents. | Cents. |
| While held for special service, if time lost, (10 hours to be allowed per day of 24 hours)..... | 35 | 22 |
| Attending court on request of company, if time lost, (10 hours to be allowed per day of 24 hours)..... | 35 | 22 |
| Light running with engine alone, or with water car, or with official car, will be paid through freight rates. | | |

Firemen.—Ten-wheel engines, 150% or over,—Consolidated engine rates.**Notes.**

A number of increases in the salaries of school teachers throughout Ontario were noticed during the month, notably at Hamilton, Ottawa, Chatham and other points.

A reference to the increases granted by the Honourable the Postmaster General in the salaries of rural postmasters appears under a separate heading in the present issue of the *Gazette*.

Employees of the Quebec skating rink were granted an increase of 25 per cent. Snow shovellers in the same city raised to

\$1.25 per day from the rate of \$1 per day which prevailed last year.

The reduction in the hours of the railway car workers at Toronto Junction noted in the table indicates a lessening in the amount of employment available, owing to the fact that fewer trains are run now at present than during the summer.

The Winnipeg Street Railway Company granted a bonus at Christmas to all employees who had been six months or more in the employment of the company, consisting of 5 per cent on all moneys received by the employees during the year ended November 30, 1903.

TABLE OF CHANGES IN RATES OF WAGES AND

| Class of Workpeople affected. | Locality. | Approximate number of workpeople affected. | Date from which change took effect. | Particulars of Change. |

The Massey-Harris Co., of Toronto, announced a general readjustment in wages affecting 1,500 men on December 21. The employees of the company at Brantford were also affected. The change is in the way of a readjustment, rather than a direct reduction, the decrease depending largely on the character of employment and relating largely to piece-work. It does not affect foremen or the employees in superior positions. An official statement on the subject was not procurable at the end of the month.

The difficulty between the Dominion Iron and Steel Company and its employees in regard to the reduction in wages announced in November was still in continuance on December 1. Meetings of the city council and of the citizens of Sydney were held for the purpose of discussing the situation, and the reduction was finally accepted by the workmen. The rents of the company's houses and the price of coal supplied to the Steel Company's employees will be reduced. An official statement as to the precise nature of the reduction had not been received by the Department on December 31.

TRADE DISPUTES DURING THE MONTH OF DECEMBER.

THE only localities in Canada which were seriously affected by industrial disputes during the month of December were the city of Quebec, where the lockout of shoeworkers, which was begun by twenty manufacturers on November 13, continued until December 17, and Springhill, N.S., where a strike of considerable magnitude was in existence during the first week of the month, affecting 1,655 coal miners. With the exception of small disputes at London and Guelph, in Ontario, there were no other localities disturbed by strikes or lockouts during the month.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of disputes reported to the Department as being in existence during December was six, being four less than the previous month, and two less than the corresponding month of 1902. Of the six disputes, three began prior to the beginning of December, and three after. Two old disputes were settled in the course of the month, and two new ones, leaving two still in existence at the end of the month. The total number of firms or establishments affected was 24, and the number of employees directly affected was 6,692.

Loss of time in working days.—The approximate loss of time in working days was 75,322, an increase of 148 over the previous month. The chief losses were due to the lockout of shoemakers at Quebec, which accounted for 65,000 days, and a strike of coal miners at Springhill, N.S., during which were lost 9,930 days.

Causes of new disputes.—The causes of the new disputes were as follows:—objection to the method of payment, the employment of an apprentice on journeymen's work, and objection to the employment of a non-unionist.

Results of settlements.—In the four disputes that were settled, the strikers were successful in one case, in another a compromise was effected, and two were referred to arbitration, work being resumed in the meantime.

Disputes Commenced Prior to the Beginning of the Month.

The following disputes commenced prior to December 1 were in continuance during the month: a strike of boilermakers at London, Ont., a strike and a lockout of shoemakers at Quebec. The strike of carpenters at Winnipeg had not been declared off against the firms which had not signed

agreements. In the December number of the *Gazette* it was stated that a strike of coal miners at Springhill, Nova Scotia, began on November 30, but as further information received indicates that cessation of work dated from December 1, an account of this strike will be found among the new disputes of the month.

The situation with regard to the strike of boilermakers at London, Ont., remained unchanged. The charges brought against four of the strikers by the company for besetting their premises, mentioned in the December number of the *Gazette*, were dismissed by the police magistrate.

With reference to the strike of carpenters at Winnipeg, there remained only eight firms at the beginning of the month who had not signed the agreement presented by the union. As the winter weather rendered work slack in this trade, it may be said that industrial conditions ceased to be affected by the dispute.

Strike and Lockout of Shoeworkers at Quebec.

An account of the progress of the strike and lockout of shoeworkers at Quebec during November was given in the December number of the *Gazette*. During the first week of December, efforts were made to end the dispute by Mr. Felix Marois, registrar of the Councils of Conciliation and Arbitration of the province of Quebec, and Mr. Justice P. Choquette. On November 30, the employees informed them that they had an agreement which they were prepared to sign, but at a meeting on the next day, the manufacturers stated that they refused to have any dealings with the union, but were prepared to discuss matters with their own employees. On December 4, the men returned to the factories to confer with their employers, but they were unable to reach any satisfactory settlement. On the 7th, they appealed to the mayor of Quebec, who, however, was unable to take any steps towards effecting a settlement. On December 11, the shoe machinists filed a complaint with the Claims and Conciliation com-

mittees, charging the manufacturers with closing their doors contrary to the arbitration agreement. The Claims and Conciliation committees could not agree with reference to this complaint, and the matter was subsequently brought before the Board of Arbitration. On December 14, the manufacturers made an attempt to open their factories, but they were unsuccessful, as all of the machinists and the majority of the other employees preferred to remain out until the Board of Arbitration had pronounced upon the questions at issue. The board met on December 16, and announced that no cognizance would be taken of the complaint until work was resumed in the factories, and if this was not done, the board would cease to exist. The representatives of the men stated that they were willing to return to work, and the representative of the manufacturers, after a consultation with them, said that they would agree to the suggestion provided that the board would take into consideration the complaint of the manufacturers against the machinists, when they were considering the complaint of the machinists against them. The arbitrators agreed to do so, and the following decision was delivered by them :

‘It having been suggested by the Arbitration Commission to the interested parties, that to remain faithful to the arbitration decision, in virtue of which this commission existed, it is necessary that work in the factory be resumed immediately, after which the arbitration commissioners will hear the complaints submitted to them,

‘Mr. Dorion, on behalf of the workmen, declares that his clients are willing to resume work to-morrow (Thursday) morning.

‘Mr. Rochette, on behalf of the manufacturers, declares that they are ready to receive their employees to-morrow (Thursday) morning.

‘Doth therefore grant act of these declarations, and it is understood that upon a day to be fixed, after work is resumed in good faith in all the factories upon the

same conditions as those existing previous to the closing, this commission will hear the complaints which are now submitted to them, and proceed to adjudicate thereon simultaneously.'

In accordance with this decision, all the factories were re-opened on the following day, Thursday, December 17. The five machinists who began the dispute by declaring a strike on October 30, returned to work with the others. It was impossible, however, for all the employees to obtain work immediately, as, before the lockout, most of the manufacturers had finished nearly all the stock they had on hand, and consequently they required the leather cutters at first. A further delay was caused by the fact that many of these workmen had left Quebec and obtained employment elsewhere. Practically every industry in Quebec was more or less affected through the long continuance of the lockout. The Board of Arbitration had not passed any decision on the matters in dispute by the end of the month.

New Disputes.

The three new disputes of the month were a strike of coal miners at Springhill, Nova Scotia, a strike of Brussels carpet weavers at Guelph, Ont., and a strike of plumbers at Montreal. A brief account of the first, which was the only one of importance, is given below.

The dispute of carpet weavers at Guelph arose through the placing of an apprentice on a loom before he had served the specified time laid down by the rules of the Guelph Brussels Carpet Weavers' Union. The strike affected 25 men, and lasted from December 2 to December 5. It was terminated by the signing of an agreement to the effect that all apprentices should serve an apprenticeship of five years, before being entitled to be placed on a loom.

The strike of plumbers at Montreal was declared on account of the company employing a non-unionist. Six men were affected by it. The firm claimed that the strikers had violated their agreement with

the Masters Plumbers' Association by going out without giving notice. The men, on the other hand, claimed that the firm had violated the agreement by the employment of a non-unionist. The strike began on December 9, and no settlement of it was reported by the end of the month.

Strike of Coal Miners at Springhill, Nova Scotia.

The strike of coal miners at Springhill, Nova Scotia, was due to a change in the method of payment, instituted in November by the Cumberland Railway and Coal Company. It had been the practice to pay the miners according to the area of coal dug out. The coal when mined, is in some places slid down long chutes, and loaded into boxes at the bottom. The company found that there was an apparent shortage in the number of boxes filled, compared with the area dug out, and announced that payment would be made in future by the box, instead of by cubic measurement. The men objected to this change, as they alleged that the shortage was due to stone falling in the chute and to the overloading of boxes. The strike is reported by the secretary of the union to have been settled by the men agreeing to the change of payment on the understanding that they would incur no losses through the falling of stone or the overloading of boxes. The strike affected 1,655 men, and lasted from December 1 to December 7 inclusive. The company agreed that the new system would date from December 1, instead of from the time when it was announced in November. At the same time, a minor grievance was settled by the company agreeing to pay an increased rate of four cents per box to eight or ten miners working in a difficult chute.

In connection with this strike, the company claimed that it was unconstitutional, according to the rules of the union, and that it was a violation of an agreement which the miners had made with them, to give them fifteen days' notice before commencing a strike. The union promised to abide by their agreement and constitution in future.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLES, SERIES C, No. 38.

TABLE OF TRADE DISPUTES OF THE MONTH OF DECEMBER.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No. of Firms or Establishments affected. | Approximate No. of Employees affected. | | Date of commencement. | Date of termination. | Remarks. |

| Quebec.... | Montreal. ... | Plumbers..... | Objection to employment of a non-unionist. | 1 | 6 | | " 9 | | |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

Minor Industrial Disturbances.

During the first week of December, the employees of the Wyld-Darling Company of Toronto, manufacturers of clothing, asked for a reduction of hours from 10 to 9 on week days, and from 5 to 4 on Saturdays. This request was refused, and on December 8, thirty men went out on strike. On the next day, however, they returned to work on the old conditions, having been

informed by their employers that the exigencies of business would not allow them to grant their demand.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of December, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during December, 1903 :—

CANADIAN REPORTS.

Trade Returns.

Tables of the Trade and Navigation of the Dominion of Canada for the fiscal year ended June 30, 1903. King's Printer, Ottawa. 543 pages. Price, 50 cents.

In the report on the trade and navigation of Canada it is stated that the aggregate trade of Canada on the basis of goods entered for consumption and exported, during the year ended June 30, 1903, amounted to \$459,640,240, an increase of \$45,208,359 over the previous year. The trade with Great Britain increased from \$166,526,283 in 1902 to \$190,099,222 in 1903, and with the United States from \$192,012,434 to \$209,389,119. The trade with Germany, which ranks third in extent, increased from \$13,515,747 to \$14,380,336. There was a slight decline in the trade with France, the figures for the two years being \$8,061,042 and \$7,921,647 respectively. There were considerable increases in the trade with the West Indies, Newfoundland, Belgium and South America, and a slight decrease with China and Japan. The total value of exports amounted to \$225,849,724, and the imports came to the value of \$241,214,961. In the trade with the United States, the exports from Canada for the year amounted to \$71,783,-

924, an increase of \$586,240 over 1902, but a decrease compared with the year 1901. The imports from the United States during the last fiscal year were to the value of \$137,607,195, an increase of \$16,790,445 over the previous year. For the same periods the exports to Great Britain increased from \$117,320,221 to \$131,202,321, and the imports from \$49,206,062 to \$58,896,901. The total amount of duty collected in the two years increased from \$32,425,532.31 to \$37,110,354.59. The sum of \$17,069,881.19 was collected on goods imported from the United States, and \$9,841,627.33 on goods from Great Britain.

ONTARIO REPORTS.

Farming in Ontario.

Report of the Farmers' Institutes of the Province of Ontario, 1902 and 1903. Part I.—Farmers' Institutes : 144 pages. Part I.—Women's Institutes : 96 pages. King's Printer, Toronto.

The first part of the report of the Farmers' Institutes of the province of Ontario for 1902 and 1903, contains a large number of instructive papers on the various branches of practical husbandry. The articles are divided into the following classes : Agriculture, Horticulture, Live Stock, Dairying, Poultry, General, and in conclusion are given the two essays that won prizes at Whitby fair. The superintendent of Farmers' Institutes states that the total membership of the province on

June 30, 1903, was 23,754. As an indication of the educative value of the Farmers' Institutes, it is stated that during the year 837 meetings were held, and 3,377 papers were read or addresses delivered, while 126,459 persons attended the meetings. In view of the increasing export of fruit to Great Britain, a short article in this report on the handling and marketing of fruit is very useful. In two articles dealing with the district of Algoma, numerous special advantages, which this part of the country holds for farmers, are described. Among them are mentioned the fertility of the soil, the abundance of water, the possibility of combining lumbering in the winter with farming in the other seasons, and thus obtaining profits all the year round, and the cheapness of land compared with eastern Ontario, Quebec and other places.

Part II of the report of the Farmers' Institutes contains information with regard to Women's Institutes in Ontario, and numerous papers which were read at their meetings during 1902 and 1903. The membership of Women's Institutes increased from 3,081 in December, 1902 to 4,565 in June, 1903. During the year ending May 31, 1903, there were held 619 meetings, with a total attendance of 22,013 at which 1,018 papers were read or addresses delivered. The chief subjects treated in the report are a report of the Guelph meeting, including papers read before it, articles on the home, household science and the flower garden.

Annual Report of the Bureau of Industries of the Province.

Annual Report of the Bureau of Industries of the Province of Ontario, 1902. Part I.—Agricultural Statistics. Part II.—Chattel Mortgages. King's Printer, Toronto, 48 pages.

The report of the Bureau of Industries of Ontario for 1902 contains some interesting comparative tables with reference to agricultural products and conditions, extending over a number of years. Although the values of live stock were high in 1893, compared with succeeding years, the values in 1903 were higher in nearly every instance. Working horses have increased from \$80 in

1893 to \$93 in 1902. For the same years breeding mares were worth \$83 and \$95 respectively, and stallions \$356 and \$373. There has been an almost steady decline in the value of working oxen from \$47 in 1893 to \$42 in 1902. The value of milch cows increased from \$31.63 in 1893 to \$32.96 in 1902. Sheep declined in value from \$5.62 in 1893 to \$4.37 in 1897, and then steadily rose until they reached \$5.40 in 1902.

The butter making industry in Ontario showed a remarkable increase during the decade from 1893 to 1902. In the former year there were 74 creameries in operation, manufacturing 2,797,570 tons of butter, valued at \$547,156, while in 1902, there were 282 creameries in operation, producing 11,082,078 lbs. of butter, valued at \$2,181,400. At the same time the number of patrons of creameries increased from 7,852 to 21,672.

With regard to labour conditions in country districts, a statistical table shows the wages of farm labourers and domestic servants on farms declined steadily from 1893 to 1897, when they reached their lowest point, from which period they exhibited a steady increase until, in 1902, they were higher than at any previous time. At that date, the wages of farm labourers in yearly engagements with board amounted to \$165, and without board, to \$268, monthly wages during the working season were, with board, \$18.52, and without board, \$27.51. The monthly wages of domestic servants were \$6.47 in 1893, \$5.97 in 1897, and \$7.15 in 1902.

In addition to tables of the agricultural products of each county in Ontario, the report contains agricultural statistics of the United States, Manitoba and the Northwest Territories.

BRITISH REPORTS.

Conciliation in Trade Disputes.

Fourth Report by the Board of Trade of Proceedings under the Conciliation (Trade Disputes) Act, 1896. London: Eyre & Spottiswoode. 121 pages. Price, 6d.

The fourth report of the Board of Trade of proceedings taken under the Conciliation

Act of 1896 covers a period of two years, from July 1, 1901 to June 30, 1903. In that time, 41 cases were dealt with, in 21 of which there was a cessation of work. There were 46 cases of conciliation in the preceding two years. In the period of nearly seven years since the passing of the Act there were 154 cases in which the mediation of the Board of Trade was sought under the Act. Of these there were 71 cases of application from both sides, 20 from employers only, 54 from work people only, and 9 cases in which action was taken without application from either side.

With respect to the trades affected by disputes that came under the Conciliation Act during the two years covered by the report, it is stated that 16 cases arose in the building trades, 5 in the mining and quarrying trades, 6 in the metal, engineering and shipbuilding industries, and the remaining 14 in various other groups of trades. In the whole period of seven years, 56 cases were in the building trades, 31 in the metal, engineering and shipbuilding trades, 21 in the mining and quarrying trades, 14 in the transport trades, 8 in the textile trades, 7 in the printing, bookbinding and paper making trades, 6 in the clothing trades, and 11 in other groups of trades.

Of the 41 cases that arose during the period of two years under review, the number settled under the Act was 29, in 13 of which there was a stoppage of work. Of the 29 cases, 27 were settled by arbitration or umpires appointed by the Board of Trade, and 2 by conciliators.

Four of the disputes were settled by the parties concerned during negotiations by the Board of Trade, and in 7 cases, either the application was declined by the Board of Trade, or there was a failure to reach a settlement. One case was pending on June 30, 1903.

Taking the total number of cases since 1896, the report states that out of 154, 99 were settled under the Act, and 14 were settled by the parties concerned during negotiations. In 40 cases either the board

declined to take action, or no settlement was affected. Of the 99 settlements, 65 were the result of arbitration, and 34 of conciliation.

In 20 cases out of the 27 that were settled by arbitration in the last two years, application to the board was made by the parties to the dispute or their representatives. Five applications were received from Conciliation Boards and two from arbitrators, who, on failing to agree, requested the Board of Trade to appoint an umpire. In these two cases, the disputes were with reference to the demarcation of work between different classes of operatives.

There was only one case, in which the award given under the Conciliation Act was not accepted, and it is stated that this is the only case of the kind since the passage of the Act.

DISPUTES SETTLED BY CONCILIATION AND ARBITRATION.

One of the disputes settled by conciliation affected practically the whole of the building trades at Bristol, and the other affected the printing trade at Reading. The most important dispute settled by arbitration was in the Grimsby fishing trade, which lasted about three months and affected directly about 4,000 men. Other large ones were a strike of 315 carpenters and joiners at Bradford, one affecting about 1,000 builders' labourers in the Potteries and Newcastle district, one involving 744 sheet millmen and others at Pontarawe, and one in the London bookbinding trade which affected the wages of about 1,000 people.

CONCILIATION BOARDS.

The report contains a list of Conciliation Boards which have been registered under the Act. Of these there are 19, none of which were registered during the two years under review. It is stated that the great majority of the more important boards are unregistered, but most of them, as well as all of the registered ones, furnish the Board of Trade with annual returns of the work

done by them. There are 41 instances of rules embodied in constitutions of Conciliation Boards, and in agreements between employers and workpeople, which provide for a reference of disputes to the Board of Trade whenever there is a deadlock. Seven of such rules were adopted in the past two years, and one was rescinded.

In appendices to the report, there is a tabular summary of 41 cases dealt with, detailed statements of each case, texts of awards and agreements, rules of Conciliation Boards and other agreements providing for reference of disputes to the Board of Trade, and the text of the Conciliation Act of 1896.

Irish Migratory Labourers.

Agricultural Statistics, Ireland, 1903. Report on Irish Migratory Labourers. Dublin, E. Ponsonby. 47 pages. Price, 3d.

The report on Irish migratory labourers for 1903, which is issued by the Department of Agriculture and Technical Instruction for Ireland, treats statistically of those agricultural and other labourers who annually leave their homes to seek employment elsewhere, chiefly in England and Scotland. It is stated that the migration of agricultural labourers, mostly from certain districts of Connaught and Ulster, to Great Britain, has continued probably for two centuries. Within the last sixty years, however, there has been a marked decline in the number of migratory labourers, both absolutely, and relatively to the total population of Ireland. In 1841, there were 57,651 of this class of migrants, being 7.0 per thousand of the population, and in 1903, there were only 17,566, representing 3.9 per thousand of the population. This decline is attributed to the fact that three-fourths of the emigration from Ireland in the last half century was from the class of small farmers and agricultural labourers, and not because more work was found at home.

Comparing the returns for 1903 with those for 1902, it is shown that there was a decrease of 1,268, or 8.6 per cent in the

number of migrating labourers. With regard to the social position of the migrating labourers, it is stated that 80.4 per cent are not landholders. It is stated that 72.6 per cent sought work in England, 20.3 per cent in Scotland, and 7.1 per cent in Ireland. It is the custom of a large number of labourers to visit England twice a year.

UNITED STATES REPORTS.

The Coal Industry in Illinois.

Twenty-first Annual Coal Report of the Illinois Bureau of Labour Statistics, 1902. Also the Fourth Annual Report of the Illinois Free Employment Offices for the year ended Oct. 1, 1902. State Printers, Springfield, Ill. 394 pages.

The twenty-first annual coal report of the Illinois Bureau of Labour Statistics opens with a brief account of the progress of coal mining in the state since the first discovery of coal in 1679. The amount of coal produced increased from 16,968 tons in 1840 to 30,021,300 tons in 1902. And in the same period, the number of men employed in or about the mines increased from 152 to 46,005. The area of the Illinois coal field covers about 63 per cent of the area of the state. The number of men killed during the year 1902 was 99, and 406 were so injured that they lost a month or more of time. The total number of mines was 1,026, the same number as in 1901, but the output increased from 26,635,319 tons in the latter year to 30,021,300 tons in 1902, as was mentioned above.

With reference to the threatened fuel famine in 1902, it is stated in the report that the shortage of coal was not due so much to the suspension in the anthracite fields of Pennsylvania, as to the unprecedented and rapidly increasing demands of large manufacturing establishments for fuel.

The coal fields are divided into seven inspection districts, and reports from each district are given in detail, specifying among other things the name of each mine, the output, number of employees, and number and nature of accidents.

FRENCH REPORTS.

Industrial Statistics of France.

Annuaire Statistique. Vingt-deuxième Volume, 1902. Paris: Imprimerie Nationale, 1903. 566 pages.

The volume of Annual Statistics of France for 1902 is divided into seven parts, dealing with the following subjects:—Climatology; Territory and Population; Production and Industrial Conditions; Revenues and Expenditures; Government and Administration; Colonies and Protectorates; and Comparative Tables, extending over a number of years.

The total population of France in 1901 is given as 38,961,945, an increase of 443,970 over 1896. A table shows that the number of crimes and misdemeanours in France committed during 1900 was 479,429, of which number 126,010 were cases of petty thefts. There are also included many cases, such as accidental homicides and deaths, and accidental incendiarism, which can hardly be classed as infractions of the law.

Statistics with reference to the Government Labour Bureau show that, in 1901, there were 523 strikes, affecting 111,414 men. In 142 cases, or 27·15 per cent of the total number, recourse was had to arbitration under the Act. In only 11 cases were there refusals to resort to arbitration. The number of establishments inspected during the year was 327,703, and the number of workpeople thus protected by the government was 2,865,832.

The table on revenues and expenditures give the amount of deeds and bequests in 1901, changes in the ownership of real estate, value of and income derived from lands and houses, gifts to charitable institutions. The cost of living is also shown with regard to the chief articles of consumption, such as bread, meat, butter, potatoes, wine, milk and coal. These prices are given for four quarterly periods in 1901, and the first two in 1902. The amount of alcohol and tobacco consumed is also given, and the number of vehicles, horses, dogs, &c., subject to taxation is given for the years 1901 and 1902. With reference to these

figures, it is interesting to note that there was an increase in the number of automobiles from 5,386 in 1901, to 9,207 in 1902, while there was a decrease of 857 in the number of four-wheeled carriages.

Among other statistics in this part of the volume are those relating to savings banks, mutual benefit societies, insurance companies, and the military and naval forces of France.

Conciliation and Arbitration in France.

Statistique des Grèves et des Recours à la Conciliation et à l'Arbitrage survenus pendant l'Année 1902. Paris: Imprimerie Nationale, 1903. 498 pages.

In the Report of the Bureau of Labour of France on Trade Disputes in 1902, it is stated that there were in that year 512 strikes, involving 212,704 strikers, of which number 162,622 were men, 35,326 women, and 14,756 were youths and children. The number of establishments affected was 1,820, and the number of working days lost amounted to 4,675,081, of which 202,604 were lost by 9,461 working people who were indirectly affected. 21·68 of the strikes and 11·06 per cent of the strikers were successful, a compromise was made in the case of 35·94 per cent of the strikes and 75·61 of the strikers, and 42·38 of the strikes, comprising 13·33 per cent of the strikers, failed. Demands for increases in salary were the motives in 256 cases. Of these, 51 were successful, compromises were affected in 97 instances, and 108 failed. There were 83 strikes due to a reduction in wages, of which 24 failed, affecting 1,357 strikers.

In 1902, recourse was had to arbitration and conciliation under the Act of 1892 in 107 cases, which is 20·89 per cent of the total number of disputes. Offers of mediation were rejected 42 times, in 35 cases by the employers, twice by the men, and five times by both parties. Application for mediation was made in 60 cases by the working people, in five cases by the employers, and twice by both parties combined. In 40 strikes, the justice of the peace intervened, by virtue of his office. Thirty-two disputes were settled directly by concilia-

tion committees, and 15 were referred to arbitration, after the failure of conciliation. In two cases, a settlement was due indirectly to conciliation committees, and two disputes were settled by arbitration. It is stated that the settlement of 47 disputes in all may be ascribed to the operation of the Act of 1892.

In the 47 disputes settled under the Act, the strikers succeeded in gaining their demands in 9 cases, and failed in 8, while a compromise was effected in the remaining 30. In the 60 disputes which the enforcement of the law failed to terminate, the men succeeded in three cases, failed in 32, and effected a compromise in 25.

In addition to the disputes which were settled under the Conciliation Act, nine were terminated through the intervention of prefects and sub-prefects, and seven by mayors. The intervention of business and professional associations brought 16 disputes to an end, and through the intervention of various other individuals three others were ended.

Charitable Institutions in France.

Statistique Annuelle des Institutions d'Assistance, Année 1901. Paris : Imprimerie Nationale 1903. 105 pages.

The report on charitable institutions in France, in 1901, states that in that year the number of 1,385,269 persons received aid at almshouses. There were 760,981 persons who received free medical assistance at their homes, and 95,794 at dispensaries. The number of insane and weak-minded treated in public and private asylums was 89,145, of whom 42,169 were men and 46,976 were women. On January 1, 1901, there were in the care of public bodies and institutions 113,389 children, either lost, abandoned or orphans.

The report gives detailed statistics with respect to each district in France, of receipts and expenditures of almshouses, hospitals, asylums and pawnshops, and also tables of bequests and legacies left to public institutions, losses by fire, and losses of live stock through contagious diseases.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada:—

QUEBEC CASES.

Action by Employee for Wrongful Dismissal.

C. was engaged in Montreal by the Canadian Pacific Railway Company to go to Algoma Mills to handle coal there. On a certain day, at the time for resuming work in the afternoon it was raining, and C. and others refused to work. That evening the foreman discharged them, but the next morning he requested them to return to their work under the same conditions as before. C refused to do so, returned to Montreal, and sued the company for damages equal to the wages which he would have earned during the whole season of naviga-

tion, that being the whole period for which he had been engaged.

The court held that while the rain was a sufficient justification for stopping work, and that the discharge was, therefore, illegal and a breach of contract, yet that the person suing for damages was bound to show that such damages arose from such illegal breach of contract; and that as C was asked to return to work on the very next day under the same conditions he would have suffered no damages whatever had he accepted such offer.

C's action was, therefore, dismissed with costs.

(Coté v. Canadian Pacific Railway Co. Judgment given in the Superior Court at Montreal by Mr. Justice Archibald, December 17, 1903.)

Accident caused by Negligence of Employee.

St. Pierre was employed as a brakeman by the Canadian Pacific Railway Company. He brought an action against the company for an accident which, according to his contention, occurred under the following circumstances: He alleged that one night he was shunting cars to form a train; that the night was dark and that the lights on the ground were insufficient and were blocked by the numerous cars in the vicinity; that he was standing on the iron ladder at the side of the freight car and that not noticing a small weigh-house, hardly a foot distant from the railway track, he was driven against its roof, thrown under the car and seriously injured, one of his fingers being severed from his hand, and the next finger being rendered almost useless. He claimed that the negligence of his employers was responsible for this accident, and that the weigh-house was so close to the track as to be a constant danger to brakemen.

The company defended the action and pleaded that St. Pierre was an experienced man; that the iron ladder at the side of the car was for the purpose of enabling those engaged thereon to reach the roof and for no other purpose; and that the accident was caused by St. Pierre's own negligence in riding on the ladder instead of on the roof of the car which was his proper position. The company also pleaded that in any event there was plenty of room for St. Pierre to have gone past the weigh-house standing on the ladder if he had taken any care. It also appeared in evidence that St. Pierre had been warned by the leader of his gang not to stand on the ladder.

The court held that it was clearly proved to be a rule of the company that brakemen should not stand on these ladders while freight cars are in motion, and that St. Pierre must have been aware of this regulation. His action was, therefore, dismissed with costs.

(*St. Pierre v. the Canadian Pacific Railway Company*. Judgment given in the Superior Court at Montreal by Mr. Justice Curran, December 21, 1903.)

Action by Father for Damages for Death of Son.

George Ouellette was employed by the Dominion Coal Company. The latter had chartered a steamer to bring coal from Cape Breton to Montreal, and on October 18, 1902, this steamer was at the wharf in Montreal being discharged of its cargo. The ship was chartered with its master and crew, and the navigation and internal economy were under the control of the master and not of the Dominion Coal Company; and it was particularly brought out in evidence that it was the duty of the crew to open and shut the hatches.

On the evening in question Ouellette, who was employed on the wharf, was ordered to go on board the ship and do certain work which he did. In passing hatch No. 2 he fell into the hold and was killed. This portion of the hold had been completely discharged at least one hour, and possibly several hours, before the accident, but the hatch had not been closed.

Ouellette's father sued the Dominion Coal Company for \$8,000 damages, alleging that the accident was caused by its negligence, first, on account of absence of sufficient light on the deck; and secondly, in improperly leaving the hatch open after the cargo had been completely discharged from that part of the hold. Ouellette's father also claimed that he could not earn his own living without the aid of his son, who at the time of the accident was 18 years of age, and that the son had always contributed to the support of his father and mother his wages, amounting to \$450 per annum.

On the first point, the court held that there was sufficient light at the time of the accident, especially as Ouellette had carried a torch to enable him to perform the work he was sent to do.

As regards the second point, the company claimed that it was the duty of the master and crew of the vessel to shut the hatches when the cargo was discharged, and that it was, therefore, not its fault that they were open. It also urged that the danger of open hatches was one necessarily incident to the work which Ouellette was engaged in doing. The court held, on the evidence, that the master and crew had left the ship at about five p.m., when it was doubtful if hatch No. 2 had been completely discharged, and that, from that time up to seven or eight p.m., when the accident happened, the company was in charge of the vessel. It was also held that an open hatch constituted a danger to persons passing along the deck, particularly at night; and that, while it was a necessary danger until the cargo was discharged, it was not so afterwards, and that the accident was, therefore, not the result of a danger inherent in the work which Ouellette was employed to do. It was, therefore, decided that the company was liable.

Upon the question of the amount of damages, the court came to the conclusion that Ouellette's father had not proved that he himself was unable to earn a living for those dependent upon him. As he might reasonably expect, however, that his son would contribute his wages to the support of the family until he attained his majority, the court allowed \$900 damages, being based upon the calculation that the son would probably have made \$200 a year during the intervening period until he was twenty-one.

(*Ouellette v. the Dominion Coal Co.* Judgment given at Montreal, December 16, 1903.)

ONTARIO CASES.

Negligence of Employer and Question as to Contributory Negligence of Employee.

G. was employed in a bag factory. In the course of his work in the factory, his hand was caught in the fans of a 'dryer,' and, as a result, had subsequently to be amputated.

The dryer was a room 16 feet long by 10 feet wide. In it were two fans. These fans were put in motion by a belt being put upon a tight pulley, which, when the fans were not going, ran upon a loose pulley. The plaintiff left work one Saturday at noon, and he subsequently said that at that time he noticed the tendency of the belt to go upon the tight pulley, and that he had been obliged to hold the belt on the loose pulley until the machinery stopped. On the following Tuesday, he again commenced work. He noticed that the belt was upon the loose pulley, and he then went to the dryer to oil up. He noticed that none of the machinery was then in motion. He took off one panel of the drying-room and filled the oil cup of one of the fans. He then commenced to make his way through between the folds of cloth with which the place was filled, and while he was doing so, he heard the machinery start up. He held the oil-can in his left hand, and put his right hand up to feel for the oil-cup; instead of reaching it, however, his hand went against the fan, which was then in motion, having been started after the driving machinery commenced, by the slipping of the belt from the loose pulley to the tight pulley.

G., in his action, alleged that the arrangement for running the fans was defective, and that his employers were aware of the fact; that the belt was somewhat wider than the loose pulley, and was liable to extend to the tight pulley and start the fans, without any one using the shifter.

The action was tried with a jury, and the jurors visited the factory. In answer to the questions submitted, they found that the injury in question was attributable to the negligence of the employers in having the arrangement of shifting lever and pulley so defective as to allow the belt to slip upon the tight pulley and start the fans. They also found that G. had exercised reasonable care, and awarded him \$1,250 damages.

The employers contended that, even according to G.'s own evidence, he was guilty

of contributory negligence, because he went to the drying room in the dark, and they, therefore, asked that judgment should be given in their favour. The trial judge, however, came to the conclusion that the jury could have brought in a finding to that effect, if it had seen fit to do so. He, therefore, gave judgment according to the verdict, giving G. \$1,250 damages.

(*Gordainer v. The John Dick Co.* Judgment given in the High Court of Justice for Ontario by Mr. Justice Britton, November 26, 1903.)

Accident to Electric Linemen : Question of the Liability of Strangers for Negligence.

R. was employed by the Ottawa Electric Co. to do certain work in connection with the wiring for the illuminations prepared for the visit of the Duke of York to Ottawa. In the course of such work, R., without having any right to do so, placed a transformer on a pole belonging to the Great Northwestern Telegraph Co. The employees of Ahearn & Soper had previously placed on the same poles wires connected with illuminations, and, according to R.'s contentions, these wires were so negligently affixed and so dangerous, that he came in contact with them and then fell from the pole, sustaining severe injuries.

R. sued both the Ottawa Electric Co. and Ahearn & Soper for damages. At the trial the action against the Ottawa Electric Co.

was dismissed. As regards Ahearn & Soper, the jury, in answer to certain questions, found that the negligence of the employees of that firm in using uncovered wires and in the careless construction of the wires was the approximate cause of the accident to R. The jury, however, did not answer another question, as to whether R., by the exercise of ordinary care, might have avoided the accident. These findings were treated by the trial judge as a disagreement on the part of the jury. The whole case was subsequently taken to the Court of Appeal, which found :

(1.) That as R. had used the pole in question without any authority from the owners, or without having been invited by Ahearn & Soper to do so, he took all risk of the wires being out of order or imperfectly insulated, and that, therefore, he could not recover against Ahearn & Soper for any accident arising from these causes ; and

(2.) That in any event, the evidence showed that R. had been guilty of such contributory negligence as would debar him from obtaining damages for the accident, since at the time he had been working without gloves, although he had been warned and instructed by his employers to always wear them when working at the wires.

R.'s action was, therefore, dismissed.

(*Randall v. The Ottawa Electric Co. and Ahearn & Soper.* Judgment given by the Court of Appeal for Ontario, November 16, 1903.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 8.

FEBRUARY, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,
OTTAWA, February 15, 1904.

A leading place is given in the present issue of the *Gazette* to the first of a series of statistical returns relating to the hours of labour in the several trades throughout the Dominion, in accordance with a general plan explained in full in the December *Gazette*. The tables included in the present article relate to current conditions in the building trades, information relating to the historical aspect of the case and the movement towards a shorter working day during the past fifteen years, being reserved for future treatment in the *Gazette*. It is the intention of the department to continue the series with special articles relating to the metal, woodworking, printing, clothing and the other more important branches of the trades represented in Canada.

The subject of Canadian labour legislation is continued in the issue in a review of legislation relating to aliens, the first instalment of which appeared in the December *Gazette*. In the previous article the subject was dealt with

from the standpoint of the immigration laws; the present is devoted to the legal status of the alien proper while within the Dominion and still retaining his citizenship in a foreign state.

In addition to the above special articles attention may be directed to a brief report of the proceedings of the Transportation Commission which held a number of sittings in the maritime provinces during the month, to a statement regarding the reorganization effected in the district labour council of Toronto, (an arrangement of very general interest), to a resumé of official statistics relating to electric lighting in Canada, and to an analysis of a recent report of the Canadian Manufacturers' Association of conditions of employment in the skilled labour market.

The department wishes to direct the attention of the readers of the *Gazette* to the discontinuance of the monthly article relating to changes in wages and hours of labour, inaugurated as a regular feature of the *Gazette* in September last, it having been decided to substitute therefor a quarterly statement dealing with winter, spring, summer and autumn changes respectively to appear in future issues of the *Gazette* for April, July, October and February. A brief reference to current changes, however, will be published from month to month under a separate heading in the 'general summary' article.

Publication of a revised directory of the labour organizations of Canada is begun in an appendix to the present issue, and will

be continued with as much rapidity as practicable. The department has now upwards of 1,600 on its list of organizations, in the neighbourhood of 500 unions having been added since the publication of the last directory.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JANUARY, 1904.

I. GENERAL SUMMARY.

THE unusually cold and stormy weather constituted an important factor in the labour market throughout Canada in January, affecting, directly or indirectly, nearly all of the leading industries, including agriculture, fishing, lumbering, manufacturing, and especially transportation, and a number of trades, more particularly the building and woodworking trades, and unskilled labour, to a marked degree. In the majority of instances the results were of an unfavourable tendency, the most notable exception being the unskilled labour branch which was given increased employment on a large scale by the heavy snow fall. The opening of the ice harvesting season under favourable conditions was also a factor favourably affecting employment of common labour during the month. Plumbers also with scarcely an exception were extremely busy. Apart from these considerations, however, the month on the whole showed a diminution in the amount of employment both as compared with December and with the corresponding month of 1903, though local instances occurred of continued or even increased activity in particular branches.

With regard to the cost of living, an increase in the price of flour at several points was reported. Bread at Three Rivers also showed an increase of from 16 to 18 cents per large loaf. A shortage of dwellings was reported in the city of Montreal causing an advance in rents estimated by local real estate agents at 10 per cent.

Changes in Wages and Hours.

The arrangement of wages scales to govern the active season of the present year,

though not as yet under general consideration, came up for discussion in a few localities. As yet, however, the changes in this connection have not been on a scale sufficient to indicate any tendency that might be regarded as general. The most notable change announced during the month was that materially advancing the rates of pay of maintenance-of-way employees on the Intercolonial, which was dated to take effect from November 1, 1903. The new schedule is as follows:—

| | |
|---|-----------------|
| Yard section foremen at 24 specified points: will be paid.. . . . | \$2.25 per day. |
| Regular sectionmen in above yards.. . . . | 1.50 " |
| Regular sectionmen elsewhere than in above yards | 1.40 " |
| Yard section foremen at 11 specified points will be paid.. . . . | 2.00 " |
| Regular sectionmen foremen elsewhere than in above yards.. . . . | 1.85 " |
| Foremen of extra gangs.. . . . | 2.75 " |
| Foremen of track carpenters.. . . . | 2.50 " |
| Track carpenters, skilled mechanics with kit of tools.. . . . | 2.00 " |
| Rough carpenters, wharfmen. \$1.50 to 1.70 | " |

Where foremen track carpenters are now allowed an amount for expenses, the same will be continued.

A new series of rules for trackmen was also drawn up and assented to. A slight increase in wages was granted to polishers and buffers at St. Catharines after negotiations lasting two weeks between the employers and the men, the request of the latter for a nine hour day being refused. Some 98 compositors in the employ of the different printing establishments in Quebec city received an increase on January 18, of \$1.50 per week, and snow shovellers in the employ of the Canadian Pacific Railway in the same city, numbering from 40 to 50; were advanced at the beginning of the year from \$1 to \$1.25 per day of 10 hours. Other increases were those paid

200 snow shovellers in the employ of the Ottawa Electric Street Railway Company who were advanced from \$1.15 to \$1.25 per day of 10 hours on January 20. Some 35 teamsters in the employ of the same company were also increased on the same date from 18 to 20 cents a load. Among the decreases of the month may be noticed a 10 per cent reduction in the Chemainus mills, B.C., operated by the Victoria Lumber Company, the result, it is stated, of the disbandment of the Pacific Coast Lumber Association and the surplus of manufactured stock on hand. Reductions of 10 cents per day to 50 employees of the Buck Stove Co., and 125 employees of the Massey-Harris Company at Brantford also went into effect on January 9. Fifty-five iron moulders of the last mentioned company also received reductions ranging from 7 to 26 per cent on the same date. At Toronto, picture frame workers to the number of twenty-three received a material reduction on January 25, and on January 13, in the same city a cut of ten per cent in the wages of tonnage men employed in the rolling mills was announced. In the latter case, however, the mills affected were temporarily closed down at the time of the announcement of the change, and at the end of the month the men had refused to return to work under the new schedule. Fork-makers at St. Catharines, ten in number, were reduced 2 per cent in wages on January 2, and polishers employed in the same establishment 5 per cent. A cut of 20 per cent in the wages of floor carpenters in the same establishment was refused acceptance of, and at the end of the month had not been finally adjusted.

With regard to changes in the hours of labour the difficulty which arose on January 9, out of the proposal of the E. B. Eddy Co., of Hull, Que., to return to an older schedule of hours of paper mill employees involving an increase of seven hours per week, will be found referred to at length under the heading of trade disputes of the month in the present issue. At St. Catharines forty-two annealers were re-

fused the usual half hour allowed on heating day and quit work, the matter being subsequently referred to arbitration. On the other hand, a number of shop employees in the same city received a reduction of half an hour a day in hours, and druggists in St. Thomas, Ont., adopted an early closing rule. At Brandon, Man., a number of boiler makers, fitters, blacksmiths and boiler washers and their respective helpers, aggregating twenty-nine men in all, employed in the C.P.R. shops, received a reduction of five hours per week at the beginning of the year with a corresponding reduction of wages, owing to the diminution in traffic. At the Grand Trunk car shops in London, the men had their time extended half an hour on Thursdays and Fridays owing to the press of work.

The Snow Blockade in Ontario.

The severest effects of the cold weather and heavy snowstorms of the month were on the transportation industry, especially in western Ontario, where the situation occasioned considerable inconvenience to business men and manufacturers on account of delayed transmission of mails, passenger and freight traffic, and the various losses incidental to delayed or interrupted railway service. The unfavourable conditions were intensified in the closing week of the month, when, in addition to the prevailing cold weather, heavy snowfalls and a widely extended snow blockade on the railways set in. Several instances of hardship and suffering to passengers were reported. The western peninsula of Ontario, as above stated, was the locality where conditions reached their worst in this respect, the municipalities of Wiarton, Kincardine, Palmerston, Listowel, Clinton, Seaford, Stratford, Berlin, Guelph, Galt, Brantford, Tilsonburg, Woodstock, London, St. Thomas and Windsor being particularly affected. A feature which developed during the closing days of the blockade of traffic was a considerable scarcity of coal both for domestic and manufacturing purposes, which in some localities led to the shutting down

of industries or a considerable diminution in the output, especially at Guelph, Galt, Berlin, Brantford, and London. Telegraph wires were also interfered with. The situation was at its worst in the final week of the month, though in the closing days relief had been obtained in some localities, and there was a general expectation of an early improvement in the service. Losses to the railway companies for snow removal and damage to rolling stock, and to shippers for interrupted facilities and losses of cargoes, were heavy, shippers of live stock having been particularly affected.

Industrial and Trade Conditions.

Condition of employment and other features of the month in the several trades and industries of the Dominion, as shown by the February reports of the correspondents of the *Gazette* and by information collected by the department from other sources, may be summarized as follows :—

Agriculture.—Quietness, except in the stock-feeding branch, prevailed throughout the Dominion from seasonal causes, intensified to dullness in many sections by the heavy snowfalls rendering the cutting of cordwood impossible. Important events were the meetings of different associations connected with the industry. Of these, the most noticeable were the meetings of the *Eastern and Western Ontario Dairy-men's Associations*, held at Belleville and St. Thomas respectively, which were largely attended, and at which topics of vital interest to the dairying and cheese-making branches were discussed. The Belleville meeting, representing the 27th annual convention of the Eastern Association, convened on January 6, and extended over the two following days. Papers on the selection and care of the dairy cow, ventilation of stables, cool curing of cheese, preservation and transportation of butter and cheese, and other subjects, were read. The licensing of cheese factories was also favourably commented upon. It was stated

that the cheese product for 1903 would approximate \$28,000,000 in value, while butter and bacon would show values of \$7,000,000 and \$16,000,000 respectively. The system of instruction by groups under the supervision of a chief inspector was reported to have worked very satisfactorily, the 155 factories within the jurisdiction of the association being divided into 22 groups of 25 each. At the St. Thomas convention, which opened on January 12, and concluded on January 14, the leading papers read related to home-making, the ripening of cream and packing of creamery butter, transportation of dairy products, the export dairy trade, experiments in ripening cheese, defects in butter-making, &c. Twenty-six counties and districts, with 246 factories, handling 52,000,000 gallons of milk, and producing 24,000 tons of cheese are comprised within the jurisdiction of this association, which was first organized in 1877. The group system of instruction, as in the eastern half of the province, was well commended. An interesting feature of the St. Thomas meeting was the cheese and butter exhibition. Mr. J. N. Paget, Canboro, was elected president for the ensuing year.

The 22nd annual convention of the *Dairy Association of the Province of Quebec*, which has been in existence for over 20 years, was held at Sherbrooke on January 26 and 27, with alternate English and French sessions. Mr. C. H. Parmelee, M.P., was re-elected president, and Mr. E. Castel, St. Hyacinthe, secretary-treasurer.

The *British Columbia Fruit-Growers' Association* met at New Westminster on January 7. Lack of co-operation among growers, of knowledge as to the benefits of spraying, and of canning and evaporating factories, and of proper transportation facilities were mentioned in the address of the president, who also recommended division of the province into districts, and that orchard meetings under the auspices of the Department of Agriculture should be held for instruction purposes.

A deputation representing the *Dominion Horsebreeders' Association* waited upon the Government on January 8, with the request that a minimum duty of \$25 should be imposed on horses imported into Canada as a means of keeping out scrub stock.

The *Dominion Shorthorn Breeders Association* met in Toronto on January 19. In his inaugural address the president referred to the profit and interest of shorthorn breeding, the development of the trade with the Argentine Republic, the exhibit at the St. Louis World's Fair, and the establishment of abattoirs in Canada, where the offal of the animals slaughtered might be utilized and the beef sent abroad in the chilled form instead of on foot. The annual report represented the financial situation as satisfactory.

The November crop bulletin, issued recently by the Ontario Bureau of Industries, deals prominently with the scarcity and poor quality of farm labour offering. In Manitoba a recent bulletin of the Department of Agriculture and Immigration places the total area prepared for the crop of 1904 at 2,385,505 acres, representing 654,510 acres in excess of the area prepared in 1902 for the past year's crop.

Fishing.—Conditions were generally very dull throughout Canada for seasonal causes. Lobster fishing in Nova Scotia was seriously interfered with by bad weather causing heavy losses in gear as well as diminished catches. The catch of bank cod by the Nova Scotia fleet which usually averages 240 quintals amounted last year to only 135 quintals, a decline of 1.05. A decrease equally great also occurred in the Newfoundland and St. Pierre catch. Prices are accordingly quoted about \$2 per quintal higher than last year, a circumstance which has curtailed the demand in the foreign market.

An expert report to the government during the month was to the effect that Canadian herring were equal in quality to those taken off the Scottish coast, and that equal prices could be obtained for them if better methods of packing were employed.

The Department of Fisheries received official returns of the salmon pack in British Columbia for 1903 showing the smallest grand total in the history of salmon packing since 1892. The total for the whole province, including the Fraser river and northern points is 473,547 cases, made up as follows:—

| | |
|-------------------------|----------------|
| Sock-eye.... | 363,709 cases. |
| Red and white springs.. | 25,433 " |
| Humpbacks.. | 25,735 " |
| Cohoos.... | 53,570 " |

In 1892 the total pack was 228,470 cases, but in that year there were only 11 canneries on the Fraser river and 16 in northern British Columbian waters, whereas there were in operation last year on the Fraser river 35 canneries and in northern British Columbia waters, 25. The pack for the past nine seasons was as follows:—

| | Cases. |
|--------|-----------|
| 1895.. | 566,395 |
| 1896.. | 601,570 |
| 1897.. | 1,015,477 |
| 1898.. | 484,161 |
| 1899.. | 732,473 |
| 1900.. | 585,413 |
| 1901.. | 1,236,156 |
| 1902.. | 625,982 |
| 1903.. | 473,547 |

Lumbering.—The heavy snowfalls of the month seriously interfered with operations in the woods in Ontario, Quebec, and British Columbia, and a diminution in the cut is expected in consequence, special difficulty having been experienced in Ontario in breaking roads for hauling to the skidways. In British Columbia many of the logging camps were temporarily closed down. The Nova Scotia Lumbermen's Association had the question of more favourable freight rates under consideration.

In British Columbia and Western Canada the more interesting developments of the month centred about the operations of the alleged combine of retail timber dealers, and the statement that the C.P.R. Co. would establish saw-mills and offer lumber for sale through its agents unless the high prices at present asked by dealers were reduced to a level that would not offer so serious an opposition to settlement and immigration.

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

| City and District of Correspondent. | Agricultural Operations. | Fishing. | Lumbering (including Saw-milling). | Mining. | Manufacturing. | Railway Construction. | Building Trades. |

Mining.—Active conditions continued in the collieries, though a fire which broke out in the Joggins Mines on January 12, necessitated the flooding of the mine and the complete cessation of operations, throwing a large number of men out of work for some weeks.

The following comparative table of coal shipments in 1902 and 1903 will illustrate the active conditions which prevailed in the coal industry in Nova Scotia during the year just passed :—

| Name.* | 1902. | 1903. |
|-------------------------------|-----------|-----------|
| | Tons. | Tons. |
| Dominion Coal Co. | 2,939,991 | 2,802,134 |
| N.S.S. & C.C., including M.M. | 268,704 | 451,993 |
| Cumb. Ry. & C.C. | 435,791 | 435,716 |
| Acadia Coal Co. | 278,838 | 337,213 |
| Intercolonial Coal Co. | 200,581 | 232,056 |
| Inverness Coal Co. | 67,399 | 165,738 |
| Port Hood Coal Co. | 39,007 | 77,940 |
| Gowrie & B.H. | 18,700 | 23,330 |
| Maritime Mining Co. | 1,700 | 19,700 |
| Sydney Coal Co. | 9,290 | 12,909 |
| Joggins Mine, Appr. | 50,000 | 50,000 |
| Minudie Mine, Appr. | 15,000 | 20,000 |
| Cape Breton Coal Co. | 10,000 | 10,000 |
| Other collieries. | 10,000 | 12,000 |
| Totals. | 4,345,000 | 4,650,000 |
| Increase, 1903. | | 305,000 |

The rebate of duty on coal allowed for one year by the Dominion government on January 15, 1903, expired during this month. A similar rebate allowed by the United States government also expired during January.

A meeting of the *Nova Scotia Mining Society* was opened at Halifax on January 20. The subject of deep mining and government aid thereto was discussed at considerable length in connection with a report relating to this question recently printed by order of the Nova Scotia Legislature. A resolution was passed asking the government to grant assistance in the deep mining process from the surface instead of from 500 feet below the surface, as allowed by the former Act. A resolution was also passed against Sunday

legislation, and papers read on submarine mining, hot treatment of steel for castings, technical education and other subjects, the society advocating the policy of a commission to investigate the question of technical education. Mr. C. H. Dimock, Windsor, was elected president and Mr. H. M. Wylde, Halifax, secretary for 1904.

Returns of British Columbia mineral and coal production during 1903 show a satisfactory year, both in respect of tonnage and values, the increase, however, being almost entirely attributable to the development of the copper gold mines on the coast, to the Boundary and Rossland districts, and to the excellent showing made by the Crow's Nest Pass Coal Co. in East Kootenay, whereas the Vancouver Island collieries, owing to prolonged labour troubles show a decrease in output. A falling-off is also noticeable in silver and lead production, and the placer gold production is less than in 1902. Zinc ore was, for the first time, mined in 1903, on anything like a considerable scale. According to a bulletin issued by the Bureau of Information for British Columbia the output of the metalliferous mines of the province during 1903 was 1,276,000 tons. The coal mined amounted to 168,000 tons. The total value of the mining output is placed at \$19,200,000, or nearly \$2,000,000 increase over 1902.

New strikes of gold were reported from Dawson as having been made at the White River early in the month.

An increase in the railway rates on lead ores is being opposed by the mining association of British Columbia, the C.P.R. having previously to the granting of the bounty, announced that no increase would be made at the smelters. The increase in freight rates is held to produce practically the same result as an increase in smelting charges.

Drilling for oil was reported as in progress in many parts of Canada, especially in New Brunswick, western Ontario and the North-west Territories. A meeting of

independent oil refiners and owners of oil wells from western Ontario was held in Toronto to discuss opposition to the operations of the Standard Oil Company in Canada.

Manufacturing.—General activity has been the rule, with only local instances to the contrary. The effect of the snow blockade on the industry in western Ontario has been already noted.

Regulations for the payment of a bounty on articles manufactured from steel were approved by Order in Council during the month on the basis authorized by the Act passed at the 1903 session of the Dominion Parliament. The regulations provide that the manufacturer must furnish satisfactory evidence to the hon. Minister of Trade and Commerce that the articles have been produced in Canada and sold to Canadian consumers. The manufacturer will have to take an oath before a Collector of Customs or Justice of the peace as regards the production and sale, and a certificate confirming the claims for bounty will have to be procured from the purchaser. The manufacture of the articles subject to the bounty is to be under the supervision of such an officer as may be appointed or detailed by the hon. the Minister of Customs, while the books of the company or individual claiming bounty are to be subject to inspection by an officer authorized by the hon. Minister of Trade and Commerce. The claim for bounty under the provisions of the Act must be made within four months after delivery of the articles for use or consumption in Canada. Notice must also be given of the intention to claim bounty before the manufacture of the articles specified has been begun, the name of the company, its responsible officers, place of manufacture, expected output, &c., being included on certain forms to be supplied by the department. The regulations governing the granting of a bounty of \$7.50 per ton on binder twine, also authorized by legislation of the recent session of Parliament,

was announced to be under the consideration of the government during the month.

Transportation.—Apart from the conditions in the transportation industry in Canada, already referred to, the following features of the month may be referred to :

The total number of passengers carried by the Intercolonial Railway for the half year ended December 31, 1903, was 1,307,291, compared with 1,253,797 for the same period last year, an increase of 43,494. Passenger earnings were \$1,163,788, an increase of \$32,097 though freight earnings were \$2,075,900, an increase of \$19,197. Total earned, \$3,388,219, an increase of \$105,234.

Railway earnings during the opening weeks of the present year showed a general decrease on last year's returns.

The organization of the Railway Commission was announced during January to comprise Hon. A. G. Blair, chairman, Hon. M. E. Bernier and Professor James Mills.

The vacancy on the Temiscamingue and Northern Ontario Railway Commission, caused by the resignation of Mr. A. E. Ames, chairman, was filled by the appointment of Mr. Robert Jaffray, Toronto.

Heavy purchases of rails by the Grand Trunk Railway and the Canadian Pacific Railway Companies were reported during the month. 15,000 tons of English rails were bought by the former company, 40,600 United States rails by the latter company, and the Canadian Northern also purchased 25,000 tons of United States rails.

The Toronto Street Railway Company held its annual meeting on January 20. The gross earnings for the year were \$2,172,087.85, an increase of \$337,179.48 over last year. The net earnings showed an increase of 18.5 per cent. There was expended for general purposes, being a charge on capital account, \$375,615.48 during the year. The city of Toronto received from the company, under the terms of the franchise, \$298,839, as compared with \$255,551.07 last year.

The Shawinigan Water and Power Company has completed the installment of a transmission line for the delivery of power at Sorel, Que.

Grain carried from Fort William, season 1903, to Canadian ports : Owen Sound, 2,606,278 bushels ; Goderich, 1,627,640 ; Kingston, 3,097,379 ; Midland, 3,713,738 ; Meaford, 2,601,415 ; Depot Harbour, 2,729,141 ; Montreal (direct), 1,008,634 ; Sarnia, 749,786 ; Collingwood, 397,000 ; total, 18,531,501 bushels.

Conditions in the trades.—The building trades, with the exception of plumbers and gasfitters, were generally dull as a result of the severe weather, outside work having been rendered wholly impossible in almost every locality. The metal trades were generally well employed, though a slight diminution on the last month is noticeable. Woodworking branches continue, on the whole, active. In the printing and clothing trades conditions vary considerably according to locality ; on the whole, fair conditions prevail. Food and tobacco preparation has been generally busy, and in the miscellaneous branches active conditions are generally reported. Unskilled labour, as already noted, had an exceptionally busy month, considering the time of the year, owing to the heavy snowfall and the favourable conditions attending the ice harvest.

Canadian Revenue and Expenditure.

The revenue of the Dominion during December, according to the monthly statement of the Department of Finance, amounted to \$5,769,558.50, or a total of \$34,936,462.27 for the first six months of the current fiscal year. The total for the month shows an increase of over \$430,000 over November, and of over \$400,000 over December, 1902.

The total expenditure for December was \$5,522,893.04, as against \$3,393,795.94 in December, 1902. For the six months the total expenditure was \$20,714,195.80, as against \$19,549,688.99 a year ago.

The sum of \$1,381,308.53 was expended on capital account during the month, the chief items of which were as follows :—

| | |
|---|--------------|
| Expended on public works, railways and canals.. . . . | \$880,862.28 |
| On railway subsidies.. . . . | 270,070.00 |
| In bounties on iron and steel.. . . . | 103,143.49 |
| On Dominion lands.. . . . | 75,892.21 |

There was collected in excise duties during the fiscal year ended June 30, 1903, the sum of \$12,190,123, an increase of \$932,638 on the previous year, and setting a new record in Inland Revenue tax collections.

As a typical example of the growth in customs receipts during 1903 it may be stated that collections on imports at the port of Montreal for the calendar year amounted to \$12,545,826, an increase of \$1,561,449 over 1902. All the months of 1903 showed higher returns than those of 1902, June showing the largest increase, namely, \$225,539. Collections for December showed an increase of \$82,923.17. Inland Revenue returns at Montreal for the first six months of the fiscal year amounted to \$2,233,055, an increase of \$154,756 over the same period of 1902.

Provincial Revenues and Expenditures.

For the year ended September 30 last, the revenue of *Nova Scotia* as received from all sources amounted to \$1,243,581, being \$103,800 in excess of the estimate. Royalties from mines and minerals amounted to \$619,234. The expenditure totalled \$1,177,330; the surplus is accordingly \$66,250. Total expenditure on capital account was \$999,161 of which \$823,983 went to assisting railways. The miners' relief society received an increase of \$10,173.

A preliminary statement prepared for the *Ontario* legislature shows that the total receipts by the province during the year were \$5,469,298, with expenditure totalling \$4,890,982, leaving a surplus for the year's transactions of \$578,316. The total surplus of assets over liabilities of the province at the present time is estimated in the neighbourhood of \$3,500,000.

Estimates of receipts and expenditures for the year ending June 30, 1905, went before the Legislative Assembly of *British Columbia* during the month, the former totalling \$2,522,076.66, and the latter not to exceed \$2,442,354.31. For the year ended June 30, 1903, the receipts were \$2,044,630 and expenditures \$3,555,450.93.

The *Manitoba* estimates as brought down by the Honourable the Premier on January 25, shows a proposed expenditure of

\$1,614,159.55. The estimated revenue is placed at \$1,524,315.86.

Foreign Trade Returns.

As will be seen from the accompanying tables the trade of the Dominion for the first half of the fiscal year shows an increase of \$18,937,442 over the same period of last year. Exports, it will be noticed, have remained about stationary, the increase being reported under the heading of imports.

IMPORTS.

| | MONTH OF DECEMBER. | | SIX MONTHS ENDING DECEMBER. | |
|------------------------|--------------------|------------|-----------------------------|-------------|
| | 1902. | 1903. | 1902. | 1903. |

| Grand total exports..... | 23,777,971 | 552,726 | 17,595,441 | 998,387 | 125,391,406 | 7,681,275 | 122,083,957 | 10,198,523 |

In explanation of the falling off of \$6,000,000 in exports of domestic produce for the month of December the Customs Department has stated that in December, 1902, exporters in Montreal were required to make a return of all arrears of entries for their shipments, which they had previously been in the habit of making at their convenience during the ensuing winter. The result was that for the month of December, 1902, the exports were unduly swelled, a large portion of the return representing exports made during the season of navigation.

The customs returns show that there was a decline of about 40 per cent in the value of goods imported from Germany during the three months ending December 31, owing to the surtax imposed by Canada. The total for the period was \$1,356,034.

The growth of cheese exports from Montreal is illustrated by the following statistics :—

| Year. | Boxes |
|----------------|-----------|
| 1878.. | 467,676 |
| 1883.. | 859,812 |
| 1890.. | 1,486,220 |
| 1894.. | 1,726,053 |
| 1898.. | 1,888,875 |
| 1900.. | 2,077,482 |
| 1901.. | 1,791,613 |
| 1902.. | 2,109,171 |
| 1903.. | 2,395,932 |

At an average of 75 pounds per box the total for last year amounted to 180,000,000, representing an estimated return to Canadian dairymen and farmers of over \$20,000,000, which by taking into account the value of cheese held over in cold storage, is increased to nearly \$25,000,000.

Imperial Trade.

Imports into Great Britain from Canada for the month of December, 1903, ac-

cording to returns of the British Board of Trade were as follows :—

| | Nos. | Value. |
|--------------------------|---------|----------|
| Cattle..... head | 9,275 | £156,141 |
| Sheep and lambs..... " | 11,400 | 17,107 |
| Wheat..... cwts. | 833,700 | 287,445 |
| Wheat meal and flour.. " | 232,700 | 113,045 |
| Pease..... " | 47,170 | 16,756 |
| Bacon..... " | 46,129 | 105,514 |
| Hams..... " | 7,116 | 18,562 |
| Butter..... " | 3,727 | 18,435 |
| Cheese..... " | 107,537 | 276,533 |
| Eggs..... great hund. | 110,645 | 45,346 |
| Horses..... " | 12 | 600 |

Imports from Canada into Great Britain for the year 1903, on the same authority, were as follows :—

| | Nos. | Value. |
|---------------------------|------------|------------|
| Cattle..... head | 190,815 | £3,315,776 |
| Sheep and lambs..... " | 88,291 | 129,045 |
| Wheat..... cwts. | 10,803,941 | 3,737,957 |
| Wheat, meal and flour.. " | 2,637,595 | 1,255,241 |
| Pease..... " | 212,163 | 81,814 |
| Bacon..... " | 665,249 | 1,691,687 |
| Hams..... " | 197,497 | 524,542 |
| Butter..... " | 185,464 | 800,242 |
| Cheese..... " | 1,848,152 | 4,823,090 |
| Eggs..... great hund. | 557,080 | 218,571 |
| Horses..... " | 421 | 14,640 |

There was considerable discussion during the month as to the prospects of increased trade between Canada and New Zealand in view of the preferential trade policy to be inaugurated by the latter colony.

The Canadian commercial agent for Trinidad and Tobago reported that the quarter year ended October 31 was one of rapid growth in the Canadian boot and shoe trade, that in the West Indies Canadian breadstuffs have shown a steady growth, and that butter and cheese have again showed progress. The Canadian trade in breadstuffs in the Pacific Islands was also reported by the Canadian commercial agent for New South Wales and New Zealand as having a satisfactory outlook.

Domestic Trade.

Remittances from the retail holiday trade were satisfactory, and though a general reaction from the activity of the closing weeks of the year was evident, prospects for the spring trade in wholesale circles were pronounced favourable. The cold weather and heavy snowfalls affected retail trade injuriously in the closing weeks of the month. A few business embarrassments had disquieting effects in the maritime provinces, but last year's collections were satisfactory. Towards the end of the month spring goods were moving out briskly all over Canada. In western Canada the stocking of new stores to meet expanding trade demands was a feature of the month. In British Columbia the outlook for the coming year was brighter than for some years past, after the close of an exceptionally busy holiday trade.

Complete returns of insolvencies during 1903 in Canada show that failures were fewer in number than in 1902 and in 1901, and with an aggregate of defaulted indebtedness the smallest in any year of the past decade. The total was 978 failures, with \$7,552,724 liabilities, as against 1,101 failures last year, with liabilities amounting to \$10,934,777. Manufacturing failures numbered 227, with a defaulted indebtedness of \$3,043,248, trade insolvencies totalling 725 with an indebtedness of \$4,243,543. The figures for 1902 were as follows:—Manufacturing failures, 209 for \$4,247,723; trading failures, 847 for \$6,221,017.

During the first four months of the fiscal year Canadian goods to the value of \$2,800,000 were received in the Yukon district, as against \$956,124 of foreign goods.

Annual Bank Reports.

In connection with the domestic trade situation reference may be made to the annual statements of a number of the leading Canadian banks, which were issued to the public during the month just passed,

and which may be briefly summarized as follows:—

Bank of Nova Scotia.—The 72nd annual report shows steady progress. Following the development of the North-west Territories, the bank has opened many branches there. The net profit was \$411,613.07, amounting on capital alone to over 20 per cent return, and enabling \$100,000 to be added to the reserve fund after paying dividends of 10 per cent.

Bank of New Brunswick.—A net profit of \$91,389.25 on a capital of \$500,000 was declared, enabling \$25,000 to be transferred to the rest account after paying dividends of 12 per cent per annum.

Bank of Toronto.—The past year was reported one of increased activity. Five thousand shares, representing \$500,000 capital of new stock, was allotted among the stockholders, of which 4,780 shares were subscribed. Eight new branches were opened during the year. The net profits amounted to \$424,236, of which \$100,000 was transferred to rest account after payment of a 5 per cent dividend.

The Canadian Bank of Commerce.—The 37th annual meeting was held on January 12, 1904, when a net profit of \$1,004,217.31 was declared, added to which was a surplus derived from the assets of the Halifax Banking Company, amounting to \$293,028.38; \$500,000 was transferred to rest account, eleven new branches were opened, not including the assumption of offices of the Halifax Banking Company. In the address of the president it was stated that over 150 new offices of Canadian banks had been created during the year, bringing the total of banking establishments to 1,020, as compared with about 700 in 1900. The year, it was further stated, had been unusually free from losses, notwithstanding that it had been a period almost unparalleled in shrinkage in the quotation values of almost all securities. In the general manager's report two factors were said to be at work towards causing financial

stringency, the conversion of money into fixed capital and the increased cost of producing manufactured goods. It was further stated that 'although the returns from all kinds of agricultural and free pastures are not quite as good as usual, we have results sufficiently good to warrant the belief that bad times are not yet upon us.'

Royal Bank of Canada.—The bank increased its paid-up capital during the 12 months to \$3,000,000, and the reserve fund, with the recent addition of \$500,000, now stands at the same figure. The net profits of the year amounted to \$373,252, out of which two dividends of 4 per cent each were paid. The note circulation of the bank rose from \$1,920,713 to \$2,303,518, while deposits increased from \$13,929,120 to \$16,087,446.

The Dominion Bank.—The thirty-third annual general meeting, held at Toronto on January 27, showed a profit for the eight months ended December 31 of \$321,073.86, out of which \$16,135 was transferred to the reserve fund, which now amounts to \$3,000,000, being equal to the total paid-up capital stock. New branches of the bank were opened at Fort William and St. Thomas, Ont., during the past eight months. The bank's assets are estimated at \$35,745,918.35.

By way of further illustrating the expansion in banking during 1903, especially in western Canada, the following list of new branches opened in that section of the Dominion, constituting about 33 per cent of the total number of new branches established during the year, may be quoted:—

BANK OF BRITISH NORTH AMERICA: Res- ton, Man.; Battleford, Calgary, Duck Lake, Estevan, Rosthern, Yorkton, N.W.T.

MERCHANTS: Arden, Man.; Olds, Alberta.

COMMERCE: Portage la Prairie, North Win- nipeg, Regina, Assa., Elkhorn, Man.; Estevan, B.C., Red Deer, Alta.; Prince Albert, Sask.; Innisfail, Alta.

BANK OF MONTREAL: Edmonton, Alta.; Indian Head, Assa.; Brandon and Gretna, Man.

UNION: Carlyle, Didsbury, Innisfail, Lums- den, Qu'Appelle, Saskatoon and Weyburn, N. W.T., Baldur, Rapid City, Man.

HAMILTON: Melfort, N.W.T.

ROYAL: Chilliwack, B.C.

NOVA SCOTIA: Edmonton, Strathcona, We- taskiwin, Calgary and Fort Saskatchewan, N. W.T.

OTTAWA: Regina, Assa.

IMPERIAL: Winnipeg, Man.

It may be added that the bank clearings in ten of the leading centres of the Do- minion during 1903 showed an increase of upwards of \$140,000,000 over the figures of the previous year, a showing which is accepted as especially satisfactory in view of the fact that the value of the stock mar- ket transactions decreased in the vicinity of 40 per cent during 1903. Of the ten leading cities of the Dominion, Toronto is the only one showing a decrease in this connection. Winnipeg, on the other hand, showed an advance of upwards of \$57,000,- 000.

Meetings of Associations, &c.

The *Commercial Travellers' Mutual Benefit Society* held its 23rd annual meet- ing in Toronto on January 23. The so- ciety has now 1,433 members, representing an insurance of \$1,480,000, with assets amounting to \$48,646.09, an increase for the year of \$10,053.

The annual convention of the *Ontario Association of Architects* was held in To- ronto beginning on January 12. The pre- sident, in his opening address, referred to the labour question as one which in its present unsettled state was of vital con- cern to the interests of the province. Dur- ing the past year it was stated that almost every branch of the trades with which the architect came into contact was severely disturbed. The labour legislation of New Zealand and New South Wales was favour- ably commented upon as having created an atmosphere of confidence between workers and the employers.

Technical Education in Ontario.

As illustrating conditions in the move- ment for technical education in the schools of Ontario, the following list is given of school boards which have installed either manual training or household science:—

Manual training.—Kingston Board of Education; Brantford Technical School Board; Stratford Collegiate Institute Board; Renfrew Board of Education; Woodstock Collegiate Institute Board; Cobourg Collegiate Institute Board; Essex High School Board; Berlin High School Board; Brockville Public School Board; Ryerson Public School, Toronto; Givens Street Public School, Toronto; Wellesley street Public School, Toronto; Dufferin street Public School, Toronto; George street School, Ottawa; Creighton street school, Ottawa; Elgin street School, Ottawa; Wellington street School, Ottawa; Slater street school, Ottawa; Guelph Public School Board; Toronto Normal and Model schools; Ottawa Normal and Model schools; London Normal school.

Household Science.—Ontario Normal College, Hamilton; Brantford Y.W.C.A.; Stratford Public School Board; Renfrew Board of Education; Toronto Technical School; Lillian Massey School of Household Science; Toronto Y.W.C.A. Guild; London Collegiate Institute Board; Berlin High School Board; Toronto Normal and Model Schools; Ottawa Normal and Model Schools; London Normal School.

Notes of the Month.

It was announced that the *improved mail service* between Canada and Great Britain to be carried out by the Allan Line will be commenced in August next.

The aggregate *fire loss* in Canada and the United States in 1903 was \$156,195,700, as compared with \$149,260,850 for the previous year.

The arrival of a cargo of Canadian *pig iron* from Cape Breton at Glasgow, Scotland, was the subject of interest recently, this being the first shipment of the kind in about two years.

The commission recently appointed by the Dominion government to investigate the *smelting of iron ores by electricity* in Europe has been instructed to examine and

report also upon the plants for the manufacture of pressed peat for use as a fuel.

It was stated that tenders would be called at several points for canal excavations in connection with an extensive *irrigation* project of the C.P.R., in the neighbourhood of Calgary, N.W.T. For the present the reclamation of 300,000 acres will be attempted, though the works may be ultimately extended. Two canals will be used to irrigate the tract, the main canal 35 miles long carrying 10 feet depth of water, and a secondary canal of 115 miles in length. Active operations are promised for the spring.

The Pigeon River Lumber Company's large *saw-mills* resumed operations at Port Arthur, Ont., on January 2, after a shut down of two months owing to lack of logs. Some two hundred and fifty mill hands were given employment.

The new mill of the *Canada Corundum Company*, Craigmont, Ont., which will go into operation shortly, will be larger than any other ore concentrating mill in Canada, having a daily capacity of 600 tons and an output of grain corundum which will be worth between \$2,000 and \$3,000. The company has employed about 250 men all summer.

Returns for the past year show that the 55 licensed *pilots* operating between Montreal and Quebec earned on an average about \$1,500 and that the largest stipend amounted to \$2,047. Seven of the pilots in active service are upwards of 60 years old, fifteen are between 50 and 60 and nineteen between 45 and 50, the youngest being 24 years of age.

The question of the establishment of a *National Law Bureau* and Defence Fund will shortly be taken into consideration by the Trades and Labour Congress of Canada.

A deputation waited upon the Honourable the Premier of Ontario, on January 27, and presented certain *resolutions* passed at the annual convention of the Trades

and Labour Congress of Canada. The deputation asked that stationary engineers in charge of engines of over twenty-five horse-power should be compelled to have a provincial certificate. It was requested also that all new open street cars should be in future constructed with an aisle down the centre, that legislation limiting the issue of stock by industrial corporations should be enacted, and that additional factory inspectors should be appointed. The premier stated that the increasing of the number of factory inspectors would be dealt with at the present session of the legislature. The establishment of a government printing bureau, which had also been requested by the deputation, he thought could not be granted at present. Other topics touched upon were the protection of trade unions and the provisions of the Immigration Act. A resolution of confidence in the secretary of the provincial labour bureau was also presented.

On January 1 a temporary agreement providing for the *amalgamation* of the two central carpenters' organizations, the United Brotherhood of Carpenters and Joiners and the Amalgamated Society of Carpenters, went into effect for one year, at the end of which period if found satisfactory a permanent amalgamation will be effected. The terms of the agreement provide that any member of the Amalgamated Society having a travelling card shall, on coming into a new district, deposit it with the nearest local within three days after securing work. Wherever there is a branch of the Amalgamated Society and a local of the Brotherhood there shall be a joint district council, and each member shall pay not less than five cents, nor more than twenty-five cents per month to the district. In the districts where there are no branches of the Amalgamated Society every member shall pay twenty-five cents per month to the nearest local for a work-card. The agreement also provided that each organization should place in the bank named by the umpire the sum of \$25,000 to pledge the carrying out of the temporary amalgamation.

Among the subjects mentioned in the Speech from the Throne on the opening of the *Ontario Legislature* on January 14, as open to discussion by the members were municipal assessment, sales of timber limits, new mineral discoveries, the deficiency of farm labour, opening up of new districts to settlement, and others. The prosperity of *Manitoba*, the reduction of railway freight rates and certain proposed legislation were the leading topics referred to in the Speech from the Throne at the opening of the Legislative Assembly of Manitoba on January 7.

A delegation of the *Provincial Workmen's Association* of Nova Scotia, representing the coal miners of the province, who aggregate about 12,000 men, waited on the provincial government on January 27 and asked for the enactment of a law making eight hours the legal limit of a working day for a miner, reckoning the period from surface to surface, which, in the case of the deeper mines, would mean $6\frac{1}{2}$ hours actual mining. They also asked that the legal working day for mechanics in Nova Scotia, either in mines or out of them, be nine hours per day. Representatives of the coal management replied that the coal demanded by the trade could not be raised with so short a shift, and that a nine-hour day law would be *ultra vires* of the provincial legislature. The men also asked for a compulsory weekly instead of a fortnightly pay system, which the operators refused because of the additional office staff which it would involve. Copper tamping bars, instead of the iron ones now in use, were also requested.

The question of *municipal ownership* was brought before the attention of the public in a number of localities in Ontario at the time of the municipal elections for 1904. At Ingersoll the proposal to purchase the gas and electric plants was defeated; the town of Peterborough, however, approved of assuming control over its street railway system, and Waterloo and Belleville similarly approved of the principle of municipi-

pal ownership. There were a considerable number of by-laws passed voting bonuses to various manufacturing establishments.

The Toronto Employers' Association has agreed upon certain articles of *apprenticeship* under which in future its members will bind apprentices for a term of years. The term will not exceed five years, and may be less at the option of the firm that is binding. The binding will be done by the parents of the apprentice interested. The forfeit clause in the indenture for desertion names the sum of \$25 as being the forfeit if the apprentice has been in the employment of the company for one

year or less, the amount being increased by \$25 for each additional year of the apprentice's service up to \$125 when the employee has been over four years or less than five years. The same sum to be forfeited if the apprentice is dismissed for divulging secrets or failing to perform good work, or for not readily obeying the lawful commands of the company. The employee, also, must not become a member of any society which claims to control his labour. The sum of \$25 per year may be retained by the company as indemnity against loss or trouble. On the other hand, the company agrees to pay a bonus for faithful service.

II. REPORTS OF LOCAL CORRESPONDENTS.

During the month of January, Mr. Wm. J. Johnston, of Peterborough, Ont., was appointed correspondent of the *Gazette* for Peterborough and district.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was practically unchanged from December; if any thing it is duller. The Dominion Steel Co. at the beginning of January closed down five open hearth furnaces, partly because it was overtaxed with steel, and partly because some of the men were required on construction and other work. Nearly all the men, numbering about 300, obtained employment, but at a lower rate per day, according to the class of work they were put to do. Later the furnaces were reopened.

The wholesale and retail business is still dull in Sydney, but brisk around the colliery districts, and fairly good at North Sydney.

A movement looking to the erection of a municipal gas plant to cost in the neigh-

bourhood of \$75,000 was instituted by the city council.

The city assessment of Sydney for 1904 is \$5,516,600, over one million dollars less than last year.

A strike of a week's duration occurred at Chignecto mine, Maccan, Cumberland Co. The miners, members of Provincial Workmen's Association, asked the manager to send them sharp picks into the mine, as the slippery nature and slope of the ground around the mine made it extremely dangerous for the men to carry them with them. The management refused to grant the request of the men, and at the end of seven days after the notice was served, which notice stated that the men, after its expiration, would not carry the picks into the mine, the men ceased work. Finally the company agreed to put the picks under ground, and the men returned to work.

CONDITION OF LOCAL INDUSTRIES.

Coal mining has been perceptibly duller because of the very frosty weather. The harbour seam which forms one part of No. 2 Colliery, the largest colliery by far in Canada, has been almost stopped. The reason stated is the want of banking room,

the Dominion Coal Co. wishing to avoid the mixing of the 'harbour coal' with the 'phalen coal,' as each seam is suited to its own particular market. The Joggins mine, Cumberland, caught fire on January 17 from a miner's open light which set fire to a brattice cloth. It being Sunday, the fire gained so much headway before the pumpmen could get out of the mine to secure help, that it was found necessary to seal the burning district, that is, to first cut off the air, and afterwards flood it. As the fire broke out 70 feet from the bottom of the slope, and had only travelled upwards about the same distance, the area to be flooded is not large. The accident will cause the men to be idle for some weeks, after which, assuming that there be no further accidents, the flooded section will be unwatered and repaired, and work resumed.

Transportation by rail is very brisk, coal forming the larger portion of the commodities transported.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are not well employed. Carpenters and joiners are fairly busy. Plumbers have steady employment. Gas and steamfitters are fairly active. Builders' labourers are not so busy as last month.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers are well employed. Coremakers are fairly active. Machinists and engineers are very busy. Steam engineers have steady employment. Metal polishers, buffers, platers and brass workers are very busy. Blacksmiths and horseshoers are fairly active.

Woodworking and furnishing trades.—Woodworkers and patternmakers are fairly well employed.

Printing and allied trades.—Printers are satisfactorily employed.

Transportation.—Railroad conductors, locomotive engineers, firemen, telegraphers,

switchmen, trackmen and trainmen have plenty of work. Freight handlers are very busy. Street railway employees are working steadily.

Unskilled labour.—This kind of labour is not in any great demand, nor is it very plentiful if required.

DISTRICT NOTES.

At noon on New Year's day the first sods for two new shafts, 100 feet apart and each 12 x 24 feet in size, were turned by the mayors of *Stellarton* and *New Glasgow*, in an attempt by the Acadia Coal Co. to recover the Ford pit seam which was abandoned, owing to an explosion, about thirty years ago. It is expected that coal will be raised from the seam in two years time. The old Ford pit employed about 800 men.

On January 11, there was weighed and shipped at *Louisburg Pier* 4,200 tons of round coal and 400 tons of slack coal dumped into the coal pocket, being the record coal shipment in the history of the port.

The assessors of *Glace Bay* have completed the work of valuing the property and taking the census of the town. The present population is shown to be 10,276, an increase of 3,331 over the figures of the Dominion census of 1901. The valuation of property is \$1,675,000, an increase of about \$300,000 during the past year.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been about normal, and while less active than the preceding month, has been fairly up to the standard for the season. Industrial activity has been considerably reduced by the weather, which has practically shut out a large number of those engaged in the building trades; yet plumbers, boilermakers,

moulders and other branches have been most active, and are now enjoying a good season. Commercial activity continues, while the wholesale and retail trades, for which the season is always dull during January and February, are enjoying normal conditions, and anticipate an early and heavy spring trade. The builders' labourers have notified the Master Builders' Association that on and after June 1, 1904, they shall demand an increase in the wage rate from 14 and 15 cents per hour to 18 cents minimum. The market is free of unrest.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fishing industry has been a little below the standard during the past month, cod and haddock being reported very scarce.

Lumbering.—The industry continued to form an active branch of industry in the various lumbering districts of the province, and promises to be most profitable.

Mining.—The government of Nova Scotia has been approached by the P. W. A., representing the coal, iron and steel works of the province, asking for an 8 hours' day for men underground, and a 9 hours' day for surface men. The government gave the delegates a hearing, and notified the managers of the various companies to attend. The P. W. A. had a lengthy list of requests, including making it obligatory for men running engines in all branches and industries to have certificates; also requiring coal companies to use copper tamping bars instead of iron; to have the men paid weekly instead of fortnightly as at present; to regulate the status of men working in iron mines; and to have the pay of doctors collected through the companies' offices.

In gold mining, while no actual work has commenced under the deep gold mining legislation of last year, there is now before the commissioner an offer to sink two shafts to a depth of two thousand feet each. The government has been requested to improve the legislation of last year by

amending the law so as to offer the encouragement from the surface instead of below five hundred feet.

Mining operations in some parts have been considerably hampered by the extreme cold of the present season.

Railroad construction continues to be the means of much employment and much progress is reported.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are dull. Carpenters and joiners find only a little work. Lathers and plasterers are idle. Painters are dull, a little work only being afforded. Plumbers are very busy. Gas and steamfitters are also busy. Stonecutters and builders' labourers are only employed in an odd case.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers, blacksmiths and horseshoers are all busy. Shipwrights are dull.

Woodworking and furnishing trades.—Upholsterers, carriage and wagonmakers and coopers are enjoying normal conditions.

Printing and allied trades.—Printers report a relaxation in work. Pressmen are normally employed.

Miscellaneous.—Railroad and steamboat men are busy. Longshoremen are also busy. Teamsters report work fairly good.

Unskilled labour.—This branch is reported fair.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during January was in many respects similar to that of December, save that the demand was less in the former month. The severity of the weather caused a shutting

down of outdoor building operations, and work was practically restricted to factories. In Charlottetown the extensive alterations to the post office, and at Kensington the finishing of the new station for the Murray Harbour Branch Railway, were among the special contracts that gave employment to the building trades. With the close of navigation, communication with the mainland was left entirely to the winter steamers, and in the latter part of the month the ice boats at the capes were also pressed into service for the carrying of the mails. The transfer of the winter steamers to Georgetown increased the opportunities of the longshoremen and freighthandlers at that port, but had the opposite effect at Charlottetown. January was a quieter month in commercial circles than December, but the retail trade was quickened by 'slaughter sales' among the dry goods houses.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural operations were quiet during the month, being confined to feeding of stock, getting out wood, and in some localities hauling mussel mud. The packing houses handles a large quantity of hogs, alive and dressed.

Fishing.—Eels and smelts were the only fish taken. Large shipments of these, in a frozen state, were sent to the United States.

Railroad construction and employment.—Surveys for branches to the Belfast and Murray Harbour Railway were carried out during the month.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were practically idle, but carpenters and joiners had steady employment at inside work. Lathers and plasterers had a dull month. Plumbers were fairly busy. Gas and steamfitters were fairly well employed. Builders' labourers had a dull month.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, line-

men, and canmakers for lobster factories were busy.

Woodworking and furnishing trades.—Carriage and wagon makers had a quiet month. Car builders were fairly well employed. Coopers were busy.

Printing and allied trades.—Printers and bookbinders were busy.

Clothing trades.—Journeymen tailors, coat and sleeve workers were steadily employed.

Food and tobacco preparation.—Bakers and tobacco workers were busy.

Leather trades.—Saddlers were busy.

Transport.—Railway conductors, locomotive engineers and firemen were busily employed. Freight handlers, at Georgetown, were busy. Teamsters and expressmen were fairly busy.

Unskilled labour.—This class of labour experienced a dull month.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during January continued active, especially along the water front, but the supply has been equal to the demand. The F. B. Dunn Packing Company's new factory in Lancaster, a suburb of St. John, has been completed, and is now in working order. The works compose two buildings, the factory proper (150 x 26 feet, three stories) and the smokehouse (30 x 20 feet, also three stories). The buildings will be lighted by electricity, and the company has built a dam across a stream through its own property, forming a large pond, in order to supply ice for its cold storage apartment. The heavy snow storms have given employment to a large number of men and teams in clearing the streets, the city council paying \$936.42 for that purpose during the two weeks ending January 28. The total amount paid out during the above period for street, water

and sewerage purposes was \$2,647.04. The value of goods shipped by the winter port steamers to January 8 was as follows :— Canadian, \$2,769,910 ; foreign, \$1,786,523, making a grand total of \$4,556,433. To December 31, 1903, the value was \$4,017,276, and at the same time last year it was \$3,012,551, being \$994,725 in favour of the present season. Bank clearings for the four weeks ending January 28, were \$3,551,290, and for the corresponding period last year \$3,341,365 being an increase of \$209,925 in favour of January, 1904, and a decrease of \$412,928, as against December of the past year. Wholesale and retail business is reported to be generally active, considering the extreme cold weather which has prevailed.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fish supply is limited. Smelts have been scarce for some time, being shipped west in large quantities. Cod and haddock retail at 5 cents per lb. ; smelts, 8 to 10 cents ; halibut, 12 to 15 cents per lb. ; mackerel, 15 to 20 cents each ; herring, 18 cents per dozen ; shad, 25 to 30 cents each.

Lumbering.—During 1903 the lumber shipments from St. John were 174,360,562 superficial feet, as compared with 199,858,736 superficial feet in 1902, being 25,498,174 superficial feet less than the latter year. The shipments for the province of New Brunswick during 1903 were 388,361,705 ; during 1902 they were 445,682,162 feet, being 57,321,457 in favour of 1902. The shipments, although less, were more profitable, as better prices were received during the greater part of 1903.

Mining.—Forty-five practical miners arrived in St. John on January 18 ; nine of the number were Englishmen, and went to the mines in Queen's county ; thirty-six were Belgians, and have gone to the Beersville mine in Kent county. They were the last of a party of 100 brought out by the government of New Brunswick.

Railroad construction and employment.—The St. Martins, Hampton Railway is

closed for the winter, and operations will not be resumed until the snow has left the ground. The maintenance of way employees on the Intercolonial Railway have received an increase of pay of 20 cents per day, to date from November 1, 1903.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are dull. Carpenters and joiners are only fairly employed. Painters and decorators find trade good for the season of the year. Plumbers, gas and steamfitters reported work plentiful. Stonecutters and builders' labourers are indifferently employed.

Metal, engineering and shipbuilding trades.—Iron moulders, workers and helpers are only fairly employed. Machinists and engineers find work good. Electrical workers and linemen are well employed. Sheet metal workers are satisfactorily employed. Horseshoers report business dull at present.

Woodworking and furnishing trades.—Woodworkers are busy. Shingle weavers are very dull.

Printing and allied trades.—Printers, pressmen and bookbinders are all well employed.

Clothing trades.—Journeyman tailors are not so well employed as during the month of December.

Food and tobacco preparations.—Bakers and confectioners are busy. Ice cutters and drivers are well employed. Cigar-makers report work fair.

Miscellaneous.—Broom-makers and brushmakers report business good, with a prospect of a rush as spring advances. The bartenders' league report all its members employed.

Transport.—Railway conductors, engineers, firemen, switchmen, trackmen and freight-handlers report work plentiful. Ship labourers are well employed. Street railway employees are busy, the snow blockade making work plentiful. Teamsters

and expressmen are busy, the former hauling snow and ice.

Unskilled labour.—This kind of labour is pretty well employed a great many being employed shovelling snow on the streets.

DISTRICT NOTES.

Campbellton.—Between 30 and 40 new buildings have been erected during the past year, and building operations are still going on.

Coldbrook.—J. M. Logan, of Hampton, is establishing a factory for the manufacture of excelsior.

Fredericton.—There is a probability that an electric railway will be constructed between this city and Woodstock in the near future.

QUEBEC, QUE. AND DISTRICT.

Messrs. Ed. Little and P. J. Jobin, Correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has shown a decided improvement in the labour market over December, the opening of the shoe factories having a marked effect. Ice cutting and snow shovelling have also given considerable employment, the ice being in exceptionally good condition. In the building trades, however, dullness has prevailed as a result of the severe weather, though the plumbing and steamfitting branches were exceptionally busy. The crib-work for the extension of the King's wharf has been started.

The following resolution was adopted at the annual general meeting of the Quebec Board held on the 19th inst.:—

That a special committee of the Board of Trade be named to study the causes and difficulties that arise from time to time between the shippers and the agents of the ocean steamship companies on the one side, and the members of the Ship Labourer's Benevolent Society, the bateaumen and the longshoremen on the other, with power to inquire among the shippers as to the by-laws or rules against which they may have to suggest and the reasons offered for the same;

To lay a report of the same before the Ship Labourers' Society and other interested parties and endeavour to persuade them, through the influence of the Board of Trade or other means

of conciliation, to accept in their own interest and that of the city of Quebec the modifications or amendments suggested.

That this committee be composed of the President, 1st Vice-President, Secretary of the Quebec Board of Trade, and four other members, whom they may add.

The contract between the municipal council of the town of Lévis and Messrs. Dussault & Power, for the construction of the waterworks system was signed on the 15th inst. The contract price is \$287,000, and calls for the completion of the system in three years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The scarcity of water was the subject of complaint among farmers, a large number of wells being dry.

Lumbering.—Operations in the woods remain active, the snow not having impeded operations in the woods to any considerable extent.

CONDITION OF PARTICULAR TRADES.

Building trades.—With the exception of plumbers and steamfitters the month has been a very dull one.

Metal, engineering and shipbuilding trades.—Iron shipbuilders had a dull month. Boilermakers and machinists, however, reported active conditions.

Printing and allied trades.—Printers were not very well employed. On the 18th an increase in wages was granted to take effect immediately. The increase was not for the full amount asked for, but consisted roughly of an increase of about 25 cents per day of 9 hours.

A meeting of the newly organized Master Printer's Association and the Scale Committee of Typographical Union No. 302 took place in the city hall on January 8, and views were interchanged.

The next meeting took place on the 13th, when Mr. William Gilmour, of Montreal, representing Mr. Jas. M. Lynch, president of the International Typographical Union, was present. The Master Printer's Association offered to pay \$1 per week more, without reducing the hours of labour. This

the scale committee refused, but offered to take \$1.50 subject to the consent of the union, the representative of the International remarking that he considered this a fair offer, and the lowest that he could honourably consent to.

On the 15th the parties concerned met again, and the Master Printer's Association accepted the offer of the scale committee. The union endorsed the action of their committee and the scale signed by the presidents of their respective bodies. Some 14 men have been locked out by some of the small job offices, but otherwise Typographical Union No. 302 is in a healthier condition than ever before. The International representative left for his home on the 21st, satisfied with his visit, and receiving the warmest thanks of the members of Typographical Union No. 302.

Clothing trades.—Boot and shoe workers had a fairly good month, as had also tanners and curriers. A few leather cutters who had left the city in December have returned. The arbitrators in the lockout case had not given their award at the end of the month.

Miscellaneous.—Ice cutters and drivers were busy with the ice harvest.

Transport.—Steamboatmen are beginning to fit out, although the movement is not general as yet, only the boats requiring extensive repairs being attended to. Cab drivers and hackmen had dull month. Carters, especially those engaged in the carting of ice and snow were particularly busy.

Unskilled labour had a good month.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, sr., Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of labour in general during the month has been good considering the time of year. The Montreal Pipe Foundry Company is now busy making

large improvements to its local works. It is installing in an iron building erected for that purpose a large furnace which was in use at Lachine until the burning of its shops at that place. It is estimated that 35 tons of iron ore will be smelted daily in this furnace, which will go to feed the foundry where water pipes are manufactured. The small foundry will be fed by the small furnace which has been heretofore in use. Banks report a good month. Wholesale and retail dealers report business good.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The reports so far from the shanties in the St. Maurice territory are very favourable. There are more logs made than last year at this time. There has been enough snow for all purposes so far. The weather last fall was very favourable, and the lumbermen lost no time. The men generally have enjoyed good health, wages are good, and, in fact, everything looks satisfactory. The last report received from the shanties, about January 20, was that there were about 30 inches of snow.

CONDITION OF PARTICULAR TRADES.

Building trades.—There are only a few bricklayers and masons working. There is not much work also for carpenters and joiners. With painters, decorators and paper-hangers work is very quiet. Business has been very brisk with plumbers on account of the very cold weather, which has called into requisition the services of a great number of men to repair and thaw frozen water pipes. Gas and steamfitters are doing well.

Metal and engineering trades.—Electrical workers report quiet conditions. Blacksmiths have work enough. With jewellers and watch case makers business is quiet.

Woodworking and furnishing trades.—The carriage making business has not been very successful during the past season, and

at the present time work is confined chiefly to jobbing and repairs.

Printing and allied trades.—The printing trades are doing well. In addition to the regular dailies, monthly and other periodicals published, many job offices exist, and all report a good business and splendid prices. There is no demand for other workmen.

Clothing trades.—Journeymen tailors are doing well. With garment workers work has been fair. There will likely be a slight falling off for some time. Glove-makers have much work. There is some demand for good hands. Business continues very good with boot and shoe workers.

Food and tobacco preparations. The bakers held a meeting on Monday, January 18, 1904, and have decided to increase the price of the large loaf from 16c. to 18c. Ice cutters and drivers have much work and good wages. Business is fair with cigarmakers.

Leather trades.—Tanners and curriers are all doing well. Conditions are quiet with leather workers and saddlers.

Miscellaneous.—Work is quiet with laundry workers.

Transport.—Cab drivers, hackmen and carters report business quiet.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been in good demand during the month of January, and for the season of the year there are very few idle men. The building trades, especially bricklayers and masons, are practically at a standstill, but all other classes of skilled labour are in good demand, especially in the machine shops, these works being rushed with heavy orders, and good men finding ready employment. The retail trade has been about the average during the month.

The weavers to the number of 98 employed in the Paton mill left work on Monday, January 11, and stayed out until January 21. The effect was to close down the whole works for three days which was a serious loss to the other five hundred and fifty employees.*

The offer made on December 16, by the city council of \$200,000 for the electric light plant and property of the Sherbrooke Heat, Light and Power Company was discussed by the company and accepted with the proviso that the city should also take over the gas property of the company on terms satisfactory to the directors.

CONDITION OF LOCAL INDUSTRIES.

Agriculture is at a standstill, and farmers are still suffering great inconvenience from the scarcity of water. A great many have either to drive or carry water for the stock.

The annual meeting of the Eastern Townships Agricultural Association was held on the 20th, and the annual report showed that last year the annual fair was the largest in attendance and exhibits in the history of the association; there was a sum of \$1,300 to the good. The annual meeting of the Quebec Dairymen's association was held here on January 26 and 27, and much valuable information was imparted to those interested in the butter and cheese industry.

Lumbering operations are very active and the lumbermen expect to be able to get out a large cut.

All branches of *manufacture* are busy. The mills are fully employed and have considerable work ahead. Mr. C. W. Bryant has erected a large sash and door factory just within the city limits, and G. Long will erect a similar establishment in the spring. The Modern Bedstead Factory are looking for larger premises owing to their increasing business.

*A full account of the strike is given in the article of Trades Disputes of the month in the present issue.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are able to do but little work owing to the extreme cold. The cold weather has kept the plumbers very busy, and on several occasions gangs were out all night fixing pipes that were frozen.

Metal, engineering and shipbuilding trades.—Moulders, iron workers and helpers and machinists are very busy, and there is still much overtime put in. Blacksmiths report business very good.

Woodworking and furnishing trades.—The woodworking and furnishing trades are working full time, and while orders are not very heavy a good deal of stock is being made.

Printing and allied trades.—The printing trade reports very good conditions.

Clothing trades.—Journeymen tailors are in demand and the custom tailors report trade as being very good for this time of the year. Garment workers are fully employed.

Food and tobacco preparation.—Bakers and confectioners have had a good month. Ice cutters and drivers are busy getting in the supply of ice.

Unskilled labour.—Unskilled labour has been fully employed, and the corporation has given employment to many in keeping the streets cleared of snow.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been no notable change in the conditions in the labour market during the month of January. Building operations have been very quiet owing to the cold weather, and in consequence many carpenters, bricklayers, masons and day labourers are without employment. When the weather moderates these workmen will have plenty

to do, as there are several buildings to be finished, and several householders who did not build after the fire of May 20 last will commence building in the spring. In some of the trades men seeking employment are more plentiful than those able to obtain work. Iron foundries and boot and shoe factories are the busiest establishments just now. Bankers and wholesale and retail merchants state that business has been fairly active during the month. No changes in rates of wages or hours of employment have occurred. Friendly relations exist between employers and employees, although in certain factories wages are not very high.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing in almost every line has continued to show signs of prosperity, although certain establishments have curtailed their output and have dismissed a number of hands temporarily.

CONDITION OF PARTICULAR TRADES.

Building trades.—In this group of trades the craftsmen have not had much to do during the month, with the exception of plumbers and steam and gasfitters, who have been well employed.

Metal and engineering trades.—Iron moulders and workers have had a very busy month, some of them being obliged to work overtime. Electrical workers report plenty of work. Blacksmiths state work has been steady with them.

Woodworking and furnishing trades.—All classes of woodworkers have been busy.

Printing and allied trades.—Printers and pressmen have put in a satisfactory month.

Clothing trades.—Journeymen tailors and boot and shoe workers have had plenty of work.

Food and tobacco preparation.—Bakers and butchers report good times. Ice cutters and carters have been very busy. Cigarmakers report a slight slackening in

trade during the month. Tanners and carriers have had an abundance of work.

Miscellaneous.—Barbers, clerks and delivery employees have been fully employed. Laundries are very busy.

Transport.—Railway employees of all kinds still continue very well employed.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The heavy snowfall of the month just passed, has been of great benefit to the workmen of this city. Hundreds have been employed at shovelling day after day. Yet it cannot be said that the month was a good one. The lockout at Eddy's, is affecting directly and indirectly some 700 men, and the temporary closing down of J. R. Booth's saw-mills, owing to anchor ice laid off a couple of hundred more. So that about one thousand men who usually have steady employment at this season of the year were idle in the city of Hull alone. Builders are also out of work, as is customary for them between the months of December and March. Many of the paper-makers have left for outside points to work. The strikers held a meeting on Sunday, January 31, and again endorsed their previous decision to hold out for better terms. The International union is now paying the strikers' allowance to the Hull unionists. Said allowance is \$3 per week to bachelors and \$5 to families. The Eddy Co. claims to have four out of their seven machines running, but the unionists deny this. Some 200 pulp-makers, in the chemical pulp mill are thrown out of work on account of paper machines not manufacturing the product of their mill. The lockout has been lasting ever since January 11. It is estimated that the loss of money to the idle men, amounts every week to \$6,000.

CONDITION OF LOCAL INDUSTRIES.

Lumbering in the shanties has been greatly interfered with by the deep snow.

Operations had to be stopped in several places and teams and men came down.

Railroad construction and employment.—The construction of the extension of the C.P.R. to Maniwaki, is now completed and the regular service of trains was commenced in February 1.

CONDITION OF PARTICULAR TRADES.

Manufacturing.—The new wood handle factory is now in full operation in this city, and employs 25 hands. The Matthews pork packing establishment is running its entire capacity and gives work to nearly 150 people. The axe factory, woollen mills, ship yards, as well as the Eddy match and fibre shops are also kept very busy.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour has slackened somewhat during the month of January owing no doubt to the severity of the cold weather and the frequency of snow storms. Although building operations have fallen off very much during the month there is much more work being done than in corresponding periods of former years. Business is quieter since the Christmas and New Year's holidays. The International unions of Montreal, to the number of fifty-three resolved to submit to aldermanic candidates the following programme, and bind themselves to support the candidates accepting such programme :—

1. Substitution of the electoral franchise in the choosing of mayor or aldermen founded on the simple quality of elector to the right to vote on property qualification.
2. Municipal ownership of gas, electric railways, electric light and other public utilities of the same kind.
3. Substitution of the day labour system on works executed by the municipality to the contract system.
4. Reduction of the water rates from 7 per cent to five per cent on rentals.
5. Adoption of a method of collection of water rates in four-quarterly instalments instead of yearly as at present.

6. Imposition of a tax on religious communities doing business in competition with business men generally who are obliged to pay taxes.

7. Imposition of a poll tax of at least \$3 on any stranger coming to work for wages within the limits of the city or its suburbs.

8. Establishment and support by the municipality of a house of refuge for the unfortunates and, in consequence, abolition of the privilege of begging.

9. Affixing of union labels on products bought or manufactured for the municipality.

10. Amendment to the city charter in such a manner as the municipal regulation entitled 'Manual and rules concerning health in the City of Montreal' may be legally applied.

11. In public undertakings the preference of employment to be given to unionist workmen.

12. To fix the tariff of salaries of municipal employees in accordance with the tariff of wages determined by labour organizations.

13. Maintenance and carrying into effect of the regulation prohibiting Sunday labour.

14. Opposition of every project having for its purpose the extension of the privileges of the Montreal Street Railway Company, or other privileges granted to private companies having to do with industries of public utility.

15. Early closing of shops and stores.

Hundreds of men are busily engaged cutting and storing the 200,000 tons of ice that Montreal's hotels, butchers, confectioners and private families consume in a year.

The unusual cold weather during the last 10 days, has had the effect of putting ice two feet thick on the market a week earlier than last year.

The supply of barbers has been generally unequal to the demand throughout the month, especially in view of the epidemic of typhoid which requires the heads of patients to be shaved.

CONDITION OF PARTICULAR TRADES.

Building trades.—Great decrease in activity in these trades owing no doubt to the severe weather and snow, as compared with last month.

Metal and engineering trades.—Not quite so active as in the former month, but on an average very fair. Blacksmiths have been well employed.

Woodworking and furnishing trades.—There is sufficient work in these trades.

Printing and allied trades.—These are fairly active.

Clothing trades.—Members of these crafts report a sufficiency of work.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters report favourable conditions. Ice cutters and drivers are in their busiest season and none are idle.

Miscellaneous.—Barbers, broom-makers, clerks, &c., are fully employed.

Transport.—Street railway employees are very busy.

Unskilled labour.—On account of the abundant snowfall labourers have been very busy during the month.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

January was a somewhat varied month, the abnormal cold and heavy snow storms seriously interfering with business, though proving of great benefit to the labourer out of employment. The heavy snowfall gave an abundance of work to a large number of men who otherwise would have suffered more or less by the extreme cold and the increased cost of living. As it was, there was considerable hardship from the extreme severity of the weather. Several thousand dollars were spent in clearing snow from the streets, and the distribution of this money among those generally unemployed in midwinter was of great benefit. The street railway company had nearly 300 men at work; the city also employed a considerable number, and many were employed by citizens. The street railway company spent fully \$5,000 during the month, and this, with the civic expenditure and that of private individuals, put a large amount of money in circulation, which helped the poorer people to tide over the winter, and in many instance relieved suffering.

The trades and mercantile interests had a fairly active month, but the interference of the cold and storms with transportation facilities had an appreciable effect. The blockade of the country roads had a some-

what serious effect on those dependent on the farm trade.

Certain areas of the Ottawa and Gatineau rivers have been dotted for some days past with men at work gathering in the ice harvest. The unusually cold weather has made the crop an excellent one, ice over two feet thick being on the market more than two weeks earlier than last year. Between sixty and seventy thousand tons are required to supply the consumers in Ottawa, and this large quantity, apart from those who cut their own ice, is handled by seven or eight dealers. The quality of the commodity was never better. There is very little top on the ice cakes. The ice last year was full of air holes, whereas this year it is solid.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Lumbering, like all other industries, felt the effect of the heavy snowfall, and reports from the shanties show that the work of getting out logs was greatly hampered owing to the deep snow.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were naturally quiet, and what building there was suffered delay by the remarkable period of severe weather. The erection of a frame building for the purpose of a fat stock sale and show came to a rather sudden termination owing to the collapsing of the roof. An investigation is to be held by the city council to determine the cause, it being alleged that the construction was faulty. Four men were slightly injured. The plumbers' union elected officers during the month. The union has under consideration a revised wage schedule which may be presented to the employers next month, to go into effect May 1. A number of painters were laid off work at different shops, owing to the scarcity of work. The union installed new officers.

Woodworking and furnishing trades.—Most of the woodworkers were busy, the factories reporting large orders for the outside trade.

Printing and allied trades.—The printing trades were all busy.

Clothing trades.—The tailoring trade suffered the usual midwinter depression.

Food and tobacco preparation.—Ice cutters were busy. This is not a regular class of labour in Ottawa, ordinary labour being employed.

Transport.—Transportation men had a hard battle with wintry conditions; so far as could be learned employment was steady.

BELLEVILLE, ONT., AND DISTRICT.

Mr. W. S. McDiarmid, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during January have compared favourably with previous years, there being very few idle men reported. January has been a better month for labourers than December, as a large number have been employed in getting out the ice harvest. A large staff of men are now employed at the cement works putting in machinery, several carloads having been brought in; the opening of spring will see a much larger force employed. Merchants report a most successful month's business, both wholesale and retail. The annual meeting of the cheese companies has made banking business good, and they report business active and prosperous. There have been no changes in the rates of wages or hours of labour during the month, and no strikes, lockouts or other labour disturbances.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are bringing in a large amount of grain, hay and other produce, the good prices prevailing causing general prosperity among this class. Water is very scarce.

Lumbering.—Many complaints are heard among lumbermen in consequence of the absence of rain, the creeks and swamps being almost dry.

Mining.—There is every indication of a most successful mining season as soon as the snow leaves. Many new mines will be opened and a large number of men employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work among bricklayers and masons is very slack. Carpenters have had a fair month, but not as good as December. Plumbers had a splendid month, the cold weather keeping them all busy at good wages.

Metal, engineering and shipbuilding trades.—The iron moulders are all busy and report having had a good month's work. Machinists and engineers are in good demand and report having plenty of work. A large number of vessels here are being rebuilt and overhauled giving employment to a considerable number of skilled men.

Woodworking and furnishing trades.—The woodworkers report a very busy month, all the factories working full time with their usual season's staff. Carriage and wagon makers are all working, and report a busy month. Wages are good.

Printing and allied trades.—Printers report a splendid month and the demand rather short of the supply. Every printer in town is working full time.

Clothing trades.—Tailors report a busy month.

Food and tobacco preparation.—The ice cutters had a splendid month's work, nearly all the supply being got in. The cigar-makers had a very fair month.

Transport.—The railway engineers and firemen have had a very busy month, in fact all the railway employees report an exceptionally busy month. Cab drivers and draymen had a good month.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

In all branches except the building trades, labour continues to be fully employed. In

most cases, the supply is equal to the demand, which is slightly in excess of the corresponding period last year. The continuous heavy snowfall and very severe frost has made much extra work for the electric and other railroads. Sweepers have been working night and day almost constantly. Trains, however, have been delayed, transportation impeded, and farmers kept from marketing much of the time. The electric road alone has been able to afford almost continuous service. It is stated that the receipts of the Kingston Street Railway Company for the past year were 16½ per cent greater than those of 1902. This refers to the passenger traffic alone. This year the company expects to do a still greater traffic. The contractor states that the nurses' home being erected in connection with the general hospital will not be ready for occupation until about March 18. The extreme cold weather during the month has retarded building operations, and very little work can be done until the weather moderates. At present attempts at carrying on such work is confined to the plastering of interiors, &c.

The Militia Department, it is said, will construct new stables on Bagot street, for the use of 'B' Battery, replacing those destroyed by fire last autumn. Plans have been prepared and local contractors have submitted tenders for the work. During the month the department advertised calling for sealed tenders for the purchase of the partly destroyed buildings. It is said that the Kingston Locomotive Works Company have enough orders on hand to keep the works busy until next October. At present the company is refusing further orders on account of the uncertainty of the steel market. Owing to alleged decrease in profits and the largely increased cost of doing business, the dry goods merchants of Kingston, without exception, have decided to discontinue all discounts formerly allowed their patrons. No changes were reported in the rates of wages or hours of labour during the month.

The members of the Grand Council of the National Association of Marine Engineers, which had been in session here for several days, concluded its business on the 29th inst. A great deal of important legislation was put through. Amendments were made strengthening the constitution, &c., the last business transacted was the election of the officers for the ensuing term. The next meeting of the Grand Council, which embraces delegates from all over the Dominion, will be held at Collingwood, Ont., on the fourth Tuesday in January, 1905.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The work of farmers here now is confined chiefly to bringing in wood, hay, &c. Wood is now selling at from \$5 to \$6.50 per cord. Hay is selling from \$5 to \$7 per ton. Considerable quantities of oats are brought in and sell at from 30 to 35 cents per bushel.

Manufacturing.—This industry is active in all lines.

Mining.—Considerable mining is now carried on, although somewhat retarded by heavy frost.

CONDITION OF PARTICULAR TRADES.

Printing trades.—Printers report good business.

Clothing trades.—The clothing trades report a splendid winter season, and are now offering special inducements to clear out the balance of stock on hand.

Food and tobacco preparation.—Bakers and confectioners report good business. Butchers report business rather slow, but say that it is usual for the month of January.

Miscellaneous.—Barbers, broom-makers, clerks, delivery employees, laundry workers, &c., continue to be well employed.

Transportation.—The transportation business was active.

Unskilled labour.—Unskilled labour has been somewhat slack, but is now busy

shovelling snow, getting in the season's supply of ice, &c.

DISTRICT NOTES.

A disastrous fire occurred during the month at *Clyde Forks*, on the line of Kingston and Pembroke Railway. The fine lumber mill of the Clyde Forks Lumber Company was totally destroyed, together with a carload of pressed hay. The origin of the fire is unknown. As there was not any assistance at hand, the building, which was built less than two years ago, and was complete in every detail, was quickly consumed. The loss, it is said, will total about \$10,000, with but small insurance. The company say that the mill will be rebuilt at the earliest possible time.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnston, Correspondent reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the exception of the several building trades, labour is fairly well employed. From the beginning of 1903 to the end, work was never better, the demand in all departments far exceeding the supply, and the prospects being good for 1904. The building of the concrete dam for the American Cereal Company, and the large building for the manufacture of beet sugar were actively carried on during the past season, but are now suspended until next spring. There is no exceptional activity in any of the trades at present. Railway transportation, however, is very active here, both in exports and imports. Bank clearing in all branches was reported good, and both wholesale and retail trade were good, particularly in the grocery and clothing stores. There have been no changes in the rates of wages or hours of labour, or differences between employer and employees during the month. In nearly all places, excepting some of the large factories, nine hours per day is the rule.

There has never been a serious strike in this town, there have been some small strikes in the past, but they were all settled inside of two or three days.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculture is in first-class condition; the industrial fair, held in September last, was a good proof of this, there being a fine exhibition of the products of the district, vegetable and animal. Farmers from all parts report splendid yields of all kinds of grain, and market prices good. Good markets were reported for the month, though, owing to the severe cold and the roads being blocked by snow, the markets were not so large as they would have been had the conditions been otherwise. The following are a few quotations :

'Hay per ton, \$8 to \$10 ; straw, load, \$3 to 3.50 ; beef, prime, \$5 to \$6 ; pork, \$5 to \$5.50 ; chickens, very scarce, 50 cents to 70 cents a pair ; geese, \$1 to 1.25 ; turkeys, \$1.25 to \$2 ; butter, 22 to 24 cents a lb. ; eggs, very scarce, 25 cents a dozen ; potatoes, per bag, 60 to 65 cents turnips, 25 cents a bag.

Manufacturing.—In all the woodworking and ironworking shops trade is good. The following is a list of the most important manufacturing establishments located in Peterborough :—

No. of Employees.

| | |
|--|------------|
| American cereal works.. . . . | 600 hands. |
| Cordage works.. . . . | 175 " |
| C. G. E.. . . . | 900 " |
| Mathew's Pork Packing Works.. . . . | 125 " |
| McDonald's saw mills, &c.. . . . | 75-100 " |
| Dickson Co., saw mills.. . . . | 100 " |
| Lock Works.. . . . | 115 " |
| Colonial Weaving Co.. . . . | 20 " |
| Otonabee Power and Light Co.. . . . | 10 " |
| Light and Power Co.. . . . | 15 " |
| McAlister Milling Co.. . . . | 20 " |
| W. H. Meldrum Milling Co.. . . . | 10 " |
| The Hydraulic Co.. . . . | 150 " |
| The Central Milling Co.. . . . | 12 " |
| The Auburn Woollen factory.. . . . | 150 " |
| Piano Works.. . . . | 25 " |
| Ackerman's Harness factory.. . . . | 68 " |
| Peterboro Canoe Co.. . . . | 50 " |
| Canadian Canoe Co.. . . . | 8 " |
| Wm. English Canoe Co.. . . . | 12 " |
| Peterboro. Agricultural Mfg. Co.. . . . | 150 " |
| Wm. Hamilton Co., Saw mills, &c.. . . . | 210 " |
| The Ultimotor Co.. . . . | 15 " |
| G. W. Green, Pump and wind mills.. . . . | 30 " |
| The Colonial Ink Co.. . . . | 25 " |
| —and 10 salesmen on the road. | |

Railroad construction and employment.—The building of a spur line from the Grand Trunk Railway into the large cereal works, which is to be connected with a similar line from the Canadian Pacific Railway, is giving the cereal company good facilities from both railways, for the benefit of its business.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are not very well employed at this time of the year. Carpenters and joiners on outside work are indifferently employed, with quite a number of men idle. Lathers and plasterers are quiet just now. A few painters, decorators and paper-hangers keep working, but the majority are idle. Plumbers are very busy just now; the past year has been the best the trade has experienced. Gas and steamfitters have been, and are, busily employed. Builders' labourers are quiet.

Metal, engineering and shipbuilding trades.—Iron moulders are quite busy at present. Iron workers and helpers are fairly well employed. Coremakers find work brisk, with a demand for good men. There is not much demand for machinists and engineers. Electrical workers are active, and there exists a demand for first-class men. Linemen are quite busy erecting poles and wires. Blacksmiths and horseshoers are busy. Bicycle workers find trade dull. Jewellers are doing a good steady trade.

Woodworking and furnishing trades.—All inside woodworkers fairly busy. Upholsterers find trade fair. Varnishers and polishers' trade is good in some shops. Carriage and wagon makers are all doing a very brisk trade. Pattern-makers are busy. Coopers have one shop here, which is very busy. Gilders are not much in demand here.

Printing and allied trades.—Printers are busy, with better wages and shorter hours than a year ago. Pressmen are fairly busy. Bookbinders are fairly well

employed; this trade is not on a very large basis in Peterborough.

Clothing trades.—Journeyman tailors are very dull at this season of the year, as all persons are well supplied with warm clothing, and will not require lighter clothing until spring-time, when the tailors will again become actively engaged. Not a great deal of ordered footwear is made here; nearly all cobbling and mending is done by a few men, who are generally kept fairly busy.

Food and tobacco preparation.—Bakers and confectioners are all doing a steady business. Butchers and meat cutters are very active. Ice cutters and drivers are very busy now getting ice packed ready for summer business. There is only one firm of cigarmakers doing business here, which, in addition to home trade, does a fairly good export trade.

Leather trades.—All shops here, both wholesale and retail, are quite busy.

Miscellaneous.—Barbers are all busy. Prices have been raised 5 cents on a haircut, *i.e.*, from 15 to 20 cts.; a shave costs 10 cents. Broom-makers, of which there are two factories here, are doing a steady local and export trade. Clerks and stenographers are busy and in demand. Delivery employees are very actively employed. Furriers are doing an excellent business this winter. Hotel and restaurant employees find business very good. Laundry workers, both English-speaking and Chinese, are very busy; there are five or six Chinese laundries.

Transport.—All of the railways running into Peterborough are doing a brisk business, and all employees, in consequence, are busily employed. Cab drivers, hackmen, carters and draymen, these kind of workers, are not doing a very brisk business. Teamsters and expressmen are all busy.

Unskilled labour.—There is little employment, especially in out-door work, just now for this kind of labour.

FORMATION OF LABOUR ORGANIZATIONS.

There has been formed an organization termed 'Peterborough Federation of Majority Rule.' It is not really a labour organization, but one which will materially affect the working classes. It deals with public questions in such a manner that if a municipal council is presented with a petition signed by a certain percentage of the voters or electors asking that a referendum shall be taken on such questions as franchises, public contracts (large ones), or any other matters that the people think should be submitted to the votes of the people before being enacted upon by the municipal council. The society will be fully organized this year.

DISTRICT NOTES.

In *Lakefield*, a village of 1,200 population, the large cement works are doing a large business. There is a large sawmill doing a fine summer trade, and two large modern flour mills doing a splendid trade. All the establishments give work to a large number of men. There are several other small villages in the vicinity with sawmills and gristmills which do a considerable trade with the farming community throughout the district of Peterborough.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Nearly all branches of skilled labour have been well employed, during the month of January, excepting such as have been affected by the weather which has been unusually cold and stormy, interfering greatly with outside work. A number of unskilled and general labourers are out of employment, but the heavy snowfalls have given temporary work to many. Relations between employers and employed are generally satisfactory, any disagreements that have taken place have been of a minor character and there appears to be a grow-

ing disposition to arrange disputes amicably.

The Might Directory of Toronto for 1904, which is now practically ready for distribution, shows that the city has been making steady progress. The number of individual names in the volume, by actual count, is 101,646, exclusive of firms, corporations, &c., an increase of 4,559 over the 1903 issue. Multiply the number of names by 2 3-4, the estimate of the population of Toronto at the end of 1903 is given at 279,526. The figures given in the other departments also show substantial growth. The real estate transfers for 1903 totalled 4,968, as compared with 4,188 in 1902, and 1,415 in 1897. The building permits granted amounted to 2,022 in 1903, as against 1,519 in 1902, the value of the buildings in 1903 being \$4,356,457 in 1903, as against \$3,954,923 in 1902, and \$951,130 in 1897. The assessment of the city in 1903 was \$166,762,315, as against \$163,829,675 in 1902, and \$149,612,523 in 1897. The amount of fire insurance in force in Toronto at the end of December, 1903, is estimated at \$80,000,000. The revenue of the Toronto post office up to June 30, 1903, was \$348,200.48, and the duties collected at the customs house for 1903 amounted to \$7,672,871, as against \$4,533,605 in 1898.

The report of the Toronto Harbour Master for 1903 shows that while the number of vessels arriving, namely, 3,164, did not reach the total of the previous year by 107 there was an increase in the tonnage of nearly 50,000 tons register.

The total coal receipts by rail and vessel, according to government returns were 483,188 tons anthracite, 614,563 tons bituminous; in all 1,097,657 tons, or an increase of 320,473 tons over last year.

The day labour system on certain civic works being employed in the construction of 27 out of the 38 additions to the sewer system shows, according to the city engineer's report, a saving of \$4,500 on the figures of the next remaining tender.

At a meeting of the Master Barbers' Association addressed by the medical health officer of Toronto it was decided that the barbers would henceforth sterilize all their instruments after use.

CONDITION OF LOCAL INDUSTRIES.

Manufacturers are generally busy and plants are working to their normal capacity. There are indications of blackness in some branches of the iron trade with a downward tendency in wages in sympathy with the general reductions which have taken place in the United States. An important addition to the industries of Toronto has been made by the opening of the Canadian Factory of the National Cash Register Co., of Dayton, Ohio, on Lombard St., which took place December 28.

Transportation.—The heavy snow storms impeded traffic considerably during the latter part of the month. Business in many localities has been temporarily paralyzed owing to the snow blockades and the difficulty of making shipments. The accumulations of freight will necessitate great activity on the part of the railroads for some time to come. The street railway has also experienced some difficulty in maintaining the service. The volume of its traffic continues steadily to increase, the gross earnings last year being \$2,154,440 an increase of \$341,785 over the previous year.

CONDITION OF PARTICULAR TRADES.

Building trade.—Bricklayers, stonemasons and other outdoor workers have had but little to do latterly but look for plenty of work as soon as the weather will permit. Where indoor work has been possible, many carpenters, lathers and plasterers have had a fair month, while plumbers have generally been busy. Negotiations for a new wage scale are in progress between the Plumbers, Steam and Gasfitters Union and the employers, but no definite settlement has yet been reached.

Building trades.—The building operations of 1903 exceeded those of any pre-

vious twelve months with the exception of 1891, when permits for the city hall were included. The total value of the building operations of 1903 as represented by the building permits issued was \$4,356,457. This includes 1,136 new houses at a cost of \$2,420,335, and 41 factories, costing \$299,430 with additions and alterations at an outlay of \$70,195. Much of the work indicated by these figures has yet to be completed. Contractors anticipate an equally busy season this year as the demand for dwellings is still urgent and operations will be vigorously pushed as soon as the spring opens.

Metal engineering and shipbuilding trades.—In some departments trade is a little slack with more men out of employment than last month. This is especially the case in the iron trade. The employees of the rolling mill in connection with the Toronto Bolt and Forging Co., Limited, of Swansea, numbering about 60 have been out of work all the month, the mill being closed down some weeks since for repairs. It was intimated that a reduction of 10 per cent would be made in wages when work was resumed and the men refused to return. In some other cases, staffs have been reduced. Jewellers and silversmiths are well employed.

Woodworking and furnishing trades.—Employees are generally busy and plenty of work in prospect. In the picture frame trade the month has been a little slack and a reduction of wages was under consideration. On January 25, a new scale was introduced for gilders employed at the Wooltz Manufacturing Co., which would have reduced the pay considerably. As a result 23 of the men belonging to the Gilders Union struck work, but went back the same day on the former terms. It is understood that the arrangement is only temporary and that a general cut in wages affecting picture frame workers and gilders may be made. Piano workers have had a fair month with but few out of work.

Printing and allied trades.—The printing trade has been good during the month

and bookbinders have also been well employed. The agreement of the Allied Printing Trades with the employers expires in June next, and the different departments have been drafting new agreements, which include demands for higher wages and shorter hours.

Clothing trades.—This is the slack season for custom tailors, and garment workers also find trade dull, quite a number of the latter being laid off. It is expected that the trade will improve this month. There is a tendency on the part of some employers in the ready-made trade to remove from Toronto to smaller places where expenses are not so heavy. Several such changes having latterly occurred. Boot and shoe workers and cap workers are busy.

Food and tobacco preparation.—Bakers have had a fair month. The confectionery trade has been decidedly quiet.

Miscellaneous.—Ice cutting is going forward briskly as usual at this season. Laundry workers find trade slack.

Transportation.—The work of all classes engaged in transportation has been greatly interrupted by the severe weather and deep snow. There is a busy time in prospect as soon as the lines are clear.

DISTRICT NOTES.

Scarborough township.—Difficulties between the Scarborough township council and the Toronto Street Railway having been adjusted, the extension of the Scarborough Electric line from its present terminus to Highland Creek, a distance of six miles will be proceeded with as soon as the season permits.

Toronto Junction.—The work of laying tracks from the Grand Trunk Railway into the Junction Cattle Market is being proceeded with. Two tracks are to be laid from the main line and two from the northern branch. The cost which will amount to \$30,000 will be borne by the Stock Yards Co.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Considering the unusual severity of the winter season, the state of employment in this district is highly satisfactory. There are very few idle men and these all belong to the building trades or follow other occupations with which extreme cold weather interferes. Arrangements are being made to start several small factories in this city and district in the spring. Fire destroyed the premises of the Power Specialty Co. in Bridgeburg and gutted the *Review* printing house in this city. Electric linemen are the only class of workmen experiencing an unusual rush of work. Freight traffic is very heavy and manufacturers, wholesalers and retailers, report a most satisfactory state of trade. The carpenters' union of this city fixed the scale of wages for journeymen for 1904 at 28 cents per hour, the same as for 1903. The agitation for a higher rate was not seriously considered.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing generally is in a very prosperous and satisfactory condition. All factories are running with full staffs, and some of them overtime.

Railroad construction and employment.—The through railways have all the business their motive power can handle, and consequently are employing larger numbers of train crews than usual even for the winter season. Extra trackmen and yardmen are also constantly employed, but no great increase of the number of the former have been made necessary as yet by snow blockades.

CONDITION OF PARTICULAR TRADES.

Building trades.—Cold weather has been responsible for a dull period in the building trades. Quite a few masons, bricklayers and painters are not working, but as this

is usually the case for a number of weeks during the winter, no complaint is heard. There is no demand for carpenters, and a few men are idle. The planing mills are all running steadily. Plumbers and steamfitters have had a great rush of work since the first of the year.

Metal, engineering and shipbuilding trades.—Foundry and machine shop employees are all busy. The demand for electric linemen continues, and men have been brought from other cities by the telephone and telegraph companies. Local electric companies report a large and steady increase of trade.

Printing and allied trades.—All classes of men in the printing trades are steadily employed, and there is an occasional demand for compositors.

Food and tobacco preparation.—There is no lack of employment for persons engaged in food or tobacco industries, and men used to cutting, handling and packing ice have been in demand.

Miscellaneous.—There continues to be an unsatisfied demand for domestic servants and kitchen help, and hotels occasionally have difficulty in securing additional hands.

Transport.—The winter freight traffic continues to tax the capacity of the railways, and the largest possible numbers of enginemen and trainmen are employed. Additional yard and office men have also been taken on and in every branch of the service the state of employment is excellent.

Unskilled labour.—There are frequent demands for farm labourers for yearly engagements.

DISTRICT NOTES.

Bridgeburg.—Fire destroyed the premises and stock of the Power Specialty Company, entailing a total loss of \$3,000. This is a very busy season on the railway lines crossing the frontier at this point.

Port Colborne.—Ice cutting and storing has given employment to a number of men here and at Humberstone.

Sherkston.—The lime-kilns here have shut down.

Perry.—The new stave factory here will employ a number of hands.

Welland.—A by-law to exempt the Frost Wire Fence Company from taxation was defeated by the electors, and the factory will be removed to Hamilton.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. James A. Wiley, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The local labour market is in a very satisfactory condition for the season of the year. The ice season, which opened with the beginning of the month, has given employment to a large number of men; as has the clearing away of ice and snow from the railway and street car lines. In the building trades work has not been very brisk, work, with the exception of a few warm days, being confined to inside employment. Business men report a very good month for January, an improvement over the corresponding month of last year.

A feature of the month has been a number of trades disputes, none of which taken alone were of a serious nature. On January 2, the machinists, eight in number, in the employ of the Welland Vale Manufacturing Company, received a cut of 12 per cent in wages, and refused to accept it. A conference was held between the officials of the firm and the vice-president of the Machinists' International Union, who was accompanied by officers of the local union, the result of the conference being that the old scale of wages were restored to the men. On the same date, in the same factory, the carpenters, four in number, received a cut of 20 per cent in their wages, which the men refused to accept; this difficulty had not yet been adjusted. Also on the same date and in the same factory the fork makers, ten in number, had the scale of piece work readjusted, which meant a reduction

in wages equal to 2 per cent; the new scale was accepted by the men. The polishers have accepted a reduction in prices paid for piece amounting to about 5 per cent. On December 31 the employees in the Canada Wheel Works, Merritton, quit work, refusing to work with a non-union hand; they returned to work again on January 2, the non-union employee having left. On January 6, the annealers, 42 in number, employed in the McKinnon Dash and Metal Works were refused the usual hour off allowed on heating days, the firm asking that they work that hour without extra pay. This the men refused to do, and quit work. This action on the part of the annealers threw some 50 other workmen out of employment. All the workmen involved are members of the International Carriage and Wagon Workers' Union. The men offered to settle the difficulty by arbitration, which was accepted by the firm. The men have returned to work pending the decision.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—With the exception of a few days all manufacturers have been running their factories full time with full staffs.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are at a standstill owing to the severe weather. Carpenters, joiners, plasterers, lathers, painters, decorators, paperhangers and plumbers have some inside work, but are not rushed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists, electrical workers, linemen, metal polishers, blacksmiths, and horseshoers are all well employed.

Woodworking and furnishing trades.—Upholsterers, varnishers, polishers, wood carvers, carriage and wagon workers have had steady work.

Printing and allied trades.—Printers, pressmen and bookbinders have been busy.

Clothing trades.—Journeymen tailors report trade as being quiet.

Food and tobacco preparation.—Bakers, confectioners, butchers, meat cutters, cigar-makers, and tobacco workers report trade good.

Leather trades.—Tanners, curriers, and saddlers have been working full time.

Miscellaneous.—Barbers are busy. Laundry workers have steady employment.

Transport.—Both steam and electrical railways have experienced great difficulty in keeping their lines open for traffic in consequence of the heavy snow storms, giving employment to a large number of men.

Unskilled labour.—This class of labour is fairly well employed; a number of men who would have been idle have secured work cutting ice.

DISTRICT NOTES.

Port Dalhousie.—The Maple Leaf Rubber factory is running full time with a demand for more hands.

Merritton.—With the exception of the trouble at the Canada Wheel Works, over the refusal of the union hands to work with a non-union employee, which was settled in a day or two, the labour market has been in a very satisfactory state. All the factories are working full time.

Thorold.—All classes of labour have been well employed, the only exceptions have been those who are usually affected by the severe winter weather which prevails.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Skilled labour is fairly well employed for the winter season, while unskilled labour is not so much in demand. Some ice cutting has already begun, which gives work to a large number of men. The Wright Hat Co., of London, has taken a four-year lease of a building here, and will begin the man-

ufacture of straw and felt hats shortly. The statement of the local clearing house shows a large increase in business last year, as compared with the year previous. The figures for 1903 were \$53,419,704. For 1902 they were \$45,965,217. Flour advanced 20 cents a barrel, wholesale, in this city, and flour now retails at \$2.25 a bag. The increased prices are due to the recent advance in the price of wheat. The bricklayers and masons were working a nine-hour day until January 1, when they asked for and received an eight-hour day. On April 1 they asked for an advance of from 40 to 50 cents an hour. Some employers have already conceded the increase, while all have granted the eight-hour day. At the present time there are no strikes or lockouts. The proposed local board of arbitration, to be composed of members of the trades and labour council and members of the board of trade, has not yet been formed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is nothing of importance to report as to agriculture, which appears about as usual for this season of the year.

Fishing.—The fishing industry is very quiet just now.

Manufacturing.—The factories and all manufacturing concerns are fairly busy.

Railroad construction and employment.—There is no railway construction going on at present in the vicinity of Hamilton.

Other industries.—The local garment-makers held a mass meeting during the month to protest against the proposed sending to Canada from England of a large number of tailoresses by the British Women's Emigration Society.

During the month the local board of health discussed the question of the removal of ashes and garbage, and the city's medical health officer reported as follows:—

“The whole system could be greatly improved by employing men in going just in advance of the

teams and to carry garbage barrels out to the street or alley, thus relieving householders of this disagreeable task, while the unsightly appearance of garbage receptacles of all kinds lining the street would be removed. This could be done by increasing the Board of Health appropriation \$5,000, which would make the cost to each householder about five cents a month."

CONDITION OF PARTICULAR TRADES.

Building trades.—Considering the extreme coldness of the weather, the building trades have a large number of men employed. The bricklayers have reduced their working day from nine to eight hours, and are asking, to commence on April 1, an increase in wages from 40 cents an hour to 50 cents an hour. Plumbers and painters are satisfactorily employed. The civic building inspector has made a thorough inspection of factories, public halls and places of amusement, &c., and ordered a number of improvements, especially as to the providing satisfactory fire escapes.

Metal, engineering and shipbuilding trades.—Most workers in the different iron trades are fairly well employed. Electrical workers and linemen are busy. Stonecutters, blacksmiths and horseshoers are well employed; also sheet metal workers and jewellers.

Woodworking and furnishing trades.—Furniture and cabinet workers are fairly busy. Carriage and wagon makers are not so well employed.

Printing and allied trades.—Printers on newspaper and job work are fairly busy, as are also those employed in the book-binding trades.

Clothing trades.—Journeymen tailors are a little slack. Garment workers have been busy, and business is picking up a little. Some branches of the trade are better employed than others. Several male operators and pressers were idle during the month.

Food and tobacco preparation.—Bakers, confectioners and butchers are well employed. Cigarmakers and tobacco workers are fairly busy. Ice cutting has begun, and gives work to a large number of men.

As a result of the extreme cold weather, the ice is of extra good quality.

Miscellaneous.—Bakers and delivery employees are fairly busy. Hotel and laundry employees are not so very busy.

Transport.—All railway workers, both steam and electric, are fairly well employed. Longshoremen are not very busy this month. Teamsters and expressmen find work fair.

Unskilled labour.—This kind of labour is not doing much. There are about 25 men at work in the city quarry.

DISTRICT NOTES.

Dundas.—Business in Dundas is fairly active. The several factories are running full time. Wholesale and retail trade is good. The machine shops, clothing shops, axe factory, glove and several other factories are enjoying a good season. There are a large number of men employed in town, and there are a few idle men.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market, as far as the employment of labour is concerned, has been more favourable than during the preceding month, though hardly as favourable as in the corresponding month last year, when there were fewer idle men upon the market. There have been reductions in wages in several of the factories. The wages of moulders employed at the Massey-Harris Co. have been reduced from 7 to 26 per cent, and the wages of many of the labourers reduced 10 cents per day; also at the Buck Stove Works the wages of the labourers, with several exceptions, have been reduced 10 cents a day. The various factories, with the exception of the Malleable Iron Works, have run full time unless delayed temporarily a day or two by frozen or burst pipes, with the average working force for this season of the year. The

building trades, as far as outside work was concerned, have been idle. Stove works have been busy, one firm advertising for steady and competent stove plate moulders. The merchants have experienced a fair month. There have been no labour disputes during the month.

The annual meeting of The Watrous Engine Works Co.'s Employees' Sick Benefit Society was held on the 18th inst., in the company's office. The secretary-treasurer's report was presented and showed very satisfactory results of the operation of the society for the year just ended. There was disbursed for sick and funeral benefits during the year \$1,365.40 and a balance of \$350 in the treasurer's hands to commence the new year. Since the inauguration of the society there has been disbursed in sick and funeral benefits a sum in excess of \$12,000.

During the last week of the month three of the factories were greatly inconvenienced for the want of steam coal. Shipments have been delayed, and unless they arrive soon several of the factories may have to close down.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Unusually cold weather with deep snow has greatly interfered with the cutting and marketing of wood, as well as the marketing of other products of the farm. A rise in the price of hay is expected owing to the long and severe winter.

Manufacturing.—The Brantford Cordage Co. has been advertising for a number of girls.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have not had employment during the past month, the building trades having been at a standstill so far as outside work is concerned. Carpenters have had steady employment with a few exceptions. Lathers and plasterers have worked part of the month. Painters in factories have all had steady employment. Painters and decora-

tors have worked some of the time. Plumbers, gasfitters and steamfitters have had steady work.

Metal, engineering and shipbuilding trades.—Iron and brass moulders, with the exception of a few machine moulders, have been fully employed. Steady and competent stove plate moulders are in demand. Coremakers, machinists, polishers and buffers have had steady employment. Stove mounters have been busily employed. Blacksmiths, boilermakers and sheet metal workers have had a full month's work. Horseshoers were fully employed.

Woodworking and furnishing trades.—Carriage and wagon makers, patternmakers and wheelwrights report work satisfactory.

Printing and allied trades.—Printers and pressmen find trade normal, with all local men employed.

Clothing trades.—Journeymen tailors have had a fair month.

Food and tobacco preparation.—Bakers, confectioners, cigarmakers, and tobacco workers have had steady employment.

Miscellaneous.—Barbers report all men employed. Clerks and delivery employees were fairly employed. Hotel and restaurant employees have been regularly employed.

Transport.—Freight handlers and street railway employees have worked full time. Carters and expressmen have had a backward month. Draymen have generally been working full time.

Unskilled labour.—There is practically no demand for unskilled labour.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has not been so well employed as last month or for some little time. While no great number of men are seeking employment, there is a slackness and a feeling that

goods are being manufactured for stock purposes rather than to meet orders. This has been caused by the unusually large amount of snow which has fallen, and which has badly blocked both the railroads and the concession roads. Very little freight, except of a perishable class, is being moved, and this is leading, among other things, to a severe scarcity of coal, which has temporarily closed a number of shops in the district. Hard coal is also very scarce. Retail business has been especially quiet. With the opening of spring, it is expected a number of proposed factory extensions will be got under way. There is also a prospect of a large number of dwelling houses being erected. There is no noticeable unrest among any class of wage-earners.

The Guelph Foundry Company will erect a large addition to its establishment owing to the increase in the volume of their business, which will necessitate a large amount of new machinery and several extra hands.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural work out of doors has been at a standstill owing to impassable roads.

Manufacturing.—This industry has not been up to last month's standard. While expectations are good, a considerable amount of work has been done on stock rather than on orders.

Railroad construction and employment.—Railroads have given employment to many additional men on maintenance of way work during the month. A number of municipalities at the municipal elections passed by-laws granting aid to the proposed extension of the Guelph Junction Railway to Goderich. Both the steam roads and the electric roads in this district have been badly blocked by snow and frosty rails during the month. In some cases towns have been without mail for a week at a time, and freight has been got through with the greatest difficulty.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had a very quiet month, the only work doing being at the Macdonald buildings at the O. A. College, and a small amount of job work. Bricklayers and masons, carpenters and joiners and painters had small staffs at work on the Macdonald buildings, but not much else was done during the month. Prospects for next season are good.

Metal, engineering and shipbuilding trades.—Iron moulders in some shops have had a good month. In other shops work is slack. Machinists and sheet metal workers have had a good month, but it is generally considered that stock was being got ready for spring.

Woodworking and furnishing trades.—Woodworkers report a fair month's work. Organ and piano workers are fully employed, but business is hardly up to last month. Upholsterers are slack, which is usual in January. Carriage workers are fairly busy on spring work.

Printing and allied trades.—The printing trade has had a busy month, with some overtime worked.

Clothing trades.—Tailors have only been fairly well employed.

Miscellaneous.—Barbers, butchers, bakers, hotel employees have had a good month, owing to the special courses at the O. A. College.

Unskilled labour.—Unskilled labour is not much in demand, but there is no noticeable supply.

DISTRICT NOTES.

Galt, Preston and Hespeler are badly affected by a shortage of coal. A number of factories have been closed for short periods from this cause. Hard coal is also very scarce.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continues in the same condition as noted for some months back, and there is no lack of employment in the different lines of trade. The stormy weather and snow drifts have caused blockades in many places on the railroads, so that every available man is shovelling snow. The men who are employed regularly in the freight sheds are also out on track service. There is a large frame building, for ice storage, in course of erection, for T. B. Deacon, where there are about twenty carpenters working. The wholesale and retail trades continue active. There were no changes in the rates of wages or hours of labour, and no trouble in the labour market during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are busy feeding cattle and hogs for market, which find a ready sale at good prices. Beef sells at from 6 to 7 cents per pound by the quarter ; butter at 20 cents per pound, and eggs at 25 cents a dozen.

Manufacturing.—All the manufacturing establishments report business satisfactory.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are not very well employed. The carpenters have work, and the plumbers and gas-fitters are very busy.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, boiler-makers and blacksmiths are all employed and prospects in their trade are good.

Woodworking and furnishing trades.—Woodworkers, upholsterers and polishers are fairly busy, and all local coopers are employed.

Printing and allied trades.—Printers are steadily employed with no idle men.

Clothing trades.—Journeyman tailors are fairly well employed, but are not so busy as in the previous month. Garment workers report trade good.

Food and tobacco preparation.—Bakers, confectioners and cigarmakers report a good month's work.

Miscellaneous.—Barbers, clerks and delivery employees have steady work with satisfactory conditions.

Transport.—Railway trainmen are fairly well employed and cab drivers and draymen have sufficient to do.

Unskilled labour.—There are not many labourers idle.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

During January labour generally was as well employed, at inside work, as in the same month in former years, but on outside work trade was almost at a standstill, owing to the severe weather and the heavy fall of snow. Some of the lines of railways in this district were tied up for two and three days at a time, seriously affecting transportation. Wholesale trade was also affected somewhat, in consequence of inability of travellers to get through to the country districts.

A large manufacturing concern here has adopted the profit-sharing plan with its employees, based on the length of service of its work-people, and at the first of the year distributed \$3,200, some employees receiving as high as \$75. The firm also promises to pay 6 per cent to those wishing to leave their share with the firm.

The wood-cutting scheme, instituted by the Charities Aid Society some years ago, is in operation again this year, and by it a large number of willing workers are helped over the winter months when they would otherwise be out of employment.

The local trades and labour council has passed a resolution favouring free textbooks for the public and separate schools of the province; and has endorsed resolutions for submission to the provincial government favouring the following propositions:—Provincial certificates for stationary engineers; better passages through street cars, thus increasing the safety of conductors; endorsing action of Mr. Robert Glockling, Secretary Ontario Bureau of Labour, in setting before the British workmen the true condition of labour in the province; the establishment of a provincial printing bureau; the abolition of the practice of watering stocks; the appointing of more factory inspectors; and the passing of an Act to amend the law relating to trade unions.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The rolling mills are working a double shift. The employees of the McClary Foundry Co. are practically all moved to the new foundry buildings, and the old buildings are being prepared for the expansion of the company's tinware and enamel departments.

Railroad construction and employment.—Railroading conditions in this district during the month have been the worst ever known; one train going from London to Stratford was stuck in a snowdrift 25 hours; and between St. Thomas and London (16 miles) nine engines and three trains were snowbound for nearly two days, and had to be dug out by men with shovels; the London, Huron and Bruce line was tied up three days without a train going over it.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building trades has been almost at a standstill for the past month, and bricklayers and masons, lathers, plasterers, painters and stonecutters have been practically idle. Carpenters have had a little work inside the planing mills. Plumbers have been very busy repairing frozen pipes, &c.

Metal, engineering and shipbuilding trades.—Iron moulders and iron workers are exceptionally busy, as are also core-makers and machinists. Electrical workers are not doing much. Linemen have been busy repairing broken lines, caused by the storms. The metal polishers, buffers and platers of Ontario held a convention in this city in the early part of the month; they reported trade as good. Stove mounters and boilermakers are busy.

Woodworking and furnishing trades.—The cold weather has proved a benefit to the different branches of the carriage and sleigh trade; almost every sleigh or cutter in the city having been sold, which is making this trade exceptionally good. Car builders continue to be well employed, and the coopers continue very busy.

Printing and allied trades.—Printers and pressmen are not as busy as last month, but there is plenty of work for all, the difference being the cutting off the overtime work.

Clothing trades.—Journeymen tailors are in the midst of their slack season. Garment workers are busy. Boot and shoe workers are all out of work through the burning of the Sterling shoe factory, the only one here.

Food and tobacco preparation.—Bakers and confectioners have slackened off somewhat. Ice cutters have about finished getting in the summer's supply. Cigar-makers are not as busy as last month, but all hands are working.

Miscellaneous.—Broom-makers are busy. Brushmakers are working overtime three nights a week, and have about fifty carloads of orders ahead.

Transport.—Locomotive engineers and firemen have had one of the hardest months in years keeping the tracks open. Trainmen have been slack owing to inability to move freight. Trackmen have been working day and night, shovelling snow.

Unskilled labour.—A number of labourers have secured employment with the railways, shovelling snow on branch lines.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been generally well employed for January. The exceptionally heavy fall of snow caused much extra work in operating the railway lines. On some of the lines traffic has, at times, been entirely tied up for one or two days owing to the blockade. The Electric Street Railway experienced similar difficulty. Industries have not suffered much from the freight blockade but should it continue there may be a partial fuel famine. The car wheel foundry is threatened by a shortage of coke from the same cause. The ice harvest has afforded a considerable demand for floating labour during the month. Regarding wages, the Board of Education have decided to grant a \$25 per year increase of salary to the public school teaching staff. This will raise the minimum salary from \$250, to \$275 and the maximum from \$500 to \$525. This does not include the principals who received an increase last month. The drug merchants of the city have agreed to close their shops every evening at eight o'clock, except Saturdays and nights preceding holidays. This agreement went into effect on January 20.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—An important branch of this industry was brought prominently before the public during the convention of the Western Dairymen's Association which met in this city during the second week of January. A great deal of information both general and technical was brought out in discussion. It is highly probable that the farmers in this district will increase their efforts in perfecting what already is a growing industry.

Manufacturing.—Local industries continue prosperous. The timber consuming industries are taking on a larger stock of logs than usual. The local stave factory

contemplates stocking their yards with three million feet of timber during this winter's season. The local handle factory is exceptionally busy, overtime is being worked by part of the staff, while the saw-mill department is being run day and night for a time.

Railway construction and employment will receive an impetus during the coming summer. The building of the Père Marquette Railway repair shops is now assured. The bonus by-law to this effect was carried by a large majority at the time of the municipal elections. The city council and the Wabash Railway Company have reached an agreement regarding the locating of repair shops at this point. Special legislation for the privilege of granting a bonus to this American company is being sought after by the city. The proposed bonus to be granted is \$30,000; land valued at about \$10,000, and exemption from taxation for twenty-one years. The proposed number of men to be employed is approximately estimated at 200.

Civic employment.—The railway committee of the Privy Council has notified the city that in the interests of public safety a street subway under the Canadian Southern Railway tracks on Ross street is required, and has ordered the work to be completed within sixteen months. The subway is to be thirty-two feet in width, a clear headway of not less than fourteen feet. The work is to be done by the railway company and executed satisfactorily to the government chief engineer; two-thirds of the cost is to be borne by the railway company and one-third by the city of St. Thomas.

CONDITION OF PARTICULAR TRADES.

Building trades.—In this line of work there is little doing at present, but a most hopeful outlook is entertained for the spring season. Plumbers are the only mechanics in the building line that are busy.

Metal and engineering trades.—In these lines there is much activity. Iron moulders and helpers, machinists and boiler-makers

ers are steadily employed. Linemen have been busy putting up new cables for the Bell Telephone Company.

Woodworking and furnishing trades.—Workers in the local handle factory are working overtime, while in other departments normal conditions prevail.

Printing and allied trades.—Printing trades report a very satisfactory month.

Clothing trades.—Journeymen tailors report fairly good employment, considering the slack season of the year.

Food and Tobacco preparation.—Bakers report normal conditions. Cigarmakers continue to enjoy a prosperous trade.

Transport.—Railway traffic hands are extremely busy but owing to the great difficulty with snow have been making slow time.

Unskilled labour.—This class of men have had an advantage because of the extra railway and other work.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The severe weather this month has had a depressing effect on the labour market, work in the outside trades being practically at a standstill, masons, carpenters, painters and labourers being nearly all idle, with little prospect of improvement before spring. The unprecedented snowfall this month has somewhat impeded railroad transportation and caused considerable hardship to railroad men. Wholesale and retail trade is quiet. There were no changes in the rates of wages or hours of labour, and the labour market is free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy bringing in wheat, corn, logs and wood.

Manufacturing.—All local factories are running full time, with all hands fully employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, painters, plasterers and labourers report trade very quiet.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers are fairly well employed. Blacksmiths and boilermakers find trade quiet.

Woodworking and furnishing trades.—Carriage and wagonmakers have plenty of work. Coopers are also busy.

Printing and allied trades.—Printers, pressmen and bookbinders have plenty of work.

Clothing trades.—Journeymen tailors are fairly busy.

Food and tobacco preparation.—Bakers, butchers and cigarmakers report trade very good.

Transport.—All classes of railroad men are busy. Teamsters and expressmen have plenty of work.

Unskilled labour.—There is little demand for unskilled labour at present.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has changed somewhat during the month on account of the weather, which was the most severe experienced in 25 years. This put a stop to the outside building trade, yet there are very few idle men in the city outside of bricklayers, plasterers and a few painters. Owing to the heavy ice in the river the transfer boats had to have extra crews, which is giving employment to a large number of men. The street railways have also had a large gang of men shovelling snow, which is finding employment for unskilled labour. Up to the present time there has not been a single case of hardship reported. The Western Robe Co., of Detroit, Michigan, manufacturers of robes of

all kinds, has started a branch in Windsor, and at the present time is giving employment to 25 hands. The Sangham Electric Company of Springfield, Ohio, has opened a factory for the manufacture of electric meters. At present there is no trouble in the labour market, the unions being busy preparing their agreements for the year 1904.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturers in all lines are busy with the exception of plaining mills, they are running with a small force working.

Railroad construction and employment.—The railway companies are having all the men they can get to shovel snow and keep their yards clean.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building operations are at a standstill just at present owing to the severe weather. There is plenty of building to be done as soon as the winter moderates. Bricklayers, masons, lathers, plasters and stonecutters are all idle. Carpenters and joiners are mostly all working. The painters' union reports about one half the men at work. Plumbers, gas and steamfitters are all working.

Metal, engineering and shipbuilding trades.—All employees connected with the iron trade are working full time.

Printing and allied trades.—Conditions in the printing trades are good and the unions report all men working. There was a weekly paper started here this month called the *Organizer*. The Printers' Union has submitted to the employers an agreement asking for a small increase in wages to take effect on the first day of February next.

Clothing trades.—Tailors are fully employed.

Food and tobacco preparation.—Cigar-makers and tobacco workers are satisfactorily employed.

Miscellaneous.—Barbers report a good month's work. Hotel, restaurant and laundry workers are in demand, and are difficult to secure.

Transport.—All engaged in transportation are fairly busy, including street railway employees. Ship labourers and long-shoremen are doing very little at present.

DISTRICT NOTES.

Walkerville.—This is a very busy place just at present, all manufacturers are running their plants full time with a full force of help, and a majority of them have orders six months ahead. Messrs. Walker & Sons, are building a large addition to their plant for a tank house. The building of the tank alone is giving employment to a large number of carpenters in Windsor and Walkerville, which is a favourable feature, especially at this time of the year.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

January and February are the quietest months of the year in the labour market of Winnipeg. Labour generally, however, is at present well employed. The normal condition of the market during these two months is one of disemployment, and in some years has been a period of acute distress among a large proportion of working people. This year, however, the supply has been steadily absorbed by the demand up to the end of January at any rate.

The opportunity of employment is chiefly presented by the demand for men for chopping and for railroad work being pushed forward on the rock sections. The latter class of work, however, cannot be carried on as profitably during the winter season as during the summer, and in consequence the rate of pay has declined somewhat. The actual rate being now paid is \$1.75 per day, with a charge for board at the rate of \$4.50 per week.

There is always a demand during the winter months for experienced axemen. Employment agents have orders to the effect that if any good axemen offer their services they are to send them to the camps. Good men are scarce. The camp operators eagerly look out for them for the reason that they are more profitable even on a piece basis than those who make small money. Expert men, for instance, will cut on an average, say, three cords of wood per day to the novice's one, yet the novice requires the same camp accommodation as the best man. Camp accommodation under the statutory regulations, entails a considerable outlay, which is greater or less in proportion to the experience of the men available. The classes of men that have found the greatest favour with the camp operators are Canadians and Swedes. They not only show an aptitude for the work, but adapt themselves readily to the camp life. Neither the European nor the Britisher, as a rule, show a disposition or desire to adapt themselves to camp life or to the use of the axe. The piece prices paid for chopping at the present time are as follows: Poplar, 75c. per cord; pine, \$1; tamarack, \$1 to \$1.25. The above include hewing, cutting and splitting. The charge for board is \$4 per week.

Tie loaders have also been in some demand. Their work consists in loading the ties on the cars after they have been hauled to the side of the track. They are paid on a piece basis, generally at the rate of \$1.50 per hundred. At this particular work only skilled men are desired. The reason for this is that the service of a train and crew are required and any delays through the inexperience of the tie loaders would be expensive. Strong, capable men make good money. In some cases as high as \$35 per week has been earned. The work is generally undertaken by gangs of three. When these are expert they not only procure fairly regular employment, but make large earnings.

There is an element of unemployed in the city composed largely of those seeking

indoor or clerical work. Most of these are new-comers. Another element is composed of Europeans who do not care to leave the city during the winter months.

Industrial conditions normal. There are, however, indications of greater activity. In commercial circles a large increase in business is being looked for.

There have been no strikes or serious industrial disturbances during the month.

The Winnipeg directory for 1904 contains 23,786 individual names. The estimated population of the city is 77,304. The increase in population over a year ago is placed at 13,744. Below is given a table showing the number of names in the directory for the past five years, also for the years 1881, 1891, 1901:

| Year | Individual Names | Firms or Companies | Total Ad-dresses | Estimated Population |
|-----------------|------------------|--------------------|------------------|----------------------|
| 1899. | 14,001 | 1,048 | 15,049 | 46,070 |
| 1900. | 15,151 | 1,324 | 16,475 | 50,503 |
| 1901. | 16,033 | 1,509 | 17,542 | 52,443 |
| 1902. | 16,618 | 1,577 | 18,127 | 54,393 |
| 1903. | 19,557 | 1,814 | 21,371 | 63,560 |
| 1904. | 23,786 | 2,117 | 25,903 | 77,304 |
| 1881—1891—1901. | | | | |
| 1881. | 2,521 | 100 | 2,621 | 8,403 |
| 1891. | 8,000 | 810 | 8,810 | 26,666 |
| 1901. | 16,033 | 1,509 | 17,542 | 52,443 |

The following statistics are also indicative of great growth:

Postal Revenue—Winnipeg: 1900, \$116,000; 1901, \$125,000; 1902, (year ending June, 1903, \$156,734.36; 1903, \$172,407.

Customs Duties Collected—Winnipeg: 1900, \$974,420; 1901, \$1,486,564; 1902, \$1,933,082; 1903, \$2,048,014.

Inland Revenue Collected—Winnipeg: 1900, \$561,694; 1901, \$537,953; 1902, \$637,881; 1903, \$787,457.

Winnipeg's building record for 1903 exceeds all previous years by a large margin. During the year 1,215 permits were issued, covering the erection of 1,574 buildings, being 365 more permits and 574 more buildings than in 1902. An unusually large proportion of the buildings erected were mercantile blocks. The estimated cost of the year's erections is about \$5,825,000.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades the bricklayers and stone masons are not

fully employed. There is, however, more work being done this winter than usual. Stonecutters are fairly well employed. Plumbers and plasterers are enjoying steady employment.

Metal and engineering trades.—In the machine and moulding shops the men are being employed full time. The same applies to the woodworking factories.

Printing and allied trades.—The printers and allied trades are all enjoying good conditions.

Transport.—The railway repair and erection shops are working full staffs and rumours are afloat to the effect that the Canadian Pacific Railway will soon put their staff on overtime. It is also expected that the transportation staffs will be largely augmented before the usual rush of spring business.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The building season having practically closed last month nearly all classes of labour in that trade are idle, with the exception of those engaged in bridge building, and some employed by the C.P.Ry. Co., such as carpenters, joiners and steamfitters working on the new shops. There is no exceptional activity evidenced in any particular trade just now. Transportation companies report trade fairly good for the season of the year. Wholesale and retail merchants report trade very good. Business was never better at this season of the year. There has been no change in the hours of labour, or rates of wages, with the exception of men engaged in the C.P.Ry. shops, who are working nine hours a day. There has been no unrest in the labour market.

The report of the Department of Agriculture for this province for year 1903, states that the total grain crop was 82,576,519 bushels; the yield of potatoes 4,757,000 bushels; the root crop is placed

at 3,452,340 bushels, and the total area under all kinds of crops is estimated at 3,757,173 acres. It is estimated that there are already to be cropped this coming spring 2,385,505 acres, of which 177,029 are new breakings, 668,140 summer fallow, and 1,540,336 acres fall ploughing. These figures show 654,510 acres in excess of the amount of land prepared in 1902, for last year's crop. The total value of dairy products for the province of Manitoba for this year amount to \$858,709.26. The value of farm buildings constructed in 1903 is placed at \$2,961,752, against \$2,228,875 in 1902. The number of threshing outfits in operation is put down at 2,347. The number of beef cattle exported is 2,000, and the number of stockers shipped to the Territories at less than 10,000. The number of beef cattle now required for home consumption in Manitoba is 80,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is little to report from an agricultural point of view. Grain is moving more freely throughout the district owing to an advance in prices. Merchants are feeling the good effect as bills are being met more satisfactorily.

Manufacturing.—Sash and door factories are working full time. Flour mills are working night and day with full staffs.

Railroad construction and employment.—Construction work on the Canadian Northern Railway is closed for the winter. Considerable work is still being done on the Kirkella branch of the C.P.Ry., and will probably continue till spring. This branch leaves the main line at Kirkella and runs in a north-westerly direction through the Qu'Appelle Valley; it is intended to finally reach Saskatoon. It will pass through a tract of country largely settled by Germans.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are idle at present, as their season's work is over. There are quite a number of

carpenters and joiners working, but very few lathers and plasters or painters have employment. Plumbers and gas-fitters find employment satisfactory. Stonecutters are unemployed. Builders' labourers find work scarce.

Metal, engineering and shipbuilding trades.—Machinists are working full time, excepting those employed in railway shops who are on short time. Blacksmiths find trade fairly good, also boilermakers. Carriage and wagon makers are working full time.

Printing and allied trades.—Printers and pressmen find trade good.

Clothing trades.—Journeyman tailors' trade is very brisk. Boot and shoe workers are fairly busy.

Food and tobacco preparation.—Bakers, confectioners, butchers, meat-cutters, ice cutters and drivers and cigarmakers have very satisfactory employment.

Leather trade.—Tanners and curriers find trade satisfactory.

Miscellaneous.—Barbers, clerks and stenographers, and delivery employees are fully employed.

Transport.—All engaged in this line of business are fully employed.

Unskilled labour.—The supply of unskilled labour at present seems to exceed the demand. It is reported from other points that farmers are trying to engage men for the year, but that the men do not feel inclined to make this agreement.

DISTRICT NOTES.

Very favourable reports are coming in from the district, the grain has been moving freely during the past month, and the Christmas trade has helped business considerably. Land values are steadily advancing in the neighbourhood of Souris.

ROSSLAND, B.C., AND DISTRICT.

Roland A. Laird, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

January witnessed little of special interest in respect to matters affecting labour

in the Kootenay-Boundary district of British Columbia. The relations existing between employers and employed were undisturbed. The number of men employed varied little, and any change in this respect was in the direction of increased employment at various points. No special instance of increased employment of labour can be quoted, but trifling examples from time to time run into a considerable aggregate in the extensive district represented by the Kootenay-Boundary country.

The municipal census of Rossland recently taken shows a population of 6,133, composed of 1,393 families in 1,367 dwellings. Over 1,800 of the population came from the United States, 931 from Ontario, 284 from Quebec, 406 from the maritime provinces, 103 from Manitoba and the North-west Territories, 478 from British Columbia, 970 from Great Britain, and 238 from China.

Mining, smelting, lumbering and transportation are the great industries of the section, and in all four progress has been made, with the possible exception of lumbering, which is experiencing its annual depression at the present time.

CONDITION OF LOCAL INDUSTRIES.

Mining.—It is in the *Rosslund* camp proper and the *Phoenix*, *Summit* and *Greenwood* camps of the *Boundary* that the mines employing extensive crews of miners are, generally speaking, located.

Rosslund has 900 men at work at the present time, and this number is maintained from week to week with little variation. The mining operations are confined to deep level work as compared to *Boundary* where ore-quarrying is carried on extensively. In *Rosslund* mining is largely confined at the present time to the older properties, the weather conditions not being conducive to work on mines in the prospective stage. Much construction work is under way, however. The *White Bear* mine is installing a costly mining plant, and the *Rosslund Power Company* is employing about sixty

men at its 200-ton concentration works. The latter plant will be running in about ninety days, and will then be the largest and most modern work of the kind in Canada. It will handle low grade ores from the War Eagle and Centre Star mines, and approximately 100 additional miners will be employed in these properties to extract the milling ores in question. A few weeks hence work will be started on a 100-ton concentrator for the White Bear mine, and this will give employment to not less than fifty men. The Velvet-Portland mines, near Rossland, will shortly resume operations after a six months' shut-down, and in addition to the miners who will thus be given employment, the company will have work for a number of men in the building and machinery trades on a 100-ton smelting plant to be constructed at the mine for the purpose of evading the heavy costs of hauling the crude product of the mines to the nearest railroad, eleven miles distant, over a mountain road. It is also expected that a concentrator will be erected at the Spitsee and a compressor at the Jumbo mine in the spring, both of which will afford employment for considerable forces of men in the building trades.

In *Boundary* it is almost assured that additional miners will be employed in spring. The Snowshoe mine recently closed down pending arrangements for independent reduction works, and it is stated that these arrangements are rapidly being completed in the form of an amalgamation with interests already owning a *Boundary* smelter.

Throughout the lead-producing districts much activity is promised at an early date, as the result of the application of the federal bounty on Canadian lead. Report has it that the St. Eugene mine at Moyie, undoubtedly one of the largest lead mines on the continent, will shortly resume operations, and this one mine will give employment to 150 men. Further east in the *East Kootenay* district the mines at Kimberley are preparing for operations on a larger scale than now in force.

The coal mining industry of East Kootenay is in splendid condition, production has been increased wonderfully and the shortage of fuel supplies is absolutely a thing of the past. More coal mines are being opened up, and the industry is rapidly attaining proportions not dreamed of a few year ago.

The following is the report of coal and coke production at the Crow's Nest Pass Coal Co.'s mines at Coal Creek, Michel and Morrissey for the past year, issued from comptroller's office at Fernie, B.C.:

Coal output, net tons—

Coal Creek. Michel. Morrissey. Tot.

| | | | | |
|---------------------|---------|---------|---------|---------|
| 1902 | 267,429 | 127,515 | 46,292 | 441,236 |
| 1903..... | 242,637 | 263,590 | 154,855 | 661,118 |
| Increase..... | *24,756 | 136,075 | 198,563 | 219,882 |
| Incr. per cent. . . | *9 | 107. | 235. | 50. |

Coke output, net tons—

Coal Creek. Michel. Morrissey. Tot.

| | | | | |
|---------------------|--------|--------|-----|---------|
| 1902..... | 87,909 | 32,868 | | 120,777 |
| 1903..... | 94,441 | 72,598 | 700 | 167,739 |
| Increase..... | 6,532 | 39,730 | 700 | 46,962 |
| Incr. per ann. | 7. | 121. | | 39. |

The output was materially affected by the strike, which closed operations in February and March. On the basis of the output for the other months, the year's output would be 775,108 tons of coal, and 196,014 tons of coke.

Standard number of men employed—

Coal Creek. Michel. Morrissey. Tot.

| | | | | |
|-------------------------|-----|-----|-----|-------|
| 1902..... | 561 | 220 | 203 | 984 |
| 1903..... | 520 | 610 | 320 | 1,450 |
| Coke ovens— | | | | |
| In operation.... | 424 | 341 | 148 | 913 |
| Under construction..... | | 123 | 92 | 215 |
| Total..... | 424 | 464 | 240 | 1,128 |

Smelting.—Of all the Kootenay-Boundary smelting plants the only idle works are those at Boundary Falls in *Boundary*, where operations were suspended recently, presumably owing to the existence of negotiations for amalgamation with mining companies in the district.

At the Canadian Smelting Works in *Trail* about 400 men are employed, and the

*Decrease.

prospect is that this force¹ will be considerably increased as the outcome of enhanced lead ore production in the Kootenays. An electrolytic refining plant is about ready to commence work in connection with the Trail smelter to produce refined lead for the Canadian market.

The Hall smelter at *Nelson* is operating its copper furnace and lead stack, and will also share in the increased business to accrue from enhanced activity in the lead-producing districts.

Lumbering.—In several instances the lumbering plants of the country have closed down for the winter. This is not unusual, inasmuch as many mills do not care to saw frozen timber. Most of the men thus thrown out of work at the mills are engaged in the woods, where the cut will be unusually large this winter.

Transportation.—The railroads operating in the Kootenay-Boundary are exceedingly busy. Preparations are being made for increased facilities and improvements to roadbeds and bridges that will afford employment for many additional men.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month has not been so favourable as the preceding month, owing to a heavy fall of snow and frosty weather setting in. The Tramway Co. has reduced its maintenance crews for a short time, until the weather is more favourable. During the past month a large number of men have made this point their headquarters, and seem to have readily secured employment. The Brunette Sawmill Co. has shut down to permit of the carrying out of its regular winter repairs, and is going to erect a new burner to take the place of the old one. The cost will be in the neighbourhood of \$6,000. The retail merchants re-

port exceptionally busy times during the holiday season.

The following figures for the city of New Westminster for the past twelve months are interesting : The customs returns show an increase of revenue alone of nearly \$36,000. The returns for the year are : Imports, dutiable goods, \$562,797 ; free goods, \$296,182 ; total imports, \$858,979 ; revenue collected, \$172,996.88 ; other revenues, \$616.96 ; total revenue, \$2,143,478.

There has been no change in the rates of wages or hours of labour, nor any disturbance between labour and capital during January.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The company that has engaged in the halibut fishing trade has increased its crew and is expecting to be able to ship a large quantity east, besides supplying the local market. The returns of the last trip amounted to about 22,000 lbs.

Lumbering.—Almost all the camps are closed down on account of the heavy snowfall, but it is expected that it will only be for a short time. A good business in lumber is still being carried on with the Northwest Territories.

Manufacturing.—The factories are running full time, with orders ahead.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report conditions favourable ; some have been working at outside points. Carpenters during the past month have been employed doing considerable job work. Painters and plumbers report work steady, with good prospects ahead.

Metal, engineering and shipbuilding trades.—Work is plentiful in these trades, especially with blacksmiths, who are working overtime. Shipwrights and caulkers find work steady, with a few men out of employment, but prospects are bright for spring work.

Woodworking and furnishing trades.—Shingle weavers find employment slack, and many of the men have gone south of the line.

Printing and allied trades.—Printers report work good, with all men employed; in some cases they are working overtime.

Clothing trades.—Tailors report work plentiful, with good prospects.

Food and tobacco preparation.—Cigar-makers are steadily employed.

Transport.—Steamboatmen report business good for the time of the year. A good demand has been made both for railroad and general help. The Vancouver, New Westminster and Yukon Railway Company alone employing 150 men at this point for some time.

Unskilled labour.—This kind of labour has been generally well employed, particularly on the railway referred to under transport.

DISTRICT NOTES.

Throughout the district work is plentiful, many of the farmers doing extensive improvements to their holdings. At the town of Ladner a branch of the Royal Bank of Canada has been opened, and several surveying parties are engaged in the district in the interest of railway corporations.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades have been kept busy up to the present, but business is quite slack now. The weather has been bad for outside work on account of rain. With the influx of men from the North-west and Manitoba, there are a large number idle. With the opening of spring, however, most of the men engaged in the building trades will find employment. Building permits aggregating \$50,000 have been issued by the inspector during the month. Build-

ings now under construction amount to about \$175,000, and architects are busy. There does not appear to be any movement, initiated for the spring, for higher wages than those at present prevailing in the trades.

Business is good for the time of the year, and in some lines activity is reported. Collections were fairly prompt. In teas and coffees the market is very firm, with no indication of their being any cheaper for the next six months. Ashcroft potatoes are scarce, at \$22 a ton. Other quotations are : California cabbage, $3\frac{1}{4}$ cents a lb., weight of average head 5 lbs.; local cabbage, retail, 4 to 5 cents a head; flour (Hungarian), \$5.60 a barrel; Okanagan (Hungarian), \$4.90; Enderly (Hungarian), \$5.31; chopped feed, \$27 to \$29 a ton; wheat, \$33 a ton; oats, \$25 to \$27 a ton; eastern fresh eggs, 45c. to 50c. a dozen.

Business property in Vancouver has advanced from 25 to 50 per cent, and some instances, 75 per cent, during the past three years. Choice residential property in the west end of the city has increased very considerably. It is in this locality where the more prosperous people of the city have their homes. In the east end and Mount Pleasant, where working people chiefly reside, some of the property is cheaper now than it was eight or nine years ago. Other outside residential property has not increased any. Rents have increased on an average about 20 per cent. Taking the price of property and the cost of building into consideration, property owners are not making any more than a fair interest on their investments. Five-roomed houses, say in third-class locality, rent from \$10 to \$15 a month; in second-class locality, \$20; eight-roomed houses in third-class locality, from \$15 to \$20; same class of house in second-class locality, \$18 to \$25; in first-class locality, from \$25 to \$35. Stores, 22 feet frontage by 80 feet in depth, on the best business street, \$75 to \$125 a month. Apparently there has been no boom, but it is hard to explain why pro-

erty has increased in value to such an extent. The population has increased from 26,500 to about 34,000 since the national census was taken, and an increase in population generally, especially in the western towns, causes land values to increase. A fall in values, especially of house property, is expected by some; rents will thus of necessity fall back as soon as a number of houses become vacant. The cost of building material has increased fully 25 per cent since 1897, and with a falling off in demand we may look for a drop in prices of material. It is particularly noticeable that there is much speculation in progress as to the temporary effect the proposed new terminal of the Grand Trunk Pacific Railway will have on Vancouver real estate and rents.

It is estimated that the port of Vancouver will lose between \$150,000 and \$200,000 per annum by the enforcement of the increased head tax on Chinese.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The development of agriculture and fruit-growing, while on the increase, is not increasing as rapidly as it might, especially as the soil is very productive. A great drawback is the heavy clearing necessary, and the competition of Mongolian labour.

Fishing.—The pack of salmon in 1903 was only 473,547 cases; in 1902, an off year, 625,982; in 1901, the big year, 1,236,156. Prices have risen and old stocks, both in British Columbia and Puget Sound, United States, will all be cleared, so that next year's catch will not be hampered as to proper prices, and the outlook for the fishermen next year is very encouraging.

Lumbering.—The best authorities anticipate a period of depression, but this will not threaten the existence of very many of the present going concerns.

Shipments during 1903 from the Hastings mill, Vancouver, to foreign countries by sailing craft and by steamship, detailed

with destination and value, were as follows :—

| | Amount in feet. | Value. |
|---|--------------------|-------------|
| To the United Kingdom by sailing vessel..... | 6,872,904 | \$112,160 |
| To the United Kingdom by steamship..... | 174,148 | 10,500 |
| To South Africa by sailing vessel..... | 6,934,136 | 112,514 |
| To Australia by sailing vessel..... | 3,717,590 | 53,813 |
| To Australia by steamship.. | 15,624 | 200 |
| To Suva Fiji by steamship.. | 161,653 | 3,532 |
| To Japan by sailing vessel... | 2,646,103 | 41,954 |
| To Japan by steamship..... | 175,317 | 5,438 |
| To Japan and China by steamship..... | 366,065 | 8,147 |
| To China by sailing vessel.. | 1,867,746 | 26,525 |
| To China by steamship .. | 402,377 | 5,989 |
| To West Coast of South America by sailing vessel..... | 5,374,860 | 70,022 |
| To East Coast of United States by sailing vessel.... | 1,018,916 | 23,250 |
| | 29,727,439 | \$ 474,044. |

CONDITION OF PARTICULAR TRADES.

Building trades.—Lathers find work slack at present, but a busy season is promised. Lathers receive \$2.50 a thousand, piece-work.

Five hundred and seventy-seven permits for the construction of new buildings, which aggregate in value \$1,353,828, were issued during last year. This is by far the largest amount expended for the erection of new buildings in this city for any one year during the last decade. It also shows a large increase over the aggregate of building operations for 1902. During that year there were 417 building permits issued, the total value of which was \$833,607. The increase, therefore, over that of the previous year amounts to \$520,221, or roughly speaking, about 40 per cent.

Metal, engineering and shipbuilding trades.—Blacksmiths are working steadily in the machine shops, which includes carriage workers and horseshoers, and number over fifty men. In the Canadian Pacific Railway repair shops about a dozen smiths are employed; these are working short time, from 7.30 to 4.30, eight hours a day, at from 33 to 35½ cents an hour. Ten hours constitutes a full day. In the contract

shops the nine-hour day prevails, and the pay is 35 cents an hour. The prospects are good for the spring. The proposed new dry dock gives promise that a large number of men will be steadily employed; besides there is plenty of Canadian Pacific Railway work in sight. The local union is well organized, all the large shops being union. Blacksmiths' helpers work the same hours as the blacksmiths, their pay being from 20 to 25 cents an hour. The outlook is very promising, and the present state of trade is good. Boilermakers report none out of employment, there being about 65 at work. Their contracts call for a nine-hour working day in the contract shops at 38 cents an hour. About six are employed at Canadian Pacific Railway work, receiving 35 cents an hour, ten hours constituting a day's work. Short time is now being worked, starting at 7.30 and quitting at 4.30 p.m. Prospects are very encouraging for a busy season. The proposed new dry dock will give work to 100 to 150 boilermakers and iron ship-builders.

The Vancouver branch of the Canadian Association of Stationary Engineers has passed the following resolution, and copies of it have been sent to the members of the local legislature, now in session at Victoria. The resolution is signed by G. H. Flower, president, and by W. Keith, recording secretary. The resolution reads as follows:—

'Resolved, that this association fully recognizes the fact that the Act for licensing of stationary engineers was executed for the benefit of the general public, and not the benefit of the engineers, we do not wish to oppose any legislation that would result in injury to any engineer, whether a member of this association or not. At the same time, we consider it would be a great mistake to permit any engineer to obtain a certificate without examination, but would suggest that service certificates should be issued on passing a practical, verbal examination, and all purely technical and theoretical questions omitted.

'And further, that this association strongly objects to any engineer obtaining a certificate of any kind without the payment of a fee, this being unfair to other engineers who have paid, or may hereafter be required to pay, for the privilege of obtaining a competency certificate.'

Woodworking and furnishing trades.—Shingle weavers find trade dull, some of

the mills are closed down, and the outlook is very uncertain.

Printing and allied trades.—Printers in jobbing offices find work quiet; there is no demand for men. Bookbinders are fairly busy, with no demand for additional hands.

Clothing trades.—With tailors prospects are good for an early spring trade. There are a few idle men; competition is very keen in this trade against Japanese and Chinese concerns.

Food and tobacco preparation.—Bakers find trade quiet.

Miscellaneous.—Barbers report trade good, a large number of shops running an extra number of chairs. Clerks and stenographers have not found business very satisfactory, and some are unemployed.

Transport.—Street railway employees are working steadily, with a large staff of substitutes; there is no demand for men. Teamsters and expressmen are at present not fully employed; a good spring and summer is anticipated.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A marked change has taken place in the labour market, conditions being not so favourable as for the preceding month. Owing to wet weather, work has fallen off in the building trades leaving a surplus of labour. The large force of unskilled labour employed on the sewer extension has been reduced considerably, and as a result a great number of labourers are out of employment. The metal trades have had a quiet month, but in general the trade is fair. The repairs on H.M.S. *Flora* has given employment to all available ship joiners. Retail trade has fallen off considerably, yet for the season of the year it is reported as good. There have been no changes in the hours of labour or rates of wages, and no

disturbance of satisfactory relations between employers and employees.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons and carpenters report a scarcity of work, while lathers and plasterers find sufficient work to keep all well employed. Painters, paper hangers, stonecutters report a scarcity of work while plumbers are very busy and all fully employed. Builders' labourers report work as dull.

Metal, engineering and shipbuilding trades.—Moulders, machinists, boilermakers' helpers report trade dull and not enough work for all hands. Electrical workers are fully employed and linemen find enough work to keep all hands busy. Blacksmiths report business dull. Shipwrights and caulkers report business dull and many unemployed. Horseshoers have had a good month and nearly all are fully employed.

Printing and allied trades.—Printers, pressmen and bookbinders report work as good and nearly all hands well employed.

Clothing trades.—Tailors report a slight improvement over the preceding month yet many are unemployed. Garment workers report trade good and all employed.

Food and tobacco preparation.—Bakers are fully employed and report business as good. Butchers are busy and well employed. Cigarmakers report business as good and all fully employed.

Leather trades.—Leather workers report trade dull.

Miscellaneous.—Barbers are all fully employed. Laundry workers are fully employed.

Transport.—Street railway employees are well employed. Longshoremen find business dull. Teamsters and expressmen are well employed.

Unskilled labour.—Owing to the partial closing down of civic work and the unsettled state of the weather there is no demand

for unskilled labour and there are many men out of employment.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been no change in the labour market since last month's report, the demand for labour being very dull in most of the branches of trade in this district, while there are a great number of men unemployed in the district and the chances of an early improvement in the conditions are very uncertain. In the logging industry there is a very uneasy feeling owing to the new tax that is being collected, affecting logs for export to the American side. In commercial circles business is quiet but not more so than usual at the time of the year, though the outlook is also little uncertain owing to the new form of taxation.

There have been no changes in the rates of wages during the past month. Everything is quiet among the labour organizations.

The total value of the exports to the United States from this port for the past year was \$762,411.80, of which coal is overwhelmingly the most important item, accounting for \$722,411.80. Logs were shipped to the value of \$15,410. The growth in the exporting of salt fish is shown by the fact that it comes next in the list, being \$10,408.50. Copper and gold ore were shipped to the value of \$7,725. The remaining sum is made up of small items classified under the heads of junk, furs, household goods and returned merchandise.

The quantity of coal mined here is the smallest for some years, but the monthly returns have showed a steady increase for some time and the new work which is being opened up will add materially to the sources of supply. The total tonnage was 289,136, of which 178,960 tons figures in foreign shipments and 110,176 tons as local consumption including the large supplies sent

to other coast cities. The proportion of coal consumed in the province to that exported is unusually large, denoting the development of a market close at hand.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—In the fishing industry there are a few men employed in the herring fishing and salting, but the season is nearly over.

Lumbering.—In the lumbering industry business is quiet owing to the bad weather and the new tax. In the saw mills the local mill is working three-quarter time owing to the lack of trade.

Mining.—In quartz mining outside of a few mines which are working steadily there is very little doing. In the coal mine work is steady at the different mines but there are quite a lot of men out of work.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades there is hardly any work going on at this time of the year. Painters report business as very dull.

Metal and engineering trades.—There is very little doing for machinists and engineers. Blacksmiths report business as fair for the time of the year.

Woodworking and furnishing trades.—Carriagemakers report business as fair for the time of the year.

Transport.—Teamsters and expressmen report business as dull.

Unskilled labour.—There is hardly any work for unskilled labour at present.

DISTRICT NOTES.

In the district conditions are similar to those existing in the city.

At the *Cumberland* mines there is a good deal of development work going on in the way of opening new shafts, slopes and at the new anthracite coal field which is being opened.

The Ladysmith Lumber Company reports a prosperous year in spite of the disastrous fire and strikes at Extension and Ladysmith coal mines. The capacity of the saw-mill has been doubled and a new drying kiln and planing mill have been installed. The figures of the output for the nine months of 1903, during which the company was enabled to operate, are as follows :—

| | |
|--------------------------|-----------|
| | Feet. |
| Lumber sold.. | 6,100,000 |
| Laths, sold.. | 5,000,000 |
| Shingles, sold.. | 5,086,000 |

HOURS OF LABOUR IN CANADA.—III. THE BUILDING TRADES.

THE tables published herewith represent the first of a series of statistical returns which, as announced in the December, 1903, number of the *Gazette*, it is the intention of the Department of Labour to present on the subject of the hours of labour in the several trades of the Dominion.* The tables to which the present article refers are prepared in accordance with the plan outlined in the introductory article ; they relate to the building trades and set forth in classified form such information as the Department has been able to obtain.

Table No. 1 relates to the hours of labour at present prevailing in the building trades in Canada.

Table No. 2 is an analysis of the returns presented in table No. 1, intended to illustrate more concisely the significance of the first table.

Arrangement of the Tables.

The arrangement adopted will be easily understood, the returns being presented by localities arranged alphabetically under the

*See page 528.

headings of the several provinces. For purposes of condensation, masons and bricklayers have been grouped together to form a single class, as have also carpenters and joiners, lathers and plasterers, painters, decorators and paper-hangers, and gas and steamfitters, the instances in which differing conditions as to hours prevail within these groups being very few and of little general significance. Under each of these headings returns are given of the total number of hours worked per week, the number of hours worked on each of the first five days of the week, and the number of hours worked on Saturdays, a distinction between Saturdays and the other days of the week being made in a great number of trades and localities, and the returns for both being necessary in order to obtain an accurate view of the situation.

Sources of Information.

The sources upon which the department has drawn for the material presented in these tables consist for the most part of special articles and references to the subject contained under a variety of headings in the issues of the *Gazette* from its inception, in September, 1900, to the present date, including more particularly a number of articles on wages and hours of labour in the several branches of trade published as the result of special investigations by the Department; periodical reviews of current changes in wages and hours; references to hours in the monthly reports of correspondents; in the monthly articles dealing with trades disputes; in the fair wages schedules prepared by officers of the Department for insertion in government contracts, and in various other reports and reviews that have appeared from time to time. In addition, however, to the information collected in this manner, the Department addressed communications to the secretaries of the different trade unions of the Dominion included under the heading of the building trades, and to its own correspondents in the several cities of the Dominion, requesting an explicit statement as to the hours of labour at present prevailing in their several locali-

ties, a return of the total hours worked per week, on the first five days of the week, and on Saturdays being requested in each case. A large number of replies have been received, and the information contained therein carefully entered upon the tables.

Analysis of Current Hours of Labour.

The table of current hours, as already explained, is designed to present as comprehensive a view as possible of the hours of labour at present prevailing in the various branches of the Dominion. As will be seen, however, returns from only a limited number of towns and cities were obtainable, and although these may doubtless be regarded as representative of conditions throughout Canada, it would be impossible to base an absolute statistical return on the figures as here given. No distinction, moreover, is made with regard to the population (one of the most important factors of determining the hours of labour in any class of employment) of the several localities represented in the table, or the probable number of work-people affected by the several returns.

In order to indicate more clearly the significance of the table from this point of view, a second table has been prepared in which the numbers of returns received from the various provinces of the ten-hour, nine-hour and eight-hour day respectively are entered under the headings of the several trades. Only the returns relating to working time during the first five days of the week are taken into consideration in this table.

Regarding this class of return alone, there will be found 1,119 such returns set forth in the table. Of these, 559 represent a ten-hour working day, 202 a nine-hour working day, and 58 an eight-hour working day, instances of the latter being entirely confined to Toronto and one or two other of the larger centres of population in Ontario, and to the province of British Columbia, while the nine-hour day is practically limited to the remaining cities of larger rank in the Dominion. Two methods of

further analysing these statistics may be adopted, according as reference is had primarily to the branches or trade or to the locality affected. Inasmuch as considerations of locality have greatly to do with determining what shall constitute the current hours of labour, the situation may first be dealt with from the point of view of the several provinces and of the particular towns and cities within the provinces.

Analysis by Provinces.

Nova Scotia.—There is no instance of an eight-hour working day in the building trades in this province, and only 15 instances of a nine-hour day, as against 60 instances of a ten-hour day. Halifax and Sydney represent the points at which the shorter work day prevails.

Prince Edward Island.—The ten-hour day is practically of universal application, though a movement in favour of a nine-hour day is reported from certain branches in Charlottetown.

New Brunswick.—As in Nova Scotia the eight-hour day is unknown in the building trades in this province. The table shows 13 instances of a nine-hour day and 59 of a ten-hour day. Stonecutters appear to enjoy relatively the highest percentage of the

shorter working hour. The city of St. John is the only locality in which the nine-hour day is universal in these trades.

Quebec.—There are 33 returns included in the table of a nine-hour and 130 of a ten-hour day. The nine-hour day is limited entirely to the cities of Montreal, Quebec, Hull and Sherbrooke, with the single exception of Grandby. St. Hyacinthe has a ten-hour day.

Ontario.—Going from east to west, the eight-hour day is for the first time met with in this province, with 26 instances recorded in the table. They will be found to be confined almost wholly to Toronto, Toronto Junction and London, with isolated instances in particular branches elsewhere. Hamilton, Ottawa, Brantford, Chatham, Niagara Falls and Kingston have a nine-hour day. In the smaller towns of the province the ten-hour day prevails almost universally, except in the larger centres of population where nine hours a day are worked in certain branches according to local arrangements. This is illustrated by the fact that the table presents ninety-eight returns of a nine-hour working day, and 260 of a ten-hour day in addition to the returns of an eight-hour work day given above.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES G, No. 2.

TABLE NO. II.—Showing the Number of Returns, by Provinces, received by the Department of Labour of the ten hour, nine hour and eight hour day respectively in the trades indicated.

Manitoba.—There are 19 returns of a ten-hour day and 10 of a nine-hour day in Manitoba. In the city of Winnipeg alone the nine-hour system may be considered as universal, though builders' labourers work ten hours. Brandon retains the ten-hour day.

North-west Territories.—Of 26 returns, 16 are of a ten-hour day and ten of a nine-hour day, Calgary and Edmonton furnishing the statistics for the latter total. In the smaller towns a ten-hour day prevails.

British Columbia.—In this province alone the eight-hour day takes precedence of the nine and ten-hour system, there being in the table 33 returns out of a total of 64, and only four returns of a ten-hour working day. In Nelson, Rossland and Vancouver the eight-hour system appears to be universal, and in Victoria and New Westminster it prevails with the exception of a few branches. Kamloops and Nanaimo have the nine-hour day throughout, and Greenwood for the majority of the branches. Three of the returns of the ten-hour working day are from Trail.

Analysis by Trades.

By way of supplement to the above analysis of the table by provinces, the following statement may be given from the point of view of the several branches of trades represented :—

Masons and bricklayers.—There are in all 113 returns relating to this branch, of which 76 are of a ten-hour day, 30 of a nine-hour day and 7 of an eight-hour day; the four latter being from British Columbia, and the balance from Toronto, Toronto Junction and London, Ont. Eighteen of the nine-hour day returns are also from Ontario, and 4 from British Columbia. British Columbia has only one return of a ten-hour day.

Carpenters and joiners.—Of a total of 146 returns, 108 are of a ten-hour day, 32 of a nine-hour day and 6 of an eight-hour day. British Columbia contributed 4 and Ontario 2 to the latter class, while Ontario contributed 15, Quebec 6 and British Columbia 4 to the nine-hour class.

Lathers and plasterers.—Of 98 returns, 66 are of a ten-hour day, 24 of a nine-hour

day and 8 of an eight-hour day. Ontario contributing to these totals 34, 12 and 3 respectively. Five instances of an eight-hour day are reported from British Columbia.

Painters, decorators and paper-hangers.—There are 109 returns for this class represented in the table, of which 78 represent a ten-hour day, 24 a nine-hour day and 7 an eight-hour day; 4 of the last-named class being reported from Ontario and 3 from British Columbia. Of the nine-hour class 10 are from Ontario, 4 from British Columbia, and 3 from Nova Scotia and Quebec each.

Plumbers.—Of a total of 80 returns only 6 are of an eight-hour day, and of these 4 are reported for British Columbia. Of the 52 returns of a ten-hour day, 20 are reported for Ontario, 16 from Quebec and 5 from New Brunswick. To the total of 22 instances of a nine-hour day Ontario contributed 11, and Quebec and British Columbia 3 each.

Gas and steamfitters.—Of 76 returns, 50 are of a ten-hour day, 20 of a nine-hour day and 6 of an eight-hour day. Four returns from British Columbia and 2 from

Ontario make up the last-named total, while 10 from Ontario, 3 from British Columbia and Quebec each, and 1 from Nova Scotia, Prince Edward Island, Manitoba and the Territories each make up the total of the nine-hour instances.

Stonecutters.—Some 92 returns for this class were obtained, of which 12 related to an eight-hour day, 24 to a nine-hour day and 56 to a ten-hour day. Seven instances of an eight-hour day were recorded for Ontario and 5 for British Columbia. Of the nine-hour class, Ontario with 10, Quebec with 6 and New Brunswick with 3 instances made up the chief items.

Builders' labourers.—Seventy-three instances of a ten-hour day, 26 of a nine-hour day and 6 of an eight-hour day are recorded under this heading. British Columbia and Ontario contributed 3 each to the eight-hour day class; Ontario contributed 12 British Columbia 5 and Quebec 3 to the nine-hour class, and Ontario 36 and Quebec 17 to the ten-hour class, British Columbia being unrepresented in the ten-hour-class, as was also the case with stonecutters, gas and steamfitters, plumbers and painters in that province.

LEGISLATION IN CANADA IN REGARD TO ALIENS.

II.—THE ALIEN LABOUR LAWS.

IN an article under the heading of 'Legislation in Canada in regard to Aliens,' which appeared in the December, 1903 issue of the *Gazette*, the subject was discussed almost entirely from the point of view of the laws governing immigration into the Dominion. The distinction between an immigrant proper and the class of men the legal position of which it is proposed to define in the present article, is somewhat difficult to state exactly, but is quite appreciable. An immigrant may be roughly described as an alien whose intention is assumedly to abandon his status of alienage and to identify himself, for all practical purposes, with the country of his adoption. The law, however, contains a number of provisions with regard to aliens who cannot properly be classified under this heading, and it is with this aspect of the case that the present article has to do.

The article, it will be found, deals chiefly with the legal provisions governing the bringing in of labour from a foreign country under contract to perform service in Canada. Before proceeding to the consideration of that portion of the subject, however, it will be well to state in a general way what are the rights and disabilities of aliens as such under the Canadian law.

Rights of Aliens.

Aliens have certain well-defined rights and privileges granted them by the law of Canada. These are for the most part stated or to be inferred under the terms of the Naturalization Act of the Dominion, which was cited more or less extensively in the article on the immigration laws. It is there enacted that, as regards the acquisition, holding or disposal of real or personal property in Canada, an alien has the same rights as, and is subject to no more legal restrictions than are imposed on the natural-born British subject. A title, accordingly, may be derived through an alien in the same way as through a naturalized citi-

zen.⁽¹⁾ Other more particular rights are conferred by the statutes of the different provinces. In Ontario the powers granted to an alien by the Dominion are confirmed and emphasized,⁽²⁾ and an alien is also expressly given the right to hold shares and to vote on his shares, in loan corporations, building societies,⁽³⁾ street railway companies,⁽⁴⁾ electric railway companies,⁽⁵⁾ etc. Nova Scotia gives aliens and foreign companies the right to hold and convey real property, and a title to land in Nova Scotia is valid in spite of the alienage of the former owner.⁽⁶⁾ In Prince Edward Island, by and Act of 1880,⁽⁷⁾ provision has been made for the prosecution of foreign corporations having no accredited agent in the province. This Act, however, was repealed in 1900, and corporations transacting business in Prince Edward Island, whether native or foreign, were placed on a footing of equality.⁽⁸⁾ By a special provision of the Act incorporating the Charlottetown Light and Power Co., aliens as stockholders were accorded the same privileges as British subjects, a clause which, it may be added, is inserted in most of the special Acts of incorporation passed by the Nova Scotia legislature. The New Brunswick law also confirms the Dominion statute in respect to the rights of aliens as to real and personal property,⁽⁹⁾ and by a special Act of the Consolidated Statutes an alien minister in charge of a congregation within the province has the right to solemnize marriage, as long as he remains in charge of such congregation.⁽¹⁰⁾ The Act to encourage sportsmen and tourists to visit the province makes, of course, no distinction of nationality,⁽¹¹⁾ and in the Act of 1898, to aid in the settlement of the crown

lands in the province, sums are granted to assist persons, 'whether residents of the province or foreigners.' ⁽¹²⁾ In Quebec there is a 'colonization fund' to encourage settlement on the Crown lands of the province, ⁽¹³⁾ and the privileges of the mining law are expressly extended to aliens. ⁽¹⁴⁾ Manitoba's Aliens' Act repeats the provisions of the Dominion statutes in respect to the privileges of aliens as to property. ⁽¹⁵⁾ The Manitoba Building Societies Act is also extended for the benefit of aliens, ⁽¹⁶⁾ and the right of being shareholders under railway companies is conferred by law. ⁽¹⁷⁾ So also, in British Columbia the right of aliens to hold real estate is identical with that of British subjects, ⁽¹⁸⁾ and an alien, upon making a declaration of his intention to become a British subject, may record a tract of unoccupied and unreserved Crown lands on the same terms as a naturalized citizen of the province. ⁽¹⁹⁾ A number of these provisions, it will be noted, approach somewhat closely to the type of enactment which was dealt with in the previous article, and the distinction referred to in the opening paragraph of this article, it may again be pointed out, is in several cases somewhat difficult to observe.

Disabilities of Aliens.

On the other hand, the disabilities of aliens under the Canadian law are not less plainly stated. The Naturalization Act of the Dominion grants them only such rights and privileges, even as to property, as are expressly conferred by law. ⁽²⁰⁾ No alien, further, as such, can qualify in Canada for any office, or for any municipal, parliamentary or other franchise. ⁽²¹⁾ No alien can be the owner of a British ship. ⁽²²⁾ The legislation of the various provinces enlarges

the list of these disabilities. The right to vote and serve on juries is generally denied, though other than British subjects may be summoned to serve as petit jurors in civil cases in British Columbia. ⁽²³⁾ Special minor disabilities of aliens under provincial statutes need not be referred to at length. An alien may not, for instance, under the assurances of Estates Tail Act of Ontario serve as 'protector of the settlement'. ⁽²⁴⁾ In Manitoba a special Act confirms the provisions of the Dominion Naturalization Act, requiring express mention of the rights and privileges of aliens in respect to property, ⁽²⁵⁾ and the law regarding foreign corporations operating within the province requires such companies to give yearly statements of capital stock, &c., under penalty of \$20 a day fine for every day's default after March 15 of each year. ⁽²⁶⁾ The ordinance of the North-west Territories which deals with foreign corporations imposes a fine of \$50 a day for every day on which such company carried on business without a license, and likewise calls for annual statements as to the nature and extent of the operations of the company, under the same penalty as that of the Manitoba statute. ⁽²⁷⁾ British Columbia has also enacted legislation requiring the registration and licensing of extra-provincial companies. ⁽²⁸⁾

The Alien Labour Law.

The legislation of chief importance in regard to aliens, as far as the working class in particular is concerned, is to be found in the Act to restrict the importation and employment of alien labour passed by the Dominion parliament in 1897 and its amendments of 1898 and 1901, usually cited in short form as the 'Alien Labour Law'. ⁽²⁹⁾ The main provision of the law forbids any 'person, company, partnership

or corporation,' to assist or encourage in any way the importation or immigration of an alien into Canada under contract of any kind to perform labour. Any such contract, whether express or implied, written or verbal, is in the eye of the law void and of no effect, and is punishable by a fine of not less than \$50 and not more than \$1,000. ⁽³⁰⁾ The master of a vessel who knowingly lands such an immigrant in Canada may be punished by a fine of not more than \$500 for each alien so brought in, and may also be imprisoned for a term not to exceed six months. ⁽³¹⁾ Exceptions to the law are made in the case of servants, private secretaries, &c., of foreigners temporarily resident in Canada, and skilled workmen in foreign countries may be engaged under contract to perform labour in or upon any new industry not at present established in Canada, provided, however, that such labour cannot be otherwise obtained. ⁽³²⁾ Professional actors, artists, lecturers, singers, or personal or domestic servants, are also exempted. ⁽³³⁾ The Act, further, does not prohibit any person from assisting a member of his own family or a relative to migrate from a foreign country to Canada for the purpose of settlement, ⁽³⁴⁾ and the promotion of immigration by duly authorized persons, as will be seen by reference to the preceding article of this series in the *Gazette*, is expressly permitted. ⁽³⁵⁾ An alien landed in Canada in contravention of the Act may be seized and deported at the expense of the person bringing him here. ⁽³⁶⁾ The Act also considers a promise of employment through advertisements printed or published in a foreign country as illegal. ⁽³⁷⁾ A very important reservation is made in the provision of the Act which restricts its application to residents or citizens only of such foreign countries as have enacted and retained in force a law of similar charac-

ter. ⁽³⁸⁾ The initiative in the enforcement of the Act may be taken by private individuals as a civil action in any court in which debts of a similar amount to the penalty imposed are now recovered, or the penalty may be recovered upon summary conviction before a superior court or county court judge or other official invested with the powers of a justice of the peace, the consent of the Attorney General of the province in which the prosecution is had to be first obtained. An informer furnishing original information that the law has been violated is entitled to such a share up to 50 per cent of the penalties recovered in the case of a conviction as may seem just to the Receiver General.*

Provincial Alien Labour Laws.

The general law of the Dominion, as above stated, with regard to alien labour is supplemented by legislation of a similar kind enacted by certain of the provinces, though, as in the case of immigration the federal authority constitutes the court of paramount jurisdiction in all matters pertaining to alienage. The province of Ontario, in the Act respecting master and servant, declares any agreement made with residents out of Canada for service in Ontario to be void with the exception of the classes named in the Dominion Act. With regard to the importation of skilled labour, however, the Ontario Act allows of it in the case not only of new industries not before established in the province, but of any industry whatsoever, if skilled labour for the purposes of the industry cannot otherwise be obtained. ⁽³⁹⁾ In an 'Act respecting certain Railways' passed in 1900, the employment of aliens in the construction of a subsidized railway is forbidden under a penalty of \$20 a day for

*See *Labour Gazette* for August, 1903, page 143, for a report of a conviction made under the Alien Labour Law at Rossland, B.C., under which a portion of penalty was awarded to the informer.

such alien employed, though the Act applies only to citizens of countries having an Alien Labour Law which excludes Canadians ⁽⁴⁰⁾ from similar employment. An amendment of 1898 to the British Columbia 'Master and Servant Act,' as further amended in the following year, is of the same general effect as the Ontario enactment just referred to. ⁽⁴⁰⁾

Pine and Pulp Wood Manufacture.

Legislation which may be regarded as directed more or less specifically against aliens is the provisions of the Ontario Statutes of 1898 and 1900, under the terms of which the *manufacture of pine and pulp wood* cut on the crown domain must be conducted within the limits of the province.⁽⁴¹⁾ Under authority of these Acts a 'manufacturing condition' is inserted in all sales of timber limits by the Commissioner of Crown Lands, and in all licenses or permits to cut pine or pulp wood on such limits, which directs that all pine so cut shall be manufactured into sawn timber within Canada, and that all pulp wood so cut shall also be manufactured within Canada into merchantable pulp, paper, sawn lumber, woodenware or other articles of commerce into which soft wood is commonly manufactured. ⁽⁴²⁾ Violation of this condition is made punishable by suspension of the license. The government may also seize logs which it is thought to be the intention of the licensee to have manufactured outside of Canada and dispose of them to persons who will manufacture them in Canada, and unless the licensee can give security within four weeks of such seizure that the logs will be manufactured within the limits of Canada the government may sell the logs and return the proceeds of the sale to the owner after deducting all expenses of such seizure and any sum that may be owing in respect to timber dues, crown dues, &c.

The Coasting Trade.

By order in council of the Dominion government of November 10, 1886, all *foreign vessels* trading on the coast and entering the harbours of Canada were made subject to certain regulations. Such vessels are permitted to clear cargo and passengers from foreign ports at one or more Canadian ports, but are not allowed to take on freight or passengers from one Canadian port and land the same at another Canadian port under penalty of a fine of \$400, the vessel being liable to detention as security. A foreign vessel may tow another vessel into a Canadian port, but having once dropped the vessel in Canadian waters cannot again take it in tow to move it further in Canadian waters. The general effect is to prevent foreign vessels from taking part in the coast trade of the country. Vessels fitted for or engaged in deep sea fishing are excepted from these restrictions.

Regulations Affecting the Fishing Industry.

The *fishing industry* of Canada is affected by a number of Acts relating to foreigners. The Act respecting fishing by foreign vessels' of the Revised Statutes permits the granting of licenses to foreign vessels to fish in the inshore waters of Canada, ⁽⁴³⁾ subject to the inspection by Canadian officers, ⁽⁴⁴⁾ any fishing vessel without such license being liable to forfeiture with all its contents and appurtenances, ⁽⁴⁵⁾ and resistance of the seizure being punishable by a fine of \$800 and two years' imprisonment. ⁽⁴⁶⁾ Vessels thus seized may be sold at auction with their appurtenances, cargo, &c., or reserved for the regular service. ⁽⁴⁷⁾ If sold the proceeds may be divided between the captors and the Consolidated Revenue Fund of the Dominion. ⁽⁴⁷⁾ The vessel so

Wreckers.

The status granted by the law of Canada to United States *wreckers* in Canadian waters may be referred to in conclusion. Such wreckers are permitted to salvage any wreck property and generally ply their trade in the waters of Canada contiguous to the United States. These privileges, however, are made conditionally upon like privileges being extended by the United States government to Canadian vessels. (w)

THE TRANSPORTATION COMMISSION—SESSIONS IN THE MARITIME PROVINCES.

AFTER a preliminary meeting held in Ottawa in December for purposes of organization and final receipt and discussion of instructions, the transportation commission appointed in May, 1903, began its active work of inquiry* with a session at St. John, N.B., on January 9. All of the members of the commission, including the secretary, were present. The commission proceeded later to St. Andrews, N.B., Halifax, N.S., Sydney, N.S., and other points in the maritime provinces, where much valuable information was received and reserved for full consideration as a result of investigations conducted.

Localities Visited.

A full statement of the localities visited by the commission during January, with dates, is as follows:—

St. John, N.B., 9th to 11th January.

St. Andrews, N.B., 12th January.

St. Stephen, N.B., 13th January.
Halifax, N.S., 14th and 15th January.
Glace Bay, N.S., 18th January.
Louisbourg, N.S., 18th January.
North Sydney, N.S., 18th January.
Sydney, N.S., 18th January.
New Glasgow, N.S., 20th January.

Procedure of Commission.

Formal sittings of the commissioners were held at the above points on the dates mentioned, but the commissioners also investigated many matters and visited several points independently. In cases where formal notices had been given, the mayors and presidents of the local boards of trade were, whenever possible, communicated with in advance, with the view that the public might be informed of the date and place of the sittings, and that the meetings might be properly organized and all interested persons afforded an opportunity to give evidence or submit statements. The plan was found to work very well; a few selected speakers in most cases represented the citizens, apparently to the entire satisfaction of the public.

No official statement as to the evidence taken was issued during the month. The

*See special article describing the circumstances which led to the appointment of the commission and outlining the scope of its investigation in the *Labour Gazette* for June, 1903, page 974. The personnel of the commission is made up as follows; Mr. John Bertram, Toronto; Mr. Robert Reford, Montreal; and Mr. C. E. Fry, Quebec.

following, however, is a brief summary of the reports of the more important sittings of the commission contained in the public press :

Opening Sittings at St. John, N.B.

The opening sittings of the commission were held at St. John, N.B., on Saturday, January 9, and on Monday, January 11. The recent satisfactory increase in the volume of winter port business at St. John was explained by the mayor of the city, the president of the Board of Trade, and other witnesses, who referred in detail to the connection of the C.P.R. with the port, and to the elevator and wharfage capacity of St. John, in which connection an expenditure of \$750,000, it was stated, had been undertaken by the city. It was pointed out that additional wharfage capacity was urgently needed, and additional berths for the accommodation of steamships. It was recommended also that the government undertake to dredge the channel and harbour in certain specified localities. The port, it was stated, was eminently safe and free from ice, and afforded plenty of room for the extension of railroad facilities. Trade statistics for the past several years were quoted to show the increasing importance of the export and import business. The views of the Shipping Federation of Montreal to the effect that St. John should be maintained as a free port and certain improvements carried into effect by the government, were presented. The possibilities of the fruit trade with the West Indies were also dealt with. The commissioners undertook to give careful consideration to the evidence presented, and to do everything possible to secure that Canadian shipments should be made through Canadian ports. The commissioners also held a private conference with the civic harbour committee.

Sessions at Halifax.

The city Board of Trade took charge of the evidence offered before the commission at Halifax in the way of representing local

interests. The mayor of the city introduced the commission and in reply to the address of welcome the chairman briefly explained the objects of the commission. The commission was in Halifax, he stated, for the purpose of collecting information on the facilities of the port as an outlet for trade, including consideration also of railway facilities and other matters connected with the question of water transportation. The presentation of information on this subject was then begun. A large and modern light-ship, it was stated, was needed off the entrance to the harbour. As regards terminal facilities the port was said to have an elevator of half a million bushels capacity. The wharfs were also almost sufficient for all purposes of terminal facilities and could easily be added to. The flour trade amounted to about 400,000 barrels and bags last year, when 5,756 vessels, sail and steam, of a tonnage of about 1,500,000 arrived and cleared from the port. Additional shunting facilities and double tracking were required. With regard to local trade, it was stated that over 60,000,000 feet of deals and half a million barrels of apples were shipped. Ice had not proved an inconvenience since 1862. On the question of ocean insurance, Halifax, it was stated, had been handicapped by the high premiums exacted by companies in England, Canada and the United States, in spite of representations to Lloyd's that vessels could be out of reach of land two hours after leaving the wharf. The underwriters, however, had decided upon fixed premiums for localities north of certain lines, and Halifax had suffered in consequence. At present where a rate of 20 cents would cover shipments from the west to St. John, thence to Liverpool via Halifax, the rate direct through Halifax would be 30 cents. Cheese in particular was mentioned as coming to St. John or Portland in preference to Halifax on account of insurance premiums. In 1902 the imports at Halifax were \$6,936,983 and in 1903 \$7,986,473. Exports in 1902 were \$7,589,957 and in 1903 \$7,983,153, in spite

of the partial failure of the fisheries. With regard to the banana trade with the West Indies, inasmuch as the United Fruit Company controls the trade and can afford to put fruits into Canadian markets at less price than it can be landed in Halifax, it would be impossible to develop it to any extent. A fast mail service, it was stated, was needed. The subject of western through freight was said to be largely a matter of railway facilities and Halifax was interested in seeing that the I.C.R., get better connection with the trunk lines. Prior to the second day's session the commission was taken for a cruise along the water front and inspected the terminal facilities at Richmond and at Deep Water. Storage and wharfage facilities at Dartmouth, it was stated, would shortly be increased. Between July and December 1902, 14,115 cars had arrived over the C.P.R., and 16,814 during the same period in 1903. The D. A.R.'s traffic during the same period was 1,800 cars, making a total increase of 4,501 cars over same period in 1902. There were 135 steamers at the wharfs handling 97,800 tons in 1902, whereas in 1903 there were 153 steamers handling 105,200 tons. The discrimination in grain freight rates in favour of the New England ports was also referred to, Halifax, it was stated, being handicapped in favour of these ports and of St. John. In concluding the sessions the chairman stated that the commission was much impressed with the natural advantages of Halifax harbour, which being the nearest point to Europe would undoubtedly secure the carrying of high class goods. It was further stated that the passenger trade was the hope for Halifax and that special attention should be paid to it.

Sessions at Sydney.

From Halifax the commission proceeded to Sydney where an interruption of a day took place to enable the members to inspect the Dominion Coal Company's properties and the harbour at Louisbourg. The fast Atlantic steamship project and the advisability of making Sydney a port of call

were the topics principally dealt with at Sydney. It was pointed out that the distance from Galway to Sydney was 1,980 miles, while the distance from Galway to Quebec was 2,600 miles. Passengers and mails landed at Sydney would reach Quebec and Montreal from 10 to 12 hours sooner than if they went by the St. Lawrence, and the vessels might then be able to go at lower speed and with greater safety while in the St. Lawrence. The building of the proposed Canso bridge was also advocated as another means of reducing the time between Sydney and Montreal. It was suggested that the proposed fast line of steamers should be required to coal with Canadian coal for the homeward trip and that by coaling at Sydney they would save the cost of the haul from there to Quebec, amounting to from \$1.25 to \$1.50 per ton. The need of greater docking and terminal facilities at Sydney was also referred to.

As the commission had not intended to visit Prince Edward Island, the needs of that province for increased transportation facilities were pointed out to the commission while at Sydney by representatives from Charlottetown. The exporters of the province, it was stated, were frequently prevented from exporting large quantities of oats and potatoes, as the only means they had of placing these and other agricultural products on the market was by the Dobell and Black Diamond liners calling once a fortnight. The freight rate from the island to the main land was stated to be practically prohibitive.

The needs of the local transportation service in Cape Breton were also presented to the commission.

In the session held at Sydney on January 18, it was stated by the captain and officers engaged in the Reid service between Port au Basque and North Sidney, which had been in operation three times weekly, summer and winter for three years, that the vessel had never experienced delay from fog and only two or three times from drift ice.

The commission adjourned in Montreal on January 21, no definite date being decided on for its next meetings. The commissioners and secretaries were given parti-

cular divisions of work to be performed before the next formal setting, which will be at the call of the chairman.

REORGANIZATION OF THE TORONTO DISTRICT LABOUR COUNCIL.

WITH the beginning of the year an important change in the constitution of the Toronto District Labour Council went into effect, which, inasmuch as the conditions of labour organization which suggested it are represented at many points elsewhere in Canada, is of more than local interest. The change was in the way of bringing within the jurisdiction of the district council the various local councils of the several trades which had previously existed on an independent basis and with no constitutional connection with the district council. It was therefore in the nature of an amalgamation of these bodies and their absorption into the district labour council, without abrogation of the functions of either, the result aimed at being the solidifying and unifying of the labour organization movement throughout the district in question. The plan on which the reorganization was carried out was as follows :—

The 'Sectional Council' Plan.

Unions affiliated with the council and engaged in work of a common nature are to be formed into 'sectional councils' under the jurisdiction of the central body. Thus there will be a building trades section, a printing trades section, a metal trades section, and so on, a miscellaneous section being provided for unions which do not fall under the common headings. There is to be a 'label section,' also to be composed of delegates from unions having a label. These sections are to be practically self-governing having the adoption of by-laws and the selection of officers entirely in their own hands, though the constitution demands that they must meet at least once a month and present a report to the central

body. With reference to representation on a sectional council, that also is under the jurisdiction of the council except in cases where an international union has legislated on the subject. Local unions, however, must provide that their quota of representation to their sectional council shall be selected from their representation to the district labour council. They must also pay the per capita tax directly to the central body which meets all expenses incurred by the sections, including salaries, printing, &c., though in the case of officers' salaries the council is not liable for more than \$18 per quarter.

Estimate of Membership.

The following approximate estimate of the numbers of unions and members in each section in the Toronto district has been issued by the council :—

Building Trades Section.

| | Members. |
|---|----------|
| Locals in District Labour Council, 11.. | 2,300 |
| Locals not in District Labour Council, 10.. | 2,800 |
| Total locals, 21.. | 5,100 |

Printing Trades Section.

| | |
|--|-------|
| Locals in District Labour Council, 6.. | 1,100 |
| Locals not in District Labour Council, 2.. | 500 |
| Total locals, 8.. | 1,700 |

Metal Trades Section.

| | |
|--|-------|
| Locals in District Labour Council, 10.. | 950 |
| Locals not in District Labour Council, 3.. | 450 |
| Total locals, 13.. | 1,400 |

Wood Working Section.

| | |
|--|-----|
| Locals in District Labour Council, 9.. | 950 |
|--|-----|

Miscellaneous Section.

| | |
|---|--------|
| Locals in District Labour Council, 45.. | 5,200 |
| Grand total, 96.. | 14,350 |

Of the above locals 81 unions with 10,500 members were affiliated with the district labour council previous to the change, leaving 15 unions and 3,850 members affiliated with their respective section councils only.

At three cents per quarter on each member, the per capita tax will amount to \$430.50 per quarter or \$1,722 per year. The

amount of expenditure of each of the six sections is placed at from \$96 to \$192 per annum, making a total expenditure by all the sections of about \$800 per year. With \$650 added for printing, postage, rent, officers' salaries, &c., the total expenditure is estimated at \$1,450 per year, leaving a surplus of \$272.

MUNICIPAL TRADING AND MUNICIPAL OWNERSHIP.*

A report on municipal trading* and municipal ownership, recently printed by order of the legislative assembly of the province of Ontario, embodies the results of an investigation conducted by a select committee appointed by the legislative assembly in May, 1903, for the purpose of selecting and publishing documents on municipal ownership and municipal trading.

The report opens with a catalogue of books, pamphlets, articles, &c., on the subject, which is followed by extracts and summaries from various sources, dealing with municipal ownership in Great Britain. Then come extracts from American sources, chiefly treating of the forms of municipal ownership in the United States, and in some cases comparing them with the systems of municipal ownership in Great Britain and Europe. Attached to this report is a return ordered by the legislative assembly on June 12, 1903, of the reproductive undertakings operated by municipalities in Ontario.

Municipal ownership has made great strides in Great Britain within the past few years, notwithstanding the strong opposition which has been raised against it in certain quarters. In a return issued by the local government board on 'Reproductive Undertakings,' it is stated that the total capital invested by municipalities in Great Britain in these enterprises on March 31, 1902, was £121,172,372, and the annual

average net profit was £378,281. The chief municipal undertakings enumerated are waterworks, gasworks, electrical supply, tramways, markets, baths and washhouses, burial grounds, working class dwellings, and harbour piers, docks and quays.

The arguments against municipal ownership adduced before a parliamentary committee in 1900 are summed up in the following extract from an article in the *Journal of Political Economy*, reprinted in this report: (1) Municipal authorities are too busy with purely administrative matters to engage in trading. (2) The legislative sphere of private enterprise is interfered with. (3) There is danger of overtrading. (4) It encourages socialism and discourages combination.

Municipal Ownership in the United States.

Municipal undertakings in the United States differ in several respects from those in England. Systems of waterworks are more frequently in the control of municipalities in the United States, but on the other hand, the only street railway conducted under public ownership is the one over Brooklyn Bridge in the State of New York. It is stated that private ownership of waterworks in the United States exists only in 19 cities out of 78, having a population, in 1900, of over 50,000. With regard to electric lighting systems, statistics are given for ten cities, which show that while the prices paid per street are to private companies before public operation varied from \$100 to \$325, the cost, inclu-

*Municipal Trading and Municipal Ownership or operation of Public Utilities. King's Printer, Toronto. 1903. 246 pages.

ding interest on capital, &c., under public ownership, ranged from \$40 to \$95 per arc. In a criticism of the statistics regarding electric lighting systems owned by municipalities, it is pointed out in a report by chief Walker, of Philadelphia, that many items which should be charged to operating expenses are often omitted, such as the salary of the superintendent, wages of a machinist, repairs, insurance, cost of maintenance, &c.

Municipal Ownership in Canada.

In the return of reproductive undertakings operated by municipalities in Ontario, it is stated that out of 14 cities, 106 towns and 134 villages, to which forms of inquiry were sent, returns had been received by the 18th of November, 1903, from 12 cities, 90 towns and 118 villages. Of these, 11 cities, 57 towns and 21 villages had been carrying on reproductive undertakings, and a number of the others reported that they were about to acquire waterworks or electric lighting plants. There are 79 municipalities in Ontario which own their waterworks, 35 which have their own electric lighting plant, 4 which supply electricity, two supply gas, two have municipal cemeteries, one possesses a dock and one operates its own street railway.

With regard to the financial success of these undertakings, there was an average annual loss on the municipal street railway and electric lighting system, combined, at Port Arthur, of \$1,370.95, for the period of four years, ended December 31, 1902. Profits are shown in 44 cases, and losses in 48. In one case there was no profit or loss, and in 23 no reports were made. The municipal gas plant at Brockville, which was established in 1901, realized an annual profit of \$4,000 on an invested capital of \$85,000, but the natural gas sold by the corporation at Kingsville showed a loss of \$243.38 on an invested capital of \$27,000. The business of supplying electricity to consumers by municipalities, has been begun too recently in most cases to admit of statistics of profit and loss. In Brace-

bridge, there was an average annual profit of \$620.28 on electric lighting and electricity supply combined, which were first provided by the town in 1895, but at Hespeler, where the system was only established in 1900, there was a loss of \$3,084.60, with an invested capital of \$15,483.48.

ELECTRIC LIGHTING IN CANADA.

STATISTICS relating to electric lighting in Canada, issued during the month of January by the Dominion statistician, show an important growth and development in this branch of industry during the year just passed. The returns, though of interest primarily to electrical workers, linemen, and the other classes of employees of that branch, are of considerable general importance as well.

Returns for the Dominion.

According to the report of the officers carrying out the Electric Light Inspection Act there were last year 324 plants in operation in the Dominion with 14,780 arc lamps and 212,861 incandescent lights. Regarding the arc lamp as equal to ten incandescent lights there were on June 30 last 1,360,661 lights in use in Canada, an increase of 236,865 lights in the year, or over 21 per cent. Since 1898 there has been an increase of 65 in the number of establishments, 4,391 in the number of arc lamps and 749,246 in the number of incandescents.

The largest single plant in the Dominion is that of Toronto, which has 170,000 lamps, the second largest is that of the Lachine Rapids Hydraulic and Land Company, which has 158,503 lights, the third in size being the Ottawa Electric Company with 111,927 lights.

Returns by Provinces.

Maritime provinces.—There were 1,267 arc lamps and 193,120 incandescent lights in the three provinces, an increase of 33½ per cent in the number of arc lamps and 98 per cent in incandescents over the

figures of 1898. Nova Scotia has increased the number of its incandescents by 32,140 during the same period.

Quebec.—Quebec has 53 plants, 3,853 arc lights and 409,503 incandescents. Since 1898 the gain in arc lights has been 47·6 per cent and in incandescents 212·3 per cent, while the number of plants has increased by 13.

Ontario.—The province of Ontario is the chief employer of electric light having 203 of the 324 plants in use in the Dominion. It has also considerably more than one half of the total of arc lights and 47 per cent of the incandescent lights. Since 1898 the gain in arcs has been 36·2 per cent and in incandescents 138·6 per cent. The plants in Ontario are smaller than in Quebec, the average in Quebec being 15,000 arcs and incandescents per plant, and in Ontario 3,115.

Manitoba.—Manitoba has increased from 162 to 373 in its arc lights, and in its in-

candescents from 13,800 to 31,905, since 1898.

North-west Territories.—There are 29 arcs and 6,677 incandescent lights in operation, an increase during the past five years of 4 in the former and 997 in the latter.

British Columbia.—The largest proportional increase of any province is shown in the case of British Columbia, the increase in arcs being 377, or 82 per cent, and in incandescents 74,297 or 257 per cent. In 1898, British Columbia and Nova Scotia had practically the same number of lights; at present British Columbia has 384 more arc lights and 42,326 more incandescents.

The above figures show that the increased use of electric lights is general throughout Canada and that, proportionately, British Columbia stands first in that increase, with Quebec second, Ontario third, Manitoba fourth and Nova Scotia fifth.

LABOUR UNIONS AND BRITISH INDUSTRY.*

IN the Bulletin of the United States Bureau of Labour for January, there is an article on English trade unions and their effect on British industry, based on personal investigations of the author, Mr. A. Maurice Low, and containing the views of prominent employers and officers of unions, on subjects relating to labour organizations. The writer states that the general opinion in England is that the trade unions there are a quarter of a century in advance of those in the United States. As evidence in support of this view, it is stated that the relations between capital and labour in America are not so cordial as in England, and strikes are more common in America and are carried on with more bitterness on both sides. The opposition of the union man to working with the non-union man is less marked in

England than in the United States, and the 'sympathetic strike' is every year falling into greater disrepute.

There is a marked increase in England, on the part of both employers and men, of a desire to create the machinery to settle all disputes by voluntary conciliation or arbitration. As a proof of the value of conciliation boards in adjusting differences between employers and their men, the secretary of the Durham Miners' Association, composed of 90,000 men and 192 branches, stated that last year, not more than £5 (\$24.33) was drawn from the strike fund, and this only in one or two minor instances hardly worthy of notice.

Some of the more important unions have assets exceeding \$1,500,000. The funds are used to support men who are out of work because of a strike or lockout, to pay sick or accident benefits, and in many cases to

*Bulletin of the United States Bureau of Labour. No. 50.—January, 1904.

provide old age pensions. The largest expenditure is for 'provident benefits,' that is for purposes other than strikes. The United Society of Boiler Makers and Ship-builders in thirty-four years expended £1,663,245 for provident benefits, and £97,305 for disputes. The Iron Founders' Society, during its existence, has spent £1,612,721 in provident benefits, and £55,169 in dispute pay. In forty-one years, the Amalgamated Society of Carpenters and Joiners has spent £1,543,850 for provident benefits, and £220,177 for disputes.

Two successful systems of profit-sharing on a large scale are described at length, in this article, which are carried out in the Thames Iron Works and in the works of the South Metropolitan Gas Company of London. After undergoing five successive strikes, the Thames Iron Company, in 1892, voluntarily adopted what they called the good-fellowship system of payment of wages. The labour value of every contract, and so far as possible, of every job and piece, was ascertained, and when the wage cost of production was less than the labour value, the balance of gain was divided among those who had earned it by extra skill and energy. In ten years, more than £80,000 has been paid in good-fellowship dividends. In 1894, the Thames Iron Works adopted the eight hour day, and the combination of the bonus system and the eight hour day has been very successful, both to the company and to the employees. The total wages paid in nine years before the introduction of the eight-hour day amounted to £1,380,748 7s. 6d., and the wages paid in nine years after its introduction came to £2,065,707 11s. 10d. The president of the company stated that, taking the same two periods of nine years, their profits have very considerably increased, while the losses incurred on unsuccessful contracts were reduced by three-

fourths during the later period. The good-fellowship system was not opposed by the trade unions, and four-fifths of the employees are members of the various unions, according to the president of the company, who, himself, is favourable toward them.

In the case of the South Metropolitan Gas Light Company, the bonus paid to employees is based on the price of gas, and amounts to $\frac{2}{3}$ per cent on the annual salary of officers and wages of workmen for every penny at which gas sold below 3s. 1d. (75 cents) per 1,000 feet. There is no bonus when the price of gas is equal to or higher than this amount. One-half of the bonus is required to be invested in the names of three trustees in the company's ordinary stock, and the remaining half is withdrawable at a week's notice, but it may be left in the company's hands to accumulate at interest, or it may be invested in stock with the trustees. The bonus fund is managed by a committee of 36 members, of whom half represent the workmen, and half the directors of the company. This committee appoints three trustees, one director, one officer and one workman, in whose names the bonus and dividends as they annually accrue, are invested in the company's ordinary stock. The company has also established an accident fund, to which all its employees are invited to contribute. This fund is a substitute for the Workmen's Compensation Act of 1897, and the provisions of the scheme cannot be made less favourable to the men than the provisions of the Act. In addition to this there are also a sick and burial fund, and a superannuation fund, to all of which the company contributes liberally. The profit-sharing scheme of this company was at first opposed by the Gas Workers' Union, but at present both union and non-union men are in its employ.

GOVERNMENT CONTRACTS FOR THE MONTH OF JANUARY.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signatures of both parties to them, during the month of January, together with the minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule inserted in each contract.

Addition for storage, Printing Bureau, Ottawa, Ont.; date of contract, 13th January, 1904; amount of contract, \$9,100.

| Trade or Class of Labour. | Rate of Wages. | |
|-----------------------------------|-----------------|---------------------|
| | Not less than : | |
| Bricklayers.. . . . | \$3.60 | per day of 9 hours. |
| Masons.. . . . | 3.60 | " " |
| Stonecutters.. . . . | 3.24 | " " |
| Builders' labourers.. . . . | 1.80 | " " |
| Quarrymen.. . . . | 1.71 | " " |
| Derrickmen.. . . . | 2.00 | " " |
| Powdermen.. . . . | 2.00 | " " |
| Excavators.. . . . | 1.80 | " " |
| Carpenters.. . . . | 2.00 | " " |
| Shinglers.. . . . | 2.00 | " " |
| Lathers.. . . . | 2.25 | " " |

| Driver, 1 horse and cart.. . . . | 2.00 | " " |
| " 2 horses and wagon.. . . . | 3.00 | " " |
| Timekeepers.. . . . | 1.50 | " " |

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the number of the *Canadian Patent Office Record*, issued by the Department of Agriculture during the month of January.

THERE were 489 Canadian patents issued during the month of October. Of these, 36 were for inventions relating directly or indirectly to various methods of locomotion, 31 were for new industrial machines, and 9 others for parts of machinery. There were also 20 for different kinds of apparatus, and 20 for industrial processes. There were 23 electrical inventions, 10 patents relating to agriculture and dairying, and 10 relating to steam engines.

Inventions relating to Locomotion.

The patented inventions relating to locomotion included 14 for dumping cars, 5 motor vehicles, 5 brakes, 6 rails, 4 railway ties, 3 switches, 3 signalling systems, and others.

An important invention connected with railways is a *safety device* whereby trains may be automatically stopped when reaching a danger signal. It consists of a semaphore, with a lever attached to it which projects towards the track when the semaphore is set at 'danger.' A train to be adapted for this invention must be equipped with air brakes. A branch pipe pro-

jecting from the train, is connected with the air brake system forming a part of it. A glass bulb is at the end of the pipe, and when the train is passing the semaphore, the bulb is broken by the lever extending from the semaphore. In this way the brakes are automatically applied.

Machinery.

Of the machines that were patented during the month, three were for use in the manufacture of cans, three for various processes of metal working, one for treating pulp, and four sewing machines, one of which is for the purpose of sewing sacks. There is a machine for laying tracks, combined with which is a mechanism for driving spikes, so that the tracks may be laid and fastened to the ties entirely by machinery. The same machine also deposits the ties on the roadbed, thus reducing all the operations to a mechanical process.

An attempt to minimize the danger of boiler explosions is found in a safety device, consisting of a plug adapted for insertion through the boiler shell, with a weakened portion or channel exterior to the boiler. There is a bushing within the plug, between its inner end and the channel, containing a valve seat, and a valve adapted for seating upon it, and another bushing between the outer end of the plug and the channel, carrying a stem adapted to maintain the valve normally unseated.

Industrial Processes.

A number of important patents were issued for new industrial processes. Two related to the treatment of cast iron. A process of hardening and tempering this metal consists of heating the cast iron, then dipping it in a bath or solution consisting of sulphuric acid and red arsenic in the proportions of one gallon of the former to three-quarters of a pound of the latter. A method of preparing a soldering compound for cast iron consists in mixing 70 parts of finely divided metal, such as iron filings, 15 parts of sub-oxide of copper, and about

15 parts of pulverized glass borax, then mixing 40 parts of this compound with 10 parts of an alkali hydrate and 40 parts of water glass.

In opposition to the present method of using pure water for the production of steam for manufacturing purposes, a process has been devised for obtaining more heat by retarding the boiling point of water. For this purpose, there is mixed with the water in the boiler a very dense solution composed of such salts as chloruret of calcium, chloruret of sodium, or chloruret of baryum, or else a mixture of these salts and of a product comprising chloruret of baryum, tannin and mucilaginous matters.

A process of producing a silky lustre in cotton goods or fabrics consists in first carding the cotton, combing it, then gassing or singeing it, to remove the down, and finally mercerizing it under tension.

Electrical Inventions.

Among the electrical inventions are a storage battery, a system of wireless telegraphy, three switches, two railway signals, a lamp, and a thermometer. An electrolyte for electric accumulators consists of a composition of powdered or precipitated sulphate of lead, moistened with dilute sulphuric acid, thoroughly mixed together, the proportions of the mixture being determined by the quality of the sulphate of lead, and the purpose for which the accumulators are to be used.

Miscellaneous Inventions.

There were ten patents for acetylene gas generators, two heating systems, and two gas burners. Among agricultural implements were two potato diggers, a plough, a rotary harrow, and two milking machines. A process of making milk powder consists in evaporating fresh milk in a vacuum by the action of steam and under agitation, until the amount of water contained in it is reduced to from 25 to 30 per cent. It is then spread out in the air at a temperature below the melting point of the fatty con-

stituents, and left to evaporate, until the amount of water is from 16 to 20 per cent. It is then reduced to a powder and further dried at the same temperature, until the water amounts to 14 per cent or less.

REPORT OF CANADIAN MANUFACTURERS' ASSOCIATION ON CONDITIONS OF EMPLOYMENT IN CANADA.

ON November 10 last the parliamentary committee of the Canadian Manufacturer's Association instituted a special investigation among the members of the association as to the supply of labour at present available in the manufacturing industry of Canada. The result of the inquiry was given to the public in a special report issued under date of January 14, 1904, a summary of which is presented below. The report, it was explained, was prepared for business purposes, with the practical end in view of assisting individual members of the association to secure any help they might require. The plan adopted was to forward an inquiry circular to the 1,306 members which were on the list of the association on the date named, the inquiry being in part as follows:—

'We desire to ascertain the existing conditions respecting the supply of labour in the manufacturing industries of Canada at the present time, and further to place the members of this association in touch with reliable sources of supply. Please give us the following information: (1) Are you at present in need of any classes of labour? (2) If so, how many? (3) Men? Women? Girls? Boys? (4) Do you anticipate any difficulty in securing this help?'

Some 434 members sent in replies to the questions above formulated and it is on these reports that the tabular statement issued by the association was based.

Statement by Provinces.

The following table shows the results of the inquiry under the heading of the several provinces:—

| Province. | Men. | Boys. | Females. | Total. |
|-----------------------|-------|-------|----------|--------|
| Ontario..... | 1,110 | 312 | 1,461 | 2,883 |
| Quebec..... | 312 | 69 | 663 | 1,044 |
| New Brunswick..... | 131 | | 65 | 196 |
| Nova Scotia..... | 330 | | | 330 |
| Manitoba..... | 80 | 4 | | 84 |
| British Columbia..... | 160 | | | 160 |
| Total..... | 2,123 | 385 | 2,189 | 4,697 |

Statement by Branches of the Industry.

In the following table the results of the inquiry according to the branches of the manufacturing industry affected are set forth:—

| Branches. | Men. | Boys. | Females. | Total. |
|----------------------------------|-------|-------|----------|--------|
| Agriculture implements..... | 12 | | | 12 |
| Biscuits and confectionery..... | 9 | 8 | 31 | 48 |
| Boots and shoes..... | 208 | 20 | 82 | 300 |
| Brooms and brushes..... | 10 | 20 | 50 | 80 |
| Buttons..... | | 4 | 6 | 10 |
| Carriages and sleighs..... | 61 | 13 | | 74 |
| Clothing..... | 5 | 26 | 1,198 | 1,229 |
| Cordage..... | 2 | 5 | 50 | 57 |
| Cottons..... | 30 | 40 | 135 | 205 |
| Electrical supplies..... | 6 | 6 | 7 | 19 |
| Flour and meal..... | 5 | 3 | 5 | 14 |
| Fur workers..... | | | 40 | 40 |
| Glassware..... | 29 | 2 | 23 | 54 |
| Glove makers..... | | | 15 | 15 |
| Hats and caps..... | 15 | 6 | 85 | 106 |
| Iron and steel..... | 376 | 58 | | 434 |
| Jewellers and silversmiths..... | 14 | 7 | 110 | 131 |
| Leather & manufactures..... | 84 | 2 | | 86 |
| Lumber..... | 534 | | | 534 |
| Paints, oils, &c..... | 15 | | 5 | 20 |
| Paper and manufactures..... | 30 | 36 | 54 | 120 |
| Pianos and organs..... | 29 | | | 29 |
| Plaster..... | 50 | | | 50 |
| Pork packers..... | 27 | | | 27 |
| Printers, lithographers, &c..... | 11 | 24 | 84 | 119 |
| Rubber goods..... | | | 53 | 53 |
| Silk goods..... | | | 25 | 25 |
| Stoneware..... | 10 | | | 10 |
| Tinware..... | | 15 | 10 | 25 |
| Tobacco..... | 90 | 40 | 50 | 180 |
| Woodenware..... | 414 | 28 | | 442 |
| Window shades..... | 6 | 15 | 35 | 56 |
| Woollens..... | 40 | 7 | 36 | 83 |
| Total..... | 2,123 | 385 | 2,189 | 4,697 |

It will be seen that the statement of the Manufacturers' Association indicates a total need among the members of 4,697 hands, made up of 2,123 men, 385 boys and 2,189 women.

A previous inquiry made in March, 1903, showed a total need among the members of 11,104 hands.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

A feature of the past two months in the immigration movement has been the numbers reported as coming from Europe since the opening of the winter season, being considerably in excess of last winter's showing, which in turn was ahead of previous seasons. The population of Manitoba and the North-west Territories is estimated to have been increased by about 3,000 in this way since November 1, the majority of the new comers being English, though the German and Scandinavian races were well represented. A decrease in the number of Russian, Polish and German Jews has been reported, the tide of immigration now setting more particularly from the British Isles and Northern Europe. Halifax has been the leading port of entry for immigrants during the past month, and with few exceptions their destination was western Canada, a party of English coal miners passing through to British Columbia, and a few others of the same class settling in New Brunswick.

With regard to the outlook for 1904 it is expected that one of the largest immigration movements in the history of Western Canada will occur next spring and summer.

Reports concerning the condition of the Barr colonists were to the effect that the settlers were getting along very well, and that no suffering had been reported among them this winter.

A petition from the Farmers' Institute of the district of East Algoma was addressed to the Honourable the Minister of the Interior asking that 'every possible encouragement should be given to induce farm labourers to come to Ontario.' The petition was presented in view of the statement addressed to the minister in the course of an interview 'by various labour organizations on January 4, 1904, in the city of Toronto to the effect that more me-

chanics and farm labourers are not wanted in this country.'

Sales of the Canadian North-west Land Company for 1903 amounted to 259,204 acres at \$1,361,885. Sales of the previous year amounted to 515,017 for \$2,153,578. The decrease is accounted for by the fact that in 1902 large tracts were sold to companies while last year the great bulk of the land was sold to individual purchasers.

The first annual report of the Italian Immigration Society of Montreal refers to the sending to Canada by the Italian government of a representative to investigate conditions, with a view to the encouragement of immigration to Canada. The report also shows that money was advanced to 1,163 immigrants and that 5 were unable to work from ill-health and were sent back to Italy. The society hopes, with the assistance of the Italian government, to open a house of refuge for Italian immigrants at Montreal before the close of the year.

The legislative committee of the British Columbia Legislature on the Immigration Act held a number of sittings during the month, when witnesses were examined on the subject of the admission of Japanese to Canada.

A convention of land agents of the United States and Canada was held at St. Paul in the closing week of January. The object of the meeting was to prevent the circulation of statements calculated to injure the Emigration of American farmers to Canada. A permanent organization was effected and a vigorous advertising campaign decided upon.

Land Distribution in Ontario.

Since November 1, 1902, the Crown Lands Department of Ontario has sent out 10,250 certificates to veterans of 1866 and of the South African War entitling each

participant to 160 acres of land. Some 3,000 of these have already selected land, representing the actual taking up of 490,000 acres or twenty-one townships if the settlement were solid. As only one veteran, however, is permitted to locate in each square mile, these locations must be scattered over 84 or more townships. The number of townships in new Ontario set aside by the government from which veterans might choose land was 136. In all some 30,000 applications for grants were received by the department in this connection. The time for making the application expired on December 31 last. No statistics of the number of veterans who have actually settled on their land are as yet available.

Present Land Values in Western Canada.

An upward tendency in land prices has been for some time noted in the west, though it is stated that there is no immediate prospect of a further material advance. It is reported that nearly all of the cheaper lands belonging to the Canadian Pacific Railway Company have now been sold, and that the company has very little agricultural land priced at less than five dollars per acre in localities where two years ago the same land could be procured for \$3 per acre. With regard to the coming year's operations, the company, it is stated, while not expecting to sell as many acres as during some other seasons, expects to make more sales to actual settlers than ever before. Large sales will also be made to settlers, who have taken up Manitoba and North-west Territory homesteads during the past few years and now require more land than the homestead allotment of 160 acres. The highest priced farming portions of the C.P.R. Co., are now to be found in Manitoba and South Eastern Assiniboia where they are held at about \$10 per acre, though choice sections near town sites occasionally sell from \$20 to \$50 per acre.

Homestead Entries during December, 1903.

The following statement published by courtesy of the Department of the Interior shows the number of homestead entries, according to the various agencies, made during the month of December, 1903, as compared with the month of December, 1902:

TABLE OF HOMESTEAD ENTRIES DURING
DECEMBER.

| Agency. | 1903. | 1902. | Increase. | Decrease |
|--------------------|-------|-------|-----------|----------|
| Alameda..... | 90 | 193 | | 103 |
| Battleford..... | 105 | 59 | 46 | |
| Brandon..... | 23 | 115 | | 92 |
| Calgary..... | 132 | 93 | 39 | |
| Dauphin..... | 31 | 35 | | 4 |
| Edmonton..... | 174 | 202 | | 28 |
| Kamloops..... | 22 | 6 | 16 | |
| Lethbridge..... | 71 | 72 | | 1 |
| Minnedosa..... | 25 | 29 | | 4 |
| New Westminster | 2 | 3 | | 1 |
| Prince Albert..... | 176 | 148 | 28 | |
| Regina..... | 422 | 341 | 81 | |
| Red Deer..... | 71 | 92 | | 21 |
| Winnipeg..... | 68 | 56 | 12 | |
| Yorkton..... | 178 | 196 | | 38 |
| Total .. | 1,570 | 1,640 | 222 | 292 |

It will be seen that there was a net decrease of 70 in the number of entries during the month, although the following table will indicate that there has been a net increase in the total of 1,299 entries since the beginning of the present fiscal year, as compared with the same period in 1902:—

TABLE OF HOMESTEAD ENTRIES
JULY-DECEMBER.

| Month. | 1903. | 1902. | Increase. | Decrease. | Remarks. |
|----------------|--------|--------|-----------|-----------|--------------|
| July..... | 3,438 | 2,622 | 816 | | Net increase |
| August..... | 2,288 | 1,904 | 384 | | |
| September..... | 1,845 | 1,416 | 429 | | |
| October..... | 1,958 | 2,142 | | 184 | |
| November..... | 2,406 | 2,482 | | 76 | |
| December..... | 1,570 | 1,640 | | 70 | |
| Total | 13,505 | 12,206 | 1,629 | 330 | 1,299 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia during the month of December, 1903, were as follows :—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS.—DECEMBER.

| Nationalities. | No. of entries. |
|---|-----------------|
| Canadians from Ontario | 221 |
| " Quebec | 28 |
| " Nova Scotia | 4 |
| " New Brunswick | 14 |
| " Prince Edward Island | 3 |
| " Manitoba | 40 |
| " North-west Territories | 31 |
| " British Columbia | 5 |
| Persons who had previous entry | 198 |
| Canadians returned from the United States | 35 |
| Americans | 444 |
| Newfoundlanders | 170 |
| English | 40 |
| Scotch | 14 |
| Irish | 9 |
| French | 15 |
| Belgians | 1 |
| Swiss | 3 |
| Italians | 51 |
| Roumanians | 163 |
| Greeks | 3 |
| Syrians | 4 |
| Germans | 19 |
| Austro-Hungarians | 25 |
| Hollanders | 15 |
| Danes (other than Icelanders) | 12 |
| Icelanders | 3 |
| Swedo-Norwegians | 3 |
| Russians (other than Mennonites and Doukhobors) | 15 |
| Mennonites | 12 |
| Doukhobors | 12 |
| Chinese | 3 |
| Bulgarians | 3 |
| Total | 1,570 |

Representing 4,225 souls.

The following table showing the nationalities of homesteaders who have made entries during the calendar year 1903, as compared with the number making such entries in the calendar year 1902 will be found interesting :—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS 1903.

| Nationality. | No. of Entries. | |
|---|-----------------|--------|
| | 1902. | 1903. |
| Canadians from Ontario | 3,587 | 3,977 |
| " Quebec | 364 | 550 |
| " Nova Scotia | 91 | 152 |
| " New Brunswick | 96 | 98 |
| " Prince Edward Island | 39 | 79 |
| " Manitoba | 885 | 1,055 |
| " North-west Territories | 438 | 611 |
| " British Columbia | 50 | 66 |
| Persons who had previous entry .. | 1,469 | 2,451 |
| Canadians returned from the United States | 737 | 777 |
| Americans | 8,061 | 10,302 |
| Newfoundlanders | 2 | 2 |
| English | 1,649 | 3,632 |
| Scotch | 478 | 831 |
| Irish | 268 | 325 |
| French | 110 | 232 |
| Belgians | 40 | 65 |
| Swiss | 13 | 17 |
| Italians | 5 | 21 |
| Roumanians | 45 | 88 |
| Greeks | 6 | 10 |
| Syrians | 543 | 934 |
| Germans | 1,987 | 2,805 |
| Austro-Hungarians | 3 | 19 |
| Hollanders | 48 | 61 |
| Danes (other than Icelanders) | 183 | 203 |
| Icelanders | 431 | 583 |
| Swedo-Norwegians | 267 | 315 |
| Russians (other than Mennonites and Doukhobors) | 111 | 94 |
| Mennonites | 207 | 2,284 |
| Doukhobors | 3 | 7 |
| Chinese | 1 | 1 |
| Poles | 1 | 1 |
| Spaniards | 1 | 1 |
| Brazilians | 1 | 1 |
| Bulgarians | 3 | 2 |
| Turks | 15 | 15 |
| Persians | 13 | 13 |
| Australians | 1 | 1 |
| New Zealanders | 1 | 1 |
| Total | 22,215 | 32,682 |
| Representing 64,968 souls in 1902. | | |
| " 90,455 souls in 1903. | | |

The above table thus shows an increase of 10,467 in the number of entries and of 25,487 souls in the calendar year 1903 over that of 1902.

Of the total number of entries made during December by persons coming from the United States into Canada, 183 were from Dakota, 120 from Minnesota, 27 from Iowa,

22 from Wisconsin, 21 from Nebraska and 12 from Montana.

The following table shows the number of homestead entries made during the calendar years 1902 and 1903 respectively by persons coming from the various States and territories of the American Union.

TABLE SHOWING HOMESTEAD ENTRIES BY PERSONS COMING FROM THE UNITED STATES.

| States. | No. of Entries. | |
|------------------|-----------------|--------|
| | 1902. | 1903. |

Lands Patented in December, 1903.

The following is an abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of December, 1903:

TABLE OF LANDS PATENTED DURING DECEMBER.

| Nature of Grant. | No. of Patents. | No. of Acres. |
|---|-----------------|---------------|
| | | |
| British Columbia homesteads | 3 | 459.31 |
| British Columbia sales | 1 | 101.00 |
| Commutation grants | 2 | 52.53 |
| Homesteads | 329 | 51,734.11 |
| Leases | 1 | 153.23 |
| Manitoba Act grants | 1 | 5.00 |
| Military homesteads | 1 | 288.56 |
| Mining lands sales | 3 | 105.00 |
| North-west Half-breed grants | 55 | 11,082.06 |
| Quit claim special grants | 5 | 800.00 |
| Railways:— | | |
| Canadian Northern Ry. Co. | 11 | 3,036.13 |
| Can. Pac. Ry. grants | 30 | 26,462.69 |
| Can. Pac. Ry. roadbed and station grounds | 1 | 10.11 |
| Manitoba North-western Ry. | 4 | 640.00 |
| Manitoba South-western Col. Ry. | 24 | 6,091.62 |
| Qu'Appelle, Long Lake and Sask. Ry. and Steamboat Co. | 1 | 640.00 |
| Shuswap & Okanagan Ry. Co. | 1 | |
| Sales | 21 | 3,350.26 |
| School lands sales | 8 | 985.17 |
| Special grants | 2 | 2.00 |
| Yukon Territory sales | 20 | 701.53 |
| Total | 524 | 106,700.25 |

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, JANUARY, 1904.

During the month of January, the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to, the regulations for the suppression of the sweating system, and securing payment to the workingmen and women of fair wages, and

the performance of the work under proper sanitary conditions :—

| Nature of order. | Amount of order. |
|--|------------------|
| Making and repairing metal dating and other hand stamps, also type and brass crown seals | \$ 265 75 |
| Making and repairing rubber dating and other hand stamps and type..... | 46 45 |
| Supplying stamping material, inclusive of making and repairing pads; also wooden boxes and post marking and cancelling ink. | 682 30 |
| Making and repairing post office scale.. | 340 60 |
| Supplying mail bags..... | 1,995 63 |
| Repairing mail bags..... | 1,243 36 |
| Repairing mail locks and supplying mail bags fittings.... | 594 15 |
| Repairing portable letter boxes and mail clerks' tin boxes..... | 8 25 |
| Miscellaneous orders for making and repairing postal stores..... | 25 25 |
| Making up and supplying articles of official uniform | 5,657 25 |

UNIONS FORMED DURING THE MONTH OF JANUARY, 1904.

The Department has received notice of the following organizations as having been formed during the month of January 1904:

Quebec :

Longueuil—Club National Ouvrier de Longueuil.

St. Hyacinthe—Club National Ouvrier de St. Hyacinthe.

Ontario :

Hamilton—Silver and Britannia Workers Union No. 309, in affiliation with Metal Polishers International Union.

TRADE DISPUTES DURING THE MONTH OF JANUARY,

AS in 1903, there were practically no disputes in Canada at the beginning of the New Year. Although there was no report of the termination of the two disputes which were in existence at the end of December, namely, a strike of boilermakers at London, and of plumbers at Montreal, the companies concerned claim that industrial conditions have ceased to be affected by them, and they have consequently been omitted from the list of disputes which were in existence during the month of January. Although the number of disputes which began in January, was rather larger for that month, there were only three serious interruptions to business, these three being at Hull and Sherbrooke in Quebec, and at Copper Cliff, Ont. Another important strike was declared at Sydney, N.S., on January 29, but occurring as it did at the close of the month, its effects on industrial conditions scarcely began to be felt before February.

There were in all nine disputes during the month, not including two minor disturb-

ances. In four of the disputes, members of International trade organizations were involved, in one, the employees were members of a national union, and in four cases, the strikers belonged to no trade organization.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The following table shows the magnitude of the ten disputes of the month, estimated according to the total number of employees affected, both directly and indirectly.

| Magnitude. | Number of Disputes. |
|-------------------------|---------------------|
| 2,000 and over | 1 |
| From 500 to 1,000 | 1 |
| " 300 to 500. | 1 |
| " 100 to 200. | 1 |
| " 50 to 100. | 2 |
| " 6 to 25. | 3 |
| Total | 9 |

A comparison with the previous month, shows that there were four more disputes in January than in December, and there were also four more than in January, 1903.

Loss of time in working days.—The approximate loss of time in working days by men directly affected was 6,500, and those indirectly affected lost approximately 10,060 days, making a total loss to workingmen of 16,560 days. This is a decrease of 58,772 compared with the estimate for the previous month, but an increase of 12,620 over January, 1903.

Trades affected by new disputes.—The following trades were affected by the disputes of the month :—

| Trades. | Number of Disputes. |
|-----------------------------------|---------------------|
| Metal..... | 3 |
| Textile..... | 1 |
| Food and tobacco preparation..... | 1 |
| Printing and Bookbinding..... | 1 |
| Mining..... | 3 |
| Papermaking..... | 1 |
| Total..... | 10 |

Localities affected by disputes.—The trade disputes of the month were confined to the three provinces of Nova Scotia, Quebec and Ontario. In Nova Scotia there were two disputes, both connected with coal mining, and there were four in Quebec and four also in Ontario.

Causes of disputes.—The following is a summary of the causes of the disputes of the month :—

| | |
|----------------------------------|---|
| For increase in wages..... | 1 |
| Reduction in wages..... | 3 |
| Increase in hours..... | 2 |
| Discharge of employees..... | 1 |
| Change in system of payment..... | 1 |
| Amount of fines exacted..... | 1 |
| Miscellaneous..... | 1 |

Methods of settlement.—Of the ten disputes of January, seven were settled in the course of the month, leaving three still in existence on February 1. One dispute was settled by conciliation, and the remaining six by negotiations between the parties concerned, the matter in dispute in one

instance being submitted to arbitration after the conclusion of the strike.

Results of disputes.—The disputes ended wholly in favour of the employees, one in favour of the employers, in one there was a compromise, in which the strikers were granted nearly all their demands, and in the remaining two cases, the result was indeterminate, work having been resumed before a complete settlement had been reached.

Dispute of Papermakers at Hull, Que.

The most important dispute of the month, in its effect on industrial conditions, was one concerning papermakers of the E. B. Eddy Company, of Hull, Que., which took place on January 11, and continued throughout the month. The cause of the trouble was the dissatisfaction of the company with the system of shorter hours for work, which was adopted at the request of the employees in January, 1903. Before that date, the hours for work were 67 per week for the day squad, and 77 per week for the night squad, the factory running continuously from six o'clock on Monday morning until six o'clock the following Sunday morning. According to the new schedule, which was in force for a year, work began at seven o'clock on Monday morning and stopped at six o'clock on Saturday evening. The company alleged that this schedule could not be continued, because the production of paper had decreased proportionately to the diminution of hours, and paper which cost more to produce brought a smaller price on account of increased competition.

On January 2, the following order was issued by the president of the company :—

'To our paper and pulp mill superintendents :—During the year just closed we have given full and fair trials to the short hour per week arrangement asked for by the paper and pulp employees, and find that the daily average of the total yearly output is not up to what was promised and expected by us for the wages paid. Therefore, we have decided that, beginning with Saturday, January 9, the hours of work shall be from 6.30 Monday morning until midnight Saturday. Please notify all your men of this change in the hours of running time, and urge them to do their best during the coming year to

increase the output of 1904 over that of 1903, and try in every way to bring it up to what it should be for the wages paid, the class of machinery installed and the facilities we have for making the different grades of paper.'

On January 7, the following reply to this order was given by the Hull branch of the International Brotherhood of Paper-makers:—

'At a meeting of the above lodge on January 2, 1904, to consider the order issued by the E. B. Eddy Company increasing the hours of labour in their paper mills by 6½ hours per week, after giving the said order our careful consideration, the following decision was unanimously arrived at—that inasmuch as the tendency of the day is to decrease rather than increase the hours of labour, and although the E. B. Eddy Company granted the shorter hours one year ago, we are still working longer hours than any other trade, inasmuch as we work 11 hours per day, while other trades only work 10 hours and in a great number of cases only 8 or 9 hours per day. In view of these facts we cannot consent to comply with the said order issued by the E. B. Eddy Company increasing the hours of labour by reporting for work at 6.30 Monday morning, and working until midnight Saturday. Should the E. B. Eddy Company wish to lengthen the running hours of their mills, we would invite them to adopt the three hour system. That will give them 144 hours per week, instead of 131 hours as at present, should they so decide, the present rate of wages to be paid. One thing we wish to call the attention of the company to is that when the shorter hours were given a year ago, no promise as regards getting the output up to any particular figure was given, but we did promise that every man would do his best and we claim that promise has been kept. In fact, Mr. Eddy himself stated to a committee that waited on him last summer, that he was satisfied that every man working for him did his work properly.'

The reply to this communication was that no change could be made in the order, but the company issued an invitation to their papermakers to apply for their former positions until January 16, otherwise their places would be filled by outsiders, the company reserving the right to accept or reject any application. The employees did not apply for their old positions, and the company accordingly sought elsewhere for workmen to take their places.

On January 18, a committee of the papermakers held an interview with Mr. Eddy in an effort to bring about a settlement of the dispute, but they were unsuccessful, and no further action was taken during the month.

In order to afford the company a protection against the sudden cessation of work on the part of any of its employees

in the future, the company drew up the following agreement, to be signed by every person employed at the company's mill:—

'In consideration of the E. B. Eddy Company, Limited, employing or continuing to employ me in or about the pulp and paper mills of the Company, I hereby agree with said Company not to leave the Company's employment without first giving one week's previous notice of my intention so to do. And not to interfere with or molest any other employee of the Company employed in or about said mills, the said Company on its part undertaking to continue to give fair treatment to all its employees and to pay the agreed wages and not to dismiss employees capriciously, or arbitrarily, or without cause.'

By the end of the month the company claimed to have four papermaking machines out of seven running, but the chemical pulp mill was compelled to shut down, on account of its dependence on the paper mill for the consumption of its product. The company is reported in the press to have been manufacturing one hundred tons of paper a day before the dispute, and as their output was completely stopped for a time, the loss was severe.

At the beginning of the trouble, it is reported by the union, that 200 employees were directly and 127 indirectly concerned in it. Later on, other branches of the company's works were affected, until at the end of the month the total number thrown out of work amounted to about 700. It was estimated that the loss of money to the workers amounted to \$6,000 a week. Many of the paper makers left Hull to seek work elsewhere.

Strike of Weavers at Sherbrooke.

On Monday, January 13, about 98 weavers employed in the Paton Mill at Sherbrooke, Que., declared a strike, on account of their dissatisfaction with the fines imposed on them for spoil work, complaining that they were too heavy. They demanded the dismissal of the boss weaver, who laid the fines, but the company refused to discharge him, and the men accordingly ceased work. Soon after the beginning of the dispute, the strikers appealed for mediation to the Council of Conciliation and Arbitration of Quebec, and on Monday, January 18, Mr. Marois, a representative of the council, arrived at Sherbrooke, in

response to their request. The manager of the company said that he was disposed to give justice to the weavers, but he alleged that they had acted hastily in going out before their complaint had been investigated. The manager also said that if the strikers decided to return to work, and made known their grievances in the proper way, it would receive due consideration.

At a meeting of the strikers, it was decided, after some discussion, to return to work on January 21, after they had obtained assurances that they would receive fair treatment.

Strikes at St. Catharines, Ont.

During the month of January there were three trade disputes at St. Catharines, Ont., as well as two minor disturbances. Two of the disputes were strikes declared by metal workers, in one polishers being concerned, and in the other annealers. The third strike was one of machinists. The minor disturbances concerned fork makers and carpenters. Only two companies were affected by these disputes. The strikes of machinists and polishers were due to a proposed reduction in wages, the reduction being 12 per cent and 5 per cent respectively. The former concerned eight men, and lasted from January 2 to January 5. In the latter, eight men were also concerned, and the strike lasted from January 11, to January 14. The old wages and prices were restored in both cases.

The strike of annealers, which affected 42 men directly and 50 indirectly, began on January 5, and ended on January 11. The cause of the dispute is given as follows by the McKinnon, Dash and Metal Works Company, which was concerned in it: The men in the annealing room do the shifting for the moulders, and had been going home with them and getting ten hours' pay, the moulders being piece workers and the annealers day workers. The company could not afford to continue this practice, and claims that it had been agreed between a committee of the men and the company that up to January 1, they

would stop work at half-past five o'clock, getting full pay, but after January 1, they would only be paid for the actual time they were at work. It is stated by the company that on January 1, the men refused to carry out the agreement, and at the same time demanded an advance of 15 cents per day, which was refused. On January 11 the strikers returned to work, having made an agreement with the company to submit the matters in dispute to arbitration.

Both the minor disputes at St. Catharines arose from a reduction of wages. In the case of the forkmakers the reduction affecting ten men amounted to two per cent. A strike was declared on January 2, but on the following day the men returned to work at this reduced rate.

Four carpenters of the Welland Vale Manufacturing Co. struck work on January 2, on account of a reduction of 20 per cent in their wages. No settlement of the disputes was reported at the end of the month.

Strike of Labourers at Copper Cliff, Ont.

On January 8, a number of Italian labourers employed in handling coke by the Canadian Copper Company at Copper Cliff, Ont., stopped work on account of a stipulation by the company that they should load a certain amount of coke each day for \$1.50, the amount of the wages they were receiving. It is stated by the company that eight or ten were willing to work at the rate demanded of them, but about twenty refused, and joined by a number of others, they are alleged to have induced the rest of their fellow-labourers, to the number of three or four hundred, to refrain from working. Some of the strikers were arrested and fined, and the company was able to resume work again, having secured other men to replace the missing strikers. All the men concerned in this dispute, with the exception of two or three, were subsequently taken back by the company, and the trouble was practically over by the 26th of the month.

TABLE OF TRADE DISPUTES OF THE MONTH OF JANUARY.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No. of Establishments affected. | Approximate No. of Employees affected. | | Date of com- mencement. | Date of termi- nation. | Remarks. |
|--------------|-----------------|--------------------|--|---------------------------------------|---|-----------------|----------------------------|---------------------------|---|
| | | | | | Di- rectly | Indi- rectly | | | |
| Ontario. | St. Catharines. | Machinists. | Reduction of 12 per cent in wages. | 1 | 8 | | Jan. 6 | Jan. 7 | Former wages restored. |
| Ontario. | St. Catharines. | Metal workers. | Increase in working hours without extra pay. | 1 | 42 | 50 | " | " | Work resumed. Dispute referred to arbitration. |
| Ontario. | Copper Cliff. | Miners' labourers. | Objection to new system of payment. | 1 | 49 | 329 | " | 8 " | All resumed work on Co's terms, except two or three who left the place. |
| Quebec. | Hull. | Papermakers. | Increase in working hours. | 1 | 200 | 560 | " | 9 " | No settlement reported at end of month. |
| Quebec. | Shedbrooke. | Weavers. | Complaint that fines for spoilt work were too great. | 1 | 98 | | " | 11 Jan. 21 | Work resumed on promise of Co. to consider grievance. |
| Nova Scotia. | Chignecto. | Coal miners. | Demand that picks be placed in mine. | 1 | 120 | | " | 11 " | Men's demand granted. |

| Nova Scotia. | Sydney. | Coal miners. | Reduction in wages. | 1 | 40 | 769 | " | 29 " | No settlement reported at end of month. |

* Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

Other Disputes of the Month.

A strike of 120 coal miners of the Maritime Mining Company, in Cumberland county, N.S., was declared on January 11. The cause of the dispute was a demand of the miners that their picks should be sent down into the pit, and that the trolleys should be placed where ice would not collect on them. The company at first refused to grant their demands, holding that each man should carry his own pick, as in other collieries in Nova Scotia, but on the 15th of the month the company agreed to send the miners' tools into the pit for them, and the strike was declared off.

On January 6, a strike was declared at Montreal, affecting six employees of a He-brew baking establishment. The cause of the dispute was the employment of a non-unionist. The dispute lasted until 16th of this month, when the men returned to work, the non-unionist having been discharged.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of January, and which have been reported to the Department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JANUARY, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency.

The Department of Labour has received notice through its correspondents and other reliable sources of information of accidents to workmen during the month of January in different parts of the Dominion, resulting in the loss of 75 lives, and in severe injuries to other workmen to the number of 114.

Compared with the previous month the returns show an increase of 33 in the number killed, and an increase of 62 in the number injured.

By industries and groups of trades the record was as follows :—

| Trade or Industry. | Killed. | Injured. |
|------------------------------|---------|----------|
| Agriculture | 7 | 2 |
| Fishing | 2 | |
| Lumbering | 5 | 6 |
| Mining | 14 | 5 |
| Building trades | 2 | 9 |
| Metal | 10 | 34 |
| Woodworking | 1 | 10 |
| Railway service | 21 | 12 |
| General transportation | 5 | 11 |
| Miscellaneous | 8 | 25 |
| Total | 75 | 114 |

Nature of Fatalities and Injuries.

By reference to the detailed table of accidents published herewith it will be seen that the month of January was marked by the occurrence of a number of accidents involving loss of life and injuries to workmen on an unusually heavy scale. A brief reference to the more prominent of these is as follows :—

Mine Explosion at Michel, B.C.

A disastrous explosion occurred on January 8, in the west side lower level of No. 3 mine, operated by the Crow's Nest Pass Coal Co. at Michel, B.C., whereby a shot-lighter and 6 miners were instantly killed, and an overman and miner seriously injured. The force of the explosion caused a large fall of rock and coal, and the rescuing party found the bodies of the killed on the other side of the debris. Several of the rescuing party were overcome with gas, and had to be carried out, but no serious mishap in this connection was reported. No damage was sustained by the mine. After examination by the Provincial Mine Inspector an inquest was held on January 18 and 19, at which the jury, after a full presentation of evidence, brought in the following verdict :—

"That the said David J. Roberts, John Sale, Thos. Evans, Wm. King, Burdett Dean and Wm. McAllister came to their death on the 8th day of January, 1904, between the hours of 1.30 and 2 p.m. in the lower No. 3 Mine at Michel colliery, owned and operated by the C. P. N. Coal Company, Limited, by a gas explosion caused by some unknown circumstance. We as a jury do not attach any blame to any person or persons concerned."

Fatalities to Firemen.

Two disastrous fires occurred during the month, one at Montreal, Que., on January 5, when the building of the Mount Royal Club on Sherbrooke street was destroyed, and another on January 6, at London, Ont., in which the warehouse of Sterling Bros., wholesale shoe merchants, was burned. In the Montreal fire one fireman was killed by the falling of a stone cornice, and three firemen were severely injured from the same cause. In addition, the secretary of the club, who was forced to jump from a window was badly burned and cut, and died subsequently of his injuries, while the book-keeper of the club also received a compound fracture of the leg and internal injuries. The loss was estimated at \$200,000. In the London fire the chief of the fire brigade was killed and three firemen badly injured by the unexpected falling in of a wall of the burning building, which was four stories high.

Other Accidents.

Other accidents of the month attended with fatal results to more than one person were as follows :

The drowning of two fishermen off Halifax, N.S., by the upsetting of a dory in a storm.

The killing of an engineer and firemen near Field, B.C., on January 22. The locomotive in which the men were working became unmanageable on a heavy grade and ran away, jumping the track at a safety switch and derailing the other cars which were heavily loaded with coal.

The Record by Trades and Industries.

By industries and groups of trades the table shows the following record for the month :—

Agriculture.—The number of accidents caused by horses kicking, namely, two resulting fatally and one in a serious injury, is a prominent feature of the table. Two other fatalities were caused by falls from a load of hay and from a hay loft respectively, the remaining fatalities being one from freezing in a storm and one from a falling tree. The other injury on the list was the loss of an arm from being caught in a threshing machine.

Fishing.—The weather on the Nova Scotia coast during the past month has been unusually rough, and as a consequence the number of coasters and fishermen lost was reported to have been greater than during any similar period for years, though no accurate and complete return was obtainable at the end of the month. Much suffering as well as loss of life was entailed among the crews of the fishing vessels, especially on the banks, where operations were almost completely suspended. Shore fishermen, too, since the opening of the lobster season report heavy losses of gear and traps. Only one accident, involving the loss of two lives, was officially reported to the department.

Lumbering.—Five men were killed and six injured in this industry during the month. Two men were killed by falling trees and a third severely injured by the same cause. Another fatality resulted from a workman being crushed and smothered in the snow by his horse falling on him. Two workmen were killed in sawmills, one having his neck broken by the falling of a log, and the other having his clothing caught in a revolving shaft. Three severe injuries were also received in sawmills, the other injuries on the list being a broken leg, caused by a rolling log, and a foot cut by the slipping of an axe.

Mining.—The explosion at Michel, B.C., above referred to, was the most serious accident of the month under this heading, accounting for seven fatalities and two serious injuries out of a total of thirteen fatalities and six injuries. The crushing

to death of two miners at Glace Bay by the falling in of the roof at different mines occurred in the same day—Jan. 12. The other mining fatalities of the month were that of a trapper at Dominion No. 1, N.S., who was run over by a train, and that of a driller at Rossland, B.C., killed by an accidental explosion of giant powder, which also severely injured a second workman. The crushing to death of a miner at Bridgeport, N.S., by a fall of coal, the crushing of a miner at Springhill, N.S., by the falling in of a roof of a shaft, and the crushing of a miner in a shaft at Rossland, B.C., while conveying a machine drill to the surface, were the other fatalities of the month. A miner at Thetford Mines had his leg broken by a fall, and a second miner at Rossland had his leg fractured by a fall of cord wood.

Building trades.—Two workmen were killed and nine injured in this branch. The fatalities were in the case of a mason who, while at work on a bridge at Watford, Ont., was struck by a railway train, and in the case of a plasterer at Montreal, Que., who was killed in an elevator in the course of his employment. Three of the injuries reported were caused by the collapse of an exhibition building at Ottawa, two to carpenters by the fall of a heavy window sash, one to a plasterer at Toronto by the fall of a stair on which the workman was employed, one to a builder's labourer at Grand Mere, Que., resulting from a fall from a scaffold, two to carpenters at Hamilton as a result respectively of a fall from a ladder and the workman being struck by a falling plank.

Metal trades.—The number of accidents occurring to machinists in January is a notable feature of the table, there being three fatalities and eleven serious injuries reported in this connection. Two stationary engineers were killed, one as a result of the workman's clothing becoming caught in a revolving shaft, and the other by being

crushed by an elevator. A stationary fireman at Niagara Falls was severely burned by a flash of oil flame. One blacksmith and one brass worker received injuries at Meaford and Hamilton respectively. Three fatalities to structural iron workers were reported and one serious injury, all being the result of falls while working on bridges, with the exception of one fatality, which was the result of the workman while jumping from a pile of iron, being pierced by a projecting piece of metal. A pipe fitter at Sydney, N.S., was killed in the blooming mill by a fall from a ladder. An electrical worker at Ottawa had his arm torn from his body while working in an elevator shaft. There were three accidents reported to smelters, two resulting in injuries, and the third resulting in one fatality and in six severe injuries, from the collapse of a stage in a blast furnace house of the Nova Scotia Steel Company at Sydney Mines, N.S. The list of accidents to employees in implement works numbers six. There were also more or less serious injuries reported to employees in car works, locomotive works and stove works.

Woodworking trades.—Eleven accidents were reported, one fatal, being the result of a fall into a vat of boiling water in a woodworking factory at Lulu Island, B.C. The injuries were to a cooper at Woodstock, whose hand was caught in a saw; to a factory hand at Baldwin's Mills, Que., who was injured by a fall on a pointed piece of timber while at work on a lumber pile; to a factory hand at Hamilton, Ont., who had a rib broken by the recoil of a piece of wood from a saw; to a factory hand at Toronto by a fall from a seven-story building; to two woodworkers at Toronto employed in the manufacture of packing cases; to a factory hand at Hanover, from a sanding disc; to two carriage workers at Chatham and Brantford, Ont., respectively, from machinery; and to an employee in the car shops at Deseronto, injured by a broken timber.

Railway Service.

A total of 21 fatal accidents and 12 serious injuries were reported in the railway service during January. Two railway conductors were badly injured, the accident in one case causing the loss of a leg above the knee. Three engineers were killed, two in collisions, and one by being struck from a bridge by the starting of a train. In addition, an engineer was crushed at London between the doors of the round-house and his engine, and seriously injured. Three firemen were killed in collisions. Fatalities among brakemen number 7, and serious injuries, 6. Among the fatalities, one was run over by a train while coupling cars, another was scalded to death in a boiler explosion, being with the engine crew at the time, another was run over by a train while shunting, a fourth fell under the train from the top of a moving car, a fifth was struck by an overhead bridge and killed, a sixth fell from a platform under a moving train, and the seventh was run over while attempting to board a train in motion. Three trackmen were killed, one being struck by a train while removing a hand-car from the track, the second being crushed to death in a turn-table, and the third being run over by a freight train in the yards at night. Four yardmen met with accidents, all of them fatal, and the foreman of a snow plough, a gate keeper and a construction employee were also killed, the latter by the premature discharge of a blast, the gate-keeper being struck by a passing train and the foreman of the snow-plough being crushed under the snow-plough which had been derailed. A workman in the railway paint shops at Moncton, N.B., was badly scalded in a vat of boiling lye.

General transportation.—Five fatalities and 11 serious injuries were reported under this heading. The fatalities were, one

longshoreman who was killed at Sand Point while working on ss. *Manchester City*; an elevator employee at Ottawa was crushed between an elevator and a landing; an elevator employee at Ottawa who broke his leg while jumping on a moving freight elevator and died from the effects of the amputation; a teamster at Blue Bonnets, Que., killed by the premature explosion of a blast in a quarry; and a teamster at Milton, Ont., killed also by flying stone from a blast. In addition to the above the injuries reported were to three longshoremen, to 3 street railway employees, 2 elevator employees; one teamster and two livery stable employees, the two last being injured by kicking horses.

Miscellaneous.—Seven fatalities and 23 injuries were reported under this heading, the fatalities being to a railway mail clerk, the chief of the fire brigade at London, Ont., a fireman at Montreal, a brewery foreman at Berlin, Ont., a brewery employee at Toronto, a blaster at New Westminster, a cartridge factory employee at Brownsburg, Que., and a laundry worker at Toronto. Six of the injuries were received by firemen in the fires at London and Montreal on January 5 and 6 respectively, to which reference was made above. Two firemen were also injured at Hamilton, and a fireman at Montreal by missing the sliding pole in the station, while four clerks in a wholesale establishment were injured as the result of the explosion of a hot water heating apparatus. Of the remaining injuries two were to labourers, two to quarrymen, one to a textile worker, one to a pork packer, one to a blaster, one to an employee in a broom factory, one to a manufacturing pharmacist, one to a laundry worker, and one to a retail clerk who in removing icicles from the roof of the establishment in which he was employed fell a distance of 50 feet to the ground.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JANUARY.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F, No. 3.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|------------------------------|-----------------------|---------|---------|----------|---|---|
| <i>Metal Trades—Con.</i> | | | | | | |
| Employee in locomotive works | Kingston, Ont. | Jan. 15 | 1 | 1 | Two ribs broken. | While working on a frame drill was caught in machinery. |
| Employee in implement works | Smith's Falls, Ont. | " 12 | 1 | 1 | Tips of fingers cut. | While oiling jointer. |
| " | " | " 20 | 1 | 1 | Right hand lacerated | Struck by a block from a saw. |
| " | Brantford, Ont. | " 4 | 1 | 1 | Three fingers cut. | While placing the knife of a mower into a finger bar. |
| " | " | " 4 | 1 | 1 | Face badly cut | By handle of crane. |
| " | Waterloo, Ont. | " 18 | 1 | 1 | Arm fractured at elbow. | Caught in a set of rolls. |
| " | Hamilton, Ont. | " 7 | 1 | 1 | Foot crushed. | While unloading a case of disc drills. |
| " stove works. | London, Ont. | " 21 | 1 | 1 | Three fingers crushed. | By a press. |
| <i>Woodworking Trades—</i> | | | | | | |
| Woodworker | Toronto, Ont. | " 11 | 1 | 1 | Tops of middle fingers crushed. | Maker of packing boxes crushed by printing press. |
| " | " | " 24 | 1 | 1 | Side cut. | Came in contact with a saw. |
| Cooper | Woodstock, Ont. | " 4 | 1 | 1 | Hand injured. | Caught by saw. |
| Factory hand | Baldwin's Mills, Que. | " 13 | 1 | 1 | Dangerous injury to face. | Fell on pointed stick while at work on lumber pile. |
| " | Hamilton, Ont. | " 16 | 1 | 1 | Broken rib. | Piece of wood flew back from saw. |
| " | Lulu Island, B.C. | " 21 | 1 | 1 | " | Fell into vat of boiling water and was scalded to death. |
| " | Toronto, Ont. | " 23 | 1 | 1 | Internal injuries. | Fell from seventh story building. |
| " | Harover, Ont. | " 21 | 1 | 1 | Two fingers cut off at first joint. | Hand came in contact with a sanding disc. |
| Employee in car shop | Deseronto, Ont. | " 15 | 1 | 1 | Back bruised. | By broken timber. |
| Carriage worker. | Chatham, Ont. | " 6 | 1 | 1 | Stomach injured. | Struck by a piece of wood from a saw. |
| " | Brantford, Ont. | " 6 | 1 | 1 | Part of first and second fingers cut off. | By a shaper. |
| <i>Railway Service</i> | | | | | | |
| Conductor | Brandon, Man. | " 5 | 1 | 1 | Leg broken near thigh. | Fell off top of car. |
| " | Lindsay, Ont. | " 11 | 1 | 1 | Right leg severed above knee. | Slipped under wheels of car in motion. |
| Engineer. | London, Ont. | " 13 | 1 | 1 | Both hips injured. | Crushed between doors of round house and engine. |
| " | St. Hyacinthe, Que. | " 19 | 1 | 1 | " | Knocked off bridge by starting train. |
| " | Field, B.C. | " 22 | 1 | 1 | " | Engine became unmanageable and jumped the track. |
| Fireman. | London, Ont. | " 26 | 1 | 1 | " | Killed in collision between two engines while shunting. |
| " | St. John, N.B. | " 11 | 1 | 1 | " | Killed in collision with yard engine. |
| " | Samia, Ont. | " 21 | 1 | 1 | " | Killed in head on collision. |
| " | Field, B.C. | " 22 | 1 | 1 | " | Engine became unmanageable and jumped the track. |
| Brakeman. | Glouce Bay, N.S. | " 1 | 1 | 1 | " | Run over by train while coupling cars. |
| " | Dauphin, Man. | " 1 | 1 | 1 | " | Through boiler explosion, being with engine crew who escaped. |
| " | Winnipeg, Man. | Jan. 2 | 1 | 1 | Severely scalded. | Crown sheet of boiler blew into fire-pan. |

| | | | | | |
|---|-----------------------|---|----|-------------------------------------|--|
| " | Gilson Station, N.B. | " | 2 | 1 Severely crushed.. | Ceiling between two cars. |
| " | Clarkson, Ont. | " | 6 | 1 | Ran over by train while shunting. |
| " | Brandon, Man. | " | 6 | 1 | Fell under train from top of moving car. |
| " | London, Ont. | " | 8 | 1 | Struck by over-head bridge while on top of cars. |
| " | Montreal, Que. | " | 11 | 1 | Fell from platform under moving train. |
| " | Lindsay, Ont. | " | 13 | 1 | In rear end collision. |
| " | Clarkston, Ont. | " | 17 | 1 | While attempting to board a train in motion. |
| " | North Bay, Ont. | " | 15 | 1 | In run off of engine. |
| " | Stratford, Ont. | " | 24 | 1 Jaw broken, &c. | Struck by breaking of chain on car. |
| " | " | " | 24 | 1 Leg broken. | " |
| " | Welsford, N.B. | " | 2 | 1 | Struck by train while removing hand-car from track. |
| " | Bellefleur, Ont. | " | 8 | 1 | Crushed to death in turntable. |
| " | Toronto, Ont. | " | 23 | 1 | Decapitated by freight train in yards at night. |
| " | Barrie, Ont. | " | 21 | 1 | Crushed under derailed snow plough. |
| " | St. Thomas, Ont. | " | 10 | 1 | While switching a train stepped in front of another locomotive and was killed. |
| " | Brandon, Man. | " | 18 | 1 Hand crushed. | Crushed between draw bars. |
| " | Toronto, Ont. | " | 19 | 1 Arm scalded by steam from engine. | Uncoupling cars on siding. |
| " | " | " | 23 | 1 | Struck by yard enging, skull crushed. |
| " | Montreal, Que. | " | 17 | 1 | Struck by passing train. |
| " | Moncton, N.B. | " | 18 | 1 Badly scalded. | Fell into vat of boiling lye in railway paint shop. |
| " | Sudbury, Ont. | " | 29 | 1 | Premature discharge of blast. |
| " | St. Thomas, Ont. | " | 11 | 1 Right arm torn. | By a shaper knife. |
| " | Winnipeg, Man. | " | 28 | 1 | Fell from mail sleigh. |
| " | London, Ont. | " | 6 | 1 | Collapse of wall at fire. |
| " | Montreal, Que. | " | 5 | 3 Badly crushed | " " |
| " | " | " | 5 | 3 Badly injured. | Struck by falling stone cornice weighing 300 lbs. from burning building. |
| " | " | " | 19 | 1 Injury to spine | By falling debris from burning building. |
| " | " | " | 20 | 1 Severe wounds on hands. | Missed sliding pole in station and fell over 30 ft. |
| " | " | " | 29 | 2 Bruised knees, &c. | Injured while at a fire. |
| " | Hamilton, Ont. | " | 14 | 1 Internal and external injuries. | Thrown from reel while returning from fire. |
| " | Montreal, Que. | " | 29 | 4 Scalded and struck by debris. | Fell fifty feet from building where he was breaking icicles. |
| " | Quebec, Que. | " | 24 | 1 Little finger cut off. | Explosion of boiler in hot water heating apparatus. |
| " | Windsor, Ont. | " | 23 | 1 | While rubbing oil off Gordon Press feeder. |
| " | Berlin, Ont. | " | 12 | 1 | Fell 6 feet down stairway striking back of head against iron pump. |
| " | Toronto, Ont. | " | 1 | 1 | Fell 9 feet through trap door in building and fractured skull. |
| " | New Westminster, B.C. | " | 20 | 1 Badly cut on head | Workman while thawing dynamite was blown to pieces. |
| " | Brownsville, Que. | " | 7 | 1 Three ribs broken. | Struck by bricks descending after a blast. |
| " | Hamilton, Ont. | " | 17 | 1 Head hurt. | Premature explosion of dynamite. |
| " | Peterborough, Ont. | " | 29 | 1 Arm and leg broken. | Fell down hatchway. |
| " | Toronto, Ont. | " | 23 | 1 Fracture of right leg | Pile of hardwood he was piling fell on him. |
| " | St. John, N.B. | " | 29 | 1 | Fell from scaffold. |
| " | Charlottetown | " | 29 | 1 | Large stone bounded against workman. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JANUARY—*Concluded.*

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|------------------------------|------------------------|---------|---------|----------|--|--|
| <i>Miscellaneous—Con.</i> | | | | | | |
| Quarryman..... | Hamilton, Ont..... | Jan. 21 | 1 | 1 | Fracture of skull..... | Hit by a brick from blasting operation. |
| Textile worker..... | Windsor, Ont..... | " 29 | 1 | 1 | Severe internal injuries..... | Caught in a loom. |
| Laundry worker (female)..... | London, Ont..... | " 24 | 1 | 1 | Hand crushed and burned..... | Caught in a mangle. |
| "..... | Toronto, Ont..... | " 26 | 1 | 1 | "..... | Caught and crushed to death between hoist and partition. |
| <i>General Transport—</i> | | | | | | |
| Longshoreman..... | St. John, N.B..... | " 26 | 1 | 1 | Body crushed..... | While unloading scrap metal from vessel caught between two heavy pieces. |
| "..... | Sand Point, N.B..... | " 4 | 1 | 1 | Broken thigh bone..... | While loading ss. <i>Monmouth</i> fell from staging. |
| "..... | St. John, N.B..... | " 6 | 1 | 1 | Ankle badly sprained..... | While working on ss. <i>Mount Temple</i> car wheel fell on workman. |
| "..... | Sand Point, N.B..... | " 7 | 1 | 1 | "..... | While working on ss. <i>Manchester City</i> , struck by a sling loaded with pease and knocked into hold. |
| Street Railway employee..... | St. John, N.B..... | " 25 | 1 | 1 | Leg injured..... | Cut accidentally with chisel. |
| "..... | Winnipeg, Man..... | " 3 | 1 | 1 | Cut on head, cheek and leg..... | In a collision employee fell under car and was dragged about 100 yards. |
| "..... | Montreal, Que..... | " 26 | 1 | 1 | Head cut..... | In collision between two cars. |
| Elevator employee..... | "..... | " 25 | 1 | 1 | Severe internal and external injuries..... | Fell 12 feet down elevator shaft. |
| "..... | Toronto, Ont..... | " 25 | 1 | 1 | Severe injuries..... | Fell 25 feet down elevator shaft. |
| "..... | "..... | " 26 | 1 | 1 | "..... | Crushed to death between elevator and landing. |
| "..... | Ottawa, Ont..... | " 29 | 1 | 1 | "..... | Broke leg jumping on moving freight elevator, died from effects of amputation. |
| Teamster..... | Blue Bonnets, Que..... | " 12 | 1 | 1 | "..... | While canting stone killed by premature explosion in quarry. |
| "..... | London, Ont..... | " 19 | 1 | 1 | Arm bruised..... | Heavy barrel fell on workman while loading same. |
| "..... | Milton, Ont..... | " 22 | 1 | 1 | "..... | Killed by flying stone from blast in a quarry. |
| Livery employee..... | Pergus, Ont..... | " 2 | 1 | 1 | Head badly cut..... | Kicked by a horse he was attending. |
| "..... | Quebec, Que..... | " 27 | 1 | 1 | Face cut and fracture..... | Kicked by a horse. |

Fatalities on the Great Lakes, 1903.

During the navigation season of 1903 the total number of lives lost by accidents on the great lakes was ninety-four. The loss of life through foundering was comparatively small, the total from that cause being twenty-three. In only one case was a vessel lost with her entire crew, namely, the schooner *Emerald*, on lake Ontario, in November. The total number of lives lost is the smallest since 1896, though the number includes ten passengers, who were the first passengers to be lost for over a decade. The loss of property, however, was the heaviest in five years. The fatalities recorded, according to the *Marine Review*, not including the ten passengers above referred to, were as follows :—

| | |
|-----------------------------|----|
| Lost over-board.. . . . | 41 |
| Fell into hold.. . . . | 41 |
| Foundering.. . . . | 23 |
| Collision.. . . . | 5 |
| Killed by machinery.. . . . | 10 |
| Fell from mast.. . . . | 2 |
| Fire.. . . . | 1 |
| Shot by mistake.. . . . | 1 |
| — | |
| Total.. . . . | 94 |

The following is the return of the fatalities according to the waters in which they occurred :—

| | |
|-------------------------|----|
| Lake Erie.. . . . | 29 |
| Lake Michigan.. . . . | 26 |
| Lake Ontario.. . . . | 14 |
| Lake Huron.. . . . | 10 |
| Lake Superior.. . . . | 8 |
| St. Clair River.. . . . | 4 |
| Detroit River.. . . . | 3 |
| — | |
| Total.. . . . | 94 |

Compared with other seasons the record is as follows :—

| | |
|--------------|-----|
| 1896.. . . . | 26 |
| 1897.. . . . | 88 |
| 1898.. . . . | 95 |
| 1899.. . . . | 100 |

| | |
|--------------|-----|
| 1900.. . . . | 110 |
| 1901.. . . . | 122 |
| 1902.. . . . | 240 |
| 1903.. . . . | 94 |

The foundering of the steamer *Erie L. Hackley*, on Green Bay, October 4, was the most notable disaster of the year as regards the number of lives lost, twelve people being drowned including ten passengers, during a tornado. The most serious monetary loss was caused by the foundering of the wooden steamer *F. W. Sauver*, on Lake Superior, on October 26, the crew being rescued with the exception of two by the captain of the steamer *Yale*.

Accidents on Railways.

One of the functions of the newly organized railway commission will be to inquire into and ascertain particulars of all railway accidents occurring in Canada, and to issue such orders as will tend to prevent their recurrence, the companies being bound, under a heavy penalty, to furnish immediate particulars of all accidents attended with personal injury to any one using the line, or where the road has been rendered temporarily unfit for traffic. The board has power also to appoint a commission to inquire into and ascertain the cause of the mishap, the circumstances attending it, and the means by which a like occurrence may be avoided in future. The board has full power to order the dismissal of railway officials who have been guilty of neglect.

In 1902, the last year for which official returns are available, there were 1,328 persons in railway accidents in this country, of whom 126 were passengers, 932 employees and 220 others. Some 320 persons were killed, of whom 19 were passengers, 146 were employees and 164 others.

REPORT OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during January, 1904 :—

CANADIAN REPORT.

Inland Revenues of Canada.

Report, Returns and Statistics of the Inland Revenues of the Dominion of Canada for the

Year ended June 30, 1903. Part I. Exercise, &c. Ottawa, King's Printer, 1903. Pages, 203.

The following table taken from the report of the Deputy Minister of Inland Revenue, indicates the growth of the inland revenues of Canada since the year ended June 30, 1899 :—

| | 1899. | 1900. | 1901. | 1902. | 1903. |
|--|-----------|------------|------------|------------|------------|
| | \$ | \$ | \$ | \$ | \$ |
| *Excise | 9,722,967 | 9,931,950 | 10,433,865 | 11,257,485 | 12,190,123 |
| Public Works | 5,090 | 5,366 | 4,805 | 4,749 | 4,901 |
| Culling Timber..... | 10,624 | 8,155 | 8,271 | | |
| Weights and Measures, Gas and Law Stamps | 73,499 | 78,510 | 81,987 | 88,198 | 109,535 |
| Electric Light..... | 11,520 | 14,452 | 15,568 | 21,062 | 23,895 |
| Other Revenues | 642 | 643 | 537 | 592 | 610 |
| Methylated Spirits | | | 73,675 | 66,785 | 72,269 |
| Totals..... | 9,824,342 | 10,039,076 | 10,608,708 | 11,438,871 | 12,401,333 |

* 1899 and 1900 include Methylated Spirits.

From this table it is seen that the increase in 1902-1903 over the previous fiscal year was \$962,462. The chief increases were in the following articles : Spirits, the revenue from which increased from \$5,620,613 in 1901-1902, to \$6,162,827 in 1902-1903 ; tobacco, which produced a revenue for the two years of \$3,563,578, and \$3,904,617, and cigars, the figures for the two years being \$897,360 and \$998,495, respectively. There were decreases in the revenues from malt, petroleum and acetic acid, and in manufactures in bond.

ONTARIO REPORT.

Statistics of Farmers' Institutes.

Annual Report of the Farmers' Institutes of the Province of Ontario, 1903. Part III. Meetings and Statistics. Toronto, King's Printer. 56 pages.

Part III of the Report of Farmers' Institutes of Ontario for the year 1903, con-

tains a detailed account of all the institutes of the province, with reference to their membership, the number of meetings held, attendance and number of papers read, and the receipts and expenditures for the year ending June 30, 1903. This is followed by a list of officers, and a list of the meetings to be held during the present year. The rules and regulations governing Farmers' Institutes are given in an appendix to this report.

The returns show that an active and increasing interest in the institutes is being taken by the farmers of Ontario, the membership for the first six months of 1903, being 23,754, an increase of 806 members over the same period of the previous year. There were also 46 more meetings held during the year, or 837 in all. There are in all 98 institutes in the province.

BRITISH REPORT.

Boiler Explosions.

Trade Report of the Secretary of the Board of Trade upon the working of the Boiler Explosions Acts, 1882 and 1890, with Appendices. Eyre & Spottiswoode, London, Eng. 17 pages. Price, 2½d.

In the Report of the British Board of Trade on boiler explosions in Great Britain during the year which ended on June 30, 1903, it is stated that, under the provisions of the Acts of 1882 and 1890, 59 preliminary inquiries and 10 formal investigations were held during the year ending June 30, 1903. There were 22 persons killed and 67 injured during the year by boiler explosions. The average numbers for the 21 years since 1882 are 29 killed and 61 injured, which shows that the number of accidents is not increasing, although it is estimated that there has been a considerable increase in the number of boilers in use in the United Kingdom during the last twenty years.

The causes of the explosions are summarized in the following table:—

| Types of Explosions. | No. of Cases. |
|---|---------------|
| Deterioration or corrosion.... | 23 |
| Defective designs or undue working pressure.. | 16 |
| Defective workmanship, material, or construction.. | 7 |
| Excessive pressure, defective safety-valve or mountings.. | 1 |
| Ignorance or neglect of attendants.. | 17 |
| Miscellaneous.. | 5 |

In 37 cases, the boilers were under the inspection of public associations or of the Board of Trade, in four cases the boilers were insured but not inspected by any public association, and in 8 cases, concerning which only preliminary inquiries were held, no inspection had been made by any competent person.

The following table shows the types of boilers, to which accidents happened.

| Types of Boilers. | No. of Case. |
|--|--------------|
| Horizontal multitubular.. | 19 |
| Vertical.. | 6 |
| Cylindrical, Cornish, Lancashire, &c.. | 6 |
| Locomotive.. | 6 |
| Water-tube.. | 3 |
| Steam-pipes, stop-valves chests, &c.. | 19 |
| Miscellaneous.. | 10 |

Costs, varying from £10 to £50, were charged against eight owners, who were judged responsible for the accidents, either directly or indirectly.

Railway Accidents in Great Britain.

Returns of Accidents and Casualties as reported to the Board of Trade by the several Railway Companies in the United Kingdom, during the six months ending 30th June, 1903. Eyre & Spottiswoode, London. 152 pages. Price, 1s. 3d.

In the report on railway accidents in the United Kingdom for the first half of the year 1903, it is stated that the total number of persons killed during this period was 569, and the number of injured was 3,079. This was an increase of 31 killed and a decrease of 9 injured, compared with the corresponding portion of 1902. The greatest number of fatalities came under the head of trespassers, including suicides, of whom 230 were killed and 72 injured. There were 33 deaths due to accidents at level crossings. With regard to employees, 12 were killed and 239 injured while coupling or uncoupling vehicles, 52 were killed and 61 injured while working on the permanent way, and 55 others were killed and 122 injured when on duty on the railway line. The above figures refer only to accidents caused by trains in motion. In addition to these there were also 38 persons killed and 5,604 injured in other ways on the premises of railway companies, such as by the moving of freight and luggage, falling off platforms, &c.

Full reports of six railway accidents are given by inspecting officers of the Board of Trade, and there are brief summaries of many other accidents by assistant inspectors. Tabulated statements are also given by sub-inspectors on accidents to railway servants and other persons employed on railway premises, with recommendations for the prevention of similar accidents in future.

UNITED STATES REPORTS.

Wages of Farm Labour in the United States.

U. S. Department of Agriculture, Bureau of Statistics. Miscellaneous Series. Bulletin No. 26. Government Printing Office, Washington, 1903. 62 pages.

The statistics, from which the basis of the bulletin of the United States Department of Agriculture on wages of farm labour in the United States, were derived from twelve investigations extending from 1866 to 1902. More than 23,000 correspondents sent replies for the investigation of 1902.

It is stated that the total number of agricultural labourers in the United States is given by the census of 1900 as 4,410,910, of whom 2,366,149 are members of the families of the farmers, and the remainder are hired employees. A change in the method of payment is noticed, employment by the job being on the increase, instead of payment by day or week. Ploughing and hoeing, for instance, paid by the acre, gathering fruits, digging root crops, picking or husking corn by the measure, and threshing grain by the bushel are increasing practices. These facts render statistics based on day labour very incomplete in some cases, but in this bulletin, in order to render possible a comparison with former years, calculations are made on the payment of wages by time only. It is also observed that another difficulty in making comparisons lies in the diversity of farming in the various States.

Day wages, without board, increased, since 1899, in Wyoming, Idaho, Washington, Oklahoma and Indian Territory, and wages, with board, were at their highest point in Virginia, Wyoming, Oklahoma, and Indian Territory. They varied from \$12.30 per month, or \$147.60 per year for white labour in South Carolina, to \$45.50 per month, or \$546.90 per year in Nevada. In the Report of the Bureau of Industries of Ontario, which was reviewed in the January number of the *Gazette*, it is stated that the wages of farm labourers in Onta-

rio, in 1902, when engaged by the year without board amounted to \$268 per year, which is equal to \$22.33 per month. A comparison with the various States of the Union shows that the wages paid in Ontario are higher than those given in Delaware, Maryland, and all the Southern States and also in Missouri and Indian Territory.

The rate prevailing in Indiana is slightly more than in Ontario, being \$23.84 per month without board, and the wages paid in all the north-eastern States from Maine to Pennsylvania, and in the north, central and western States, with the exception of those mentioned above are higher than those given in Ontario. For the whole of the United States, the average monthly wages without board amount to \$22.14. A difficulty in instituting a comparison between the two countries lies in the fact that in the Ontario report a distinction is made between engagement for the year and for the season, while in the United States report, they are combined. Monthly wages in Ontario paid to those working for the season without board, in 1902, came to \$27.51, which is over \$5 more than the average given for the United States.

Soil Surveys in the United States.

United States Department of Agriculture, Field Operations of the Bureau of Soils, 1902. Fourth Report. Washington, Government Printing Office. 1903. 342 pages.

The Fourth Report of the Bureau of Soils of the United States Department of Agriculture, states that during the field season of 1902, there were surveyed and mapped on the scale of 1 inch to the mile, 17,996 square miles, or 11,517,440 acres, covering thirty-six areas in twenty-six States and territories. There are 60 plates and 24 maps in the report, illustrative of the various districts which were surveyed. With respect to each area described, an account is given of its history and agricultural development, the climate, kinds of soil, and agricultural methods and conditions.

In the general review of the work, it is stated that altogether 33,867 square miles have been surveyed by the bureau, three reports having previously issued with respect to 33,867 square miles.

Labour Statistics of Missouri.

Twenty-fifth Annual Report of the Bureau of Labour Statistics and Inspection of the States of Missouri for the year ending November 5th, 1903. State Printers, Jefferson City, Mo. 419 pages.

The Twenty-fifth Annual Report of the Bureau of Labour Statistics and Inspection of Missouri, for 1903, contains statements of the surplus products shipped from each county in 1902, with the aggregate value for each county. This is followed by a summary of the manufactures of the State, with a series of tables arranged according to the several industries, showing in each case, so far as the figures were obtainable, the value of grounds, buildings, machinery, raw material and products, the capital invested, the expenditure for rent, taxes, insurance, wages and salaries, the number of the different classes of employees, and their average wages. Other tables give the numbers of each class of workmen employed, their average daily wages, hours of labour and the percentage of increases in wages during the year. A large number of particulars are given with regard to labour organizations, of which 636 reported to the Bureau of Labour Statistics. With regard to them, the following statistics are of interest. The total membership of the labour

organizations was 79,443, of whom 2,835 were females. It is estimated that 80.56 per cent of the wage earners in the organized trades are members of trade unions. Compared with 1901, the average daily hours of labour decreased from 9.5 to 9.26 in 1902, and the rate of wages increased from an average of 25.39 cents per hour to 27.77 cents.

There were 159 strikes and lockouts in 1902, of which 110 ended in favour of the men, 24 in favour of the employers, and compromises were effected in 25 cases. The estimated amount of wages lost through strikes was \$142,844.35, and the strike benefits paid by labour organizations amounted to \$45,711.10. There were 30,049 persons involved in strikes and lockouts.

The Report of the Superintendent of the Missouri Free Employment offices contained in this report, states that in the year ending September 30, 1903, there were 16,628 applicants for employment, of which number, places were found for 11,036. There were 26,816 applications for help received from employers, and consequently the number of places not filled amounted to 15,780.

The final portion of the report is composed of extracts from bulletins of the United States Bureau of Labour, relating to the cost of living in the United States, agreements between employers and employees, and decisions of the courts affecting labour.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada:—

PRINCE EDWARD ISLAND CASE.

Obligations of Truckmen.

An interesting test case was recently taken before the police court at Charlottetown on the question as to whether or not

licensed truckmen, when unemployed, are obliged to accept employment offered them. The action was brought by the Maritime Manufacturing and Contracting Company, who are building the new market house. The company had a scow load of stone on the wharf, which it was desired to convey to the market cellar. Two of the truckmen refused to do the work and were ac-

cordingly summoned before the stipendiary magistrate. Counsel for the defence contended that hauling stone and material for contractors did not come under the provisions of the by-law, and further suggested that if all the truckmen of the city were employed by a contracting corporation, citizens might be left in an awkward position. Mr. Macdonald, the stipendiary magistrate, in giving judgment ruled that stone is merchandise and that the case accordingly fell under the by-law. He pointed out, further, that the by-law very properly imposed certain obligations upon truckmen in return for the privilege conferred and imposed a fine of \$1 as an example, and added a warning as regards future cases of a similar nature.

Municipal by-laws usually provide that carters licensed as such shall accept the first employment offered them. In the province of Quebec, moreover, the civil code (Art. 1673) requires common carriers to receive and convey persons applying for passage or goods offered for transportation unless there is a reasonable and sufficient cause of refusal.

(On the information of J. A. McLean, Jr., given at Charlottetown, by Mr. Macdonald, Stipendiary Magistrate.)

QUEBEC CASES.

Duty of Employees to Employers.

His lordship, Mr. Justice Curran, has rendered a decision of some interest to employees in the recent case of Coy vs. the Montreal Lithographing Company. This was an action for salary instituted by the plaintiff, to which he added a claim for damages for wrongful dismissal. The company pleaded to the action denying a yearly engagement alleged by plaintiff and further alleging that the plaintiff had failed to satisfactorily perform his duties. His lordship, in giving judgment, intimated the proof adduced indicated a yearly engagement, but he proceeded to decide the case on other grounds. The principal consideration on which the judgment was based was the fact that the plaintiff had made use of injurious language addressed to his superior officer and had refused to

retract the same. His lordship said, in part, that it is the duty of an employee to obey legal orders of his employer; the employee must not only obey and fulfil his duty to the best of his ability but he is also required to be courteous and respectful towards his superiors—without which it would be impossible for any business establishment to carry on work successfully. The manager who permitted his subordinates to be lacking in respect would soon find himself in an impossible position. The court accordingly dismissed plaintiff's action with cost.

(Coy vs Montreal Lithographic Co., et al., Mr. Justice Curran, Nov. 1903.)

Intoxication of Street Railway Employees.

The Montreal Street Railway Company recently summoned one of its employees before M. C. Desnoyers, Esq., Police Magistrate, on a charge of having been intoxicated while driving his car through the streets. The accused, as a matter of fact, while under the influence of liquor, appears to have endeavoured to ascertain the limit of speed to which his car would be forced, much to the alarm of the passengers, as also to those using the street in the vicinity. His honour gave judgment against the accused, and fined him \$25, adding that he let him off very lightly in consideration of the fact that he had already been in jail for some little time and the company did not desire to be too hard on him as this was the first prosecution.

Montreal Street Railway Company vs. Israel Lafamme, M. C. Desnoyers, P. M. Dec. 10, 1903.

Provident Society Regulations.

The question of the effect of the Rules and Regulations of the Grand Trunk Insurance and Provident Society in actions for damages by employees has again been decided in favour of the Grand Trunk Railway Company by the decision of the Court of Review in the case of Tremblay vs. the Grand Trunk Railway Company. This was an action for damages taken by the widow of a freight train conductor who was killed in his caboose by another train

running into his own, on the Victoria Bridge. The case was heard before a jury who rendered a verdict granting the widow \$8,000 damages and her minor child \$2,000. Inasmuch as an important point of law was involved respecting the company's responsibility, His Lordship, Mr. Justice Doherty, the trial judge, reserved the case for the decision of the Court of Review, after both plaintiff and defendant had moved for judgment in their favour.

The Court of Review has now rendered judgment (Mathieu J. dissenting), holding that under the Rules and Regulations of the Grand Trunk Insurance and Provident Society, of which the deceased was a member, his heirs had no claim against the company in the event of his death by accident in view of the special stipulation to that effect agreed upon in consideration of the railway company's contribution to the funds of the society. The motion of the company defendant was therefore granted and the action dismissed.

The day previous to this, the Assize Court at London, Ont., Mr. Justice Britton, presiding, gave James Harris, a labourer \$400 for damages through injuries received by a machine in the London car shops and alleged to be due to negligence. The same question of the effect of the agreement with the benefit society was involved. It is expected that a definitive pronouncement upon this much debated question will shortly be obtained from the Privy Council in the case of Miller vs. The Grand Trunk Railway Company being an appeal from the recent decision of the Supreme Court of Canada sustaining the railway company's pretensions.

(Tremblay vs. Grand Trunk Railway Company, Court of Review, Montreal, 12th Jan. 1904; Harris vs. Grand Trunk Railway Company. Britton, J., London, Ont., 11th Jan., 1904.)

ONTARIO CASE.

The Canada Foundry Case.

The Canada Foundry Company has gained another victory in its litigation with the Iron Moulders Union in the judgment of the Divisional Court at Toronto dismissing the appeal recently taken from the order of Meredith J., which required the production of certain books of the union. The Financial Secretary of the union on his examination for discovery by the foundry

company was called upon to produce the books of the union in order to establish payment by the union to employees to induce them to quit the service of the company contrary to an injunction already obtained. The officers of the union declined to produce the books contending that they were the property of the union and not of the official who kept them, the latter being one of the defendants in the case inasmuch as the union was not incorporated. The Divisional Court has now held that the order appealed from was right, and that the books were in the custody of the proper official of the union and must be produced upon examination of their custodian inasmuch as the union itself, its officers and many of its members were parties to the action.

(Canada Foundry Company vs. Emmett, Toronto, Divisional Court, 14th January 1904, Falconbridge, C. J., and Street and Britton, J. J.)

UNITED STATES CASE.

Forced Agreements with Unions.

The Supreme Court of New York has decided that the courts will not compel employers to carry out forced agreements made with unions to employ only union men. Mr. Justice Dickey, in giving judgment in the case of Wm. Kissam et al., and Stereotypers Union No. 1, maintaining in part the injunction obtained by Kissam, referred to the part of the injunction which was not upheld. This portion was the one preventing the company (United States Printing Company) from discharging the men in pursuance of an agreement they were forced to make with the unions to employ only union men after January 1, 1904. Mr. Justice Dickey said that the courts cannot compel the company to give a man employment, but if the purpose of the unions in the agreement with the company was to restrict the workmen in pursuing their lawful trade and coerce them to become members of the union, such purpose is against public policy and is unlawful. The unions cannot arrange a plan of compelling workmen not in affiliation with their organization to join them at the price of being deprived of their employment.

(Supreme Court of New York, Wm. Kissam et al., vs. Stereotypers Union No. 1 and the United States Printing Company. Jan. 14th, 1904, New York.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 9.

MARCH, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA.

OTTAWA, March 15, 1904.

A very important factor in the general industrial situation in Canada was the heavy snowfalls and severe weather prevalent throughout the month of February and the consequent blockades on the railways in Western Ontario, the effect of which upon trade and industry was of a far-reaching character. A prominent place is accordingly given in the present issue of the *Gazette* to a special article dealing with this phase of the current industrial situation, the department having endeavoured to obtain as full information as possible within the limits of time at its disposal, and to present the facts collected in such a way as to indicate their significance and bearing upon the field of trade and industry as a whole.

Two special articles of the issue have to do with legislation affecting labour enacted during the month. One of these refers to the amendments of the Factory Act of Manitoba passed at the recent session of

the legislature of that province, and the other of the various measures affecting labour recently carried by the British Columbia legislature, to which is appended reference to the rules which recently went into force for 1904 under the British Columbia Workmen's Compensation Act.

With the present issue the department begins publication in the *Gazette* of a regular monthly article dealing in brief form with official and other returns relating to the trade and commerce of the Dominion. A reference to the subject of trade conditions has been previously included in the general article summarizing industrial and labour conditions, the information being regarded as of value in throwing light on the current industrial and labour situation. The General Summary article is confined to matters relating more directly and exclusively to labour and industrial conditions.

Other special articles of the issue refer to the organization of a co-operative association of workmen at Guelph, Ont., and the regulations with regard to apprenticeship recently adopted by the Employers' Association of Toronto.

It was the intention of the department to continue the series of special articles begun in the December *Labour Gazette*, relating to the hours of labour in the several trades throughout the Dominion, with a statistical return in the present issue in reference to the hours prevailing in the metal, engineering and shipbuilding trades. One table relating to the current hours of labour has already been published in the

Labour Gazette, appearing in the February issue and relating to hours in the building trades. Since the publication of this article, however, it has been decided to enlarge the scope of this investigation so as to include a history of the tendency of the

rates of wages and hours of labour during past years, as well as a statement of current hours and rates. Owing to the extent of this investigation it may be some time before the results will be ready for publication.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF FEBRUARY.

UNFAVOURABLE weather, as in January, was an important factor in influencing industrial and labour conditions during the month of February, so much so that at the end of the month, and especially in the province of Ontario, the resulting disturbance was of a very widespread and far-reaching character*. While unskilled labour in some parts was provided with additional work occasioned by the snow blockades, their effect, on the whole, was injurious to employment. The general trade and industrial situation continues good, and gives promise of an active and successful season during 1904.

The Cost of Living.

An important development of the month was the continued upward tendency of the price of wheat and bread, the former having reached and passed the dollar mark in the principal markets, and the latter at many points showing a material advance. At Quebec, Que., the price per large loaf was advanced two cents on February 15. A similar advance took place in Montreal on February 22. At Winnipeg, a small loaf was advanced in price from five to seven cents. Ottawa, Hull and Vancouver were other important points from which increases were reported. Flour rose sixty cents per barrel at New Westminster since January 1, and in many localities during February advances of fifteen cents per bar-

rel took place. The cold weather and the transportation blockade had the effect also of advancing various staple commodities at different points, owing to the temporary scarcity caused thereby. Of these, coal was the commodity chiefly affected, though prices of fish were unusually high. Farm produce also, owing to the inability of farmers to reach their markets, showed large advances, particularly in butter—creamery and roll, and eggs, in the last of which a practical famine was in existence throughout the month, with prices at several points higher than in a number of years. In the province of Quebec, and more particularly in the cities of Montreal and Quebec, the period of the renewing of leases and rents brought into evidence a considerable scarcity in the class of dwellings suitable for work people; high rentals in consequence were asked.

Changes in Wages and Hours of Labour.

The list of changes of wages and hours of labour reported to the department during February would indicate on the whole an upward tendency, though decreases and increases are much more equally balanced than they were in February a year ago. In many cases the schedules for 1904 have been already agreed upon, in some instances being the same as for last year. The more important changes in wages and hours reported to the department during February may be briefly presented as follows:—

Pit drivers employed in No. 2 and No. 3 collieries of the *Dominion Coal Co.*, Nova

* A special article is devoted to this aspect of the industrial situation in the present issue of the *Gazette*.

Scotia, were changed from a contract price to a rate of \$1.38 per day. At *St. Hyacinthe, Que.*, moulders and machinists, to the number of 72, had their hours increased since November, 1903, to 10 hours on Saturdays, whereas they formerly stopped work at 12.45 p.m. on Saturdays. Cutters in the employ of the Penman Manufacturing Co., in the same city, who were formerly paid by the piece and made wages varying from \$9 to \$11 per week, were placed at a fixed salary of \$9, while a number were dismissed. In *Montreal, Que.*, a number of new scales for the incoming season were presented: carpenters and joiners asked for a nine-hour day at an increased wage, namely, 25 cents per hour, to date from April 1; longshoremen have also asked for a rearrangement of working conditions; and masons were asking for a nine-hour day at 35 cents per hour. Two police officers were recommended for higher salaries. At *Toronto, Ont.*, two steamship companies are reported to have granted a scale of \$40 per month to members of the Marine Firemen, Oilers and Water Tenders' Union. The Bricklayers' Union and the employers have signed an agreement for 1904 which embodies the same conditions as last year, namely, 45 cents per hour and eight hours per day. At *Hamilton, Ont.*, 15 ash and garbage collectors in the employ of the municipality were increased on February 15 from \$4.75 to \$5.50 per day, these rates including hire of horse and wagon. Bricklayers and masons in the same city, to the number of 100, were granted an increase in wages from 40 cents to 45 cents per hour, to take effect from February 1, the working hours to be increased from eight to nine per day. Ten rivetters at *Niagara Falls, Ont.*, were granted an increase of 25 cents per day on February 8. Other employees in the shops of the same company were placed under a new arrangement, involving an increase in the amount of work to be done per day, with a corresponding increase in pay. There was also an arrangement made covering pay for extra work. At *Brantford,*

Ont., ten iron-drillers in the employ of the Massey-Harris Company were reduced about 7 cents per day. At *Stratford, Ont.*, a proposed reduction in the wages of painters employed in one of the shops was reconsidered by the firm and conditions left unchanged. Some 400 employees in the G.T. R. car shops at London were increased in hours of work from February 1, with a corresponding advance in wages, owing to the increased amount of work to be done. Telegraph operators in the employ of the Michigan Central Railway to the number of 132, were increased from \$40 to \$45 per month. At *Chatham, Ont.*, a temporary reduction in hours from 59 to 54, with corresponding reduction in wages, was agreed to by a firm employing moulders, machinists, boilermakers and blacksmiths. A new schedule for printers, affecting 36 members of the craft, at Windsor, Ont., went into effect on February 12, involving a material advance to certain classes of employees.* Longshoremen in the employ of the British Columbia Stevedores' Association on Vancouver Island were granted an increase from February 1 from 35 to 40 cents per hour for day work and 40 to 50 cents per hour for night work.

Interruptions to Industry.

Excepting the serious embarrassments occasioned by the snow blockades and consequent effects, which were severe, the month was on the whole free from serious interruptions to industry. The record of new labour disputes was, on the whole, satisfactory. A disastrous fire, however, at the smelting works of the Canadian Copper Co., at Copper Cliff, Ont., entailed a loss estimated at \$150,000 and threw about 1,100 men out of employment. By making use of a smelter at Victoria Mines, however, the men were speedily given employment. At Berlin, the Felt Boot Company's estab-

* A full copy of the new schedule will be found in the report of the Windsor correspondent in the present issue.

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

| City and District of Correspondent. | Agricultural Operations. | Fishing. | Lumbering (including Saw-milling). | Mining. | Manufacturing. | Railway Construction. | Building Trades. |

lishment was destroyed by fire and 175 hands thrown temporarily out of employment. The destruction by fire of the Menzie Manufacturing Company's plant at Toronto also affected about fifty men, while the burning of the upper story of the building of the American Cereal Company's mills at Peterborough interrupted employment

in that city. In Kingston, a stoppage of the street car service occurred on February 3, owing to a disagreement between the company and the municipality. About 30 employes, whose wage bill amounted to about \$250 per week, were thrown out of employment, and the general trade of the city seriously affected.

Conditions in the Industries and Trades.

Condition of employment, and other features of the month in the several trades and industries of the Dominion, as shown by the reports of the correspondents of the *Gazette* for February, and by infor-

mation collected by the department from other sources, may be summarized as follows:—

Agriculture.—General quietness prevails, work being largely confined to stock-feeding. The high price reached by wheat and

other grains stimulated marketing operations, and a considerable movement in these products was the result. The cold weather and heavy snowfalls, however, interfered with this work, as it did also with the cutting and marketing of cord-wood. The lowness of the water in the wells caused inconvenience to agriculturists in certain districts of Quebec. The scarcity of labour for the coming season is already under active discussion.

Among the more important associations in connection with the industry which held meetings during the month, were the following:—The Fruit Growers' Association of Prince Edward Island, at Charlottetown; the Nova Scotia Fruit Growers' Association, at Bridgeport; the Dominion Grange, at Toronto; the Dominion Sheep Breeders' Association, at Toronto; the Niagara Peninsula United Fruit Growers' Association, at St. Catharines; the Manitoba Grain Growers' Association, at Brandon; the Central Farmers' Institute, at Victoria, B.C., and the Dairymen's and Live Stock Association, at Victoria, B.C. The first annual convention of the National Association of Live Stock Breeders will be held in Ottawa, on March 7 to 12.

An Order in Council requiring all steamers which carry horses and cattle from Canadian ports to have alleyways three feet wide, the same not to be obstructed with food or other commodities, was issued during the month.

The improved quality and packing of Canadian apples placed on the English markets has been the subject of remark by Canadian agents in Great Britain.

Important developments in the ranching industry were reported in Alberta during the month.

Fishing.—Dullness characterized the month throughout, a condition for which the stormy weather and severe cold were largely responsible. High prices, however, for fish of nearly all varieties prevailed, the market for salmon in British Columbia

being stimulated by the outbreak of war between Japan and Russia.

An important development of the month was the forwarding to the Department of Fisheries at Ottawa by the Ontario fisheries authorities, of a number of suggested changes in regulations, with a view of preventing the depletion of the waters of the province. The suggestions numbered thirteen in all, and had reference to licenses, close seasons, minimum size of fish to be taken, penalties, and a variety of subjects. The possible depletion of the halibut fisheries of British Columbia by fishermen from the United States was discussed in the British Columbia Legislature during February.

A plan for the improvement of herring-curing in Canada, so that this commodity may net a higher price in outside markets, was recently authorized by the Dominion Government, the initial operations to be commenced within the next two months on the Atlantic coast and the work to be in the hands of a competent herring-curer from Scotland.

A contract was stated to have been closed during the month for the installation of a plant to be located in the Bay of Fundy, in the neighbourhood of Digby, N.S., for the reduction of fifty tons of dog-fish and fish offal per day in the production of fertilizer. The proposal is of considerable interest to the fishing industry as representing a practical step for the extermination of the dog-fish, one of the most destructive pests to Bay of Fundy fishermen.

Lumbering.—Work on the limits progressed satisfactorily, though the deep snow impeded operations in many localities in Ontario and largely increased the expense of the winter's output. In some cases log-cutting has already ceased, and the men have returned to their homes. The establishment of a new forest reserve on the north shore of Lake Huron, containing over 3,000 square miles, was announced by the Government of Ontario. A plan for

the reforestation of the farm lands of the older section of the province was also proposed, a small area at the Ontario Agricultural College being set aside for the growth of trees for distribution in conjunction with an active educational campaign. In Quebec and New Brunswick, the season's cut is estimated as about the same as last year, amounting on the Upper St. John to 125,000,000 feet. In Western Canada the problem of obtaining an adequate lumber supply at reasonable prices for building purposes in Manitoba and the Territories continues to be actively debated. Representatives of the trade, wholesale and retail, and of the logging interests in Manitoba, the Territories and British Columbia, met in Winnipeg during the month for the discussion of the problem from the standpoint of the mill men, transportation companies, retail dealers, and other parties concerned.

The Minister of Crown Lands for Ontario gave an estimate during February of the value of the timber resources of the province yet unsold and uncut. He estimated that ten billion feet of white pine were yet to be disposed of, the value of which would be at the least calculation \$75,000,000 from bonuses and \$20,000,000 from dues. There was sufficient to make twenty sales as large as the one held in December. According to this estimate, there are some 300,000,000 cords of pulp wood, worth \$75,000,000, and hemlock and hardwood in abundance.

The log-cut in the Ottawa district is estimated to show a reduction on that of the season of 1902-03. The unusual depth of the snow caused the suspension of log-cutting at least three weeks earlier than usual, and the work of log-hauling has also been attended with great difficulty, necessitating the engagement of large numbers of extra horses.

The special commission on colonization appointed by the Provincial Government of Quebec held a number of meetings dur-

ing the month, principally in the cities of Montreal and Hull, in both of which addresses on various subjects relating to forestry and colonization were listened to. The members of the commission, of which the Hon. Senator Legris is chairman, made a tour by road through Dorion, Wright, Kensington and Aumond townships for the purpose of noting the extent to which valuable forests have been destroyed by fire. The same subject was also referred to at length at an important session held at Hull at which Messrs. J. R. Booth, E. B. Eddy, J. Gillies, Hon. Senator Edwards, Alexander Lumsden, G. H. Perley and a number of managers appeared. The relation of the progress of settlement to the lumbering industry was also dealt with at length. Evidence was also taken before the commission in the matter of certain contested claims for settlement alleged to be fraudulent by certain owners of limits. The commission will report at full length to the Quebec Government on the conclusion of its inquiry.

Mining.—Some depression in coal mining has appeared in a few localities in Nova Scotia, notably at the Bridgeport colliery of the Dominion Coal Co., which closed down temporarily, throwing 500 hands out of employment. The situation as a whole, accordingly, shows a decline both from last month and as compared with February, 1903. Extensive developments in the industry, however, were reported both by the Dominion Coal Company and by a new syndicate to operate extensive under-sea coal areas at Port Morien. With gold mining throughout the province the prospects are very favourable.

A statement of the production of minerals in Nova Scotia last year, submitted to the legislature, shows it to have been as follows:—

| | | |
|-----------------------|-----------|-------|
| Gold.. . . . | 25,198 | ozs. |
| Iron ore.. . . . | 415,192 | tons. |
| Manganese ore.. . . . | 150 | " |
| Coal raised.. . . . | 5,245,247 | " |
| Coke made.. . . . | 392,600 | " |
| Gypsum.. . . . | 175,850 | " |

| | |
|-------------------------|-----------|
| Grindstones.. | 650 tons. |
| Limestone.. | 262,544 " |
| Barytes.. | 897 " |
| Pig iron.. | 194,444 " |
| Moulding sand.. | 240 " |
| Steel ingots.. | 180,434 " |

In British Columbia, the latest reports from the Crow's Nest Pass fields show very favourable conditions. The financial statement presented at the annual meeting of the company, held in Toronto during the month, showed net profits of \$310,492.28. The output for the year was 49'83 per cent larger than for 1902, while the December output exceeded that of the preceding January by 58'72 per cent. On the Island of Vancouver, also, fair conditions prevailed. A feature of the month was the improved tone in metalliferous mining circles at Rossland, owing to favourable reports of a number of properties.

An Order in Council was passed by the Dominion Government rescinding the regulations adopted in 1898 for the disposal of mining locations in the Yukon Territories worked by the hydraulic mining process. Mining will henceforth be carried on in the Yukon under placer regulations. Leases granted under the old regulations are not interfered with, though locations will be cancelled in cases of non-compliance with obligations undertaken.

The annual convention of the British Columbia Mining Association opened in the closing week of the month at Victoria, B.C.

Manufacturing.—Conditions in the industry, apart from the interference caused in Ontario by the snow blockade on the railways, were active with a good demand for products.

The work of the reorganization committee of the Lake Superior Consolidated Co. was announced during the month to have reached a stage where the carrying out of the plans and the reopening of the works might be regarded as assured. In the closing week of the month a definite announcement was promised at an early date.

The new company, it was stated, was to be known as the Canadian Improvement Co., with capital and bonds aggregating \$53,000,000. The plan was stated to have received the approval of the creditors of the previous company.

Recent returns made, subject to correction, by the Census Department, relating to manufactures in Canada, covering establishments employing five workers or over in 1891 and 1901, showed that in the former year there were 13,679 establishments producing a product valued at \$363,156,787, whereas the number in 1901 was 14,650 with a product valued at \$481,053,375. In the latter total, log products accounted for over \$50,000,000, flouring and grist mill for over \$31,000,000, butter and cheese for over \$29,000,000, and slaughtering and meat packing for over \$22,000,000.

Statistics received by the American Iron and Steel Association from manufacturers of pig-iron in Canada show a decrease of 54,139 gross tons or about 17 per cent for the year 1903 as compared with 1902, with an increase of 20,442 tons as compared with 1901. The total production for 1903 was 265,418 gross tons, of which 247,905 tons were made with coke and 17,513 tons with charcoal. Some 126,892 tons of the total production was basic pig-iron, and less than 100,000 of Bessemer iron was made. On December 30, 1903, Canada had fifteen complete blast furnaces, of which nine were in blast and six were idle. Of the total, eleven were equipped to use coke for fuel and four to use charcoal. There were also three coke furnaces and one charcoal furnace partially constructed on the date named. Among the leading companies engaged in the manufacture of pig-iron in Canada are the following:—The Dominion Iron and Steel Company, Sydney, N.S.; The Londonderry Iron and Mining Company, Ltd., Londonderry, N.S.; The Nova Scotia Steel and Coal Company, Ferrona, N.S.; The Canada Iron Furnace Co., Ltd., Radnor Forges, Que., and Midland Ont.;

John McDougall & Company, Drummondville, Que.; The Algoma Steel Co., Ltd., Sault Ste. Marie, Ont.; The Deseronto Iron Co., Deseronto, Ont.; The Hamilton Steel and Iron Co., Ltd., Hamilton, Ont.

Railway construction and transportation.

—The most important feature of the month was the continuance of the severe weather conditions which were the cause of so much difficulty to railway and other transportation companies during January. Other developments of the month were as follows:—

The second annual report of the Temiscamingue and Northern railway shows that the sum of \$1,842,451 was spent last year, making a total expenditure on construction and equipment, to December 31, 1903, of \$2,020,092. The chief items of expenditure last year were as follows:—

| | |
|------------------------------|-----------|
| Engineers' construction..... | 1,156,527 |
| Rails and fastenings..... | 326,103 |
| Rolling stock..... | 73,789 |
| Ties..... | 65,425 |
| Ballasting..... | 37,599 |
| Pay rolls..... | 40,098 |
| Telegraph line..... | 9,489 |
| Track laying..... | 20,579 |

Recent railway reports show that, after payment of working expenses, fixed charges and dividends, the Canadian Pacific Railway Company had a surplus of \$2,751,783 for the first half of the year. The Canada Atlantic railway carried, according to the company's statement for the fiscal year 1903, 9,208 additional passengers and 40,331 tons less of freight. The gross earnings show an increase of \$91,079, and net earnings of \$122,069. The gross earnings of the Ottawa and New York railway increased \$14,323. The Ottawa, Northern and Western railway showed net earnings of \$15,709. The annual report of the Richelieu and Ontario Navigation Company showed an increase of \$68,135 in gross earnings as compared with the previous year.

An important announcement of the month was to the effect that the Great Lakes and St. Lawrence Transportation Company would remove its headquarters from Quebec to Montreal.

The establishment of a line of steamships to ply between the ports of Canada and Mexico was discussed during the month.

It was announced that the Canadian Elevator Company would erect a 1,500,000 bushel elevator at Fort William during the coming summer.

The Manchester line of steamers carried from Canada to Manchester last year over 1,500,000 bushels of grain, 17,987 boxes of cheese, 40,000 barrels of apples, 10,505 head of cattle and 7,256 head of sheep, in addition to a large quantity of pulp, timber and miscellaneous merchandise.

It was decided by the Montreal Harbour Commissioners to add a 50-ton floating crane to the equipment of the port at a cost of \$60,000.

The Trades.—Dullness characterized the building trades throughout the month with scarcely an exception, as the result of the unusually cold and stormy weather, all branches being affected thereby, with the exception of plumbers and gas and steam-fitters, who, on account of the damage done to the pipes by frost, had one of the busiest seasons on record. Prospects for the building season of 1904 are exceptionally bright, however, the number of permits already issued in many localities, notably in Winnipeg, Man., exceeding the record of last year. The arranging of wage schedules to govern the season has also thus far proceeded satisfactorily, and the year in this respect shows an improvement over 1903.

In the metal trades activity has been the rule.

The woodworking branches have been satisfactorily employed, though on a lower level of activity than the metal trades. Coopers have been dull, several cases of inactivity resulting from the blockade of transportation.

The printing trades have been generally well employed.

The clothing trades, as usual at this time of the year, have, with few local exceptions, been dull throughout the month,

though garment workers are busy in some localities on spring orders.

Conditions in the food and tobacco preparation branches have been fair. Ice cutting was interfered with by the heavy snowfall, and the crop will not be as successfully stored as was anticipated at the opening of the season.

The leather and miscellaneous trades reported on the whole normal conditions.

Unskilled labour for the season was well employed, the work of snow removal having benefited this class to an exceptional degree.

The Railway Commission.

The newly constituted railway commission held its first regular meeting at Ottawa, on Tuesday, February 9. There were present the chief commissioner, Hon. A. G. Blair; the deputy chief commissioner, Hon. M. E. Bernier, and Mr. James Mills, commissioner, with several representatives of the legal profession and others. The chief commissioner referred, in opening the proceedings, to the origin of the commission, the passing away of the railway committee of the Privy Council, and the handing on of its duties, enlarged and extended, to the new body. The powers and jurisdiction of the new board were also outlined. The precise order of business before the commission, it was stated, would be indicated later; for the present, the large arrears of business of an important character made regular 'procedure difficult. Other speeches were also made, and with this preliminary the commission at once proceeded to business, a hearing being given on the opening day to the application of the Vancouver, New Westminster and Yukon Railway Company for a crossing at New Westminster. Several other sessions of the commission were held during the month, at which other questions were presented and argued, among them being the petition of the municipalities of Port Arthur and Fort William, which have an independent municipal telephone system,

for the right of telephone connection with the C.P.R. station, the C.P.R. Co. having an exclusive contract with the Bell Telephone Company.

Meetings of Associations, &c.

The twentieth annual convention of the National Association of Master House Painters and Decorators of the United States and Canada was held in Toronto during the second week of February, over 400 delegates being present from the various states and provinces. At the convention of the association held last year at Richmond, Va., a special committee was appointed with the object of bringing about improved relations between employers and employees in the craft, and it was in connection with the statement made by this committee, though no definite or written report was presented, that the chief discussion of the meeting took place. A number of papers were also read by the members on the same subject. The committee appointed to consider the question of incorporation reported against the project, on the ground that many of the most successful organizations of business men were not incorporated. The question of the affiliation of local associations with the state and national associations was also debated. Mr. William E. Wall was re-elected general organizer, and the city of Milwaukee, Wis., was selected as the place of meeting for the next annual convention, which will be held in February, 1905. A notable feature of the convention was the organization of a purely Canadian association with similar aims and objects and in affiliation with the national association. This body will hold its first annual and separate convention at Montreal in July, 1904.

Notes of the Month.

The Ontario Sugar Company, Limited, of Berlin, Ont., held a series of meetings in different sections of the province of Ontario for the discussion of methods of cultivation of the sugar-beet crop.

The Bricklayers International Union No. 2, Toronto, report a net increase of \$1,100 in revenue during the year. The sum of \$20 was voted to the hospital for sick children, and \$20 to the Children's Aid Society by the union during the month.

At a largely attended meeting of the Board of Trade of Ottawa, an address was delivered on the subject of peat fuel by the president of the Dominion Peat Products Company. The necessity of maintaining a constant supply of fuel in Canada, the total annual consumption of which is valued at \$40,000,000, and the field thereby opened for production of peat was referred to. Twenty-four processes for the manufacture of peat, it was stated, had been put into operation during the last fifty years in Europe and North America. In Canada, the industry has been largely confined to the compressing method. Peat fuel, it was said, must be produced on a large scale to make it pay.

A report of the city engineer of Toronto, relating to sewers constructed last year, shows that the day labour system was employed in the case of 27 out of a total of 38 additions made to the sewerage system, effecting a saving of \$4,500 over the figures of the next lowest tenders. As the total expenditure was \$15,700, the saving amounted to about 25 per cent.

The Revelstoke Board of Trade passed a resolution during February to the effect that the Canadian Pacific Railway Company should be asked to establish such freight rates as would enable the merchants of that town to do a general jobbing trade in the interior of British Columbia.

There are at present 28 incorporated towns in the province of Nova Scotia. A return presented to the legislative assembly of that province on February 4 showed the following assessed valuations:—

| Town. | Real Property. | Personal Property. | Income. |
|------------------|----------------|--------------------|-----------|
| | \$ cts. | \$ cts. | \$ cts. |
| Amherst. | 1,475,631 00 | 636,200 00 | 40,675 00 |
| Annapolis Royal. | 240,949 00 | 75,275 00 | 49,650 00 |
| Antigonish. | 280,825 00 | 162,550 00 | 3,850 00 |
| Bridgetown. | 247,560 00 | 86,905 00 | 9,750 00 |
| Bridgewater. | 369,035 00 | 169,746 00 | 14,825 00 |
| Canso. | 88,086 00 | 45,153 00 | 12,260 00 |
| Dartmouth. | 1,519,215 00 | 424,050 00 | Exempt. |
| Digby. | 323,246 00 | 102,123 00 | 5,300 00 |
| Glace Bay. | 1,091,120 00 | 253,300 00 | 35,335 00 |
| Hantsport. | 130,880 00 | 48,030 00 | 5,010 00 |
| Kentville. | 408,510 00 | 101,400 00 | 13,655 00 |
| Liverpool. | 408,600 00 | 217,000 00 | 8,000 00 |
| Louisbourg. | 197,727 00 | 49,273 00 | 6,978 65 |
| Lunenburg. | 718,000 00 | 463,889 00 | 14,450 00 |
| New Glasgow. | 1,028,260 00 | 319,055 00 | 38,300 00 |
| North Sydney. | 1,607,290 00 | 376,170 00 | 10,340 00 |
| Parsonsboro. | 181,698 00 | 22,565 00 | 15,000 00 |
| Pictou. | 849,379 00 | 254,365 00 | 25,401 00 |
| Port Hawkesbury. | 82,867 00 | 28,040 00 | 530 00 |
| Port Hood. | 44,550 00 | 7,718 00 | 1,520 00 |
| Springhill. | 480,570 00 | 149,165 00 | 13,280 00 |
| Stellarton. | 353,800 00 | 134,120 00 | 19,800 00 |
| Sydney Mines. | 206,140 00 | 235,800 00 | 8,047 00 |
| Truro. | 1,809,025 00 | 640,440 00 | 48,300 00 |
| Westville. | 322,670 00 | 83,150 00 | 7,000 00 |
| Windsor. | 932,990 00 | 289,717 00 | 36,450 00 |

| Yarmouth. | 2,352,780 00 | 1,709,495 00 | 74,650 00 |

A request that a 'fair wage' clause be inserted in all contracts for building let by the city of Winnipeg was refused by the civic board of works.

The county of Oxford passed a by-law to purchase the *county toll roads* at a cost of \$35,000.

According to a statement of the assessors' board, the *assessed valuation* of the city of Montreal was \$165,020,135 in 1893. In 1903 it had increased to \$201,044,670, an increase in ten years of 22 per cent.

The December, 1903, report of the Council of Arts and Manufactures of Quebec, says :—

The classes in Montreal are followed by 1,102 pupils. These figures have not been exceeded since the Government established these schools. The attendance in the different classes in Montreal is : Free-hand drawing, 132; architecture, 81; sign painting, 26; modelling, 30; lithography, 26; mechanics, 140; boot and shoe working, 32; carpentering, 32; joining work, 59; plumbing, 44; sewing, 265; singing, 217.

The number of pupils in the schools established in the following localities is :

Quebec, 136; Hull, 69; Three Rivers, 80; Sherbrooke, 82; Saint-Hyacinthe, 136; Lévis, 382 and Valleyfield, 43.

A list of the more important industries of *Moncton, N.B.*, with the number of workmen employed, is as follows:—

| Industries. | No. of Employees. |
|--|-------------------|
| Railway shops | 1,300 |
| Railway offices..... | 600 |
| Humphrey & Son, woollen mills | 100 |
| Humphrey Clothing Co | 130 |
| Humphrey Manufacturing Co | 20 |
| Record Foundry..... | 300 |
| Paul Lea, lumber, finish, mill, builder,&c | 30 |
| Charles Fawcett, planer mill..... | 15 |
| A. A. Tuttle, sash factory, undertakers..... | 25 |
| N. B. Wire Co., wire fencing | 40 |

The barrel factory, in which barrels are made for the Halifax and Dartmouth sugar refineries, pays out \$50,000 a year for material and wages. The Drury-Lockhart saw-mill cuts 2,000,000 feet of lumber annually.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market has not been so favourable as in January. Severe frosts and heavy snow-storms seriously hindered mining operations. The reservoir of No. 2 colliery, at New Aberdeen, was frozen to the bottom, which forced the mine to suspend operations for over a week. The heavy snows, continually adding to the heaps piled everywhere around the collieries, made the moving of coal cars to the surface a slow process, which materially affected the daily output. The recent thaw has provided water for No. 2 colliery. In future, the town of Glace Bay will supply the colliery when necessary. Bridgeport mine, where upward of 500 men are employed,

was temporarily closed, and it may not re-open until navigation opens, which generally takes place between April 15 and May 1. About 60 of the men are retained to repair and timber the mine, the others are finding employment in the surrounding mines. The cause for shutting down the mine is the limited market for the coal, which is a good gas coal and largely used in Montreal gas works.

The Sydney Steel Works are progressing. The rod mill is rapidly nearing completion. The new billet mill, which is to reduce the 4-inch billet to 1½-inch for the rod mill, is also well under way. A new wash plant of structural iron is to replace the wooden one burned some time ago. The work on the foundation of this plant has already begun, and it will give employment to 150 men. Four open-hearths and three blast furnaces are now in operation. The other six open-

hearth furnaces are being repaired. Altogether the outlook at Sydney is much more hopeful than it has been for some time.

The wholesale and retail trades of Sydney are unchanged from last month, and around the collieries trade is fairly good. The pit drivers of No. 2 and 3 collieries of the Dominion Coal Company have changed from contract to day-rate of \$1.38.

A boys' strike occurred at No. 2 colliery of the Dominion Coal Company. The contract drivers were asked by the company to go on by day-rate, \$1.38 being offered; the contract drivers asked that the rate be \$1.65 per day. This being refused by the company, the men ceased work, and, on being offered other work at which the day-rate of \$1.65 could be earned, they left their former positions to be filled by a number of drivers who were idle at the time. The strike lasted three days.

Sydney is making efforts to induce cement and car-building companies to locate there, by offers of exemption from taxation for a period of years. Tenders are called for the supply of timber and the rebuilding of the Glace Bay wharfs. Besides vessels receiving return cargoes of coal after unloading produce, the coasting trade, it is said, will be stimulated by this, as most of these vessels will be loaded at Glace Bay, and not at International Pier or Louisbourg, where delay is occasioned by reason of the larger steamers getting the preference. An agreement has been entered into between the Government and the Dominion Coal Company by which the company is to receive \$25,000 when the wharfs are repaired and made ready for coal shipments. The Government is to keep the outer entrance of the harbour dredged, and the Dominion Coal Company the inside, beginning from the mouth of the harbour, which is clearly defined.

13,580 feet of water mains were laid in Sydney in connection with the city water works in 1903. The work, when done, cost \$15,781.44, of which amount \$5,480.17 was

for labour. Nearly one-half of the work was done by the city itself by day labour.

Negotiations were in progress between the Canada Glass Works Company, Limited, and the city council of Sydney in regard to the establishment of a plant for the manufacture of glass within that city. The estimated cost of the buildings, machinery and site is placed at \$500,000, and the works will employ from 250 to 350 men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work for bricklayers and masons is very dull. Carpenters and joiners are not very busy. Lathers and plasterers find work scarce. Plumbers are busy. Gas and steamfitters are fairly well employed. Stonecutters and builders' labourers have very little work.

Metal, engineering and shipbuilding trades.—Iron moulding is brisk. Ironworkers and helpers find work on the increase. Coremakers have fairly steady employment. Machinists, engineers, steam engineers, electrical workers and linemen are all very busy. Blacksmiths, boiler-makers and horseshoers have steady employment.

Woodworking and furnishing trades.—Woodworkers have fair employment.

Food and tobacco preparation.—Ice cutters are busily engaged harvesting the ice crop.

Miscellaneous.—Barbers are fairly well employed. Clerks and stenographers are busy.

Transport.—All hands employed in the movement of trains and handling of transportation matter have steady employment. Steamboatmen and steamboat firemen have little or no employment.

Unskilled labour.—Many have found employment on the streets and roads, but are not, on the whole, in much demand.

DISTRICT NOTES.

New Campbellton.—The dolomite quarry has been closed.

Joggin's Mine.—The Joggin's mine, which was recently flooded, is now being unwatered. The men employed in the mines, owing to the presence of explosive gases, have had to use safety lamps. It is expected that the burnt district will be in operation again in about two months. An effort is being made to put the Joggin's colliery in better condition by adding to its surface equipment, so that a larger output may be obtained.

North Sydney.—It is proposed to construct a new tobacco factory at this point, to employ one hundred men. The arrangements have not yet been finally completed.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been fairly good, and but for the unfavourable weather conditions, would have been active for the season of the year, signs of returning activity being manifest during the latter part of the month, when quite a few painters went to work. On the whole, the month has been one of normal activity, and while some kinds of labour have been dull, others have been very active, with good promises for an early spring. Commercial activity has continued, and from now on a busy season may be expected in immigration circles. Up to the present travel has been light, the different steamers arriving not bringing over 300 passengers each trip. Business activity is asserting itself in the spring trade of wholesale and retail dealers, and a prosperous season is contemplated by those engaged in these branches of business. The labour market is practically free from unrest of any kind, and nothing radical in this line is expected for the near future.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fishing industry has been quite dull. No catches of any significance

are reported, and the general condition has been quiet.

Lumbering.—The lumbering industry has had every opportunity of good results; the snow has provided every aid to the lumbermen, while the swamps and marshes are covered with ice, affording the necessary means of getting out the lumber.

Mining.—No new or particular developments are noted during the past month.

Railroad construction continues to be as active as in the previous month.

CONDITION OF PARTICULAR TRADES.

Building trades.—Nearly all branches of the building trades have been dull, with the exception of plumbers and gas-fitters. A few painters secured work at the end of the month.

Metal, engineering and shipbuilding trades.—Moulders have been fairly busy. Machinists and engineers have had a good month. Horseshoers have been busy. Shipwrights and caulkers normally active.

Woodworking and furnishing trades.—No particular stir is apparent in these trades; the activity is about normal.

Printing and allied trades.—Printers have been fairly active. Pressmen are enjoying similar conditions.

Miscellaneous.—Barbers, clerks and delivery employees have been fairly busy.

Transport.—All phases of railroad labour have been active, with good prospects for the coming season. Ship labourers and longshoremen have also enjoyed a fairly good season, while teamsters and expressmen have been busy.

Unskilled labour.—The opportunities for the employment of unskilled labour were less than the previous month.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month of February was practically

the same as that in January, the supply exceeding the demand in the majority of departments. Owing to the severity of the weather, outdoor building operations were almost at a standstill. In the country the unusual depth of the snow in the woods interfered with the getting out of fence rails and firewood. In Charlottetown, the repairs to the post office constituted the chief indoor work in the building line, although the sash and door factories were kept busy as usual. The tying up of the winter steamers for a fortnight, owing to heavy ice, lessened the earnings of long-shoremen, freight handlers and truckmen. Wholesale and retail trades were quieter than last month, and shipments of exports were smaller.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The unusual depth of snow and heavy roads made work for the farmer very difficult, whose chief occupation was the attending to stock. In some localities a considerable quantity of mussel mud, a fertilizer used on many farms in the province, was secured.

Fishing.—Smelt and eel fishing was carried on with a fair degree of vigour, and all along the coast lobstermen have begun to get their traps and other gear ready for the opening up in the spring of one of the most important industries of the Island.

Railroad construction and employment.—The surveying of a branch line from Montagne Bridge to Murray Harbour went on during the month.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters and joiners were fairly busy at indoor work. Plumbers were satisfactorily employed. Steam-fitters were busy.

Metal, engineering and shipbuilding trades.—Iron moulders, ironworkers, linemen and blacksmiths were busily employed.

Woodworking and furnishing trades.—Car builders and coopers were actively employed.

Printing and allied trades.—Printers and bookbinders were busy.

Clothing trades.—Journeyman tailors, boot and shoe workers were fairly busy.

Food and tobacco preparation.—Bakers and confectioners, and tobacco workers were all satisfactorily employed.

Leather trades.—Tanners and saddlers had steady employment.

Transport.—Railroad conductors, locomotive engineers, firemen and telegraphers were busy. Freight-handlers were only fairly busy.

Unskilled labour.—This kind of labour found employment scarce.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February has been an excellent month in the labour market, nearly every branch of industry being employed, with the exception of masons and bricklayers. The new buildings for the Maritime Nail Works, intended as screw works, are now completed, but will not be occupied for manufacturing purposes for six or eight weeks on account of the delay in receiving machinery. The building outlook for the coming summer is exceedingly bright, as nearly \$1,000,000 will be spent in building new properties and remodelling old ones. It is expected that a new industry for the manufacture of hydrated lime by the Ellis automatic process will soon be established. The Portland rolling mills were closed down the last week in February on account of the shortage in the supply of scrap-iron, but will resume operation on March 1. During the four weeks ending February 26, the city chamberlain paid out for the streets, water and sewerage departments \$7,256.66, \$3,-

906.60 being for the removal of snow. During the month heavy snow storms blocked the various railways throughout the province, which had a bad effect on business. Bank clearings during the four weeks ending February 25 were \$3,369,477, and for the corresponding period last year, \$3,435,123, being \$181,813 less than January of the current year, and \$65,652 less than the same period last year. Flour has advanced 50 cents per barrel within the last six weeks. Manitoba flour formerly sold at \$5.75 per barrel, and is now quoted at \$6.25, while Ontario flour sells at \$5.75. Oatmeal has advanced \$1 per barrel, the previous price being \$4. A movement is on foot among some of the retail grocers to advance the price of oil. The price was 24 to 25 cents per gallon, but now it is selling at 26 cents, and in some instances 30 cents is asked. During the first of the month it was feared that the York and Cornwall Cotton Mills would have to close down on account of a shortage of raw cotton, but a few days afterwards, a drop in the price of cotton having taken place, the manager was able to purchase a supply in New York to keep the mills running, and they have since been working overtime to supply orders. The Bell Telephone Company having decided to raise the price of telephones some time ago, an agitation was gotten up, with the result that the city council resolved to install a plant, provided that one thousand subscribers could be secured. This has been accomplished, and it now remains with the city council to proceed with the work. On the last trip of the steamer *Concordia* to Glasgow, its cargo was valued at \$172,160; that of the *Manchester Commerce*, for Manchester, at \$171,985, and that of the *Lake Champlain* at \$310,585.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Herring has been very plentiful in the Bay of Fundy this winter, several schooners having loaded from 45,000 to 92,000. The fish had been selling at 50 cents per hundred; the price dropped to 20

cents. There is a scarcity of fresh fish for the local market, and some dealers have difficulty in supplying their customers.

Lumbering.—The St. John River Log Driving Co. will apply at the coming session of the local legislature for the passing of an Act to continue operations for ten years, and for an amendment to Acts relating to the company, to enable it to assess and expend money in improvements of driving facilities on the St. John and Aroostook rivers, and to provide for the better protection for the driving of logs.

Railroad construction.—Application is to be made for the incorporation of a company for the construction and operation of a railway to extend from Hampton to St. John, and St. John to Georgetown. The opening of the Moncton and Buctouche railway is indefinitely postponed, on account of an accident to the snow-plough.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are experiencing dull conditions. Carpenters and joiners are fairly well employed. Painters and decorators report work very good. Plumbers and gas and steam-fitters are very busy. Stonecutters and builders' labourers find work dull.

Metal, engineering and shipbuilding trades.—Iron moulders, helpers, machinists, engineers, electrical workers and linemen are busily employed. Brass workers and stove-mounters have had a good month's work. Blacksmiths and boiler-makers are fairly well employed. Sheet metal workers are busy. Horseshoers are only fairly busy.

Woodworking and furnishing trades.—Woodworkers find business good. Shingle weavers are indifferently employed.

Printing and allied trades.—Printers and pressmen report trade good. Bookbinders are busy.

Clothing trades.—Journeyman tailors are only fairly well employed.

Food and tobacco preparation.—Bakers and confectioners find business satisfactory. Ice cutters and drivers are very busy. Cigarmakers are fairly employed.

Miscellaneous.—Broom-makers and brush-makers find trade conditions improving.

Transport.—Railroad conductors, locomotive engineers, firemen, railroad telegraphers, trainmen, switchmen and trackmen are very busy. Freight-handlers, ship labourers and longshoremen, street railway employees and teamsters are all busy.

Unskilled labour.—This kind of labour is satisfactorily employed.

DISTRICT NOTES.

Chatham.—The Maritime Sulphite Fibre Company's property was sold on February 25 to the Bank of Montreal, which held prior mortgages and secured bonds amounting to about \$500,000. American capitalists are negotiating for the purchase of the property, and it is thought that the mill will resume operations at an early date.

Fredericton.—A patent has been granted at Ottawa to George Ferguson for a shoe-lace fastener. Mr. James A. Patterson, of Grand Falls, has leased Robinson's lumber mill, situated four miles below this city, and will refit and equip it for operation next season.

Moncton.—A delegation of I.C.R. machinists from different parts of the road interviewed General Manager Pottinger, in reference to an increase of pay, and a schedule was submitted to him for consideration.

Nappan.—The stockholders of the creamery company held their annual meeting on February 23, and the reports submitted showed marked progress. During the year, 337,000 pounds of milk had been received, and 16,000 pounds of butter made, and the farmers had been paid in the vicinity of \$2,000 for milk.

Newcastle.—A company has been formed for the purpose of establishing a furniture

factory. The town undertakes to loan the company \$20,000, without interest, payable in twenty years. The company binds itself to build a factory costing not less than \$25,000, to be practically free from taxation.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and Ed. Little, Correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has shown little change from January, both with regard to weather and employment; the severe cold continuing until the 20th of the month, after which fine weather ensued.

A feature of the month was the renewing of rents which still show an upward tendency with few houses offering. A number of new houses will be erected during the coming summer to meet this scarcity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming has been very dull, in spite of the exceptionally high price of butter and eggs, the former reaching 22 cents per pound and the latter fifty cents per dozen. The markets, however, have been poorly attended by farmers. The rain on the 22nd afforded great relief throughout the district, which has suffered for several weeks from the lowness of the water in the wells and streams.

Lumbering.—Operations have been very active during the month with weather conditions favourable, the snow fall not having reached the exceptional depth reported in other localities. The cut will be a good one in spite of the scarcity of men the shanties experienced throughout the season.

CONDITIONS OF PARTICULAR TRADES.

Building trades.—A dull month was reported, though with the opening of spring a busy season is anticipated. Plumbers have been very busy as a result of the severe weather.

Local architects are busy providing plans for new buildings and for additions to old ones. The list of important structures to be undertaken has reached an exceptionally high number.

Metal, engineering and shipbuilding trades.—All branches have been active with the exception of the iron shipbuilders.

Printing and allied trades.—Dullness has prevailed with from fifteen to twenty men out of employment since the re-arrangement of the wages scale. The trouble between the employers and the men has continued during February, a pressman having been subpoenaed before the Recorder's Court for leaving his work without giving due notice as provided by the Masters and Servants Act. Another master printer also charged three men with intimidation and inciting two young men to leave his employ. Both cases were called on the 22nd inst., but by mutual consent were adjourned until the 26th inst. The *Bulletin du Travail* of the National Trades and Labour Congress has suspended publication for the present.

Clothing trades.—Boot and shoe workers report a good month with three or four of the factories working overtime, and with the others working steadily. Tanners and curriers also had a good month.

Food and tobacco preparation.—Ice cutters had a busy month. City bakers increased the price of bread two cents per loaf on February 15.

Transport.—Locomotive engineers and firemen have been very busy owing to the number of double headers required on the railways. Freight deliveries, however, were light.

Unskilled labour.—Snow shovelling has given employment to large numbers of men, the snow fall having been unusually heavy.

SHERBROOKE, QUE., AND DISTRICT

Mr. H. Logie, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been in fairly good demand, considering the season of the year, and there are very few idle workpeople. Unskilled labour, which is the first to suffer during the winter months, has been in good demand. In fact, the waterworks department has found it difficult sometimes to get a sufficient number of men to execute pressing work. The railway companies have given employment to large numbers, and lumbermen are always ready to give employment. All classes of industry have been fairly well employed during the month, although there is perhaps not the same number of rush orders as in the previous month. The machine shops are getting back to their normal condition again, one of the large shops having taken off its night shift, but the Jenckes Machine Co. has still its night shift on. Retail merchants have had a comparatively quiet month, due in a great measure to the extremely cold weather which has prevailed during the past two months. There has not been such a continued spell of cold weather in many years. While this district has escaped the severe snowstorms experienced in the west, the merchants who have goods in transit from points west of Montreal are now beginning to feel the effects of the freight tie-up, as goods ordered weeks ago have not yet come to hand. Coal dealers have been caught short, as there have been no deliveries for some weeks, and they have found it necessary to cut the orders so as to keep the people supplied until the blockade has been removed. There has been no unrest among employees during the month. The striking weavers at the Paton mill have all returned to work.

In a few days the citizens of Sherbrooke will be given an opportunity to vote on a by-law to raise \$233,000 towards the purchase of the electric light and gas plants belonging to the Sherbrooke Heat, Power and Light Co. The question of the municipalization of lighting system has engaged the attention of the city council for

over a year, and has been the source of much lively discussion. The municipal ownership party in the council, recognizing the great success which followed the taking over of the waterworks from the same company, and the benefits the citizens derived from lower rates and increased fire protection, began an agitation for a municipal light plant, with the object of giving the people cheaper light than was given by the company. The company was approached to fix a price on its plant, but it replied that the lowest figure it would take was \$270,000, and this would include the gas works. The city made several offers, beginning at \$150,000, and rising to \$200,000, for the electric light plant alone, but the company refused the offers. The city then had an estimate of the cost of installing a plant at Westbury, 17 miles distant, where it owned a power, and the transmission of the same to Sherbrooke. The city went so far as to award the contract for a dam, when the party opposed to municipal ownership, headed by the then mayor, took out injunction proceedings to restrain the city from proceeding with the work. In the meantime negotiations were re-opened with the company, the injunction proceedings having been suspended by the court until the result of the newly opened negotiations was made known. After various meetings the shareholders of the Sherbrooke Light, Heat and Power Co. decided to accept \$233,000 for the electric light and gas plants. At a meeting of the city council on February 16 it was decided to give that amount for the company's plants and water power, subject, of course, to the approval of the ratepayers, who will vote on the question in a few days. Municipal ownership has been a great success so far as the waterworks are concerned. Among the advantages which the citizens have realized by the change are a reduction of 33 per cent in the rates, double the fire protection, both as regards water mains and hydrants, and a profit of \$45,000 in six years has been shown. The result of the vote on the electric question is awaited with much interest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is little doing in agricultural work just now, and farmers who have wood lots are busy hauling lumber and cordwood to the city.

Lumbering.—Lumbermen are very busy getting out the season's cut to the railway and central points for shipment.

Manufacturing.—The manufacturing industry is well employed. The Paton mill is running full time, and there are plenty of orders ahead. The factories on the Magog river, which had to run a portion of their plant during the night owing to the low state of the water in the Magog, are now running during the day, the difficulty having been overcome by the introduction of auxiliary steam plants. The glove factory belonging to Messrs. Ayer & Sons, which recently moved from Moe's River to Lennoxville, is now in full running order, and additional hands have been taken on. The Union Screen Co., located in Lennoxville, has also been adding to its plant during the month. The Jenckes Machine Co. is very much rushed just now with a large contract for the Niagara Power Co., and a night gang has been running for some time. The contract is in the neighbourhood of about \$300,000, and all the work is done here in connection with it, except the flume work, which is done at a temporary shop at Niagara.

Mining.—Most of the mines are still closed down. A Sherbrooke company expects to have its new works at East Broughton in operation by April 1, for the production of asbestos.

CONDITION OF PARTICULAR TRADES.

Building trades.—Plumbers have been kept very busy during the past month, owing to the severe frost doing damage to water pipes, &c.

Metal, engineering and shipbuilding trades.—All engaged in these trades have been well employed during the month.

Woodworking and furnishing trades.—The woodworking trades have been quieter

than for some time, but no suspension of employees has taken place. Carriage and wagon makers report business as being good.

Printing and allied trades.—The printing trade has been well employed during the month.

Clothing trades.—Clothing trades are busy and retail merchants report business good. An establishment for the manufacture of clothing has been opened in the city with about 15 hands.

Food and tobacco preparation.—Bakers and confectioners had a good month. The icemen report the yield this year far in excess of any previous year, and the harvest has already been stored. Cigarmakers say trade has been exceptionally good during the month.

Unskilled labour.—This kind of labour has been in good demand, and no one need be idle.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change to note in labour conditions in this locality since last month. Business has been quiet, and money scarce, owing to the heavy snow storms during the month. The building trade is very quiet. A few carpenters find employment working inside, but the majority have but little to do at present. The prospect for the spring and summer, however, is fairly good, as the architects have a number of orders for plans to be ready as soon as the spring opens. A busy season is, therefore, anticipated in this trade. In the foundry and machine shops business is fairly good, and the men are working full time. Woodworking factories are running steadily, giving employment to a number of men and boys. The contract for the improvements of the cathedral of Three Rivers has been given to Mr. Gosselin, of Lévis, Que.;

the amount is seventy thousand dollars. Work commenced on February 1, and will terminate about the end of December, 1904. The municipal corporation of Three Rivers has called for tenders for the building of a bridge between Baptist and Caron Islands, to cost in the vicinity of \$3,000 or \$4,000.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons expect work before long; the weather has been so severe that it was impossible to carry on business out of doors. Painters and decorators are expecting a busy season; their work generally starts about March 15. Stone cutters, the few employed in this city, have work at present, but there is no unusual activity in their line.

Metal, engineering and shipbuilding trades.—Plumbers, gas and steamfitters were well employed during the month. Moulders say that business in their line is good enough, with prospects of continuing so. Electrical workers find business dull. Blacksmiths are satisfactorily employed. Horseshoers find trade quiet.

Woodworking and furnishing trades.—All employed at these trades are actively employed.

Printing and allied trades.—In the printing trades business is very good, and all hands are getting a good share of work. Photo engravers are well employed.

Clothing trades.—Journeymen tailors find business dull. The boot and shoe factory has done a very good business during the present month.

Food and tobacco preparation.—A large number of teams were employed in hauling ice from the rivers. Cigar makers report trade stationary, business on the whole has been good.

Leather trades.—Tanners and curriers are doing well.

Miscellaneous.—Laundry workers, &c., report not having much work.

Transport.—A large number of teams were employed on the streets removing the snow.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoléon Samson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Very little change has taken place in the labour market in this city since last month. Conditions on the whole might be said to be less favourable owing to the stoppage of building operations. Contractors hope, nevertheless, to begin operations in the opening days of March. For this reason craftsmen in the building trades are generally idle. Labour generally, however, with the exception of those who have their slack season in winter, has been fairly well employed, those whose employment is precarious having benefited by the snowfall, which has been abundant during January and February. Business is reported as comparatively active, and the month of February has been a very expensive one for householders on account of the enhanced price of fuel, coal selling at \$7.50 per ton for cash and \$7.70 on credit.

There has been a change in wages among the cutters of the Penman Manufacturing Company. They were formerly paid by the piece and made wages varying from \$9 to \$11 per week. They were placed at a fixed salary of \$9 and the company, seeing that work was slack, kept on six of these workmen, promising the others that as soon as work presented itself they would receive employment. With the Penman Manufacturing Company business has been very dull for a couple of months and a number of the hands employed by the company are idle. Relations between employers and employees during the month have been friendly.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have not had a favourable month. The cold weather and the roads, having been rendered impassable

owing to the heavy fall of snow and the high winds, have made it impossible for them to come to town with their cord-wood, which would have found a ready market at remunerative prices.

Manufacturing.—The majority of local industries have done a good business. Among the other industries of the city must be mentioned the new one which commenced operations in the second week of January, 'The St. Hyacinthe Distillery, Packing and Vinegar Company,' which is very active, though it has only been opened a few weeks. The making of alcohol is continuous, about 500 gallons being turned out daily. As this product cannot be offered in the market for sale until after the expiry of two years it has to be warehoused, and for this purpose there are 24 reservoirs or vats holding 12,000 gallons, which will be complete at the end of the two years required by law.

Among the new buildings to be commenced in the spring is the drill hall, work on which, it is said, will be pushed actively. The Girouard Academy burnt last May will be rebuilt and is expected to be finished by the month of September. It is said that the building of the dairy school will be begun in the spring. Several fine private residences are also promised for the spring. The organization of the Ames-Holden factory is almost completed and a number of workmen will soon find employment therein.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have not much work; carpenters and joiners have had some work to do, those working in the factories having steady work. Plumbers and steam fitters have had a very busy month.

Metal and engineering trades.—Moulders, machinists and helpers have been very well occupied, work being plentiful. Blacksmiths have had sufficient to do.

Woodworking and furnishing trades.—In these trades work has been abundant enough.

Printing and allied trades.—The offices have all been busy and prospects are very bright.

Clothing trades.—The shops in the clothing trades are working steadily and everything indicates good business in the spring, and the same is applicable to the boot and shoe workers.

Food and tobacco preparation.—Bakers are very busy. Icemen report the ice harvest all gathered. Cigarmakers state that work has slackened during the month.

Leather trades.—Tanners and curriers have as usual steady employment. During the winter, work is principally on fancy leather.

Transport.—All railway employees are extremely busy and will continue so until the spring. Carters and hackmen have been very well employed, especially during the past two weeks.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The beginning of the month of February having been extremely cold, building operations were almost at a standstill, but towards the end of the month they were more active. Owing to the abundant snow fall and the continued cold weather, coal which was formerly sold for \$7.50 per ton is now selling at \$8 with stove coal very scarce and chestnut getting scarcer. Ice merchants state that on account of the heavy snow fall the saving of their ice crop costs them more than in preceding years and it is probable that this will increase the price of ice next summer. Owners have increased rentals for lodgings that formerly cost from \$7 to \$8 per month, to \$8 and \$9. In spite of this houses are very scarce. Montreal has not a sufficient number of working people's houses, as this class is increasing very rapidly. This would indicate a busy summer in building operations. During the month of February two strikes took place, one at Shapiro & Bros., clothing man-

ufacturers, commenced the 9th, terminated on the 15th, both parties having made concessions; and the other at Mr. Leclerc junior's who wished to shorten the working hours and pay according to the time put in. There are 120 carters and about 50 snow shovellers idle owing to the street and road commission not having voted sufficient funds. The terminal railway complained that on account of the cold, the snow shovellers refused to work, which is the reason that its system is more hindered with snow than it would otherwise have been. Business generally has not been very active owing to the bad roads. Everything points to activity being very prevalent in the beginning of March.

At a meeting of the master bakers of Montreal, held on February 20, it was decided to increase the price of the large loaf of bread by two cents.

In the year ended December 31, 1903, there were 1,152 fire alarms in Montreal, and the report of the board of assessors shows that while the assessment of the city in 1893 was \$165,020,135, in 1903 it was \$201,044,670, or an increase in 10 years of 22 per cent. A new scale of wages and hours of employment has been prepared for carpenters, joiners and woodworkers.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are fairly busy. Carpenters, joiners, lathers, plasterers, painters, gas and steam fitters, stonecutters and builders' labourers have sufficient work.

Metal and engineering trades.—Electrical workers are busy. Linemen are quiet. Blacksmiths and boiler makers, as well as tool sharpeners, horseshoers, and jewellers have had plenty to do.

Woodworking and furnishing trades.—Upholsterers are busy and wood carvers, carriage and wagon makers, car builders and pattern makers are active.

Printing and allied trades.—These trades report active conditions.

L'Unioniste is the name of a four-paged weekly paper to be issued under the auspices of the Trades and Labour Council of Montreal in the interest of labour. The first issue is to appear, according to present plans, on April 7. At first it will be in the French language. The subscription price is to be one dollar a year, in advance. These details were decided upon at a largely attended special meeting of the Trades and Labour Council.

Clothing trades.—Journeymen tailors and boot and shoe workers are busy.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters report very favourable conditions. Ice cutters and drivers are very busy. Cigarmakers and tobacco workers have sufficient work.

The leather trades have plenty of work.

Miscellaneous.—Barbers are very busy. Furriers report a good month. Hotel, restaurant, theatre employees and laundry workers are fully occupied.

Transport.—Street railway employees, cab drivers, hackmen, &c., have enough to do.

Unskilled labour.—This class is in fair demand.

HULL, QUEBEC, AND DISTRICT.

Mr. Rodolphe Laferrière, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was somewhat more active last month than the corresponding month last year. The trades generally are idle on account of the usual winter lull, and common labour is plentiful enough. Common labourers refuse to work at less than 15 cents per hour, and quit at five o'clock. In spite of the exceptionally severe winter, the working population is not any worse off than in previous winters. There is also no more destitution in Hull this winter than last, nor any greater number of idle labourers. The severity of the weather might have been detrimental to

some in the woods, but was a boon to the workmen in the cities.

Concerning the Eddy dispute, of which little has been published in the press during the month, the mills are running to full capacity, and very few of the old hands are working. The sulphide works, which were partially stopped for a time owing to the overstocking of chemical pulp for paper-making, are also in full operation, employing some 190 men. Negotiations were opened between the idle papermakers and Mr. Eddy, but did not have any result. Some of the men have left the city, looking for work elsewhere, and will be joined by their families. The union, however, is still in existence. The Eddy shops have a direct effect on the condition of the people. Thus, the starting of the Eddy factories had a great influence on the labour market in this city. Grocery stores, dry goods stores and banks are doing a good business.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Lumbering was affected to a certain extent by cold weather, but especially by snow. The latter partly paralyzed shantying operations, particularly the teaming branch engaged in drawing the logs to the shore, where they are piled up on rollways. Horses cannot very well haul in deep snow, and consequently that part of the work is affected. It will also indirectly affect the drive or floating of the logs. Shantymen are coming down, but the bulk still remain in the bush. This deficiency is made up for by the larger production of cord-wood to meet the larger demands from the cities.

Manufacturing.—Manufacturing is booming. The Eddy factories, the handle factory, the pork-packing factory, the axe factory, the woollen factory, &c., are in full operation. The International Portland Cement Co., of Hull, laid off another 100 men in February. They were, for the most part, employed in the building trades. This was partly due to the depth of the snow. It was not thought advisable to keep squads of labourers shovelling snow

day after day to clear a spot for builders. The ironworkers will be employed in the interval, but owing to the scarcity of iron, work has not started yet. It will, however, start as soon as the iron arrives. The squad of builders will resume work later on.

CONDITION OF PARTICULAR TRADES.

The trades are generally stagnant.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

With the exception of a large amount of snow-cleaning there was very little out of the ordinary in the way of work in Ottawa during February, the general tendency being to dullness. Not far short of \$30,000 were spent for snow-cleaning, exclusive of the work of the steam railways, and this money went far towards relieving the distress caused by the rigours of the unusually severe winter. Up to Saturday, February 20, the city of Ottawa spent \$10,820 for snow cleaning for the winter; being over \$800 in excess of the total amount paid last year. It will likely take two or three thousand dollars more to complete the work for the balance of the season. The city employed one hundred and sixty-six men and thirty teams. The Ottawa Electric Railway Company has spent about \$16,000 for men cleaning the snow from its tracks to date, and it will require considerable extra expenditure to remove the snow now lying on streets traversed by the tracks. A considerable amount was also spent by private individuals and business concerns, and the steam railways gave a lot of extra employment, owing to the especially hard battle with the snow. Notwithstanding the expenditure of these moneys there was a large number of unemployed, and the register of the city relief officer showed over 800 applicants for assistance. Varied reports were received as to the total of the season's cut on the timber limits, some sections reported a decrease of from ten to fifteen per cent, others that the output would be up to the average. The industries in the Chaudière

district dependent on water power experienced considerable difficulty with frozen or anchor ice, a difficulty experienced by the abnormal thickness of the ice. Booth's saw mill was closed down part of the time as a consequence, the electric light service, and the electric street railway were greatly hampered. There was very little movement of farm produce, owing to the depth of snow and the impassable condition of many of the roads.

CONDITION OF PARTICULAR TRADES.

Building trades.—All engaged in these trades were practically at a standstill.

Metal, engineering and shipbuilding trades.—The iron trades were busy. The work of repairing machinery, for the saw mills, &c., in preparation for the spring work, causing an unusual rush, and giving a lot of work. There were a few unemployed in the moulders, coremakers and machinists' trades.

Woodworking and furnishing trades.—The woodworking trades were exceptionally dull. The sash and door factories reported a very poor month. One of the leading employers reported an unusually large number of applicants for work.

Printing and allied trades.—All engaged in the printing trades were well employed.

Clothing trades.—The clothing trades are experiencing a slack period, which is usual during February.

Miscellaneous.—Hotel and restaurants felt severely the effects of the snow blockades on the railways, the volume of travel being reduced.

Transportation.—Railway employees were constantly employed, the heavy storms requiring an extra force to operate the roads.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. Macdiarmid, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month of February has been very

dull, especially in the building trades, the extreme and continued cold weather practically prohibiting any building operations. The great amount of snow which fell during the month has given a great deal of work to those who would not otherwise have been employed. A large number of men have been almost continuously employed in cleaning the railroad tracks running through the city, as well as in the yards. Owing to the severe snow blockades on the railroads the transportation conditions have been greatly disarranged, causing hardships and inconvenience to many business houses, especially the coal and wood dealers, but with a few recent arrivals it is thought that the dealers will be able to tide the season over with what supply they now have. There has been no trouble of any kind in the way of labour troubles during the month.

The Board of Trade has decided to send delegates to the Royal Transportation Commission, which meets in Peterboro early in March, to discuss affairs in connection with the Trent Valley Canal, especially in the development of water power along the route.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The bad condition of the roads has made it almost impossible for the farmers to bring heavy loads into the city; consequently those who do bring in wood, hay and produce receive very high prices. Wood sells readily at \$6.50 to \$7 per cord. Oats are in great demand at 31 and 32 cents per bushel.

Manufacturing.—A new shirt factory has just been erected in this city by Mr. W. B. Deacon, and is a very substantial two story brick, 35 x 90 feet. About 25 hands are now employed, but more will be put on later. Electricity is the motive power. The plant is capable of turning out a vast quantity of goods, but has not yet been taxed to its full extent.

Mining.—Great preparations are being made for a busy mining season as soon as the weather permits. Work at the Sovereign

Gold Mine is progressing favourably. The company has now over 4,000 tons of high grade ore on the dump ready for the mill, which it is intended to start on the first of April. There is a ten stamp mill on the property, and about twenty men are at present at work sinking and cross-cutting, and getting ready to take the ore out on a large scale. There is also a very bright outlook for mining in the Belmont district in this county. An American syndicate will erect large reduction works near Marmora shortly. The ore is a rich free-milling gold rock.

CONDITION OF PARTICULAR TRADES.

Building trades.—Plumbers, gas and steam-fitters have had a very busy month, the cold weather making it almost impossible for them to keep up with their orders.

Metal, engineering and shipbuilding trades.—Moulders have had a good month, and are busy as well as the iron workers and helpers. There is no extra demand for machinists or engineers, although there are no idle men in these departments. Electrical workers are kept as well employed as the linemen. Blacksmiths report a good month.

Woodworking and furnishing trades.—The woodworkers have all been busy and report business brisk. The St. Charles Omnibus Company shipped during the month a large number of passenger busses to the North-west.

Printing and allied trades.—The printing business is good, and no idle members of the craft are reported. Bookbinders also enjoyed a good month.

Clothing trades.—Journeymen tailors report a dull month.

Food and tobacco preparation.—There is only one cigar factory here, but quite a number of hands are employed, and they have all been busy.

Miscellaneous.—Barbers report a good month. Hotel and restaurant employees are kept busy, as were also the employees of the

laundries. The theatrical season has been rather quiet.

Transport.—Owing to the snow blockade there has been a lull in railroad transportation. Several of the branch lines running into the city were blocked for several days during the month, consequently the cab-drivers and hackmen had a duller month than usual. Locomotive engineers and firemen had a busy month, many of them being engaged on snow-ploughs endeavouring to keep the roads open.

Unskilled labour.—There has been practically little doing in regard to employment of this kind of labour, outside of snow shovelling and getting in the season's ice supply, which will not be concluded this month.

DISTRICT NOTES.

On Saturday, February 20, fire was discovered in the large new cold storage warehouse of the Apple and Produce Cold Storage and Forwarding Company, Limited, of Trenton, of which Mr. Edwin James, is manager. The entire contents, together with all the valuable machinery, were destroyed. The building contained about thirty thousand barrels of apples. It was one of the largest and finest cold storage warehouses in Canada.

KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was employed as well as is usual during the month of February. The demand was quite equal to that of January, and the corresponding period last year. Every indication points to much activity during the coming season. The report of the Commissioner of Public Works for Ontario, 1903, contains the report of the Chief Architect regarding Kingston activities under that department, which reads as follows:—

The work on the cottage on the convalescents and nurses home, at Rockwood Asylum, for the insane, with the exception of the slating and gal-

vanized iron work, the heating and plumbing and electric wiring, has been done by men employed by the department under a foreman, the materials being purchased by tender. The building is completed, with the exception of the finishing of the interior wood-work, which will be done by asylum labour. Hot water and plumbing plants have been put in. The building has been wired for electric lights. The slating and galvanized iron work having been tendered for, was awarded to and done by a local firm. The lowest was accepted in every case. The lavatory of the north cottage, (a building erected over sixty years ago) which had become decayed and in danger of falling, has been pulled down and rebuilt by men employed by the department, the contract for plumbing being executed by a local firm. The painting of the outside wood-work of the main building was also done by a local man under contract. The contract for the 100 horse-power boiler was given to a local foundry, which was unable to procure materials to finish the boiler in time to have it placed in position before the cold weather set in. The old boiler has been put in condition and reported fit for another season's work, so that the institution did not suffer from the delay. The new boiler will be placed in position as soon as the steam-heating is shut down.

The cottage for tuberculosis patients have been enlarged and repaired, and the roof of the main boiler house has been also repaired and recovered with galvanized iron, the work being done under contract by a local man. Thorough repairs have been made to the building generally.

The Kingston Locomotive Company on the 26th instant closed contracts for the construction of 35 locomotives. Of this number 25 are for the government road and 10 for the Canadian Pacific Railway Company. This will keep conditions busy for a considerable length of time.

Circulars have been issued descriptive of the line of electric road to be built between Kingston and Toronto, and, later, to be extended to Ottawa, and possibly Montreal. This road is to be built under the charter issued by the Ontario legislature in 1902, and, besides the transportation of passengers, will carry freight and express. The projectors of the enterprise desire that the municipalities through which the road will pass shall show their belief in the undertaking, not by granting a subsidy to the company, as is generally done, but by purchasing the securities of the road, upon which they are promised a good return for their investments, in addition to the benefits to be derived by municipalities and population through having such a line in operation. The advantages of the road are pointed to as being many, the chief of

which are said to be frequent service and cheap transportation both for passengers, freight and express. The pamphlet gives a table of proposed fares to be charged, which are very much lower than the present tariff. It is proposed, whenever practicable, to establish parks and places of amusement, which should be a great attraction to the inhabitants along the line, besides largely increasing the business of the company. The projectors have taken offices in the Ontario Chambers, Kingston, and have begun an active canvass of the territory. If the general interests warrants the actual construction of the proposed road, it will be commenced as soon as the frost is out of the ground, and will afford much employment to various kinds of skilled and unskilled labour.

The annual meeting of the Kingston and Pembroke Railway Company occurred during the month. Reports submitted showed the road and the company's interests to be in good condition. The former directors were re-appointed. It was decided to proceed with a number of repairs and improvements to this road as soon as the snow clears away and the frost leaves the ground.

The management of the Bay of Quinté Railway Company is negotiating to secure the Marconi system of wireless telegraphy for its line. The object in view is to obviate the entanglements and difficulties of the present system of imperfect insulation, wires, and other adversities attendant on the wire circuit. This is the first effort along these lines in this district. Two giant mogul locomotives built at the local works for the Temiscaming and Northern Railway some time ago, and which have been since stored in the Kingston and Pembroke Railway Company's car works, have been leased by the Grand Trunk Railway Company. They will be placed in commission at once.

The Kingston and Pembroke Railway Company paid the Ontario government last year \$525 on the tax of \$5 per mile; the

Bay of Quinté Railway Company paid \$356; the Gananoque branch \$31; Brockville and Westport \$225; Kingston Street Railway Company \$120; Kingston Light, Heat and Power Company \$120.

In the estimates recently handed down by the Ontario government, the sum of \$7,500 is provided for the improvement and maintenance of the Kingston Dairy School. Of this sum \$2,200 will go to improvements.

A citizen, having leased the water-power privileges at Kingston mills from the Kingston Street Railway Company, is proceeding to install a large electric light plant there. The wheel pit will be deepened so has to give a greater power. At present there is a water-fall of 37 feet. This will be increased to 52 feet, which will give about double the present power. If an entrance to the city can be secured, several industries will be supplied with power from this source, as well as running a flour mill owned by the gentleman in control.

The sisters of the Hotel Dieu having decided to convert a portion of the old Hotel Dieu building, on Brock street, into three-dwelling houses, and a handsome hall for a local society, an architect has prepared plans and awarded the contracts for the various branches of works in this connection.

During the month the nurses' dining-room at the General Hospital was completed in its appointments and opened for use. It is expected that the nurses' residence being built at the hospital will be ready for occupation at Easter, the final stages of the work having been about reached. There will be accommodation for 30 nurses.

During the month the members of the waterworks committee of the city council visited the pumping station for the purpose of inspecting the plant; while there they selected a site for a new coal shed in connection with the station. The city hall has recently been fitted with new lights, modern in every respect, replacing the

ancient gas fixtures, which did duty for half a century.

A local wrecking company had a force of men most of the month working at the Royal Military College laying a new intake pipe to supply that institution with pure water. The work of constructing and laying the pipe was awarded to local concerns. The pipe, which is 350 feet long, is composed of wrought-iron, in sections 20 feet in length. Leakage caused considerable delay in the work of laying the pipe. Before this was done the air-test demonstrated much leakage. The contractors were notified, and they sent over men and had the pipes disconnected, and tested length by length by hydraulic pressure. To correct the imperfection, make the necessary test and finally lay the pipe will take the time of a number of workmen for a considerable period.

In view of the decision of the Privy Council *re* the Kingston Light, Heat and Power Company *vs.* the Corporation of the City of Kingston, a by-law providing for the taking over by the city of the plant in question has been prepared, and will be submitted for the consideration of the qualified electors on March 21. The property owners' association and the citizens generally are evincing much interest in the issue, will man the polls on the day of voting, and are prosecuting a vigorous campaign in the meantime.

At the close of the month the street railway tie-up still continues. While the result has caused depression in some particulars, it has proven a great boon to owners of hacks, busses, and induced nearly every kind of conveyance to come into service.

The following table will show the change in the assessment of the city of Kingston caused by the new Assessment Act of the Ontario Legislature :—

| | Realty. | Per-sonalty. | Tax. |
|---------------------|---------|--------------|-------|
| | \$ | \$ | \$ |
| Retailers | 905,150 | 227,200 | 4,528 |
| Wholesalers | 119,500 | 162,600 | 3,252 |
| Manufacturers | 216,100 | 138,600 | 2,772 |
| Banks | 41,500 | | |
| Hotels, &c. | 201,800 | 17,750 | 355 |
| Theatres | 12,000 | | |
| Printers | 25,500 | 12,500 | 250 |
| Brewers | 9,000 | 3,000 | 60 |

| | Rate. | New Assessment. | Producing |
|---------------------|-------|-----------------|-----------|
| | p. c. | \$ | \$ |
| Retailers | 25 | 226,257 | 4,535 |
| Wholesalers | 75 | 89,625 | 836 |
| Manufacturers | 50 | 108,050 | 2,160 |
| Banks | 75 | 31,125 | 625 |
| Hotels, &c. | 50 | 100,900 | 2,020 |
| Theatres | 50 | 6,000 | 120 |
| Printers | 50 | 12,750 | 255 |
| Brewers | 75 | 6,750 | 125 |

The total makes an increased tax of \$2,000. Figures will be given later for insurance and loan offices and professional offices. The personal assessment collected in Kingston for 1903 was \$15,595.

The local branch of the Women's National Council is in correspondence and co-operation with the British Women's Emigration Association trying to meet the need of Canadian housekeepers for servants. A list is being arranged for transmission to the British Women's Emigration Association of those here who have sent in their name and needs in order that they may have some prospect of getting a party for Kingston, at as early a date as possible. Others wishing help are requested to apply to the local branch of the Women's National Council. The statement is made in the name of the council that 'out of 63 servants brought to Montreal last year, only one proved unsatisfactory. The prospective mistress sends to the committee her name, the special kind of help needed, and the wages she is willing to give. The mistress pays the fare of the seryant from Montreal to her place of residence, and also the cost of a night's lodging on her

arrival. This money is eventually refunded by the servant out of her wages.

The Dominion Transportation Commission will meet here early in March, to take evidence which the local board of trade desires to submit through prominent marine men in this district.

The Ontario government has offered the city a piece of land, five by ten miles, in the vicinity of Sharbot Lake, for the proposed military training camp.

At a conference held on February 13, between the various building contractors of the city and representatives of local union No. 66 of the International Hod-carriers of America, it was decided to grant an increase from \$1.50 to \$1.75 per day of nine hours, as demanded by communication some time ago. The increased demand which is said to have been caused by the increased cost of living, will apply to 50 or 60 men, and affect 10 or 12 contractors. It was agreed that the new scale should commence from January 1, 1904. Considerable work has been done in the meantime pending a decision. The local union of tinsmiths has asked the master tinsmiths to sign an agreement which provides that when union tinsmiths are working on a contract and a non-union-man is employed, no matter in what capacity he is put to work on on the building, the union tinsmiths will be justified in quitting the job and remaining away until such time as the non-unionist is withdrawn. Meanwhile the masters shall not be allowed to touch the unfinished job, not being allowed to put an apprentice to work, nor to handle it themselves. The masters consider the demand unfair, have refused to sign it, and submitted a modification, which the union men refuse to entertain.

A deputation of seven teachers, representing 700 superannuated teachers of the province, during the month were introduced to the Minister of Education by the member for Kingston. They presented a petition for increased annuity. Many of the

applicants are between 70 and 80 years old. The deputation was headed by a Kingstonian who is on the list.

Of the 33 new pupils admitted to the public school during the month, according to the inspector's report, 29 were recent arrivals in the city.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are already making preparations for spring work, most of the hauling of grain, hay, timber, &c., being completed. It is expected that the season will be retarded by the large bodies of snow and ice on the land.

Fishing.—The fishing industry is now more active than reported last month, although not a very extensive business here at its best.

Lumbering.—Considerable lumbering is now going on.

Manufacturing.—As will be noted from the summary of general conditions, manufacturing is very brisk in many lines.

Mining.—This industry is somewhat retarded by deep snow, but will soon be in full swing. Numerous inquiries are being made from England and other sources for felspar and other products of this district.

Railroad construction and employment.—Railroad construction, although hampered somewhat at present, promises to be exceptionally brisk before long.

Other industries.—There is a general movement of awakening along nearly every other line of industry here.

CONDITION OF PARTICULAR TRADES.

Building trades.—Many lines in the building trades, notably the lathers and plasterers, painters and decorators, plumbers, gas and steamfitters and builders' labourers are already largely employed, while the season's outlook for all lines is exceptionally bright.

Metal, engineering and shipbuilding trades.—In these trades all lines are fully employed. The Kingston Locomotive

Works, the Kingston foundry, and similar plants, are very busy, while over 100 men are busy in the Montreal Transportation Company's yards, building and repairing various kinds of craft. The Davis dry dock and the government dry dock are also the scenes of much activity.

Woodworking and furnishing trades.—Woodworkers and furnishers report much business on hand and in view.

Printing and allied trades.—Printers, bookbinders, &c., report business good.

Clothing trades.—The clothing trades have many lines marked away down and are doing a good business as a result. There is a scarcity of coatmakers in the city. Local tailors are advertising in outside papers in the hope of increasing the supply. Boot and shoe men report business good.

Food and tobacco preparation.—Butchers, bakers and cigarmakers report improved business, while ice-cutters and drivers are extremely busy.

Leather trades.—Tanners and curriers report increased trade.

Miscellaneous.—Barbers, broom-makers, clerks, delivery employees, furriers, hotel and restaurant employees, theatre employees, laundry workers, &c., report improved business for the month.

Transport.—Except street railway employees, who are idle, all lines of transport employees are nearly fully employed. Cab drivers, hackmen, liverymen, carters, draymen, teamsters, &c., are rushed.

DISTRICT NOTES.

The Dominion Cotton Mills Co., Ltd., is advertising in the district papers for good families to move to Kingston, offering steady work for fathers and all boys and girls over 14 years of age. The company offer from \$2.50 to \$3 per week for learners, while experienced help can earn from \$6 to \$11 per week.

An effort is being made at Gananoque to organize a stock company with a capi-

tal of \$30,000, in shares of \$100 each, to purchase the Tremont Park property for \$10,000, looking to its extension and improvement. Kingstonians are interested in the project.

The contract for building the new paper mill of the *Cornwall Manufacturing Company*, to be erected near the station, has been awarded. It is expected there will be but little delay in getting the building ready for the making of paper.

The *Smith's Falls* municipal council has sold \$55,884.77 worth of debentures at 95½ on the dollar. Tenders are being called for for the erection of a hospital. The building, which will be under the direction of St. Francis de Sales Church, is expected to be a model of modern convenience. The severe frost has almost caused a water famine here. The frost has reached some of the mains, and some parts of the town are cut off from the supply. The system is owned and operated by the town.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnston, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The working classes, with few exceptions, have been fairly well supplied with nearly all kinds of work. For the season of the year the demand for men, and the opportunities for employment are good. Three stores and the two top flats of the Cereal works, which were recently destroyed by fire, are being rapidly reconstructed. The carpentry trade is quite active just now, and builders' labourers fairly active. Railway transportation, which for a time was seriously hampered by snow blockades, is now somewhat relieved, and trains are running approximately to schedule time. There has been no change in the rates of wages or the hours of labour, nor any unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Wheat went up in price from 85 cents to \$1 per bushel, and flour to \$5 per barrel.

Manufacturing.—All branches of manufacturing keep busy. The Canadian General Electric works have received a large contract for two 2,500 horse-power engines, known as the Curtis steam engine, from the Toronto Electric Light Company. Turbine engines have never been used in Canada to any extent until now, and to Peterborough has come the opportunity of making the first large engines of this kind in Canada. The Canadian General Electric Company has Canadian patents for the above named engine, and when all its advantages have been demonstrated a large demand for this kind of engine is anticipated. The Peter Hamilton Manufacturing Company has recently issued a very comprehensive new catalogue. The J. J. Turner Company sail, tent and awning manufacturers, has an extra busy staff, the company doing a world-wide business. The Peterborough Lock Company will early in the spring build new up to date lock manufacturing works.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have experienced no change for the conditions that prevailed last month. Carpenters were nearly all employed during the month rebuilding the Cereal works, three stores and a photographer's studio, which were recently partly destroyed by fire. All the walls of these buildings were of brick, and will not need rebuilding. Painters are quite busy. Plumbers and steam-fitters are all fairly busy.

Metal, engineering and shipbuilding trades.—Iron moulders and iron workers' helpers in all shops are busy. Machinists and steam engineers are actively employed. Metal polishers, buffers, platers and brass workers employed by the Canadian General Electric Company and in the lock works are very busy. Linemen are very busy. Electrical workers employed in the power houses are busy. Blacksmiths are exper-

encing a dullness in their line of work at present. Boilermakers are fairly well employed. Bicycle workers are not busy, but prospects are encouraging. Jewellers report business good this month.

Woodworking and furnishing trades.—Woodworkers, upholsterers, pattern makers and coopers report having had a very brisk month.

Printing and allied trades.—Printers, pressmen and bookbinders are kept busy.

Clothing trades.—Journeyman tailors are fairly busy. Boot and shoe workers in nearly all shops find work slack just now.

Food and tobacco preparation.—Bakers and confectioners keep busy. Butchers are busily employed. Ice cutters are exceptionally active just now, getting the ice houses filled ready for summer retail trade. Cigar-makers are steadily employed; there is only one establishment located here.

Leather trades.—Leather workers are quite busy making harness and collars.

Miscellaneous.—Barbers are doing a good business; there are fifteen shops in Peterborough. The two broom shops are doing a satisfactory business. Delivery employees are busy. Furriers have done an exceptionally good business this month. Hotel and restaurant employees were fairly busy during the month. Laundry workers are busy.

Transport.—Railroad men have had an experience this month such as never before fighting snow and ice. Cab drivers and liveries have been somewhat busier than last month, when cold weather and snow fairly paralyzed their business. Carters, draymen and expressmen are doing a fairly good trade, just now.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions were very similar to those prevailing in January. The normal demand for labour continued good, but the unusual sev-

erity of the winter greatly interfered with the steadiness of employment in many lines. The freight blockade greatly interrupted business, and the enforced stagnation naturally re-acted upon many departments of production. All classes are looking forward confidently to an active season as soon as spring sets in. Unskilled labour was for some time in excess of the ordinary demands here, but the suffering which would otherwise have resulted has been considerably lessened by the large amount of extra work occasioned by the snowstorms.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing in most lines continues active with staffs fully employed, with the exception of some branches in which the interruptions to railway traffic have occasioned a temporary slackening of production. Manufacturers generally are looking forward to a continuance of prosperity.

Agriculture.—The farmers of this district are sending in many applications to the Provincial Colonization Department for an early supply of help. The growing of sugar beets last year for the sugar factory at Berlin proved such a successful venture that the acreage devoted to this crop during the coming season will be largely increased. Many of the farmers in the neighbourhood of Milliken and Markham have signed contracts on a considerably larger scale than before.

CONDITION OF PARTICULAR TRADES.

Building trades.—Trade has been very slack and a large number out of work. Owing to the severity of the cold, outside work has been impossible, except intermittently, and at this stage of the winter little indoor work remains to be done. The season is likely to open early as there is no probability of any serious difficulty between employers and the men. There is a general disposition to settle differences amicably, and negotiations

have resulted in a renewal of the agreements between the employers and the bricklayers and plasterers for the same scale of wages and hours as prevailed last year. The carpenters and builders' labourers are also endeavouring to effect a settlement. The supply of brick is rather short as, owing to the disturbance in the trade last year, less than the usual quantity was made, which may somewhat retard operations. Plumbers have been busy; steam and gas fitters are not so well employed.

Metal, engineering and shipbuilding trades.—Iron workers in most lines have been actively employed during the month. Machinists, blacksmiths and boilermakers are practically all at work. There is also abundant employment for sheet metal workers, but they have been laid off in many cases on account of the weather.

Woodworking and furnishing trades.—Cabinet makers, woodworking machinists, and piano makers have plenty of work. Coopers find work slack on account of the scarcity of material due to the snow blockades. Picture frame workers are generally busy, but a strike, involving upwards of 20 men employed by the Cobban Manufacturing Co., against a reduction of wages, which commenced on the 15th is still unsettled and may involve other branches.

Printing and allied trades.—The printers report trade good with comparatively few out of work. Bookbinders have abundance of work. The Bookbinders' Union is submitting a new wage scale to the employers, asking for an increased minimum wage and shorter hours.

Clothing trades.—Custom tailoring continues quiet. The scale of prices agreed upon last year between the tailors' union and the master tailors' section of the Retail Merchants' Association, has been renewed for another year. Garment workers find trade considerably duller than is usual at this season, and a number are idle. Boot and shoe workers are stead-

ily employed. Cap workers have had an average month.

Food and tobacco preparation.—Biscuit manufacturing, which has latterly been slack, is resuming activity, and confectionery is also picking up. Cigarmakers are busy. Packing houses have felt the effects of the weather severely, owing to the shortage in live hogs, and employment has been intermittent.

Leather trades.—The leather trades have had a fair month. The leather workers on horse-goods are pursuing an active campaign to strengthen their organization, which has had numerous accessions and now numbers about 200.

Miscellaneous.—The master barbers are agitating for early closing. They have asked the Provincial Government to amend the 'Shop Act' so as to empower municipalities to regulate the closing of barber shops, by extending the existing legislation so as to include them with the other classes regarding which they have power to legislate.

Transport.—Railway employees and all engaged in land transportation have been affected by the prevalence of snowstorms and the disturbance to traffic. Teamsters and others employed in the moving of freight have had a slack month. The Marine Firemen, Oilers and Water Tenders' Union is asking for a uniform wage scale of \$40 per month, the rate prevailing last year being from \$30 to \$40. Two steamship companies have conceded the demand.

DISTRICT NOTES.

Toronto Junction.—There is a prospect of a very active building season owing to the demand for houses, though the scarcity of brick may hurt operations until a new supply is forthcoming. Brick-makers will be very busy as soon as opportunity offers.

Lorne Park.—The Toronto and Mimico electrical railway is to be extended from its present terminus at Long Branch to

Lorne Park. The extension will be six miles long, giving a total length of eleven outside the city limits. It is hoped to have the work completed during the coming season.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

General labour and employment conditions remain very satisfactory. There have been no new features in this respect for many weeks. Men in certain lines of employment are losing considerable time on account of severe weather, but the loss is merely temporary, and of little importance. The brick and tile works and the Oneida Community's chain and trap shops are to be extended. Myers & Company, manufacturers of cattle food have moved to larger quarters and are extending their business. No trades show exceptional activity at present, though there is a demand for girls to work in the suspender and neckwear factories. Wholesale, retail and bank reports are all satisfactory and seem to indicate a very healthy condition of general business. There have been some changes in the wages of men employed by the Jenckes Machine Company. Riveters secured an increase of from \$2.50 to \$2.75 per day. New scales for piece and extra work were introduced which in most cases will reduce the earning power of the men. The above changes in wages were the cause of two small strikes, neither of which had much effect on the condition of the labour market. One result was the attraction of a number of structural iron-workers from other places. All who came were not successful in securing work here for a time.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This is a dull period in the agricultural industry. There is some fear that the severe cold has damaged the fruit orchards, particularly peaches.

Fishing.—Fishing along the shores of Lake Erie has been interfered with by the unusually cold season and the high price of bait.

Manufacturing.—Manufacturing concerns are all busy and most of them running to full capacity. Numerous extensions and improvements are planned for the spring.

Railroad construction and employment.—Railways employ large numbers of men in all departments. Snow blockades and other impediments of traffic have necessitated the employment of all available motive power, and in consequence numbers of additional engine and train crews have been employed. Every department of railway employment gives work to full complement of men and extra men are engaged in some departments.

CONDITION OF PARTICULAR TRADES.

Building trades.—Although there is any amount of building to be done, the building trades are experiencing a rather slack period. The weeks of severe cold and storm have completely tied up all outside work and inside work is pretty well finished. Gas and steam fitters and plumbers continue to be busily employed, and their work has been added to by mishaps in the line of frozen and burst pipes, &c.

Metal, engineering and shipbuilding trades.—Iron moulders and foundry employees have been generally busy but scarcity of coke and pig iron, owing to the snow blockades, has forced some shops to shut down for a time. The Jenckes Machine Company is building a water-conduit for the Ontario Power Company 6,000 feet long and 18 feet in diameter. A large number of punch, shear and roll men and their helpers are employed in the shops preparing the sheets of steel, and the outside gangs, composed of riveters, buckers-up, derrick men and general helpers have been increased from eighty to one hundred and twenty men. All the riveting is done by compressed air. The Canadian Niagara Power

Company has commenced the erection of its power house and a number of structural iron workers are engaged on the work. The Hamilton Bridge Company has the contract. Electrical workers and linemen are well employed. The machinery of the Canadian Niagara Power Company's transformer house is being installed.

Printing and allied trades.—Printers are busy. There has been a small demand for hand compositors. Two offices in this city are adding to their equipment and will probably employ more men.

Clothing trades.—Tailors and employees of clothing establishments are well employed. The Niagara Neckwear Company has difficulty in securing enough girls for its factory.

Food and tobacco preparation.—Ice cutting and storing is pretty well completed for the season. More ice has been stored in this district this year than ever before. The consumption of ice has been increasing for a number of years.

Transport.—Heavy traffic and frequent interruptions of railways by snow and ice have necessitated the engaging of very large railway staffs in the line of engine and train crews all winter and men with some previous experience in the work have been in demand. Freight handlers, team drivers and men engaged in the transportation of freight generally, have had a very busy season.

Unskilled labour.—Unskilled labour has been experiencing a temporary dull period on account of the shutting down of outdoor work because of storms and cold. This has been particularly true in connection with the power development works. Sewer construction and the digging of trenches for electric conduits and gas pipes have been carried on all winter.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of February labour has been well employed, with the exception of the building trades, which were restricted to inside work owing to the severe weather. Contracts have been let for the erection of several fine residences, to cost several thousand dollars, also for the erection of a new Bishop Ridley College costing \$75,000, for which tenders have been called, as also the erection of a modern and well equipped Young Men's Christian Association building. These new buildings, with other proposed buildings, and the finishing of the new public library, will ensure a good season's work for the building trades. Railways have been so set back in the delivery of freight, owing to the storm and ice on the tracks, that it will be some weeks before they catch up to the usual conditions. Merchants report having a very good month's trade. They have just completed stock-taking with gratifying results, and are restocking in preparation for a heavy season's trade. The tone of the labour market shows a decided improvement over last month. There have been no new labour disputes to record, and the existing ones are in a fair way of adjustment. The management of the McLaren's departmental store granted their employees a half hour earlier closing during January and February, closing at 5.30 instead of at 6 p.m. Some 78 employees were affected by this arrangement, which was done voluntarily by the firm and without a reduction in wages. The employees in appreciation banqueted their employers, thus evincing the good will existing between them.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The Niagara District Fruit Growers' Association assembled in St. Catharines, and petitioned the Dominion Immigration Department to import farm labourers and mechanics. Local mechanics contend that some assurance of employment by the body petitioning should be given before mechanics are imported.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are quiet. Carpenters, joiners, lathers, plasterers, painters, decorators and paper-hangers are fairly well employed. Plumbers, gas and steamfitters are very busy, and it will be some time before they will be able to complete the work on hand. Stonecutters and builders' labourers are quiet.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists, electrical and linemen report work fair. Metal polishers, blacksmiths and horseshoers report work fairly active.

Woodworking and furnishing trades.—Woodworkers, upholsterers, wood-carvers, carriage and wagon makers report trade as being good.

Printing and allied trades.—Printers, pressmen and bookbinders have been well employed.

Clothing trades.—Journeymen tailors report having had a fair month's trade.

Food and tobacco preparation.—Bakers, confectioners, butchers, meat cutters, ice cutters and drivers, cigarmakers and tobacco workers find trade good.

Leather trades.—Tanners, curriers and leather workers have all been well employed.

Miscellaneous.—Barbers report trade good. Clerks, delivery employees and laundry workers have had steady employment.

Transport.—Railway corporations have experienced great difficulties in endeavouring to keep open their lines for traffic, and consequently all engaged in the transportation and train services have had a strenuous month fighting the heavy accumulations of ice and snow. There has been considerable improvement in the conditions during the month.

Unskilled labour.—Owing to the heavy falls of snow unskilled labour has been fairly well employed during the month.

DISTRICT NOTES.

Port Dalhousie.—The Maple Leaf Rubber Factory has been running full time, and still advertising for help. Otherwise the labour market here is quiet, and likely to remain so till navigation opens.

Merritton.—All the factories have been kept going steadily, with the exception of the Canada Wheel Works, which were running on three-quarter time for a few weeks, but have now resumed full time again. All other labour has been generally well employed.

Thorold.—The labour market has been in a very satisfactory condition for the season of the year, there being but few idle men, and these confined largely to the building trades.

Reynoldsville.—This village is situated three miles south-west of St. Catharines and the St. Catharines water works reservoirs are located there; also the Cataract Power Company's plant. These two corporations have agreed to an arrangement that will enable the Cataract Power Company to improve and enlarge its plant. The contemplated improvements are estimated to cost not less than one million of dollars, including thirty-five thousand dollars to be expended on the city's water service. In five years' time, if warranted, the expenditure on improvements to the company's plant may amount to five millions of dollars.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The status of employment is about normal as compared with last month, both in skilled and unskilled labour. It is too early for the beginning of out-door work, and the weather has thus far been too severe for much ice-harvesting. The ice on the bay is almost too thick for easy handling, being 29 inches thick. Wholesale and retail trade is fairly good. During the

severe weather there was no shortage of fuel of any kind. At one period coal oil was very scarce. Water-service pipes, four feet underground, were frozen, and electricity had to be utilized to thaw them out. About the 20th of the month wheat went up to 90 cents a bushel and later to \$1, and flour 20 cents per barrel in all grades. The price of bread was not increased. A local steam laundry is preparing plans to alter its building in order to double its capacity.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The agricultural industry is very quiet, farmers attending to their stock and marketing produce at every opportunity.

Manufacturing.—The different branches of manufacturing are fairly active. Two heavy girders were shipped by the Hamilton Bridge Works Company to the Intercolonial railway at Lévis, Que., where they will be used for a street crossing about one mile east of the city. These girders took up the entire space of six cars, four of them being 60,000 pound capacity each. The length over all of each girder is 112 feet, and the depth $9\frac{1}{2}$ feet. The weight of one girder is 79,000 pounds, while the total of the span when put in position will be 266,000. This is the heaviest plate girder span ever built in Ontario.

Other industries.—The city scavengers received an increase of from \$4.75 per day to \$5.50 per day. This arrangement is said to be only temporary, the men to furnish horses and wagons. The civic fuel committee report a saving of \$4,000 last year by purchasing coal direct from the mines, and the same committee will secure its coal this year in a like manner. The municipality accepted a tender for cement from an American firm at \$1.65 $\frac{1}{2}$ per barrel, the lowest Canadian tender received being \$1.69.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building trades is still quiet, with the exception of

the activity of the plumbers. A new agreement was reached between the master and journeymen bricklayers, and instead of an eight-hour day at 50 cents an hour, a nine-hour day at 45 cents an hour was agreed upon. The builders' labourers have asked for 25 cents per hour and a nine-hour day.

Metal, engineering and shipbuilding trades.—In the iron trades workmen are fairly busy. Stove plate and machinery moulders, coremakers and stove-mounters are well employed. Structural iron workers and machinists are not very busy, but there are few idle men. Electrical workers are fairly well employed. Blacksmiths, sheet metal workers, brass workers, silver-smiths and horseshoers are all satisfactorily employed.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon workers, pattern-makers, coopers, &c., are fairly busy.

Printing and allied trades.—The allied printing trades are fairly active. Ad. and machine men and pressmen are well employed. Bookbinders experienced a good month.

Clothing trades.—Custom tailors are slack, while the ready-to-wear trade is very brisk. Hat-making business is dull, while the boot and shoe workers are busily employed.

Food and tobacco preparation.—Bakers and butchers are well employed. Cigar-makers and tobacco workers are enjoying a busy period. Ice cutters and drivers have not as yet begun their season's work.

Leather trades.—Leather workers in horse goods in the several shops are fairly busy.

Miscellaneous.—Broom-makers are well employed, and trade is brisk. Hotel and restaurant employees had a busy month. Laundry workers are fairly busy.

Transport.—All steam railway employees have been very busy during the month, owing to the heavy weather and snow

blockades. Street railway employees seem to be fairly well employed. A slight difference occurred between the men and the company about an order in reference to the conditions associated with recording for duty; the matter is not definitely settled yet. Longshoremen are usually slack in winter, and most of them engage in other work. Teamsters and expressmen are fairly busy.

Unskilled labour.—This kind of labour is fairly well employed, considering the extremely cold weather.

DISTRICT NOTES.

Dundas.—Employment is generally very good. Wholesale and retail trade is also good. The Barclay & Glass Piano Company, Dundas, has been incorporated with a capital of \$20,000. These men were some of the striking employees of the Ennis Piano Co., of Hamilton, who refused to accept the terms of the board of arbitration. The South Wentworth Farmers' Institute's petition to the government in favour of inducing farm labourers to come to Ontario was endorsed.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

So far as the employment of labour was concerned, February compared favourably with the preceding month, but unfavourably with the corresponding month of last year. Exceptionally cold weather hindered operations in some of the factories by the bursting of pipes, which necessitated the laying off of a part of the working force until repairs were made. The snow blockades on the railroads were responsible for the closing of two factories for a week, on account of a shortage of coal, and much embarrassment to other factories, which were awaiting shipments of iron and steel. The building trades were, with the exception of a few days, idle; but manufacturing is becoming more brisk. One of the agricultural implement factories worked over-

time part of the month. Many of the street railway employees have been idle most of the month, ice and snow preventing the running of the system. When drilling for gas some months ago oil was discovered, and since then the flow has increased. The proper officials of the local government have been interested in the discovery, and will attempt to locate it in quantities. The Massey-Harris Co. have reduced the wages of some of the drill hands; about ten men were affected, the reduction averaging about 7 cents per day. Retail merchants have had a fair month. A new factory for the manufacture of woollen and cotton hosiery will be running, it is expected, by May 1. The work of fitting up the building has been begun; it is expected between 40 and 50 persons, mostly girls, will be employed. Friendly relations between employers and employees have continued.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists have had little to do but attend to stock. The excessive fall of snow and the exceptionally cold weather hindered operations in the woods and teaming to the market.

Railroad construction and employment.—No railroad construction was attempted during the month; the employees were kept busy clearing the road blocked by snow blockades, &c.

CONDITION OF PARTICULAR TRADES.

Building trades.—As far as outside operations are concerned, the building trades have been practically idle. Bricklayers and masons were employed part of the month, and nearly all carpenters and joiners have been employed at inside work. Plasterers worked part of the month. Painters and decorators in factories have been working steadily. Plumbers and steam and gas-fitters have had a busy month, particularly during the first part of the month.

Metal, engineering and shipbuilding trades.—Iron and brass moulders have been with a few exceptions well employed. Stove

moulders have been busy. Coremakers have worked full time. Machinists have steady employment, but there is no demand for more men at present. Steam engineers have been fully employed. Machinery and general blacksmiths and sheet metal workers have all had a steady month.

Woodworking and furnishing trades.—Carriage and wagonmakers, millwrights, patternmakers, coopers and woodworkers have all had a steady month.

Printing and allied trades.—Printers and pressmen have had an average month, all local men being employed.

Clothing trades.—While it is an off season for journeymen tailors, yet a fair month has been experienced.

Food and tobacco preparation.—Bakers and confectioners report having a good winter trade; it is customary here for consumers during the winter, more or less, to do their own baking. Ice cutters have been busy during the first part of the month; the supply is all harvested. Cigarmakers and tobacco workers have had a fair month.

Miscellaneous.—Barbers are all employed. Clerks and delivery employees, hotel and restaurant employees, and laundry workers have worked full time.

Transport.—Railroad trackmen have been busy. Freight-handlers part of the month were slack. Street railway employees were idle most of the month. Cab drivers, carters, draymen and teamsters have had a fair month.

Unskilled labour.—There were a number of unskilled labourers on the market during the month, for whose services there exists no demand at present.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been only fairly well employed during February. The conditions noted as prevailing in the latter part of January

have continued, and for the greater part of February employment in some lines was seriously affected by the severe weather and crippled state of the railways. This led to a severe scarcity of coal and many lines of raw materials, as well as prevented the outward shipment of many lines of goods. Over five hundred men were laid off for short periods in different shops, owing to the shortage of soft coal. Generally, it was only for a few days, but with the inability to get goods shipped out it made business and employment quiet. The scarcity of hard coal was equal if not greater than that of last year. Sugar, salt, pig-iron, paper, wood and wheat for grinding were also very scarce at times. Retail business has also been very quiet. Towards the latter part of the month trains are being run more regularly, and coal and other supplies are being brought in in sufficient quantities to relieve the situation. There are no other noticeable features of the industrial situation during the month to record.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural work out of doors is very quiet. The deep snow has prevented wood-chopping, and hardwood of good quality is very scarce. It sells at \$8 per cord, with little offering.

Manufacturing. — Manufacturers have only had a fair month.

Railroad construction and employment.—Railways continue to employ extra maintenance of way men. The city of Guelph owns the sixteen-mile connection to the C. P. railway, known as the Guelph Junction railway; it is operated by the C. P. Railway Company, which pays the city 40 per cent of the gross receipts. Recently a petition was prepared, owing to the dissatisfaction with the railway service this winter, and signed by 300 manufacturers and business men, promising all possible traffic if an additional train was put on. This was granted and a new train put on the line. Last year the city received \$10,526, which

was more than the interest on the debentures covering the cost of the road.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are in the same condition that they were in last month; there is nothing doing except some inside work at the Macdonald building at the Ontario Agricultural College, and some small amount of jobbing. There will be a considerable amount of work as soon as the frost is out of the ground.

Metal, engineering and shipbuilding trades.—Iron moulders had a slightly better month than January. Machinists, machinists' helpers and sheet metal workers had a fairly good month. The tube mill employees lost considerable time waiting for coal.

Woodworking and furnishing trades.—Woodworkers have had only a fair month, this line of business being somewhat affected by the shortage of coal and the inability to get goods shipped. This also applies to the piano and organ workers. Coopers had a very slack month, there being no wheat coming in or flour going out or coal to get up steam. Upholsterers had a slightly better month than January.

Printing and allied trades.—Printers had an extra busy month.

Clothing trades.—Tailors have only had a fair month's work.

Miscellaneous.—Brewery workers have had a good month, the malting season being now on.

Textile trades.—Textile workers and Brussels carpet weavers have only had a fair month, the shortage of coal affecting business.

Unskilled labour.—This kind of labour had a good month, for February.

DISTRICT NOTES.

All the towns in this district have been affected by the shortage of coal, to about the same extent as Guelph. Galt, Hespeler, Preston, Berlin, and Wingham had shops

closed for want of coal at different times. At Berlin, the Berlin Felt Boot Company's factory has been destroyed by fire, throwing out of work from one hundred and fifty to one hundred and seventy-five people. The loss involved is about \$175,000.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been in good demand during the month for this season of the year, and there are very few idle men. The great fall of snow has caused much extra work in operating the railway lines. On some of the Grand Trunk lines traffic has at times been tied up for two or three days owing to the snow blockades. All the industries of the city are working with the same number employed as in previous month. A number of men of the different trades are working fitting up the old Cardigan factory for a paper box manufactory, which, it is understood, will employ between 30 and 40 hands. It is expected to be in operation about March 1. During the last week coal has been rather scarce, as the shipments were delayed, but all the factories managed to secure sufficient so far.

Bankers and the wholesale and retail merchants report business fairly good. There has been no change in the rates of wages or hours of labour, and no strikes or serious industrial disturbances during the month, excepting a slight disagreement between the painters employed by the firm of Messrs. McMillan & Neff and that company. The firm wanted to reduce the men's wages from 17½ cents per hour to 15 cents per hour. The men refused to accept the reduction, and went out on strike. After being out half a day the men returned to work, the firm granting the former rate, 17½ cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is nothing of importance to report as to the agricultural in-

dustry. The farmers are busy bringing in wood, hay and grain.

Manufacturing.—The factories and all manufacturing establishments are busy.

Railroad construction and employment.—The trackmen are busily engaged keeping the tracks clear of snow.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are at a standstill, except inside workers. Plumbers and gas and steamfitters are kept very busy.

Metal, engineering and shipbuilding trades.—Iron-workers and helpers and machinists are fairly well employed. Blacksmiths and horseshoers are doing a good business.

Woodworking and furnishing trades.—Woodworkers are having a very busy month, all the factories working full time.

Printing and allied trades.—Printers find work good.

Clothing trades.—Journeyman tailors report having fairly good employment, and garment workers have had a busy month.

Food and tobacco preparation.—There is plenty of work for those engaged in food and tobacco industries. Ice-cutting is giving work to a large number of men.

Miscellaneous.—Barbers, clerks and delivery employees are steadily employed.

Transport.—All railroad men are very busy, and have had one of the hardest months in years keeping the roads clear.

Unskilled labour.—The great amount of snow has kept labourers fairly well employed removing the snow on the railways and streets.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the continued very cold weather and the large amount of snow which

has fallen since the beginning of the year, blocking the railroads to a considerable extent, travellers have been prevented from reaching the country districts, and freight and raw material greatly delayed. A very marked decrease in business took place during February, but it is only of a temporary nature. Passenger transportation during the past two months has fallen to one-third of its normal condition, and in the last week of February in Western Ontario all but the main lines of railways were blocked for two days. At the McClary new works, situated at the south end of the city, the 250 hands employed have been put on the 60 hours per week, they formerly worked 57. At the McClary old works, employees are still working 57 hours per week, where about 400 hands are employed. A coal famine, both soft and hard coal, was narrowly averted several times during the last two months, but an opportune clearing of the weather when conditions were at their worst saved the situation. At present there is plenty of coal to last the remainder of the winter. Eggs have reached the unprecedented price in this district of 36 cents a dozen.

CONDITION OF LOCAL INDUSTRIES.

Railroad construction and employment.

The railroads have employed a large number of men digging out their trains, which were stalled by snow blockades, and keeping the tracks clear of snow and ice. The majority of the men employed were from this city.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, carpenters, plasterers and painters have been doing practically nothing since the beginning of the year, and have lost more time this winter than for several previous winters. Plumbers have been busy, mostly on repair work.

Metal, engineering and shipbuilding trades.—Moulders, iron-workers, core-makers, machinists, metal polishers and

stove-mounters all report trade as being good, but the travellers have not been sending in the orders as satisfactorily as they would had the weather been more promising. Linemen have been very busy repairing wires injured by the storms. Boilermakers are very busy.

Woodworking and furnishing trades.—

Woodworkers are busy. Carriage and wagon-makers have commenced on their spring orders and are rushed with work. Car-builders, on the first of the month, commence their summer hours of ten hours per day, and five on Saturday; this is about six weeks earlier than usual. Coopers have plenty to do, but were compelled to shut down for a few days, owing to the inability of the railroads to get their raw material into the city.

Printing and allied trades.—Printers are all working, although a falling-off in work has been noticeable. A. Talbot & Company's new premises are about ready for operation.

Clothing trades.—Journeymen tailors have put in the dullest two months they have experienced for years, the majority of them being idle almost all the time. Garment workers are busy on spring goods.

Food and tobacco preparation.—Bakers and confectioners are doing much about as is usual at this time of the year. Cigar-makers report trade as fair, and no idle men in the city.

Leather trades.—In all these trades business is good.

Miscellaneous.—Broom and brush-makers are rushed. Furriers find business slack.

Transport.—Railroad train crews earned more detention money since the beginning of the year than ever before, and railway companies were that much out. The agreements with the different brotherhoods provide that if a crew is over a certain length of time on a run through no cause of its own, it shall be paid detention money for such excess time. Trackmen have had a

hard winter's work. Cab drivers, carters, hackmen and draymen are doing very little.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the labour market from last month. The severe weather caused great disturbance in railway traffic, and much lack of shipping facilities for industries. There was no serious cessation of work in factories, however, and a good demand for floating labour was occasioned by the snow storms. The continued cold created much extra labour for plumbers by freezing water mains, &c. Counterbalancing this extra demand for labour there was a 10 per cent reduction in the staff employed in the mechanical department of the Michigan Central Railway Company's shops, on February 17. The cold weather, depression of trade, and the cancelling of new work, is given out as the reason for the cut. The freight hauling capacity was increased by the importation of ten new locomotives of a larger type than any heretofore in use. The new engines have four pair of drivers, and weigh 190,000 pounds. Retail business for the month was dull. A new schedule of wages was granted to the telegraph operators on the Canadian division of the Michigan Central Railway on February 1. The new rate calls for \$45 per month, and for Sunday work, 25 cents per hour extra.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In this line there are evidences of prosperity, and there seems to be a general advance in the price of foodstuffs. Flour has taken two advances in price during the month, and is now selling at \$2.75 per hundred. Wheat is selling at \$1 per bushel in the local market, and many farmers have been holding it back in anticipation of the advance.

Manufacturing.—Local industries report good business prospects. The local stove

factory did not manufacture during the past month owing to the severe weather, but diverted its attention to the getting in of timber. The Car Wheel Co. was compelled to partially shut down through lack of fuel.

Railroad construction and employment.—

Although there is, in this line, a great reduction of staff and curtailment of expenses, nevertheless the spring gives promise of increased activity. As a consequence of the use of heavier locomotives, more attention is required to the roadbed and track. The Michigan Central Railway Company has on hand a balance from last season of about 2,150 tons of 100-pound steel rails, which will be laid during the coming summer. The filling in of a larger portion of the Kettle Creek ravine trestle, requiring 165,000 cubic yards of earth, will be commenced in the spring. It is also probable that a considerable amount of double-tracking will be done.

CONDITION OF PARTICULAR TRADES.

Building trades.—There is little doing in the building line. Only a few small jobs are in evidence, but the prospects for the spring are bright. Plumbers are busy.

Metal and engineering trades.—For workers in these trades conditions are normal, with the exception of the above-mentioned reduction in the locomotive shops.

Woodworking and furnishing trades.—Factory hands are being steadily employed. The handle and carriage supply trade is exceptionally good. Car builders in the local shops come under the 10 per cent reduction of staff.

Printing and allied trades.—Conditions with printers remained unchanged during the month; work was steady.

Clothing trades.—Those engaged in the clothing trades are still experiencing a dull season, with no change of conditions from last month.

Food and tobacco preparation.—In these trades no changes were reported from the conditions prevailing last month.

Transport.—Railway traffic hands experienced one of the most arduous months for many years. The long hours, the tedious delays and general fatigue, accompanied by accidents, &c., have made the present winter the most trying one in the history of railroad men in this section.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the unusually cold weather, the condition of labour during the month has been unusually quiet—more so than last month. In fact, all outside work has almost been totally suspended, owing to the unprecedented snow-fall. Railroad transportation has been seriously hampered. Merchants and manufacturers have in many cases been unable to get needed supplies or send out their products. The snow blockade causing the detention of bituminous coal *en route* has caused some inconvenience to the factories, some having to borrow from their more fortunate neighbours to keep their shops running. What coal the dealers had was divided and delivered in small lots, the prices going \$6.75 per ton for the small lots. The demand for cutters and sleighs has been so great that the carriage shops could not supply the demand; in fact, for a time not a sleigh or cutter could be bought in the city, and orders from outside points were so great that the largest factories here were obliged to contract with the planing mills to make up thousands of sleighs and cutters to meet the demand. There has been a reduction in the hours of labour in the foundries and machine shops from ten to nine hours per day, with a corresponding reduction of wages, the former rate being on the average \$2 for ten hours. The change is on account of the extremely cold weather, the men preferring to go to work at 8 o'clock, instead of 7 o'clock. This change is, however, only temporary. With the advent of warm weather the for-

mer hours and wages will be restored. Wholesale and retail business is quiet, very little being done in some branches. There is an absence of unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The care of stock and marketing of wheat, corn, cord-wood, &c., keep the farmers fairly well employed at this time of the year.

Manufacturing.—All local factories report prosperous conditions.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters, plasterers and painters report trade very dull at present, but fair prospects for the spring. Plumbers and gas-fitters are fairly busy, with repair work mostly. Stonecutters and builders' labourers find trade very quiet.

Metal, engineering and shipbuilding trades.—Iron moulders and machinists have fairly steady employment. Blacksmiths and boilermakers say that trade is quiet.

Woodworking and furnishing trades.—Carriage and wagon-makers, upholsterers and varnishers are all fully employed. Coopers find work somewhat slack.

Printing and allied trades.—Printers, pressmen and bookbinders are all satisfactorily employed.

Clothing trades.—Journeyman tailors and boot and shoe workers are fairly well employed.

Food and tobacco preparation.—Bakers, confectioners, butchers and cigarmakers have steady employment.

Transport.—Railroadmen of all classes have all the work that they can do, in many cases having to work very long hours on account of deep snow. Cab drivers, teamsters and expressmen are all fully employed.

Unskilled labour.—There is but little demand for unskilled labour at present.

DISTRICT NOTES.

The Père Marquette Railway Company is building an additional coal hoist at Rondeau Harbour to accommodate the increased trade expected at that point as soon as navigation opens. The former hoist was not able to properly handle the coal brought in last year.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Owing to the severe weather the month of February has been a dull one for the labouring classes. Outside of the foundries and factories, everything else has been at a standstill. This has been the coldest winter the oldest inhabitant has ever experienced, and it has made trade of all kinds very dull. There will be plenty of work for all classes of labour as soon as the weather permits. The Windsor Turned Goods Company's works have started up again and are giving employment to about 40 hands, who mostly all are piece-workers, and making from \$1.75 to \$2 per day of 10 hours. The Windsor Salt Company has started drilling another salt well, the well the company has hitherto operated being unable to supply the demand. Owing to the snow blockades on the railroads some of our coal merchants have not got a pound of coal in their yards at the present time, but are borrowing from one another, and getting some from Detroit, and in that way so far have managed to supply every one with coal. The wholesale and retail trades have been very quiet this month. The printers have signed a satisfactory agreement for the year 1904, with their employers; it favours a slight increase in wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy marketing their produce, and the prices are good, corn selling at 40 cents a bushel; potatoes,

\$1 a bag; butter, 20 to 25 cents a pound; and eggs, 35 to 40 cents a dozen.

Manufacturing.—All manufacturing concerns are running short during the extremely cold weather.

CONDITION OF PARTICULAR TRADES.

Building trades.—The carpenters' union, contractors and mill men have signed an agreement for the year 1904, which is as follows :—'That nine hours shall constitute a day's work, and 25 cents an hour the minimum rate of wages, and none but union men to be employed.' Owing to the severe weather, the men engaged in the building trades, with a few exceptions, are all idle. Plumbers, gas and steamfitters are all busy, as there are many pipes that want repairing that were damaged by severe frost.

Metal, engineering and shipbuilding trades.—Iron moulders, iron-workers and helpers report having plenty of work. Electrical workers and linemen are all actively employed. Blacksmiths and horseshoers, owing to so much ice on the streets, are kept busy.

Woodworking and furnishing trades.—Carriage and wagonmakers are not very busy at present. Coopers are idle for want of material.

Printing and allied trades.—Printers and pressmen report work plentiful, both in job and newspaper work.

The new scale of wages of the Windsor Typographical Union, No. 550, which went into effect in February, was as follows :—

1. Compositors, News and Job.—To receive \$10 to \$11 per week of 54 hours. All overtime price and one-half up to 12 P.M. All work after 12 p.m., double time.

2. Roger machine operators.—To receive eight and one half cents per thousand ems (leads to be measured as type forty-six lines to constitute a thousand) on machines now in use. Overtime 12½ cents per thousand. Operators to work not more than 54 hours per week at day rates. Tabular work with one column of figures single price, two columns of figures price and one half, over two columns of figures double price. When two operators work on one machine one shift is declared night work, for which operator must be paid ten cents per thousand ems. Night operator to work not more than eight hours, overtime fifteen cents per thousand ems.

3. Pressmen.—Same as compositors, \$10 to \$11.
 4. Pressfeeders.—On cylinders to receive from \$7 to \$7.50 per week of 54 hours. On Gordons, from \$6 to \$6.50 per week of 54 hours. Where a feeder has to work alternate between cylinders and Gordons to receive feeders' pay. Overtime same as compositors and pressmen. Feeders must serve an apprenticeship of at least two years before considered journeymen.

5. All work on Sundays, Christmas Day, New Year's Day, Victoria Day, Dominion Day and Labour Day, to be paid for at double time rates.

6. 54 hours to constitute a week's work. All day work must be done between the hours of 7 a.m. and 6 p.m.

7. Each employer employing five journeymen to be allowed two apprentices, and one for each five additional journeymen or major portion thereof.

8. Any alterations to this scale must be submitted to the union for approval before going into effect.

Clothing trades.—Journeymen tailors report trade quiet this month.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters say that owing to the severe weather their trade is not so good as it should be.

Miscellaneous.—Barbers report trade being fairly good. Hotel and restaurant employees and laundry workers are in demand.

Transport.—Men engaged in all branches of railway service are very busy, owing to the accumulation of so much snow and ice on the tracks. The companies are sending out trains with two and three engines attached. Teamsters and expressmen report trade dull.

Unskilled labour.—The demand for unskilled labour is fairly good.

DISTRICT NOTES.

Walkerville.—The Walkerville Wagon Works Co. has sold its business to Mr. McKillip, West Lorne, and he has closed it up and moved all the machinery to West Lorne, thus throwing about 50 hands here out of employment. All other factories are running full time, with full staffs. The building trades are looking up. Plans are out for the erection of a house to cost \$100,000.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

No material change from conditions reported last month has taken place. Those willing to adapt themselves to such employment as the various agents are desirous of finding men for, are very scarce. There is a considerable element who refuse, and are unsuited for, the work of the bush and such railroad construction as is being done. Amongst this class there is some hardship prevailing, which has been accentuated by an exceptionally lengthy spell of severe weather.

Evidences of work projected for next summer are manifesting themselves. Already definite steps are being taken towards carrying out several undertakings, of which the following is a partial list:—

Street railway extension.

Subway on Main street, Winnipeg.

New hotel and depot for the Canadian Pacific Railway.

Irrigation canal at Calgary.

Dominion fair buildings.

New building for Dominion Government purposes.

Railroad construction by all companies.

In addition to the above, the issue of building permits for January greatly exceeds the total for the same month of the previous year. The total for January, 1903, was \$11,350 and for January, 1904, \$45,500. This increase is regarded as being indicative of greater activity in building during the ensuing year than last.

The Street Railway Company, under the terms of its charter, will require to build a considerable mileage within the city during the approaching summer, and it has also entered into an agreement with the adjoining municipality of St. Boniface to construct further lines in this territory. The suburban park about to be purchased will also have to be connected by street car lines with the city. This will require about two miles of road and a bridge across the Assiniboine river.

The plans for the Main street subway have just been approved by the city council

and as soon as weather permits construction will commence. It will cost approximately \$70,000.

The new hotel and depot of the Canadian Pacific Railway will be built this year at a cost of over a million dollars. Tenders for the preliminary work of clearing off the site of the buildings at present thereon are being called for.

A million dollar contract has been let by the Canadian Pacific Railway Company to J. J. Nickson & Co., a firm of Vancouver contractors, for the construction of an irrigation canal, twenty miles in length, near Calgary and connecting with the big scheme of reclamation which has long been under consideration. Complete plans are prepared for 400 miles of irrigation canal along the Bow water. The principal part is to be constructed within four miles of the railway and parallel to it. The canal is to be forty feet wide and thirty-two feet deep. Two years' time is the limit for the completion.

The opening day of the Dominion Fair has been fixed for July 25, and all the building, therefor will have to be constructed. The cost of this is estimated at \$50,000. Portions of existing erections will be utilized. Work will be commenced almost immediately.

Extensive preparations are being made for railroad construction during the summer. Large orders are being placed for equipment of contractors' outfits.

The Western General Power Company will complete its installation of a power plant on Winnipeg river this year, and the construction of the transmission line to Winnipeg. Altogether this undertaking will represent an outlay of, approximately, \$1,500,000. The city of Winnipeg, to meet the expansion of the city, has already definitely decided on plans for large sewers to drain an extensive acreage which during the past year has been covered with dwellings. This expansion also necessitates the paving and grading of the streets to a greater extent than usual. To meet the demand for quarry products, better arrangements for

the supply of such are being made. This will necessitate the employment of a much larger force of men during 1904. At present the city has on its pay rolls some 500 men, and this will be almost quadrupled when all the summer operations are in full swing.

Commerce has been somewhat interrupted by snow blockades. The transportation companies are now, however, practically over the difficulties connected therewith, and merchandise is moving regularly again.

Though January is one of the most inactive months in respect to the importation of merchandise, the record at the Winnipeg customs office for the month this year shows a largely increased volume of trade compared with the figures for January, 1903. The duties collected during the month amounted to \$194,734.54. In January, 1903, the amount collected was \$139,976.94, being \$54,757.60 less than the month just closed.

Manufacturing has been interfered with by the snow blockade. One flour mill has been closed down for a short time, but the manager refused information as to the cause thereof. It is stated, however, that the particular kind of coal used could not be had on account of the storm. Other fuel, however, was available. The sudden advance in the price of wheat, from eighty cents at the beginning of February to over \$1 towards the close, is also alleged as a reason for mill stoppages. This anticipated advance has had the effect of retarding deliveries, and mills have been drawing from their holdings in Fort William and Port Arthur stocks. Both of the local milling companies advanced the price of flour, 10 cents. This makes the price of superior grades, \$5.30 per barrel. In sympathy with the higher wheat prices, the price of bread has taken a slight advance. The present rate is sixteen loaves for \$1 as against 20 previously. The dealers' bread will be supplied at eighteen loaves for \$1. The retail price per loaf is generally seven cents as

* Feb. 25, 1904.—May wheat at Winnipeg, \$1.07½.

against five cents. Pastry prices have advanced at a still greater ratio, estimated at an average of fifty per cent. Flour prices on February 21 and corresponding periods of previous years were as follows:—

| | | Patent Bakers. | |
|--------------------------|----|----------------|--------|
| 1902—Sack of 98 pounds.. | .. | \$2.00 | \$1.85 |
| 1903 “ “ “ .. | .. | 2.10 | 1.95 |
| 1904 “ “ “ .. | .. | 2.45 | 2.30 |

There have been no changes in rates of wages, and quietness has prevailed in industrial relations. The contractors in the building trades have already held a meeting, and it is understood that some of the unions in the same business will ask for a modification of their agreements to provide for higher rates of wages.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Lumbering and railroad construction continues to be active. The unusual snow fall has aided logging very considerably. As a rule the camp operators are somewhat handicapped by the scarcity of skilled men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building operations, comparatively speaking, are more active than in corresponding months of previous years. Work on the new shops for the Canadian Pacific Railway was suspended for two weeks during February on account of the shortage of lumber of the required dimension. Plumbers and other crafts are fairly well employed indoors. Quite a number of carpenters are at present out of employment, and anticipate being idle until the weather moderates.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and kindred trades are busy. The outlook for a still busier season is excellent.

Woodworking and furnishing trades.—Woodworking establishments continue to be active and apparently their resources for turning out orders are taxed to their limit. The new Rat Portage Lumber Company's mill, in St. Boniface, will, it is understood, be in operation in the course of a few weeks.

Printing and allied trades.—The printing trades are busy as a rule. Some of the smaller offices, however, say that job work has been slack during the month. Typographical Union No. 191 is negotiating with the employers for an eight-hour day for job printers.

Clothing trades.—The clothing trades are all active. A leading garment manufacturer states that he has a good many machines standing idle because he cannot get girls to operate them. Tent making, for contractors' purposes, is a considerable business in Winnipeg now, and some substantial orders are in course of execution.

Transportation.—The repair shops of the railway companies in the city are working full time. In the Canadian Pacific Railway shops preparations are being made to work a night as well as day shift. Transportation staffs are being strengthened in anticipation of the usual increase of business in the spring.

Unskilled labour.—General labour of all kinds is well employed and the prospects for employment is good.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market is very quiet at present, with the exception of a small number of carpenters, who are working in local shops. Men engaged in building operations are not busy, and quite a number are idle. In the different departments of railway work men are fairly well employed, considering the season of the year. The only new industry started this month is an up-to-date woollen mill, which will manufacture various kinds of woollen goods. The Brandon Creamery Company has opened new and extensive premises, the increase in its business making it necessary to enlarge the building and increase the plant. The transportation companies report business very good, considering the

season of the year. Wholesale and retail merchants report trade fairly brisk. There have been no changes in rates of wages or hours of labour, and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At an agricultural convention held lately, the Superintendent of the Brandon Experimental Farm stated that, during the past season, one million and a half trees were grown on the farm. In the spring these trees will be distributed free to farmers throughout the province by the forestry branch of the Department of the Interior. Besides these, there were twenty-five thousand ornamental shrubs raised. These will also be distributed free throughout the province to people residing in towns and villages, as well as to farmers. Last year, the experimental farm produced trees which at ordinary market rates would be worth no less than \$45,000—enough to pay the running expenses of the farm for several years. A quantity of seed grains of a new variety is also being distributed to farmers at a nominal rate.

Manufacturing.—One of the city planing mills and a sash and door factory were shut down for two weeks for repairs. They have again opened with a full staff and have put in some new machinery. All other factories are working full time.

Railroad construction and employment.—The Canadian Northern Railway Company will put a large staff of men, when the spring opens, on the extension to Prince Albert. The company expects to complete and have in operation its line to Edmonton before the year is out. The C. P. Railway Company will give employment to a large number of men this spring on the extension running from Arcola to Regina, and on the Kirkella branch.

Other industries.—During the year ending January, 1903, extracts were taken from the local architect's office by the *Brandon Sun*, showing the extent of improvements completed in the building line

and of civic improvements during the year, which were as follows:—C. P. Railway improvements, \$250,000; civic improvements, \$50,000; public building, \$173,000; business blocks and improvements, \$135,000; mill improvements, \$113,000; hotels, \$48,000; residential improvements, \$230,000. There is no way of estimating the improvements that have been carried out throughout the district, but, as far as can be ascertained, they have been considerable.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are idle. There are a few carpenters and joiners employed, but nearly all are idle just at present. Lathers and plasterers are also idle. Plumbers are very busy. Painters and decorators find employment very scarce. Stonecutters and builders' labourers are idle.

Metal, engineering and shipbuilding trades.—Machinists are working full time in local shops. Boilermakers find business good. Blacksmiths are experiencing a slack time. Jewellers and watchmakers are satisfactorily employed. Pattern-makers are working full time.

Printing and allied trades.—All engaged in these trades are fairly busy.

Clothing trades.—Tailors report trade very good. With boot and shoe workers trade is also good.

Food and tobacco preparation.—Bakers and confectioners are satisfactorily employed. Ice cutters and drivers are very busy. A large number of men and teams are being employed. Cigarmakers are busy.

Leather trades.—Tanners and curriers find trade slack.

Miscellaneous.—Clerks and stenographers are busy, but report no openings. Delivery employees are busy. Furriers find trade good. Steam and hand laundry business is brisk.

Transport.—Men engaged in train service are somewhat slack. Freight-handlers are fairly busy.

Unskilled labour.—There are quite a number of men in this city at present unemployed, but when spring opens there will be employment for all.

DISTRICT NOTES.

Owing to the increase in the price of grain, there has been a considerable increase in deliveries throughout the province. The convention of the Manitoba Grain Growers' Association met in this city. Forty-five branches were represented. They discussed the working of the Grain Act, the lumber supply, transportation and the coal supply, and appointed committees to investigate different matters and report at the next meeting. Mr. C. C. Castle, of Winnipeg, Warehouse Commissioner, delivered an address on the Grain Standard Board, Survey Board, and the work of grain inspectors.

ROSSLAND, B.C., AND DISTRICT.

Roland A. Laird, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

February witnessed few changes in industrial conditions throughout the Kootenay-Boundary districts of British Columbia. This is a normal condition, however, inasmuch as the special conditions governing the country are such as to largely preclude any extensive development during the winter months when the snow is so heavy as to hamper new work in the mining and lumbering industries. The conditions are such, in fact, that any special alteration would naturally be in the direction of retrogression. Nothing of this nature, however, has occurred in the length and breadth of the territory covered by this report.

It is at this juncture that the outlook for the approaching spring and the feeling with respect to the incoming season may be ascertained. Generally speaking,

the sentiment throughout the Kootenay-Boundary district is, that the industries of the country are on the threshold of an important revival. From every section come reports of probably enhanced activity. This feeling is usually regarded as a safe indication of the probable trend of affairs, and it is no exaggeration to state that the outlook to-day is better than it has been for three years at least.

The expected improvement in conditions will doubtless apply more to the mining industry than to lumbering and transportation, although the latter will naturally profit from any enhanced activity in mining. Lumbering will probably witness a steady improvement in view of the numerous plants that will come into the producing stage within the next few months. If the North-west Territories enjoy the prosperity, as the result of the large influxes of settlers now predicted for them, the Kootenay lumbering industry will have the greatest year in its history.

Mining.—In the *Rossland* camp the mines are more active than at any period in the past two or three years. Production has been increased to a steady basis of between 9,000 and 10,000 tons weekly, which is, on the average, 3,000 tons per week greater than last year. The annual reports of a number of the principal mines are just to hand, and the nature of these documents is most satisfactory. In every case increased activity is outlined for the current year, while the profit-earning capacity of the mines is dwelt upon in gratifying terms. This is especially important with respect to the English-owned properties, on the ground that profits from these mines will stimulate an influx of English capital required for the development of other properties now quiescent for lack of working capital. A recent statement of the number of men employed in the mines of the *Rossland* camp placed the total at 850, with an estimated aggregate monthly wage roll of \$87,000.

In *Boundary* the great copper-gold mines were never more active than at the present

moment. The Boundary mines are now producing from 15,000 to 17,000 tons of ore weekly, and it is estimated that the output for the current year will exceed a million tons. In this connection it is worthy of note, from the labour standpoint, that the quarrying system of mining is largely in vogue in Boundary, while in Rossland deep level mining is conducted exclusively. Even those least acquainted with mining are aware that deep level mining affords employment for more and better paid workmen than does quarrying, so that the larger tonnage produced weekly in Boundary does not represent anything like the difference in the number of men employed that exists between the tonnages produced in the two districts.

No special change has occurred in the *Slocan* district, and it is likely that matters will remain approximately as at present until the spring thaws carry off the snow. It is predicted that the *Slocan* will witness an important revival with the advent of spring.

In *Lardeau* matters are proceeding about as usual. The district is as yet, generally speaking, in the stage where the prospector is the most important factor in its interior economy, although several valuable mines have been developed, many of which have won wide publicity because of the exceptionally high grade ores produced. The spring months will inaugurate much activity in various parts of the district.

At *Camborne* two stamp mills are steadily at work on the product of several free gold properties, and the results obtained in bullion off the plates have placed these properties beyond the doubtful stage. The coming summer is said to have in store a couple of additional milling plants for *Camborne*.

Poplar, the scene of last summer's famous gold strikes, is in a measure 'snowed-in.' Two or three properties located within a short distance of the new town of *Poplar* are operating steadily, but the bulk of the properties in the new camp are in such

a shape that the owners are compelled to suspend operations during the winter months. Great development is expected from the camp when the snow goes off sufficiently to enable the prospectors to resume work.

East Kootenay's mining industry has witnessed no changes during the month. The perennial report of a resumption at the *St. Eugène* mine is again to hand, but its principal interest is because it refers to what is admittedly the greatest lead mine in Canada, if not on the North American continent. At *Kimberley* mines are operating, and in the upper *Columbia valley* a couple of especially promising mines are being steadily developed and equipped with machinery. In coal-mining the activity is very marked. The output of the *East Kootenay* coal mines has never been so great as at present, and the tonnage is being constantly increased. The approaching summer will see further advances in the coal-mining branch of the industry, especially in the *Fording river* country, north of *Michel*, where eastern capitalists are reported to contemplate extensive development on valuable coal measures.

Smelting.—The principal development of the month in connection with the smelting industry was the commencement of work in the refining plant at the *Canadian Smelting Works at Trail*. At this plant 50 tons of pure pig lead are produced daily, the first of the product to be turned out on *Canadian soil*. Attached to the refinery is a slimes plant wherein the waste from the refinery is treated for the extraction of gold and silver, which is turned out in a purely metallic form.

The *Boundary Falls* smelter is still closed down, but the management states that a resumption may be expected shortly, and that when the resumption takes place it will be under conditions in respect to ore supplies that will ensure permanent and continuous operations.

The *Greenwood* smelter has a converting plant under order, and has arranged to

treat at these works the copper mattes produced by the Trail smelter. Inasmuch as these mattes now go to the Tacoma smelter for conversion into blister copper, the new arrangement is a triumph for Canadian labour.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been no change of importance in the labour market during the past month. Outside work was slightly interrupted for a week or so, owing to the heavy snow storms. The demand is still made for railroad construction men. Skilled labour, for the time of year, is very satisfactory. Several new buildings are in course of construction, and some of the mills are increasing their capacity for the spring trade. The Vulcan Iron Works Company is at present engaged in the erection of a new foundry for the manufacture of iron and brass castings, which will give employment to men at this point. A large staff of men has been engaged to start on the Fraser river matras work for the Dominion government. This branch of public works has not been in operation for the past two seasons. If a full staff is employed it will number about 100 men.

The imports and exports at this port for the month of January were as follows: Imports, dutiable goods, \$27,584; free, \$17,910; total, \$45,494. Duty collected, \$13,176.65; other revenues, \$80; total, \$13,256.65. Increase over January, 1903, \$3,239.57. Exports were \$41,710.

The market prices of meats, &c., were as follows: Hind-quarters of beef, $8\frac{1}{2}$ to $9\frac{1}{2}$ cents; fore-quarters, $6\frac{1}{2}$ to $7\frac{1}{2}$; pork, whole, 8 to 9 cents; mutton, $10\frac{1}{2}$ to 11 cents; veal, small, 10 cents; veal, large, 7 to 8 cents; eggs, 35 cents per dozen; butter, 30 cents per pound; potatoes, 90 cents to \$1 per sack; carrots, 60 cents per sack and \$8 per ton; parsnips, 75 cents per sack; apples, 75 cents to \$1 per box. Flour during the past month

has increased in price 15 to 30 cents per barrel, with a prospect of still further increase.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The first spring stallion and fat-stock show ever held in the west, and which will take place in this city on March 8 to 12, promises to be a great success. A large amount of preparatory work is under way in making ready the buildings and grounds for the stock.

Fishing.—There is very little salmon fishing being carried on at present. The men fishing halibut are finding a ready market for their fish. At a meeting of the Fishermen's Union on February 6, resolutions were passed endorsing the canners' suggestion that the length of nets used outside the river be 300 fathoms and not less than an 80 mesh, and another protesting against exclusive right being given to any party to fish in British Columbia waters. The proposal that the close season be from August 25 to September 15 was endorsed. The proposal of the canners to prohibit fishing in the river above the new bridge, and to prohibit export of fresh salmon during the canning season, were not endorsed. The union disapproved, also, of the proposal to remove the fisheries office from this city to Vancouver, the resolution stating that as the river could not be taken over to the terminal city the office might as well remain by the river also.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers report work steady, with all members of this branch employed. All other branches report work quiet.

Metal, engineering and shipbuilding trades.—All engaged in these trades report being fully employed with good prospects, excepting shipwrights and caulkers who at present find work slack.

Woodworking and furnishing trades.—Work in some branches is only fair. Shingle weavers are not very busy, and many of the men are idle, but next month is expected to be more favourable.

Printing and allied trades.—Printers report work plentiful.

Food and tobacco preparation.—Bakers, butchers and cigarmakers report a steady month's work.

Transport.—Some engaged in these lines have lost time, owing to an ice and snow blockade that lasted for some 7 to 10 days.

DISTRICT NOTES.

Lytton.—Five new dredges are to be built on the banks of the Fraser river for the Lytton Gold-dredging Company, which is now operating at that point.

Ladner.—The contract has been awarded and construction commenced on a two story building 40 by 70 feet. The ground floor will be divided into two stories, The Royal Bank of Canada leasing one. The upper part will be used by the owners, the local lodge of Odd-fellows, for lodge purposes. The contract price was about \$3,600. Work throughout the district is plentiful, many of the farmers needing help for spring work.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades continue active, with prospects assuring. The number of building permits issued this month to February 23 amount to over \$50,000, and will run over the \$60,000 mark. Eighty-five thousand dollars was the record for January.

Local business keeps active and merchants have very little ground for complaint regarding payments. The flour market has been unusually active during the past week, advances following one another in rapid succession. The war is responsible for this condition.

Though there was a loss, estimated at \$10,000, in the revenue owing to the discontinuance of Chinese immigration, the customs revenues of the port totalled \$94,613.81, as against \$77,430.51 a year ago. The customs returns for the month of

January in the last eight years were as follows :—

| | | | |
|--------|----------|----------|----|
| 1897.. | | \$30,504 | 68 |
| 1898.. | | 51,349 | 37 |
| 1899.. | | 43,348 | 66 |
| 1900.. | | 67,572 | 12 |
| 1901.. | | 65,921 | 64 |
| 1902.. | | 70,381 | 40 |
| 1903.. | | 77,430 | 81 |
| 1904.. | | 94,613 | 81 |

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The British Columbia Lumber and Shingle Manufacturers' Association controls the trade and output of lumber of the province. The company has a local price list. The following are some of its regulations and prices :—

It is contrary to the rules of the association for any of its members to figure on a bill of lumber. This list is made complete as possible. Lengths, widths and grades of lumber have been given special attention. Flooring, ceiling, siding, ship-lap, and all classes of dressed lumber for finishing are cut to length, at \$2.50 per thousand extra. Dressing lumber one side costs \$1, two sides \$1.50, three sides \$2, four sides \$2.50. Dressing kiln-dried sized or rough lumber for local trade \$2.50 per thousand extra. Odd inches in length are calculated as one foot. Small orders and special sizes are charged extra. Fifty cents is allowed when delivery is taken from mill-yard. Delivery by team outside the city limits is charged extra. Mills on the Fraser river allow 50 cents per thousand when delivery is taken from the mill-yard or mill-wharf. From Langley to mouth of Fraser river deliveries are made at list price. Above Langley to Hatzic (in scow loads of 10,000 feet or more) \$1 per thousand extra is charged; Nicomen and Chilliwack (in scow loads 10,000 feet or more), \$1.50 per thousand extra. In all other cases, freight is added to prices of the year. Common fir (rough), 6 x 6, 6 x 8, 6 x 10, 6 x 12 up to 24 feet, is listed at \$13 per thousand; 6 x 24, \$22; 6 x 18, \$16. Cut to lengths for boxes, \$15. Bridging, 2 x 2 inches, \$17. Cull, 1½ x 3 to 12 inches and 1 x 3 and 1 x 4 random length, \$10. Clear and select rough fir—Fir tank lumber, up

to 16 inches, dressed and grooved, \$30 ; ditto, 16 to 24 inches, \$35 ; coping, bevelled, \$30 ; No. 1 clear rough, up to 24 feet up to 16 inches, \$25 ; 17 to 24 inches, \$30 ; above 24 inches, \$35 ; No. 2 clear rough, up to 24 feet up to 16 inches, \$22.50 ; 17 to 24 inches, \$27.50 ; above 24 inches, \$32.50. Dressed fir lumber—Common, up to 24 feet, \$14 ; ship-lap, \$15 ; furring and side-walk strips sized, \$17 ; specially selected flooring, ceiling and siding edge grain, up to 24 feet, \$30 ; wainscoting, 3 to 4 feet, \$15 ; fir casing and base, \$35. Cedar—No. 1 clear rough, up to 12 inches wide up to 16 feet, \$40 ; 17 to 20 feet, \$45 ; 21 to 25 feet, \$50 ; 26 to 30 feet, \$55 ; 14 to 16 inches wide, up to 16 feet, \$42.50 ; 17 to 20 feet, \$47.50 ; 21 to 25 feet, \$52.50 ; 26 to 30 feet, \$57.50 ; 18 to 20 inches wide, \$45, \$50, \$55 and \$60. Over 20 inches wide, \$52.50, \$57.50, \$62.50 and \$67.50. Factory cedar, rough, \$17 ; casing and base, \$50 ; ceiling, 10 feet and up, \$37 ; wainscoting up to 9 feet, \$30 ; half-inch bevel, \$24 ; drop siding, \$37.50 ; ship-lap, \$15 ; fence posts, dressed, \$17 ; rough common, cut to short lengths, \$14. Cedar boat lumber, \$47.50 to \$57.50. Spruce lumber averages about the same as cedar. Shingles—6 to 12 in., 16 in., No. 1, \$1.90 ; No. 2, \$1.25 ; 5 to 2 in., 16 in., No. 1, \$2 ; No. 2, \$1.35 ; 5 to 2 in., 18 in., No. 1, \$2.10 ; No. 2, \$1.35 ; 5 to 2½ in., 18 in., No. 1, \$2.20 ; No. 2, \$1.35. Sized shingles, 4, 5 and 6 inches, \$2.90 ; fancy shingles, 4, 5 and 6 inches, \$3.40 ; lath, \$2.75. The above are but a few of the prices charged to the local trade. About 45 or 50 concerns comprise the association. A busy season is looked forward to.

CONDITION OF LOCAL INDUSTRIES.

Building trades.—Bricklayers and masons report conditions fairly good, with prospects good. About 75 men are at work. Of course, this is the rainy season, and work is hindered thereby. Carpenters and joiners report work during February fair. The arrival of outsiders is the cause for a number being out of employment. Between 350 and 400 are working. Wet weather causes short time. The

outlook is good, and those out of work now will be employed with the opening of spring. Seventeen journeymen plasterers (international union), with 14 contractors and 12 non-union, fill the wants of Vancouver. About 20 lathers, including bosses and journeymen, are kept fairly busy. Prospects are good. There are about 50 painters available, of which at present a few are unemployed, waiting on the weather. Plumbers are busy, and work will continue fair. Stonecutters are all at work on the new hospital and high school. Builders' labourers report prospects good. A large number are idle at present, owing principally to bad weather.

Metal, engineering and shipbuilding trades.—With electrical workers, inside men are busy. Machinists report prospects uncertain. Linemen are fairly employed. Sheet metal workers report employment fairly steady. Metal ceiling work, heretofore put up by carpenters, will be transferred to the metal workers. Shipbuilders report work exceedingly poor and the outlook for the trade gloomy. Tool-sharpening is principally controlled by the ups and downs of the stonecutters. At present work is good. Blacksmiths in C. P. R. shops are working full time, 10 hours a day.

Woodworking and furnishing trades.—Woodworkers are fairly well employed, but the men are scattered and wages lack uniformity. Carworkers report a large number at work.

Printing and allied trades.—Newspaper work is good, job work is slack.

Clothing trades.—Tailors report work fairly good, but prospects uncertain.

Food and tobacco preparation.—Bakers report work dull. A movement has been started to establish a co-operative bakery.

Miscellaneous.—There is no demand for clerks, and the outlook is poor.

Unskilled labour.—A large number are inquiring for work, and wages fluctuate. Odd job men are not busy.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, *Correspondent*, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions of the past month, while not so favourable as during the preceding month, were better than those of the same month last year. Owing to the unsettled condition of the weather, outside work came to a standstill, thereby throwing a number of both skilled and unskilled workmen out of employment. Work of filling in the James Bay mud flats and block-paving the Point Ellis bridge will soon begin and will give employment to a considerable number of men. The repairs on H.M.S. *Flora*, and *Egeria*, and the steamer *Tees* will afford employment to a considerable number of skilled mechanics for a few weeks. Merchants, wholesale and retail, report a satisfactory month. By voluntary concession on the part of the Stevedores' Association, the rates per hour paid the longshoremen were increased 5 cents per hour for day work, and 10 cents per hour for night work. Prior to February 1, 1904, 35 cents per hour were paid for day work and 40 cents per hour for night work. The present rates are 40 cents per hour for day work, and 50 cents per hour for night work. While the present rates have been paid for some time by firms engaged, it is only since February 1 that this scale has been adopted as standard. There have been no other changes in the hours of labour, and harmonious relations between employers and employees continue undisturbed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Employment in the building trades is not quite so favourable as for the preceding month, owing to the unsettled condition of the weather. Bricklayers and masons report work fair, with a few men idle. House carpenters find work dull, but joiners are fairly well employed. Painters and decorators report work slack, and many are idle. Lathers and plasterers

report work slack. Plumbers have experienced a season of exceptional activity; now report work as slack, and a few unemployed. Steam-fitters are fairly well employed. Stonecutters also have been well employed during the month. Builders' labourers report work fair.

Metal, engineering and shipbuilding trades.—Stove moulders report work plentiful, and all are fully employed. Other branches of the industry are not so fortunate, many being idle. Machinists report a fair month. Electrical workers and linemen are fully employed. Stove-mounters and blacksmiths are satisfactorily employed. Boilermakers report work good, and all are employed. Shipwrights report work very dull and many out of employment. Caulkers are somewhat more fortunate, yet all are not employed. Horse-shoers report work slack.

Woodworking and furnishing trades.—Woodworkers are well employed, as are also the upholsterers.

Printing and allied trades.—While printers are well employed at newspaper work, those employed in jobbing find work slack. Pressmen and bookbinders report work good and nearly all employed.

Clothing trades.—Work is slack in the tailoring trade, and many journeymen are out of employment. Garment workers report work active and all employed.

Food and tobacco preparation.—Bakers and butchers report a fair month. Cigar-makers are all well employed, and report business good.

Leather trades.—Leather workers report fair trade conditions.

Miscellaneous.—Barbers are well employed, and laundry workers report trade as being fair.

Transport.—Steamboatmen and firemen are well employed, and longshoremen report work good, with a satisfactory increase in wages. Street railway employees are all employed. Hackmen and draymen re-

port work fair. Teamsters are all employed, and expressmen report work slack.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There have been no marked changes in the labour market during the month, there being very little doing in the building trades, and not much work for outside labour of any kind. In commercial circles there is no change from last month, business being quiet. There has been a reduction of wages at the Chemainus saw mill of about ten per cent, and also a laying off of one shift. Among the unions everything is quiet.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—In the lumbering industry business is quiet, there being little doing in the woods owing to bad weather. In the local saw mill the men are working about three-quarter time. At the Chemainus saw-mill the night shift has been laid off, and the wages of the other men reduced.

Mining.—In the quartz mines there is very little doing. In the coal mines work is fairly active. The mines, both here and in

the district, are working full time, and there are not as many idle men around the mines as at this time last month, but there is plenty of men here to meet all demands.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades there is hardly anything doing at present, and the prospects for the future are not very bright.

Metal, engineering and shipbuilding trades.—Blacksmiths report trade fair.

Woodworking and furnishing trades.—Carriage makers report business fair for the time of the year.

Printing and allied trades.—Printers report business quiet.

Clothing trades.—Tailors report very little doing.

Miscellaneous.—Teamsters and expressmen report business poor.

Unskilled labour.—There is hardly any work for unskilled labour, but the city is doing a little more work than it did last year.

DISTRICT NOTES.

In the district, outside of the coal mines, there is very little doing.

THE WEATHER BLOCKADE—ITS EFFECT UPON INDUSTRY IN CANADA.

OF the circumstances that have particularly affected the general labour and industrial situation in Canada during the past few weeks, the most important have undoubtedly had their origin in the unusual weather conditions which have prevailed since the opening of the present winter season, and more particularly during the latter half of January and throughout the month of February.

Though the entire Dominion was to a degree involved in the consequences of these conditions, the most notable developments were recorded in the western peninsula of Ontario, where the weather was of

the severest character known in several years, and where, in consequence, the most noteworthy phases of the resulting interference with trade and industry were reported as occurring.

The entire phenomenon, in so far as it became a factor in the current social and industrial situation, was primarily, though not by any means exclusively, one of interrupted railway transportation, and the occurrence affords an excellent illustration of the interdependence of the several branches of modern industry, and the important part played therein by transportation. It may be said, in fact, that, since the strike

of the coal miners in the anthracite regions of Pennsylvania during the summer of 1902, no single event of an adverse character has been attended with such far reaching temporary results, whether of a social, industrial or economic character.

Special Investigation by the Department.

With a view of indicating the general effect of these conditions upon the social and industrial life of the Dominion, the Department of Labour presents herewith the result of a special investigation into the general situation, and particularly with regard to the effects of the accumulation of snow along the lines of the railways, the latter phenomenon being, as above stated, the circumstance which was attended with the most important consequence to labour and industry. The investigation was somewhat limited, owing to the brief time at the disposal of the department, and only representative returns for the districts affected were obtainable.

The information set forth is based upon an accumulation of references to the effects of the weather upon industry contained in the daily press of the Dominion which were made the basis of further inquiries of a specific nature, on reports received from street railway companies, and other businesses whose operations were adversely interfered with, special reports made by the correspondents of the *Gazette* resident in the several cities of the Dominion, and a variety of individual sources.

Features of the Present Winter Season.

The reports of the National Meteorological Observatory as to the nature and extent of the climatic conditions which were the cause of the unusual developments referred to show that the present winter season, though beginning on the whole no earlier than usual, was characterized from the first by exceptionally cold weather and by the accumulation of an exceptional depth of snow. Prior to the opening of the New Year, no very material interruption to

industry had ensued, though a heavy storm occurred in Ontario during the second week in December, which, being followed in some localities by rain and heavy frost in turn, made a bed of ice and frozen snow, which subsequently prevented to a considerable degree the usual subsidence of snow. It was not, however, until the second week of January that a series of heavy snow-falls followed by drifting storms began to play an unusual part in interrupting the normal progress of industry. Before the close of the month these conditions had developed, especially in western Ontario, to such a degree as to cause the greatest inconvenience and loss, owing chiefly to the delayed, and in many cases completely interrupted, transportation. These conditions were extended into February, during the opening week of which month a number of severe storms were reported, reaching their climax in a storm which occurred about the middle of the month, and which was general throughout Canada, though the maritime provinces, Ontario and Manitoba were chiefly affected. Again in the closing week of the month severe storms occurring on or about the 25th and the 29th, reproduced many of the worst features which had characterized the preceding period of blockade. Though an unusual degree of cold was almost continuous throughout the two months, a few thaws which intervened, by flooding the railway tracks, were of an injurious effect when the recurrence of the cold weather froze the water on the rails. Moreover, the thickness of the ice in many localities, more particularly in the Detroit and Fraser rivers and in the Straits of Northumberland, was a feature which seriously interfered with transportation, and in many other ways affected the industrial situation.

The Unusual Accumulation of Snow.

During the month of January the snow-fall was one of the heaviest on record, several points in Ontario reporting a fall of from sixteen to fifty inches. At Welland, a fall of sixty inches was reported; London

reported forty-two inches; Paris thirty-six inches; Gravenhurst, thirty-four inches; Stratford, thirty-three inches; Wingham, twenty-six inches; Toronto, eighteen inches; Peterborough, twenty-seven inches, and Port Hope, twenty-four inches. In eastern Ontario, though several localities had heavy falls, the general average was lighter. In Quebec the average was placed at twenty-eight inches; in the maritime provinces up to thirty inches. In many cases all or nearly all of this remained on the ground, so that when the snowfall during February and the earlier months is added to the returns quoted above a very exceptional depth is indicated. The county of Grey, for example, up to the middle of February, reported the heaviest aggregate snowfall, having local instances of one hundred and six, one hundred and eleven and one hundred and fifty-eight inches. Bruce county stood second with one hundred and twenty-three inches at Saugeen, eighty at Point Clair, seventy-five at Wiarton. Muskoka reported one hundred and five inches at Beatrice, one hundred and eighteen at Bala, and ninety-nine at Gravenhurst. On the central plateau lying between Lakes Erie and Huron, which ranges from 1,000 to 1,800 feet above the sea level, an average depth from thirty to fifty inches is reported. On the shores of Lakes Erie and Ontario the depth is estimated at sixteen inches. The unusual nature, of the season is further shown by the fact that in the closing week of February last year wagons in the southern district of the province had replaced sleighs, while in the higher portions of the peninsula the quantity of snow remaining was sufficient to furnish only fair sleighing.

The wind storms were almost invariably attended, owing to the abundance of snow upon the ground, with injurious consequences.

The Exceptional Cold.

It should not be inferred from the above returns as to the depth of snow that the precipitation of moisture during the pre-

sent winter has been above the average; the contrary was the case in several localities and in the province of Ontario as a whole. The unusual depth of snow is to be attributed rather to the fact that the temperature throughout Ontario ranged from five to twelve degrees below the average, and in Quebec from one to five, thus preventing the ordinary process of subsidence to go on. In more detail, the temperature during January was below the average over the entire region from Lake Superior to the maritime provinces, more particularly in the Georgian Bay district, the lower lake region and the Ottawa and Upper St. Lawrence valleys. Westward from Lake Superior, including British Columbia, a higher temperature than normal was reported. Up to the middle of February the records of the Meteorological Observatory showed that the weather was colder than in any similar period recorded for Toronto during the past 74 years, excepting the period from February 4 to 19, 1875, and the same time in February, 1885. The mean temperature at Toronto up to and including February 17 was twelve degrees lower than the average of sixty years.

The General Results.

The general result of the weather conditions thus briefly outlined upon the social and industrial life of the community was of the most widespread nature. The situation from both of these points of view, it may be stated, before proceeding to fuller investigation as below, was one primarily of interrupted railway transportation and of the results which immediately followed the blockade of railway traffic the shortage in the coal supply was by far the most serious in its consequences.

Effect Upon Social Conditions.

On social conditions generally the effects of the snow blockade were of a most varied character. The heavy snowfall was a matter which directly concerned the personal convenience of nearly every resident of the localities affected, and the expendi-

ture for the removal of snow, borne by municipalities and by private individuals, was heavy.* Moreover, considerable damage to property at several points resulted through the heavy weight of snow causing buildings to collapse, a leading example of this being the fall of the Canadian Pacific Railway Company's new blacksmith shop at Montreal, which was stated to entail a loss of \$15,000. Similarly, the unusually low temperature caused much inconvenience and expense of a personal nature, through the bursting of pipes in houses, increased coal consumption, increased expense for clothing, and sufferings from frost-bites and exposure. The icy condition of the roads and sidewalks was also responsible for a large number of accidents. On the poor of the community these conditions fell with exceptional severity.

There were, however, in addition to the above circumstances, a long list of difficulties and inconveniences to the community as a whole, which may be traced indirectly to the weather through the blockade of transportation which followed. Of these undoubtedly the most serious in its effects was the shortage of the coal supply, which occurring at a time when the consumption of fuel, owing to the unusual cold, had been considerably enhanced, might easily have been accompanied by the most serious consequences. As it was the manufacturing industry rather than private individuals suffered more directly from this cause. There were instances, however, in which the schools had to be closed and church services and other public meetings postponed on account of an insufficiency

of coal to heat public buildings. Even hospitals in some localities, as at Galt, Ont., were reduced to severe straits for fuel. There were also several cases, as for example at Trenton, Tilsonburg and Wiarton, where the non-receipt of coal by electric light companies left municipalities in total darkness for varying periods, the scarcity of coal oil, which was reported from several points, sometimes intensifying these conditions. On the whole, however, the price of coal for private consumption remained stationary, though there were a few local instances of a slight advance as at St. John, St. Hyacinthe and Montreal.

Other staple commodities of consumption were also rendered extremely scarce in certain localities through the irregular deliveries of the railways with the result of enhancing the general cost of living, more particularly in the way of causing higher prices for meat and eggs. The transportation blockade was also responsible for a great deal of personal inconvenience and suffering among the travelling public, and the non-delivery of mails was a feature which affected every one.* Several important meetings were delayed owing to the inability of delegates to be present on time. At Brockville, the spring assizes could not be held on the day appointed owing to delayed passenger service. As minor examples of the extent to which social conditions were affected, the increased profits of the country hotels in some localities through the boarding of delayed passengers on the railways and the loss to livery stable keepers through the trying nature of the roads on their horses, may be mentioned.

In the following paragraph the effects of the blockade on the several leading industries of the country are briefly indicated.

Effects upon the Industries.

Effects on Agriculture.

Farmers throughout the districts affected by the heavy snowfall have been seriously

*In Montreal, for example, the annual civic expenditure for snow removal each year approaches \$100,000, the one-half of which is paid by the city and the rest by the Montreal Street Railway. The average cost of this work each year is more than \$1,000 to the inch of snowfall. The snowfall this season amounts to 93.8 inches, according to the records kept by McGill University. The cost of snow removal up to the closing week of February is \$98,500. Last year the amount expended for this purpose was \$94,336 and in the previous year \$101,580. In the season of 1900-01 the cost of removal was \$118,859 and the snow fall was \$126,384, and the snow fall 142 inches

*For a time the mails between London and St. Thomas, a distance of 12 miles, were despatched via Windsor, involving a distance travelled of 220 miles.

inconvenienced through inability to reach their market towns with regularity over the drifted roads, more particularly in view of the stimulus imparted to the marketing of farm produce by the high price ruling of wheat, other grains, butter and eggs. The inability to ship live stock similarly caused considerable loss. The work of cutting and marketing cordwood, which in many cases constitutes a leading source of employment in the country districts during the winter months, was also rendered exceptionally difficult. Several cases of suffering from exposure were reported and in the Niagara peninsula, peach and other orchards, it is feared, may have suffered somewhat from the exceptional cold. In other parts of the country the lowness of water in wells and springs has been a cause of much inconvenience, though this was relieved in the province of Quebec by a rainstorm which occurred on February 22. An unusual number of injuries was reported from farmers attempting to haul loads along the icy roads.

Effects on Fishing.—The heavy storms, severe cold and unusual accumulations of ice rendered the present winter season one of extreme difficulty for those engaged in the fisheries on the Atlantic coast. Great damage to gear as well as small catches were the result in many localities, and the instances of suffering and accidents among fishermen have been high. The industry has also been affected by the blockade on the railways, several car-loads of fish, particularly at Canso, N.S., being unable to reach the market except after prolonged delays. Similar conditions prevailed on the great lakes, where the high price of bait was an added feature. The result is shown in a general stiffening of the price of fish and in some local instances in scarcity in supply. By way of an offset to the effects of the weather the government sanctioned a ten days' extension of the season for smelt fishing in the maritime provinces, prolonging it in this way until February 25.

Effects on Lumbering.—The unusual depth of snow during the present winter has severely hampered the lumbering industry, with the result that in certain districts the cut will show a considerable diminution from last year. The camps along the streams tributary to the Ottawa river have been the chief sufferers in this respect. Conditions on the limits in Quebec and the maritime provinces show less deviation from the normal, the chief complaint in the former province arising out of the low water in the streams on which several pulp mills depend for power. In British Columbia snowstorms also interfered considerably with logging operations. The general effect in Ontario was not only to impede the men in the actual work of cutting but to render the breaking of roads for the hauling of the logs to skidways exceptionally difficult. In a few cases the camps had already, in the closing week of February, broken up for the season, thus shortening the period of activity by from two to three weeks. The expenses of operating, moreover, to berth-holders have been exceptionally heavy, many having been required to increase their staffs of men, and in some instances to double the number of horses employed on the limits. On the employees the cold weather and deep snow have been very trying, with the result that the list of serious accidents, through exposure and in handling the logs, is estimated to have reached the highest record in several years. The deep snow, however, is expected to ensure a good flow of water in the streams on the opening of spring, and thus diminish the losses from timber being hung up in the woods, which was a common complaint in the industry during the spring of 1903.

Effects on Mining.—The unusual depth of snow about the mouth of coal pits caused considerable inconvenience and loss of time to the collieries in Nova Scotia. The interrupted railway service also reacted very immediately and injuriously upon coal-mining. In Inverness county particularly

the collieries were reported to have suffered from this cause, the Inverness and Richmond Railway being a new road, and reported as being as yet not fully supplied with properly placed snow dykes. The Portland colliery was reported as idle for a time owing to the want of cars. The freezing of the reservoir of No. 2 colliery at New Aberdeen closed the mine for some days. Metalliferous mining operations in Ontario and Quebec were impeded somewhat by the snow, though the chief mining sections, situated in new Ontario, were little inconvenienced. In British Columbia what inconvenience was experienced was largely the result of the delayed railway traffic.

Effects on Manufacturing.—The manufacturing industry suffered chiefly in two directions from the snow blockade: in the first place from the non-arrival of coal and raw material, and secondly from the inability of the railways to market the product of the factories. Of these inconveniences, the interruption of the coal supply was undoubtedly the leading cause of loss and inconvenience. Thus, to quote one or two typical instances, at Woodstock the Canadian Furniture Manufacturing Co., Limited, were compelled to close down for two weeks owing to the coal shortage, throwing 300 employees out of work, at a loss to them of between \$4,000 and \$5,000 in wages. In the same locality, the D. W. Karn Co. had, for the same reason, to close down for practically one month, affecting 100 workmen, and though the firm succeeded in borrowing two cars of coal, the supply was only sufficient to keep the factory warm, but not to operate the plant. The result was that, though the firm kept a number of men at work, their work did not pay in the same proportion as if the whole factory was in operation. The company reported nine cars of coal as on the way for over a month before any had been received. As above stated, these are to be regarded as only typical instances of conditions existing in most of the manufacturing centres in western Ontario, the situation at St. Thomas, Ingersoll, Brantford,

Guelph, Berlin, Galt and Tilsonburg, and many other points, differing, according to reports received by the department, only in details from that referred to above. The non-arrival of raw material was also a potent factor of inconvenience; the shortage in pig iron, for example, caused the shutting down of an important industry at Brantford for a number of days. An example which illustrates how far-reaching delays of this kind sometimes were in their effects is afforded by the general idleness of coopers from their inability to obtain a supply of staves. This, in turn, caused a shortage of barrels, to the serious inconvenience of millers, fruit exporters and others. The shortage in the supply of staves, however, it should be added, was caused as much by the closing down of stave factories on account of the bad weather as by the failure of the railways to deliver shipments. The lack of cars for the moving of the finished product also, in many cases, materially lessened sales, as well as entailing much additional cost for storing manufactures, all available floor space in many factories being utilized in this way, often to the extent of interfering with the process of manufacture. There were also instances, as in the case of a foundry and machine shop in Chatham, where the unusual severity of the weather caused a reduction in the working time with corresponding diminution in wages. In other cases the bursting of pipes from the frost was the cause of delay. The accumulation of ice and frazil, by interfering with the water supply, both for power and for boiler supply, was still another factor, notably among lumber and pulp mills, which are largely run by water power, all combining to create a situation of peculiar difficulty throughout the industry.

Effects on transportation.—The interference of the weather with the transportation industry constituted the most serious element in the entire industrial situation, and it would be difficult to overstate the embarrassment and loss entailed to the different companies operating railways in

the districts that were chiefly affected. There was scarcely a line throughout western Ontario on which blockades were not of frequent occurrence. In some cases branch lines were left unopened for several days at a time, as storm followed storm and completely undid the work of clearing the tracks. The entire result was an enormous increase in the working expenses of the railways and decrease in the revenue. The following systematized statement in regard to the leading sources of these losses may serve to indicate their possible extent:—

I. The expense of operating snow ploughs.

II. The wages of the extra gangs of men employed as snow shovellers. To this must be added the increased wages for detention and overtime of regular train crews.

III. Expenditure for the extra coal needed on account of the effect of the cold weather on steaming for propelling trains, especially in frequent cases where double-heads were required. In this connection, as illustrating the involved character of the whole situation, it may be mentioned that the railways themselves sometimes suffered from the lack of coal which resulted from the interruption to their own operations.

IV. Expenditure connected with the boarding and maintenance of passengers delayed by the blockade.

V. The loss in receipts, through inability to transport freight and passengers, the number of stalled cars reaching sometimes into the thousands.

VI. The heavy loss entailed by the exceptional strain placed on motive power and rolling stock.

VII. The increased number of accidents directly attributable to frozen tracks and other results of the weather, amongst which frozen switches and semaphores and the interruption to telegraph service may be mentioned.

Though water transportation was generally at a standstill, the heavy accumulation

of ice in the Detroit river had a far-reaching effect, owing to the interruption caused thereby to the car service between Detroit and Windsor. Communication with Prince Edward Island was also interrupted by drift ice in the Strait of Northumberland, and at St. John, N.B., delayed sailings of sea-going vessels were reported as a result of the non-arrival of freights over the Canadian Pacific and Intercolonial Railways. The steamship service in the Fraser River, B.C., was also interfered with, and the towns along the river suffered in consequence.

As showing in concrete form the result of these and other conditions upon the railway companies, it may be stated that for the last nine days of January the gross earnings of the Grand Trunk Railway Company were reported to have showed a decrease of \$221,742 over the same period of last year; the Canadian Pacific Railway Company's earnings during the same period a decrease of \$142,000, and a decrease of \$251,000 for the entire month of January. In this connection, however, the exceptionally busy conditions prevailing at this time last year on account of the heavy movement of grain and the rush of coal shipments following the conclusion of the strike in Pennsylvania, as well as the exceptional activity of general commerce, must be taken into account, whereas, apart from the weather conditions, the general movement of freight is less active during the present year, the farmers showing a tendency to hold their grain, and the general activity of industry being scarcely as great.

Effect upon electric and street railway companies.—While dealing with the transportation phase of the subject special mention may be made of the effect of the heavy snow accumulation upon the operation of electric and street railway lines. The electric lines which run through the country districts were particularly affected, though these are comparatively speaking, few in Canada. From the cities reports were uniformly of impeded operations, amounting in some

ploughs running nearly every night, in order that the early morning cars might make their schedules. The company, however, reports little interference with general traffic, though operating expenses were materially increased. Freight traffic from the congestion of other lines was somewhat curtailed. Repairs expenses owing to the effect of the extreme weather on cars and motive power increased twenty per cent. It is expected that the repairing of the road-bed on account of the great depth of frost will entail more extra expense when spring opens.

A company operating in Western Ontario reports complete demoralization owing to the heavy snowfall and storms of sleet and rain, the lines being completely blocked in spite of the large expenditure for snow removal. Embarrassment was also experienced owing to the lack of coal following the blockade on the railways. On the whole a loss of \$2,000 was anticipated.

Another street railway company in Western Ontario reported an expenditure of \$739 up to February 27 in the keeping of the company's tracks clear of snow and ice. For the whole winter it is thought that the expenditure will aggregate from \$850 to \$900 on the five and a half miles operated by the company. The company pays fifteen cents per hour for labour and \$3.25 per day of ten hours for a man and team. One of the company's lines for the first time in its history was blocked for an entire week. Loss of receipts on account of the weather are placed at \$600. In normal conditions the company carries on an average of 50,000 passengers per month. In January only 33,114 were carried and for February the record was expected to be still lower.

Still another electric company of the same section of the country states that during January it was practically impossible to keep the road open, especially in the second half of the month, when the shortage of coal owing to the delayed traffic on

the steam railways caused a complete tie up of the situation, which had not been relieved on February 23. The wages paid for clearing snow by this company were higher in the aggregate than those paid for operating the cars, and the coal consumption from December 1 up to the date on which the road was obliged to close was eighty per cent higher than last year.

In *London*, during January and the first half of February, the schedules of the street railway company were seriously affected, sion for upward of ten hours. The effect an entire blockade occurring on one occasion upon employment of labour was not very material, the pay rolls of the company showing an increase for January of only twelve per cent.

The *Sandwich, Windsor and Amherstburg Railway* reports the most severe winter experienced since the road was built, in 1890. The extra expenses involved in additional labour and overtime, together with the loss of revenue are placed at about \$2,000.

In *Sarnia* the street railway company has been able to keep its line open though at considerable expense. About \$500 was expended on this item up to February 23. Receipts of the company were also adversely affected.

The *Port Arthur Electric Railway*, operated by the municipality, reports an expense of only \$1 per day during the present winter for snow removal, the snow fall not having been excessive up to February 24, and the work in question relating only to the keeping of crossings and switches clear. The system has not been inconvenienced, and no trips have been lost. The company uses a snow plough attached to the front of the regular cars, which has been found this winter to keep the track clear without additional expense.

The *Winnipeg Street Railway Company* reports little trouble and extra expense this winter as compared with previous years.

Effect upon Trade and Commerce.

A marked result of the unfavourable weather was a widespread interference with the normal course of trade and commerce throughout the Dominion, amounting in certain branches and localities to acute, though temporary, depression.* As in the case of the industries above referred to, these conditions have been confined for the most part to the western peninsula of the province of Ontario, though a marked falling off in the January returns of exports for the whole of Canada, presented in the latest monthly statement of the Department of Customs, is attributed to delays caused by the weather in forwarding shipments of goods intended for the foreign market. It was, however, upon retail trade in the towns and cities of the district named that the severest effects of the weather blockade fell, dealers reporting from many localities a considerable diminution in ordinary sales, through the inability of their rural customers to reach their markets owing to the difficult or impassable state of the country roads. Supplies of goods from the wholesale centres were also very irregularly received on account of the freight blockade, the railway companies for a time being able to attend only to shipments of live stock and perishable goods already on the cars, though they later strongly advised against the forwarding of this class of freight under existing conditions on account of the losses, particularly on fruit consignments from the United States, occurring from the cold weather. Many classes of retailers also suffered from the fact that coal shipments, in view of the distress prevailing in certain localities, were given for a time the preference over other freight. The general result was that retailers, when unable to obtain supplies by borrowing from other local merchants were obliged, in spite of the additional expense involved, to order shipments by express, several instances being recorded of staple

products, such as sugar, tobacco, oatmeal, vegetables, &c., going forward in this manner owing to the famine prevailing in these commodities at certain points. Coal dealers, of course, prior to the blockade on the railways, profited by the heavy consumption of fuel. The delayed mail service was also an interruption to business, particularly in the case of the large departmental stores in the cities, which carry on a large mail order business. Among the wholesale houses the same conditions were the cause of loss, orders from retailers, under the circumstances, showing a tendency to fall off. There was, moreover, the additional difficulty to contend with, that the movements of commercial travellers were seriously interfered with and in some cases wholly interrupted by the conditions prevailing on the railways. It was considered a fortunate circumstance, however, that the blockade occurred at a time of year when business is comparatively slack except for the shipment of spring goods, though the fact that consignments of these goods to the wholesalers themselves were on an average two weeks overdue, owing to delays attending their being forwarded from their ports of entry, did not permit, with some firms, even this class of order being attended to. In the closing week of February, however, the prospect for a speedy amelioration of the situation was bright, and no serious or permanent impairment to the general market throughout Canada was thought likely to ensue, the fact that an extremely trying embarrassment should produce so little comparative confusion or distress being held to demonstrate the exceptional soundness in the general trade situation.

Other Effects.

Certain businesses and classes of employment which did not lend themselves readily to classification under any of the above headings, but which, on account of the special nature of the conditions prevailing therein, were thought to demand more than a passing reference, were the following:—

* See also the article on trade and revenue returns for the month of February in the present issue of the *Gazette*.

Owing to the almost complete demoralization of the railway freight service, the *express companies* at several points had an exceptionally busy period of employment, shippers having in many cases of urgency, as above stated, been forced to forward merchandise by express that under ordinary circumstances would have been sent by freight. This was particularly the case for points on the main lines of the railways, which the companies used every endeavour to keep open for passenger trains, and along which in consequence the express service was comparatively unimpeded. With regard to the branch lines, the express companies as well as the railway freight offices had to refuse large quantities of perishable goods.

The country *newspapers* were amongst those which suffered very considerably from the effects of the snow blockade. Many of these in western Ontario depend upon the daily press of the larger cities for certain classes of news and the failure of the mails to reach them regularly was attended with much embarrassment, leading to the use of the telephone and telegraph systems for the news supply at a considerable increased expense to the publishers. In addition to this circumstance, the supply of paper from the mills was rendered very precarious by the weather conditions. There were of course the delays common to all shippers from the blockade of transportation. Paper shipments, however, were still further delayed by the fact that the mills, which are largely operated by water-power, had their output seriously curtailed by the formation of ice and frazil in the streams and by the depressing effect of the deep snow on the supply of raw materials, the cutting and shipment of pulp wood having been suspended in some localities and several of the mills in consequence being closed down completely. The stock of paper was thus seriously reduced, and the reduction occurring at a time when the demand for news print was intensified on account of the increase in newspaper circulation following the outbreak of the war

between Russia and Japan, was particularly embarrassing. The result was an advance in price, while a number of the smaller newspapers of the province made their appearance in an irregular form or reduced size, owing to the inability of publishers to secure their regular stocks.

The work of *ice cutting*, which during the winter months constitutes an important source of employment throughout Canada, was seriously impeded during February by the weather conditions which prevailed. The ice was in many localities too thick to be conveniently handled and an unusual amount of snow had to be removed before the work of sawing and storing was possible. An unusual accumulation of *frazil* also interfered with the work. Moreover, the extremely cold weather made the employment very trying upon labour. As a result ice harvest operations at the close of the month of February was in a much less advanced stage than in ordinary years.

The *telegraph and telephone companies* are further instances of concerns which were hampered to an unusual degree by the weather conditions of the present season. The damage to poles and lines was severe throughout Canada and the work of making repairs, owing to the impassable nature of the country roads, was especially difficult. At London, Ont., the local manager of the Bell Telephone Company was reported to have sent to Montreal for snowshoes for the use of linemen in that district.

General Summary of Effects upon Conditions of Employment.

In the absence of any absolute return in regard to the total number of men either thrown out of employment in certain branches, or taken on in other branches, as the direct or indirect result of the blockade, and of any inclusive statement of the losses occasioned to the industries that were particularly affected, it is impossible to estimate with accuracy the extent to which industry as a whole has suffered. There is no doubt, however, that there has been a heavy loss to several of the largest em-

ployers of labour in the country and the net result can hardly be other than injurious.

There have been several cases in which employees have directly and immediately shared in the adverse conditions which have confronted their employers. These chiefly occurred in the manufacturing industry, with the shutting down of factories following the non-delivery of coal or raw material. The fishing, lumbering and agricultural industries have been affected in a less degree. Among the trades the out-of-door branches suffered considerably, the building trades being brought almost to a standstill. Ice-cutting operations also proceeded under great difficulty; bakers and confectioners were affected by the scarcity and high price of eggs; longshoremen, through the non-arrival of steamships, were rendered idle; and carters in nearly all of the principal towns and cities were thrown out of employment through the non-receipt of freights. As a further instance of the ramifying nature of the blockade in this connection may be cited the closing down of several pork-packing houses and consequent laying-off of employees through the non-arrival of live stock over the railways. Moreover, a number of other trades have been affected indirectly, and workpeople, in common with other classes in the community, have suffered, as pointed out above, from the scarcity of coal and other fuel in their homes and public buildings.

On the other hand, there have been many instances in which conditions of employment were greatly benefited by the extra work rendered necessary. Appropriations for the purpose of snow removals by municipalities have been in some cases the heaviest on record, and the railway and street railway companies, in the work of keeping their tracks clear, have given employment in the aggregate to thousands of extra men, including a considerable number of recently-arrived immigrants. Wages, it may be added, were exceptionally high for this class of employment, owing to the difficulty of obtaining sufficient numbers

of men at short notice. Plumbers may also be mentioned as a class that have been exceptionally busy during the past two months, owing to the damage to water and gas pipes done by the frost. It is significant, also, in this connection that from the majority of the larger towns and cities reports regarding poor relief have been almost uniformly to the effect that in spite of the severity of the weather the number of appeals for assistance to charitable institutions, public and private, have been fewer than in several years. At the same time, even in several of the occupations which might seem at a first glance to have benefited through much additional employment, workpeople have not found the snow blockade a source of unmixed profit. Railway companies, for example, though employing, as stated, thousands of extra hands in keeping their tracks clear, have been forced in some cases to compensate for the additional outlay involved in this work by temporary dismissals in other branches, as for example at St. Thomas, Ont., where 45 regular employees in the shops of the Michigan Central Railway were thrown out of work in an effort by the company to meet the heavy expenditures entailed by the snow blockade.

A feature that might be mentioned is the hardship entailed in many occupations in continuing work during the severe cold. All out-of-door employments have been affected by this circumstance, but the degree to which railway employees, farmers and lumbermen suffered is worthy of special reference. With regard to the former, the most pleasing circumstances attending the blockaded traffic on the railways was the universal satisfaction of the public with the work of the train crews and other officers operating the lines under conditions which called, in many cases, for devotion to duty under the most trying conditions, the appreciation and sympathy of the public being shown on several occasions by voluntary testimonials presented to the officers and employees of the companies for their efforts on behalf of the safety and comfort of the travelling public.

APPRENTICESHIP ARTICLES OF EMPLOYERS' ASSOCIATION OF TORONTO.

THE Employers' Association of Toronto have recently adopted a form of apprenticeship articles for the use of the manufacturers of Toronto. The Association claims that this course has been adopted from the fact that manufacturers have been impressed with the desirability of having apprentices regularly bound, not only for the sake of protection to the employer, but for the proper education of the apprentice as well. The principle of binding apprentices has been practiced in Great Britain for a long time, and has been used to a certain extent in Canada.*

The Association desires to have these articles generally introduced, that they may have the effect of bringing forth more efficient workmen to meet the continued growing demand for skilled labour. It is maintained that Canadian manufacturers in the past have suffered very much through the custom which permits employees to wander from shop to shop as they feel inclined, which custom is alleged, moreover, to result in badly trained and incompetent journeymen.

In reply to a request from the Department of Labour the Employers' Association has forwarded to the department a copy of the articles of apprenticeship and a brief statement of the reason why certain articles have been inserted in the indenture.

Blank Form of Indenture.

The following is a copy of the blank form of the indenture :—

This indenture made in duplicate this..... day of in the year of our Lord one thousand nine hundred and.....

Between of the of in the County of of the first part, his now of the age of years..... of the second part and hereinafter called 'the said Company,' of the third part.

Witnesseth, that he, the said part of the first part, with the consent of his said.....testified

by his executing these presents, doth hereby put, place and bind him, the said to the said Company to learn the art and trade of for the term of years, to be computed from the day of 19..... and fully to be complete and ended

And the said party of the first part doth hereby covenant, promise and agree to and with the said Company, that during the said term..... years, the said shall well and faithfully serve the said Company, their secrets keep, their lawful commands and those of their foreman and other superior officers, at all times readily and cheerfully obey, and shall give and devote to the said Company his whole time and labour, and that he will not during the said term join or become a member of any society that claims or attempts to control his actions or his labours in any way, or other Company, Association or Society (except the militia) which might at any time during the said term call for his absence from his regular employment in the service of the said Company.

And that he will do no damage to the Company nor suffer any to be done by others, and if any intended damage come to the knowledge of the said then in that case he will forthwith give to the Company reasonable notice thereof; and that he will not waste the goods of the Company nor lend them unlawfully to any one.

And the said party of the first part doth hereby covenant, promise and agree to and with the said Company that in the event of the said..... being dismissed from the services of the said Company, at any time during the said term, for want of good and faithful attention to his duties, or for divulging the secrets of the said Company, or for not readily and cheerfully obeying the lawful commands of the said Company or of their foreman or other superior officers, or for any reasonable or justifiable cause whatsoever, he, the said party of the first part, will, on demand made therefor, pay to the said Company as liquidated damages suffered by the said Company by reason of such dismissal, one of the following sums, to be determined by the length of time the said shall have been in the employ of the said Company, that is to say: If he shall have been in the employ of the said Company for one year or less, the sum of twenty-five dollars. If over one year and less than two years, the sum of fifty dollars. If over two years and less than three years, the sum of seventy-five dollars. If over three years and less than four years the sum of one hundred dollars. If over four years and less than five years, the sum of one hundred and twenty-five dollars.

And if the said shall desert, or without permission of the said Company, leave the service thereof during the said term, he, the said party of the first part, doth hereby further covenant, promise and agree to and with the said Company that he, the said party of the first part, for such desertion or leaving the said service, will pay to the said Company as liquidated damages suffered by the said Company, one of the following sums, to be determined by the length of time the said shall have been in the employ of the said Company, that is to say: If he shall desert or leave during the first year of his employment, the sum of twenty-five dollars. If during the second year of such employment, the sum

*For special article on legislation affecting apprentices in Canada see *Labour Gazette*, vol. II p. 404,470, 526.

of fifty dollars. If during the third year of such employment, the sum of seventy-five dollars. If during the fourth year of such employment, the sum of one hundred dollars, and if during the fifth year of such employment, the sum of one hundred and twenty-five dollars.

And the said Company agrees to take the said as an apprentice and gives him such opportunities for learning the said art and trade as may be ascertained by the said Company, their foreman or servants, to be suited to the capacity of the said and according to the requirements of the said Company in their business.

It is hereby agreed that in the event of the said Company, at any time or times during the said term, requiring the services of the said in any department or branch of their business other than that in which the art and trade of and required, it shall be lawful and competent for the said Company, their foreman or other superior officers, to assign and appoint, for the time being, the said for the performance of such work as may be required in such other department or branch of their business. And it is hereby, covenanted with the said Company, that he, the said will well and faithfully perform such work.

And the said Company hereby covenant and agree to pay to the said for faithful services during the term above named the following sums, to be paid on their regular pay-days, that is to say:—

But it shall be lawful for the said Company to retain \$25 of each year's wages always in hand, as a guarantee, in addition to the covenants hereinafter contained, for good behaviour, and as an indemnity against loss or trouble—such wages so retained to be paid at the end of the said term to the said on the full and faithful performance of his apprenticeship service, but if the said shall be dismissed from his said employment for misconduct, neglect of duty, or any sufficient cause whatsoever, but if the said shall leave or desert his said employment, the said wages of each year so retained shall become forfeited to the said Company, and any wages so forfeited to the said Company shall be deemed a payment pro tanto on the amount which the said party of the first part would be liable to pay the said Company on account of such dismissal from or desertion of employment.

Any misconduct or neglect of duty on the part of the said or any cause whatsoever justifying his dismissal, shall be in the discretion of and determined by the foreman or other superior officer of the said Company, whose determination in the matter shall be final and exclusive. And the said Company further agrees to pay the said a bonus of dollars after the full and faithful completion of his apprenticeship to the entire satisfaction of the said Company, at the said term.

It is hereby further understood and agreed that nothing herein contained shall bind the said Company to keep the said as an apprentice should he prove insubordinate or inefficient or unsatisfactory in any respect to the said Company, and the said Company shall have full power to discharge the said for any of the above causes. The said discharge to be in writing.

And it is further agreed and understood that if during the first year of the said term it shall appear to the said Company, or foreman, or other superior officer of the said Company, that

the said is unfit physically or or mentally to learn or acquire the said art and trade, it shall be lawful for the said Company to dismiss the said from their employment, but in such case the said party of the first part shall not be called upon to pay any damages to the said Company on account of such dismissal, nor shall the said forfeit any part of his wages to the said Company.

Any time lost by the said during any year of his said apprenticeship, at whatever time and from whatever cause arising, shall be made good to the said Company by the said and the year in which the said time has been lost shall be extended until it is fully made up, and the next succeeding year of the said apprenticeship shall not be deemed to commence until the said lost time shall have been made up in manner aforesaid.

And any time lost by the said during the final year of his employment with the said Company at whatever time or from whatever cause arising shall be made good to the said Company before the said final year's service shall be deemed completed.

The said Company may at their discretion increase the wages of the party of the second part without otherwise affecting this agreement.

In witness thereof, the said parties of the First and Second Parts have hereunto set their hands and seals, and the of the said Company has hereunto set his hand, and caused to be hereunto affixed the corporate seal of the said Company the day and year first written.

Signed, sealed and delivered in the presence of

Explanation of Articles.

The Association states that the form adopted has been made very general in its character, so that it may be used with the amendments that are necessary in every trade, the idea being that the articles, when certified to by the employer as having been duly completed, will serve as a certificate of fitness for the young workman, and enable him to obtain standing as a journeyman or improver.

It will be noticed in the above articles that the company agrees to give to the apprentice such opportunities for learning his art and trade as may be ascertained by the company through its foreman or servants to be suited to his particular capacity and according to the requirements of the company and its business. The Association maintains that in giving the apprentice opportunity for learning the trade that may be best suited to his capacity, it might be difficult, in a trade divided into several departments, to define which

might be immediately suited to the needs of the apprentice, but that it is in the interests of the firm to employ a boy in that department in which he shows the greatest aptitude after a preliminary trial, having regard to his own inclination. In this way it would create in the boy a desire to do his best in acquiring skill in the department in which he would afterwards have to work for his livelihood as a journeyman. As to the possibility that the parent or guardian might require something more explicit in regard to the branch in which the apprentice is to acquire his skill, the Association feels that, as a rule, the parent leaves the boy entirely with the employer to do his best with him, and that as the boy shows adaptability in a particular branch, it is policy to train him along that line. What the parent wants is that the boy should be well trained in that work where he can make the best use of his ability, and that, of necessity, has to be ascertained by the company.

In regard to the clause that at any time during his term, if the services of the apprentice are required in any department or branch of business other than that to which he was strictly apprenticed, it would be lawful for the company to transfer him according to the requirements of their business. The Association maintains that this is inserted for the purpose of giving an apprentice a general idea of the requirements in the trade outside of his own department. It might be that in the department in which he is apprenticed there might be no work for apprentices to do at some particular period, and in order that he might not be idle he could be transferred into some other department of the shop where there would be more work and an additional chance to learn other branches of the trade. It would be difficult to find work always in a special department for five years, and it would be to apprentice's advantage to learn the business in connection with other departments.

Re Payment of Apprentices.

The clauses for payment of apprentices was left blank so that it might be filled in to suit the convenience of each separate trade, but it was considered that it would be advisable to advance the pay by 50 cents a week for 6 months after the initial sum had been decided on.

The clause authorizing the company to retain \$25 of each year's wages in hand, is inserted, it is alleged, with the view of protecting the employers, to ensure the faithful carrying out of the contract and as a preventive check against unfaithfulness and insubordination.

The bonus clause is one that may be used or omitted by the employer. It was thought wise to insert the provision, and it is recommended by the Association that a bonus should be given as an encouragement for faithful service and efficient work. After careful consideration it is recommended that the best method of giving a bonus would be by a series of certificates which could only be realised on when the articles were fully completed. The certificates might be withheld in any particular year for misconduct or other causes, and in case of default or desertion, or for flagrant acts of disobedience, the certificates might be cancelled. If the boy, however, completed his term in the shop, these certificates which had been awarded would be paid by the firm when his articles would be discharged. It is thought that in this way the apprentice would be very careful to abstain from influences which might be liable to make him forfeit his chance of a bonus, and endeavour to do his duty in a way which would make him a help to his employer.

The Association reports that the apprenticeship articles have already been put in force by a large number of individual firms in the city.

BRITISH COLUMBIA LEGISLATION AFFECTING LABOUR, 1904.

At the close of the legislature of British Columbia, which assembled during the month of December, 1903, and prorogued during February, assent was given to 77 new enactments. Among these were a number of Acts of particular interest to labour.

Legislation Affecting Coal Mines.

In an enactment dealing specifically with coal mines some slight alterations were made in the provisions affecting the acquiring of prospecting licenses for coal or petroleum and the methods of application therefor (1). The terms upon which the Lieutenant Governor in Council may grant a lease to a licensee discovering coal were also modified in certain respects. The clause of the old law requiring security to be given by a mining prospector for any damage that may be caused by his operations in cases where timber licenses relating to the same land have been granted, was done away with and a provision inserted in its place modifying the circumstances under which the security in question is to be given and providing the penalty of cancellation of the right to prospect should the mining prospector refuse to give such security or to compensate for damages which may have already been done before complaint by the timber licensee has been made. The fee for a license to prospect and for renewing such license was raised from \$50 to \$100.

Coal Mines Regulations—Hours of Labour.

Three separate statutes were passed in amendment of the Coal Mines Regulation Act.

A very important addition made to the Act was that providing that no person may be employed under ground in working a mine for more than eight hours in every twenty-four, from bank to bank, 'bank' being defined as meaning pit head or any

surface entrance to a mine. This Act is to come into force on June 1, 1905 (2). This will place coal mining on the same basis as metalliferous mining in regard to hours of labour.

Definitions of Terms.

A second Act was passed for the purpose of defining more precisely the meaning of the words 'Chinaman' and 'Chinese,' when used in the Act. The terms, it is stated, are to be taken as including any person or persons of Chinese race, whether born within the limits of the Chinese empire or its dependencies or not. The status of Chinese nationality, it is further stated, cannot be affected by naturalization.

A third Act, in amendment of the Coal Mines Regulation Act (4), also introduces a number of changes of this nature, the list of terms defined being added to as follows:—'Manager' is to be understood as meaning the chief officer having control and daily supervision of any mine; 'overman' means a person in charge of the underground workings of a mine under the supervision of the manager and next in charge to the manager; 'mine foreman,' 'shift boss' or 'road-man' means a person in charge of a mine or part of a mine next to the foreman. A 'foreman' or 'fire boss' means a competent person to inspect the workings of a mine and see that such are safe before the shift is allowed to enter. A 'shot lighter' is a person appointed to examine the safety of the mine and supervise the using of all explosives in breaking coal. The term 'competent person' means a person holding a certificate of competency for the class of work he is appointed to do.

Distance Dividing Single Shafts.

A clause prohibiting the use of single shafts requires that the two shafts to a mine must be separated by natural strata

(1) An Act to amend the Coal Mines Act.

(2) An Act to amend the Coal Mines Regulation Act.

(4) An Act to amend the Coal Mines Regulations Act.

of not less than ten yards thickness, instead of ten feet, as formerly.

Certificated Managers and Other Officials.

To the clause governing the appointment of manager an addition is made requiring underground workings to be in charge of an overman or shift boss, duly certificated under the Act. Additions are made to other sections of the Act referring to the certification of managers and the penalty for working a mine without this officer in such a way as to make the same conditions apply to overman and shift bosses. The constitution of the board of examiners appointed for granting certificates of competency is also modified, it being added, as to the qualification of candidates for certificates of competency, that a manager must be a British subject at least 25 years of age, and one who has had five years' experience in or about the practical working of a coal mine. A candidate for overman must have had at least five years' experience and a candidate for shift boss at least three years' experience, though the latter two classes need not be British subjects. There are other alterations as to the regulations of examinations by the Minister of Mines and the granting of certificates of competency in certain grades to managers and overmen. Provisions are also made for inquiry, under certain circumstances, into the competency of managers, overmen, shift bosses, shot lighters or coal miners holding certificates under the Act, with a provision added to the clause governing the cancellation of such certificates that no other certificate shall be issued in place thereof except at the discretion of the Minister of Mines.

Powers of Mine Inspectors.

With regard to the powers of inspectors a clause is added requiring inspectors to have a notice posted in a conspicuous place after each visit to the mine showing what portion of the mine has been inspected and the condition found to prevail therein. The inspector is also given power to close a

mine in which causes of danger not provided for by the rules are found to exist.

Additions to the Rules.

A number of important additions and alterations are made in the rules which form part of the Act. The velocity at which air for ventilation may be supplied is now made subject to the approval of the inspector. The rule regarding the inspection of mines in which inflammable gas has been found is repealed and a more stringent one enacted in its place, as is also the case with the rule regulating the use of lamps and lights, an addition being made prohibiting the bringing of tobacco for smoking into a mine and a provision for the better care of safety lamps. Similarly, the rule regulating the use of gunpowder or other explosive or inflammable substance is considerably altered, an addition being made prohibiting the use of explosives in mines in which inflammable gas has been found within a period of three months. A rule for securing the better watering of dusty mines is added. Provisions are added with the idea of more thoroughly securing the competency of coal miners.

Regulation of Immigration.

A new Act (5) to regulate immigration into the province was passed under the provisions of the British North America Act, which allows the provincial legislature to make laws in relation to immigration which are not repugnant to any Act of the Dominion Parliament. The leading clause of the new Act is the prohibition of the immigration into British Columbia of any person who is unable to write out at dictation in the characters of some language of Europe and sign a passage of 50 words in length in a European language. The application of the Act is limited in the case of persons specially designated by the minister or by a certificate in accordance with a stated form. His Majesty's land and sea

(5.) An Act to regulate immigration into British Columbia.

forces; officers and crew of a ship of war of any government; any duly accredited representative to the province under the authority of any government; any person who has been previously resident or domiciled in the Dominion of Canada; wives and children under the age of 18 years accompanying their husbands and fathers; and any person the terms of whose entry into Canada have been fixed; are also exempt. The officers and crew of ordinary vessels, landing during the stay of such vessel in any British Columbia port, are exempted only under special conditions. Any member of crew who does not present himself at a muster ordered by a provincial officer and who, under ordinary circumstances, would be a prohibited immigrant, is, in view of his absence, to be considered as a prohibited immigrant and to have entered the province contrary to the Act. Certain conditions are laid down under which a prohibited immigrant may enter or remain within the province, namely, first, on making a deposit of \$500, and, second, on obtaining, within 30 days after this deposit has been made, of a certificate of exemption. If he departs from the province within this time the deposit is to be returned to him, otherwise it is forfeited, and the immigrant named is to be treated as prohibited and as offending against the Act, though no penalty attaches to the master of the vessel, in this case, from which the immigrant was landed. The penalty for illegal entry is placed at imprisonment of the immigrant for a maximum term of six months and deportation from the province. The imprisonment may cease for the purpose of deportation, or if the offender finds two assured sureties, each in the sum of \$250, for his leaving the province within two weeks. The master from whose ship an illegal entry was made is liable to a penalty not exceeding \$500 for each prohibited immigrant, and any person or corporation in any way assisting in the contravention of the Act is liable to a similar penalty. Details as to the examination of the immigrant on his entry for fraudulent transfers of certificates, &c.,

are added. The master of a vessel must furnish a list of his passengers, specifying to the best of his knowledge the name, nationality, place of shipment and occupation of each passenger. He must also furnish a similar list of his crew if required, and must in every way facilitate the provincial officers in the discharge of their duties. All the members of the provincial police force, together with such others as the Lieutenant Governor may appoint, are specified as the officers to whom the duty of carrying out the Act is intrusted. The Lieutenant Governor is also given power to make regulations with regard to the carrying out of the Act, such regulations to be published in the *British Columbia Gazette* and to be laid before the legislature. An annual return of persons refused admittance into the province must also be made. In cases where penalties are not expressly provided by the Act, offenderh guilty of offences against it are liable to a penalty not exceeding \$200, with the alternative of imprisonment not exceeding three months.

Steam Boiler Inspection.

Some important amendments are made to the Act of 1901 regulating the inspection of steam boilers (6). Under the original Act the work which might be undertaken by a third-class engineer was limited to the taking charge of a steam plant of not more than 250-horse power or of any steam fire engine, provided the engines, in the former case, were not compound engines, though he might act as second or assistant engineer of any steam plant up to 500 horse-power and where simple high pressure was used. This was modified in 1902 by allowing third-class engineers to act as assistants on any steam plant of not more than 500 horse-power, or on any steam plant where simple high pressure engines were used. By the alteration recently effected a third-class engineer is permitted to take charge not only of any simple high pressure

(6) An Act further to amend the steam boilers inspection Act 1901.

steam plant of not more than 250 horse-power, or of any steam fire engine, but also of any compound condensing steam plant up to 150 horse-power, and he is qualified now as well to act as second or assistant engineer on any steam plant where high pressure engines are used, or where a compound condensing steam plant is used up to 500 horse-power.

In the classification of engineers an addition was made in 1902 to the original number of grades, by which 'engineers with service certificates' were added in two subdivisions, namely, series 1 and series 2. These subdivisions are now done away with, and there are a number of alterations made in the provisions relating to this class of engineers. An engineer with a certificate of service is now qualified, when in possession of a certificate of service given without examination, to act as a second or third-class engineer, as if he were in possession of a certificate of competency of a similar grade. The qualifications for a service certificate are as follows:—He must have been in charge of a steam plant (or of a watch) for five years preceding the passage of the Act. For a second-class certificate he must have been in charge of a steam plant or watch where the actual horse-power is not less than 150; for a third-class certificate the horse-power is reduced to 25; for a fourth-class certificate it is simply stated that the applicant must have been in charge of a steam plant of any kind.

Mechanics' Lien Act Amendment.

The addition of a number of sections relating to costs was made to the Mechanics' Lien Act (7). The limit of fees in money or stamps payable to any judge or officer in any action brought to realize a lien is placed at \$1 on every \$100 of the claim up to \$1,000, and this is only payable by persons other than wage-earners. The costs to the plaintiff in any action must not exceed 25 per cent of the amount of judg-

ment, besides actual disbursements. Where the costs are awarded against the plaintiff such costs must not exceed 25 per cent of the claim of the plaintiff besides actual disbursements. Where the less expensive course is not taken by a plaintiff the costs allowed to the solicitor must in no case exceed what would have been incurred had the least expensive course been taken. To the costs of discharging or vacating a lien a reasonable amount of costs for drawing and registering a lien may be allowed, in addition to the costs of an action. Costs not otherwise provided for are left at the discretion of the judge or officer to whom application is made.

Amendments to the Land Act.

Extensive alterations in and addition to existing legislation affecting the disposal of Crown lands were made (8). The former provisions relating to the leasing of lands to manufacturers of pulp and paper were repealed without other regulations being substituted therefor. The timber license system adopted in 1899 was considerably changed, and leases of unpre-empted Crown lands are now to be obtained only by public competition, with strict regulations added as to the establishment of sawmills and the amount of lumber to be sawn. It is not required, however, to obtain a lease in order to cut timber on patented lands. The mode of obtaining special licenses to cut timber, and the staking of claims, were also altered, as well as the provision relating to disputed claims. The area for which special timber licenses for logging may be granted is limited to 640 acres; formerly it was 1,000 acres. New regulations affecting timber royalties and the collection of same by the enforcement of liens or by seizures are also provided for.

A special Act (9) was passed to secure certain pioneer settlers their holdings within

(8) An Act to amend the Land Act.

(9) An Act to secure to certain pioneer settlers within the Esquimalt and Nanaimo Railway Land Belt their surface and under surface rights.

(7) An Act to amend the Mechanics' Lien Act.

the land belt reserved for railway purposes on Vancouver Island in 1873.

New Taxation Regulations.

By a special Act amending the Revenue Tax Act (10), 1901, a penalty of from \$20 to \$100, with the alternative of imprisonment for a period not to exceed six months, or both, may be imposed for the fraudulent evasion of the payment of the revenue tax. A new Assessment Act was also passed, under which income up to \$1,000 or homesteads up to \$500 are held exempt from taxation.

A measure of special importance also in this connection was the Railway Assessment Act (11), under the terms of which railway companies are declared exempt from taxation by municipalities incorporated since February 21, 1895, though held subject to assessment and taxation by the province. An annual report must be made by every railway company to the provincial inspector of revenue, under a penalty of \$50 per day during which delay in transmission continues, showing the claims of the railways to exemptions, and to their selection of any land that may have been granted as track mileage, both within and without the limits of municipalities. All other real property, not occupied in right of way or buildings connected with the operation of the railways, and of lands disposed out of its grants or subsidies. Land held as a right of way by railway companies outside the limits of municipalities incorporated before February 21, 1895, which is occupied in buildings, &c., without such municipalities, together with the personal property, income and rolling stock of the companies, are to be assessed and taxed as real estate at the sum of \$10,000 per mile for the track, such track measurement not to include switches, spurs, sidings, &c., which are to be assessed at the sum of \$3,000 per mile. The terms of the general Assessment Act apply to the collection of taxes imposed. The Act does

not apply to street railways operated by electricity within municipalities, or to railways used exclusively for the carrying of logs and coal. In the terms of the previous Act the assessment of the right of way lands of railways was at \$3,000 per mile throughout.

Other Legislation.

Other Acts of interest to labour passed during the recent session were as follows:—

An *Act to amend the Health Act*, by which clauses are added to the original Act permitting the Provincial Board to appoint a commissioner to investigate into the sanitary condition of any locality and the cause and treatment of any outbreak of contagious disease. There is also added to the duties of municipal health officers the inspection of all logging, lumber, railway and mining camps in their districts with reference to the general sanitary condition of the same, more particularly in relation to their water supply.

The *Midway and Vernon Railway Company's Act*, 1901, is amended by a clause stating that the main line of the railway or a branch thereof must be completed to Kelowna on Okanagan Lake.

An additional expenditure of \$250,000 for the completion of the *New Westminster bridge* across the Fraser river, was authorized in a special statute, in addition to the sum of \$750,000 voted for the same purpose in 1902.

The *Horticultural Board Act* of the province is amended by the addition of clauses requiring a license to be taken out before the business of selling fruit trees or nursery stock within the province may be engaged in. The Provincial Board of Horticulture is given power to grant these licenses, and a bond of indemnity must be given by persons desiring to engage in the business, with the intention of providing against the importation of infected or inferior fruit trees or nursery stock. The license is to be for one year, and is to be issued at a fee of \$5, subject to cancellation by the Board of Horticulture for violations of the provisions under which it was granted.

(10) An Act to amend the Revenue Tax Act 1901.

(11) An Act to assess, levy and collect taxes on the property of railway companies.

A maximum fine of \$50 is imposed for selling fruit trees or nursery stock without a license. Dealings in green-house plants, conifers, bulbs, shade and ornamental trees, and herbaceous bedding plants and perennials are declared exempt from these provisions.

An act was passed enabling the city of Vancouver to expropriate the bed and foreshore of False Creek for the purpose of reclaiming the same, and constructing streets, docks, harbours, &c., thereon. Provision was also made for the arbitration of cases of disputed valuation.

The incorporation of additional societies under the *Agricultural and Horticultural Societies Act* without the consent of the Lieutenant Governor in Council is forbidden by a special Act. The new Act also sets a limit upon the amount of public aid which may be granted to such societies, providing that it must in no year exceed

double the amount of the subscriptions paid in by members.

Workmen's Compensation Rules.

Under date of February 16, a series of rules were issued by the Lieutenant Governor in Council of British Columbia, to take effect under the Workmen's Compensation Act of 1902, with reference to any matter or proceeding for which regulations may be made under the Act, and generally for the purpose of carrying the Act into effect. The rules are largely of a technical nature, and refer in great part to the procedure which must be followed by parties in the arbitration of matters in dispute. The application for arbitration proceedings, the appointment of an arbitrator, the fixing of a day and place for the arbitration proceedings during the course of the arbitration, the apportionment of costs, the enforcement of the award, and various matters of a similar nature, are dealt with at length.

MANITOBA LEGISLATION AFFECTING LABOUR, 1904.—THE FACTORIES ACT AMENDMENT.

THE Provincial Legislature of Manitoba, which opened on January 7, prorogued during the second week of February. Among the various Bills assented to was 'An Act to amend the Manitoba Factories Act,' which is of special interest to employers and employees. The various changes introduced by this legislation in the law as previously existing* are briefly as follows:—

Definition of the term 'Factory'.

Under the previous Act, the term factory was defined as 'any building, workshop, structure or premises,' falling within certain limits specified in an appended schedule, provided two or more persons were employed therein. The present amendment requires five or more persons

to be employed before such a building may be considered a factory within the meaning of the law.

Under a clause further defining certain exemptions from provisions of the Act, in the case of buildings where steam, water or other mechanical power is not used in manufacturing, the term 'factory' is now limited to places of this class where young girls are employed at home, whereas previously it referred also to buildings in which more than four persons were employed.

Definition of the term 'Child'.

The term 'child,' under the provisions of the original Act, was stated to mean a person under the age of 16 years. It now is held to mean a male person under the age of 14 years or a female person under

* Revised Statutes Manitoba 1902, chapter 62.

the age of 15 years. 'Young girl,' similarly, was formerly understood as indicating an age of 16 years or upwards and under the age of 18 years. It is now understood as meaning 14 years or upwards and under the age of 18.

Hours of Labour,

An important change is also made in the regulations governing the number of hours for which young girls and women may be employed in factories. Previously these were limited to eight in any one day and 48 in any one week; this limit is now extended to nine in any one day and 54 in any one week. Moreover, in the case of the exemptions to these provisions, allowable at the discretion of the factory inspector, no women or young girls can be employed before seven in the morning or ten in the evening. And whereas formerly women and young girls under the operation of the exemption above referred to, could not be employed for more than ten hours in one day or 60 hours in one week, they may now be employed 12½ hours in one day and 72½ hours in any one week.

Various changes in the schedules appended to the Act are made in accordance with the changes in the definitions of terms and regulations governing hours for women and young girls, above referred to.

The holiday provision abolished.

A further change has reference to the operation of factories on holidays. It was previously illegal for any factory to be opened or to employ any person on its premises on any statutory or legal holiday without the express permission in writing of the factory inspector. Violation of this provision was punishable with a fine of \$30. This clause is now entirely abolished.

General Effect of the Amendment.

It will be seen from the above that the general effect of the amendment is to relax somewhat the stringency of the original measure both in the general application of the Act and in its reference to particular classes of employees.

The Act went into force on the day it was assented to, viz., February 8.

THE GUELPH CO-OPERATIVE ASSOCIATION, Ltd.

The leading facts set forth in the following article were supplied to the Department of Labour by Mr. O. R. Wallace, correspondent of the *Labour Gazette* at Guelph, Ont.

DURING the month of December, 1903, the initial steps were taken in the organization at Guelph, Ont., of a co-operative association of workingmen, which, on January 18, 1904, was formally incorporated under the title of 'The Guelph Co-operative Association, Limited,' with the object of carrying on, either by wholesale or retail, on a co-operative basis, certain duly specified trades and businesses.

The association was the immediate outcome of a resolution passed by the Trades and Labour Council of Guelph at a meeting held on December 11, 1903, when, by a unanimous vote of the members, the forma-

tion of an organization of the kind was decided upon for 'the benefit of the community in general.' As yet the association has not got beyond the formal act of incorporation, the election of the first board of trustees and a canvass by the board for stock.

Origin of the Movement.

Dissatisfaction among the working people of Guelph, with regard to the prices charged and certain methods pursued by the master bakers of the city, found expression in 1902 in a resolution, passed at a meeting of the Guelph Trades and Labour Council, appointing a special committee of investigation into the local prices of bread and meat. A complaint had been made that bread was sold at a higher price

in Guelph than was asked by the same dealers for the same commodity in the surrounding country towns and villages. after the additional expense of shipping by stage had been incurred. The committee found that the conditions were as stated, but suggested no remedy.

In the spring of 1903 a further resolution was passed by the council, drawing the attention of the chief of police to the fact that the by-law of the city requiring the weight of a large loaf of bread to be four pounds was being constantly violated, the police having on several occasions confiscated bread for being short in weight. The master bakers obtained an amendment to the by-law whereby, while the regulation weight of plain white bread should remain at four pounds per large loaf, fancy bread might be sold in three-pound loaves, provided it was stamped with the name and weight. In the meantime, the price went up from 10 to 12 cents for the four-pound loaf.

Again, in the fall of 1903, a further motion relating to the price of bread was introduced in the Trades and Labour Council calling for the appointment of a special committee of investigation on the charge that 12 cents were being asked for the three-pound loaf of bread, which was in many cases very little different from the ordinary loaf, except in shape and name. The committee reported that they could see no way of remedying these different grievances except by starting a bakery on a co-operative plan. The suggestion was, as above stated, unanimously accepted by the council, and authority was thereupon conferred on the committee to consult a solicitor with regard to the matter, thirty-one of the members present at the meeting agreeing to subscribe \$10 of capital stock to ensure the success of the undertaking. The number of the committee was later raised to seven, these becoming the original incorporators and first board of trustees of the new co-operative association.

Co-operative Association Organized.

The association was organized under the terms of the provincial Act 'respecting co-operative associations,'* the various trades and businesses in which the association contemplated engaging being enumerated, as follows:—(1) bakery and confectionery; (2) groceries; (3) dry goods; (4) boots and shoes; (5) hardware (6) stoves and tinware; (7) butchering; (8) coal and wood; (9) stationery and wall paper (10) cigars and tobacco; (11) restaurant and eating houses, and generally such businesses as are permitted by the statute. It is understood, however, that as an initial step the conducting of a bakery business alone will be undertaken. The number of shares issued was to be unlimited, and the capital was to consist of shares of two dollars each, or of such other amount as may from time to time be determined upon under the rules of the association. The number of trustees to whom the management of the association is entrusted was fixed at seven, and the city of Guelph was named as the locality to which the operations of the association are to be confined. The intention of the trustees, it is stated, is to conduct the association on the most economical basis possible and with the end of securing as large a profit as possible in dividends to the shareholders from their purchases.

Rules and Regulations.

In the Act above cited as governing the formation of co-operative associations, before a society of the kind is permitted to commence operations, a set of rules must be agreed upon for the regulation, government and management of the business contemplated, including within their scope such matters as the convening of meetings, auditing of accounts, withdrawing of members, application of profits, appointments of officers and other considerations. A brief statement of the more important rules adopted by the Guelph association is as follows:—

A *board of trustees*, consisting of seven members, elected in the first instance by

* Revised Statutes Ontario, chapter 202.

ballot by the persons desirous of forming the association, are to have general charge and control of the affairs of the association. They are to select a president and a vice-president of the association annually from among themselves, the former to preside at all meetings of the trustees and of the association, and to advise with and render such assistance to the management of the association as may be within his power. The trustees are also entrusted with the appointment, from among the shareholders, of a secretary, treasurer and manager, the two latter, and every other person appointed to an office involving the handling of money or merchandise, being required to give security.

The duties of the secretary and treasurer, as laid down in detail in the rules, are of the ordinary character. The *manager* is given charge of the entire plant and merchandise of the association and is held responsible therefor. He is to keep a full set of commercial books, open at all times to inspection by the trustees or any officer of the association. He must take stock of the assets of the association at least once every month and make an exhibit of the same to the trustees or officer, if so required, handing over to the treasurer all monies received by him on behalf of the association. Free access must also be allowed by him to all books, stock sheets, &c., on the part of any auditor appointed by the trustees. He must also see that fire insurance has been placed upon the assets of the association to their full insurable value.

To the board of trustees is left the fixing of the salary or wages to be paid to these and other officers of the association.

With regard to the *allotment of stock*, no person is to be allowed to hold stock exceeding \$50. All stock must be paid for in cash on allotment, though if a greater amount than five shares are taken, the amount may be paid for in five equal monthly instalments of 20 per cent each. Shares are not transferable, except when fully paid up, and the transfer is then sub-

ject to the approval of the trustees, though stockholders removing from Guelph, or administrators of any deceased or insane members, may dispose of their shares as they see fit to persons approved by the trustees. The trustees, moreover, may forfeit shares and money paid thereon, upon which any call has remained unpaid after three months, the forfeited stock immediately becoming the property of the association. Stock certificates are only to be issued when shares are fully paid up. All stock must be entered and recorded in the stock-book, together with any transfers thereof.

The *annual meeting* of shareholders is to be held at Guelph on the second Monday in January of each year, when the report of the trustees for the past year is to be received and the board for the ensuing year elected. The trustees, however, may summon a general meeting of shareholders at any time, and the president may call a special meeting whenever required to do so in writing by at least 25 of the shareholders. Notice of such meetings, however, must be given by postal card to each of the members at least ten days in advance. Meetings of the trustees are at the call of the president, and are to be held as often as the business of the association requires, though the president must call a meeting on the joint written request of any four of the trustees.

The trustees are given power to expend or apply the *profits* of the association as they may deem proper. It is also left at their discretion to declare a dividend of the net profits of the association, to be payable at such times and in such manner as they may think proper. The appointment of an auditor and the filling of all vacancies occurring through the death of officers of the association are left in the hands of the trustees.

Provisions of the Ontario Act.

It may be of interest to notice in this connection some of the more important

provisions of the Ontario Act above referred to, under which co-operative associations may be incorporated. The binding power of such rules as may be determined upon by individual co-operative associations is emphasized (1) ; all monies payable by any member of such association in pursuance of such rules being recoverable as a debt (2). The Act places \$1,000 as the limit to which members may be allotted shares (3). In connection with the method of payment and transfer of shares, it is stated that no member is entitled to draw more than his proportionate interest on the paid-up portion of his shares (4). The liability of shareholders, similarly, is limited to the amount of the shares subscribed for (5). The business of co-operative associations must be on a cash basis exclu-

sively (6), though they may purchase land on credit for the purpose of carrying on business(7). The misapplying of funds by an officer or member of a co-operative association is punishable, before two justices of the peace, with the repayment of the money or securities improperly applied, together with a further sum not exceeding \$80, with costs not exceeding \$4. The alternative is imprisonment with or without hard labour for a term not exceeding three months (8). Disputes between members and trustees or officers of co-operative associations must be decided by arbitration (9), and a general statement of the funds and effects of the association, number of shareholders, &c., must be made each year by the trustees to the Provincial Secretary (10).

LABOUR LEGISLATION IN MASSACHUSETTS.

A report of considerable interest to employers and employees in Canada as well as in the United States has just been issued by the Commonwealth of Massachusetts. Last June, a resolution was passed by the House of Representatives of that state, authorizing the appointment of a committee of five persons to examine and consider the laws of the commonwealth and any proposed laws and amendments concerning the legal relations of employer and employee, and especially concerning the liability of the employer for injuries received by the employee in the course of his employment, the conduct of strikes and lockouts, the authority of the courts to issue injunctions in cases of strikes, the matter of blacklisting, schemes of industrial partnership, and schemes of industrial courts. The committee recently issued its report, which covers a wide field of inves-

tigation.* It is divided into six parts dealing respectively with profit sharing; arbitration; attachment and assignment of wages; hours of labour, including employment of women and children, and sweatshops; employers' liability; and blacklisting, intimidation, boycotts, and injunctions in labour disputes.

Profit-Sharing.

The committee reported unfavourably on a Bill making profit-sharing compulsory in companies with gross profits of over 15 per cent on their capital. The committee states its belief that systems of profit-sharing entered into voluntarily on private initiative may, and often do, prove of great value, notwithstanding that in practice the attempts which have been made to carry on business under such a system have met with varying success, but that if profit-sharing were made compulsory the burden on industry might be so serious that the provisions of the Bill would prove ineffective, and the outcome might be a decrease

* Report of Committee on Relations between Employer and Employee, State Printers, Boston, Mass., 1904, submitted in accordance with Resolve, approved June 5, 1903.

in wages in proportion to the extra profits added, so that the employee would only receive the amount that he had been earning previously. Another Bill, proposed as a substitute to this one, in which the compulsory feature was omitted, was also condemned on the grounds that mutual agreement may now give every advantage which the cumbersome machinery of State supervision is intended to secure, and that all legislation which has had any positive relation to the establishment either of rates of wages or of prices has worked to the injury of the public.

Arbitration.

Massachusetts has, at the present time, a State Board of Conciliation and Arbitration, which intervenes in disputes only when petitioned to do so by one or more of the actual parties to the controversy. A part of the Bill relating to compulsory profit-sharing also provided for compulsory arbitration before an industrial court. This portion of the Bill was condemned by the committee on the grounds that compulsory arbitration was opposed to individual liberty, that both employers and employees were against it, and that in many cases it would fail and only embitter still further the two parties to the controversy. It was recommended, however, that a law be enacted empowering the Governor to direct the State Board of Conciliation and Arbitration to investigate and report upon any controversy which in his opinion seriously affects, or threatens to affect, the general welfare.

It may be pointed out that this recommendation embodies the principle of compulsory investigation which is contained in the Act respecting railway labour disputes which was enacted by the Canadian Parliament in 1903.

Attachment and Assignment of Wages.

The difference between an attachment and an assignment of wages is pointed out, in that an attachment is a compulsory process whereby the wages of a workingman

are seized by a creditor by means of a writ served on his employer, while an assignment is a voluntary action on the part of a wage-earner, his future earnings being thus given as security for goods purchased by him. A complete exemption of wages from attachment is granted by the States of Pennsylvania and Louisiana, and a number of other States exempt wages earned during the preceding thirty to ninety days. By the law of Massachusetts, the amount of \$20 of wages is exempt from attachment, or of \$10, if the claim is for necessities of life. There is also a law providing for weekly payments of wages, which has the effect of making attachment processes amount to but little in Massachusetts.

Statutes of Massachusetts regulating assignments of wages have been enacted for the protection of tradesmen and the protection of wage-earners. The right to assign wages, which will become due under an existing contract, is recognized, but it is unlawful to assign wages which may accrue after a change of employer, since, until a contract is made, the employee has no interest in these wages. This principle, however, has been violated by means of unlimited powers of attorney, so that the future earnings of the debtor, without reasonable limit of time or amount, are placed in the hands of the holder of the power of attorney. In order to prevent evils that may arise from this practice, it is recommended in the report that legislation be enacted requiring that the assignment shall be executed in person by the assignor, and not by attorney, that it shall run for a period not exceeding two years, and must be for a debt contracted prior to or simultaneously with the execution of the assignment.

Hours of Labour ; Employment of Women and Children ; Sweat Shops.

The greater portion of this section is devoted to the consideration of child labour. The present Massachusetts law regulating the employment of children is as follows :—Children under fourteen

years of age are absolutely forbidden to work in factories, mechanical establishments, workshops or mercantile establishments. In other occupations they are forbidden to work in school hours, or between 7 p.m. and 6 a.m. Illiterates under sixteen are obliged to attend night school, if they are employed during the day. The hours of children in factories are limited to 10 hours a day, or 58 a week. In mercantile establishments they are also limited to 58 per week, except during December. There are also special provisions forbidding the employment of children at dangerous occupations.

The ratio of child to adult labour in Massachusetts has decreased from one child to eighteen adults in 1892, to one to thirty-one in 1902. This change is ascribed not only to legislation, but also to improvement in machinery, public sentiment, and fluctuations in industrial activity.

With respect to legislation regarding the employment of children, the committee make the following recommendations :

That the age limit for the employment of children be raised from fourteen to fifteen years, providing that the State Board of Education considers it advisable to raise the compulsory school age to fifteen :

That children under fourteen be forbidden to work in business offices, telegraph offices, hotels or apartment houses, or in the distribution or transmission of merchandise or intelligence ;

That certificates for attendance at night schools, to enable them to work during the day, be withheld from minors under sixteen years of age who cannot read at sight and write legibly simple sentences in English ;

That the prohibition of the employment of children under sixteen years of age between 7 p.m. and 6 a.m. be extended to all gainful occupations ;

That 58 hours per week be the maximum for women and minors in mercantile estab-

lishments at all times, not excepting December.

The following Bill is recommended for the prevention of the sweating system :

Every person, firm or corporation, hiring, employing or contracting with a member of a family holding a license under this section for the making, altering, repairing or finishing of garments or wearing apparel to be done outside the premises of such employer shall keep a register of the names and addresses plainly written in English of the persons to whom such work is given, and shall forward a copy of such register once a month to the chief of the district police.

Employers' Liability.

According to the Employers' Liability Act now in force in Massachusetts, employees are entitled to damages for injuries not exceeding \$4,000, and in case of death, their representatives may recover damages to the amount of not more than \$5,000, the amount of the damages to be decided by a jury. Objection is made to this law by both employers and employees, the former on the ground that the tendency of juries is to award liberal verdicts against them, and the latter on the ground that injured employees do not receive fair compensation, that they are denied speedy trials owing to the crowded dockets, and that they are forced to fight employers' liability insurance companies, not their employers, which discourages friendly relations between the workingmen and their employers.

In order to overcome these objections, the committee proposed a Bill, based on the British Workmen's Compensation Act. The chief features of the proposed Bill are the reference of the liability of the employers and the amount of compensation to an arbitrator instead of to a jury, and a more definite statement as to the amount of compensation which may be due in different cases. An employer and his employees may choose a committee to adjust matters in dispute, but if the committee is

not chosen, or if it fails to come to an agreement, the matter may be referred to a single arbitrator agreed on by the parties, or else appointed by any justice of the Superior court.

Blacklisting ; Intimidation ; Boycotts ; Injunctions in Labour Disputes.

The committee examined a Bill making every form of blacklisting unlawful, and providing that discharged employees shall, on request, receive statements in writing of the reasons of their discharge, but the opinion was given that it would be unwise to recommend the passage of this Bill.

With reference to intimidation, the provisions of the existing law were considered sufficient, which provide that 'No person shall, by intimidation or force, prevent, or seek to prevent a person from entering into or continuing in the employment of any person or corporation'.

No legislation is recommended with respect to boycotts, because the question of the liability of an individual member of a boycotting combination has not yet been specifically defined under common law, but the committee states its belief that the use of the boycott as a weapon in trade disputes has been carried to extremes which cannot be justified, and its use is often futile or unwise even from the standpoint of the interests of those who use it.

On the subject of the issuing of injunctions by courts of equity during times of

strikes, the members of the committee were divided. The use of these injunctions, which has increased greatly in the last ten years, is based on a theory stated as follows by the Supreme Court of the United States: 'Something more than the threatened commission of an offence against the laws of the land is necessary to call into exercise the injunctive powers of the courts. There must be some interference, actual or threatened, with property or rights of a pecuniary nature: but when such interferences appear, the jurisdiction of a court of equity arises.' One member of the committee is opposed to all injunctions in labour disputes, and another suggested a Bill to legalize all acts of bodies of men which are not directly connected with a breach of the peace, and which are neither criminal nor actionable at law, and which do not directly cause irreparable injury to property or persons of others.

The other members of the committee proposed the following Bill: 'No restraining order or injunction shall be issued against any person, association or corporation not named as a respondent in the same, except that when such order or injunction issues against an association or corporation or individuals named, it may be issued also against the officers, agents, attorneys and members of such associations or corporations, or against the agents or attorneys of such individuals, without naming the parties so designated.'

IMMIGRATION AND COLONIZATION MOVEMENT.

THE most noteworthy feature of the immigration movement during February was the large number of arrivals reported from Europe. As a general rule the winter months constitute a period of quiescence in this respect, immigrants preferring to defer arrival until the disappearance of the snow and the period of preparation for active agricultural operations.

There are other prospects for an immigration movement of exceptional activity

during the coming season. The continuance of the influx of American farmers into the North-west Territories is also considered assured, the newly organized Western Canadian Immigration Association, with headquarters at St. Paul, Minnesota, having commenced a vigorous campaign for the securing of this class of colonists.

Among the arrivals of the month from Europe was a party of skilled working girls and women sent to Canada under the auspices

ces of the United British Emigration Society, London.

Return from Victoria, B.C., for the month of January show only 22 Chinese arrivals as a result of the imposition of the \$500 head tax on Chinese immigration.

The Movement in Ontario.

The following bodies have sent petitions to the Ontario Government asking for further encouragement of the immigration of farm labourers and mechanics to Ontario : County Council of Brant, North Oxford Farmers' Institute, Halton County Council, Town Council of Sault Ste. Marie, Norfolk Farmers' Institute, East Durham Farmers' Institute, Carleton County Council, East Algoma Farmers' Institute, South Brant Farmers' Institute, East Parry Sound Farmers' Institute, North Renfrew Farmers' Institute, Kent County Council, Norfolk County Council, East Ontario Farmers' Institute and Frontenac County Council.

The Commissioner of Crown Lands of Ontario has issued a pamphlet setting forth in convenient form the advantages offered to land seekers in Northern Ontario. The pamphlet is prepared so as to serve as a guide to intending settlers.

Japanese Immigration.

At the late session of the British Columbia Legislature a select committee was appointed to inquire into the workings of the British Columbia Immigration Act, 1903. The Act in question aims at the restriction of Japanese immigration by providing that each immigrant must be able to write out and sign in the characters of some language of Europe an application to the Provincial Secretary claiming exemption from the operations of the law. The government was charged with neglecting to properly enforce the Act by permitting Japanese who were unable to comply with the regulations of the law to enter the province on making a statutory declaration to the effect that they were travellers. After a full investigation, the committee

reported that there was no foundation for any charges of the kind specified, and that the Act has been enforced by the officials as well as possible under the circumstances.

Homestead Entries for January, 1904.

The following statement published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of January, 1904, as compared with the month of January, 1903.

TABLE OF HOMESTEAD ENTRIES FOR JANUARY.

| Agency. | 1904. | 1903. | Increase. | Decrease |
|--------------------|-------|-------|-----------|----------|
| Alameda..... | 61 | 92 | | 31 |
| Battleford..... | 88 | 12 | 76 | |
| Brandon..... | 39 | 76 | | 37 |
| Calgary..... | 163 | 74 | 89 | |
| Dauphin..... | 27 | 38 | | 11 |
| Edmonton..... | 156 | 169 | | 13 |
| Kamloops..... | 10 | 5 | 5 | |
| Lethbridge..... | 74 | 82 | | 8 |
| Minnedosa..... | 10 | 18 | | 8 |
| New Westminster | 1 | 1 | | |
| Prince Albert..... | 78 | 89 | | 11 |
| Regina..... | 223 | 234 | | 11 |
| Red Deer..... | 62 | 85 | | 23 |
| Winnipeg..... | 62 | 61 | 1 | |
| Yorkton..... | 186 | 73 | 113 | |
| Total | 1,240 | 1,109 | 284 | 153 |

It will be seen that there has been an increase in the number of homestead entries made during January, 1904, of 131.

The statement of entries made during the first seven months of the fiscal year 1903-04 is as follows :—

TABLE OF HOMESTEAD ENTRIES, JULY-JANUARY.

| Month. | 1903. | 1902. | Increase. | Decrease. | Remarks. |
|----------------|--------|--------|-----------|-----------|--------------|
| July..... | 3,438 | 2,622 | 816 | | Net increase |
| August..... | 2,288 | 1,904 | 384 | | |
| September..... | 1,845 | 1,416 | 429 | | |
| October..... | 1,958 | 2,142 | | 184 | |
| November..... | 2,406 | 2,482 | | 76 | |
| December..... | 1,570 | 1,640 | | 70 | |
| 1904. | 1903. | | | | |
| January.. ... | 1,240 | 1,109 | 131 | | |
| Total | 14,745 | 13,315 | 1,760 | 330 | 1,430 |

Homestead Entries during 1903.

The accompanying table, presenting the returns of Homestead entries in Western

Canada for the calendar year 1903, is an important index to the progress of colonization in the West during the period named.

TABLE OF HOMESTEAD ENTRIES MADE DURING EACH MONTH, AT THE SEVERAL AGENCIES IN MANITOBA, THE NORTH-WEST TERRITORIES AND BRITISH COLUMBIA, DURING THE YEAR ENDED DECEMBER 31, 1903.

| Agency. | January. | February. | March. | April. | May. | June. | July. | August. | September. | October. | November. | December. | Total. |
|-----------------------|----------|-----------|--------|--------|-------|-------|-------|---------|------------|----------|-----------|-----------|--------|
| Alameda | 92 | 52 | 92 | 185 | 211 | 355 | 289 | 227 | 162 | 195 | 173 | 90 | 2,123 |
| Battleford | 12 | 8 | 46 | 116 | 344 | 342 | 305 | 178 | 42 | 44 | 48 | 105 | 1,590 |
| Brandon | 76 | 112 | 78 | 51 | 49 | 49 | 49 | 53 | 41 | 51 | 53 | 23 | 685 |

| | 1,109 | 1,165 | 2,325 | 5,778 | 4,109 | 4,691 | 3,438 | 2,288 | 1,845 | 1,958 | 2,406 | 1,570 | 32,682 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of January, 1904, were as follows:—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS.

| Nationalities. | No. of entries. |
|---|-----------------|
| Canadians from Ontario | 186 |
| " Quebec | 15 |
| " Nova Scotia | 14 |
| " New Brunswick | 10 |
| " Prince Edward Island | 3 |
| " Manitoba | 27 |
| " North-west Territories | 27 |
| " British Columbia | 3 |
| Persons who had previous entry | 143 |
| Canadians returned from the United States | 19 |
| Americans | 359 |
| English | 135 |
| Scotch | 39 |
| Irish | 14 |
| French | 7 |
| Belgians | 3 |
| Swiss | 1 |
| Syrians | 1 |

| Nationalities. | No. of entries. |
|---|-----------------|
| Germans | 24 |
| Austro-Hungarians | 141 |
| Danes (other than Icelanders) | 1 |
| Icelanders | 8 |
| Swedo-Norwegians | 33 |
| Russians (other than Mennonites and Doukhobors) | 26 |
| Mennonites | 1 |
| Total | 1,240 |

Representing 3,281 souls.

Of the total number of entries made during January by persons coming from the United States into Canada, 108 were from Dakota, 78 from Minnesota, 27 from Iowa, 23 from Wisconsin, 18 each from Kansas and Utah, 17 from Nebraska, 13 from Washington and 10 from Montana.

Lands Patented in January, 1904.

The following is an abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Terri-

tory, issued from the Department of the 1904, together with comparative returns for Interior during the month of January, the month of January, 1903 :—

TABLE OF LANDS PATENTED DURING JANUARY.

| Nature of Grant. | January, 1903. | | January, 1904. | |
|--|-----------------|---------------|-----------------|---------------|
| | No. of Patents. | No. of Acres. | No. of Patents. | No. of Acres. |

| Totals | 443 | 91,821·57 | 673 | 243,207·28 |

CANADIAN TRADE AND REVENUE DURING THE MONTH OF FEBRUARY, 1904.

The following article intended as supplementary to the general Summary of Industrial Labour conditions is based on statistics furnished by courtesy of the Departments of Customs and Finance, Canada, on the latest weekly reports issued by the Departments of Trade and Commerce, Canada, and on current information collected from reliable trade and financial journals.

OF the general trade situation throughout Canada during the month of February, it may be said that the latest foreign trade reports presented a satisfactory showing as compared with 1903, and, taking seasonal conditions into account, with the previous month. Trade prospects within the empire were of an expanding nature ; domestic trade, in spite of the serious drawback occasioned by the unusually cold and stormy weather, reflected a healthy tone and afforded a promising outlook. Refer-

ence in detail to conditions in these various branches is as follows :—

Foreign Trade Returns.

As will be seen from the accompanying tables, supplied by courtesy of the Department of Customs, the trade of the Dominion showed an increase in the value of imports entered for consumption during the month of January and during the first seven months of the present fiscal year, but a decrease in the value of exports during both of the periods named, the decline under the latter heading being attributed largely to the cold and stormy weather which prevailed throughout the month and which interfered with the movement of freight to a serious degree. A comparison

of the aggregate returns shows an increase of over \$15,000,000 for the seven months. As compared with the month of December the returns, taking seasonal circumstances into account, are considered satisfactory, though showing a decline in both imports and exports.

With regard to the record in exports up to January 31, produce of the mines shows an increase of over \$2,000,000, while animals and their products show a decline of \$1,700,000; agriculture a decline of \$3,000,000; forest wealth a decline of \$1,000,-

000 and manufactures an increase of \$200,000.

There was some discussion during the month of the trade relations existing between Germany and the Dominion, more particularly in reference to the surtax at present imposed on German goods coming into Canada. Some interference was also reported in the trade in Canadian food stuffs with Japan, as a result of the outbreak of war between the latter country and Russia, though a report that commodities of this class were contraband of war was officially denied.

TABLE SHOWING VALUE OF CANADIAN FOREIGN TRADE DURING THE MONTH OF JANUARY, 1904.
IMPORTS.

| | MONTH OF JANUARY. | | SEVEN MONTHS ENDING JANUARY. | |

| Total merchandise..... | 15,341,199 | 631,865 | 12,264,424 | 236,767 | 140,642,665 | 8,028,419 | 135,248,378 | 10,191,036 |
| Coin and bullion..... | | 15,624 | | 18,911 | | 300,345 | | 367,166 |
| Grand total exports..... | 15,341,199 | 647,489 | 12,264,424 | 255,678 | 140,642,665 | 8,328,764 | 135,248,378 | 10,558,202 |

A special *Canada Gazette* issued February 16 had a proclamation containing the following paragraph :

1. During continuance of hostilities no coal is to be supplied to warships of either of the belligerent powers, except on a written authority of the competent port authorities, specifying the amount of coal which may be supplied.

2. Before issuing any authorization for the supply of coal to any belligerent warship, the port authority shall obtain a written declaration duly signed by the officer commanding such warship, of the destination to which it is proceeding, and the amount of coal already on board.

Imperial Trade.—Reports of Commercial Agencies.

During the month of February the Department of Trade and Commerce, Canada, began the publication of a weekly bulletin containing the latest reports of Canadian commercial agents and the latest trade inquiries received. This form of publication was adopted with the intention of rendering the material in question more immediately available, and of thus affording business men in Canada the earliest possible intimation of important trade opportunities. The department has at present 12 commercial agents representing Canada in Australia, New Zealand, South Africa, the British West India Islands, Norway and Sweden, Denmark, France, and the cities of Manchester, Leeds and Birmingham, England. In addition to these, various Canadian agents in Great Britain and Europe are instructed to receive inquiries relating to trade matters. Hitherto the information derived from these sources has been published only in the monthly report of the Department of Trade and Commerce, though the press of the country has been supplied with information earlier. Under the new arrangement information will be given to the public almost immediately after its receipt, the reports being sent to all trade journals and daily newspapers throughout Canada, and to individuals upon application. Reference to the contents of these weekly reports will be made under the present heading from month to month in the *Gazette*.

According to reports received by the Department of Trade and Commerce during

the month from a number of its commercial agents, the trade in Canadian butter and cheese with the British West Indies shows increasing returns with prospects excellent for still further advances in the near future, providing constant attention to quality and packing is maintained by exporters. Canadian cheese is finding a particularly ready market in Trinidad and Jamaica. A stimulus to trade will be given during the next three months by the resumption of banana shipments, though the hurricane of last August did much damage to this fruit. The federal elections in Australia are reported as having interfered somewhat with trade in that country. The Australian harvest, however, has been particularly abundant, and wool, butter and flour report exceptionally good markets. Canadian tobacco is growing in favour in Melbourne, and there are openings reported for exporters of carbide of calcium and for Canadian manufactured products in South Australia. The new preferential tariff schedule adopted by New Zealand admits Canadian goods covered by the schedule without any reciprocal action on the part of the Canadian Government and affords a field for further extension of preferential terms by negotiation. An increased trade of about \$1,500,000 might, on the authority of the agent, be secured in this connection. Canadian exporters, it is stated, would have good openings for the disposal of bicycles, boots and shoes, carriages, hardware, pianos, wrapping paper, ropes, rubber goods, gas and oil engines, and other goods. From Leeds, Eng., good openings for Canadian office furniture, fruit and cheese are reported, and Canadian butter is said to be steadily growing in favour. Canadian bacon and hams have also found an exceptionally good market recently in England. In Manchester, openings for Canadian heating appliances are reported. The situation in South Africa is said to require an immediate addition to the number of representatives of Canadian business interests there, prospects for trade in boots

and shoes, furniture, canned goods, agricultural implements and canned salmon being reported very promising.

British Meat Imports.

Some recently published statistics relating to British meat imports are of interest to Canada. The largest imports of bacon during 1903 came from the United States, the amount in cwts. reaching 2,893,507, a decrease of 390,348 cwts. Denmark ranked second with 1,496,100 cwts., an increase of 240,474, followed by Canada with 665,249 cwts., an increase of 202,762. Other countries totalled 102,131 cwts., an increase of 14,396. The United States also stands first in the quantities of hams, viz., 939,169 cwts., a decrease of 373,610, Canada following with 197,497, an increase of 33,467 cwts., or 20 per cent. Under the heading of pork, Holland, the United States and Belgium rank in the order named.

Domestic Trade.

The exceptionally unfavourable weather was the most prominent factor governing domestic trade conditions throughout Canada during the month. The severe cold, in bringing out-of-door employment in most localities to a standstill, together with the heavy snowfall and drifting storms which followed, in interfering with the movement of traffic on the railways and with industry in many other other forms, were influences which tended towards decreasing trade returns. On retail trade, particularly in the country districts, the effects were especially noticeable, farmers in many sections of the country being unable to reach their markets except with extreme irregularity. Wholesale trade, besides suffering from the reflection of these conditions, was also depressed by the blockade of freight on the railways, shipments being in many instances refused, or, where accepted, being delayed very considerably in transmission. Orders were also diminished, owing to the movements of commercial travellers being interfered with by conditions prevailing on the railways. Country remittances were

also somewhat slow, though the record of failures was satisfactory. Apart from these drawbacks, however, the general trade situation was healthy, with a good seasonable demand reported by most jobbing houses. Orders for building material, hardware and kindred lines were particularly active. The dry goods market was also satisfactory, in spite of the phenomenal rise and subsequent decline in the price of raw cotton, while in linens, woollens, silks, &c., the market continued firm, with a rising tendency. In groceries, the price of coffee showed a sharp advance. Dealings in Canadian securities were dull, with market movements narrow and showing a comparative absence of the speculative element. On the whole, the outlook for trade for the coming spring season is considered bright, more particularly in view of the upward tendency in the price of farm products, the high price of wheat, which reached the highest level during the month since 1898, and the reports of increased crop acreages and large settlement operations promised for the coming season in Western Canada.

The fortieth annual report of the People's Bank, of Halifax, N.S., for the year ended January 30, showed net profits of \$78,977.38 on a paid-up capital of \$996,392.59. The reserve fund of the bank now amounts to \$440,000.

In the three years ended December 31, the paid-up capital of Canadian banks increased \$11,426,125, while the reserve funds increased \$16,097,162.

Revenue and Expenditure.

The revenue of the Dominion, according to the latest official statement of the Department of Finance, amounted during January to \$5,381,350.93, or a total of \$40,317,813.20 for the first seven months of the current fiscal year. The total for the month shows a decrease of \$388,207.57 over December, 1903, and an increase of \$197,080.83 over January, 1903. For the first seven months of the fiscal year the increase amounts to close upon \$4,000,000.

The total expenditure for January was \$6,393,517.71, as against \$7,134,717.25 in January, 1903. For the six months the total expenditure was \$27,107,713.51, as against \$26,684,406.24 a year ago. The sum of \$1,466,418.83 was expended on capital account during the month, the chief items of which were as follows:—

| | |
|------------------------------------|--------------|
| Railway subsidies.. . . . | \$883,050 00 |
| Public works, railways and canals. | 374,960 13 |
| Militia.. . . . | 79,424 41 |
| Bounty on steel and iron.. . . . | 65,158 79 |
| Dominion Lands.. . . . | 58,620 87 |

The total estimated expenditure of the province of Ontario for 1904 is \$4,657,909.76, including an item of \$451,475 for capital account and one of \$149,300 for colonization and mining roads. Other prominent items were: charges on Crown lands, \$256,793.34; agriculture, \$337,496; public institutions maintenance, \$941,642, and education, \$989,154. The assets of the province are placed at \$8,383,306 and the liabilities at \$5,834,141.

The Post Office Department, Canada, showed a surplus of \$395,268 for the fiscal year ended June 30, 1903.

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the Number of the 'Canadian Patent Office Record,' issued by the Department of Agriculture during the month of February.

In the month of November, 411 patents were issued in Canada. The inventions relating to the various means of locomotion numbered 51. There were 28 electrical inventions, 16 manufacturing machines, 9 new processes of manufacture, 20 agricultural machines and implements, 23 patents connected with the building trades, and 15 relating to metallurgical and mining industries. Among the miscellaneous inventions were 23 patents for office utilities, 8 systems of heating, and 8 patents with reference to different methods of lighting.

Inventions relating to locomotion.

The 51 patents relating to *locomotion* included one traction engine, two switches,

five brakes, four rails, five tires, and three car-couplers.

Among the inventions of this description there is a locomotive engineer's alarm, the purpose of which is to give warning when two trains are approaching each other.

Machinery.

Among the numerous machines for which patents were taken out, there were eight looms, and machines for the manufacture of brushes, thread and glassware. There were several inventions relating to the printing industry, among them being a printing press, a cylinder printing machine, ink-distributing mechanism, and a linotype leader.

As an indication of the efforts that are being made to supplant coal as a fuel for industrial purposes, patents were issued for five gas-engines, four explosive engines and one oil-engine.

Industrial Processes.

The nine industrial processes for which patents were taken out included several interesting and important ones. There were two methods of making fire-proof materials. One is the following process of making cotton goods non-inflammable. The material is impregnated with a solution of stannate of soda, then, after being dried, it is impregnated with a solution of titanium salt, and again dried. The titanium is then fixed by means of an alkaline bath, preferably of silicate of soda. It is finally washed, dried and finished as required.

The other process consists in manufacturing millboards and tiles out of asbestos, the means adopted being to pulp the asbestos in a solution of chloride of magnesium, adding thereto oxide of magnesium, pressing and drying the substance thus obtained, and treating it to a solution of silicate of potash or soda.

Other processes patented are concerned with the manufacture of cement, the treat-

ment of leather, the conversion of wood cellulose into fermentable sugar, &c.

Electrical Inventions.

Among the electrical inventions patented, there were three relating to lighting, two to telephones, and two concerning wireless telegraphy, which may be classed under this head. There were also a controller for electric motors, a storage battery, an electric furnace, an apparatus for electrical smelting, and an electro-therapeutic apparatus.

As a protection against accidents caused by electric wires, there is a patent for a means of protecting the exposed parts of electric switches, cut-outs, &c. This consists of an insulating block, fire and electric-proof, composed of several parts, each being complementally grooved so as to conceal and surround all portions of the electrical device. There are openings in some parts of the block, which permit the actuation of the appliance, and there is an arrangement to close these openings when necessary.

Inventions relating to Building Trades.

There were two patents for fireproof construction. The main feature of one is a network of wires or rods, fastened with hooks to supporting beams, and covered with a reticulated material; concrete is

then placed on top of the beams, rods and this material, and above that are placed alternate layers of felt paper and insulating material, and the floor is laid on top of them. The other patent consists of a fire-proof tower containing ventilating shafts, in connection with a system of water-pipes arranged in the ventilating shafts and within recesses in the floor of the building.

Other inventions relating to building are a device for removing shingles, a tiled flooring, and a storage house for breweries.

Metallurgical and Mining Inventions.

There were several important patents among the 15 relating to metallurgy and mining. The following were some of the new processes patented:—

A new method of arresting arsenic fumes from smelter gases consists in passing the gases containing the fumes through a filter, in which is placed some sulphide of calcium.

A method of converting copper consists in creating an intense heat in the molten matte by the introduction of air, then abstracting a portion of this heat by a cooling medium at the beginning of the blow, when the oxidation is rapid, and supplementing the heat by a flame at the end of the blow, when the oxidation fails.

GOVERNMENT CONTRACTS FOR THE MONTH OF FEBRUARY.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties during the month of February, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule in each contract:—

Construction of a Wharf at Honora Bay, Manitoulin Island, Ont., February 22, 1904, \$7,900.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. |
|---------------------------------------|------------------------------------|
| | Not less than the following rate:— |
| Contractor's foreman (carpenter)..... | \$3 00 per day of 10 hours. |
| Carpenters..... | 2 25 " " |
| Blacksmiths..... | 2 00 " " |
| " helpers..... | 1 50 " " |
| Ordinary labourers..... | 1 50 " " |
| Driver, with one horse and cart..... | 2 00 " " |
| " two horses and wagon..... | 3 00 " " |

Pile wharf at Pembroke, Renfrew county, Ont.; February 19, 1904; \$41,999.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|--|-------------------------------|----------------------|
| | Not less than the following : | |
| Contractor's engineer.. . . . | \$ 6.00 | per day. |
| “ foreman.. . . . | 4.00 | per day of 10 hours. |
| “ sub.-foreman.. . . . | 2.75 | “ 10 “ |
| Carpenters.. . . . | 2.25 | “ 10 “ |
| “ helpers.. . . . | 1.75 | “ 10 “ |
| Blacksmiths.. . . . | 2.25 | “ 10 “ |
| “ helpers.. . . . | 1.25 | “ 10 “ |
| Driver with one horse and cart.. . . . | 2.50 | “ 10 “ |
| Driver with two horses and wagon.. . . . | 3.50 | “ 10 “ |
| Ordinary labourers.. . . . | 1.50 | “ 10 “ |
| Timekeeper.. . . . | 45.00 | per month. |

Construction of an Armoury at Cobourg, Ont., February 24, 1904, \$35,550.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | |
|---|-------------------------------------|---------------------|
| | Not less than the following rate :— | |
| Foreman mason.. . . . | \$3 00 | per day of 9 hours. |
| “ bricklayer.. . . . | 3 00 | “ 9 “ |
| “ carpenter.. . . . | 2 50 | “ 9 “ |
| Carpenters.. . . . | 2 00 | “ 9 “ |
| Stone cutters.. . . . | 3 00 | “ 9 “ |
| Stone masons.. . . . | 2 70 | “ 9 “ |
| Bricklayers.. . . . | 2 70 | “ 9 “ |

| Timekeeper.. . . . | 2 00 | “ “ |

INDUSTRIAL ACCIDENTS DURING THE MONTH OF FEBRUARY, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, to one of the factory inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with a statement of returns of accidents made to them.

THE Department of Labour has received notice of 225 accidents to workmen during the month of February in different parts of the Dominion, resulting in the loss of 69 lives and in severe injuries to other workmen to the number of 125.

Compared with the previous month the returns show an increase of 31 in the total number of accidents, there being a decrease of 6 in the number killed and an increase of 37 in the number injured.

By industries and groups of trades the record was as follows :—

| Trade or industry. | Killed. | Injured. | Total. |
|---------------------------|---------|----------|--------|
| Agriculture.. . . . | 7 | 1 | 8 |
| Lumbering.. . . . | 7 | 9 | 16 |
| Mining.. . . . | 7 | 12 | 19 |
| Building trades.. . . . | 1 | 7 | 8 |
| Metal trades.. . . . | 5 | 27 | 42 |
| Woodworking.. . . . | .. | 9 | 9 |
| Railways*.. . . . | 26 | 34 | 60 |
| Miscellaneous.. . . . | 11 | 36 | 47 |
| General transport.. . . . | 5 | 12 | 17 |
| | 69 | 156 | 225 |

Nature of Fatalities and Injuries.

By reference to the detailed table of accidents published herewith it will be seen that some of the accidents of the month of February were in the nature of disasters, and resulted in very serious loss of life and property. A brief reference to the more prominent among these is as follows :—

Wreck on the Intercolonial Railway Line Near Milford, N.S.

On the morning of February 3, the Boston and Montreal express, otherwise known

as the Canadian Pacific Railway express, which left Halifax a short time previously, jumped the track near Milford station, about 40 miles west, while running at its ordinary speed of 35 miles an hour, and its five vestibuled cars rolled down an embankment 50 feet high, leaving the engine standing unharmed on the track, and became a mass of hopeless debris on the brink of the Milford river alongside the route. There were about forty persons on the train, thirty passengers and ten of a train crew. Of these one passenger and the train conductor were killed and all but four of the remaining number more or less severely wounded. Of the railway employees a car inspector, a baggageman, two brakemen and a news agent were injured. The accident was attributed to spreading of the rails due to the severity of the weather, but this was contradicted owing to the fact that the engine remained on the rails. Another reason invoked was faulty gearing beneath the cars, but this still remains unproved.

Collision on the Canadian Pacific at Sand Point, Ont.

A most disastrous railway wreck occurred on the Canadian Pacific Railway about two and a half miles west of Sand Point, Ont., a station 57 miles west of Ottawa, Ont., at five o'clock, on the morning of February 9—the weather being then bitterly cold, the thermometer registering many points below zero, when No. 7, the west-bound Soo train, collided head on with No. 8, the east bound Soo train. In the accident a railway engineer, a baggageman, two locomotive firemen, a news agent and two express messengers were killed, together with seven other passengers, and one railway engineer, a fireman and two railway mail clerks and fifteen other passengers injured, some of them dangerously. Orders had been given to the west-bound train to take the siding at Sand Point and await crossing there by the east-bound train, but

*No account is taken in this connection of accidents or fatalities happening to other than employees.

the engineer and the fireman of the former train, for reasons which no doubt will be brought out in the inquest, which commenced on February 18 and was continued to March 8, ran past the Sand Point station and a couple of miles west thereof collided with the east-bound train. The trains were then moving at about 30 miles per hour and the west-bound train received a greater momentum from the fact that after leaving Sand Point the road deflects considerably. The impact between the meeting trains was such that both engines telescoped and a second car belonging to each, in which the large number of fatalities and injuries occurred.

Other Accidents.

Other accidents of the month attended with fatal results to more than one person were as follows :—

The death of two farmers who, while driving home in a cutter, crossing a railway track, were struck by passing train.

The Record by Trades and Industries.

By industries and groups of trades the table shows the following record for the month :—

Agriculture.—The number of fatalities, 7, as compared with the total number of casualties in this group, is a very striking feature of the month's general record of accidents. Three were caused by being run down by a railway train; two by freezing to death; one by being crushed to death by the collapse of a cattle shed roof overburdened with snow and one by a large piece of timber which the victim was hoisting falling upon him, the hoisting chain having broken. The other injury on the list was due to the collapse of a cattle shed roof mentioned above.

Lumbering.—Seven of the 16 accidents in this group were fatal, four deaths being due to trees or limbs of trees falling on choppers; one by the explosion of dynamite cartridges which the person killed was

thawing; one to an attempt to couple railway cars and one to a man falling off and being ran over by a railway train on way home from shanties. Of the 9 non-fatal injuries three were due to axe slipping and severely cutting limbs of body, two by falling trees or limbs of trees; two were cases of saw-mill hands being crushed while working in a mill by heavy iron pipe falling on them and another of feet and hands being frozen while workman was driving home from a lumber camp.

Mining.—There were seven killed and twelve injured in this industry during the month. One of the fatalities occurred in Rossland, B.C., the miner falling out of a cage down a chute and being dashed against a set of timbers; in Springhill, N.S., also a miner fell down a chute and was killed; four fatalities occurred through the falling of coal, stone and frozen earth respectively, from roofs of mines and one death happened in New Aberdeen, N.S., by a miner being struck by a runaway train of cars in a coal mine. At Sydney, N.S., a miner had his head cut by coming in contact with a coal conveyer; workmen at Sydney Mines, N.S., and at Nanaimo received serious injuries by falls from roof of mines and another had two ribs broken by being crushed between a box and pit prop when jumping off after a trip; in Nanaimo, B.C., a miner received severe injuries by being crushed between a car and the wall of a mine; at Reserve Mines, N.S., a workman was badly crushed by being jammed between two coal cars; a fractured skull at Bridgeport, N.B., was caused by a miner being struck with a chain tongs, the chain breaking; three miners at Glace Bay N.S., were injured by the explosion of a delayed blast; two drillers at Niagara Falls, Ont., were severely injured by striking unexploded dynamite cartridge with their picks.

In connection with mining accidents it might here be said that during the year ended September, 1903, there were thirty fatal and sixty-four non-fatal accidents in the collieries of Nova Scotia, a total of

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF FEBRUARY. DEPARTMENT OF LABOUR, CANADA, STATISTICAL TABLE, SERIES F, No. 5.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|---|---------------------|---------|---------|----------|----------------------------|--|
| <i>Agriculture—</i> Farmer Farm hand Farmer | Huntsville, Ont. | Feb. 15 | 1 | 1 | Severely injured | By collapse of roof of cattle shed through weight of snow. |
| | Robey, Man. | " 16 | 2 | 2 | | " " " " " " |
| | " | " 20 | | | | While driving home from market was struck by a train at crossing. |
| | Moosomin, N.W.T. | " 22 | 1 | 1 | | While driving home frozen on road. |
| | Warton, Ont. | " 28 | 1 | 1 | | While hoisting timber in barn it fell. |
| Agricultural labourer | Galt, Ont. | " 4 | 1 | 1 | | Sent by employer on errand some distance; found frozen to death. |
| | St. Cyrille, Que. | " 20 | 1 | 1 | | While walking railway track struck by passing train. |
| | Port Arthur, Ont. | " 15 | 1 | 1 | | By explosion of dynamite while thawing some near stove. |
| | Victoria, B.C. | " 22 | 1 | 1 | | In attempting to couple cars. |
| | Marshall, Ont. | " 1 | 1 | 1 | Foot seriously cut. | By slipping of axe. |
| " " | Sidney, Ont. | " 3 | 1 | 1 | | While cutting wood struck on head by falling limb. |
| | Fourth Lake, N.S. | " 4 | 1 | 1 | | By a falling tree. |
| | Woodville, Ont. | " 4 | 1 | 1 | Leg broke in three places. | By fall of a limb of a tree while walking in bush. |
| | Burling, Ont. | " 4 | 1 | 1 | | By fall of a tree while chopping. |
| | Stemba, Man. | " 6 | 1 | 1 | | " " " " " " |
| " " | Portneuf, Que. | " 19 | 1 | 1 | Foot cut. | By slipping of axe while chopping. |
| | La Providence, Que. | " 24 | 1 | 1 | Loss of left forearm. | While chopping axe slipped almost completely severing forearm, which was afterwards amputated. |
| | Milltown, N.B. | " 23 | 1 | 1 | Several ribs broken. | By fall of tree. |
| | Kiskisno, Que. | " 2 | 2 | 2 | Seriously crushed. | By fall of a heavy iron pipe while working in saw-mill. |
| | Plympton, N.S. | " 24 | 1 | 1 | | While returning from lumber camp on railway, fell from car and was run over by train. |
| " " | Buckham, Ont. | " 17 | 2 | 2 | Feet and hands frozen. | While driving from lumber camp father and son had feet and hands frozen. |
| | Sydney, N.S. | " 2 | 1 | 1 | Head injured. | By coming in contact with coal conveyer in mine. |
| | Roseland, B.C. | " 3 | 1 | 1 | | While descending in cage fell down shaft and was killed by being dashed against a set of timbers. |
| | Ladysmith, B.C. | " 3 | 1 | 1 | | By fall of coal. |
| | Black Lake, Que. | " 3 | 1 | 1 | | While working in asbestos mine pit was struck on face and chest by large piece of frozen earth and killed. |
| " " | Nanaimo, B.C. | " 3 | 1 | 1 | | By fall of stone from roof of mine. |
| | Sydney Mines, N.S. | " 9 | 1 | 1 | Serious injury to spine. | Fell down a chute. |
| | Springhill, N.S. | " 10 | 1 | 1 | Two ribs broken. | Caught between box and pit prop. |
| | Sydney Mines, N.S. | " 19 | 1 | 1 | Seriously injured. | Crushed between car and wall of mine. |
| | Nanaimo, B.C. | " 11 | 1 | 1 | | |
| <i>Lumbering—</i> Shanty cook Lumber inspector Chopper | Port Arthur, Ont. | " 15 | 1 | 1 | | By explosion of dynamite while thawing some near stove. |
| | Victoria, B.C. | " 22 | 1 | 1 | | In attempting to couple cars. |
| | Marshall, Ont. | " 1 | 1 | 1 | Foot seriously cut. | By slipping of axe. |
| | Sidney, Ont. | " 3 | 1 | 1 | | While cutting wood struck on head by falling limb. |
| | Fourth Lake, N.S. | " 4 | 1 | 1 | | By a falling tree. |
| " " | Woodville, Ont. | " 4 | 1 | 1 | Leg broke in three places. | By fall of a limb of a tree while walking in bush. |
| | Burling, Ont. | " 4 | 1 | 1 | | By fall of a tree while chopping. |
| | Stemba, Man. | " 6 | 1 | 1 | | " " " " " " |
| | Portneuf, Que. | " 19 | 1 | 1 | Foot cut. | By slipping of axe while chopping. |
| | La Providence, Que. | " 24 | 1 | 1 | Loss of left forearm. | While chopping axe slipped almost completely severing forearm, which was afterwards amputated. |
| " " | Milltown, N.B. | " 23 | 1 | 1 | Several ribs broken. | By fall of tree. |
| | Kiskisno, Que. | " 2 | 2 | 2 | Seriously crushed. | By fall of a heavy iron pipe while working in saw-mill. |
| | Plympton, N.S. | " 24 | 1 | 1 | | While returning from lumber camp on railway, fell from car and was run over by train. |
| | Buckham, Ont. | " 17 | 2 | 2 | Feet and hands frozen. | While driving from lumber camp father and son had feet and hands frozen. |
| | Sydney, N.S. | " 2 | 1 | 1 | Head injured. | By coming in contact with coal conveyer in mine. |
| <i>Mining—</i> Miner | Roseland, B.C. | " 3 | 1 | 1 | | While descending in cage fell down shaft and was killed by being dashed against a set of timbers. |
| | Ladysmith, B.C. | " 3 | 1 | 1 | | By fall of coal. |
| | Black Lake, Que. | " 3 | 1 | 1 | | While working in asbestos mine pit was struck on face and chest by large piece of frozen earth and killed. |
| | Nanaimo, B.C. | " 3 | 1 | 1 | | By fall of stone from roof of mine. |

| " | " | " 27..... | 1 | 1 | Right side bruised..... | While undoing a nut, slipped and fell on iron bungs. |
| " | " | " 5..... | 1 | 1 | Left eye injured..... | By hot scales from iron. |
| " | " | " 9..... | 1 | 1 | Right foot hurt..... | Struck against a nail. |
| " | " | " 12..... | 1 | 1 | Right hand crushed..... | While running trip hammer. |
| " | " | " 13..... | 1 | 1 | Left large toe bruised..... | While drilling a casting. |
| " | " | " 15..... | 1 | 1 | Right hand burned..... | Hot iron splashed on it. |
| " | " | " 20..... | 1 | 1 | Loss of first left finger..... | Caught while placing flash on machine. |
| " | " | " 20..... | 1 | 1 | Two fingers bruised..... | Hit by drop hammer. |
| " | " | " 7..... | 1 | 1 | Left leg bruised..... | Piece of lumber slid against it. |
| Factory hand..... | " | " 30..... | 1 | 1 | Burned..... | Train broke in two and portion collided, upsetting fire in car. |
| Ry. employee..... | Hosmer, Man..... | " 30..... | 1 | 1 | | |

ninety-four accidents. Of the fatal accidents in Pictou county two were caused by rakes and two by falls; a similar statement applies to Cumberland county. Of nineteen of the non-fatal accidents reported for these two counties eight were occasioned by rakes, boxes, &c., and five from falls. In Cape Breton county eight fatal accidents were caused by cages, buckets or boxes; five by explosions and three by falls, while of the non-fatal fifteen were brought about by boxes and twelve by falls. Thus, it will be seen that of twenty-six fatal accidents in the counties named twelve were from rakes, &c., and seven from falls. In Pictou county about 350,000 tons of coal were produced per each life lost, in Cumberland 247,000 tons and in Cape Breton 206,060 tons. For the whole province the average was 215,000 tons per life lost.

Building trades.—One workman was killed and seven injured in this branch. The fatality was that of a carpenter at Montreal, Que.; an elevator was used for hoisting material and had reached the eighth story of a building *filled with brick*, two carpenters boarded it and it commenced falling. A fellow workman on one of the flats while the elevator was descending snatched one of the workmen from it but the other fell with it to the ground, a distance of over 125 feet, and was killed. The other workman was also severely injured. Three of the injuries were caused by falling from the roof of a verandah and ladders respectively; a carpenter at St. John, N.B., hurt his hand by having it jammed between an iron column and a post; and a plumber had his thigh bruised while unloading radiators from a rig, the horse starting off.

Metal trades.—The metal trades rank third on the list in the number of casualties during February, forming a total of forty-two, though fortunately the fatalities in this branch only number five; one was the case of a workman at Niagara Falls, Ont., who was killed through the boom of derrick breaking and a large piece of steel falling on him; a tinsmith at Berthier-

ville was killed while repairing the roof of a house, the ladder slipped and he fell; the third fatality was the case of a man who fell from a ladder two weeks ago and injured himself to such an extent as to cause his death on February 11; one fatality happened to an electrical worker at the powerhouse, Deschene, Que., who fell into river and was drowned, and an oiler at Sydney, N.S., was caught in a *balance* while making 1,200 revolutions per minute and was whirled to death. Of the non-fatal accidents six were caused by the splashing of molten metal which the workmen were carrying, one by snow and ice falling from a building near which the workman was superintending the in-piping of a boiler. There were two cases of fracture of the skull, one from being struck by the arm of a crane and another by being struck by an iron hook on a loom. A particular accident, which was nearly accompanied by fatal results, was that of a workman's smock becoming entangled in a cog wheel and nearly chcking him to death. In addition to the above there were many minor accidents of more or less gravity, severe bruises, &c.

Woodworking trades.—There were fortunately no fatal accidents in this branch during February and only nine non-fatal accidents, none of these, as may be gathered from the list, being such as to endanger life, consisting principally of injuries to fingers or hands by coming into contact with machinery.

Railway service.—During February the railway service came first among the different distinct groups of trades as being the most hazardous with sixty casualties to workmen of which twenty-six were fatal. The wreck on the Intercolonial Railway at Milford, N.S., and the collision on the Canadian Pacific at Sand Point, Ont., above referred to, were responsible for twelve of the fatalities and eight non-fatal injuries. Of the other fatal accidents a conductor was killed at Farnham, Que., by the overturning of a van; a fireman, at London, Ont., seeing a collision imminent

jumped from his engine but fell back under the wheels of his train and was killed; the engine and tender of a freight train at St. Thomas, Ont., broke in two, the fireman fell between and was killed; a brakeman at Welland, Ont., fell from top of car and landed head first on an interlocking switch which killed him; a brakeman at Agincourt, Ont., while running east alongside of his engine was struck by a west-bound train and run over; a brakeman at Montreal, Que., fell under wheels of train and died two days after from injuries received; at Toronto, Ont., a brakeman, while getting out of way of one train stepped in front of another and was run over; a brakeman at Mattawa, Ont., was thawing water pipe under a car when train started and he was dragged a distance of seven miles, dying a short while after being extricated; at South Durham, Que., a brakeman was killed by being struck with a piece of deal with which he was trying to move a car on to a siding; while shunting at Drumbo, Ont., a brakeman's foot got caught in a frog and he was run over by train; at Port Lambton, Ont., a double engine crashed into a caboose in which a brakeman was and killed him, a brakeman at Strathroy, Ont., fell from the top of a car, rolled under the wheels and was crushed to death; a casualty of a similar kind occurred at Sherbrooke, Que., a brakeman again being the victim; a yardmaster at St. Thomas, Ont., stepped from one yard engine in front of another engine being shunted and was run over; a signalman at Toronto, Ont., was fatally injured by falling head first from a semaphore; a dining car hand at Renfrew, Ont., while getting something from a box under car, got his arm caught and he was dragged 27 miles under car, the body being frozen stiff when discovered. A glance at the above described fatalities will show that the occupation of a brakeman is one of the most dangerous of the railway classes of employment, it having furnished nine out of the twenty-six fatal accidents, locomotive fire-

men coming next with four. Of the non-fatal accidents, numbering thirty-four, in one case an engineer at London, Ont., became insane through the effects of a collision in which his fireman was killed. Three of the accidents were of a dangerous nature and may still have fatal effects, twenty-three were severe but not necessarily fatal and the balance were accidents of a comparatively slight nature.

In connection with industrial accidents to railway employees it may here be mentioned that for the year ended June 30, 1903, there were ninety more fatalities on the Canadian railways than in the previous year. The records of fatalities for the two years were as follows:—

| Year. | Passen- gers. | Em- ployees. | Other persons. | Total. |
|-----------------|------------------|-----------------|-------------------|--------|
| 1901-02.. . . . | 19 | 146 | 165 | 330 |
| 1902-03.. . . . | 53 | 186 | 181 | 420 |

On electric railways nine passengers were killed in 1903, as against eight in 1902.

General transportation.—Five fatalities and twelve serious injuries were reported under this heading. Of the fatalities a coal heaver at New Westminster, B. C., was struck by a heavy bucket while loading coal on steamer and was killed; in Toronto, Ont., a teamster while leading a horse and rig across a railway crossing was struck by an engine and killed; death came to a teamster at New Annan, N.B., while hauling logs. He was alone at the time and when the body was found a log lay across his neck; a teamster at Sheffield, Ont., was also killed by his load upsetting, falling upon him and breaking his neck; and a dredgeman at Langley, B.C., fell off the dredge and was drowned. Of the fourteen non-fatal accidents eight were of a serious nature and six of a slighter kind.

Miscellaneous.—There were thirteen fatalities and thirty-eight injuries reported under this heading. Before proceeding to go into any detail of individual fatalities or accidents it may be well to mention one accident in particular in which one loss of life occurred and seven were injured. This

was a small fire in the Toronto Engraving Company's premises, Toronto, Ont., at which eight firemen, engaged in combatting the flames, inhaled the fumes of nitric acid. This resulted fatally in the case of one of the firemen and the others are still under treatment. Of the fatal accidents one was that happening to a lighthouse-keeper at Langan, N.S., who, while driving from his light, fell over a ninety-foot cliff with his rig and was killed. An electrical employee at Deschenes, Que., while cutting anchor ice near the power-house, fell into the Ottawa river and was drowned. A telegraph messenger at Montreal, while crossing a railway track after an errand, was run over by a train. An oiler in a power-house in Sydney, N.S., got caught in a balance wheel making 1,200 revolutions per minute and was killed. A mass of ice in a wheel pit at Niagara Falls, Ont., fell on a labourer and killed him. At Galt, Ont., a chore boy sent on an errand, some distance into country, was afterwards found frozen to death. A labourer in Montreal, Que., was killed by falling from a railway car. An employee in the chemical works at Capelton, Que., while cleaning an acid tank, was overcome and killed by the poisonous fumes emanating therefrom. A milkman at Belleville, Ont., while crossing the track to deliver milk, was struck and run over by a freight train. A well-driller at Essex, Ont., while at work, the

chain holding an oak block weighing over 40 pounds, parted and the block fell crushing in his skull. A lady superintendent of immigrant children fell down the hold of the Allan ss. *Bavarian* at Halifax, N.S., a distance of 60 feet, and was instantly killed.

In addition to the fatal accidents, in the trades coming under the heading 'miscellaneous' thirty-eight injuries of more or less gravity have been received. The chief of the fire brigade at Glace Bay, N.S., was severely injured internally by the falling of a wall at a fire and four firemen in Montreal were at different times hurt while in the pursuit of their calling. Of the other injuries three were to employees of electric companies, one to a stationary engine fireman, six to labourers, one to a blaster in a quarry, three to railway construction employees at North Bay by the explosion of a powder and dynamite storehouse; one to an employee in a coal yard; one to a newsboy at Windsor, Ont., by being struck by a street car; four to factory hands in different localities; one to a paper mill operative; one to an employee in a cotton mill; one to a milkman in Montreal, Que., his sleigh containing cans upsetting and falling on him, and one to a penitentiary guard at Kingston, Ont., who, while helping to fix electric light, fell into a duct, a distance of ten feet, and broke his leg.

TRADE DISPUTES DURING THE MONTH OF FEBRUARY.

THE month of February was comparatively free from industrial disturbances throughout the whole of Canada. Only two disputes, which began before February 1, remained unsettled at the beginning of the month. These were a dispute affecting papermakers at Hull, P.Q., and a strike of coal-pit drivers at Sydney, N.S. Only five new disputes of importance took place, and none of them materially affected in-

dustrial conditions beyond the establishments immediately concerned. Four of these affected international trade organizations, and in the remaining one the employees belonged to no trade organization.

Analysis of Trade Disputes During the Month.

Number and Magnitude.—The magnitude of the new disputes of the month was

as follows in respect to the number of working people involved :

| Magnitude. | Number of Disputes. |
|--------------------------|---------------------------|
| From 6 to 25.. | 2 |
| From 25 to 50.. | 1 |
| From 50 to 100.. | 2 |
| Total.. | 5 |

The number of new disputes in February was four less than in January, and seven less than in February, 1903. Taking the first two months of each of the two years, there were 17 disputes in 1903, compared with 14 in the present year.

Loss of time in working days.—It is impossible to estimate very accurately the loss of time caused to employees by trade disputes in February, owing to the fact that with regard to the disputes affecting papermakers at Hull, Que., the company gradually resumed operations, taking back at different times the working peoples indirectly affected, and, on the other hand, a number of the papermakers left the place in the course of the month to seek work elsewhere. Omitting this dispute, the loss in the remaining five to working people directly affected amounted to 1,029 days, and to those indirectly affected the loss was 1,331 days. In the case of the dispute at Hull, Que., the loss to those *directly* affected may be estimated at about 4,500 working days, and to those indirectly affected the loss was about 3,200 working days. Taking these figures, the total loss to labour was approximately 14,555 working days, as compared with 16,560 days in the previous month.

Trades affected by new disputes.—The following trades were affected by the new disputes of the month :—

| Trades. | Number of Disputes. |
|----------------------------|---------------------------|
| Metal.. | 1 |
| Woodworking.. | 1 |
| Clothing.. | 1 |
| Food Preparation.. | 1 |
| Papermaking.. | 1 |
| Total.. | 5 |

Localities affected by disputes.—Four of the new disputes took place in the prov-

ince of Ontario, at Toronto, St. Catharines and Niagara Falls, and one in the province of Quebec, at Montreal.

Causes of new disputes.—The following were the causes of the new disputes of the month :—

| | |
|---|---|
| For increase in wages and other changes.. | 1 |
| Against reduction in wages.. | 1 |
| Against increase in hours of labour.. | 1 |
| Against discharge of employees.. | 1 |
| Against employment of particular persons.. | 1 |

Methods of settlement.—Of the seven disputes which were in existence during the month, four were definitely terminated, and in one the company claimed to be no longer affected. Two remained unsettled at the end of the month. Two disputes were settled by negotiations between the parties concerned; in one case the former employees were replaced by new men, and in another the men's demands were granted without negotiations.

Results of disputes.—One dispute ended wholly in favour of the employees, and one in favour of the employers. A compromise was effected in the other two disputes which were terminated in the course of the month.

Disputes Commenced Prior to the Beginning of the Month.

The two disputes which began prior to February 1 and were in existence during the month were those concerning the E. B. Eddy Company, of Hull, Que., and a strike of the coal-pit drivers of the Dominion Coal Company at Sydney, N.S.

There is little to say regarding the dispute of papermakers of the E. B. Eddy Company. In reply to an official communication from the department the company stated that they re-commenced operating the paper mills as open mills on Thursday, January 14, and that they have run them satisfactorily since. During the month many of the papermakers who had stopped work left the place and sought employment elsewhere, but the dispute was not officially declared off.

Strike of Coal-Pit Drivers at Sydney, N.S.

On January 29 a strike was declared by about 40 pit drivers employed at No. 2 colliery of the Dominion Coal Company, at New Aberdeen, N.S. The cause of the dispute was a notice issued to them on the previous day to the effect that, beginning on February 1, driving would be paid for at the uniform rate of \$1.38 per day. Under the system of scoring, or payment by the cartload, which had been in force, their earnings were said to have been considerably more than that when the pit was running at its highest capacity. A few hours after the strike had begun, a conference was held between the strikers and the acting manager, but no settlement was effected. The drivers were informed that the change was made owing to a desire of the company to reduce the output, as more coal was being raised than could be disposed of, and with a diminished production, the driving could be done by boys instead of by young men. On February 1, an arrangement was reached whereby the older drivers were given other work at \$1.65 per day, and they were replaced by boys, paid at the rate of \$1.35 per day. On the following day work was resumed at the mine. For the three days, while the strike lasted, all the miners in the colliery, to the number of about 1,200 men, were compelled to stop work through the action of the drivers, and serious results would therefore have been felt if the trouble had been prolonged.

New Disputes.

The four new disputes of the month were strikes of structural iron-workers at Niagara Falls, Ont., garment workers at Montreal, Que., picture-framers at Toronto, and papermakers at St. Catharines, Ont.

On February 3, a strike was declared by structural iron-workers of the Jenckes Machine Company, of Niagara Falls, Ont., owing to a refusal of the company to grant their demand for higher wages and for the remedying of certain grievances. The dispute affected 75 men, and lasted until February 9, when it was settled by a com-

promise. The wages of some classes of labour were increased and a new scale of 'bonuses' for extra work was introduced. Several changes were also made after the strike in regulations governing the men. A number of the strikers did not return to the work. No trade organization was involved in this dispute.

On February 4, a strike of garment-workers, involving 26 men directly and 14 indirectly, was declared at Montreal. The dispute affected the firm of Messrs. Shapiro & Silver, contractors for Messrs. Weuer Bros. The cause of the trouble was the discharge of two men, whom, the employees alleged, were dismissed on account of their activity on behalf of the trade union. On the 15th of the month the two men were reinstated and the strikers returned to work.

On February 5, a strike was declared by beer bottlers employed at the brewery of Messrs. Reinhardt & Co., Toronto, seven men were involved in the dispute. It was alleged by them that the company had not adhered to an agreement made with their Union last May, that preference of employment would be given to members of the union. After being out for three days, the men returned to work, the firm having discharged the non-unionists, and given their promise to abide by the terms of the agreement.

A strike of picture frame workers of the Cobban Manufacturing Co., of Toronto, was declared on February 15, and was still in existence at the end of the month. About 21 employees, members of the picture frame workers' union, were involved in the dispute. The cause of the strike was a reduction in wages of about 20 per cent and upwards. Towards the end of the month an offer of a settlement was made by the company, but on February 27 it was rejected by the men, because it provided that certain non-union men with whom contracts had been signed were to be retained. No further action was taken during the month.

Lockout of Papermakers at St. Catharines, Ont.

On February 29, a lockout occurred at the works of the Kinleith Paper Company, of St. Catharines, Ont., which involved 82 employees, 57 men and 20 women, and, indirectly, 5 foremen. The cause of the dispute was the posting by the firm of a notice of their intention to return to the longer hours of labour which existed before May 1, 1903. On that date, the working hours had been changed from 71 to 66 hours per week for tower men, and from 58 to 55 per week for day hands. The change to the shorter hours was made by verbal agreement, and there was a difference of opinion as to the exact terms of this agreement between the company and its employees. The company's position is indicated in the following statement, which was given to the press on February 29:—

'In the spring of last year we put our mill on what is known as the short time. It was then expressly agreed by our employees that they would resume the longer hours at the expiration of six months if all the competing mills had not in the meantime adopted the shorter time. We accordingly expected them to keep faith with us. A similar agreement was made by another local mill and they some months ago resumed the longer hours.

'We have always treated our help with consideration and pay them the highest wages obtaining for the various classes of labour. Under the circumstances this breach of faith is unwarrantable.

'We posted notices of change of time two weeks ago to take effect last Saturday and received no intimation that it would not be complied with until Friday. We then posted notices, dismissing employees who did not report for duty according to the new schedule. These were paid off to-day. It will only be a matter of a few days and we will have the mill running full, as we have already a number of applications.

'We do not know if a strike has been declared or not, but we intend to manage our own business and will in future run an 'open mill.'

Kinleith Paper Company, Limited,

F. A. RITCHIE,

President.

The employees made the following statement in reply to the company:—

'With reference to the letter published in the city papers by the Kinleith Paper Co., we may say that we have not broken our part of the agreement of last May. Last May we signed an

agreement with the Company, agreeing that if all the paper mills had not agreed to adopt the short schedule within six months of May the First, we would be willing to go back to the long hours schedule. The six months were up the First of last November. All the competing mills had adopted the short schedule. Our part of the bargain was fulfilled. The Company agreed that after six months, the agreement would be made permanent.

The Lincoln mills are not making the same grade of papers as the Kinleith—they only manufacture wrapping and rope paper. Their men work all night Saturday till 5 o'clock Sunday morning, but they are paid double time for Saturday night. They also get a percentage on their earnings. The Kinleith Company promised us time and a half for overtime.

In conclusion, the Kinleith Company say that they gave us two weeks' notice. It was practically only three days, from Thursday till Monday. Under the circumstances we believe the company have not kept their agreement with us, or treated us fairly. The stand we have taken, we believe, is the only one we could take, and until there is a change in the attitude of the company, it is the only course we can pursue.

We would suggest that the company publish the agreement they made with us and let the public judge.

Reported Strike of Printers at Quebec.

A report was received by the department of a dispute at Quebec arising out of an agreement between the Master Printers' Association and the International Typographical Union, signed on January 23, by which the compositors received an increase in wages. The union stated that the dispute began on February 1 and affected two firms and 14 men. The firms denied the existence of any dispute, and stated that everything had been arranged in a friendly manner. From information received, it appears that a number of men were discharged after the increase in wages had been granted, and their dismissal was regarded by the union as a lockout. Owing to the conflicting accounts of this trouble, it has been omitted from the statistics given in this article.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of February, and which have been reported to the department.

TABLE OF TRADE DISPUTES OF THE MONTH OF FEBRUARY.

DEPARTMENT OF LABOUR, CANADA.

STATISTICAL TABLES, SERIES C, No. 40.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No. of Establishments affected. | Approximate No. of Employees affected. | | Date of commencement. | Date of termination. | Result. |
|---|-----------------|--------------------------|---|---------------------------------|--|-------------|-----------------------|----------------------|--|
| | | | | | Directly. | Indirectly. | | | |
| DISPUTES WHICH BEGAN PRIOR TO THE BEGINNING OF THE MONTH. | | | | | | | | | |
| Quebec | Hull | Papermakers | Increase in working hours | 1 | 200 | 500 | Jan. 9 | | Company claims to be no longer affected. A compromise. |
| Nova Scotia | New Aberdeen | Coal pit drivers | Reduction in wages | 1 | 40 | 1,200 | " 29 Feb. | 1 | |
| DISPUTES WHICH BEGAN DURING THE MONTH. | | | | | | | | | |
| Ontario | Niagara Falls | Structural iron workers. | Demand for higher wages and changes in regulations. | 1 | 75 | | Feb. 3 | Feb. 9 | A compromise. Some strikers did not return. |
| Quebec | Montreal | Garment workers. | Discharge of employees. | 1 | 26 | 14 | " 4 | " 15 | Employees reinstated. |
| Ontario | Toronto | Brewery bottlers. | Employment of non-unionists. | 1 | 7 | | " 5 | " 8 | Non-unionists discharged. |
| " | " | Picture framers. | Reduction in wages. | 1 | 21 | | " 15 | " | No settlement reported at end of month. |
| Ontario | St. Catharines. | Papermakers. | Increase in hours of labour. | 1 | 86 | 5 | " 29 | " | No settlement reported at end of month. |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

UNIONS FORMED DURING THE MONTH OF FEBRUARY, 1904.

The department has received notice of the following organizations having been formed during the month of February, 1904 :—

Nova Scotia—

Dominion No. 2—Redpath Lodge, P.W.A. (juniors).

New Brunswick—

Moncton—Trades and Labour Council.

Quebec—

Grand Mère—Trades and Labour Council.

“ Plumbers.

Montreal—Female Garment Workers.

Ontario—

Guelph—Sheet Metal Workers.

Sarnia—Printers.

Toronto—Masters and Mates.

Manitoba—

Winnipeg—Carpenters' District Council.

North-west Territories—

Frank, Alta.—Miners (branch of the United Mine Workers' of America). The members of this organization are seceders from the Western Federation of Miners.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, FEBRUARY, 1904.

During the month of February, the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system and securing payment to the workmen and women of fair wages and the performance of the work under proper sanitary conditions :—

| Nature of order. | Amount of order. |
|--|------------------|
| Making and repairing metal dating and other hand stamps, also type and brass crown seals.. . . . | \$ 300 58 |
| Making and repairing rubber dating and other hand stamps and type.... | 24 90 |
| Supplying stamping material, inclusive of making and repairing pads, also post, marking and cancelling ink.. | 507 83 |
| Making and repairing post office scales. | 152 00 |
| Supplying mail bags.. . . . | 33 75 |
| Repairing mail bags.. . . . | 1,060 64 |
| Repairing mail locks and supplying mail bags and fittings.. . . . | 54 45 |
| Making and repairing boxes, portable letter boxes and repairing Railway Mail Clerks' tin travelling boxes.. | 193 48 |
| Miscellaneous orders for making and repairing postal stores.. . . . | 89 50 |
| Making up and supplying articles of official uniform..... | 204 25 |

REPORTS OF DEPARTMENTS AND BUREAUS.

THE following reports of departments and bureaus were received at the Department of Labour, Ottawa, during February, 1904 :—

DOMINION REPORTS.

Agriculture and Colonization.

Report of the Select Standing Committee on Agriculture and Colonization. Third Session, Ninth Parliament, 1903. Ottawa, King's Printer, 1904. Pages, 484.

The following subjects came before the standing parliamentary committee on Agriculture and Colonization during the session of 1903 :—Canadian Fruits in European Markets, Breeding Pure Stock, Climate and Soil of the Yukon, Drainage of Farm Lands, Agricultural Development, Farm Products and Foods, Management of the

Bee-hive, Raising Fruits and Vegetables, the Farm Poultry Yard, Management of Live Stock, Forest Preservation and Propagation, Binder Twine Act of 1902, and Canadian Immigration in 1902.

In the final report of the committee, some statistics are given, showing the great agricultural development of Canada during the past few years. The export value of cheese and butter increased from \$12,700,000 in 1892 to \$25,300,000 in 1902, and the export value of pork and bacon increased from \$600,000 in 1890 to \$4,500,000 in 1896 and \$12,500,000 in 1902. The export values of all farm or food products from Canada were in 1890 \$24,000,000, and in 1902, \$80,000,000.

The evidence presented to the committee with reference to Canadian fruits deals largely with the apple trade in England. The bulk of Canadian fruit goes to Liverpool, Glasgow and London. There is practically an unlimited demand for good apples from Canada, but there is no sale for poor fruit. A good trade could be established in pears, if only large, sound specimens are sent, and also in peaches, if they arrive in good condition. An indication of the extent of the Canadian export fruit trade is shown in the statement that during the season 1902-03 there were 1,470 inspections under the Fruit Marks Act, and the number of packages in the lots inspected was 154,022. The number of shippers whose goods were examined in Montreal during that season was 308.

Post Office Department.

Report of the Postmaster General for the Year ended June 30, 1903. King's Printer, Ottawa. Pages, 513.

During the fiscal year which ended on June 30, 1903, the revenue of the Canadian Post Office Department amounted to \$4,366,127.75, and the expenditure to \$3,970,859.64, leaving a surplus of \$395,268.11. Several reductions were made in the cost of postage. The domestic rate for newspapers was extended to many other British colonies, and Australia was added to the countries to which letters might be sent for two cents. The rate on newspapers and periodicals addressed from the offices of publication to subscribers within a radius of 300 miles was reduced from one-half of one cent to one-quarter of one cent per pound.

A fair indication of the prosperity of the country is shown by the transactions of the Post Office Savings Banks. The aggregate balance to the credit of depositors in this bank on June 30, 1903, was \$44,255,326.93, an increase of \$1,935,117.02 over the previous year. The average to the credit of each depositor increased from \$260.01 to \$264.96, and the number of accounts open

at the end of the year was 167,023, being 4,262 more than in 1902. The number of postal savings bank offices increased from 915 to 934.

ONTARIO REPORTS.

Vital Statistics.

Report relating to the Registration of Births, Marriages and Deaths in the Province of Ontario for the year ending December 31, 1902. King's Printer, Toronto. Pages, 258.

During the year 1902 the registered births in Ontario were 47,796, an increase of 1,735 over 1901. Comparing these two years, 30 counties show an increase of 2,344, and 14 a decrease of 609. The eastern counties of Prescott, Russell, Stormont, Glengarry and Dundas show decreases. The greatest increases were 595 in York county, 413 in Algoma, Simcoe, 106, and Northumberland and Durham, 109. The birth-rate per thousand of population was 21.7. This is much smaller than the rate in England and Wales, which was 28.5 in 1891. Part of this difference is attributed to imperfect registration in Ontario. The percentage of deaths, however, is smaller in Ontario, having been 12.6 per thousand in 1902, compared with 16.9 for England and Wales in 1901.

The total marriages recorded for the year were 18,072, being 37 more than in 1901; the rate varied from 26.7 in the county of Essex to 5.3 in the Rainy River district, with an average of 16.4 per thousand for the whole province.

There were 27,864 deaths recorded in Ontario in 1902, compared with 29,608 in 1901. The death-rate of 12.6 per 1,000 in Ontario is lower than any of the countries in Europe, the next lowest being Norway with a rate of 14.9 and Sweden with a rate of 16. The death-rate in Quebec is 19.9 per 1,000. The average rate for the fourteen cities of Ontario was 15.8 per 1,000, which is lower than all but two cities in Great Britain, these two being Leicester with 14.9 and Southampton with 15.2 per 1,000. The mortality, compared with population, was

high at North Bay and Port Arthur, the reason given being that, as they are essentially railway terminal towns in a new district, persons dying by accidents are inevitably brought to them. With regard to the causes of death, there was a marked decrease of communicable or epidemic diseases, and a slight decrease of cancer. There were 1,597 deaths from tuberculosis in 1903, compared with 2,826 in 1901 and 2,164 in 1902, showing a progressive decrease.

With reference to the accuracy of the statistics quoted above, it is stated that the marriage returns may be regarded as absolutely complete, and also the death returns, except perhaps in cases where fatalities occurred in frontier districts, but the returns for births are not quite so trustworthy, although their registration has improved from year to year.

Health Statistics for 1903.

Monthly Bulletin No. 10 for December, 1903.
Issued by the Provincial Board of Health of Ontario.

In a review of the returns received for 1903, the Secretary of the Ontario Board of Health states that there were 25,267 deaths from all causes during the year, out of an average population of 1,998,098, the death-rate being 12·6 per 1,000. Among the contagious diseases, the greatest mortality was due to tuberculosis, which caused 2,072 deaths, or 8·2 per cent of the total deaths reported. There were 820 cases of small-pox and 21 deaths, but this disease abated rapidly after the month of May, there having only been 109 cases and 2 deaths since the end of that month. Scarletina, from which there were 529 deaths out of 3,677 cases, was most prevalent during the first quarter of the year, but there was more diphtheria and typhoid fever during the last quarter.

Timiskaming and Northern Ontario Railway.

Second Annual Report of the Timiskaming and Northern Ontario Railway Commission, to December 31, 1903. King's Printer, Toronto. Pages, 48.

In the second annual report of the Timiskaming and Northern Railway Commission, the total cost of this road, which is being constructed by the commission for the Ontario Government, is estimated at \$29,755 per mile, which is made up of \$18,000 per mile for grading, bridging, &c.; \$7,000 for rails, ties, telegraph line, track-laying, &c.; \$1,000 for terminals, sidings, stations, water-tanks, &c., and \$3,000 for rolling stock. During the year arrangements were made with the Canadian Pacific Railway Company for terminal facilities at North Bay. The report gives the terms of contracts which were signed for the supply of steel rails, locomotives, rail fastenings, flat and box cars, and railway ties.

In the contract for railway ties, a special provision was inserted for the protection of employees of the contractor who agreed to supply them, which was as follows:—

'Cash payments equal to about ninety per cent of the value of the ties so delivered shall be made to the contractor monthly on the written certificate of the engineer, that such ties have been so delivered and accepted and such evidence furnished as aforesaid. . . . The remaining ten per cent shall be retained until the final completion of the whole work to the satisfaction of the engineer, and until the engineer shall be satisfied that all wages of all workmen, labourers and servants of the said contractor and of all sub-contractors under him as well as the price of all ties purchased by the contractor from other parties have been duly paid, &c.

In the report of the medical doctor, covering the work done on the first sixty miles of the road, from November 1, 1902, to December 31, 1903, there were among the workmen six fatal accidents, which he considered comparatively few, considering the hazardous nature of the work. There were 22 cases of small-pox, none of which were fatal, and there were two outbreaks of typhoid fever. There was also a large number of cases of scurvy during the latter part of the summer among Italian labourers, who boarded themselves, but no deaths resulted from it.

The chief engineer reports that at the end of 1903 seventy-six miles of the road were graded and 56 miles of track were laid. A telegraph line was also completed

to the 57th mile. The line of 112 miles now under construction passes through a territory rich in timber, minerals and game, with only patches of agricultural land. An extension of 80 or 90 miles is proposed, which would pass through a comparatively flat country, from twelve to twenty miles wide, with a soil of fine clay loam, and at the northern end it would enter a great clay belt, containing about 16,000,000 acres of fertile soil. The timber growing on this territory consists of cedar, pine, tamarack and a great quantity of pulpwood. There are good prospects of mining development east of the clay belt, a copper mine having already been opened. There are also slate, building stone, and other minerals.

Ontario Fairs and Exhibitions.

Annual Report of Ontario Fairs and Exhibitions for the year 1903. King's Printer, Toronto. Pages, 96.

The third annual report of Ontario Fairs and Exhibitions, which is published by the Provincial Department of Agriculture, contains addresses delivered at the annual meeting of the Canadian Association of Fairs and Exhibitions, which was held at Toronto on February 18 and 19, 1903, reports of expert judges who placed awards on the different kinds of live stock at the fall fairs in 1903, and some press reports of exhibitions where educational features were the chief attractions. An appendix is added to the report, containing notes on early agricultural societies and fairs collected by the Deputy Minister of Agriculture, in continuation of articles that appeared in the appendix to last year's report.

The advisability of abolishing attractions such as horse racing in connection with agricultural fairs, and making them of greater educational value, was discussed at the annual meeting of the association, and the speakers were all in favour of this step. This experiment was tried last year at the Whitby and Carleton county model fairs, and was reported to have met with success.

BRITISH REPORTS.

Labour Conditions in South Africa.

Reports of the Transvaal Labour Commission, London. Eyre & Spottiswoode, 1904. Pages, 81.

On July 2, 1903, a notice was issued by the Government of the Transvaal, South Africa, appointing commissioners to inquire what amount of labour is necessary for the requirements of the agricultural, mining and other industries of the Transvaal, and to ascertain how far it is possible to obtain an adequate supply of labour to meet such requirements from Central and Southern Africa.' After a full inquiry into the labour supply available in the whole of Africa, and the labour requirements of the Transvaal, the commissioners were unable to reach an unanimous conclusion, but they presented majority and minority reports, on the results of their inquiry.

The majority report, which is signed by eleven commissioners out of thirteen, deals at some length with the whole labour question of the Transvaal under the following headings: Historical introduction; Labour Requirements of the Transvaal; (a) Agricultural; (b) Mining; (c) Other Industries; (d) Railways; Analysis of the Labour Supply of the Various Countries included in the Area of Reference; Causes of Labour Scarcity; Suggestions to improve the Labour Supply; Observations upon some Aspects of the South African Labour Problem; Conclusion and Finding.

The finding of the majority of the commissioners is as follows:—(1) That the demand for native labour for agriculture in the Transvaal is largely in excess of the present supply, and as the development of the country proceeds this demand will greatly increase; (2) that the demand for native labour for the Transvaal mining industry is in excess of the present supply by about 129,000 labourers; (3) that the demand for native labour for other Transvaal industries, including railways, is greatly in excess of the present supply; (4) that there is no adequate supply of labour in Central

and Southern Africa to meet the above requirements. No solution to the problem was offered by the commissioners, although numerous proposals were discussed and examined.

The conclusions arrived at by the two commissioners who presented the minority report were: (1) That there is sufficient labour in Central and Southern Africa for present requirements, although effort will be required to obtain it; (2) that the present so-called shortage in the Transvaal is largely due to temporary and preventable causes; (3) that understanding future requirements to mean such as, if satisfied, will benefit the country as a whole, we consider there is also sufficient labour in the territories named above, for future requirements; (4) that in many ways the supply of native labour can be supplemented and superseded by white labour.

Seamen's Savings Banks.

Return relating to Seamen's Saving's Banks. London. Eyre & Spottiswoode, 1904. Pages, 5.

By the Imperial Merchant Shipping Act of 1894, the British Board of Trade is authorized to conduct a savings bank on behalf of British seamen, the funds of which are invested with the Commissioners for the Reduction of the National Debt. The last annual return of the Board of Trade relating to these banks shows that the re-

ceipts for the year ended November 20, 1902, amounted to £105,396 19s. 11d. At the end of the year there were 5,947 depositors, to whose credit there was in the bank the sum of £251,226 7s. 10d. During the year ended March 31, 1903, there were issued 2,248 money orders for the amount of £31,474 0s. 2d. In that year, wages were received to the amount of £193,595 1s. for transmission home from British ports through Board of Trade offices, post offices and local marine boards, and from foreign ports the sum of £62,131 19s. 10d. was received.

Free Employment Offices in the United States and Foreign Countries.

According to a report on 'Free Employment Offices in the United States and Foreign Countries,'* recently issued by the Massachusetts Bureau of Statistics of Labour, there are in the United States thirteen States in which there are free employment bureaus at the present time. The first one was established in Ohio in 1890. The other States in which they exist are Connecticut, Illinois, Kansas, Maryland, Minnesota, Missouri, Montana, Nebraska, New York, Washington, West Virginia and Wisconsin. The following table shows the work carried on by the free employment offices during the latest periods for which particulars were obtainable:—

| State. | Applications for Help. | Applications for Situations. | Positions filled. | For Year ended. |
|--------------------|------------------------|------------------------------|-------------------|-----------------|
| Connecticut..... | 10,966 | 14,198 | 7,679 | Dec. 1, 1902. |
| Illinois..... | 47,497 | 44,900 | 40,181 | Oct. 1, 1902. |
| Kansas..... | 1,434 | 1,588 | 1,281 | Dec. 31, 1902. |
| Maryland..... | 681 | 644 | 203 | Dec. 31, 1902. |
| Minnesota..... | | | *5,175 | Dec. 31, 1902. |
| Missouri..... | 15,944 | 11,836 | 7,263 | Oct. 1, 1902. |
| Montana..... | 5,807 | 7,288 | 4,856 | (17 months). |
| Nebraska..... | 1,564 | 2,034 | 1,402 | (7 months). |
| New York..... | 4,106 | 5,903 | 3,662 | Dec. 31, 1903. |
| Ohio..... | 36,613 | 26,968 | 21,428 | Dec. 31, 1902. |
| Washington..... | | | *25,905 | Dec. 31, 1902. |
| West Virginia..... | 1,304 | 1,208 | 1,044 | May 15, 1902. |
| Wisconsin..... | 23,019 | 22,077 | 20,772 | (124 weeks). |
| Totals..... | 148,950 | 138,734 | 109,733 | |

* Not included in totals.

With the exception of Montana, all the States mentioned above conduct the business of employment agencies under their respective bureaus of labour and industrial statistics and have a special appropriation for the purpose. In the case of Montana, there are two free employment offices, conducted at the expense of the cities of Butte and Kalispel, which are required to make monthly reports to the State Bureau of Agriculture, Labour and Industry.

The percentage of positions filled to the number of applicants for situations for the eleven of the States furnishing information was 79'12. The smallest proportion was in Maryland, where only 27'93 per cent of the applicants obtained positions, and the highest proportion was in Wisconsin, where 94'09 applicants secured work.

Two free employment offices in the United States have been discontinued. These formerly existed in California and

Michigan. In neither State was there any special legal provision for their maintenance, but they had been conducted by the State bureaus of labour statistics, in connection with their other work. The free employment bureau in California, which had been maintained partly by the regular funds of the Labour Bureau, and partly by charitable donations, went out of existence in June, 1897. Free employment offices were established at Detroit and Grand Rapids by the Michigan Bureau of Labour and Industrial Statistics in 1891, but in 1902 there were practically no applications, as the demand for labour was so much in excess of the supply.

Free Public Employment Offices in other Countries.

The report contains returns from eight other countries with reference to free public employment offices. These returns are summarized in the following table:—

| Countries. | Period covered. | Applications for Situations. | Positions filled. | Percentages of Positions filled to Applications for Situations. |
|--------------------|-----------------------|------------------------------|-------------------|---|
| Austria... | August, 1903.. | 18,848 | 13,031 | 69'14 |
| Belgium... | October, 1903..... | 2,183 | 758 | 34'72 |
| Denmark... | One year, 1902..... | 35,822 | 19,348 | 54'01 |
| France... | 1st quarter, 1903.... | 19,687 | 12,160 | 61'77 |
| Germany... | August, 1903..... | 78,801 | 59,931 | 76'05 |
| Great Britain... | September, 1903.... | 3,563 | 1,108 | 31'10 |
| New South Wales... | One year, 1901-2.... | 4,886 | 5,389 | 110'29 |
| New Zealand... | One year, 1901-2.... | | 3,704 | |

It is pointed out that these returns do not admit of comparison with each other, on account of the different systems in vogue in the various countries. For example, in the case of Denmark, only the city of Copenhagen is included, but for Belgium an aggregate is given for all the offices subsidized by the communes or otherwise. The majority of applicants in New Zealand were furnished with employment on public

works, but no record was kept of those who applied but failed to secure work, as such figures were unreliable, owing to the fact that an applicant might be registered at several offices at the same time. In New South Wales, the positions filled exceed the number of applicants, the reason being that situations were found for many who had registered at the offices during the previous year.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada :—

ONTARIO CASES.

Interpretation of Benefit Societies' Regulations.

The interpretation of the regulations of benefit societies with reference to suspensions for non-payment of dues has been recently before the courts. A. C. B. instituted proceedings against the Journeymen Barbers' International Union of America for the sum of \$60, being the amount claimed in connection with the death of his son, a member of the union. It appears that the deceased had fallen into arrears in July, 1903, and was suspended for not having paid his dues. He was reinstated, however, in October, having paid the reinstatement fee, and his dues were paid for September and October. He died on November 20, and was said to be in benefit standing at the time of his death. The principal question before the court was the interpretation of the expression 'benefit standing'—whether it meant sick benefit standing or simply death benefit standing. It appeared that a provision in the clause relating to sick benefits relieved the union from paying sick benefits to a member who had been suspended within six months of the time of the claim. The clause relating to death benefits seemed to be open to two readings. The plaintiff contended that it provided for the payment of \$60 funeral benefits to any member of the union 'in benefit standing,' and this benefit standing was not affected by the suspension clause or the reinstatement of a member. For the defence it was urged that there was connection with the suspension clause, and consequently the union refused to pay the \$60. At the trial Mr. Justice Monck reserved his decision, but has now given judgment for the full amount sued for.

The ruling in this case is somewhat similar in principle to a case decided in the province of Quebec in 1897 by Mr. Justice Pagnuelo (*Maille vs. l'Union des Ouvriers Boulangers*, R.J.Q., 12 S.C., 526). In this case His Lordship laid down the following principle with regard to the interpretation of these penalty clauses : 'That the deprivation of the benefits arising from the benefit society is a penalty which should be rigorously confined to the clearly defined cases, and cannot be extended by inference.'

(*Bishop vs. Journeymen Barbers' International Union of America Local No. 131*, Mr. Justice Monck, February 1904, Hamilton, Ont.)

Extension of Employers' Liability.

A recent decision in *Markle vs. Donaldson* by the Divisional Court, indicates a certain variance between the English Act on the subject of workmen's compensation and that of Ontario, with the effect of extending the liability of employers in this province. The case in point was as follows :—The plaintiff claimed damages for injuries which he sustained while in the employment of defendant as a carpenter, owing, as he alleged, to the negligence of defendant. Plaintiff was shingling a roof when the cleat upon which he was supporting himself gave way, and he fell to the ground and was severely injured. The court held that the cleat was part of the ways, works, &c., of the premises used in the business of the employer within the meaning of section 3, subsection 1, of the Workmen's Compensation Act; that there was evidence that it was defective in that it was not securely fastened; that the defective condition was the approximate cause of the injury, and that the defect was due to the negligence of the workman of defendants who did the work of putting on the cleats (the plaintiff not being one of the workmen employed in that work), and that there was evidence, therefore, upon which defendant might be found liable.

Order was accordingly made setting aside non-suit and directing a new trial.

It will be seen from the foregoing that the law affecting the liability of employers is carried further than it has yet gone. The learned judges point out that the provisions of the Ontario Workmen's Compensation for Injuries Act are different from those of the English Act, and express the view 'that the legislature of this province intended to place upon the employer a higher duty towards his employee than it was thought right in England to place upon him, and to make him answerable, as far as the condition or arrangement of ways, &c., is concerned, for the negligence of any person, whether in his service or not, to whom he intrusts the duty mentioned in the subsection, in the performance of that duty, in the same way and to the same extent as he would have been answerable at common law had he taken upon himself personally the performance of the duty.' 'Where an appliance necessary for the safety of the workmen is required in the course of the work, and the employer directs any one to provide it ready for the use of the workmen, that person is one intrusted with the duty of seeing that the appliance is proper. This, no doubt, is a wide extension of the common law liability of the employer, but it is to be borne in mind that, if he is made liable, he has his remedy against the person he has employed.'

(Markle vs. Donaldson, Toronto, February 1904. Meredith C. J. McMahon and Teetzel, J. J.)

Common Law Action for Damages.

The Court of Appeal, on January 25, 1904, unanimously confirmed the jury's verdict in the case of Thomas H. Traplin, against the Canada Woollen Mills. This was an action to recover damages for injuries sustained by the plaintiff while working in the defendant's mill at Hespeler,

owing to the fall of an elevator. The case was originally tried at Milton, and the jury, in answer to questions submitted by the judge, found in effect that the elevator was in a dilapidated condition of which the defendants were aware, and that although it was an elevator for lifting goods, yet the defendants permitted their workmen to use it and the plaintiff had used it with their knowledge. The jury found the damages in favour of the plaintiff, \$3,150, and judgment was entered for the plaintiff for that amount and costs. The case was carried to the Court of Appeal with the result above mentioned.

This case is of some interest inasmuch as under the The Workmen's Compensation Act the limit for damages which workmen may recover for injuries is \$1,500. In the present case, however, the plaintiff contended successfully that he was entitled to damages at common law, in which case there was no limit fixed.

(Traplin vs. Canada Woollen Mills, January 25, 1904, Court of Appeals, Toronto.)

In connection with the Grand Trunk Insurance and Provident Society, reference was made in the last number of the *Gazette* to several cases dealing with this subject. Among those referred to was that of Harris vs. the Grand Trunk Railway, and it was then said that the jury in that case had awarded \$400 to the plaintiff, notwithstanding the fact that he was a member of this society. Subsequently, however, Mr. Justice Britton who presided, dismissed the action, following the case of Holden vs. The Grand Trunk Railway, holding that members of the Grand Trunk Insurance and Provident Society have no other claim against the company.

APPENDIX

DEPARTMENT OF LABOUR,
 DIRECTORY OF LABOUR ORGANIZATIONS, 1904.

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 10.

APRIL, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,

OTTAWA, April 15, 1904.

A review of the legislation enacted by the Dominion parliament for the preservation of the health of employees on public works in unsettled and unorganized districts is given the place of chief prominence in the present number of the *Labour Gazette*. This legislation had its origin in certain objectionable circumstances which attended the construction of the Crow's Nest Pass branch of the Canadian Pacific Railway, under subsidy of the Dominion parliament, in 1897. These are referred to in some detail in the article, and a résumé given of the leading provisions of the Act passed and the regulations adopted for its enforcement. The relation of the Act to the health ordinances of the various provinces, under whose legislative control the subject of public health primarily falls, is also dealt with. The subject is one of special importance at the present moment, in view of the extensive railway constructions contemplated through vast unorgan-

ized districts in Canada in the immediate or near future.

Some important amendments to the Coal Mines Regulation Act of Nova Scotia were passed at the recent meeting of the legislature of that province, which prorogued on March 3. The amendments had chiefly to do with the granting of certificates to officials employed in mines, and more particularly to stationary engineers. A brief statement of the effect of the changes introduced is given.

In accordance with the plan announced in the February issue of the *Gazette*, the first of the series of quarterly reports on changes in the rates of wages and hours of labour in Canada appears in the present issue. The changes reported to the department during the winter season of 1903-04 are dealt with. Inasmuch, however, as a full statistical return of the December changes appeared in the January *Gazette*, prior to the adoption of the quarterly method of presentation above referred to, this material is not included, and the article, in consequence, is limited to the changes which took place in January and February.

Of the regular features of the *Gazette* the reviews of reports of departments and bureaus are of unusual number, owing largely to the reassembling of the Dominion parliament and of the different provincial legislatures. The monthly table of industrial accidents is also of greater length than any that has appeared in the *Gazette* since the adoption of this feature.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MARCH, 1904.

I. GENERAL SUMMARY.

EXCEPTIONALLY cold and stormy weather continued to cause general inconvenience to industry, the situation in this respect being, more particularly, during the first half of the month of March, even more unfavourable than during February. The province of Ontario, as before, was the section chiefly affected, though New Brunswick, Manitoba and the Territories were also visited by storms which caused considerable interruption to industry. The month, however, showed a marked increase in the activity of general employment over February, nearly all of the industries and branches of trade being affected, and in some cases, as will be seen by reference to the reports of correspondents, a very marked improvement being the result. As compared with the corresponding month of a year ago less favourable conditions in several occupations are shown. For example, bricklayers and masons are still generally idle, whereas a year ago they were for the most part employed, and the delay in the opening of navigation has also prolonged the season of idleness for a very large body of men at several important centres of industry. The damage to property, caused by snow and floods, as well as the loss of employment directly or indirectly attributable to the bad weather, has reacted unfavourably, retrenchments being already announced in certain branches of the railway service. On the whole, however, prospects for a successful summer season were generally favourable at the close of March.

Changes in Wages and Hours of Labour.

A noteworthy feature of March was the number of instances in which last year's schedules of wages and hours were renewed, in their entirety or with little material alteration, to cover the active season of 1904. The building trades in particular furnished several instances of this tendency, though in a number of important centres different branches of these trades had the subject of

new schedules under discussion, as, for example, the plumbers, carpenters and builders' labourers at Toronto, Ont., carpenters at Montreal, Que., painters at Quebec, Que., &c., without a final decision being reached at the end of the month. A new schedule for railway clerks in the employ of the I.C.R., was another important change under discussion. Of the changes reported to the department the general result was in the nature of an improvement in working conditions as the following enumeration will show :—

Change in wages.—Marine firemen in the employment of the Toronto Ferry Company, the St. Catharines Navigation Company and the Hamilton Steamboat Company, all with headquarters at Toronto, were increased from \$35 to \$40 per month. Firemen employed on the Dartmouth, N.S., ferry received an increase of \$1 per week on March 19. Picture framers at Toronto also received a new scale involving an advance in wages. Stonecutters at London, Ont., Brantford and Niagara Falls, Ont., received increases. Bricklayers at Guelph, to the number of 30, received an increase amounting to 25 cents per day, dating from April 1. Builders' labourers in Galt were changed on March 24 from a general rate of 18 cents per hour to one of 20 cents per hour for first-class men. Bricklayers at Sherbrooke, Que., had their schedule rearranged on the basis of a nine hour day, and painters in the same city also received a new rate of \$2 per day of nine hours. Carpenters at Peterboro, Ont., received an increase from 22½ to 25 cents an hour. A rearrangement of wages schedules involving increases was announced in the closing days of the month to effect employees of the Dominion Iron and Steel Company at Sydney, N.S., in April.

Change in hours.—At Guelph, Ont., 15 stone-cutters had their hours reduced from

nine to eight dating from April 1, and yardmen, yard engineers and yard foremen in the employ of the G.T.R. at Niagara Falls, Ont., received a reduction in hours with a corresponding reduction in pay. Coal men in the employ of the G.T.R. Belleville, Ont., were also granted shorter hours. At Victoria, B.C., painters were granted an eight hour day.

At Winnipeg, Man., a proposal that the early closing by-law, under which shopkeepers are compelled to close at 6 p.m., should be interpreted so as to allow of stores remaining open, from fifteen to thirty minutes after that hour for the convenience of the public, was declared by the Supreme Court to be contrary to the intention of the by-law which is framed under the Shops Regulation Act of the province.

The Cost of Living.

In spite of a general and marked decline in the price of wheat, prices of bread in a number of localities remained at the high level reached after the recent advance. At St. Catharines an increase from 12 cents to 13 cents per 4-pound loaf, and from 10 cents to 11 cents for the 3-pound loaf also occurred in March. At Toronto, however, the bakers, after a conference, decided not to raise prices while the erratic condition of the wheat market continued. In Montreal bread is now selling at 15 cents for the large loaf. At Brantford the 2-pound loaf went up from 5 cents to 6 cents, flour having advanced by \$1 a barrel during the last few weeks at that point. Towns and villages in the locality were affected in like manner. At Kingston bread is stated to be higher than in the last 40 years, viz., 12 cents per 3-pound loaf. The price of oatmeal has also gone up at several points in Ontario. Eggs show a marked decline from the high prices of February, though some scarcity was again reported towards the close of the month. Poultry was generally scarce and dear, and fish, especially lobsters, were high in price. A scarcity of houses of medium size and rentals was very widely marked, Montreal, Ottawa, St. Cath-

arines, Hamilton, Guelph and Winnipeg being the points at which the stringency was particularly felt. Throughout Nova Scotia also a house famine is reported from the leading industrial centres as a result of recent increases in the industrial population. New Glasgow, Amherst, Sydney Mines, Digby, Milton, the Annapolis Valley and the different colliery centres are named as the points at which the problem is most pressing, rentals being on a higher level than ever before reported.

The Weather Blockade in Ontario.

The situation in western Ontario resulting from unfavourable weather conditions, which have interfered with industry so seriously during the past winter season, showed little change in the first two weeks of March, the reaction upon the general market for labour being if anything intensified rather than diminished.* The weather continued exceptionally severe and stormy, the opening weeks of the month being characterized by two of the heaviest storms of the season, with the result that transportation on the railways was reduced to even greater straits than was the case in February, with the increasing depth of snow, the derangement of telegraphs, and the damage done to switches, semaphores, &c., by frost. The alternation of rain and snow, and of mild and cold weather, was a particularly injurious factor. The northern half of the peninsula lying between the Georgian Bay and Lake Erie was the sec-

* A special investigation into the effects of the weather blockade on industry throughout Canada during the months of January and February was made by the Department of Labour and the results set forth in the form of a special article which appeared in the *Labour Gazette* for March at page 187. As full and accurate information as possible was secured with regard to the situation, and an analysis of the various results presented under the headings of the several trades and industries, general social conditions, trade and commerce, conditions of employment, &c. Nearly all of the conditions therein portrayed were continued during the opening weeks of the month of March, and the reader is referred to the article in question for a full statement as to the extent to which industry was interfered with, reference in the present issue being in the main to new features which have developed during the course of the past month.

tion which suffered most severely, many of the towns in this portion of the country being shut off from communication for periods in many cases of from one to two weeks' duration. Between Owen Sound and Toronto, for example, railway traffic was at one time suspended for a period of seventeen days. New Brunswick and Quebec also suffered from storms and low temperatures, and in Manitoba and the Territories the worst storm of the season occurred on March 24 and 25. As was the case in February, the chief inconvenience resulting from this blockade on the railways was through the shortage of coal, which in a number of localities amounted to a famine in that commodity, causing factories to shut down, and resulting in much inconvenience and some distress in private life. Householders were in many cases compelled to share their supplies, and at Seaforth a number of families were forced to move temporarily into the town hall in order to economize fuel. In many cases, moreover, famines in other staple commodities were reported from different points in the district affected. Thus, at Kincardine coal oil and provisions of nearly every sort ran very short, causing much anxiety lest actual suffering should supervene. Much damage was done to property by the crushing in of roofs and falls of snow and ice were the cause of many accidents—some of them fatal. Particular inconvenience during the month was caused by the delays in transmission of the mails, delivery throughout the section chiefly affected having to be made by sleighs at a greatly enhanced expense to the service. There was, of course, great danger and suffering involved to the travelling public, and all classes suffered from the bursting of pipes and flooding of cellars. With regard to the general effect upon employment, the situation for labour during March, as compared with previous years, was rendered much worse by the delay caused in the opening of navigation, and the activity in the several branches of labour accruing from that circumstance, the ice fields in the great lakes being the most heavy and

extensive ever observed since ice reports have been issued by the weather bureau. The same backward conditions delayed operations in other industries, notably, in agriculture, fishing and the building trades. Retrenchments, moreover, undertaken by the railways in order to meet the large additional outlays occasioned by the weather were, at the end of the month, causing slackness in employment at Stratford, Toronto and other points on the Grand Trunk Railway. The number of extra men required for snow removal and street cleaning was very large.

Damage Caused by Floods.

As a new development of the month, from the standpoint of the effects of the weather on industry, the floods reported from certain localities, caused by heavy rain storms and the disappearance of the unusual accumulation of snow, are worthy of special mention. In several instances heavy loss of property has resulted from this cause and great inconvenience in ordinary traffic, the railways, roads and streets being practically impassable in many localities from washouts, sweeping away of bridges, &c. Probably the worst instance was recorded at London, Ont., where the River Thames rose to a point eleven feet above normal, being two feet higher than has been reported since the disastrous flood of July, 1883, at that point. Families were driven from their homes, and one fatality and much loss of property from flooded dwellings resulted, workmen being the class chiefly affected. Marieville, Bedford, St. Hyacinthe, and other localities in Quebec, and St. Mary's, Galt, Toronto, Port Burwell and Guelph were also localities at which damage was done by floods, washouts, &c. At Toronto Junction a freshet resulted in the breaking of the city water main, causing a water famine and the shutting down of several industries, and at St. Catharines, Brantford, Woodstock, Ingersoll, Chatham, Dresden, Wallaceburg and other points, several industries were compelled to close down owing to the flooding of the premises. The effect of the accumu-

lation of water on the tracks has also been severely felt by the railways, both steam and electric, the results being especially damaging when frost supervened. In some sections, more particularly in the counties of Essex and Kent, Ont., farmers have met with great loss and inconvenience. In the majority of towns and cities, however, the spring thaw proceeded slowly, and much damage, which would have been caused had a more rapid disappearance of the snow taken place, was avoided.

Other Interruptions to Industry.

No interruptions of a serious character, other than that caused by the weather, occurred to industry in Canada during March. The strike situation shows a great improvement over that of March a year ago, there being 11 trade disputes reported as in existence during the month as against 31 in March, 1903; an increase of 4 is shown over the returns for February. A few fires which affected employment were reported, though none were of great extent. In the list may be included the destruction of a large block of stores and warehouses at Collingwood, Ont.; the burning of the D. W. Thompson Casket, Furniture and Mattress Company, Toronto, on March 8, which was accompanied with considerable danger to the safety of employees; the partial destruction of the plant of the Eaton Brothers Brewing Company, at Owen Sound, Ont., on March 11; the destruction of the Maritime Nail Works at St. John, N.B., on March 11, which threw 85 men out of employment; a fire which occurred in the mule room of the Canadian Coloured Cotton Company at Cornwall on the 15th, and the destruction of the Baird Bros. Furniture Factory at Plattsville, Ont., on March 17.

Conditions in the Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada, as indicated by the reports of correspondents of the *Labour Gazette* for March, and by information collected by the depart-

ment from other sources, may be briefly summarized as follows:—

Agriculture.

Conditions considerably improved during March, though the continued severity of the weather in Ontario exercised a most injurious influence, the impassable nature of the roads preventing marketing and the work of cutting cordwood usual at this time of the year. Preparations for spring work, however, were begun, though the prolongation of the cold weather and the depth to which the frost penetrated the ground will make the opening of active operations very backward. Live stock has wintered well, but with an increased consumption of fodder. A scarcity of farm labour, moreover, has already caused anxiety in Ontario, and parties of immigrants arriving are being eagerly engaged. In Manitoba it is estimated that 100,000 men will be required to harvest the crop of 1904.

The winter apple trade of Nova Scotia finished an excellent season, the European markets having been uniformly favourable, and the increase in exports amounting to over 725,000 barrels.

Among important agricultural meetings of the month were the following:—

The twenty-ninth annual meeting of the Farmers and Dairymen's Association of New Brunswick, held at Fredericton, N.B., March 22 and 23; about 100 delegates were present.

The Eastern Ontario Good Roads Association, Ottawa, March 18.

The Nova Scotia Good Roads Association, Truro, N.S., March 28, 60 delegates being present.

The Niagara Fruit Growers' Association held a series of meetings, at which demonstrations were given of improved methods of spraying, &c.

A National Association of Stock Breeders of Canada was organized at Ottawa on March 8.

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

At various dairy conventions held in March the chief of the dairy division, Ottawa, made a strong appeal for the use of stronger cheese boxes. Boxes, he stated, should be made of heavier material and should be put together with greater care.

The annual report of the Minister of Agriculture shows exports of farm products

to have increased from \$80,705,184 in 1902 to \$99,420,195 in 1903.

The final crop bulletin of the Northwest Territories for 1903 was issued on March 22. It places the total wheat yield for the Territories at 16,111,569 bushels, or an average of 19 bushels per acre. For the

DEPARTMENT OF LABOUR, CANADA,

[illegible]

* Butchers dull.

Bushels.

Fruit prospects in some parts of Ontario are also thought to have been injured by the severe weather, the fruit buds having been killed and field mice having been particu-

larly destructive. A deputation of western Ontario fruit-growers interviewed the Hon. Minister of Railways at Ottawa relative to permission being granted to the Dominion Express Company to do business over the Intercolonial Railway system so as to avoid transfers from one express to another at Montreal and thereby facilitate fruit shipments.

Fishing.

With the closing of the smelt and eel fishing season on the Atlantic conditions were rendered somewhat dull, rough weather having seriously interfered with the cod and haddock fleets. Preparations for the opening of the lobster and herring season, however, were actively proceeded with.

The experiment of curing Canadian herrings according to the Scotch plan, in order that they may compete with the Norwegian and Scotch herrings in the markets of the world, will be begun on May 1, six Scotch herring curers and their assistants having been brought out to superintend operations. Canso, N.S., has been selected for the test which will last about three months.

An interview between the Deputy Commissioner of Fisheries for Ontario and officers of the Dominion Department of Fisheries was held in March, and a number of regulations relating to close seasons, size and quantity of fish to be taken, use of dip nets and lights, exports of fish, &c., were agreed upon. A conference was also held at Detroit, Michigan, between representatives of the various states and provinces bordering on the great lakes for the purpose of securing uniformity of fishery regulations as between Canada and the United States. A plan was agreed upon, subject to the ratification of the governments concerned.

High prices for fish prevailed during March. The result of the rise in price of the cheaper grades of salmon will be to encourage the putting up of a large pack of these grades during the coming season. The wages question is already under discussion in British Columbia. The question of permitting the use of trap nets for the

taking of salmon was discussed at Ottawa during March.

Lumbering.

In eastern Canada the feature of the month was the closing of active operations in the woods and the return of the men from the shanties. A favourable season's work and satisfactory cuts were reported in Quebec and in New Brunswick; in Ontario the unusual depth of snow in the Ottawa valley hampered operations and increased expenses, as well as causing, in the case of some camps, a shortening of the season by two or three weeks. In the Lake of the Woods district, however, the cut is estimated as one-third larger than last year. The scarcity of men for the camps, which prevailed last autumn, also led to the employment of an unusual number of inexperienced hands with more or less injurious results. In all three provinces the work of preparation for the drives was begun almost immediately on the cessation of cutting, the men being engaged at exceptionally high wages. Low water and anchor ice caused interruption to saw milling in some localities for short periods. The number of logs hung up in the woods last year, which will be floated during the present season, however, will insure, it is expected, a busy summer's work for the mills, thus compensating for any local shortage in the cut. Lumber prices showed a tendency to stiffen, owing to the unfavourable circumstances attending the cut and the blockade of traffic on the railways. In British Columbia some severe losses of logs from booms were reported owing to rough weather along the coast. The stagnation, however, which has prevailed during the last few months in the lumber market, was somewhat relieved by the arrangement with regard to the North-west market arrived at as a result of negotiations between the C.P.R. Co., and the British Columbia Lumbermen's Association whereby there will be a decrease in the selling price in the territory affected, as a result of certain reductions in freight rates as well as in the prices quoted to retailers. Both the coast and mountain lumbermen

became parties to the agreement. Under the new rates freights on rough cedar, hemlock, spruce and all woods except fir will be reduced from 50c. per 100 lbs. to 40c., the rate now charged on fir, making a uniform price on all rough lumber. The cut made by lumbermen on rough lumber was \$1 per M. feet. The joint reduction in price and freight rates amounts to about \$3.50 per M. feet.

The Lumbermen's Association of Ontario held its annual meeting at Toronto on March 17. Resolutions favouring the preserving of young pine and the re-forestation of limits, as well as the better regulation of railway traffic so as to prevent car shortages and excessive rates, were passed. The statistical report of the secretary showed that the total production of mills in northwestern Ontario for 1904 would probably amount to 420,000,000 feet, as against 485,000,000 feet last year, and 510,000,000 feet in 1902. Stocks in pile at the mills are estimated at 150,000,000 feet, of which 100,000,000 feet are sold. Low grade lumber was reported as particularly scarce. Prices, it was stated, would certainly not decline, and would probably show an increase of 10 per cent over last year.

An agreement with the Dryden Board Mills Company, Limited, of Dryden, Ont., for the erection of a pulp and paper mill at Dryden, to have an output of 30 tons of pulp per day, and to employ 75 men continuously, the mill to be completed within two years, was presented to the Ontario legislature for ratification during the month. The company receives exclusive rights to certain limits and to the water power of Wabigoon Falls, near Dryden.

The Canadian Forestry Association held its fifth annual meeting at Toronto on March 11 and 12. The directors' report showed a growth in membership from 409 to 512. A number of papers were read by members on the subject of re-forestation and education in forestry.

The Western Retail Lumbermen's Association held its annual meeting at Winni-

peg, Man., on March 23, when the question of freight rates was discussed, officers elected, and other business transacted.

Mining.

In Nova Scotia employment at the collieries during March was active, double shifts working in several pits in anticipation of the opening of navigation. The outlook in the market has improved, and indications point to a heavy output from the collieries during the coming season. In British Columbia active conditions continued at the collieries both on Vancouver Island and in the mines of the Crow's Nest Pass Coal Company. Metaliferous mining was also buoyant, the outputs having increased, and many additions being made to the staffs of employees, especially in the Rossland camps, where heavy increases were made in the pay rolls of different companies. A rich strike in high grade copper ore was reported from Oyster Harbour, Vancouver Island, B.C.

The annual report of the Dominion Coal Company showed a satisfactory year, in spite of the loss caused by the fire in Dominion No. 1. The total output amounted to 3,147,766 tons, as compared with 3,174,227 tons last year. The earnings, however, were only \$1,756,023, as compared with \$2,154,955.99 last year, the falling off being accounted for by the increased cost of material and the closing down of Dominion No. 1, necessitating the working of the other mines at high pressure and increased cost in order to cover contracts. The Nova Scotia Steel and Coal Company's report shows a large increase in business for the last year, the company being now the second largest producer of coal in Nova Scotia. The profits were \$200,000 higher than in any previous year in the company's history, amounting to \$859,397.19.

A decrease of one per cent in the total mineral production of Canada during 1903, as compared with 1902, is shown by a preliminary statement issued by the Geological Survey Department. Gold, copper, nickel, silver and iron were the more im-

portant metals produced, in the order named. According to the report of the Ontario Bureau of Mines for 1903, the total value of mineral products raised in Ontario during the year was \$12,797,444. Some 10,588 men were employed in the Ontario mines, at wages aggregating \$4,200,-373.

The preliminary steps were taken at Petrolea, Ont., on March 4, for the formation of an association for the protection of the interests of Canadian oil producers. The incorporation of the Canada Consolidated Oil Company was reported in March, being an amalgamation of four Canadian oil companies previously in existence. The capital of the new company will be \$1,000,000, divided into 10,000 shares. The head office will be in Toronto. The four companies included are: The Grant-Hamilton Company, Toronto; the Canadian Oil Refining Company; the Canadian Consolidated Company, and the Sun Manufacturing Company of Hamilton.

Manufacturing.

Weather conditions during the greater part of the month were particularly unfavourable, reproducing in Ontario many of the worst features of February, as a result of the blockade on the railways. Coal shortages caused many factories to shut down completely or to continue on short time. In other cases the inability to market finished products caused much embarrassment. In addition to these difficulties, floods in several localities caused a cessation of work. Apart, however, from these considerations the industry reported very active conditions with a good market for products, and prospects for trade and for the development of manufactures in western Canada particularly bright.

A deputation representing the beet sugar industry waited upon the Premier of Ontario during March, with the object of having the bounty allowed by legislation, which expires with the forthcoming season, extended for a longer period. The industry, it was contended, was a most favour-

able one for the farmers and in the end would be profitable though it had met with unusual initial difficulties. The Premier later gave notice in the legislature of a resolution to increase the fund by \$150,000 during two further years. Of the four factories existing in Ontario the one at Wiarton has gone into liquidation, while that at Dresden is not in operation, owing to the difficulty of securing beets as a result of the proximity of the Wallaceburg factory.

An improvement in conditions in the steel-making industry was noted during the month, especially at Sydney, N.S., where the construction of a steel rail mill was being favourably considered. The first annual report of the Montreal Steel Works, Limited, showed a net profit of \$105,584.86 as a result of the year's operations.

The purchase of the plant of the Locomotive and Machine Company, situated at Longueuil, near Montreal, by the American Locomotive Company, was concluded on March 8. It was announced that the plant would be immediately put in shape to build from 150 to 200 locomotives a year and that it will, when in full operation, employ 2,000 hands. The works include a large plant for the manufacture of structural steel bridges which will also be operated.

A large real estate transaction was reported at Niagara Falls, Ont., resulting in the transfer of 2,500 acres of land lying between the Falls and Chippewa and including a water frontage. The land transferred includes nearly every available factory site within some distance of the Electric Power Development Works. It is proposed to lay out the eastern section of this tract in factory sites and the western section as a town site. The corporation making the purchase is capitalized at \$5,000,000.

Plans for the organization of the Consolidated Lake Superior Company were completed during March. The Premier of Ontario introduced a Bill into the legislature guaranteeing the bonds of the new

company up to \$2,000,000, the company agreeing to complete the Algoma Central Railway as far as the Canadian Pacific Railway, to operate it for the accommodation of passengers and freight, to paying off the Speyer loan and other liabilities, to reimburse the banks for money advanced to pay workmen's wages, to organize a company to carry on the works at Sault Ste. Marie and elsewhere, and to guard the province against loss from its guarantee. The Lake Superior Corporation, under which title the Canadian Improvement Company will underwrite the new company, is capitalized at \$40,000,000 with \$10,000,000 first mortgage bonds and \$3,000,000 income bonds additional. The entire assets of the former company are taken over at a cash valuation of \$8,000,000.

Transportation.

The chief feature of March, as above stated, was the demoralization of the railway service in western Ontario in the opening weeks of the month, as a result of the heavy storms and the exceptionally cold weather. Conditions in this respect were much worse than in February owing to the cumulative nature of the difficulties with which the railways were called upon to contend. Cuttings were filled with snow to a depth never experienced before, and the alternation of thaws and frosts caused an accumulation of ice on the tracks which was exceedingly obstructive to traffic and difficult of removal. The result was an interruption of general traffic even worse than was reported in February, trains being stalled or cancelled for days at a time in nearly every portion of the territory affected. This, in the latter half of the month, was extended to western Canada, which had previously escaped any unusually severe weather conditions. The losses occasioned to the community at large have been referred to above; to the railway companies they were of the most serious importance, in the disablement of engines, snowploughs and other rolling stock, in decreases in receipts, and in the enormous expense for labour in keeping the tracks

open. In the case of the Grand Trunk Railway these are estimated at \$1,300,000, of which \$300,000 were for snow removal, and \$1,000,000 represents the falling off in receipts. These losses it is now proposed to meet by the cutting down of staffs and other retrenchments. The employment of train crews, however, and other classes during the past month was unprecedentedly heavy, and, as in February, the devotion to duty of the employees under trying circumstances was greatly appreciated by the general community. Carters and expressmen suffered from the interruption of freight shipments, and the classes of labour dependent upon the opening of navigation for employment were still in idleness at the end of the month, with the prospect of the season being at least two weeks later in opening than last year.

The operations of electric street railway systems also suffered severely from weather conditions, the services in several cities being interrupted, and much damage to rolling stock resulting; the increased consumption of power required to operate them was also a factor. The coasting steamship lines on the Atlantic were also much impeded by ice in the harbours, trade and employment suffering in consequence, and considerable damage being done to vessels caught in the ice. Transatlantic lines were also inconvenienced by the non-arrival of freights.

Prospects for railway construction in Canada during the coming season are for perhaps the most active season in the history of the Dominion, not only in the operations attending the opening up of new districts to settlement, but in the older sections of the country. Repairs to roadbeds of damages done by the present severe season are expected to be extensive. In western Canada the Canadian Pacific Railway has arranged for several important extensions of branch lines, hundreds of miles of new track being included in the aggregate. The Pheasant Hills extension and the branch from Arcola to Regina are leading instances. A Bill was also intro-

duced into the Ontario legislature during March to extend the Temiscamingue Railway to a point on Lake Abitibi, in order to effect a junction with the Grand Trunk Pacific, the final modifications to the contract regarding which were announced early in March, and the deposit of \$5,000,000 by the company being posted on March 9. In addition a number of hotels, stations and other buildings will be erected. Important additions to rolling stock are announced by the leading companies, several large contracts having already been given. For example, an order for 21 locomotives to be built in Canada, of the heavy freight type, and to be ready in time for the moving of crops next fall, was placed by the Canadian Pacific Railway during March, and 6 new Atlantic-type engines were recently placed on the Canada Southern division of the Michigan Central, with 19 others to be added at an early date. Several electric railways are proposed in Ontario and Quebec. The Canadian Lake Marine is also contemplating large additions to the number and capacity of its vessels.

The Grand Trunk Railway report, issued on March 4, for the half year ending December 31, shows gross receipts amounting to £3,138,428, an increase of £326,590. The number of passengers carried showed an increase of 451,422, and there was an increase in freight of 59,170 tons. The increase in the cost of maintenance and equipment amounted to £52,485, and in cost of transportation to £79,616. The surplus revenue amounted to £398,800.

The new Canadian Pacific Railway shops, known as the Angus shops, at Montreal, Que., were completed during March, with the exception of the power house, and the installing of the plant begun. The shops are intended primarily for the maintenance of rolling stock on the eastern division of the system, though new locomotives, cars, switches, frogs, &c., will be manufactured.

The Bill of the Windsor, Essex and Lake Shore Electric Railway was amended in

the railway committee of the Ontario legislature by striking out the clause permitting agreements of municipalities for Sunday cars.

It has been determined not only to light Welland canal by electricity, but to operate gates, bridges and sluice ways on the canal by the same motive power.

Conditions in the Trades.

Employment in the various trades was active throughout March as compared with February, in spite of the injurious effects of the weather in several departments. In the *building trades* there was a marked improvement, though the season is exceptionally late in opening, and bricklayers and masons were still in idleness at many points at the end of the month. Prospects for an active season, however, were good. The *metal trades* were generally busy, at some points exceptionally so, though at others the retrenchment policy determined upon by the railway companies has seriously affected the outlook in these branches. In the *woodworking* and *printing trades* activity prevails. Journeymen tailors and others engaged in the *clothing* branch were active in anticipation of the easter trade; and in the *food and tobacco preparation* and *miscellaneous* branches a satisfactory month was reported, except in cases where delayed transportation facilities reacted upon employment. Thus butchers in some localities had a bad month, owing to the non-arrival of shipments of live stock. The *leather trades* had a satisfactory month. The market for *unskilled labour* has been generally dull, except for the large amount of extra employment entailed by the work of snow removal on railways and elsewhere.

The Transportation Commission.*

The Transportation Commission appointed by the Dominion government met in Kingston on March 3. After explaining the scope and work of the commission the

*The statement given herewith, relating to the meeting of the Commission at Kingston, was supplied by Mr. Wm. Kelly, Correspondent to the *Labour Gazette* in that city.

Chairman called on prominent local marine men for their opinion as to methods of bringing grain from Fort William to Montreal. The president of the Kingston Board of Trade pointed out that a year ago 2,000,000 bushels of grain had been shipped from Fort William, and of this 20,000,000 went via Buffalo. As a result 500 men from all parts of the Dominion went before the government with the request that the canal tolls be thrown off. This request was acceded to, and more grain had come by the Canadian route than ever before. If the Welland canal was enlarged and straightened more grain could be brought down this way. The shortest route proposed would require only eight locks instead of twenty-five as at present. The lock would be forty feet deep, as the drop from Lake Erie to Lake Ontario is 320 feet. Then the locks should be made longer and wider, so that a whole tow could get in, as at Sault Ste. Marie, where the lock is 900 feet long.

Coming to the carrying of grain from Kingston to Montreal, figures were given as to the difference in cost between steamers and barges. The expenses of three steamers between these two places, counting four days for the return trip, would be \$1,080. Three large barges could do the same work for \$740. Then the cost of building three steamers, to carry 60,000 bushels each, would be \$375,000. Three barges of equal capacity and a first-class tug would cost but \$60,000. A grain dealer of thirty-one years' experience was of opinion that the enlargement of the Welland canal would cheapen the carrying of grain. With improved Welland canal locks, allowing vessels to get through in eight or ten hours, instead of twelve and fourteen as at present. It was pointed out that a grain vessel could come from Port Dalhousie to Kingston in one day. A 250,000 bushel vessel could earn \$250. If expenses were \$600 for the trip down and back, there would be a profit of \$650 for two days. Discussing rates, it was said that the rate from Fort William to Buffalo was 1½ cents a bushel ;

from Buffalo to New York at least 3½ cents; f.o.b. charges at New York, 10 c., making a total of 510 c. a bushel from Fort William to New York. That represented the cost of the United States sea-board. In comparison, the rate to the Canadian sea-board was much lower, being only 3½ cts., made up of 2c. a bushel from Fort William to Kingston, and 1½c. from Kingston to Montreal, where the cargoes of barges are loaded upon the ocean vessels. Thus there is a saving of 2½ cts. a bushel by the Canadian or the St. Lawrence route. The saving in carrying a return cargo of coal from United States ports, and also the saving to the farmers of Manitoba was also noted. Other important points having affinity with the whole subject were elucidated by many prominent men of large experience who had great interests at stake. The question of needed improvements on the rivers was taken up. Upon the advice of the chairman it was decided that the Dominion Marine Association take these matters up, then the commission could better deal with them. The point chiefly emphasized was that the cheapest way to get grain from Fort William was via Kingston to Montreal, rather than via Buffalo, and to do it cheaply the Welland canal would need to be enlarged, according to the evidence given.

The commission met later in the month at Peterborough when the possibilities of the Trent Valley canal in the through trade were examined and the effects which would be produced by its completion on the industries along the route. A session was also held at Toronto, the harbour facilities being discussed.

Municipal Ownership.

The subject of municipal ownership received considerable attention during March. In the matter of the application before the Railway Commission of the municipalities of *Port Arthur* and *Fort William, Ont.*, to connect their telephone system with the passenger and freight stations of the Canadian Pacific Railway, in which telephones

of the Bell system were installed under contract, judgment was handed out on March 15, to the effect that the contract was a binding one upon both parties and could not be abrogated until such time as the pecuniary loss and the necessary compensation to the parties concerned should be decided upon. At *Kingston, Ont.*, important developments in the acquirement of the street railway by the municipality occurred during the month, the bylaw authorizing the municipalization of the Light, Heat and Power Co.'s plant having been carried by a large majority; only 37 votes being recorded against it. The town of *Perth, Ont.*, was given authority by the Private Bills Committee of the Ontario Legislature to purchase the plant and property of the Perth Electric Light Company and to engage in the supplying of arc lights for commercial purposes to the extent of 40 lights, the restriction in number of lights being due to the fact that a private company controls the incandescent lighting of the town for domestic and commercial purposes. A notice of motion was served on the city solicitor of *Belleville, Ont.*, to quash the by-law carried in January, authorizing the city council to secure and operate the local gas works. Some discussion as to acquiring of gas plants by the cities of *Toronto* and *Montreal* also occurred. In *Sandwich, Ont.*, the municipality took under consideration the establishment of a municipal lighting plant. A by-law prepared by the city council of *Sherbrooke, Que.*, looking towards the municipalization of the lighting plant in that city was defeated, a majority of the votes cast being in favour of the proposal, but the majority in valuation being contrary by about \$150,000.

Notes of the Month.

A new set of rules and regulations governing *patents of invention* in Canada were issued under date of February 23, 1904, and published in the *Canada Gazette* of March 19. The rules authorized by Order in Council of June 27, 1898, being thereby repealed.

The Post Office Department, Canada, decided to institute a system of *insurance* of inland registered letters, the insurance to be 3 cents for \$10, 4 cents for \$15, 5 cents for \$20, and 6 cents for \$25, the last being the maximum insurable amount.

A special course in *manual training* for teachers will be opened in the Macdonald Institute at the Agricultural College, Guelph, Ont., immediately after the Easter vacation. The course will cover one year's instruction and will be open only to graduates of Normal schools. Teachers passing the course will be granted the standing of 'specialists' in manual training.

A through *telephone* system between Sydney and Halifax was opened during March. The distance is 276 miles; 13,000 cedar poles and 102,000 pounds of hard drawn copper wire were used in the work of construction, at a total cost of \$90,000.

One of the results of the extremely cold weather was the fact that electricity has been extensively employed in the *thawing* of frozen water pipes.

A *pension scheme* was presented to the employees of the Intercolonial Railway for discussion during March, and was met with general approval, the employees holding a number of meetings by districts for the purpose of becoming acquainted with the details and benefits of the proposal, and to further steps already taken for its adoption. The matter will be brought later on to the attention of Parliament.

The Dominion Parliament and the Legislatures of Quebec, New Brunswick and Prince Edward Island re-assembled during March. In the 'Speech from the Throne' with which the Federal Parliament was opened on March 10, reference was made to the general prosperity; to the material increase in Canadian trade; to the extent of the immigration movement and the building of the Transcontinental railway. The Quebec Legislature opened on March 23 with the report of the Colonization Committee, and certain railway and mining developments as the principal subjects of

discussion. An act respecting accidents incident to labour will be introduced. In the speech from the Throne with which the Legislature of New Brunswick was opened on March 3, the commercial outlook for the province was referred to more especially in the direction of agricultural, railway and mining developments. The construction of an Imperial dry dock at St. John; the

representation of the province in the Federal Parliament; the administration of the fisheries and the opening of an industrial school at Kingston were also referred to. A factory act will be introduced by the Government during the session. The Prince Edward Island Legislature opened upon March 24, the Speech from the Throne being largely retrospective.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffat, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during March were dull but not depressed. The trades have suffered most. The steel and coal industries have also been working somewhat below average conditions. The Street Railway Company, however, has given employment to a number of labourers, but the steam railways have been considerably hampered by the severity of the weather. Business generally was fairly good, but not nearly as active as during March last year.

A dispute arose among firemen employed at No. 2 mine, New Aberdeen. The manager having asked the firemen to fill ashes, the men complied, but ultimately found that they could not fill ashes and keep up steam. They accordingly refused to fill the ashes and the manager subsequently discharged them. The manager suggested that the dispute be settled by arbitration, but the men refused. The case has been submitted to the Labour Council of Provincial Workmen's Association.

The growing importance of Sydney, N.S., as a railway centre is shown by the fact that 209 employees of the I.C.R., reside at Sydney, whereas eight years ago there were only 47. The increase is largest in the mechanical department, being from 9 to 59. It is stated that the number of these employees will be materially added to during the coming season. Tenders are being called for the construction of a car repair shop to

cover an area of 175 x 45 feet. A new and thoroughly equipped light plant, to illuminate the yard and buildings of the I.C.R., will also be installed.

CONDITION OF LOCAL INDUSTRIES.

Mining.—International mine, which was closed, has resumed work. The mining industry, with the exception of the International mine, is little changed, and will remain so until the opening of navigation. Operations around the new coal-washing plant of the Dominion Iron and Steel Company are very active.

Manufacturing.—The steel industry at Sydney is progressing quietly, but surely. The rod mill has been almost completed, and the machinery installed. The billet mill, which will reduce the four inch billet to one and three-quarter inch for the rod mill, is being rapidly built. It is believed that steel rods will be manufactured before the end of April. The coal-washing plant now under construction, it is expected, will be finished by July next. A recent test of the open hearth steel proved it to be superior to the Bessemer, and a rail mill may be among the new structures to be erected in the near future. A hopeful feeling in consequence pervades the city. The new plant of the Nova Scotia Steel Company is being put in readiness to begin operations about the first of June. The Londonderry Iron Company is forging ahead; it employs hundreds of men in the mining of ore and around the furnaces. The force of men employed in the Thompson foundry, North Sydney, has been increased, skilled mechanics having been engaged, who will greatly add to the efficiency of the foundry.

Railway construction and employment.—The Intercolonial Railway will spend \$90,000 in improvements in Sydney during the coming summer. The erection of a car repair shop, which will give employment to a large number of men, has already been begun. The freight houses will be moved to a more suitable site, and a new station is contemplated.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, joiners, lathers and plasterers have little work. Plumbers are fairly active. Gas and steam-fitters are all busy. Stone-cutters and builders' labourers find work slack.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers are all well employed. Coremakers are all busy. Machinists and steam engineers, electrical workers and linemen are well employed. Blacksmiths have plenty of work, and horseshoers are fairly active.

Woodworking and furnishing trades.—Woodworkers and pattern makers are busy.

Printing and allied trades.—These branches are all satisfactorily employed.

Food and tobacco preparation.—Icecutters and drivers have been very busy.

Miscellaneous.—Barbers were fairly busy, also clerks and stenographers.

Transport.—Railway employees, especially in the train service, have abundance of work.

Unskilled labour.—There is not much demand for unskilled labour, but there will be about the middle of April.

DISTRICT NOTES.

Glace Bay.—The municipality will spend \$100,000 on sewerage system and the paving of streets.

Louisbourg.—An American Company has bought the Tale areas at Louisbourg, and is about to develop them. The soapstone quality of the Louisbourg Tale is suitable for the lining of furnaces, stoves and fireplaces.

The Joggins colliery has been emptied of water, the mine repaired and put in good condition.

Westville.—The contract for sinking the shaft on the Acadia coal areas, near Westville, has been let, and work will commence in earnest within a few weeks. Surface arrangements are almost complete. The rock drilling will be done by compressed air drills. An electric tramway is to be built to connect Stellarton, Westville, Lourdes and New Glasgow.

Springhill, N.S.—Marked prosperity in various industries was reported. Building will be on an extensive scale and manufacturing is exceptionally prosperous.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been a decided stimulation in the demand for labour during the past month, and much more activity was noticeable than during February. The season, however, is very backward, and, but for these conditions would have been much better. Painters are beginning to get to work, but the building trades as a whole are yet inactive, owing to the weather. The greatest activity has been in commercial and transportation circles. Since the opening of the season at this port, in November last, steamers, with 9,909 passengers, have arrived.

Wholesale and retail business has been about normal, the season being somewhat against the usual spring trade. The labour field was free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The depth of frost in the ground will delay the commencement of ploughing.

Fishing.—Fishermen along our coast report the supply of cod, haddock, halibut and lobsters normally good, but the boisterous season has precluded any marked activity.

Mining.—Prices are being well maintained for coal, and the collieries in all parts of the province are preparing for an increased output. The early estimate of an increase of 750,000 tons is confirmed by the *Mining Record*. In addition to the increase of existing coal companies, it is important to notice that preparations for new development are being made by new companies near Spring Hill, in Cumberland county; Port Morien, Cape Breton county; and Chimney Corner, in Inverness county. Londonderry is turning out a regular supply of good iron. There is a distinctly improved outlook in the steel and iron business. Gold mining is looking up. Better management and more scientific treatment are having this effect. Guysborough, Lunenburg and Queens are the main sources of gold returns at present, and all report good progress. Copper is also receiving increased attention. The antimony mine at West Gore is turning out a regular supply of ore, which is being sent to England. The mining industry never had a brighter outlook in Nova Scotia, and its various developments will require additional men, especially skilled workmen.

CONDITION OF PARTICULAR TRADES.

Building trades.—The weather has practically precluded the opening up of the building trades, yet a few branches are now active. Plumbers and steamfitters are busy; quite a number of painters are at work but all other branches are yet dull.

Metal, engineering and shipbuilding trades.—Iron moulders are still busy; iron workers and helpers are fairly well employed; machinists and engineers are busy; boilermakers are only fairly busy; shipwrights and caulkers find work dull; horse-shoers are fairly brisk.

Woodworking and furnishing trades.—This branch is about normally busy; coopers are fairly well employed.

Printing and allied trades.—Printers are getting on the dull side; pressmen find conditions normal.

Miscellaneous.—Clerks are fairly active; delivery employees find work normal; laundry workers are busy.

Transport.—Railroad men are all very busy; freight handlers very active; long-shoremen have had a fairly good season. Teamsters are fairly busy.

Unskilled labour is dull.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during March was, on the whole, unchanged from February, the supply continuing in excess of the demand. Work was resumed on the extension of the market house and post office, keeping a fair number of men employed. With the exception of some employment on the farms in getting out fuel wood, &c., and the work of preparing for the opening of the fishing season, outside operations were practically at a standstill. In business circles the import trade, towards the latter part of the month, began to overtake the export trade, and the arrival of spring stock caused a renewal of activity among dry goods merchants. Bankers report March a better month for business than February, as the stormy weather interfered during the earlier month with the movement of farm produce, which constitutes the chief resource of this province.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Finer weather and better roads than in February gave farmers an opportunity to overtake farm work.

Fishing.—Owing to the closing of the smelt and eel fishing, operations in this branch of industry were suspended, with the exception of preparing for the opening of the lobster and herring fishing season.

Railroad construction and employment.—Operations were restricted to the completing of surveys of several branch lines.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons had a dull month. Carpenters and joiners were fairly busy with inside work. Plumbers were busy, and gas and steamfitters fairly busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers were fully employed. Linemen were satisfactorily employed.

Woodworking and furnishing trades.—Woodworkers, car builders and coopers were busy.

Printing and allied trades.—Printers and bookbinders were actively employed.

Clothing trades.—Journeymen tailors, and boot and shoe workers were satisfactorily employed.

Food and tobacco preparation.—Bakers were fairly busy.

Leather trades.—Tanners and saddlers were busy.

Transport.—Railway conductors, locomotive engineers and firemen, railway trainmen and freight-handlers were busy. Long-shoremen experienced a quiet month, excepting at Georgetown, where the two winter steamers were running.

Unskilled labour.—This class of labour had a dull month.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during the month of March, showing an improvement over February, particularly in the building trades. The McLaughlin Carriage Company has purchased a large brick building on Union Street, and intends making extensive alterations and improvements. Messrs. Emerson and Fisher, have purchased a property on Germain Street; several wooden buildings now on the premises will be torn down, and a five story brick building, 60 by 100 feet, will be erected. During the

coming summer the Dominion Government will erect a detention shed at St. John, West. The building will be 40 by 103 feet, three stories high, and will cost \$30,000. The Canadian Bank of Commerce will also erect a new building on the corner of King and Germain Streets.

The winter port trade has been satisfactory, the value of the cargoes at the end of February amounting to \$10,822,225, \$6,363,909 being for Canadian goods and \$4,458,316 for foreign. Bank clearings for the four weeks ending March 24 amounted to \$3,233,368, as against \$2,910,144 for the corresponding period last year, being \$323,224 greater than during the month of March, 1903.

The Maritime Nail Works were completely destroyed by fire March 11. The total loss is estimated at about \$50,000; insurance, \$29,500. About 85 men and boys were employed.

The lime burners expect a big season, and are making extensive preparations.

For some time past a committee of the Board of Trade has had under consideration an Act to provide for the settlement of trades disputes by arbitration. A measure has been agreed upon, which it is proposed to submit to the local legislature for enactment at the present session, but neither the council of the Board of Trade, nor the board itself has yet considered the matter. The Attorney General has introduced in the local legislature "An Act for the regulation of Factories."

CONDITION OF LOCAL INDUSTRIES.

Railroad construction and employment.—The Caraquet and Gulf Shore Railway opened for business on March 14, after being closed down for some time on account of the snow blockade. The Moncton and Buctouche Railway is still blocked up, but efforts are being made to open it. The Elgin and Petitcodiac Railway, it is expected, will re-open soon.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, stonecutters and builders' labourers are dull.

Carpenters, joiners, plasterers and lathers report work being very good, considerable repair work being done. Painters and decorators, are satisfactorily employed for this season of the year. Plumbers, gas and steamfitters report trade very good.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and their helpers, as well as machinists and engineers, report work good. Steam engineers say work is getting active preparing for the opening of river navigation. Electrical workers and linemen are busy. Blacksmiths and boilermakers are fairly well employed. Sheet metal workers report good conditions.

Woodworking and furnishing trades.—Woodworkers are busy. Shingle weavers report trade dull.

Printing and allied trades.—Printers pressmen and bookbinders were busy.

Clothing trades.—Journeyman tailors report business good.

Food and tobacco preparation.—Bakers and confectioners find trade good, and with cigarmakers trade is very good.

Miscellaneous.—Broom and brush makers were very busy.

Transport.—Railroad trainmen, switchmen, trackmen and freight-handlers report work plentiful. Ship labourers are actively employed. Street railway employees were busy. Teamsters and expressmen are satisfactorily employed.

Unskilled labour.—This kind of labour was only fairly well employed.

DISTRICT NOTES.

Gordonville.—Messrs. Stickney & Brook's new steam sawmill, at this place, was burned on March 20; the loss is estimated at about \$3,000.

Hampton.—Reports from this place are to the effect that all through King's county considerable repairs, additions and alterations will be made on several buildings, besides a number of new buildings that it is intended to erect.

Moncton.—The trouble between the Record Foundry & Machine Company and the

Iron Moulders' Union, which began two years ago, has been settled. All suits and actions in the courts are to be discontinued.

Rexton.—At a meeting of the ratepayers held on March 14 it was decided to have the streets lighted by electricity.

Sussex.—George E. Hogg, arrived on March 16, with three carloads of machinery for his new canning factory, on Main Street.

St. Stephens.—Messrs. Haley & Son, box manufacturers, have received a cable order from Manchester, England, for 184,000 boxes, which is equal to eighteen carloads.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin & Ed. Little, correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally had a better month than in February, and prospects for the coming active season are bright. In the building trades activity began to be resumed about March 10. The fitting up of the boats and steamers, in preparing for the opening of navigation, also furnished additional employment during March. The Provincial Legislature of Quebec opened on March 22; this to some extent increased employment and general business locally.

Journeyman painters and decorators submitted a new wages and hours schedule to their employers on March 14 to govern conditions of employment during the coming season. The present schedule has been in existence for two years, the rate being 17½ cents per hour with the nine-hour day. The request is for twenty-five cents an hour to date from April 1.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are still complaining of the scarcity of water, though the rainfall of the opening days of the month afforded some relief. Prospects are reported favourable for maple sugar making.

Lumbering.—A large number of men returned from the lumber camps during the early weeks of the month. A satisfactory winter's work is generally reported, the cut

having been heavy. If the water in the streams permits of the floating of this cut as well as of the logs which were hung up for want of water a year ago, the sawmills in this district will be pushed to the utmost of their capacity during the coming season.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons and carpenters and joiners were fairly active. Lathers and plasterers were busy. Painters were all at work at the end of the month. Plumbers and steamfitters had a good month. Stonecutters, however, report little doing.

Metal, engineering and shipbuilding trades.—Boilermakers, machinists, engineers and moulders had a busy month, though inactivity prevailed in the iron ship building branches. Electrical workers and linemen had a fair month.

Printing and allied trades.—Printers and pressmen had a good month's employment, business being stimulated by the opening of the provincial legislature. A number of men, however, have left the city in consequence of the recent labour troubles.

Clothing trades.—The approach of Easter increased employment in these trades. Boot and shoe workers had a good month.

Leather trades.—Tanners and curriers had a busy month, though the suspension of one establishment threw sixty men out of work.

Food and tobacco preparation.—Ice cutters finished their contracts early in the month. Cigarmakers had plenty of work.

Miscellaneous.—Barbers, hotel employees, laundry workers, &c., report conditions improved by the opening of the legislature.

Transport.—Steamboatmen, engineers, firemen, &c., were also preparing for the opening of navigation. A new night freight service was inaugurated by the C.P.R. between Quebec and Montreal to meet the demands of the traffic.

Unskilled labour.—Snow shovelling and cartage came to an end during the month.

THREE-RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

March has not produced much change in conditions from the previous month. The weather has been both severe and uncertain, though towards the end of the month there has been a promising change, and it is now felt that a reasonably early start will be made in general outdoor work. The wholesale and retail dealers report trade not very good. Banks report business fair. All of the factories are working full time with full staffs of employees. The building trades have been rather quiet all winter, but they are beginning to be active ;—several second-class buildings will be put up during the coming summer, as there is a scarcity of same, and rents have increased 30 per cent. Dealers in coal are receiving hard coal from the United States every day, and are retailing the same at \$7.50 per ton.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The Piles train arriving from the camp districts and shanties is bringing in contractors, jobbers, and hundreds of shantymen employed in the different shanties in the St. Maurice territory. The winter has been exceedingly favourable for lumbering operations, and the number of logs made will exceed last year's operations by 10 per cent, say 4,500,000 logs. Men are leaving for the drives in large numbers, and everything so far indicates a favourable spring. Men for the drive are getting from \$1.50 to \$2.00 per day and board. There will soon be over one thousand men employed on the drive.

Building trades.—Bricklayers and masons have had very little work during the past month, a few odd jobs covering all the work done. Carpenters and joiners were dull until the 15th but are now well employed. Lathers and plasterers, painters and decorators and paperhangers are not very busy. Several builders' labourers are employed in the district.

Metal, engineering and shipbuilding trades.—Machinists and engineers are all employed. Steam engineers, electrical workers and linemen are not very busy. Blacksmiths are busy.

Woodworking and furnishing trades.—Carriage and wagon makers are very busy.

Printing and allied trades.—The printing trade has kept very active throughout the winter. Steel and copper plate printers are very busy.

Clothing trades.—Tailors are not all employed but will be soon. Glove makers and boot and shoe workers are all employed and more could obtain employment here.

Food and tobacco preparation.—Bakers and confectioners, cigarmakers and tobacco workers are doing well.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during the month of March was well employed, being in somewhat better demand than in February. With the break up of the winter the outdoor trades are making preparations for an exceptionally busy season, and building trades will be active in Sherbrooke and vicinity during the coming summer. Work on the new court-house has been resumed, and about thirty stone-cutters started work on the granite facings. The estimates brought down in parliament provide for a new drill shed in Sherbrooke, and negotiations have about closed with the British-American Land Co., for a site.

The citizens of Sherbrooke voted on March 21 and 22 on a by-law to grant aid to a new carpet manufacturing company to be located in the building recently owned by the Dominion Carpet Co., the latter company's affairs being now in liquidation. The new company proposes to start with not less than 50 hands, and to pay about \$25,000 in wages for the first five years, in consideration of which the

city will continue the bonus of \$17,500, and exemption from taxes for ten years. The by-law was carried almost unanimously, and it is expected that the plant will be started in a few weeks. An application has also been made by the Eastern Townships Smelting and Mining Co. to the city council for a bonus of \$10,000 to be paid off in ten years. The company proposes to erect a copper smelter, and has given a guarantee to treat 60 tons of ore a day. Mine owners are at present placed at the disadvantage of having to meet the heavy freight rate to Staten Island, N.Y., where the nearest smelter is located. A by-law to raise \$200,000 towards the purchase of the electric light plant and gas works of the Sherbrooke Light, Power and Heat Co., was also voted upon by the ratepayers, and resulted in its defeat. To carry the by-law it was necessary to have a majority of the votes and property valuation. There was a majority of 15 votes in favour of the by-law, but the minority had the largest property valuation, the figures being : 389 for the by-law, with a property valuation of \$1,083,270 ; 379 against the by-law, with a valuation of \$1,253,010, or an excess of valuation against the passing of the by-law amounting to \$169,740.

Wholesale merchants reported business as being very good, but retailers found business dull owing to the continued cold weather.

Bricklayers adopted a scale of wages for the coming summer, based on a nine-hour day. There has been no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are beginning to prepare for their spring work. Those who have sugar bushes are looking forward to a good season.

Lumbering.—The lumber camps are closing down, and the most of the cut has already been hauled out to stations and the rivers, to be in readiness for the break up of the ice.

Mining.—Work at the asbestos mines at Black Lake, Thetford and East Broughton is expected to start during the first week of April.

Manufacturing.—The woollen industry is only fairly well employed. The Paton Co. is running full time, but Grundrod & Company's mill, a small mill that manufactures goods from the wool supplied by the farmers, has been closed down for two weeks. Messrs. Rowell, Son & Co., confectioners and biscuit makers, have moved to new premises, which will enable the company to handle a larger output.

CONDITION OF PARTICULAR TRADES.

Building Trades.—Work has not been wholly suspended during the past two months, but with the advent of good weather the trade will show much activity. Builders will begin on the walls of the new court house about the first week in April. In addition to stonemasons and labourers, there will be a large number of bricklayers employed, as the contract calls for about one million and a quarter of brick. There are several other large buildings to be erected in the district, among them being a new \$40,000 Roman Catholic church at Broughton. Plans are also being prepared for an \$80,000 Roman Catholic church in East Sherbrooke, and contracts awarded for several dwelling houses. The painters have organized a union and have fixed the scale of pay at \$2.00 for a nine-hour day.

Metal, engineering and shipbuilding Trades.—These trades are very busy. The Jenckes Machine Co. has still a night gang at work.

Woodworking and furnishing trades.—The woodworking trades are well employed. Carriage and wagon makers, in particular, report very good business.

Printing and allied trades.—Active conditions prevailed.

Clothing trades.—With the return of spring the clothing trade is very busy, and the leading custom tailors are advertising

for good coat, vest and pants makers. The glove factory at Lennoxville had a good month.

Food and tobacco preparation.—Bakers and confectioners report business, rather dull. Cigarmakers are very busy.

Unskilled labour.—This class of labour was in good demand.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. N. Samson, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The market was very quiet in March for out door labour, but those working in manufactures have been very busy, especially in the sash and door factories and in foundries. Repairs and improvements to commercial establishments and to private dwellings gave employment to some workmen who were out of work. No differences have arisen between employers and employees, with the exception of the difficulties existing on the Quebec Southern Railway. The system has been placed in the hands of a receiver and employees have stopped work because of non-payment of wages due from the commencement of the year.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The majority of local manufacturers are very busy. It is stated that the Emporium Cigar Factory is at present one of the most important in the province, being the third in point of output.

CONDITION OF PARTICULAR TRADES.

Building trades.—A few masons, bricklayers and carpenters have worked during the month. Plumbers state trade was satisfactory.

Metal and engineering trades.—All moulders are working. Machinists and electrical workers have plenty to do. Blacksmiths and boiler makers are very busy.

Woodworking and furnishing trades.—These branches are fully employed.

Printing and allied trades.—Printers have been well occupied, and for pressmen conditions are favourable.

Clothing trades.—Journeymen tailors report a satisfactory month. Boot and shoe workers have been fully employed and overtime has been worked in one of the factories.

Food and tobacco preparation.—Cigar and tobacco workers have had steady work.

Leather trades.—Tanners and curriers continue busy; they have work by the year.

Miscellaneous.—Laundry workers had a busy month.

Transport.—Freight handlers teamsters and hackmen were fully occupied.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The rigorous weather of the past two months greatly delayed work in general. As March opened more favourably, however, activity was renewed, and towards the end of the month building trades were fully occupied. The delay occasioned by the severe cold has to be overtaken as many of the buildings at present being erected are required by May 1. It is anticipated that labour will be in good demand for a few months. The storing of ice is now finished, the great depth of snow proving a serious embarrassment. The ice itself, however, is as thick and as clear as in former years. Members of the clothing trades state that business has been very dull with them during the month.

A question of great importance to all those using gas or electricity for lighting or heating purposes is that of the municipalization of the gas works by the city. In 1895 the city of Montreal signed a contract with the Montreal Gas Company, which has since become merged with the Montreal Light, Heat and Power Company. In the contract there was a clause providing that after a period of ten years the city could

become possessed of all the rights, properties, privileges, &c., of said company, the price, &c., to be fixed by arbitrators, three in number, one of whom was to be named by the city, one by the company and a third by a judge of the Superior Court sitting for the district of Montreal. The city council has decided to apply to the local legislature for power to amend its charter for the carrying out of this project.

The removal of snow from the streets of the city of Montreal through which the Montreal Street Railway runs, and half the cost of which is defrayed by that company, cost for 1903-04, up to March 4, 1904, \$138,010.98. The removal of snow from streets not traversed by the railway cost for the same period \$14,365.20. In addition to the above the Montreal Terminal Railway cleans at its own expense the streets taken up by its system.

On March 12, a strike was declared by the garment workers at the Star Mantle Company's works, but the difficulty was arranged on the 23rd of the month by an agreement between the company and the Ladies' Garment Workers Union No. 38, whereby all the employees were to be reinstalled without discrimination; those who took the strikers' places during the strike to be dismissed; members of the union only to be engaged in the mantle and costume making departments; an arbitration committee to fix the scale of payment for new work and to settle all difficulties arising therefrom.

On March 24, 25 granite cutters went on strike out of sympathy because the Forsyth Company had dismissed some of its employees and did not pay them at once, retaining one day's pay between the time they were dismissed and pay-day.

The city of Montreal has made application to the Provincial Legislature for certain amendments to its charter with reference to the construction of underground conveyers for electric light, telegraph, telephone and other wires and cables, the city to have the right to charge the users of these conveyers a certain sum for placing their wires or cables therein. There are

also amendments allowing the city to widen certain thoroughfares and giving power to expropriate real estate, &c., for this purpose; the city also seeks power to amend its electoral franchise; to compel manufacturers and all those using engines, boilers, &c., to supply their premises with smoke and gas consumers, to impose certain special taxes, &c., &c.

An information bureau was established by the Ship Federation of Canada on the water front at Montreal during March.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The rubber factories are very busy owing to the approach of spring. Cotton factories are also fully occupied, as are also cigar and tobacco factories.

CONDITION OF PARTICULAR TRADES.

Building trades.—Towards the end of the month a great renewal of activity was noted.

Metal, engineering and shipbuilding trades.—Conditions were good at the beginning of the month, and very active at the end.

Woodworking and furnishing trades.—Woodworkers were busy. Upholsterers, varnishers, polishers, wood carvers in the employ of the C.P.R. and G.T.R., were very active. Carriage and wagon makers were active.

Clothing trades.—Boot and shoe workers reported favourable conditions.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, were very busy. Ice cutters and drivers were active at beginning of month but slackened off at the end. Cigarmakers and tobacco workers report good business.

Leather trades.—All branches of these trades were busy.

Miscellaneous.—Barbers, broom-makers and laundry workers were fully occupied.

Transport.—Railroad conductors were active. Steamboat men and steamboat firemen and longshoremen were dull. Street railway employees were busy.

Unskilled labour was fairly well employed.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, correspondent, reported as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As compared with the month of March in 1903, the month just passed was a prosperous one. There was also a slight improvement in the situation over February. With the advent of spring, trade and industry are awakening. The banks in Hull have been doing exceptionally well, and the 4th, the customary spring maturing day, was better met than in several years.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Aylmer, Deschênes, Buckingham and Hull have a number of men already clearing up and repairing the mills for an early start in sawing operations. The shantymen have only started to come back to the city, and are being hired to go back for the drives. Of course preliminary work must be proceeded with before the drives proper are carried on. The demand for shanty cooks was a feature of the activity in the labour market during the past month. Several hired for \$35 and \$40 per month, which is considered a very fair wage.

Mining.—Special interest was shown in the mining world owing to the efforts made by the government to secure the best possible specimens of Canadian mica for the St. Louis fair. The Hull mines, owned by Messrs. Tortin & Gravelle were given the choice.

Railway employment.—Shipping is brisk in spite of the snow blockade in and around the yards, and the difficulties experienced in hauling.

Manufacturing.—The firm of Gilmour & Hughson, reports a better season than last. Wood dealers are doing an active business owing to the exhaustion of the winter supply at houses, due to protracted cold weather. The Eddy firm reports that it does not now feel the effects of the lab-

our difficulty of January and February, that many of the old hands have gone away in order to secure employment, their places having been filled by men who have now picked up enough experience to be paid the regular wages, and that the production has again reached its normal.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades are still idle, but are preparing for a busy season. A few bricklayers are working at union wages. The carpenters and joiners, with a membership of 62, organized a union during the month and joined the International Brotherhood.

Food and tobacco preparation.—Ice cutters are through one of the worst seasons they have ever had, attributable to the continuous and severe cold, but the product was of first quality. Carters are, however, still busy hauling the surplus of winter cut. They are paid, with teams, \$3.20 per day. Others are hauling for 9 and 11 cents per block.

Unskilled labour.—This kind of labour is paid \$1.30 to \$1.35 a day. The cement works have not yet resumed all their operations, but will shortly.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The continuance of winter until nearly the end of March had the effect of delaying preparations for spring work; labour as a consequence was not as well employed as otherwise would have been the case. Building operations were delayed in commencing and contractors state that the outlook for the season is not wholly encouraging. A large number of men have been engaged for the lumber drives and contracted for at high wages. The advent of mild weather, however, gave the railway companies opportunity of relieving the severe congestion of freight and general activity prevailed in transportation circles. Wholesalers reported

a revival in country trade, attendant on the more propitious weather.

Real estate dealers reported an exceptional scarcity of houses to rent and in many instances there was a sharp advance in rentals of from one to three dollars a month. There seemed to be a large number of properties for sale, but moderately priced houses for rent, particularly in sections convenient to the centre of the city, were unobtainable.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The J. R. Booth saw-mills were kept running all month but towards the end of the month the irregularity in the volume of water-power caused considerable inconvenience.

Agriculture.—A number of young men, chiefly from Lancashire, England, arrived during the month, and were engaged by farmers in Gloucester and Nepean townships.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades were quiet. Contractors report very little building contemplated at present. A number of painters who left the local branch of the International Union organized on Saturday, March 26, as a National Union, with a charter from the National Trades and Labour Congress.

Metal, engineering and shipbuilding trades.—The iron trades continued busy and the spring prospects were considered bright.

Woodworking and furnishing trades.—These trades were quiet, a condition created by the slackness in building operations.

Printing and allied trades.—The printing and allied trades were busy.

Clothing trades.—The clothing trades were a week on two later in commencing on spring trade owing to weather conditions, but the outlook for the season was cheering.

Leather trades.—Activity prevailed. Work is to be started this spring on a large tan-

nery to be erected and controlled by Ottawa capitalists. A boot and shoe factory is also spoken of but will not materialize this year.

Miscellaneous.—Broom-makers were busy both factories in the city reporting large orders for the spring and summer trade.

Transport.—Railway men were given constant work, and there is not likely to be any reduction in staff for some time on any road.

Unskilled labour.—Unskilled labour found opportunities for employment more abundant in lumber circles than elsewhere, although the city employed a considerable number of men on the streets.

DISTRICT NOTES.

The *Almonte* woollen mills shut down on March 12, owing to a shortage of orders. Labour was also reported as difficult to obtain for this industry in spite of the high wages offered.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. A. MacDiarmid, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of March was a trying period for the labourers of this city and vicinity, being perhaps the worst in many seasons. The continued severe cold weather was principally responsible. Building operations were at a standstill. There is every indication, however, that next month will see every man employed at good wages.

The city has purchased the site for the new drill shed at upwards of \$4,000, the appropriation for which has been brought down in the estimates. This work will give employment to a large number of mechanics.

There has been no change in rates of wages or hours of labour during the month except as the result of a small strike at the Grand Trunk station. The coal men employed there struck on March 21 for higher wages and shorter hours. They wanted \$1.50 a day, an increase of 10 cents

per day, and a day of 9 hours and 40 minutes. About 20 men were involved. After being out for about two hours they returned to work at the old rate of pay, but were granted the shorter working hours. They now quit work at 10 minutes to 12, and 10 minutes to 6, and there is no lost time waiting for cars as formerly.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in this district have been severely handicapped by the severe weather, but prospects are good.

Lumbering.—Owing to the depth of snow in the woods, a large number of men have returned to the city, as it was found unprofitable to continue work. The drives this season are not expected to be as large as usual.

Mining.—Conditions are very promising. As soon as weather permits, several new properties will be developed.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades had a very dull month. There were practically no building operations going on. Painters had a good month with but a few idle men. Gas and steamfitters had a fair month.

Metal, engineering and shipbuilding trades.—Iron moulders, blacksmiths and machinists were all busy and report a good month with good wages.

Woodworking and furnishing trades.—Carriage and wagon-makers are all busy.

Printing and allied trades.—Printers are all busy.

Transport.—Locomotive engineers and firemen had a dull month owing to blockades, but work now is quite active. Cab-drivers and hackmen had a good month, as well as teamsters and expressmen.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was better employed in March than during February or the cor-

responding month of 1903. The demand for labour, moreover, and the opportunities for employment are rapidly increasing. In the building trades, for example, the work of enlarging and extending several buildings has already commenced. Forty-nine registered vessels, consisting of 20 steamers 4 tugs, 25 schooners and dredges and a number of small unregistered craft have been laid up in Kingston harbour since December. The owners of these vessels are now making active preparations for the opening of navigation and there is in consequence great activity throughout marine circles at this point. A partial enumeration of the works at present under way is as follows :—

At the *Davis' Shipyard*, a number of steam yachts are being constructed, the employees working overtime.

In *Anglin's Bay*, the steamers *Valeria*, *Islander*, *Belle Ritchie* and *Rideau King* are being overhauled.

The *Montreal Transportation Company's* vessels are nearing completion. Three barges have been partially rebuilt.

At *Crawford's wharf* the schooners *Tradewing*, *Acacia*, *Collier*, and the government dredges, are under repair.

At *Richardson's* the steam barge *King Ben*, the schooner *Menzies*, and other smaller craft are being overhauled. The ferry steamer *Pierrepoint* and the new *Island Wanderer* are also being repaired.

At the *Clarence Street wharf*, the steamer *North King* is being repaired.

At *Swift's wharf* the *Gaspian* is being repaired.

At *Craig's wharf* the *Glengarry* and the schooner *Capt. Oliver* are undergoing repairs.

In the *government dry dock*, the *Chicora of Toronto*, on which \$10,000 have been spent this winter, is being refitted.

The steamer *Alepha* has been laid up on the Kingston Foundry Marine Railway.

In *Portsmouth* the dredges of the Kingston and Montreal Forwarding Company

are receiving the usual repairs. The schooner *Pilot*, blown ashore in October, will be released a few miles down the river.

An English manufacturer and patentee of a new coal oil and gasoline motor arrived in Kingston during the month, and stated his intention to establish a machine shop and yard for the manufacture of steam yachts here. He intends placing yachts in the harbour that will show a speed of from twenty-five to thirty miles an hour. Already orders have been taken for his products.

Twice during March, the mayor was requested by persons in New York and Western Ontario to quote a price for the smelter site. In each case an offer was made to purchase with the intention of starting a new industry.

Much difficulty was experienced by the various railway lines here on account of the snow blockades during the month. Some roads were blockaded for the first time this winter.

Electricians engaged by the city met with great success in thawing out frozen waterworks service pipes by the use of electricity. Pipes frozen for two months were thawed out in fifteen minutes.

At a meeting of the master bakers, held on March 2, it was decided to advance the price of bread. The increase to be one cent for one and one-half pounds, or two cents for three pounds. This made the price twelve cents for three pounds. The increased price is at the ratio of sixteen cents for four pounds. This is the highest price demanded in Kingston for over half a century. Several times bread was advanced to fourteen and fifteen cents for a four pound loaf. Bakers say the advance was made necessary by the increased cost of flour, pointing out that in Montreal bread was selling at five cents a pound.

The street car service between the city and the outer G.T.R. station was resumed on March 28, though no other parts of the system were in operation. The hearing of

the difficulty between the city and the Electric Railway Company, before a committee of the Provincial Legislature was concluded at Toronto. The result was a compromise.

In view of the recent decision of the judicial committee of the Privy Council, not as yet formally handed down, in favour of the corporation of the city of Kingston vs. the Kingston Light, Heat and Power Company, the city has taken the necessary steps to acquire, and operate the plant. Important public meeting of property owners were held to this end, and on the 21st a by-law was almost unanimously adopted. The question as to the advisability of management by a commission or otherwise and other important details is being carefully gone into. It is expected that by the time of the arrival of the formal decision everything will be in readiness for the city to assume its rights and responsibilities in the matter.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are entering upon active preparations for the spring's work.

Fishing.—Fishing is improving. The advent of lent has given an impetus to the fish business. Prices are high.

Lumbering.—Lumbering is about concluded in this section for the season.

Manufacturing.—Manufacturing generally shows considerable improvement since February.

Mining.—Mining has improved in view of improved weather and facilities.

Railroad construction.—Railroad construction is now well under way.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are becoming active. In some cases arrangements favourable to the men with respect to apprentices, &c., have been conceded. The season opens under satisfactory conditions.

Metal, engineering and shipbuilding trades.—The metal, engineering and ship-

building trades continue to be fully employed.

Woodworking and furnishing trades.—Increased business is reported.

Printing and allied trades.—Business is fair.

Clothing trades.—Improved conditions were reported.

Food and tobacco preparation.—Bakers, confectioners, butchers, &c., report only fair trade. It is felt that the increased cost of bread has lessened the volume of trade for bakers. Housekeepers having decided to bake their own bread, the price of flour has fallen somewhat.

Leather trades.—The leather trades report only fair business.

Miscellaneous.—Barbers, broom-makers, laundry workers, &c., report business active.

Transport.—The transport branches are improving.

Unskilled labour.—Unskilled labour continues to be fairly well employed, and will soon be in much demand.

DISTRICT NOTES.

A new G.T.R. bridge is being built at Kingston mills to replace the present one, which was put up about fourteen years ago, when the double track was laid. The new bridge will have twice the bearing capacity of the present one. This is rendered imperative by the adoption of the big locomotives and the increased weight of freight trains.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnston, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General labour was well employed during March, more particularly in the work of snow and ice removal, so that there were few idle men in this locality during the month, and a decided improvement in consequence over February. A new factory for the manufacture of cement was started,

and the American Cereal Co. resumed operations, though with a diminished production, after thirteen days' idleness, resulting from the fire of February 17. A large staff of men was employed rebuilding the destroyed section. A new planing mill was also started for the manufacture of doors, frames and dressed material. One department of this industry will be devoted to the manufacture of cheese boxes, employing from eight to twelve men. None of the other branches of employment showed exceptional activity, though traffic on the railways was very heavy owing to the congestion in freights, resulting from the weather blockade. Retailers report business good and improving with the advent of spring weather. Paper maturing on March 4 was fairly well met, and business in consequence may be regarded as on a sound basis.

Carpenters' wages were advanced from 22½ to 25 cents per hour, and a number of trades that were working shorter hours during the winter returned to their regular hours in March. There was no unrest in the labour market during the month.

Beef and pork on the local market ran from \$5.50 to \$6.00 and from \$6.50 to \$7.00 per cwt. respectively. Eggs dropped from 30 to 20 cents per dozen, and butter ranged from 22 to 24 cents per pound. Potatoes were 70 cents per bag, and hay \$10.00 per ton. Good apples brought \$1.00 per bag. Poultry of all kinds was scarce and dear. Coal dealers, in spite of the railway blockade, were able to supply customers, and there were only two occasions on which anything approaching a scarcity was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy in cutting wood and preparing for spring work. Green wood and tamarack brought \$5.00 per cord, and hardwood from \$7.50 to \$8.00. There was a keen demand for grain, especially oats. Local live stock dealers report business fairly good since the removal of the blockade on the railways.

Lumbering.—Sawmills have not begun operations and lumber, in consequence, is scarce and expensive.

Manufacturing.—Factories are all fairly busy and are running steadily.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are generally quiet, though a few were working on some unfinished jobs of last fall. Carpenters, painters and plasterers were fairly well employed. Plumbers had some repairing work and a few stone cutters were busy.

Metal, engineering and shipbuilding trades.—Iron moulders were fairly busy, and iron workers and helpers very busy. Coremakers' work here is usually done by the moulders, and there are only practically two coremakers in Peterborough. Machinists were well employed. With electrical workers and linemen employment was active. Blacksmiths, boiler-makers and sheet metal workers and horse-shoers were busy. The building of a small steamer, for passenger traffic on the Otonabee river during the tourist season, gave employment to shipbuilders. Jewellers report a good month.

Woodworking and furnishing trades.—Piano and furniture shops were active, and upholsterers, varnishers and polishers busy. Carriage and wagon makers, pattern makers and coopers are all fairly busy.

Printing and allied trades.—Printers, pressmen and bookbinders report satisfactorily for the season of the year.

Clothing trades.—Journeymen tailors were generally slack, though a few were beginning to get busy. Boot and shoe workers were very busy owing to the demand for good footwear caused by the weather.

Food and tobacco preparation.—Bakers and confectioners were kept very busy. The former were endeavouring to have the standard weight of a loaf reduced from four pounds to three, and the price from twelve to ten cents. Butchers are busy.

Ice cutters have completed their winter's work. Cigarmakers were fairly busy.

Leather trades.—Harness makers and collar makers are busy.

Miscellaneous.—Barbers and broom-makers were exceptionally busy. Delivery employees, furriers and laundry workers were all busy.

Transport.—Railway traffic is very heavy and employees in consequence very busy in relieving the congestion of freight caused by the recent weather blockade. Livery stables were dull, though carters were kept fairly busy.

Unskilled labour.—A good demand was reported.

DISTRICT NOTES.

The very difficult nature of the country roads caused depression in general business throughout the district, though general stores in most of the smaller villages reported business fair. Grist mills had a good trade amongst farmers. There has been little wood-cutting, owing to weather conditions, and the supply for next season is limited.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reports as follows :

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continues steady with favourable prospects for the coming season. The severe and unsettled weather, and the consequent traffic blockade on the railways, which continued until the latter portion of the month, interfered with continuous employment in many departments. With the resumption of freight traffic, however, there was renewed activity in commercial circles and orders are coming in freely in connection with many branches of industry in which production had been slackened. Navigation has been unusually late in opening in consequence of the quantities of ice in Toronto bay. A factor of considerable importance as affecting the demand for labour this year will be the

large expenditures on public works, more particularly the waterworks and harbour water front improvements, aggregating several million dollars. By a vote of the ratepayers, on March 23, a by-law authorizing the expenditure of \$100,000 for improvements in the waterworks system was adopted. These include the installing of a 15,000,000 gallon engine at the main pumping station, with a water tunnel across the bay and a 6-foot steel conduit across the island. In addition there are new water mains to be constructed. The harbour improvements comprise the straightening of the Don, the extension of the piers at the eastern gap, the deepening or removal of the western gap and the extension of the Yonge street and other wharfs to the Windmill line, new freight sheds being constructed on the city wharf. A large amount of dredging will be done, and a bridge constructed over the Esplanade at the foot of Yonge street. There will be numerous extensions and improvements of the gas company's system. Employment is therefore likely to be plentiful throughout the season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season is late in opening, owing to the quantity of snow remaining, but the farmers have shown themselves very anxious to secure help. A number of British farm labourers and others willing to engage in agricultural work have already arrived, and there has been keen competition among employers for their services.

Manufacturing.—There is little change to report from last month. As a rule the only drawback to the activity created by a good demand for manufactures in all lines, has been the unusual conditions of the season and the enforced slackness caused by inability to ship freight or obtain the raw material required. The outlook for a busy season is decidedly favourable.

CONDITION OF PARTICULAR TRADES.

Building trades.—Very little has yet been done in the way of new building

operations, owing to the backwardness of the season, and a considerable proportion of the men in all lines, excepting plumbers, are out of employment. A number of building permits, mainly for residences, have been issued. The prospects for the season entirely depend on whether strikes on the part of some of the leading trades can be avoided. The carpenters have demanded an increase in wages from 30 cents to 32½ cents per hour, and the builders' labourers, who now receive 25 cents per hour, demand 27½ cents. The plumbers, whose agreement with their employers expired at the close of last year, have been in negotiation for some time for a new wage scale, but no understanding has yet been arrived at. The scale last season was fixed at 35 cents and 37½ cents per hour according to the grade of employees. The men now demand a minimum of 37½ cents per hour.

The first two months of 1904 showed a marked decrease in the number of building permits granted.

Metal, engineering and shipbuilding trades.—There continues to be steady employment in these lines. Machinists have had a fair month with but few idle men. Boiler makers and blacksmiths have also been busy. The blacksmiths and helpers are agitating for an increase in wages. At present the former receive from 20 cents to 27½ cents per hour, and helpers from 15 cents to 18 cents per hour, working in both cases ten hours per day. A meeting will shortly be held to draft a new wage schedule and put the demands in definite shape.

Woodworking and furnishing trades.—Conditions are generally satisfactory. The strike of 21 picture-frame workers in the employ of the Cobban Manufacturing Co., Ltd., was settled satisfactorily by a readjustment of the scale for piece work and the men returned to work on March 6. Piano workers are practically all employed. Cabinetmakers find plenty of work.

Printing and allied trades.—Printers report trade somewhat quieter than last month, with a number of men unemployed.

The Master Printers' Association has appointed a committee to confer with a committee of the Typographical Union as to a new wage scale, as the present agreement expires June 1.

Clothing trades.—Custom tailors are very busy and likely to be so for some time. Garment workers find work slack to a greater extent than usual at this season. This is, no doubt, attributable to the general disorganization of business by the traffic blockade, and perhaps also in some measure to the fact that more people are now wearing made-to-order clothing than formerly. Boot and shoe workers are steadily employed. Cap and neckwear operators have had a good month.

Food and tobacco preparation.—Reports as to these trades are generally satisfactory, with the exception of butchers, who have lost much work owing to non-delivery of live stock at the packing houses.

Transport.—With the clearing of the railroads for freight traffic, railroad men will be very busy for some time forwarding accumulations of freight. Navigation has not yet commenced. Three steamship companies have accepted the wage scale of the marine firemen, oilers and water tenders, giving a uniform rate of \$40 per month.

Miscellaneous.—The stationary firemen's organization has now a membership of about 100. The Waiters' Alliance is agitating for shorter hours and less Sunday labour. Laundry workers, although work was slack during the winter, are finding increased employment.

DISTRICT NOTES.

Toronto Junction.—Toronto Junction was deprived of water on the 25th inst., as the result of a washout carrying away about 100 feet of the main supply pipe. Several industrial establishments, including the Queen City flour mills, Wilkinson Plough Factory, Gurney Foundry, Dodge Manufacturing Co., etc., were obliged to close down, throwing 500 or 600 men temporarily out of work. The brickmakers

have decided not to demand increased wages and will go to work on the opening of the season on last year's terms.

Markham.—The woollen mill in this village was shut down for some time about the middle of the month through lack of coal. There will be a large exodus from Markham village and township this season to Manitoba and the North-west.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

March has been a dull month in labour circles, though the lack of employment has not been of a serious nature. No new works of any importance have been started owing to the prolonged winter weather. Work on the power development has been carried on as rapidly as possible and several contracts are nearly completed. General business has been good, both in wholesale and retail trade, in financial circles and on the railways.

The yardmen, yard engineers and yard firemen of the Grand Trunk, about one hundred in all, had their hours of labour reduced from eleven to ten per day without decrease of wages. Dissatisfaction in the Dominion suspender and Niagara neckwear factories was allayed by concessions on the part of the management after several employees had quit work. A new scale of salaries for teachers in the public schools of the town went into force. Changes from the old schedule provide for increased salaries. The salaries of town officials generally have been increased.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Little work can be done on farms till warmer weather arrives. The season of frost and snow is unusually prolonged. There is a demand for farm labourers.

Manufacturing.—Local factories are generally busy. Knife grinders at the Ontario Silver Works have been working short

hours. The chain and trap shop of the Oneida Community has orders enough to keep it busy till August.

Railroad construction.—Railway construction promises to be active but has not commenced yet.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are greatly hampered by cold weather. New buildings cannot be started. Carpenters are fairly well employed. Bricklayers, masons, lathers and plasterers are largely idle, as are also painters. Plumbers and gasfitters are all employed. Stonecutters and builders' labourers are idle.

Metal, engineering and shipbuilding trades.—Foundry employees, after a short dull period, are busy again. Machinists have been working short hours. Electrical workers are well employed. Structural ironworkers, and rivetters of all classes, are busy.

Printing and allied trades.—Printers are busy.

Clothing trades.—Tailors are all employed.

Food and tobacco preparation.—Ice cutters and handlers have closed a very busy winter. More ice was stored than ever before.

Miscellaneous.—There is a demand for female help in hotels, and for domestic servants.

Transport.—Railway employment shows signs of slackness but freight traffic is still very heavy and full complements of men are working.

Steamboat men are engaging for the coming season. There has been some demand for teamsters.

Unskilled labour.—Labourers generally are well employed.

DISTRICT NOTES.

Welland.—The salaries of teachers in the public schools have been increased. Work on the new bridge over the Welland Canal is well advanced.

Port Colborne.—Ice cutting and packing, which has employed many men here, is finished. Work has been recommenced on deepening the Welland Canal. The rock drillers and helpers have organized, with a charter from the International Longshoremen's Union.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The early part of March was dull in the labour market, but as the month advanced a marked improvement was noticeable. The building trades became busy, and labour was more in demand, a lot of jobbing work being done and a number of buildings started. Work was begun on the new Bishop Ridley College, which alone will give employment to a large number of men. The railways were no longer hampered by the conditions that prevailed during the snow blockades, and transportation has become active once more. As freight continues to be heavy in volume, it will be some time before the work in arrear will be overtaken. Merchants report business good and sales large, with prospects favourable for a busy season's trade. The lock-out that occurred at the Kinleith paper mills, through the decision of the firm to return to the long hour schedule, and which affected 78 hands, resulted in some of the old hands accepting the conditions and returning to work, and the filling of the places of those refusing to accept. The firm was able to resume full operations by the 14th of the month. Those who refused to accept the conditions and return to work under the long hour schedule regulations have secured employment elsewhere. This has been the only disquieting influence at work during the month. The Grocers' Association by resolution declared in favour of closing their businesses and giving their employees a half day holiday on Wednesdays, from June 15 to August 15. There exists a decided demand for small or medium sized houses to rent

at a figure within the means of the working man.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The fruit growers of the Niagara district have had several meetings lately to perfect their organization. They are agitating for co-operation in their work, and in all matters affecting the fruit growers' interests.

Manufacturing.—All manufacturing industries are busy, the only exception being the Whitman, Barnes Co., manufacturers of harvest tools and parts of harvest machines. Last fall this firm started on what was supposed to be but a temporary short time schedule, *i.e.*, working but five days in the week ; this is still in operation. With this exception all manufactories are working full time.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, joiners, lathers and plasterers are well employed. Painters and decorators, and paperhangers are very busy. Plumbers, gas and steamfitters are rushed with work. Stonecutters and builders' labourers report trade fair.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists, electrical workers and linemen report work good. Blacksmiths and horseshoers report trade fair.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers are well employed.

Printing and allied trades.—Printers, bookbinders and pressmen are working full time.

Clothing trades.—Journeyman tailors are busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, cigarmakers and tobacco workers, all report trade as good.

Leather trades.—Tanners and curriers, leather workers and saddlers are well employed.

Miscellaneous.—Barbers report trade good. Clerks and stenographers are well employed. Delivery employees, hotel and restaurant employees find steady employment. Laundry workers are busy.

Transport.—Conductors, trainmen, trackmen, freight-handlers, street railway employees and teamsters are well employed.

Unskilled labour.—This kind of labour is not much in demand at present.

DISTRICT NOTES.

Port Dalhousie.—With the exception of employment in the Maple Leaf Rubber Factory, the labour market here continues quiet. All the factories are running full time. The sulphite works in connection with the Riardon paper mills, which closed down last May, have started up again, giving employment to 25 hands. Labour is generally well employed.

Thorold.—With the opening of spring comes an increased demand for labour. The factories and mills are all running full time, and labour is generally well employed.

Reynoldsville.—Work has begun on the Cataract Power Company's plant; this is giving employment to a large number of men.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The opportunities for labour, skilled and unskilled, are improving with the opening of spring. Several manufacturing industries contemplate enlarging their plants. The Force Food Company will increase its output from 500 to 900 cases per day. Additional hands will be put on at the Harvester works, where there are now about 1,700 men employed. The Eagle Knitting Company is about to add a story to its mill, and the D. Moore Co. will add another moulding shop and cupola house

to its factory Swift & Co., the Chicago pork packing firm, who bought out the Fowler's Canadian Company sometime ago, has purchased the canning business conducted by the Rosemary Company in connection with the stock yards. The company intends to enlarge the factory premises, and to considerably increase the business. The Hamilton Motor Works have been incorporated, with a capital of \$40,000, and The E. Van Allen Shirt Company with a capital of \$100,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy preparing for the coming season.

Fishing.—This industry is quiet at present.

Manufacturing.—Conditions in some branches are active; in others only fair. The assessment commissioner has made out a statement of the hands employed and wages paid in 1903 by factories having exemptions from the city. There are now 19 establishments on this list, employing 3,365 men and boys, and 534 women and girls, with a weekly wage bill of \$36,693.

Railroad construction and employment.—There is little railroad construction going on in this locality at present; conditions will in all probability improve as the spring opens.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building trades will soon increase. As far as the outlook at present goes there is sufficient workers in the building trades in the city to meet the demand. The local plasterers have formed a union. The bricklayers and masons have bound themselves to work for members of the Master Bricklayers Association, excepting only railways and corporations and new firms that have had no chance to join the association. The Masters' Association will employ only union men. Work among carpenters, plumbers and painters is fair. Builders' labourers have not yet commenced their season's work.

Metal, engineering and shipbuilding trades.—Iron workers in foundries, har-

vester works, and machinists, &c., report work very good. Sheet metal workers have asked to have their minimum rate of wages increased from 20 cents an hour to 25 cents an hour; they have been working ten hours a day. Electrical workers, blacksmiths and horse-shoers have been fairly busy.

Woodworking trades.—The woodworking trades have had a fair month, especially in the inside carpenter shops, and in furniture factories.

Printing and allied trades.—All engaged in these trades have experienced fair employment. The lockout of the lithographers throughout the United States did not affect Hamilton, although a large number of this class are employed here.

Clothing trades.—The active season for journeymen tailors is now in full operation, and the men and women engaged in this employment are very busy. Work among garment workers is a little between seasons in some branches, and is therefore somewhat slack, with expectation of an improvement in the near future. Hatters are dull. Boot and shoe workers are busy; the addition to the factory of McPherson & Co. will soon be open.

Food and tobacco preparation.—Ice cutting is now over; the harvest was somewhat hampered by the extreme thickness of the ice. Cigarmakers and tobacco workers have had a very good month.

Miscellaneous.—Barbers were fairly busy. Broom-makers are enjoying a good season, as are also laundry workers.

Transport.—All railroad employees are well employed. Longshoremen are not very busy. Street railway employees report work fair. The city has agreed to pay teamsters supplying two horses and driver, 37 cents an hour, or \$3.33 a day, for teams on watering carts; and 43 cents an hour, or \$3.87 a day, for other work. They had asked \$4 a day.

Unskilled labour.—As yet unskilled labour is not very well employed, owing to the frost still being in the ground to a depth of from four to six feet.

DISTRICT NOTES.

Dundas.—Work in most of the trades has been very active. Garment workers, woodworkers, machinists, moulders and axe factory hands had a good month. It is expected that the piano and refrigerator factories will soon be in operation. At the last meeting of the town council a committee was appointed to consider the advisability of the purchase of the Dundas gas plant by the municipality.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been fairly well employed, excepting bricklayers and masons, who were kept idle by the inclement weather.

The Malleable iron works were closed several days for lack of power, and many industries were seriously affected by the shortage of cars and by the non-arrival of freight.

The month, however, was more favourable than February, and compares favourably with the corresponding month of last year. Several of the factories engaged in the iron trades worked overtime.

Damage done by muskrats to the embankment skirting the lake from which the local electric light plant obtains its power caused some embarrassment to industry, a few local factories running by electric energy being forced to close down, and the lighting system of the city being interfered with.

About 50 feet of the canal bank was washed away, and the repairing of it afforded employment, at good wages, to a number of idle men.

Flour has advanced 20 cents per barrel, and the price of bread has been raised 1 cent per two pound loaf, which now costs 6 cents.

Merchants, wholesale and retail, report an increased trade over that of last month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A meeting of farmers interested in the raising of sugar beets was held in Cainsville, and it is expected that the Berlin mills will receive large shipments from this locality next fall.

Manufacturing.—All manufacturing concerns, with the exception of those mentioned, were busy.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been practically idle. Carpenters and joiners, plumbers, gas and steamfitters have had a favourable month. Lathers and plasterers have had some employment. Painters and decorators have had a fair month, some employed in factories having worked overtime.

Metal, engineering and shipbuilding trades.—Iron and brass moulders, and core-makers, with the exception of those employed at the Malleable Iron Works, have had plenty of work. Machinists and engineers have been busy; a few men that were idle found work during the month. Metal polishers and buffers, stove mounters and blacksmiths, have had steady employment, and some have worked overtime. Boiler-makers, sheet metal workers and horse-shoers have all had steady employment.

Woodworking and furnishing trades.—Carriage and wagon makers, pattern-makers and millwrights have worked full time.

Printing and allied trades.—Printers and pressmen report employment steady.

Clothing trades.—Journeymen tailors report trade better than last month.

Food and tobacco preparation.—Bakers and confectioners, cigarmakers and tobacco workers had a fair month.

Miscellaneous.—Barbers, clerks and delivery employees had a steady month. Hotel and restaurant employees, and laundry workers have worked full time. There is a demand for girls to work in the mills, in hotels, and at general housework.

Transport.—Railway trackmen and freight-handlers were busy, but street rail-

way employees were idle part of the month. Carters and teamsters had an average month.

Unskilled labour.—There is not much demand for this class.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been more steadily employed in March than in February. While sufficient supplies of coal were received to keep factories running, which was not the case in February, much inconvenience was experienced in getting both inward and outward freight through. The entire northern country in the peninsula of Ontario was badly blockaded during the early part of the month. Towards the latter part business of all kinds showed a decided improvement. Retail trade has been only fair. The erection of a four story warehouse for the Guelph Foundry Company is about to commence. There are also prospects for a number of other new factory extensions. The shortage of houses suitable for workingmen, and renting at from \$6 to \$10 per month, is severely felt. At a recent meeting of the city council a special committee was appointed to consider the advisability of exemption from taxes for a period of years to induce the building of this class of houses. No report has yet been brought down. A strike of painters in one shop occurred. An agreement existed regarding apprentices and one more than the allowed number being hired the strike was declared. It was settled by the firm returning to its former agreement. Bricklayers and masons had their wages raised and stonecutters their hours reduced.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The blockade of the concession roads during the first half of the month and the spring breaking up of the roads in the latter part of the month have tended to make agriculture operations out of doors very quiet.

Manufacturing.—Manufacturing is fast recovering from transportation difficulties and long delayed freights are being fairly well gathered in. Prospects in all lines are considered very bright.

Railroad construction.—The railroads have employed a very large number of men hovelling snow, probably in the neighbourhood of 1,000 men having been employed north of Guelph at one time. They were paid from \$1.50 to \$2 a day and board.

CONDITION OF PARTICULAR TRADES.

Building trades.—The season is at least three to four weeks behind last year in starting. Bricklayers and stonemasons have done a small amount of inside work on the Macdonald buildings. They will get an increase from \$3 to \$3.25 for this season. Carpenters and joiners and painters have been partially employed on repair work and also to a slight extent on the Macdonald buildings. Stonecutters have not had much to do. They will get a reduction from 9 hours a day to 8 hours with the same rate, \$3 per day.

Metal, engineering and shipbuilding trades.—Iron moulders had a much better month than February. Machinists, machinists' helpers and sheet metal workers all had a good month. Tube mill employees had a fair month, much better than February.

Woodworking and furnishing trades.—Woodworkers had a fair month. Piano and organ workers had a much better month than February. Upholsterers had only a fair month, but report prospects good. The woodworking trades have been unable to get their materials in or their goods out, but at the end of the month conditions were much improved. Carriage workers are very busy and coopers fairly busy.

Printing and allied trades.—Printers had a busy month.

Clothing trades.—Tailors are now on spring work and trade is good.

Food and tobacco preparation.—Cigar-makers have only been fairly well employed.

Textile trades.—Textile workers have had a slightly better month than February, but

employment is only fair. This also applies to Brussels carpet weavers.

Unskilled labour.—Unskilled labour is well employed for the season of the year.

DISTRICT NOTES.

Hespeler.—The local branch of the Canada Woolen Mills, which recently went on reduced time of 40 hours per week, closed down on March 16. A number of the employees of the factory have left town. At one time over 500 hands were employed in this mill.

Galt.—A new Collegiate Institute, to cost \$35,000 is about to be erected. A by-law to expend \$57,000 on new sewers is to be submitted to the people.

A board of trade was organized at Preston, Ont., on March 4, 1904.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was about the same as in February. Very few idle men were reported, and prospects are good for a busy spring, especially in the building trades, owing to the number of dwelling houses to be erected this summer. Tenders are also being asked for the erection of a building for a new knitting factory, 38 by 71 feet, three stories high, to be known as the Avon Knitting Factory. The firm expects to have it finished by June. There is an electric street car line to be built this summer, to connect Stratford with Mitchell and St. Mary's. Merchants report a most successful month's business, both wholesale and retail. There is no exceptional activity in any particular trade. Railway transportation, however, is very busy, especially in the freight line. There were no changes in the rates of wages or hours of labour, and no trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy bringing in grain, hay and other produce to

market. Wheat sells for 90 cents per bushel, barley 40 cents, oats 28 cents, peas 60 cents, flour, \$2.70 per cwt., hay \$7.50 to \$9 per ton, potatoes 90 cents a bag, butter 18 to 20 cents per pound, eggs 17 cents to 18 cents a dozen, chickens 60 cents to \$1 a pair, wood \$3 to \$7 per cord.

Manufacturing.—Conditions are generally satisfactory, all the factories running full time.

CONDITION OF PARTICULAR TRADES.

Building trades.—There is little doing this month, but plenty of work in sight as soon as the weather permits.

Metal and engineering trades.—Machinists, blacksmiths and horseshoers are busily engaged. Jewellers report a steady trade.

Woodworking and furnishing trades.—Woodworkers, upholsterers, polishers and woodcarvers are working full time. Coopers are steadily employed.

Printing and allied trades.—Conditions are good, with no idle men.

Clothing trades.—Tailors and garment workers have no idle hands, being busy getting out spring orders.

Food and tobacco preparation.—Bakers and confectioners report a fairly good month. Cigarmakers were steadily employed.

Miscellaneous.—Barbers report business good. The hotel and laundry employees are steadily engaged.

Transport.—Railway employees of all kinds continue very busy.

Unskilled labour.—Labourers report a rather quiet month.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of March was the most backward known in this city for a number of years; not until the final week did the weather become favourable for outside work.

At this time a year ago building was in full operation, the spring street cleaning had been finished, and active employment was general; but this year outside work has not yet commenced, and numerous workers in the building trades have done nothing for four months. The Rolling Mills were again compelled to shut down for a few days in the early part of the month, owing to a shortage of coal and sand, but are working a double shift now. At McClary's, in the enamel and retinning departments, night and day gangs are working, and in the tin shop they are working overtime. On the railroads, business is very active, the sidings in this district being now open, and the stalled cars being forwarded to their destination.

A feature of the month is the absence of demands for increases of wages; in March last year demands were made by nearly all of the building trades and by many other classes.

A serious flood of London West, caused by the thaw of the snow in this district took place on Saturday, March 26, the water flowing over the breakwater which protects this part of the city, and entering, to the depth of 4 and 5 feet, about 250 homes which were occupied solely by artisans and labourers. The loss to each family will amount to about \$100, through destroyed carpets, furniture, &c., or a total damage of about \$25,000. One drowning resulted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have, in a great number of cases, burned their fences for firewood during the winter, being unable to get to the bush for their wood owing to the great depth of snow. They are now busy repairing the fences. In all parts of the country maple syrup is being made, and a scarcity of help is reported for this work.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have not been able to commence work yet; the season being at least two weeks late. Carpenters are beginning to get work. All the painters and paper hangers are working. Plumbers and steamfitters are very busy,

and a demand for men is felt. Stonecutters and builders' labourers are doing nothing yet.

Metal, engineering and shipbuilding trades.—Iron moulders and iron workers of all kinds are very busy. Machinists have plenty to do. Electrical workers and linemen are quiet. Metal polishers, brass workers and stove mounters are very busy.

Woodworking and furnishing trades.—Carriage and wagon makers are rushed, with orders enough ahead to keep them going for two months. Car builders are busy. Coopers, who lost some time owing to lack of raw material through train delays, are now supplied and are very busy.

Printing and allied trades.—Printers and pressmen report trade as fair. A. Talbot & Company are now in their new premises. Bookbinders are busy.

Clothing trades.—The late spring has delayed the spring rush of journeymen tailors, but trade is improving now. Garment workers are very busy.

Food and tobacco preparation.—Bakers and confectioners report trade as fair. Cigarmakers are not as busy as they were, and do not expect to be until the beginning of the license year on May 1.

Leather trades.—Tanners and curriers are very busy.

Miscellaneous.—Broom-makers report trade as good. Brush-makers are rushed with orders.

Transport.—Train crews, especially freight, are exceptionally busy. A demand for firemen is made on the G.T.R. The ballast trains, which generally begin operations about the middle of March, have not been able to go out yet.

Unskilled labour.—Abundance of work for this class is expected soon, but the season is three weeks later than last year.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour during March was a little better than during the preceding month. More favourable weather conditions facilitated the moving of railway freight, and in consequence helped other industries, some of which were badly congested with stock awaiting shipment. Farm labourers were in demand during the month, the supply about equalling the demand. Retail trade was reported fair; the spring millinery openings occasioned extra work in the dry goods department. Rates of wages on the whole continued unchanged, and peaceful industrial conditions prevailed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—From reports at hand, a hopeful feeling is entertained among farmers. Live stock sold at high prices at auction sales, and the dairying outlook is excellent.

Manufacturing — Business continues healthy, and a buoyant feeling is manifest among manufacturers.

Railroad construction. — Railway construction gives promise of being active. The M. C. R. Co. contemplates double tracking the remaining 78 miles not already provided with a double track on the Canadian division.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades are expecting a good season, and the outlook has not been better for years. The Père Marquette shops is the largest item in sight. Store building is not much in evidence, but prospects are good for house building, notably cottages. The Thomas Bros. Co. propose erecting a number of cottages, with the view of renting to their employees at a minimum rate sufficient to cover cost. The company estimates that a comfortable six-room cottage can be furnished at a rental from two to three dollars per month cheaper than current rates, thus equivalent to an increase of wages to the tenants. As soon as the weather is favourable all

lines of the building trades will accordingly be busy. The past month, however, was quite slack.

Metal, engineering and shipbuilding trades.—The metal trades report favourable conditions. Woodworking industries are busy; orders are plentiful, and the timber supply is somewhat easier this year than last.

Clothing trades.—Journeyman tailors were slack during the beginning of the month, but trade improved during the latter part. Garment workers at the local factory will commence at the fall trade on April 1. It is expected that the staff will be doubled in number during the summer, as the new venture in this line is developing favourably; at present about 25 operators are employed.

Printing and allied trades.—The printing trades report a favourable month's business.

Food and tobacco preparation.—In this line there was little change. High prices prevailed for foodstuffs, and business was quite normal.

Transport.—Railway employees had a continuation of very arduous employment, but the weather conditions were better on the whole than during February. All traffic men are making good time, and will continue very busy for some time, as the freight blockade is not yet relieved, and it is probable that navigation will be late in commencing.

Unskilled labour.—Unskilled labour has had very intermittent employment during the winter, but is now in better demand.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The past month has been a very dull one for labour and business generally, cold and stormy weather having caused an almost complete suspension of outside work. Scarcely anything has been done in the

building trade during the month with the exception of some slight alteration work in a few stores. Local factories, however, have been running full time, the carriage and wagon factories, fanning mill and incubator factory having been working overtime though the supply of labour is equal to the demand. Transportation is rather dull, the railroads not handling much freight owing to the bad condition of the roads east of here. Wholesale and retail trade is quiet. No changes in the rate of wages or hours of labour are reported. The union men in the building trade, i.e., carpenters and painters, have given notice to the employers that they will ask for a nine-hour day in May, but there is no unrest in the labour market.

CONDITION OF PARTICULAR TRADES.

Building trades.—Plumbers alone of this class are fairly busy.

Metal and engineering trades.—Iron moulders, machinists, steam engineers and electrical workers and blacksmiths are fairly well employed; horseshoers are also busy.

Printing and allied trades.—Printers and bookbinders report a very good month.

Clothing trades.—Journeyman tailors report work rather slack.

Food and tobacco preparation.—Bakers, confectioners and cigarmakers are fairly well employed.

Unskilled labour.—There is but little demand for unskilled labour.

DISTRICT NOTES.

The beet sugar factory at Dresden has been pulled down and the machinery sent to the State of Michigan, where a factory is to be built to receive it. The reason given for the removal is that, as there is a similar factory at Wallaceburg, near by, not enough beets could be got to supply the demand, farmers not caring to go into the business of raising sugar beets, claiming that the price paid did not pay for the trouble of raising.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been generally well employed during March, and conditions are very promising for a big season's work. The board of public works has let contracts for \$40,000 for sidewalks and for \$20,000 for street paving. The Standard Paint and Varnish Company is putting up a new plant costing \$40,000, and plans are out for two churches costing \$6,000, and three six-roomed public schools costing from \$10,000 to \$15,000 apiece, besides a score of private dwellings. Piggott & Sons are installing a new 110 horse-power engine in their planing mill, as they have not sufficient power to keep up with the demand for their products. Wholesale and retail merchants report trade fairly good. There were no changes in the rates of wages or hours of labour. Four associations were formed last month: a retail lumber dealers' association, a carpenters contractors' association, an employers painters' association, and an employers horseshoeing and blacksmiths' association. The carpenters' union settled with the contractors and will work during 1904 on the same terms as in 1903. The boss painters have declared for an open shop after April 1.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are all busy getting ready for spring work. Corn is selling on the market at from 40 to 45 cents a bushel, which is considered a good price.

Manufacturing.—All establishments are running full time.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trade is not very brisk as yet. Bricklayers and masons report about half of their men idle. The carpenters are all fairly well employed, and painters and paperhangers report trade fairly good for this time of the year. Plumbers, gas and steamfitters are all working.

Metal, engineering and shipbuilding trades.—Shipbuilders are all busy repairing boats and putting them in shape before navigation opens.

Woodworking and furnishing trades.—Woodworkers, carriage makers and coopers are well employed.

Printing and allied trades.—Printers and pressmen are steadily employed. The Standard Printing Company has stopped printing a daily paper and are issuing a weekly.

Clothing trades.—The journeymen tailors' union, which has 60 members, reports all hands working.

Food and tobacco preparation.—Bakers and confectioners had a fairly good month's trade. Cigarmakers and tobacco workers are all well employed.

Miscellaneous.—Barbers, clerks, stenographers and delivery employees have steady work. Hotel, restaurant and laundry workers are all busy.

Transport.—The railroads are all very busy.

Unskilled labour.—There is very little demand for unskilled labour just at present.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been well employed during March. Conditions were interfered with to some extent by the abnormally heavy snowfall throughout Manitoba. Both railway companies have, in consequence, had to employ extra gangs of men for the work of clearing the tracks. Transportation was impeded, but no actual stoppage took place beyond the delaying and cancellation of some trains.

All local industries are enjoying a season of profitable activity. No additions of an important character have taken place recently, but several new establishments are being started. Preparations for new buildings are already being made, and on such

a scale as would indicate a greater activity even than that of 1903. The Canadian Pacific Railway Company is making preparations for the building of a large subway on Main street, and of a hotel and station, which have been the subject of negotiation for some years. Final plans for the subway have been approved by the city council. It will be a concrete structure, and between the outer walls will have a space of 100 feet, divided into three roadways and two footpaths. The cost will be \$90,000. The hotel and station will cost two or three millions, and both will be commenced this year. The Canadian Northern Railway Company is asking the city to close some streets to make room for a proposed new depot and hotel. In addition to the big outlay of money which these will involve, the same company purposes building new workshops in the suburb of Fort Rouge. When completed and in operation these will give employment to three or four thousand men.

The plans for railroad construction during the ensuing summer are very considerable, and will fully absorb what labour there is at present in sight.

Business activity continues. Some inconvenience was experienced as a result of the snowfall, but it was not of great moment. The bank clearings of Winnipeg indicate a steady expansion of trade, and also show a very high rate of increase as compared with other financial centres in the Dominion.

Labour of the purely manual character has slightly declined in value. The extra gangs sent out for snow shovelling, &c., are being engaged at from \$1.40 to \$1.50 per day, with board charged at the rate of 50 cents per day. In the city common labourers are being paid $17\frac{1}{2}$ to 20 cents per hour.

So far this spring no troubles of an industrial character have taken place, although a large proportion of the building trade unions have agreements that terminate with March and April. The bricklayers, it is understood, will not ask for any change in their schedule, and the carpenters will

observe the contract as made last fall, which does not terminate until October. In some of the other trades some modification of existing agreements will be sought.

An association of employing contractors was formed in Winnipeg on March 22. The name of the association is to be the Winnipeg Builders' Exchange, and its objects are:

(1) The joining in one association all contractors, manufacturers and dealers whose vocation connects them with the building industry, and who are not members of any journeymen's trade or labour union.

(2) The establishing and maintaining among the members a just and equitable system of dealing and a uniformity in commercial usage, and the acquiring, preserving and disseminating valuable information.

(3) The procuring, furnishing and maintaining suitable rooms for the use of its members for meeting rooms, offices, &c.

(4) The establishment and maintenance of a system of adjustment of all disputes which may arise between its members, or between its members and their employees and other persons.

Membership is limited to: (1) Contractors in any branch of the building trades. (2) Manufacturers of or dealers in any class of building materials.

Where the usual place of business of such contractor, manufacturer or dealer is outside the city he must maintain an office in the city in charge of an agent or representative.

The officers are to be a president, a first vice-president, a second vice-president, secretary, treasurer, sergeant-at-arms and nine directors, three elected each year for a term of three years.

The committees are to be membership, finance, suspension and forfeiture, arbitration, legislation and resolutions.

The admission fee is \$10, and the dues \$2.50 per month. Fifty cents is to be paid to each member for attendance at each meeting, if he is not in arrears for dues or fines.

At a meeting of business men in Winnipeg it was decided to promote and support the Western Canada Immigration Association in a substantial way, with the idea of advertising the resources of the Canadian west.

The licensed hotel-keepers of Winnipeg formed a provincial association on March 5th.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are beginning to seek help for spring work. Early in the month the demand was larger than the supply. The arrival of immigrants, however, covered this demand later.

Fishing.—The fishermen of Lake Winnipeg are reported to have had an exceptionally profitable season.

Lumbering.—Lumbering has been carried on during this winter under very favourable conditions. The weather has been excellent, and the health of the men has been good. Contractors are also satisfied with the output of the camps. The large number of inexperienced men that had to be employed led many to fear that at the end of the season the output would be disappointing. Such, however, has not been the case, the men having proved more apt than was anticipated.

Manufacturing.—Manufacturing has been generally steady. Orders have been plentiful and prospects are good for their continuing to be so.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades, for the time of the year, have been well employed. The demand for buildings has been so great that operations have been carried on all winter, and it is claimed that it is practicable to do so. Bricklayers have accordingly been working more or less throughout the winter and carpenters likewise, though usually all operations outdoors cease for one or two months. Recent storms have interfered somewhat with work. The question of procuring labour has been an anxious one for contractors during the last two years and the greater amount of building projected for this year would justify the conclusion that much extra help will be necessary. A representative of a large building firm stated, however, that they had anticipated the demand and had made provision to secure all the men that they wanted. It is safe to say that if a reasonable proportion of the work at present under projection goes ahead there will be a very general de-

mand for skilled building trade employees by the end of April and the beginning of May. The unprecedented activity in building last year in Winnipeg, Man., is illustrated by the great increase in the number of electrical installations. During 1902, 502 permits were issued and in 1903 the number was 1,102. 14,194 incandescent lights were wired in 1903 and 66 interior arc lights installed as against 8,860 and 45 respectively in 1902. There were 654 horse motors installed in 1903 and 259 in 1902.

Metal, engineering and shipbuilding trades.—The iron foundries and machine shops of the city are busy and will be taxed to their utmost in keeping pace with the demand for their product during the summer.

Woodworking and furnishing trades.—Mills employed on woodwork are all busy. Full time all winter has enabled them to get a little ahead and, generally speaking, they will be in better shape to handle the spring and summer orders than in previous seasons. A planing mill in the city is putting down a new plant of a greater capacity.

Printing and allied trades.—The printers are negotiating with the employers for an eight hour day for all classes of employees. The employers are objecting on the ground that it will still further cripple them by exposure to competition from eastern Canadian towns where lower wages are paid and longer hours worked. Business generally seems to be large in volume, but the employers say that the margin of profit is small.

Clothing trades.—The tailoring trade is active and garment workers are all employed. Of the latter class the supply is insufficient, according to the reports of manufacturers.

Food and tobacco preparation.—Cigar-making is taking up all the skilled labour that is offering. Bakers are also busy and the volume of business is increasing very rapidly.

Unskilled labour.—General labour of all kinds may be said to be well employed.

About the middle of March there is always a limited number of men on the streets. Their appearance there is the result of lumbermen coming into the city. The general exodus from the camps will not, however, take place until the first week in April. At that time work of other kinds will be available for all who desire it. Civic work will this year be on a larger scale than hitherto. Altogether something like 2,000 men will be employed.

DISTRICT NOTES.

Local union No. 16 of the Bricklayers and Masons International Union of Sault Ste. Marie, reports current wages as 45c. per hour for masons and 50c. per hour for bricklayers, a nine-hour day being worked by both classes.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Mechanics are fairly well employed, with the exception of masons and bricklayers. A new woollen mill has been equipped with up-to-date machinery, and will manufacture special lines. Business is exceptionally active with transportation companies. Wholesale and retail merchants report trade fairly active for the season. Men engaged in the local railway shops have been working full time since March 7.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It is estimated by reliable authorities that, owing to the decrease in the price of wheat and as a result of increased immigration and the acreage already prepared, there will be three million eight hundred thousand acres of land under crop this coming season. This is expected at the lowest estimate to produce seventy-five million bushels of grain throughout Manitoba and the Territories. Railway authorities are making special efforts to be in a position to move this crop.

Manufacturing.—Manufacturers state that orders on hand at present exceed that of any previous year.

Railroad construction and employment.—A large staff of men are employed throughout the city and district owing to snow blockades, particularly on the branch lines. The Canadian Pacific Railway Company intends to carry out extensive railway construction during the coming summer. The extension from Arcola to Regina will be completed; also the Pheasant Hill extension from Pheasant Hill to Pheasant Creek. The work of reducing the grades west of Moosejaw on the main line from one per cent to four-fifths will be gone on with. This undertaking involves the construction of one hundred miles of new line between Moosejaw and Medicine Hat.

CONDITION OF PARTICULAR TRADES.

Building.—At present bricklayers, masons and builders' labourers are idle, but the outlook for building operations is very encouraging, to judge from the reports of the city architect. One syndicate contemplates building over three hundred houses. A few carpenters are employed on inside jobs. Lathers and plasterers, painters, decorators and stonecutters report trade slack. With plumbers trade is good. Stonecutters on marble work are fully employed.

Metal, engineering and shipbuilding trades.—Machinists, blacksmiths and engineers are fairly busy. With steam engineers trade is good. Boilermakers report trade good, with some openings for good men in the railway service.

Woodworking and furnishing trades.—Upholsterers and pattern makers are busy.

Printing and allied trades.—Printers and pressmen are busy.

Clothing trades.—Journeyman tailors, garment workers and boot and shoe workers are busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat-cutters, ice-cutters and drivers, and cigar-makers, are busily employed.

Miscellaneous.—The barbers' trade is good. Clerks and stenographers are busy, but there are no openings. Delivery employees and laundry workers are busy.

Transport.—Railway crews are all busily employed.

Unskilled labour.—There is a considerable amount of unskilled labour throughout this city; a large proportion has been employed on the railways clearing the snow away.

DISTRICT NOTES.

Commercial travellers who have returned from different parts of the district report business very satisfactory up to the present.

The lumber cut in the Dauphin district this year is estimated at 65,000,000 feet. The Hanbury Company, of Brandon, cut over 5,000,000 feet.

There has been a number of improved farms sold at high figures.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, correspondent, reports as follows:—

DISTRICT NOTES.

In the lower altitudes of the Kootenay-Boundary country spring weather is, at the end of March, in evidence, but as a rule the snow still remains. The Rossland district has witnessed the greatest fall of snow in its history, over 210 inches having fallen up to the 21st instant. No cold weather has been reported, however, which has been a mitigating factor. Rossland, for example, has not seen zero weather all winter. In some other districts various degrees of frost below zero mark have been reported but in no case was there sufficient severity to cause inconvenience. Ordinarily it is presumed that the altitude of the Kootenays conduces to severe cold during the winters, but in reality it is rarely indeed that the temperature drops to zero in the mountains save at uninhabited heights. Rossland has an elevation of 3,400 feet, and zero weather is so unusual here that the average dwelling house is so constructed that it would be practically uninhabitable in the North-west Territories or the eastern provinces.

The revival throughout the Kootenay and Boundary districts predicted at the first

of the year is already under way, and the advent of spring will see its fruition. This is especially true in the case of mining. The lead-producing districts are feeling the influence of the federal bounty, and the mines located on the railroads are either in full operation or are maturing plans to bring this result about at an early date. As the snow passes away mines that have been prevented from marketing ore during the period when the wagon roads were snowed under will be enabled to team the product to the railroads, and thus employment will be opened for additional numbers of skilled men. The gold-copper camps are also in a most promising condition. At Rossland the prevailing sentiment is decidedly buoyant, first as the result of splendid reports as to discoveries of great ore bodies of profitable grade in the deep levels of the principal mines, notably the Le Roi, and, secondly, because of the certainty now felt that the applied methods of concentrating low grade ores will prove commercially successful. As a feature of the local mining industry it is worthy of mention that the present month has seen active mining operations commenced on the 1350 level of the Le Roi mine, and that the hoist from the stopes at this depth will be the longest in Canada, marking an important advance in connection with the mining industry of the Dominion. In the Boundary, fresh activity is manifested in increasing facilities. Boundary ores are low grade and are profitable only when handled on a large scale. The force of this is being borne in upon the mining companies operating in the district with the result that on all sides preparations are being made to increase the output of the mines and the capacity of the smelters. The Boundary mines are now producing fifteen thousand tons of ore weekly; it will be seen, therefore, that the mining industry of this section is assuming very important proportions.

The *transportation companies* are profiting by these extensions of industry, and will continue to do so in proportion as activity is enhanced.

In the *lumbering industry* of the Kootenays alone is there any measure of uncertainty, and the outlook there is most favourable for a solution of all difficulties. The situation has been given considerable publicity of late, and it is said to be practically assured that the lumbermen will reduce their tariff, and that this will be met with a similar reduction in freight rates by the Canadian Pacific, the two cuts combining to effect a reduction in the selling price to the consumers in the North-west Territories that will satisfy all interests and conserve the home market to the Canadian producers.

The entire country is absolutely free from unrest, and the indications are propitious for the most successful summer the country has enjoyed in several years.

The *coal miners* of Fernie, Michel and Morrissey have undertaken the establishment of a co-operative store. The proposition was originally taken up by the Fernie Miners Union, and as a result of favourable reports on the subject the enterprise is now being put in effect. The outlines of the plans for the store are that it shall be under the control of the members of the union, regular officers being elected from among the members semi-annually. A manager will be engaged to run the store under the advice of the union officials. Shares in the co-operative store have been placed at \$5 each, with the restriction that no more than forty shares can be acquired by one person. The capital stock is to bear 5 per cent interest per annum, with a quarterly division of profits according to the purchases made by the shareholders. The main store will be located at Fernie, with a branch at Morrissey. A recent experiment of this nature was in Rossland, where the enterprise was a failure.

On March 8 the annual convention of District Association No. 6, Western Federation of Miners, took place at Nelson. Sixteen local unions were represented in person. The election of officers for the ensuing year resulted as follows:—Ernest Mills, Greenwood, president; Frank

Phillips, Nelson, vice-president; Anthony Shilland, Sandon, secretary-treasurer.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change in conditions over last month. There has been a demand for carpenters and labourers in the building trade. A large number of buildings are in course of erection, and more are contemplated when the weather becomes settled. An important agreement between the city and the British Columbia Electric Railway Company for the supplying of power for lighting purposes was arrived at. The contract is for ten years, and the price to be paid is \$1.46 per kilowatt hour. The company has purchased a lot and will erect a sub-station to cost \$20,000, and will be ready to supply power in eight months' time. Some of the canneries have already commenced to prepare for the season's run of fish. There have been no changes in wages during the month.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The Dominion government's hatchery at Bon Accord has commenced to liberate the first batch of young sockeyes. It is estimated that ten millions of sockeyes have been hatched this season. Besides these, a hundred and thirty thousand spring salmon, a hundred and fifty thousand trout and ten thousand hump back salmon have been hatched. The British Columbia Fishermen's Union has presented the following schedule for prices for salmon this year to the canners:—

Red spring salmon, to April 15th, 7 cents per pound.

Red spring salmon, from April 16th to May 23rd, 5 cents per pound.

White spring salmon or steelhead, to April 15th, 4 cents per pound.

White spring salmon or steelhead, to May 23rd, 2½ cents per pound.

Mining.—In the boundary mines it is estimated that 1,300 men are employed, re-

ceiving in monthly wages \$140,300. The number of men varies, and sometimes more than this number are employed at the different mines and smelters. All miners receive \$3.50 per day of eight hours underground, and ten hours above ground, while muckers receive \$3.

Railway construction.—The V. W. & Y. Co. still continues to employ a large number of men on the construction of its road from this city to Vancouver.

Lumbering.—This industry has been dull for the past few months. Several large firms are making their annual over-hauling of machinery and alterations. The Royal City Mills Company is erecting a large new dry kiln, 66 by 116 feet, including platform 40 by 66 feet; also a large warehouse, 66 by 100 feet. The Hastings Mill Company has decided to commence the erection of a large mill at Woodyville; it is to be equipped with the latest machinery, and give employment to 100 men. The Harrison Lumber Company, whose mill was destroyed by fire some time ago, is erecting a new mill at Harrison, which will be modern in every particular, and larger in capacity than the old mill.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons work steady, and all members of the craft employed. Carpenters report a large amount of jobbing and repair work under way. Plasterers and lathers report work dull with prospects good for spring work. With painters, decorators and paperhangers work is plentiful, a large amount of jobbing being done, with prospects of a busy spring.

Metal, engineering and shipbuilding trades.—With iron workers and engineers work is good; a large amount of machinery is being built for the canneries. Shipwrights and caulkers report work dull; many of the members are working at other ports.

Woodworking and furnishing trades.—Shingle weavers are steadily employed, and

some of the mills will soon increase their gangs.

Printing and allied trades.—Printers find work plentiful. Some of the offices have increased their staffs. Prospects are good for some time in this branch.

Food and tobacco preparation.—One of the cigar factories has closed for stock-taking. The members of the others are working full time.

Miscellaneous.—Clerks and stenographers report work dull, the demand here being at any time slight. A demand is made for hotel employees.

Transport.—Train crews work long hours, and receive extra pay for all overtime. Street railway employees report work steady, with all members working.

Unskilled labour.—A demand still exists for labourers for farms and railroad work.

DISTRICT NOTES.

Throughout the district work is plentiful, a large amount being under way at *Nicomén Slough*. The Dominion government's engineer is preparing a scheme to deepen the main channel of the Fraser river, so that the island will not be subjected to so much overflow; an appropriation of \$25,000 has been made for this work. A large force of men will be needed to carry out this much-needed improvement.

Revelstoke.—Instructions have been received from the headquarters of the Canadian Pacific Railway, at Montreal, for the enlargement of the yard; the cost is estimated at \$40,000. The provincial government has recommenced road work throughout the district that was unfinished when the wet season set in. Several bridge contracts on municipal roads are being carried out.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

About 700 men are already engaged permanently in the building trades. Stone masons are particularly busy, the reason being that the weather has been bad and work must now be rushed. There is a demand for good men. A great improvement is noted in the class of buildings now being erected in Vancouver.

Boilermakers in the employ of the Vancouver Engineering Works went out on strike on Saturday, March 5. It had been specified that none but union men should be employed, and the company posted shop rules compiled from the National Metal Trades Association rules contravening this. The whole contention is practically in reference to the open shop. Fifteen boilermakers are involved.

On Saturday, March 19, 14 'machinists' in the employ of the same company also went on strike. The president of the Machinists' Union had been discharged the day previous, it is alleged by the company, for violating one of the new rules which reads:—'Union and non-union men will be employed by this company. Any employee interfering directly or indirectly with this rule will be immediately dismissed.' The men in the shop demanded the president's re-instatement. The company refused, and the men went out on strike.

The Yukon trade has opened, and several large shipments have been forwarded, quite a number of orders having been filled for the new Alaska diggings, near Whitehorse. Local business is reported to be quite satisfactory for the season of the year, and in some lines trade is already active.

Notice is given in the *Provincial Gazette* of the reservation of certain areas of Crown lands for selection by the Arianental Power and Pulp Co., Ltd. A certificate of incorporation was also issued to the Agassiz Farmers' Co-operative Association, Ltd., the shares of which are of a par value of \$10, and are unlimited.

At the annual meeting of the Board of Trade, Vancouver, an address was given by

the president in which he referred to the progress made by the city during the past year as probably greater than ever before in a single period in its history, in spite of the serious labour troubles which occurred during the spring. Population was increasing, building was on an extensive scale, revenue advancing and trade active, though the small run of fish on the Frazer had had an injurious effect. Manufacturing, lumbering and mining, however, he stated, were satisfactory.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report trade good, with prospects excellent. There will be no change in the schedule of carpenters, and contracts are being made on this basis. Lathers and plasterers are all at work. A few idle painters are reported, and the outlook is not assured. Plumbers are steadily employed, a lot of supplies having arrived for the spring work. Builders labourers' wages are maintained to the standard rate, but a number are idle.

Metal, engineering and shipbuilding trades.—Employment is fair with wiremen, all hands being at work, but with no demand for additional men. Conditions are dull for ship carpenters, and sheet metal workers report a few men idle. With iron moulders, iron workers and their helpers, and core-makers conditions are quiet. Machinists and engineers report business as fair, but with plenty of men to draw from. N. Thompson & Co.'s works were working overtime. Among steam engineers trade was uncertain, wages fluctuating and a few men out of work. Wages run between \$60 and \$100 a month. Blacksmiths report trade quiet. Boilermakers and iron ship-builders find business good, with plenty of men available. Pattern makers are busy.

Printing and allied trades.—Printers, pressmen, electrotypers and bookbinders report trade fair.

Food and tobacco preparation.—Bakers and confectioners report trade satisfactory. A new co-operative shop is in course of formation.

Miscellaneous.—A large number of clerks are out of work.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month shows a marked improvement over the preceding month, and for the season of the year is exceptionally good. While there is good demand for nearly all classes of labour, there appears no difficulty in procuring help. During the past month the filling in of the James Bay flats and extension of the water works system have given employment to a large force of unskilled labourers. Notwithstanding the rainy weather, the building trades have been active, and the prospects for a busy spring and summer season are excellent. Retail merchants report that for the season of the year business is good. During the past month the painters were given an eight-hour working day, without any alteration in the scale of wages. Relations between employers and employees are satisfactory.

A fund for the endowment of a room in the Strathcona wing of the Royal Jubilee Hospital, Victoria, B.C., is being subscribed by the different labour organizations of the city.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons report conditions good, with nearly all hands employed. Carpenters have had a good month, but joiners find work quiet since March 15. Lathers and plasterers have had a fair month. Painters and plumbers report work good, and nearly all are employed. Gas and steam-fitters find work dull. Stone-cutters and builders' labourers are all well employed.

Metal, engineering and shipbuilding trades.—Iron workers, machinists and engineers find work fair, a few being idle. Electrical workers find work dull, and many are out of employment. Linemen report

work fair. Blacksmiths, boilermakers and helpers have had a good month. Shipwrights, caulkers, and horse shoers are satisfactorily employed.

Woodworking and furnishing trades.—Woodworkers report work as fair. Carriage and wagon makers have had a dull month.

Printing and allied trades.—Printers, pressmen and book-binders report a satisfactory month.

Clothing trades.—Tailors report an improvement over the preceding month, yet a few are unemployed. Garment workers report business good, and all hands fully employed.

Food and tobacco preparation.—Bakers report a fair month. Butchers are fully employed. Cigarmakers report all well employed.

Leather trades.—Leather workers have had a good month.

Miscellaneous.—Barbers and laundry workers are fully employed.

Transport.—Steamboat men are all busy. Longshoremen report work as fair, with a few out of employment. Street railroad men are all well employed. Hackmen report work as dull, while draymen and carters are well-employed. Teamsters find work brisk, but expressmen find little to do at present.

Unskilled labour.—Unskilled labourers have plenty of work, and but few are idle.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this district showed a slight improvement during March, but the bad weather retarded work to a large extent. There is no particular activity in any trade, but in some branches prospects are better than at this time last year. In commercial circles there is not much movement outside of the regular local trade. There have been no changes in wages, and nothing in the way of industrial unrest.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Several business men have been advocating the formation of a company to salt and cure herring, of which immense shoals come into the harbour during the winter months. Several small operators have been handling the fish, of which about 700 tons were sent to Japan, and have given satisfaction there, so that there is a possibility of building up a large business in the near future.

Lumbering.—In the lumber trade conditions were very quiet, the mills only working three-quarter time. In the woods there is not much doing, owing to the bad weather which has prevailed of late.

Mining.—In the coal mines matters are about the same as during last month, but there is a good deal of development work going on. The Western Fuel Company has struck coal in its new slope at Departure Bay, and has started to sink a new shaft close by the slope. The company has also commenced to build the necessary houses and wharfs, which will be of the most improved pattern. In quartz-mining there are indications of an improvement on the west coast; in the other parts conditions are unchanged.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons and painters report little doing yet. Carpenters report an improvement in trade, which has been very dull for the past year. Builders' labourers are dull.

Metal, engineering and shipbuilding trades.—Blacksmiths and carriagemakers report conditions fair for the time of the year.

Clothing trades.—During the past few years there has been a small boot and shoe factory operating in this city under varying conditions. Recently, however, there has been a great improvement in trade; the company now operating the factory is turning out a class of goods which is readily disposed of, and the factory is working steadily and increasing its output.

Unskilled labour.—There is very little work for unskilled labour at present.

DISTRICT NOTES.

Ladysmith.—The smelter at Ladysmith has had a good run during the past month. Work at the coal mines is steadily improving, there being a very large number of men employed, and the output steadily increasing.

LEGISLATION IN CANADA FOR THE PRESERVATION OF THE HEALTH OF EMPLOYEES ON PUBLIC WORKS.

AN Act of the Dominion Parliament, assented to on August 11, 1899, and appearing as chapter 30 in the Statutes of Canada of that year (62-63 Vic.), under the title of 'An Act for the Preservation of Health on Public Works', is entitled to an important place among legislation enacted in the interest of labour in Canada. The Act may be regarded as having been paralleled in intention and effect by the fair wages resolution passed subsequently by the House of Commons, and more recently

embodied in the consolidation of the Railway Act, (*) which requires that current rates of wages be paid to workmen employed in the executing of contracts carried out for the Dominion government, or aided by grants from the Dominion public funds. The operation of the Public Works Health Act compels a proper regard for the physical well-being of workmen, more especially in cases where the work in question is being carried out in districts remote from civilization, and where the workmen are wholly dependent upon the contractors for provisions relating to their health and comfort.

*See *Labour Gazette* for November, 1903, page 409 for a resumé of the provisions of this Act.

Importance of the Legislation.

In a country of such extended geographical area as the Dominion of Canada operations of the kind referred to are of frequent occurrence in the process of opening up the country to development and settlement. At the present time this legislation is of special significance in view of the scale on which public works, and especially railway construction under subsidy of the Dominion government are to be undertaken in unsettled portions of Canada. Most prominent of these is the transcontinental line to be constructed and operated by the Grand Trunk Pacific Railway Company. Besides this, however, numerous new branch lines projected by companies already in operation in western Canada will increase the total mileage of railways under construction in unsettled or only partially settled territory by many hundreds of miles. There are also a number of railway companies recently incorporated whose lines will operate in districts to which the Act of 1899 particularly applies. As an evidence of the development in railway construction might be mentioned the fact that 84 out of a total of 206 Acts passed at the session of the Dominion parliament for 1903 had reference directly or indirectly to the transportation industry, and were for the most part in the way of incorporating new companies or of developing and enlarging the facilities of those already in existence. Over \$13,000,000 were, moreover, voted in railway and bridge subsidies.

Origin of the Act.

The circumstances under which the Act had its origin, will throw considerable light on the conditions which it was intended to remove, and assist in helping to define its precise application.

In 1897 the Canadian Pacific Railway Company was engaged in the construction, under subsidy by the Dominion government, of a line of railway known as the Crow's Nest Pass Railway, extending from Fort Macleod some 300 miles westward through the Rocky Mountains. The opera-

tions carried on were in a rough and unsettled country very difficult of access and far removed from sources of supply, and the men engaged on the work were wholly dependent upon the contractors and subcontractors for all provisions relating to their food, accommodation, medical attendance and the like. The prevailing scale of wages paid was \$1.50 per day, board being supplied at the rate of \$4 per week.

Appointment of a Royal Commission.

During the autumn of the year various complaints were received as to the treatment of the workmen, and the death from diptheria of two young men under circumstances of peculiar hardship brought the whole matter prominently before the attention of the public. The company was vigorously attacked in parliament, and after a full discussion of the charges a commission was appointed by the government on January 15, 1898, to investigate the whole matter of the treatment of the men by the contractors of the Crow's Nest Pass Railway Company and report thereon to parliament. The commission was composed of Judge Dugas, Chairman, and Messrs. John Appleton, of Winnipeg, and Frank Pedley of Ottawa.

The commission was publicly opened on February 3, with a preliminary sitting at Macleod, at which 34 witnesses were examined. Hearings were subsequently given at various points throughout the region, and the commission also took evidence later at Winnipeg, Ottawa, Hull, and Montreal, an aggregate of 282 witnesses in all being examined. In brief, the findings of the commission were that though machinery had been provided by the company for the accommodation and medical attendance of the men, the measures adopted were not on an efficient scale. Instances were proved of violations of agreements, threatenings, and illegal arrests by contractors, lack of medical attendance, non-providing of accommodation, unsanitary houses, tents without stoves, overcharges on supplies, bad methods of wages payment, and other

abuses. The commission recommended a system of government regulation of the feeding, housing and transportation of men engaged in this class of employment; also that no liquor should be allowed to be sold on such works, and that wages should be paid at shorter intervals, the company or chief employer to be held responsible for the same, and this provision to apply to all works contracted for by the Dominion government or assisted by funds of the Dominion treasury.

A Bill Introduced.

As a direct result of the report of the commission, a Bill was introduced during the session of parliament of 1898, by the Hon. the Prime Minister, Sir Wilfrid Laurier, who explained, in referring to the measure, that the legislation in question was offered by the government as a means of preventing in future the recurrence of such conditions as had attended the construction of the Crow's Nest Pass Railway. In a discussion which occurred in the House of Commons on July 18, 1898, on the occasion of the Bill's second reading, the Prime Minister further explained its purport and necessity as being in view of the vast unpeopled stretches of territory existing in Canada and the likelihood of many public works being constructed therein in the due course of time, requiring, it might be, some thousands of men to be employed at points distant from civilization and without the means of communication with the settled districts.

The question of the public health, it was pointed out on the same occasion, was also a matter coming within the jurisdiction of the provinces, (the Ontario law, for example requiring that every organized municipality should have a board of health with an inspector whose duty it is to see that all premises are kept in a sanitary condition), and as the provisions of the Bill as introduced had reference to the entire Dominion, some overlapping of authority, it was feared, might result. In reply, how-

ever, it was stated that the Bill was designed with more particular reference to sections of Canada lying beyond the reach of the ordinary machinery and provisions of the provincial laws, though it was also held that wherever a power is vested in the Dominion parliament all the necessary incidents for the carrying out of that power is also vested in parliament, so that, inasmuch as the building of a railway or canal is a matter of interest to the entire Dominion, so also all subsidiary details in the carrying out of a project of that kind is within the jurisdiction of the Dominion authorities.

Provisions of the Act.

Briefly stated, the Act, as finally assented to, grants to the Governor in Council power to make regulations, either of a general or special nature, for the preservation of health and the mitigation of disease among persons employed in the construction of public works. Regulations of this kind may have reference to, (a) the housing of employees while so engaged, (b) inspection and cleansing of the men's quarters, (c) the number of qualified medical men to be employed on the works, (d) the providing of suitable hospitals and the proper care of persons suffering from contagious diseases, and, generally, all such matters as may seem relevant to the Governor in Council. The matter of penalties and procedure was also left at the discretion of the Governor in Council, though it was provided that the maximum punishment in the way of imprisonment should not exceed three months and that any penalties which might be prescribed must be in addition to those to which the offender was liable under the criminal law. A return to parliament was also required of any Order in Council or regulations made under the Act within 15 days after the opening of the following session. The application of the Act was made to include all public works in Canada including either railway, canal, bridge or telegraph, or other work within the legislative authority of the Dominion parliament.

In this last connection it may be stated that on the occasion of the active enforcement of the Act subsequently by a duly appointed officer, the opinion of the Deputy Minister of Justice was obtained under date of April 3, 1901, as to the precise meaning of the clause defining the application of the Act. On that authority the British North America Act, sections 91 and 92 was held to define the public works which might be regarded as within the legislative authority of the Dominion parliament. So far as railways were concerned, it was held that they do not become subject to the legislative authority simply because they have been subsidized by parliament but rather because they are works which may be regarded as for the general benefit of Canada.

It may be added that in introducing the measure the Right Hon. the Prime Minister explained that the reason why the power of regulation was placed in the hands of the Governor in Council was because there might be occasions when there was no need of such regulations, as for example, in the case of public works under construction in the old or well settled part of the country, in which case the normal legal machinery would be sufficient to regulate any new conditions that might arise. The seeming assumption of power involved in placing the matter of penalties in the hands of the Governor in Council, it was further explained, was met by the qualification limiting the penalty which it was possible thus to impose.

Enforcement of the Act.

By way of carrying the Act into operation an Order in Council was passed on January 31, 1900, embodying certain regulations as provided for in the Act. Finding, however, that the regulations as thus laid down were somewhat inoperative, they were rescinded by Order in Council dated May 13, 1902, which provided for the practical application of the law by appointing an inspector to carry out the various regulations proposed under the supervision

of the Inspector General of Health of the Dominion and in affiliation with the Department of Agriculture, Ottawa, in the annual report of which department the inspector's statement was included. These regulations constitute what may be regarded as the working basis of the Act. A brief summary of the Order in Council is as follows.

Regulations under the Act.

The duties of the inspector, for whose appointment the Order in Council provides, in its opening clauses, are generally speaking to see that the regulations under the Act are complied with in every case to which they are applicable, to report upon the practical working of the regulations with a view to their improvement from time to time, to notify the Dominion and provincial health authorities of any outbreak of contagious disease, and generally to keep in close touch with the sanitary officers and conditions in localities where public works are being carried out. With a view to securing as wide as possible application to the Act every government department or company, before entering upon the construction of a public work is required to notify the Minister of Agriculture of its exact location, its dimensions and the probable number of men to be employed. The enforcement of proper sanitary conditions for the men on public works after construction operations have begun is provided for as follows:—A duly qualified medical officer approved by the inspector must be engaged by the company to attend the men where the number of the latter exceeds 100 but does not exceed 500. In cases where men are located within a distance of 30 miles and are living in houses, tents, or other quarters provided by the company, an additional medical officer is required for each 500 additional men when the number of employees exceeds 500. These officers must be properly supplied with medicines, means of conveyance, &c., and must visit each camp in the district at least once a week; their dis-

trict must not extend over 30 miles in length except with the consent of the inspector who has discretion also in the matter of the number of men to be allotted to each medical officer. The inspector, the medical officer or officers engaged upon the public works and the government engineer in charge of the work constitute what is termed the health board, of which the inspector is chairman and on which devolves the general supervision of the health of the employees, including such matters as the inspection of houses and quarters according to a stringent method of procedure to see that necessary provisions for ventilation, cleansing &c., are provided. With regard to hospital accommodation, the inspector, or in his absence the board of health, must see that suitable hospital accommodation is provided by the company within a reasonable distance of public works. A temporary hospital must also be provided of size sufficient to accommodate at least six persons or more, as the medical officer may require, and located as near the centre of each medical district as possible. Provisions for the isolation of persons suffering from contagious diseases are also inserted, the company being required to provide a tent for each camp and have the same supplied with bed, bedding, and attendance necessary to accommodate at least two persons. Full rules for procedure in the case of an outbreak of contagious diseases are added. Breaches or non-observance of the regulations are punishable by a fine not exceeding \$100 or imprisonment not to exceed 3 months, or both, and a conviction does not constitute a bar to any action which may be brought against such persons for neglect of their duties under the regulations.

An important addendum to the regulations, is contained in the provision which permits a contractor to charge 50 cents per man per month and deduct the same from his wages in order to meet the cost of medical attendance, hospital, medicine and expenses necessary to the carrying out of the regulations, the employee being en-

titled to medical service and attendance without further charge.

Annual Reports of Inspector.

To date two reports have been issued by covering the years ended October 31, 1902 and 1903 respectively. In each case the reports of the medical officers and engineers appointed in accordance with the regulations above outlined are appended. The inspector states in each report that he had visited all public works of which notice had been received throughout Canada as well as a number of others, finding on the whole considerable improvement in the medical supervision, in hospital accommodation and medicines provided, and on the sleeping quarters of the men when housed together as compared with the previous year. A detailed account of the work of inspection is added under four headings: canals, railways, bridges, mines and works of other public companies. In the second report, which was received at the department during the past month, special mention is made of the steady improvement which is noticeable from year to year in the healthfulness and general conditions of all employees on public works. The additional fact that no outbreak of a contagious disease occurred during the past season is held to be proof of the beneficial nature of the legislation.

Ontario Legislation.

The Provincial Legislature of Ontario passed an Act in 1900, 'Respecting sanitary regulations in unorganized territories,'† which, inasmuch as it was aimed to improve the health conditions of labour employed in sections of the country beyond the reach of the ordinary provisions of the law, might claim some kinship to the Dominion legislation above referred to. The Ontario Act, however, is not confined in its application to the works carried on

*See annual reports of the Hon. the Minister of Agriculture for 1902, page 54, and for 1903 page 51.

†Ontario Statutes, 1 Edward VII., cap. 37.

by the government or under assistance from the public treasury, but refers broadly to any particular industry, the cleansing, inspection and proper medical supervision of lumbering camps, mining camps and railway construction camps being more specifically mentioned. A section of the Act, moreover, declares that the Act shall be read with and as part of the Public

Health Act, the design of the measure being to extend the application of the usual sanitary regulations to districts without municipal organization.

A separate series of regulations, numbering 19 in all, governing the practical carrying out of the measure was put into force by Order-in-Council dated May 30, 1901.

NOVA SCOTIA LEGISLATION AFFECTING LABOUR, 1904—COAL MINES REGULATION.

THE provincial legislature of Nova Scotia, which assembled on December 3, 1903, prorogued on March 3. Assent was given in all to 211 enactments, including 10 which were assented to on December 1, 1903, and 18 assented to on February 5, 1904. Among the number was an Act amending the Coal Mines Regulation Act of 1900, which is of special interest to employers and employees, both on account of the comparatively large number of men engaged in this industry in Nova Scotia and the important nature of the alterations and additions involved.

The various changes introduced by this legislation in the law as previously existing* are briefly as follows:—

Definition of 'Shaft.'

According to the interpretation placed upon the term 'shaft' in the previous Act, both slope and pit were included. The term is now held to include only the pit.

Officers Requiring Certificates.

In the section of the previous Act relating to certificated managers and other officers, only managers and overmen were required to hold certificates before being considered duly qualified for their employment. This provision is now enlarged so as to include underground managers and examiners. The section which defines procedure against underground managers and over-

men for incompetency, drunkenness, negligence, &c., is similarly enlarged so as to include examiners.

Qualifications of Examiners.

The section governing the appointment of the board of examiners, which grants certificates for certificats as examiners and overmen, is amended by the addition of a sub-section which permits the Governor in Council to regulate the examination of applicants for certificates as examiners and to prescribe the subjects on which they must be examined. Examiners, however, who have been in the performance of their duties for not less than six months before the coming into force of this section are entitled to a certificate of service which is equivalent to a certificate of competency.

By an amendment to the section of the Act which applies to certificated workmen, the appointment of the board of examiners granting certificates of competency to shot firers is vested in the Commissioner of Mines. Previously no mention was made as to the person by whom this power was to be exercised.

The Ventilation of Mines.

Some changes of an important nature are made in the rules referring to the ventilation of mines. Under rule 2, as previously, a mine in which inflammable gas had been found within the preceding 12 months was required to be inspected within 5 hours of each shift commencing work by a duly cer-

tificated underground manager, overman or shot firer, who was required to report thereon in accordance with certain forms. Under the new rule the right to inspect is withheld from shot firers and extended to examiners. Similarly, with regard to the daily inspection of mines in which gas has not been found within 12 months, the new rules states that this shall be carried out by a competent person holding a certificate as underground manager, overman or examiner, whereas previously it was simply required to be carried out by a competent person or persons 'appointed for the purpose.' Better provision is also made for the infirming of workmen of the results of these inspections.

Use of Explosives.

An addition is made to the eight provisions of the original Act relating to the use of explosives in mines, by a clause which forbids the use in mines of any iron or steel pricker or needle for charging holes for blasting, or of any iron or steel tamping rod for ramming in charges unless the same are tipped with copper or copper alloy; and it is forbidden to bring any such tool into a mine underground unless tipped in the manner described.

The Working of Submarine Areas.

In the provisions relating to the working of coal in submarine areas one slight change is made. Passage ways piercing the barriers inclosing the separate districts into which such areas must be divided were previously not permitted to have a greater sectional area than six feet by six feet; they are now permitted to be 9 feet wide by 6 feet high.

Provisions Relating to Stationary Engineers.

Perhaps the most important feature of the new Act is the extensive body of regulations with regard to the employment of stationary engineers which it adds to previous legislation, and which consist of 33 new sections. These, it is provided, are to come into force on January 1, 1905. A

brief analysis of their more important features is as follows:—

The Board of Examiners.

A board of examiners is to be appointed by the Governor in Council for the purpose of granting certificates of competency to stationary engineers. The Inspector of Mines is ex-officio to be a member of this board, the balance to be made up of representatives of managers of mines or qualified persons not connected with mines. The Governor in Council also determines the time, place and other conditions at which examinations are to be held, as well as the fees to be paid to the board by applicants for certificates. A register of duly certificated engineers is to be kept in the office of the Commissioner.

Certificates of Competency.

Three classes of certificates of competency, to be known as 1st, 2nd and 3rd classes, are to be issued to engineers after examination before the board of examiners. Before applying for examination for a certificate of any kind, however, the applicant must be not less than 18 years of age; must fill in in his own handwriting a form of application specifying his name, age, place of residence and the nature of his employment during the past five years, and must furnish satisfactory certificates as to his past service, sobriety and general good character, if he is not already the holder of a certificate of incompetency. With regard to eligibility for the various classes of certificate the following rules apply:—

For a third class certificate.—The applicant must be at least 18 years of age; he must have served for not less than 24 months in a workshop in the making or repairing of steam engines, or for not less than 36 months as assistant engineer on a steam plant of 25 horse power, or for 24 months as assistant engineer on a steam plant of 200 horse power, or as fireman or engineer on a locomotive engine of not less than 100 horse power. Service in a boiler shop or as engineer, fireman or oiler on a

steamboat may be accepted on certain terms as an equivalent of the services mentioned above.

For a second class certificate.—The applicant must be at least 21 years of age. He must have served for not less than 24 months in a workshop in making or repairing steam engines, and for not less than 12 months as engineer in charge of a steam plant of 25 horse power, or he must have served for 36 months as engineer in charge of a steam plant of 25 horse power or greater, or 24 months in charge of a locomotive of 100 horse power, or 36 months as second engineer on a steamboat of 50 horse power.

For a first class certificate of competency, an applicant must be at least 22 years of age; he must be possessed of the qualifications required for a second class certificate, and in addition have served 24 months as engineer in charge of a steam plant of 25 horse power, or as assistant engineer of a steam plant of 200 horse power having an engine of not less than 100 horse power, or for 12 months as engineer in charge of a steam plant of 100 horse power.

Certificates of Service.

Full provision is made for the granting of certificates of competency to engineers who, being of proved sobriety and general good character, may be entitled to receive, on the ground of length of service and experience, certificates without examination. These certificates are to be equivalent in every respect to the certificates granted after a successful examination.

Employment of Engineers.

The new act carefully defines the classes of employment which engineers holding first, second and third class certificates of competency respectively shall be competent to undertake. Steam plants of 500 horse power and over must be in charge of a holder of a first class certificate. Steam plants of not less than 200 and not more than 500 horse power, engines of 25 horse power and over used for the purpose of

hoisting, lowering or moving men in a mine, and engines of not less than 1,000 horse power must be in charge of the holder of at least a second class certificate. A third class certificate of competency is necessary before an engineer may take charge of a steam plant of not less than 25 horse power nor more than 200 horse power, or an engine used for hoisting or lowering material, but not men, into or out of a mine the movements of which are controlled by signals and the horse power of which is not less than 100 nor more than 1,000. Engines of over 25 horse power used for the purpose of ventilating a mine on the operation of which the safety of any one depends must also be in charge of an engineer holding a third class certificate. Every steam plant of 500 horse power or over must have on duty in the fire room at all times while under steam, a licensed fireman or engineer holding at least a third class certificate of competency. A minimum penalty of \$100 with a maximum of \$200 is imposed on mine managers who violate the above provisions; while a penalty of not less than \$20 nor more than \$50 is imposed upon persons giving false certificates of employment or other certificates to be used under the act.

Miscellaneous Provisions.

The Act closes with a number of provisions relating to the status of engineers already in charge of steam plants at the time of the going into force of the new enactments. These, upon producing proof of sobriety and general good character, are to be permitted to continue in employment for a period of 12 months after the Act is first enforced. Other provisions are as follows :—

The commissioner is stated to be the final judge of any dispute as to the horse power of an engine.

An engineer holding a certificate of competency must give at least two weeks' notice to his employer before leaving his employment under a minimum penalty of a fine of \$20 and forfeiture of his certificate.

Certificates granted before the coming into effect of the Act will have the same effect as if granted under the Act.

Provision is made for the granting of special permits by the commissioner or inspector, having the force of certificates of competency or service, to engineers to take charge of stationary engines for a limited period.

The various provisions of the Act relating to the granting of certificates and the employment of engineers is to apply only to mines where more than 20 men are employ-

ed under ground unless stipulation to the contrary has been made by the commissioner.

The Act of 1903 * which related to the granting of certificates to engineers and which was in the way of an amendment to the rule of the original Act forbidding boys to be employed about hoisting machinery, and providing for the proper supervision of such machinery, is repealed.

* S.N.S., 1903, cap. 8.

WINTER CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA, 1904.*

THERE were twenty-eight instances of changes affecting the rates of wages or hours of labour of a number of employes reported to the Department of Labour as having taken place during the months of January and February, 1904, detailed information relating to which will be found in the accompanying table.

Of the changes recorded, 12 were in the nature of increases of wages; 8 were decreases in wages, 4 were increases in hours, and 4 were decreases in hours.

Increases in Wages.

Among the classes to which increases were granted were the following: Maintenance of Way Employees of the I.C. Railway; bricklayers and masons, at Hamilton, Ont.; hod carriers, at Kingston, Ont.; riveters, at Niagara Falls, Ont.; printers, at Quebec, Que., and Windsor, Ont.; garbage collectors, at Hamilton, Ont.; Telegraph operators on the M.C.R. system;

teamsters, at Ottawa, Ont.; longshoremen, at Victoria, B.C.; snow shovellers, at Quebec, Que., and Ottawa, Ont.

Decreases in Hours.

Among the classes receiving decreases in hours were: retail clerks and tailors in the employ of the McLaren Company, at St. Catharines, Ont., and druggist clerks at St. Thomas. There was a decrease in the hours of employees in the C.P.R. shops at Brandon, Man., and in the establishment of Messrs. McKough & Trotter, of Chatham, Ont., with a corresponding reduction in wages.

Decreases in Wages.

The following classes had their wages reduced: employees of the Victoria Lumbering and Manufacturing Company at Chemainus, B.C.; carpenters at St. Catharines, Ont.; iron moulders and iron drillers at Brantford, Ont.; metal workers at St. Catharines, Ont.; leather cutters at St. Hyacinthe, Que.; labourers in the employ of the Massey-Harris Company and the Buck Stove Company at Brantford, Ont.

A re-arrangement of the scale of pit drivers in the employ of the Dominion Coal Company at New Aberdeen and at

* For some time previous to January, 1904 the *Labour Gazette* contained a monthly article relating to changes in rates of wages and hours of labour. The changes reported to the Department during the month of December, 1903, were, in accordance with this system, set forth in the January, 1904, issue of the *Labour Gazette*. The information in question has not therefore been repeated in the present article, which is the first of the series of quarterly articles in which as previously announced, these statistics will in future be given to the public.

Glance Bay might also be included under this heading.*

Increases in Hours.

An increase in working hours of $6\frac{1}{2}$ per week carried out by the E. B. Eddy Manufacturing Company, affected 200 pulp makers in its employ, was the leading instance of an increase in hours. There was an increase in the hours of 250 employees of the McClary Manufacturing Company at London, Ont., engaged on piecework, and in the G.T.R. car shops in the same city with an accompanying increase in earnings.

General Result.

On the whole the record for the two the G.T.R. car shops in the same city, with the largest bodies of men were in the way of decreases in wages, or increases in hours. In any final estimate of the season, how-months shows that the changes affecting ever, from this point of view, account be taken of the unusually high wages paid for the work of snow removal by the transportation companies, a naccurate statistical return of which it was found impossible to obtain.

Changes by Industries and Trades.

The following is a detailed account of the various changes reported, according to the several industries or trades affected:—

Agriculture.—Few actual changes in the wages of agricultural labour were reported during the winter. On the whole, wages maintained their high level, especially in Ontario, where the scarcity of supply was the cause of some inconvenience and anxiety for the coming spring and summer seasons.

Lumbering.—Wages throughout Ontario, Quebec and the Maritime Provinces have remained stationary during the winter, the schedules being arranged during the early autumn of 1903, when the men went into the shanties. Gross earnings, however, have

been affected in some instances in Ontario by the shortening of the active season owing to the unusual cold and depth of snow. Similar conditions were reported from British Columbia, where the general trade depression which set in during the autumn affected employment in several localities. Only one instance, however, of a reduction of wages on a large scale was reported to the department during the winter months. This took place at Chemainus, B.C., the employees of the Victoria Lumbering and Manufacturing Co., Limited, being affected. In a notice posted about the mills and works of the company in the third week in January, it was stated that the depression in the lumber business and the severe competition in foreign markets by reducing the prices received for the manufactured product by over thirty-five per cent, made it imperative that the company should reduce the cost of production. A general cut in wages amounting to ten per cent, to go into effect on February 1, 1904, was accordingly announced.

Full details as to the reductions carried out in the mills will be found in the table. With regard to the reductions in the wages of the men employed in the woods, the department was unable to obtain full particulars. The company, however, furnished the following statement of the wages list which went into effect on February 1 for this class, numbering from 125 to 150 men.

Locomotive engineers (engineers to keep up their engines), \$60 to \$75 per month and board.

| | Per day. |
|-------------------------------|----------------|
| Locomotive firemen | \$2.50 |
| Donkey engineers | 3.00 |
| Head skidders | 3.00 |
| Section foremen | \$3.00 to 3.50 |
| First hook-tenders | \$3.50 to 4.00 |
| Second hook-tenders | \$3.00 to 3.25 |
| Rigging slingers | \$2.50 to 2.75 |
| Brakemen | 2.50 |
| Conductors | 3.25 |
| Undercutters | \$3.25 to 3.50 |
| Head fallers | \$3.00 to 3.50 |
| Second fallers | \$2.75 to 3.00 |
| Buckers | 3.00 |
| Head loaders | \$3.25 to 3.50 |
| Second loaders | 3.00 |
| Blacksmiths | \$3.00 to 3.50 |
| Blacksmith helpers | 2.25 |
| Spool tenders | \$2.25 to 2.50 |
| Snipers | \$2.50 to 2.75 |

* A statement relating to this change appeared in the *Labour Gazette* for March, page 937.

| | Per day. |
|---------------------------|----------------|
| Head barkers.. | \$2.50 to 2.75 |
| Second barkers.. | \$2.25 to 2.50 |
| Saw filers.. | 3.50 |
| Line horse men.. | \$2.25 to 2.75 |
| Boom men.. | 2.75 |
| Head swampers.. | \$2.50 to 2.75 |
| Second swampers.. | 2.25 |
| Dog-up men.. | \$2.25 to 2.50 |
| Signal men.. | 2.25 |
| Road men.. | \$2.75 to 3.25 |

Mining.—Two changes in the rates of wages occurred, dating from February 1 and March 1 respectively, whereby 105 pit drivers, employed by the Dominion Coal Company, at New Aberdeen and at Glace Bay, were affected. These men were previously paid under contract at the rate of five cents per box, under which system wages varied from \$1.30 to as high as \$3 per day. The new rate is \$1.38 per day. In one case the company suggested the change; in the other the initiative was taken by the men.

Building trades.—Three changes were reported to the department under this heading: that of bricklayers and masons at Hamilton, Ont.; of factory carpenters at St. Catharines, Ont.; and of hod carriers at Kingston, Ont. The first named, to the number of about 100, received a nine hour day at 45 cents per hour in place of eight hour day at 40 cents per hour, the change in wages taking effect on January 1, and the change in hours being deferred until April 1. A factor in the arrangement of the new schedule was that builders' labourers at Hamilton worked nine hours a day beginning at 7 a.m., and there was some necessity therefore that bricklayers and masons, on whose work that of the labourers depends, should begin at the same hour. The change at St. Catharines was in the nature of a reduction of 20 per cent to four factory carpenters in the employ of the Welland Vale Manufacturing Company which went into effect on January 2 as a result of a lock-out. Some 50 or 60 hod carriers at Kingston received an increase on January 1, from \$1.50 to \$1.75 per day of nine hours, after negotiations between local union No. 66 and some 12 building contractors. There was a number of

other changes under discussion during the winter months, more particularly at Montreal, Stratford, Windsor, and other points, but no definite action had been reported up to March 1. A number of reports reached the department of last year's agreements being re-entered upon for 1904.

Metal, engineering and shipbuilding trades.—A number of important changes were reported to the department in January and February. Dating from the beginning of the year, 29 employees of the C.P.R. shops at Brandon, Man., were reduced an hour a day with a corresponding decrease in pay, as a result of a falling-off in general traffic. The same class of employees, however, to the number of 400 in the G.T.R. car shops at London, Ont., had their hours increased by seven per week, the reason being an unusual increase in the amount of employment. At Chatham, Ont., 22 employees of the McKeough & Trotter Company, including moulders, machinists, boilermakers and blacksmiths, had their hours reduced on February 8, by 5 per week during the continuance of the cold weather, the change being by mutual agreement. An increase in orders was the cause of a re-arrangement of the working hours in the establishment of the McClary Manufacturing Co., London, Ont., whereby 250 men had their hours increased by three on Saturdays, bringing the total per week up to 60. As the men were chiefly engaged on piecework no changes in the rates of wages schedule accompanied this increase. Iron moulders in the employ of the Massey-Harris Company at Brantford, Ont., to the number of 55, had their wages reduced from 7 to 26 per cent on January 9, and iron drillers employed by the same company to the number of 10 received a reduction in wages of 7 cents per day on February 15. A change in the wages scale of 10 fork makers on piecework in the employ of the Welland Vale Mfg. Co. at St. Catharines, Ont., went into effect on January 2, the reduction amounting to about two per cent. Polishers in the employ of the same company were also reduced about 5 per cent, but as the work was entirely piecework tabulation

could not be made of the change. Seven axe polishers were reduced on January 2nd $1\frac{1}{2}$ per cent in wages on piecework, after negotiations between them and the employers. Ten rivetters in the employ of the Jenckes Machine Co., at Niagara Falls, Ont., were increased on February 8 by 25 cents per day. The men struck work under the old scale and were paid off; the company engaged another gang under the new rate, a number of the old employees being re-engaged. A number of changes in the schedules of machine shop men employed by the said company were also carried out, but owing to the system of employment, tabulation was difficult. The men as a rule have a certain amount of work to do as a 'day's work,' being paid for any addition to this quantity on a 'bonus scale.' Some discussion on the wages of moulders in Montreal took place, but no definite action had been taken up to March 1. A readjustment of the wages of employees in the rolling mill of the Swansea Bolt Works took place, some of the men being slightly reduced and others slightly increased, in accordance with a new scale of prices for piecework. The mill was for some time working intermittently, but during March was employing about 80 men.

Printing and allied trades.—Two increases were reported, at Windsor, Ont.,(*) and at Quebec, Que. Both of these changes were in the nature of increases and were granted on the demand of the workmen after extended negotiations. In the Quebec case the request was resolved upon at a meeting of the union held in November but assented to by the Master Printers' Association only on January 21, 1904. Some 98 men in the employment of four newspaper offices were affected. The agreement provides that the minimum wages shall be \$10.50 per week of 54 hours, overtime to be paid at the rate of 25 cents per hour, and night work to be paid not less than \$12.75 per week of 48 hours. Press hands will obtain a minimum scale of not less

than 35 cents per 1,000 ems for night work and 30 cents for day work. Job foremen are to be paid not less than \$14 per week; foremen on evening newspapers not less than \$13 per week, and foremen on morning papers not less than \$15; overtime to be paid for at the rate of price and a quarter. The following is the scale adopted for machine composition:—

MACHINE COMPOSITION.

Piece scale for monoline.

Agate to brevier, morning, 10 cents per 1,000 ems.

Agate to brevier, evening, 8 cents per 1,000 ems.

Bourgeois and long primer, morning, 11 cents per 1,000 ems.

Bourgeois and long primer, evening, 9 cents per 1,000 ems.

Small pica and pica, morning, 12 cents per 1,000 ems.

Small pica and pica, evening, 10 cents per 1,000 ems.

Overtime, price and a half.

Piece scale for linotype.

Agate and brevier, morning, 9 cents per 1,000 ems.

Agate to brevier, evening, 7 cents per 1,000 ems.

Bourgeois and long primer, morning, 10 cents per 1,000 ems.

Bourgeois and long primer, evening, 9 cents per 1,000 ems.

Small pica and pica, morning, 11 cents per 1,000 ems.

Small pica and pica, evening, 9 cents per 1,000 ems.

Overtime, time and a half.

Time scale, monoline and linotype.

Morning, \$14.50 per week; evening, \$12.50 per week. Eight hours per day and $7\frac{1}{2}$ per night.

Overtime, price and a half.

Learners on morning papers shall be paid \$12.75 per week, seven and a half hours to constitute a night's work. Learners on evening \$10.50 per week, eight hours to constitute a day's work. Apprenticeship, eight weeks.

The change at Windsor, Ont., affected 36 men, hand and job compositors, machine operators and pressmen being advanced \$1 per week and press feeders 50 cents per week after February 15.

Clothing trades.—A decrease in the hours of seven tailors in the employment of the McLaren Company at St. Catharines, Ont., amounting to $2\frac{1}{2}$ hours per week and lasting from January 15 to March 1, and a change from a piecework to a day-work system affecting six leather cutters at St. Catharines, Ont., in the way of a reduction of wages, were the only changes reported to

* The full text of the new schedule granted at Windsor, Ont., appeared in the *Labour Gazette* for March, page 786.

TABLE OF CHANGES IN RATES OF WAGES AND HOURS OF LABOUR

| Class of Workpeople affected. | Locality. | Approximate Number of Workpeople affected. | Date from which change took effect | Particulars of Change. |
|---|-------------------------|--|------------------------------------|---|
| <i>Lumbering.</i> | | | | |

TABLE OF CHANGES IN RATES OF WAGES

| Class of Workpeople affected. | Locality. | Approximate Number of Workpeople affected. | Date from which change took effect. | Particulars of Change. |
|--------------------------------|-----------------------|--|-------------------------------------|--|
| <i>Transport.</i> | | | | |
| Teamsters | Ottawa, Ont. | 35 | Jan. 20.. | Increase in price paid for hauling snow from 18c. to 20c. a load. |
| Longshoremen..... | Victoria, B.C. | 45 | Feb. 1.. | An increase from a scale of 35c. per hour day work and 40c. per hour night work to a scale of 40c. per hour day work and 50c. per hour night work. |
| <i>Miscellaneous.</i> | | | | |
| Papermakers..... | Hull, Que. | 200 | Jan. —.. | Change involved a return to working conditions in existence prior to Jan., 1903. As the day and night squads alternated the net result was an increase of 6½ hours per week. |
| Retail clerks | St. Catharines, Ont.. | 71 | " 5.. | Departmental store to close at 5.30 p.m. instead of 6 p.m., except on Saturdays during Jan. and Feb. |
| Drug clerks..... | St. Thomas, Ont. | 14 | " 20.. | Seven druggists agreed to close stores at 8 p.m. instead of 10 p.m. |
| Telegraph operators (M.C.R.) | " | 132 | Feb. 1.. | Increase in wages; \$40 to \$45 per month and overtime to be paid at 25c. per hour. |
| <i>Unskilled Labour.</i> | | | | |
| Labourers (Buck Stove Co.).. | Brantford, Ont. | 50 | Jan. 9.. | Reduction in wages of 10c. per day. |
| " (Massey-Harris Co.) | " | 125 | " 9.. | " |
| Snow shovellers (C.P.R. Co Q.) | Quebec, Que. | 40 | Dec. 30.. | Increase of 25c. per day |
| " (Elec. St. Ry. Co.) | Ottawa, Ont. | 200 | Jan. 20.. | Increase from \$1.15 to \$1.25 a day. |

the department. The change at St. Catharines also affected 71 retail clerks, 35 of whom were female, in the employ of the same company, and consisted of the enforcement of a rule closing the stores of the company at 5.30 instead of 6 in the evening during January and February. On Saturdays the stores remained open until 9 p.m. In acknowledgment of this concession the employees banquetted the employers on the evening of February 15.

Municipal employers.—On January 1 a bricklayer employed by the municipality of Victoria, B.C., on sewer construction, building of man-holes, &c., was advanced from a rate of \$5 per M. to a rate of \$6 per M., amounting to a change from about \$24 to \$30 per week of 48 hours. On February 15 the ash and garbage collectors, to the number of 15, employed by the city of Hamilton, Ont., were advanced from \$4.75

to \$5.50 per day, the price to include hire of horses and wagon.

Transport.—On January 20 the Ottawa Electric Street Railway Company voluntarily increased the wages paid to 35 teamsters engaged in hauling snow from the streets. The price formerly paid was eighteen cents per load; this was advanced to twenty cents per load. The wages depended on the number of loads hauled per day, and as these varied it was impossible to compute accurately the change in weekly earnings which resulted. Wages averaged, however, from \$3.50 to \$4 per day. The advance was only granted to teamsters working in sections of the city comparatively remote from the dumping ground. The British Columbia Stevedores' Association also voluntarily granted an increase in both the night and day scales of wages paid to longshoremen in its employment. Pre-

AND HOURS OF LABOUR, &c.—*Concluded.*

| | | | | | | | | Voluntary concession. |
| | | | | | | | | Voluntary concession by B. C. Stevedore's Association. |
| | | Day 71 Night 60 | squad. 66½ squad. 71 | | | 0 06½ | | Men struck Jan. 11 but their places were gradually filled at new schedule. |
| | | 56 | 53½ | | | | 0 2½ | By voluntary concession on part of employers. |
| | | 72 | 60 | | | | 0 12 | By mutual agreement. |
| 9 23 | 10 38 | | | 1 15 | | | | Voluntary concession by company. |
| 8 10 | 7 50 | | | | 0 60 | | | By order of employers. |
| 8 10 | 7 50 | | | | 0 60 | | | " " " |
| 6 00 | 7 50 | 60 | 60 | 1 50 | | | | At request of men. |
| 6 90 | 7 50 | 60 | 60 | 0 60 | | | | By voluntary concession by company. |

vious to the change the scale was 35 cents per hour for day work and 40 cents per hour for night work; this was increased to 40 cents per hour for day work and 50 cents per hour for night work after February 1; the number of men affected was 45.

Miscellaneous.—Four changes were reported under this heading, two representing a reduction in hours, one an increase in hours, and one an increase in wages. The increase in working time of the paper makers at Hull, Que., was the most important of these changes, involving about 200 men, and averaging about 6½ hours increase per week to each employee. The men struck in consequence on January 11, but their places were gradually filled at the new schedule. The reduction in hours of retail clerks at St. Catharines, Ont., has been already referred to. Another important reduction in hours was that by which 14 drug clerks in

St. Thomas, Ont., were reduced by 12 hours per week by an agreement with seven employing druggists to close their stores at 8 p.m., after January 20, instead of at 10 p.m., as formerly. The increase in wages noted was that affecting 132 telegraph operators in the employ of the M.C.R.R., whereby the rate was increased from \$40 to \$45 per month, with an overtime agreement of 25 cents per hour. The change went into effect on February 1, and was voluntarily conceded by the company. The wages of picture framers on piecework at Toronto were in process of readjustment during February.

Unskilled labour.—Labourers in the employ of the Buck Stove Company, and the Massey-Harris Company, at Brantford, Ont., to the aggregate number of 175, were reduced in wages 10 cents per day on January 9, by order of the companies. Snow

shovellers in the employ of the C.P.R., at Quebec, Que., were raised from a rate of \$1 to one of \$1.25 per day, to the number of between forty to fifty. The change went into effect at the beginning of the year. Snow shovellers in the employ of the Ottawa Street Railway Company, to the number of 200, were also increased to the rate of \$1.25 per day, the former rate having been \$1.15. The change went into effect on January 20, the work being of a temporary nature.

Increase to I.C.R. Trackmen.

In addition to increases granted during December to various of employees on the Intercolonial and Prince Edward Island Railway, the maintenance-of-way men of the system, were, in January, granted a new scale of wages involving a substantial increase. The new schedule is as follows:

Yard section foremen at Sydney, North Sydney, Point Tupper, Mulgrave, New Glasgow, Stellarton, Pictou, Haliac, Richmond, Truro (No. 14), Springhill Junction, Amherst, Point du Chêne, Moncton, St. John (No. 218), St. John (No. 219), Campbellton, Ste. Flavie, Rivière du Loup, Levis, Chaudière Junction, Charlottetown, Georgetown and Summerside will be paid \$2.25 per day.

| | Per day. |
|--|----------------|
| Regular section men in above yards.. | \$1.50 |
| Regular section men elsewhere than in above yards.. | 1.40 |
| Yard section foreman at Dartmouth, Windsor, Truro (No. 147), Maccan, Sackville, Newcastle, Hadlow, Ste. Rosalie, Alberton, Tignish and Souris will be paid.. | 2.00 |
| Regular section foremen elsewhere than in above yards.. | 1.85 |
| Foremen of extra gangs.. | 2.75 |
| Foremen of track carpenters.. | 2.50 |
| Rough carpenters, wharfmen.. | \$1.50 to 1.70 |
| Track carpenters, skilled mechanics with kit and tools.. | 2.00 |

Where foremen track carpenters are now allowed an amount for expenses, the same will be continued.

On the same date a set of 21 rules governing these classes of employment were drawn up and assented to.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

THE development of leading importance during March was the opening at an unusually early date of the active season of immigrant arrivals in Canada. In the closing week of February and the opening week of March a number of vessels were reported at St. John and Halifax, having parties of immigrants on board, including many of British as well as of European nationalities. By the end of the first week in March, it was estimated that nearly two thousand of these were, on their way westward, and the increase in activity of employment occasioned thereby on the railways and in the other quarters affected was very considerable. The same conditions were continued throughout the month until in the closing week the volume of this traffic had been materially augmented, a large number of special trains going through to western Canada. Satisfaction was expressed with the general type and physique of the new arrivals.

The majority of the arrivals went through directly to Manitoba and the Terri-

tories, though a considerable number were booked for Ontario, being attracted thereto by the reported scarcity in the farm labour market.

Annual Report of the Superintendent of Immigration.

The annual report of the Superintendent of Immigration for the Dominion for the fiscal year ended June 30, 1903, constituting Part II. of the annual report of the Department of the Interior, was published during March. It contains a complete resume of the branch during 1902-03 in the form of special reports from the various officials engaged in the work.

Some 114,124 requests for information by mail, in addition to personal inquiries, were received by the department, in response to which 342,372 pamphlets, maps, &c., were sent out. Over 52,000 farmers in the United States were also mailed publications, the total output of literature amounting to 1,319,903 separate copies. The policy of encouraging immigrants to

point delegates to inspect the land for themselves was encouraged, and 169 passes issued to such representatives. In all, 128,644 immigrants settled in Canada during the fiscal year. Of these 41,792 were from Great Britain; 49,473 from the United States, and 37,099 from the continent of Europe. The Commissioner of Immigration for Canada in Great Britain reports the most active year in the history of the office. The method pursued in answering inquiries and designating information with regard to Canada is fully outlined, the report being supplemented by special reports by the Canadian government agents stationed at Birmingham, Liverpool, Cardiff, Dublin, Belfast, and in Belgium and Ireland. The reports of the Canadian immigration agents stationed at St. John, Quebec, Montreal and Halifax are also added. The steerage arrivals at the four points named were respectively 18,869, 58,244, 4,341 and 33,563. The Women's National Immigration Society at Montreal reported 455 immigrants passed through the home. The report of the inspector of British Immigrant Children's Receiving Homes, shows that 515 children were inspected and reported upon, being distributed for the most part between Ontario, Quebec and New Brunswick. The Commissioner of Immigration stationed at Winnipeg reports a total immigration of 110,530 recorded at the office, as against 55,261 for the previous year; 42,020 of these were from the United States. A complete analysis of these new settlers by nationalities from other points of view is added. The general colonization agent at Winnipeg reports that 41,500 English-speaking settlers, about 12,500 Germans, and 15,000 Scandinavians had been placed during the year. Operations in the United States are fully described in twenty-three special reports from Dominion agents stationed at various points, the general method of advertising adopted by the department being described in the report of the inspector of these agencies.

Immigration and Colonization in Quebec, 1903.

The annual report of the Minister of Colonization and Public Works of Quebec was also received at the Department of Labour during March, and the following is a brief reference to the information contained therein in relation to immigration and colonization during 1903.

In opening up the country 122.32 miles of winter roads were built, 185.38 miles of regular wagon roads, and 367.39 miles of road improved and repaired. Bridges and culverts were also built or repaired, representing a total length of 14,517 feet. A large proportion of the expenditure was devoted to the districts of Pontiac, Ottawa, Lake St. John, Temiscouata and Matane. Reports are given of the Quebec Colonization Society and of the city of Sherbrooke Colonization Society. By the former society the sum of \$1,680.94 was spent on roads, clearings and bridge building, \$2,807.25 were contributed to the St. Damien Agricultural Orphanage, \$125 were expended on a settlement at Commissioners lake, and the sum of \$15 was given to indigent settlers. The funds of the city of Sherbrooke Colonization Society were largely distributed among missions, churches and chapels.

There are two government immigration offices, at Quebec and at Montreal. At the former 125 settlers reported during the year, and at the latter there were registered 1,553, including both adults and children. Sixty of those registering were from France and Belgium, 119 from the United States, and the remainder were from Montreal and its environs.

The total number of immigrants destined for the province of Quebec, who landed at the port of Quebec during the year ending June 30, 1903, was 10,211, an increase of 5,000 over the previous year. Of this number 5,620 were English; 1,075 Scotch; 786 Italians; 614 Russians; 380 Irish, and 335 French. The destination of 8,421 was

Montreal, and 1,044 were bound for Quebec. With regard to their occupations, there were 2,376 general labourers, 1,877 farm labourers, 959 farmers, 621 female servants, 268 merchants and clerks, 164 machinists and 150 engineers. There were 2,826 dependent women and children. At the port of Montreal, 8,990 immigrants arrived during the year. There was a falling off in the numbers of French, Belgians and Swiss, but the total number of immigrants was greatly in excess of previous years.

The repatriation of Canadians from the United States was on an increased scale. The agent at Worcester, Mass., reports that 9,638 Canadians were brought back to Canada by the Rutland Railway during the year who intended to remain in the Dominion. There were more applications for farm labourers and female servants than could be supplied by the immigration offices.

Homestead Entries for February, 1904.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of February, 1904, as compared with the month of February, 1903.

TABLE OF HOMESTEAD ENTRIES FOR FEBRUARY.

| Agency. | 1904. | 1903. | Increase. | Decrease |
|--------------------|-------|-------|-----------|----------|
| Alameda..... | 67 | 52 | 15 | |
| Battleford..... | 64 | 8 | 56 | |
| Brandon..... | 40 | 112 | | 72 |
| Calgary..... | 200 | 127 | 73 | |
| Dauphin..... | 34 | 23 | 11 | |
| Edmonton..... | 136 | 173 | | 37 |
| Kamloops..... | 10 | 4 | 6 | |
| Lethbridge..... | 56 | 97 | | 41 |
| Minnedosa..... | 24 | 24 | | |
| New Westminster | | | | |
| Prince Albert..... | 59 | 67 | | 8 |
| Regina..... | 247 | 186 | 61 | |
| Red Deer..... | 38 | 92 | | 54 |
| Winnipeg..... | 50 | 91 | | 41 |
| Yorkton..... | 103 | 109 | | 6 |
| Total .. | 1,123 | 1,165 | 222 | 259 |

It will be seen that there has been a decrease in the number of homestead entries made during February, 1904, of 37.

The statement of entries made during the first eight months of the fiscal year 1903-1904 is as follow:—

TABLE OF HOMESTEAD ENTRIES, JULY-FEBRUARY.

| Month. | 1903. | 1902. | Increase. | Decrease. | Remarks. |
|----------------|--------|--------|-----------|-----------|---------------------------------|
| July..... | 3,438 | 2,622 | 816 | | |
| August..... | 2,288 | 1,904 | 384 | | |
| September..... | 1,845 | 1,416 | 429 | | |
| October..... | 1,958 | 2,142 | | 184 | |
| November..... | 2,406 | 2,482 | | 76 | |
| December..... | 1,570 | 1,640 | | 70 | |
| | 1904. | 1903. | | | |
| January..... | 1,240 | 1,109 | 131 | | |
| February..... | 1,128 | 1,165 | | 37 | |
| Total | 15,873 | 14,480 | 1,760 | 367 | Net increase for last 8 months. |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of February, 1904 were as follows:—

| Nationalities. | *No. of entries |
|--|-----------------|
| Canadians from Ontario..... | 1 |
| " Quebec..... | |
| " Nova Scotia..... | |
| " New Brunswick..... | |
| " Prince Edward Island..... | |
| " Manitoba..... | |
| " North-west Territories..... | |
| " British Columbia..... | |
| Persons who had previous entry..... | |
| Canadians returned from the United States | |
| Americans..... | |
| English..... | |
| Scotch..... | |
| Irish..... | |
| French..... | |
| Belgians..... | |
| Syrians..... | |
| Germans..... | |
| Austro-Hungarians..... | |
| Danes (other than Icelanders)..... | |
| Icelanders..... | |
| Swedo-Norwegians..... | |

| Total. | 620 | 256,869.90 |

In February, 1903, the number of patents issued was 598, covering an area of 324,271 acres.

Notes of the Month.

A number of immigrants arrived during March under the auspices of the Farmers' Help Society. Over 3,000 applications for farm assistants were reported as received by the provincial government of Ontario.

A vigorous campaign is being prosecuted in Great Britain for the attracting of a suitable class of immigrants to Canada.

An immigration movement of some importance from Wales is expected during the coming season.

A considerable movement of farmers and their effects into western Canada was noted at several points in Ontario during the month.

Among the immigrant arrivals of the month were several personally conducted parties.

The purchase of three acres in the neighbourhood of Quebec was authorized by the Hon. the Minister of the Interior on which two buildings, each 150 feet by 50 feet, are to be erected, one as a detention hospital for diseased immigrants, and the other for housing the relatives of immigrants detained in the hospital.

An influx from Utah into Southern Alberta is reported as about to take place. The immigration will consist of between 400 and 500 farmers with their live stock, farm implements and household effects. Prospects for a heavy movement from the United States generally into the North-west Territories during the coming season are considered very good.

Extensive schemes of developments in the North-west Territories are under consideration by the Canadian Pacific Railway Company, including the building of additional railway extensions, especially in the territories, the improvement of accommodation for settlers, the irrigation scheme and other projects.

The colonization society of Montreal reported forty-six colonists arrived and distributed during February.

The Dominion government disallowed the two anti-Japanese statutes adopted by the British Columbia legislature at its recent session, one in amendment to the Coal Mines Regulation Act, and the other an Act regulating immigration into British Columbia under an educational test.

CANADIAN TRADE AND REVENUE DURING THE MONTH OF MARCH, 1904.

The following article intended as supplementary to the general Summary of Industrial Labour conditions is based on statistics furnished by courtesy of the Departments of Customs and Finance, Canada, on the latest weekly reports issued by the Department of Trade and Commerce, Canada, and on current information collected from reliable trade and financial journals.

THE general trade situation throughout Canada was favourable during March, in spite of adverse weather conditions during the first portion of the month and consequent interference with the transportation of commodities. Foreign trade, though

showing a diminution in exports, maintained a substantial lead over the returns of the previous year, while domestic trade, though particularly affected by the weather, displayed a healthy tone and reported a promising outlook. Reference in detail to conditions in these various branches is as follows :—

Foreign Trade Returns.

first eight months of the fiscal year, supplied by courtesy of the Department of Customs, shows that imports were stationary as compared with the corresponding period of 1903, with a falling off in exports both with regard to January and with regard to February a year ago. For the eight months, however, a substantial gain is indicated in imports, though exports again show a falling off. In the total trade up to February 29th, an increase of over \$13,700,000 was indicated, the aggregate being \$313,627,519. The falling off in exports is held to be due to the severe weather which crippled transportation, especially in western Ontario, and prevented the movement of freights. The chief decreases noted under the heading of exports were in animals and their products, agriculture and the fisheries*

Steps were taken by the government during March to encourage trade between the republic of Mexico and the Dominion, the establishment of a steamship service between the two countries being actively discussed.

Imperial Trade—Reports of Commercial Agencies.

According to reports received from the commercial agents of the Department of Trade and Commerce, Canada, during February, prospects for an expansion in trade with the different colonies of the Empire were favourable. In Australia trade is recovering from a period of depression and openings in several lines are accordingly to be expected. Canadian saw-mill machinery and lumber have been meeting a good market. In Great Britain there is a continued demand for Canadian fruit of the better grades, and the more careful packing methods recently adopted for this market are meeting their reward. Cana-

dian eggs, cheese, butter, mining timber, and office furniture are also finding a good market. Flour, it is stated, if properly mixed, would be a profitable export. Prospects for an increase in shipments of general merchandise to the port of Hull are stated as favourable.

The imports from Canada during the month of February, according to a return of the British Board of Trade, were as follows:—

| | Quantity. | Value. |
|------------------------------|-----------|----------|
| Cattle.. | 5,158 | £ 88,279 |
| Sheep and lambs.. . . . | 3,273 | 5,086 |
| Wheat, cwt | 475,000 | 172,093 |
| Wheat, meal and flour, cwts. | 141,000 | 70,870 |
| Peas, cwts.. | 22,180 | 7,796 |
| Bacon, cwt | 53,064 | 117,511 |
| Hams, cwt | 13,496 | 35,940 |
| Butter, cwt | 2,205 | 9,728 |
| Cheese, cwt | 75,446 | 193,219 |
| Eggs, great hundreds. . . . | 150 | 75 |
| Horses.... | 15 | 600 |

Revenue and Expenditure.

The revenue of the Dominion, according to the latest official statement of the Department of Finance, amounted during February to \$5,310,977.59, or a total of \$45,628,790.79 for the first eight months of the current fiscal year. The total for the month shows a decrease of \$70,373.34 over January, and an increase of \$654,624.06 over February, 1903. For the first eight months of the fiscal year the increase amounts to \$4,525,204.54.

Current expenditure in February amounted to \$3,372,396.72, as against \$2,838,679 in February, 1903. For the eight months the total was \$30,480,110.23, as against \$29,523,086.20 a year ago. The sum of \$419,267.79 was expended on capital account during February, the chief items of which were as follows:—

| | |
|-------------------------------------|--------------|
| Public works: railways and canals.. | \$196,915 90 |
| Railway subsidies.. | 127,365 69 |
| Dominion lands.. | 40,176 16 |
| Militia.. | 33,791 17 |
| Bounty on iron and steel.. . . . | 21,331 39 |

* A review of the Departmental report on Canadian trade for the fiscal year ended June 30, 1903, appears under the heading of Departments and Bureaus in the present issue of the *Labour Gazette*.

The surplus on the consolidated fund was about \$15,000,000.

The public accounts of the province of Quebec, for the year ending June 30 last, as brought before the legislature by the provincial secretary, show a surplus of \$103,712.22.

Domestic Trade.

Weather conditions continued to constitute the dominant factor in the general trade situation, especially in the province of Ontario, the blockade on the railways and the almost impassable condition of the country roads affecting retailers of all branches very injuriously, both in the way of decreasing sales and of preventing the renewal of stocks. Some of the commonest articles of consumption were sold out without the possibility of being replaced, sugar for example, showing at several points an advance of forty per cent in price, and if it had not been for the unusual heavy volume of wholesale trade which took place in the opening weeks of the winter season, in response to the stimulus of the unusually cold weather, much greater hardship and inconvenience would have been occasioned. As a result, some of the paper maturing on March 4, the date on which a considerable proportion of the spring settlements is made, was offered for renewal, though the showing under the circumstances was re-

garded as favourable, and as indicating a sound business situation. In the dry goods trade the leading events of the month were the spring openings in millinery, held at Montreal and Toronto, the latter city being the most important millinery centre in the Dominion. These were well attended by representatives of the retail trade from the several provinces of the Dominion, and, although the demoralized railway service interfered considerably with business appointments, a good, though not a heavy list of purchases was reported. Cotton goods continued firm, and wool and linen prices strong. A number of other branches of trade also showed an upward tendency in prices. Hides and leather were stationary, and lumber suffered considerably from diminished sales resulting from the blockade on the railways. Canadian securities ranged on low levels, reporting much dulness in speculation, but with a continuance in the process of recovery from recent fluctuations in values. In western Canada the opening of the immigration season caused a sensible increase in general trade. Conditions in British Columbia are also on a satisfactory basis. On the whole the business outlook in Canada, in view of the increasing settlement of the west and the anticipated recovery from the effects of the bad weather in Ontario and the eastern provinces, is regarded as particularly satisfactory.

TRADE DISPUTES DURING THE MONTH OF MARCH.

ALTHOUGH the number of new trade disputes in March was nearly twice as many as those which began in February, yet as they were all of small dimensions their effect on general industrial conditions throughout Canada was not great. Six new disputes affected international trade organizations, one a Canadian organization, and in one case the strikers only formed a trade union during the progress of the dispute.

Analysis of Trade Disputes During the Month.

Number and magnitude.—There were in all 11 disputes in existence during March, of which 2 began prior to March 1, and 9

after. Compared with this, there were 7 the previous month, and 31 in March, 1903. In addition to the disputes of last month enumerated, there were two minor strikes, and also a dispute involving 269 men, which is not included on account of the failure of the company concerned immediately after the declaration of the strike. The magnitude of the new disputes of the month is indicated in the following table, according to the number of working people involved:—

| Magnitude. | Number of Disputes. |
|--------------------------|---------------------|
| From 50 to 100.. | 1 |
| From 25 to 50.. | 2 |
| From 6 to 25.. | 6 |
| Total.. | 9 |

Loss of time in working days.—The total loss of time in working days to employees affected by trade disputes was 2,245 days, which includes 250 days lost by employees in one establishment, who were indirectly affected by a dispute. The approximate loss of time to employers was 1,969 days. The difference is accounted for by the fact that in one case new hands were taken on by the company while the dispute was still in progress, and in another case the men were practically discharged, and their places were filled immediately, so that not a single day was lost by the company. In the month of February the total loss of working days was estimated at 10,060, and in March, 1903, the loss including only those directly affected, amounted to 71,525 days.

Trades affected by new disputes.—The following trades were affected by the new disputes of the month:—

| Trades. | Number of Disputes. |
|-----------------------|---------------------------|
| Building.. | 3 |
| Metal.. | 2 |
| Woodworking.. | 1 |
| Clothing.. | 2 |
| Mining.. | 1 |
| Total.. | 9 |

Localities affected by disputes.—One new dispute took place in Nova Scotia, three in the province of Quebec, all of them being in Montreal ; three occurred in Ontario, at Toronto, Guelph and Sandwich. The remaining two were at Vancouver, B.C.

Causes of new disputes.—The following were the causes of the new disputes during the month :—

| | |
|--|---|
| For increase of wages.. | 2 |
| Against employment of an apprentice.. | 1 |
| Against establishment of an 'open shop'.. | 1 |
| Against change in conditions of employment.. | 2 |
| Against discharge of employee.. | 1 |
| Withholding of pay alleged to be due | 1 |
| Demand for change in method of payment.... | 1 |

Methods of settlement.—Of the eleven disputes which were in existence during March eight were terminated during the month, leaving three still unsettled on April 1. A settlement was reached in five cases through negotiations between the employers

and either the strikers themselves or the trade unions to which they belonged. In one case, the company's terms were accepted, and in another the men's demand was granted, without negotiations, and in the remaining case the strikers returned to work after an inquiry without taking further action.

Results of disputes.—Out of the eight disputes which were settled in the course of the month the employers were successful in one case, and the employees in three. A compromise was affected in three cases, and in one no immediate result followed.

Disputes Commenced prior to the Beginning of the Month.

The two disputes which began before March 1 and were in continuance during the month were a strike of picture framers at Toronto, and of papermakers at St. Catharines, Ont. An account of the causes and progress of these disputes during the month of February was given in the March number of the *Labour Gazette*.

The strike of picture-frame-makers of the Cobban Manufacturing Company, which was declared on February 15, on account of a reduction in wages, came to an end on March 4, when an agreement was signed by the company and the Picture Frame Makers' Union. It is stated by the union that the new agreement is equivalent to former prices, or most likely a very slight increase.

The dispute of the papermakers of the Kinleith Paper Company of St. Catharines, which began on February 29, lasted until about March 14, when the company was no longer affected. The cause of the dispute was an order for the return to longer hours which had been in force before May, 1903. The dispute was brought to an end through some of the employees accepting the company's terms, and the places of the others being filled by new men.

New Disputes.

None of the nine new disputes of the month were of great importance in their

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLES, SERIES C, No. 41.

TABLE OF TRADE DISPUTES OF THE MONTH OF MARCH.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No. of Firms or Establishments affected. | Approximate No. of Employees affected. | Di-rectly | Indi-rectly | Date of com-mencement. | Date of termi-nation. | Result. |

| " | St. Catharines. | Papermakers. | Increase in hours of labour. | 1 | 86 | 5 | " | 29 | " 14 | Company's terms accepted by some employees; others secured work elsewhere and their places were filled. |
| DISPUTES WHICH BEGAN DURING THE MONTH. | | | | | | | | | | |
| B. Columbia | Vancouver | Boilermakers | Change in shop rules making it an 'open shop'. | 1 | 15 | | " | 5 | | No settlement reported at end of month. |
| Quebec. | Montreal. | Cloakmakers. | Demand for increase in payment for piecework. | 1 | 34 | | Mar. 14 | Mar. 21 | A compromise. | |
| Ontario. | Toronto | Picture framers | Refusal of men to use time sheets | 1 | 9 | | " | 15 Mar. | 17 Mar. | 17 Time sheets withdrawn by firm. |
| " | Windsor | Painters | Employment of one more apprentice than agreed upon. | 1 | 8 | | " | " 15 | Mar. 19 | More journeymen employed to make up for extra apprentice. |
| Nova Scotia. | New Aberdeen. | Firemen of Coal Co. | Refusal of men to fill ashes into hoppers. | 1 | 16 | | " | 17 Mar. | 30 Mar. | Men were reinstated at request of P. W. A., and not required to fill ashes. |
| Quebec. | Montreal. | Painters. | Demand for increase in wages. | 1 | 10 | | " | 23 | " 28 | Increase granted of from 40 cents to 45 cents per hour. |
| Ontario. | Sandwich | Firecutters. | Demand for \$12 a week instead of piecework system of payment. | 1 | 14 | 50 | " | 25 | | No settlement reported at end of month. |
| Quebec. | Montreal. | Stonecutters | Alleged discharge of an employee, and withholding of one day's pay, the time between his discharge and the day when he was paid. | 1 | 28 | | " | 23 Mar. | 24 Mar. | Strikers returned to work; employee taken back on March 27. |
| B. Columbia | Vancouver | Machinists. | Discharge of a trade unionist employee. | 1 | 14 | | " | 26 | | No settlement reported at end of month. |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true, that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interest of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

effects, and in no case were they felt appreciably beyond the establishments directly concerned.

With respect to the total number of working people involved, the most important dispute was a strike of fur cutters of the Bishop Fur Company, of Sandwich, Ont. Fourteen men were affected directly and 50 women indirectly by this dispute. The cause of the trouble was a demand for a change in the system of payment. The cutters had been paid by piecework, and were making from \$8 to \$10 a week. They demanded that they should be paid \$12 a week instead of by piecework. On the refusal of the company to grant their demand, they stopped work on March 25, and the strike was still in existence at the end of the month. Before the beginning of the dispute the fur cutters had no organization, but after the strike had been declared they took steps to form a union, and applied for a charter from the international organization.

A dispute of garment workers at Montreal, was also due primarily to a question of wages. The garment workers of the Star Mantle Manufacturing Company demanded an increase in the prices they were receiving for garments. According to information received from the company, 19 men and 15 women were involved in the dispute, which lasted from March 14 to March 21. It was settled by an agreement between the company and the Ladies' Garment Workers' Union, No. 28, the terms of which were that all the employees would be reinstated without discrimination; those who took their places during the strike would be dismissed, members of the union only would be engaged in the mantle and costume-making departments, and an arbitration committee would be appointed to fix the scale of payment for new work, and to settle all difficulties arising therefrom.

An interesting point was involved in a strike of stone-cutters at Montreal, which took place on March 23, and concerned 28 men, employees of the Forsyth Granite and

Marble Company, Limited. As the strike only lasted one day, however, and about 70 marble workers continued at work, the establishment was not greatly affected by it. The question in dispute was as to whether a stone-cutter, who had left the employ of the company, had been discharged or not. If he was discharged, the men claimed that he was entitled to a day's pay for the time he waited for his wages. It was decided to seek legal advice on this point, and the strikers returned to work. The department had not received information as to the nature of the legal advice obtained at the end of the month.

Two disputes occurred in the Vancouver Engineering Works, Vancouver, B.C., neither of which had been terminated at the end of the month. On March 5, fifteen boilermakers of this firm went on strike, alleging that the company were not keeping an agreement with their union, which specified that none but union men would be employed by them. New shop rules had been posted up, which ignored this agreement. On March 26, the strikers were joined by 14 machinists, who declared a strike on account of the dismissal of the president of their union, who was alleged by the company to have violated the new rules regarding the employment of union and non-union men.

On March 17, sixteen firemen employed by the Dominion Coal Company, at No. 2 Colliery, New Aberdeen, N.S., were discharged on account of their refusal to fill the ashes into hoppers, and other men were immediately appointed in their places. In the absence of the company's manager, the firemen had been given extra help for this work, but on his return he removed this help. The firemen appealed to the Provincial Workmen's Association, to which they belonged, and the association decided that they ought to be reinstated. The company offered to arbitrate the case, but this was refused. On March 30 the firemen were reinstated under the conditions prevailing immediately before their discharge.

On account of the failure of the Quebec Southern Railway Company to pay its employees wages due for the months of January and February, the latter, on March 1, refused to continue longer at work, and operations were completely suspended on the company's lines, extending between Noyan Junction to St. Hyacinthe and Sorel and from Sorel to Montréal. On March 21 a receiver was appointed to take possession of the company's lines on behalf of its creditors. On March 24 he obtained authority from the Exchequer Court to borrow money, and on the 30th he obtained further authority to pay the employees the

wages due them, and the wages were distributed in the course of the next few days. The number of employees affected was 269. As this trouble could not properly be classed as a strike, and as no loss was eventually experienced by the employees of the company, it has not been included among the trade disputes of the month.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of March, and which have been reported to the department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, to one of the factory inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with a statement of returns of accidents made to them.

THE Department of Labour has received notice of 274 accidents to workmen during the month of March in different parts of the Dominion, resulting in the loss of 59 lives, and in severe injuries to other workmen to the number of 215.

Compared with the previous month, the returns show an increase of 46 in the total number of accidents, there being a decrease of 10 in the number killed but an increase of 56 in the number injured.

By industries and groups of trades the record was as follows:—

| Trade or Industry. | Killed. | Injured. | Total. |
|-----------------------------------|---------|----------|--------|
| Agriculture..... | 6 | 6 | 12 |
| Lumbering..... | 5 | 4 | 9 |

Nature of Fatalities and Accidents.

Upon consulting the detailed table of accidents published herewith it will be observed that the most disastrous accident of the month, in so far as loss of life and damage to property were concerned, was the collision between two freight trains near Lennoxville, Que., a brief description of which follows:—

Railway collision near Lennoxville, Que.
—At 4.35 on the morning of March 15, about two miles from Sherbrooke and one mile from Lennoxville, Que., two engines, one drawing a Canadian Pacific Railway

freight train and the other a Boston and Maine Railway freight, came together at the point of intersection of the Grand Trunk, the Canadian Pacific and the Boston and Maine Railways. In the collision which ensued the engineer, the fireman and a brakeman of the Boston and Maine Railway were killed instantly, the engineer of the Canadian Pacific engine being dangerously injured, and dying subsequently. The engine of the Boston and Maine Railway only was wrecked, the balance of the cars not having left the rails. The cause of the accident is ascribed to misunderstanding of signals by the engineer of the Boston and Maine engine, the Canadian Pacific Railway engine having right of way over the crossing. A coroner's inquest was held on the bodies of the dead engineer, fireman and brakeman of the Boston and Maine Railway in the city hall, Lennoxville, Que., on March 15, and the jury's verdict was as follows:—

That the dead John Folsom, engineer; Napoléon Bérard, fireman, and W. Cousins, brakeman, were killed in a collision which took place at the crossing of the C.P.R. and G.T.R., half a mile from Lennoxville, between two trains of the Canadian Pacific and the Boston and Maine, and that the cause of their death is due to either an error of judgment or want of care on the part of the engineer of the Boston and Maine train.

The Record by Trades and Industries.

By industries and groups of trades, the table shows the following record for the month:—

Agriculture.—The number of fatalities equalled the number of other casualties in this industry, as was the case last month. Two of the fatalities resulted from the victims being run over by railway trains, one from drowning while capturing drift wood at Chatham, Ont., one from being struck by a piece of cordwood which rebounded from a circular saw, one from the victim's neck scarf becoming caught in the cogs of wheel of a grain crusher and choking him to death, and one from being frozen to death in a heavy snowstorm while driving home. Of the non-fatal injuries one was caused by the accidental

discharge of a rifle while destroying rats in a barn, one by a kick from a horse, one by slipping when jumping from a train, one by a falling tree, one by the slipping of an axe, and another by having the arm caught in a straw cutter.

Lumbering.—Five of the accidents in this group were fatal, three being occasioned by trees or limbs of trees falling on choppers, and one by a run-off of the Canadian Pacific Railway west-bound express at Forks Station, Ont. In the other case the workman was drowned while working on a dam. Of the non-fatal accidents three were caused by lumber falling on the workmen, and one by the slipping of an axe.

Mining.—There were seven killed and eleven injured in this industry during March. Of the fatal accidents one occurred from falling down a shaft, three from falls of rock or coal, one from being struck by dump table on shipping pier, one by being struck by a runaway car in a mine, and one by striking head against an obstruction while on a car. Of the other casualties five occurred from falls of coal, two from becoming entangled in the slack of hoisting ropes, six from cars or transport animals used in the mines, and one at Londonderry, N.S., from a fall from the top of a coke oven.

Building trades.—The record shows three fatalities and eight other casualties in this group. At St. Thomas, Ont., a workman was killed by being struck on the back of the head by the hammer of a pile driver; the other two fatalities occurring through falls at Shawinigan Falls, Que., and at Trail, B.C., respectively. Four of the non-fatal accidents were also caused by falls. The other four were caused by a load of deals in one case, timber while teaming in another, a stone in a third, and the roof of a house in the fourth falling on workmen.

Metal trades.—The metal trades stand second on the list in point of numbers of members killed or injured, with a total of 61, the railway service holding the first

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F. No. 6.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------------------|-----------------------|--------|---------|----------|-----------------------------|---|
| 1904. | | | | | | |
| <i>Agriculture</i> — Farmer | St. Catharines, Ont. | Mar. 3 | 1 | 9 | Severe injury to shoulder. | By accidental discharge of a rifle while destroying rats. |
| " | St. Hyacinthe, Que. | " 19 | 1 | | | In crossing railway track with rig, struck by engine of passing train. |
| " | Coteau Junction, Que. | " 23 | 1 | 1 | Injured in back. | Run over by passing railway train. |
| " | Nassagaweya, Ont. | " 17 | | 1 | Severely crushed. | Kicked by a horse. |
| " | Puslinch, Ont. | " 22 | | 1 | | By a falling tree while chopping in bush. |
| " | Chatham, Ont. | " 31 | 1 | | | While capturing drift wood fell into river and was drowned. |
| Employee at nurseries. | Galt, Ont. | " 8 | | 1 | Right foot badly cut. | While chopping, axe accidentally slipped. |
| Driver. | Valleyfield, Que. | " 15 | | 1 | Foot amputated. | Slipped when jumping from train—car ran over foot. |
| Farm hand. | Blenheim, Ont. | " 18 | 1 | | | Struck by piece of cordwood rebounding from circular saw. |
| " | Brantford, Ont. | " 20 | | 1 | Arm taken off at elbow. | Was caught in straw cutter and dragged into knives. |
| " | Newhurst, Man. | " 27 | 1 | | | Neck scarf became caught in cogs of wheel of a grain crusher and choked him to death. |
| " | Winnipeg, Man. | " 24 | 1 | | | While driving home was caught in a heavy storm and frozen to death. |
| <i>Lumbering</i> — Lumber handler | Toronto, Ont. | " 10 | | 1 | Collar bone fractured. | Load of lumber fell on him. |
| Shantyman. | Forks Station, Ont. | " 4 | 1 | | | Run off of C.P.R. west bound express. |
| " | New Westminster, B.C. | " 11 | | 1 | Injury to hand. | Caused by slipping of axe. |
| " | Carlisle, N.B. | " 14 | 1 | | | In felling a tree in woods. |
| " | Glen Miller, Ont. | " 28 | 1 | | | While working at a dam, fell into water and was drowned. |
| " | Prim Township, Ont. | " 15 | 1 | | | By a falling tree while chopping. |
| " | Amberst, N.S. | " 18 | 1 | 1 | Injuries to head and body. | Struck by stub of dead tree while cutting lumber. |
| Teamster. | Springfield, Ont. | " 5 | | 1 | | While rolling logs from his sleigh a heavy beech log fell upon workman. |
| " | Toronto, Ont. | " 11 | | 1 | Collar bone broken. | Chain binding a load of lumber snapped and lumber fell on workman. |
| <i>Mining</i> — Car chucker. | Louisburg, N.S. | " 23 | 1 | | | Dump table on shipping pier accidentally tipped, throwing the workmen into the water. |
| Miner. | Londonderry, N.S. | " 3 | | 1 | Severely injured. | Missed footing and fell from top of coke oven against a steam-crane in motion, arm was mangled terribly in cogs of wheel. |
| " | Glouce Bay, N.S. | " 12 | 1 | | | Crushed to death by fall of top rock in mine. |
| " | Dominion, N.S. | " 12 | | 1 | Compound fracture of ankle. | By fall of top rock of mine. |
| " | New Aberdeen, N.S. | " 16 | | 1 | Ankle broken. | Crushed between shafts and horse while carting in mine. |
| " | Rossland, B.C. | " 27 | 1 | | | Fell down chute from 100 to 200 foot level. |
| " | Michel, B.C. | " 21 | 1 | | | Sucked into hopper of coal bin and 40 tons of coal fell on him. |

| | | | | | | | |
|---|------------------------|---|----|---|---|--------------------------------|---|
| " | Fernie, B.C. | " | 7 | 1 | | | Struck by a runaway car on a steep incline. |
| " | Michel, B.C. | " | 23 | 1 | | | Buried under cave in of falling rock. |
| " | Nanaimo, B.C. | " | " | 1 | 1 | Broken leg. | By a runaway mule. |
| " | " | " | " | 1 | 1 | Loss of arm. | Caught between two coal cars. |
| " | Cumberland, B.C. | " | 16 | " | 1 | Leg broken. | By a fall of coal. |
| " | Ladysmith, B.C. | " | 18 | " | 1 | " | Became entangled in a wire rope. |
| " | " | " | 3 | " | 1 | Two ribs broken. | By a fall of rock. |
| " | Wellington, B.C. | " | 12 | " | 1 | Leg broken. | |
| " | Glouce Bay, N.S. | " | 16 | " | 1 | Ankle broken. | While driving down tub of coal bin, No. 2 pit, horse stumbled and stepped off track; workman's leg was caught between shaft and box. |
| " | Comox, B.C. | " | 3 | " | 1 | Leg broken. | Caught in a slack of rope. |
| " | " | " | 8 | 1 | 1 | Back bruised, head cut. | Struck head while riding in car. |
| " | Roseland, B.C. | " | 9 | " | 1 | Thigh bruised. | Through failure to bar down loose dirt. |
| " | Wellington, B.C. | " | 12 | " | 1 | Nose broken. | Struck by a car. |
| " | " | " | 14 | " | 1 | " | Struck by a brake handle. |
| " | St. Thomas, Ont. | " | 12 | 1 | " | " | While at work sheet-piling for wharf, struck on back of head by hammer of pile-driver. |
| " | Shawinigan Falls, Que. | " | 12 | 1 | 1 | Head and body cut and bruised. | Fell through a hole in a floor. |
| " | Quebec, Que. | " | 9 | " | 1 | " | A load of deals upset and fell on workman. |
| " | Trail, B.C. | " | 16 | 1 | " | " | Fell from timbers while superintending hoisting. Verdict of accidental death rendered. |
| " | St. John, N.B. | " | 9 | " | 1 | Feet severely injured. | Through ladder slipping, fell from I. C. R. building to ground about 15 feet. |
| " | Guelph, Ont. | " | 8 | " | 1 | Injuries to head. | Struck by falling timber while tearing down an old structure. |
| " | Moncton, N.B. | " | " | 1 | 1 | Bones in both feet fractured | Thrown from height of 15 feet off ladder to ground. |
| " | Winnipeg, Man. | " | 4 | " | 1 | Collar bone broken | Fell from scaffold. |
| " | Nanaimo, B.C. | " | 19 | " | 1 | Head cut, &c. | " |
| " | Niagara Falls, Ont. | " | 23 | " | 1 | Severe scalp wound. | Struck by falling stone. |
| " | Hamilton, Ont. | " | 28 | " | 1 | Head and face bruised. | The roof of a house under repair collapsed and fell on workman. |
| " | Toronto, Ont. | " | 11 | " | 1 | Loss of leg below knee. | Leg became entangled in belt in electric power house. |
| " | Hamilton, Ont. | " | 7 | 1 | " | " | While oiling machinery arm became caught in cogs. |
| " | St. Thomas, Ont. | " | 19 | " | 1 | Loss of left hand. | While putting belt on engine hand became entangled in fly wheel. |
| " | Montreal, Que. | " | 4 | " | 1 | Nearly asphyxiated | By gas while making a connection. |
| " | Trail, B.C. | " | 17 | " | 1 | Loss of left arm at elbow | Caught in machinery. |
| " | Copper Cliff, Ont. | " | 17 | " | 1 | Leg broken | By rebound of a steel beam. |
| " | Sarnia, Ont. | " | 3 | " | 1 | Very severely injured | Crushed between the side of his boat and wharf. |
| " | Kingston, Ont. | " | 11 | " | 1 | Face badly burned | By flying sparks. |
| " | Hamilton, Ont. | " | 7 | 1 | " | " | Struck on head by pieces of bursting empty wheel. |
| " | Montreal, Que. | " | 7 | " | 1 | Arm broken | Clothing caught in leather belt. |
| " | Londonderry, N.S. | " | 6 | 1 | " | " | A jury verdict declared death resulted from injuries received by falling off a work bench in connection with the crane into exposed cog wheels while in motion. |
| " | Welland, Ont. | " | 10 | " | 1 | Hand lacerated. | Caught in wire fence machine. |
| " | Brautford, Ont. | " | 15 | " | 1 | Severely injured | Arm caught in belting and body drawn into moving machinery; arms, shoulders, neck, face and head badly cut. |
| " | Sydney, N.S. | " | 17 | 1 | " | " | While at work at a blast furnace was killed by fall of slag. |
| " | New Westminster. | " | 11 | " | 1 | Left hand crushed | Caught in machinery. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH—Continued.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------|-----------------------|---------|---------|----------|-------------------------------|---|
| <i>Metal Trades—Con.</i> | | 1904. | | | | |
| Machineist. | Toronto, Ont. | Mar. 23 | 1 | 1 | Face and chest injured. | Struck by pieces of emery wheel which burst. |
| " | St. Thomas, Ont. | " 21 | 1 | 1 | Loss of an eye. | Struck by a splinter of steel. |
| " | St. John, N.B. | " 23 | 1 | 1 | Leg crushed. | Under heavy bar of iron. |
| " | Galt, Ont. | " 25 | 1 | 1 | Lost 3 fingers of left hand. | Hand drawn into steam driven wringer. |
| " | Brantford, Ont. | " 21 | 1 | 1 | Loss of left arm below elbow. | Hand caught in machinery. |
| " | Hamilton, Ont. | " 1 | 1 | 1 | Loss of 2 fingers. | Struck by trip hammer. |
| " | " | " 1 | 1 | 1 | Eye injured. | By a flying chip of steel. |
| " | " | " 7 | 1 | 1 | Toes cut and broken. | Arm torn from socket; died from effects. |
| " | Toronto, Ont. | " 24 | 1 | 1 | Back strained. | While shearing scrap on plate shears. |
| " | Guelph, Ont. | " 11 | 1 | 1 | Fingers cut. | Fell from platform owing to bursting of steam pipe. |
| " | London, Ont. | " 10 | 1 | 1 | Thumb hurt. | In throwing belt overland contrary to rule. |
| " | Toronto, Ont. | " 3 | 1 | 1 | Eye injured. | Tripping of machine while putting plank in press. |
| " | London, Ont. | " 17 | 1 | 1 | 2 arteries cut in left wrist. | By a spark of molten iron. |
| " | Galt, Ont. | " 16 | 1 | 1 | Nail torn from 2nd finger. | By slip of a chisel. |
| " | London, Ont. | " 10 | 1 | 1 | Leg broke. | Bar slipped while prying up a heavy casting. |
| " | Toronto, Ont. | " 17 | 1 | 1 | Loss of one finger. | While holding chain in place heavy board being lifted fall on leg. |
| " | " | " 7 | 1 | 1 | Right foot crushed. | Hand slipped while running a ventilating cover. |
| " | " | " 14 | 1 | 1 | Finger hurt. | Caught between elevator and ground floor. |
| " | Buckville, Ont. | " 14 | 1 | 1 | Right hand lacerated. | Crushed by a press. |
| " | Guelph, Ont. | " 26 | 1 | 1 | Hip dislocated. | While grinding stove plate hand was caught between wheel and casting. |
| " | Stratford, Ont. | " 31 | 1 | 1 | Fractured thigh. | While getting over car at factory sliding slipped and fell. |
| " | Montreal, Que. | " 30 | 1 | 1 | Hand badly hurt. | While at work struck on head by falling scantling. |
| " | Niagara Falls. | " 17 | 1 | 1 | " | Crushed between a car and wall at locomotive works. |
| Steel works employee. | Sydney, N.S. | " 18 | 1 | 1 | " | Caught in "dolley." |
| " | " | " 18 | 1 | 1 | Shoulder blade broken. | While excavating ore pile one of the sides fell burying him under mass weighing about a ton. |
| " | " | " 31 | 1 | 1 | Foot badly crushed. | " |
| " | Walkerville, Ont. | " 11 | 1 | 1 | Leg broken. | Run down by locomotive on his way to work. |
| " | Peterboro, Ont. | " 7 | 1 | 1 | Finger lacerated. | Steel rod fell on it. |
| " | Niagara Falls, Ont. | " 9 | 1 | 1 | Internally injured. | A coil which workman was carrying fell on hand. |
| " | New Westminster, B.C. | " 9 | 1 | 1 | Badly burned. | Stepped from one track to avoid one train and struck by another coming in contrary direction. |
| " | Montreal, Que. | " 26 | 1 | 1 | Spine dangerously injured. | By scaffolding giving way. |
| " | Hull, Que. | " 12 | 1 | 1 | " | Electrocuted by coming in contact with short circuit. |
| Structural iron worker | " | " | 1 | 1 | " | Coming in contact with live wire. |
| " | " | " | 1 | 1 | " | Scaffolding gave way precipitating workman 25 ft. to ground. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH—Continued.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------------------|----------------------|---------|---------|--|---|----------|
| 1904. | | | | | | |
| <i>Food and Tobacco Preparation—</i> | | | | | | |
| Con. | | | | | | |
| Brewery employee | Montreal, Que. | Mar. 3 | 1 | Left hand mutilated | While corking a bottle same exploded. | |
| Brewery employees | Berlin, Ont. | " 18 | 3 | Badly burned. | Varnish ignited by candle supplying light. | |
| Cannery employee | Hamilton, Ont. | " 26 | 1 | Hand badly crushed | In lifting a heavy case. | |
| Ice packer | Port Colborne | " 12 | 1 | Scalp wound and bruises | Fell 40 feet from ladder. | |
| <i>Clothing Trades—</i> | | | | | | |
| Shoe factory hand | Quebec, Que. | " 3 | 1 | Lost 2 fingers right hand. | Fingers caught between die and head of stamping press. | |
| " | " | " 14 | 1 | Loss of finger | Caught in heel press. | |
| <i>Railway Employees—</i> | | | | | | |
| Special detective. | Hochelaga, Que. | Mar. 12 | 1 | | While avoiding one train in C.P.R. yard was struck by another coming in another direction. | |
| Conductor | Niagara Falls, Ont. | " 9 | 1 | Double fracture of right leg | Slipped off caboose steps. | |
| " | " | " 28 | 1 | Back seriously injured. | Fell from train on a bridge. | |
| Pay clerk | Seaford, Ont. | " 14 | 1 | Legs crushed | In a collision between pay-train and a freight. | |
| Engineer | Morden, Ont. | " 5 | 1 | Serious bodily injuries. | Snow plow left track and engine badly damaged; engineer being hurt. | |
| " | Elmira, Ont. | " 8 | 1 | Face badly burned. | In opening door to stoke engine, a column of hot air poured out. | |
| " | Kinnmount, Ont. | " 8 | 1 | | Was driving first engine of double-header, which left track and precipitated him under wheels of second engine. | |
| " | Outrenont, Que. | " 12 | 1 | Both legs amputated. | Caught between engine and car in a run off on C.P.R. | |
| " | St. Thomas, Ont. | " 12 | 1 | Shoulder hurt | In descending from engine foot slipped and he fell on right shoulder. | |
| " | Lennoxville, Que. | " 15 | 2 | | In a head-on collision between two freight trains. One engineer killed instantly; the other died from his injuries on March 21. | |
| " | Gilbert Plains, Man. | " 13 | 1 | Leg crushed | In a collision between two freight trains. | |
| " | Hamilton, Ont. | " 14 | 1 | Ankle injured. | Slipped in getting on engine. | |
| Car inspector | St. Thomas, Ont. | " 12 | 1 | Loss of part of foot and severe scalp wound. | Struck by an engine and part of foot run over. | |
| " | Ottawa, Ont. | " 18 | 1 | Right leg sprained | By fall of elevator while lowering same. | |
| Car shop employee. | Toronto, Ont. | " 18 | 1 | | Crushed between two cars, while working underneath a freight car. | |
| Car repairer. | " | " | | | | |
| Brakeman | Tilbury, Ont. | " 4 | 1 | Severely injured | Fell from gangway of engine in motion. | |
| " | Brantford, Ont. | " 6 | 1 | Severely cut | Fell from moving freight train. | |
| " | Hamilton, Ont. | " 6 | 1 | Severely injured | While shunting was crushed between two cars. | |
| " | Walkerville, Ont. | " 7 | 1 | Back injured | Struck by end of iron truck of box car. | |
| " | Tottenham, Ont. | " 12 | 1 | Left leg crushed | Fell between cars while shunting. | |

| | | | | | | | |
|---|--------------------------|---|----|---|------------------------------|---|--|
| " | Lanoxville, Que. | " | 19 | 1 | Two fingers mutilated. | in a head-on collision between two freight trains. | [crushed] |
| " | Sherbrooke, Que. | " | 15 | 1 | Body bruised. | While coupling cars. | Was caught between an engine and tender of train and chest while shunting fell off engine under box car attached thereto and was run over. |
| " | Waterford, Ont. | " | 23 | 1 | Badly bruised. | While flagging train, slipped and was struck by buffet car. | |
| " | Moncton, N.B. | " | 17 | 1 | Left hand lacerated. | Fell in getting off moving train. | |
| " | Hamilton, Ont. | " | 26 | 1 | Body severely injured. | Slightly crushed between cars. | |
| " | Swan River, Man. | " | 14 | 1 | Legs badly crushed. | In a collision. | |
| " | Maniwaki, Que. | " | 26 | 1 | Right foot severely injured. | Caught between box car and van. | |
| " | Slocan, B.C. | " | 17 | 1 | Head and neck injured. | Fell from train while setting brakes. | |
| " | Brampton, Ont. | " | 31 | 1 | Head and neck injured. | Fell from train. | |
| " | Montreal, Que. | " | 4 | 1 | Hand badly crushed. | While at work in railway yard. | |
| " | Brantford, Ont. | " | 5 | 1 | Foot badly crushed. | While working at turntable in switch and was run over by car. | |
| " | Toronto, Ont. | " | 23 | 1 | Foot crushed. | While working at turntable in G. T. R. round house. | |
| " | " | " | 26 | 1 | Collar bone broken, &c. | Crushed between two freight cars. | |
| " | Winnipeg, Man. | " | 23 | 1 | Flesh torn from left leg. | Struck by a snow plow. | |
| " | Guelph, Ont. | " | 5 | 1 | Flesh torn from left leg. | Snow plow left track; workman caught between it and engine. | |
| " | Bury, Que. | " | 10 | 1 | Severely injured. | Run over by a train. | |
| " | Toronto, Ont. | " | 11 | 1 | Severely injured. | Struck by an engine while shovelling snow from track in yard. | |
| " | Winnipeg, Man. | " | 23 | 2 | Severe injuries. | Struck by a snow plow. | |
| " | Hamilton, Ont. | " | 16 | 1 | Severe injuries. | Caught between car and platform. | |
| " | Toronto, Ont. | " | 21 | 1 | Foot crushed. | In turntable at round house. | [travelling. |
| " | " | " | 18 | 1 | Injured in abdomen. | By engine shunting against a car in which workman was | |
| " | Morden, Ont. | " | 5 | 1 | Serious injuries. | Snow plow left track, engine behind badly damaged and fireman hurt in same. | |
| " | Lanoxville, Que. | " | 15 | 1 | Head injured. | In head-on collision between two freights. | |
| " | Stouffville, Ont. | " | 19 | 1 | Severely injured. | Falling from tender. | |
| " | Portage la Prairie, Man. | " | 25 | 1 | Face and body burned. | In collision between engine and snow plow. | |
| " | Woodstock, Ont. | " | 29 | 1 | Foot crushed. | By sheet of flame from fire-box of his engine. | |
| " | Toronto, Ont. | " | 24 | 1 | Leg broken. | By a fall off freight. | |
| " | Niagara Falls, Ont. | " | 10 | 1 | Face bruised. | In fall from car. | |
| " | Kingston, Ont. | " | 15 | 2 | All more or less injured. | By accidental closing of door of car which he was unloading. | |
| " | St. Margaret's Bay, N.S. | " | 18 | 1 | Severely bruised. | By explosion of dynamite. | |
| " | Swinton, B.C. | " | 16 | 1 | Severely bruised. | In a collision between work train and passenger express. | |
| " | Keewatin, Ont. | " | 18 | 1 | Severely bruised. | By accidental explosion of a missed blast. | |
| " | Oak Lake, Man. | " | 23 | 1 | Severely bruised. | Struck by snow plow. | |
| " | " | " | 24 | 1 | Severely bruised. | " | |
| " | Montreal, Que. | " | 26 | 1 | Bodily wounds. | Thrown from wagon to icy road. | |
| " | St. John, N. B. | " | 20 | 1 | One rib broken. | Struck by a sling of deals. | |
| " | Hamilton, Ont. | " | 7 | 1 | Internally injured. | Horse ran away throwing workman out of wagon. | |
| " | Montreal, Que. | " | 5 | 1 | Leg broken. | While unloading sugar a full sack fell on his leg. | |
| " | Quebec, Que. | " | 8 | 1 | Severe bodily injuries. | Struck by railway train while crossing track with wagon. | |
| " | Montreal, Que. | " | 8 | 1 | Severe head & body injuries. | While backing sleigh near building large quantity of snow and ice from roof fell. | |
| " | " | " | 11 | 1 | Severe scalp wounds. | Wagon struck by street car while crossing track. | |
| " | " | " | 11 | 1 | Right eye injured. | Struck with whip lash while getting out of way of another team. | |
| " | Hamilton, Ont. | " | 12 | 1 | Wounded in groin. | Standing in rear of wagon with open penknife in hand—wagon lurched and he was thrown to ground, blade of knife penetrating groin. | |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH—Continued.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |

| " | " | Feb'y. 5 | 1 | | " |
| " | Guelph, Ont. | 3 | 26 | | Fell in elevator shaft about ten feet. |

place with 71. Of the 13 accidental deaths in this group five, at Listowel, Hamilton, Ont., Londonderry, N.S., Montreal, Que., and at Hamilton, Ont., were caused by the workmen being caught in machinery; three by the falling of the workmen, three by the fall of material, and two by being run over by railway trains. Twenty-one of the non-fatal accidents were received directly in connection with machinery, eight through falling material, five through the workmen falling from a height, four through the splashing of molten metal or flying sparks, two through the breaking of the cable of a hoisting apparatus, and one by the explosion of a torpedo signal. The other injuries were of a slighter nature.

Woodworking trades.—There was only one death by accident in this group, with twenty-three other casualties. At Hanover, Ont., an elevator fell on a workman who was repairing it, breaking his neck. Thirteen of the other accidents happened in connection with saws, seven in connection with shapers, planers and jointers, two in connection with belting, and one, at Toronto, Ont., through the workman jumping from a fifth story of the factory while it was on fire.

Printing and allied trades.—In these trades there were three non-fatal accidents of a painful but not dangerous character.

Food and tobacco preparation.—The record in these trades shows no fatal accidents. Of the eleven reported, four were in the nature of scalds and burns, one resulted in the head of a workman being hurt by a descending elevator, one was caused by a fall of 40 feet, two by fingers being caught in presses, one by the explosion of a bottle, one by being crushed while lifting a heavy case. At Montreal, Que., also, a workman broke his arm while at work in a slaughter house.

The Railway service.—This branch during March retained its record as being the most hazardous among the groups of trades, with seventeen deaths and fifty-four non-

fatal accidents. The collision near Lennoxville, Que., above described, accounted for four of the fatalities. The other fatal accidents were to a railway detective at Hochelaga, Que., who while trying to avoid one train was run over by another coming in a contrary direction; to an engineer at Kinmount, Ont., who while driving the first engine of a double header which left the track was precipitated under the wheels of the second engine; to a car repairer at Toronto, Ont., who was working under a freight car, when the train was moved, and he was crushed between two cars; to a brakeman at Sandon, B.C., who was killed by falling from an engine under the wheels of a box car attached to same; to a brakeman at Slocan, B.C., who while setting brakes fell from train and was killed; to a yardman at Winnipeg, Man., who was fatally injured by being struck by a snow plow; to a sectionman at Bury, Ont., who was run over by a train; to a sectionman at Toronto, Ont., who was killed by being struck by an engine while shovelling snow; to a sectionman who was crushed between cars while shunting; to a construction labourer at Swinton, B.C., who was killed in a collision between a working and a freight train; to a construction foreman at Keewatin, Ont., who was fatally injured by the accidental explosion of a missed blast. A construction labourer was killed at Oak Lake, Man., by being struck by a snowplough. Of the non-fatal injuries sixteen were the result of collisions or run-offs, ten of the sixteen occurring to construction labourers at Swinton, B.C., eight happened to employees on snowplows; sixteen occurred while shunting or coupling cars; seven by falls from trains; two of the injuries were burns received by hot blasts from the engine; two construction labourers were injured by a premature explosion of dynamite; two by being crushed by the engine, and one by a fall of freight.

General transport.—Eighteen accidents occurred in these branches, of which only one was fatal, that to an electric street railway employee at Montreal, Que., who

while attempting to cross the track in front of an approaching car was struck by same and died shortly afterwards. Eleven of the non-fatal accidents happened to teamsters and draymen through the running away of horses, falling off wagons, or breaking down of vehicles. A longshoreman at St. John, N.B., was injured by being struck by a sling of deals, and in the same city a mate on a tug fell from a wharf to the rocks 20 feet below, receiving severe injuries. A messenger boy in Toronto fell from his bicycle, injuring himself seriously; an elevator runner at Niagara Falls, Ont., had his head badly burned while thawing pipes; and a motorman in Montreal, Que., was hurt by his car coming into collision with another street car.

Miscellaneous.—There were two fatal and nineteen other accidents reported in the miscellaneous trades. The fatal accidents were as follows: A quarryman at Winnipeg, Man., had his skull crushed by a heavy piece of stone which was being raised by a derrick, and a cotton mill employee at Cornwall, Ont., was killed by becoming entangled in a rope drive in the power-room. Of the non-fatal accidents nine happened to civic firemen in the discharge of their duties, three being thrown from their reels on the way to fires, and six by the falling of burning buildings. The fireman of a paper factory at Sherbrooke, Que., lost his right hand in a wood-stripping machine; a laundry worker at Chatham, Ont., had his hand caught in a steam mangle, and his left arm being drawn in was so mutilated as to necessitate amputation; a quarryman lost his eyes through a premature blast; the roof of a hangar in Quebec, Que., collapsed through weight of snow, crushing a currier; four workmen at Mispic, N.B., Cornwall, Marlbank and Deseronto, Ont., respectively, were injured by being caught in machinery, and a rubber factory employee at Bowmanville, Ont., had his face and head burned by the explosion of crude rubber composition.

Unskilled labour.—In this branch the record shows four fatalities and seven other

accidents. A labourer at Vancouver, B.C., while trying to board a moving street car slipped and was run over; in the same city a labourer driving with another person was run over by a railway train while attempting to cross the track. At Quebec, Que., while cleaning snow from the roof of a house a labourer fell to the street and was killed; and at Montreal, Que., a labourer met death by being crushed under a pile of coal. Of the other casualties two were caused by street railway cars; three happened while the workmen were removing snow from roofs; another workman was struck by a stone from a blast; another was injured by the glancing of a pickaxe.

Notes.

According to the annual report for 1903 of the Department of Marine and Fisheries, Canada, which was presented to parliament during March, the total number of casualties to British and Canadian sea-going vessels reported to the department as having occurred in Canadian waters, and to Canadian sea-going vessels in waters other than those of Canada, was 237 for the year ended June 30, representing a tonnage of 162,297 and a loss in vessels and cargoes of \$409,991. The number of lives lost in connection with these casualties was 32. The number of casualties to inland vessels were stated to be, as far as reported, slight and unimportant.

The report of the Minister of Colonization and Public Works of the province of Quebec for the year ending June 30, containing the reports of the inspectors and inspectresses of factories for that province, was received during March. The total number of industrial accidents recorded for the year reaches 497, the highest in the history of the province. In the western division of Montreal the total number reached 227, in the eastern about 200, in the Quebec division 54, and in the Eastern Townships division, 19. The increase is in part accounted for by the considerable additions to the number of industrial estab-

lishments, especially in the Montreal divisions, together with the fact that a larger proportion of slight accidents are now reported to the inspector.

In the report of the Department of Mines, Nova Scotia, for the year ended September, 1903, received at the department in March, the number of accidents in coal mines for the past year is placed at 27, to which must be added 27 which occurred in the mines in northern Cape Breton, and 50 which occurred in the southern district of Cape Breton.

UNIONS FORMED DURING THE MONTH OF MARCH, 1904.

The department has received notice of the following organizations having been formed during the month of March, 1904.

Nova Scotia:

River Hebert—Provincial Workmen's Association.

Quebec:

Hull—Carpenters and Joiners (International).

Montreal—Teamsters.

St. Hyacinthe—Tinsmiths and Roofers.

Sherbrooke—Painters.

Ontario:

Hamilton—Plasterers.

Niagara Falls—Rock Drillers and Helpers.

Ottawa—Painters (National).

Port Colborne—Rock Drillers and Helpers.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY POST OFFICE DEPARTMENT, MARCH, 1904.

During the month of March, the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system and securing payment to the workingmen and women of fair wages and

the performance of the work under proper sanitary conditions:—

| Nature of Order. | Amount of Order. | |
|--|------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other hand stamps, also type and brass crown seals. | 259 | 16 |
| Making and repairing rubber dating and other hand stamps and type. | 83 | 05 |
| Supplying stamping material, inclusive of making and repairing pads, also post, marking and cancelling ink. | 508 | 46 |
| Repairing post office scales. | 15 | 00 |
| Supplying mail bags. | 2,016 | 95 |
| Repairing mail bags. | 905 | 50 |
| Repairing mail locks and supplying mail bags and fittings. | 134 | 65 |
| Repairing boxes, portable letter boxes and repairing railway mail clerks' tin travelling boxes. | 9 | 00 |
| Miscellaneous orders for making and repairing postal stores. | 51 | 00 |
| Making up and supplying articles of official uniform. | 75 | 00 |

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the number of the 'Canadian Patent Office Record' issued by the Department of Agriculture during the month of March.

In the month of December there were issued in Canada 563 patents. A classification of the principal ones shows that 39 patents related to agriculture, 39 were for industrial machines, 26 for mechanical processes, and 10 for chemical processes. There were also 12 patents for various parts of machines, and 15 for steam engines. There were 18 electrical inventions, 11 relating to metal working and mining, 34 relating to means of locomotion, 21 to the building trades. There were 17 patents for tools, 12 for systems of heating, 13 for lighting, 4 were office utilities, and there were 4 new articles of clothing.

Among the agricultural inventions were a seed drill, a combination seed planter and fertilizer distributor, a grain shocking machine and 3 ploughs.

The industrial machines included two for paper making, 3 for sewing boots and shoes, 2 for treating tobacco leaves, 2

moulding machines, 4 brickmaking, 1 bag-making, and 1 peat harvesting machine.

Mechanical and Chemical Processes.

A noticeable feature among the new industrial processes is the increasing use of electricity in the treatment and conversion of substances. The following new uses of electrolysis may be noted:—

Among the December patents there is one for an apparatus for improving, bleaching or conditioning wheat, flour or other cereals, which comprises a blower, an ozoniser and an electrolytic tank. The material is subjected to a mixture of ozone and bleaching gas generated by electrolysis, and a solution of common salt. There are also improved electrolytic processes for the manufacture of white lead and of zinc white.

By another process several products are obtained from petroleum by treating the petroleum distillates with a mixture of nitric and sulphuric acid. By this means reddish brown substances with elastic properties are obtained, which produce explosives when mixed with oxidizing media, brown or black colouring matter, when dissolved in strong caustic alkali lye and fused with alkaline sulphides, celluloid-like substances when worked up with gun cotton, and varnishes when mixed with solvents.

Inventions Relating to Locomotion.

Among the inventions relating to locomotion, there were eight patents for submarine boats. The majority, however, were connected with railways, such as parts of locomotive engines and cars, tracks, &c. There were six patents for rail joints, and three for railway switches. Of these one is operated automatically by the train and another is electric. Other patents are for a railway tie, a track-laying machine, a street car fender, an air brake and other railway brakes.

Metal Working and Mining Industries.

The following inventions relate to the mining and metal-working industries:—

A process of separating ore pulp consists in subjecting it to the action of a number of magnets in turn, which are of different powers. The ore pulp is passed under these magnets in a thin stream, and the particles most susceptible to magnetic action are removed by the first magnet, which is the weakest, and other particles are removed by the other magnets. There is a patent for a mechanism for moving ingots, blooms and billets in rolling mills, a copper pig casting machine, a riveting machine, and an automatic device for cutting or separating a flowing stream of molten material.

Inventions Relating to Building Trades.

Among the inventions relating to the building trades there are four brickmaking machines, and three materials for roofs, of which one consists of a specially shaped tile, another is composed of cement gravel and felt, and the third is made up of a compound of coal tar, turpentine asphaltum, gasoline, asbestos fibre, mica and plumbago. There is a machine for hanging wall paper, parts of which comprise a roller, around which is wound and attached the paper, and underneath it a brush, which presses the paper on the wall as it is unwound.

Miscellaneous Inventions.

The following are a few other interesting inventions of some industrial importance, which have not been enumerated above. The increasing use of India rubber in articles of manufacture has led to a search for a substitute for this product. A process designed to meet this end has been patented. It consists in boiling coal tar, and mixing it in this state with boric acid dissolved in alcohol in the proportion of 100 parts of tar to 25 parts of boric acid. The vapour generated are then burnt until a green flame is produced, and then the mixture is kept heated to a temperature of 60 degrees C., and submitted to the action of oxygen.

For the prevention of explosions of coal and other dust, which are a frequent cause

of accidents, there is a patent for a liquid composed of water and an oily substance rendered soluble in water.

The increasing importance of acetylene as an illuminant is indicated in the fact

that four patents were issued in December for acetylene gas generators, being nearly a third of all the patents connected with lighting, which include also an arc lamp, a gas lamp, and a self-lighting mantle for incandescent lamps.

GOVERNMENT CONTRACTS FOR THE MONTH OF MARCH.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties during the month of February together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule in each contract :—

Wharf and Road Approach—Grand Bend, Lambton County, Ont.

26 March 1904, \$21,388.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rates of Wages. | | |
|--|-------------------------------|----------------------|------|
| | Not less than the following:— | | |
| Contractor's foreman | \$4.00 | per day of 10 hours. | |
| Chief carpenter.. . . . | 1.75 | " | 10 " |
| Carpenters.. . . . | 1.50 | " | 10 " |
| Carpenters' helpers.. . . . | 1.25 | " | 10 " |
| Blacksmiths.. . . . | 1.75 | " | 10 " |
| Blacksmiths' helpers.. . . . | 1.25 | " | 10 " |
| Ordinary masons for embankment.. . . . | 3.75 | " | 10 " |
| Ordinary labourers.. . . . | 1.25 | " | 10 " |
| Driver with one horse and cart | 2.25 | " | 10 " |
| Driver with two horses and wagon.. . . . | 3.00 | " | 10 " |
| Driver with one horse.. . . . | 2.25 | " | 10 " |
| Driver with two horses.. . . . | 3.00 | " | 10 " |
| Dredge captain.. . . . | 3.00 | " | 10 " |
| " engineer.. . . . | 3.00 | " | 10 " |
| " fireman.. . . . | 1.75 | " | 10 " |
| " dack-hands.. . . . | 1.50 | " | 10 " |
| " cranemen.. . . . | 1.75 | " | 10 " |
| " scowman.. . . . | 1.50 | " | 10 " |
| Tug captain.. . . . | 2.50 | " | 10 " |
| " engineer.. . . . | 3.00 | " | 10 " |
| " fireman | 1.75 | " | 10 " |
| " sailors.. . . . | 1.50 | " | 10 " |

Erratum.—In the list of schedules presented in the March number of the *Gazette* the headings of the schedule governing the construction of an armoury at Cobourg, Ont., the contract of which was let on February 24, and of a schedule governing certain alterations and additions to the post office at Sydney, C.B., the contract for which was let on February 27, were accidentally transposed. This correction should be noted in making reference to the schedules in question.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during March, 1904 :—

DOMINION REPORTS.

Dominion Lands, Mines and Forests.

Annual Report of the Department of the Interior for the year 1902-1903, Ottawa, King's Printer, 1904. Pages, 629.

A large portion of the report of the Department of the Interior deals with the immigration into Canada during the year ending on June 30, 1903. Owing to the importance of this subject, it is treated in a special article in the present number of the *Gazette*. The other parts of the volume contain reports of the Dominion Lands agents and officers, Dominion Lands surveyors, registrars of the North-west Territories, the Superintendent of Mines, and the Superintendent of Forestry. There are also brief reports on the territory of Keewatin and the Rocky Mountains Park.

The gross revenue received by the department from all sources during the year 1902-1903 amounted to \$2,244,062.21, which was an increase of a little more than \$700,000 over the previous year. The chief increases were \$263,126.03 in timber dues, and \$175,984.65 in homestead fees. In Dominion lands revenue alone there was a net increase of \$467,614.88. The total land sales of railway companies having government land grants and of the Hudson's Bay Company amounted to 4,229,011 acres, with a value of \$14,651,757. In the previous year there were sold 2,201,795 acres, having a value of \$7,746,958.

The large influx of settlers stimulated the lumbering industry in Manitoba and the North-west Territories. In Manitoba the output of lumber manufactured under government license was 33,759,853 feet B.M., an increase of 9,468,984 feet over the previous year. In the North-west Territories the output increased from 16,418,160 feet in 1901-02 to 20,573,993 feet in 1902-03. There were 75 saw-mills operating under govern-

ment license in Manitoba, the North-west Territories and British Columbia, at which there were manufactured 85,613,262 feet B.M. of lumber. Four hundred and fifty-eight licenses were issued to cut timber, covering a total area of 6,613.32 square miles.

The gold production in the Yukon Territory for the year ending June 30, 1903, amounted to \$12,113,015.34, as compared with \$9,566,340.52 in the previous year. The value of gold produced there last year was greater than in any other year, the next best year having been in 1899-1900, when the production amounted to \$9,809,464.64. The large output of last year is attributed to an unusually rainy season, owing to the fact that a large amount of the pay-dirt is removed by hydraulic methods. It is stated that there are about 3,500 acres of land in the Yukon Territory under cultivation, on which all kinds of vegetables are grown. Oats have also ripened and strawberries were successfully cultivated.

Canadian Trade.

Report of the Department of Trade and Commerce for the fiscal year ended June 30, 1903. Ottawa, King's Printer, 1904. Pages, 1,008. Price, 60 cents.

The report of the Department of Trade and Commerce for the year ended June 30, 1903, is divided into two parts, dealing respectively with Canadian and with foreign trade. There was an aggregate gain of over \$43,000,000 in the trade of Canada compared with the previous year, the imports having grown from \$212,270,158 to \$241,214,961, and the exports from \$211,640,286 to \$225,849,724. An unrevised statement is given of Canadian trade for the six months ending December 31, 1903, which shows that for that period the total imports amounted to \$124,674,540, and the exports to \$133,286,478, making a total trade of \$257,961,018, an increase of nearly \$9,000,000 compared with the latter half of 1902. The exports to other parts of the British empire for these six months, compared with the corresponding period of

1902, show a decrease from \$86,294,167 to \$85,451,086, and the exports to foreign countries, while greater than in 1902, were less in the corresponding period of 1901 by about \$1,100,000. This is accounted for by the lateness of the western harvest, which prevented the marketing of the usual quantity of grain before the close of navigation.

Taking the Canadian exports for the year ended June 30, 1903, by classes, the value of minerals exported amounted to \$31,235,165; fisheries to \$11,800,184; produce of the forest, \$36,431,114; animals and their products, \$70,466,619; agricultural products, \$51,572,889, manufactures, \$22,880,176, and miscellaneous produce, \$817,152. These sums are made up of home produce to the value of \$214,401,674, and foreign produce to the value of \$10,828,087. With regard to the countries to which the home produce was sent, exports to Great Britain amounted to \$125,199,980, compared with \$109,347,345 in 1902; to the United States they amounted to \$67,766,367, compared with \$66,567,784 in 1902, and to these countries there were exported \$21,435,327 worth of merchandise, compared with \$20,104,634 in the previous year.

The value of imports from Great Britain for the year ended June 30, 1903, was \$58,793,038, compared with \$49,022,726 in 1902. The imports from the United States for these two years were, respectively, to the value of \$128,790,237 and \$114,744,696.

It is stated that there are good openings for several lines of Canadian goods in South Africa and Australasia, but that Canadian manufacturers have been so fully occupied in supplying the demands of the home market, that they have not been able to supply outside customers.

Agriculture in Canada.

Report of the Minister of Agriculture for the Dominion of Canada for the year ended October 31, 1903. Ottawa, King's Printer, 1904. Pages, 252. Price, 15 cents.

In the report of the Minister of Agriculture for 1903 special attention is drawn to the prospects of trade with Japan opened

out by the exhibition at Osaka, Japan, last year. Statistics are given of the exports of the principal Canadian farm products from 1896 to 1903. Their value increased from \$39,659,686 to \$99,420,195 a year in that period. The total exports of Canadian agricultural and farm products in these years amounted to \$50,591,002 and \$114,441,863. It is stated that the increase in the production of these products has been much larger owing to the growth of the home consumption, and that the cause of this great development is not so much due to the extension of the areas devoted to agriculture as it is to improved methods of farming. Cheese factories have increased from 1,565 in 1890 to 2,398 in 1900, and creameries from 170 to 629, in addition to which 554 combined cheese and butter factories were in existence in 1900. Exports of butter have grown from 27,855,978 lbs. in 1902, to 34,128,944 in 1903, and for the same years the exports of cheese were 200,946,401 lbs. and 229,099,925 lbs.

In the season of 1903 there were 172 sailings of 37 steamers from Montreal having cold storage accommodation, and 61 sailings of steamers with cooled air chambers. Canadian apples shipped in cold storage easily took the first place in the British markets.

Important work was carried on during the year by the experimental farms. Over 40,000 samples of seed were distributed free. Excellent results were obtained in the production of earlier maturing varieties of cereals of high quality, which may extend the area of wheat growing, and satisfactory progress was made in the cross-breeding of hardy apples for the North-west districts.

Public Accounts.

Public Accounts for the fiscal year ended June 30, 1903. Ottawa, King's Printer. Pages, 214. Price, 15 cents.

In the blue-book dealing with the public accounts of Canada for the last fiscal year it is stated that the net debt of the Dominion on June 30, 1903, was \$261,606,988.87, a reduction from the previous year of

\$10,222,100.75. Of this reduction the sum of \$3,305,450 was due to a readjustment of accounts between the Dominion and the provinces of Ontario and Quebec. The average rate of interest paid on the gross debt was \$3.02 as compared with \$3.09 in the previous year, and the net rate decreased from \$2.57 to \$2.47. Among the items of expenditure, there were railway subsidies to the amount of \$1,463,222.34, and bounties on iron and steel amounting to \$1,408,252.60. The total receipts for the year were \$66,035,068.93, and the expenditure, \$51,691,902.76. Among the receipts the customs and excise taxes produced respectively \$37,001,726.90 and \$12,013,779, Dominion lands, \$1,695,591.63, and fisheries, \$78,635.82. Dues for the Sick Mariners' Fund were collected to the amount of \$64,851.55, and the steamboat inspection dues amounted to \$28,888.09. The fisheries revenue, derived from licenses, sales, fines, &c., came to \$78,635.82, of which the sum of \$43,015.62 came from British Columbia. A revenue of \$39,636.40 was derived from the penitentiaries, and \$59,848.09 from fines, forfeitures, &c., excluding those relating to fisheries.

Mineral Production of Canada.

Geological Survey of Canada. Section of Mines. Summary of the Mineral Production of Canada for 1903. Ottawa, King's Printer, 1904. Pages, 11.

The total value of the mineral production of Canada in 1903 is estimated at \$63,226,510, made up of \$33,707,403 for metallic and \$29,219,107 for non-metallic products. An allowance of \$300,000 is made for the value of mineral products not returned. There is a decrease in the grand total of production of a little more than one per cent, compared with the figures for 1902. There was a decrease of over \$2,500,000 in the gold output of the Yukon Territory, and a decrease of over a million in the values of pig iron, silver, lead and nickel. Increases in the production of iron ore, copper and zinc aggregated nearly \$1,500,000. There was an enlarged production of coal and coke, limestone, mica, salt, cement, and some clay products, amounting altogether to nearly \$2,000,000, of which \$1,600,000 was attributed

to the output of coal and coke. There were decreases, aggregating about \$500,000 in asbestos, natural gas, petroleum and a few other substances. The value of the total mineral products of Canada, for 1903, per head of population, was \$11.29, as compared with \$2.23 in 1886, the first year for which these figures were obtained.

Production of Asbestos.

Geological Survey of Canada. Mineral Resources of Canada. Bulletin on Asbestos. By R. W. Ellis, LL.D., F.R.C.S. Ottawa, King's Printer, 1903. Pages, 28.

A bulletin on asbestos recently issued by the Geological Survey of Canada gives much information with regard to the localities where this mineral is found in Canada, the amount of its production in the past few years, its value, and the present conditions of the producing mines. Asbestos is mined in seven districts of Quebec and in two places in Ontario. The production has steadily increased from 380 tons in 1880 to 30,219 in 1902, the value of the amount produced in these years being \$24,700 and \$1,126,688. The price per ton, however, in that period has declined from \$65 to \$37.28. In 1896 the manufacture of asbestic was commenced. This is a product specially adapted for fine plaster for walls and interiors of buildings. The production of asbestic has increased from 1,358 tons, with the average value of \$5 per ton in 1896, to 10,197 tons in 1902, having an average value of \$2.12 per ton.

Canadian Merchant Marine.

Thirty-sixth Annual Report of the Department of Marine and Fisheries, 1903, Marine. Ottawa, King's Printer, 1904. Pages, 242.

During the year ending June 30, 1903, the expenditure of the Department of Marine and Fisheries for maintenance of lights and coast service is stated in the annual report of the department to have amounted to \$559,382.53, and the sum of \$399,487.73 was spent for construction, showing an increase of \$262,782.24 over the previous year in these two branches. There were 754 light stations, lightships and fog-alarm stations in the Dominion on June 30, 1903, with 963 lights, 94 steam whistles,

fog-horns, bells and guns, and 751 light-keepers, engineers of fog-alarms and masters of lightships.

The Department of Marine and Fisheries maintains marine hospitals in the various maritime provinces, and, at the seaports where such hospitals have not been established, sick and disabled seamen are placed in the general hospitals there, and the cost of their maintenance is paid out of the revenue of the department. For the purpose of supporting the marine hospitals dues of two cents per ton register are levied on all vessels arriving in any port in the provinces of Quebec, Nova Scotia, New Brunswick, Prince Edward Island and British Columbia. The receipts from these dues for the past fiscal year amounted to \$64,851.55, and the expenditure on sick and disabled seamen was \$48,151.48.

An unsuccessful attempt was made to keep up winter communication between Summerside, P.E.I., and Cape Tormentine, N.B. The trips of the steamer employed were kept up until January 10, 1903, but a few days later the ship was caught in the ice and was not released until March 18.

The total number of casualties to British and Canadian sea-going vessels in Canadian waters, and Canadian vessels in other waters, reported to the department during the year was 237, representing a tonnage of 162,297 tons register, and the loss to vessels and cargoes, as far as ascertained, was \$409,991. Casualties to inland vessels were slight and unimportant. Ten casualties in the River and Gulf of St. Lawrence were investigated, for which the masters were responsible for four, pilots for three, and three were due to the perils of navigation.

Statistics are given in the report of the live stock shipments to Europe for the year 1903 from the various ports. From Montreal there were shipped 147,201 cattle and 61,017 sheep; from St. John, N.B., 37,453 cattle, 19,310 sheep and 115 horses; from Halifax, 3,856 cattle, 426 sheep and 17 horses, and from Charlottetown, 1,928 sheep.

The recent invention of submarine signalling which has been tested in the United States is being investigated by the department, as it is claimed to be more effective than other methods in cases of wind or fog.

Indian Affairs.

Report of the Department of Indian Affairs for the year ended June 30, 1903. Ottawa, King's Printer, 1904. Pages, 108. Price, 45 cents.

The population of the Indians in Canada in 1903 is given as 108,233, an increase of 121 over 1902. During the year there were 2,311 births and 2,143 deaths. The difference between the increase in population and the number of births in excess of deaths is accounted for by migrations. The high death rate is due largely to tuberculosis and infantile diseases. The Indians have continued to make steady progress in their industrial conditions. The agricultural crops harvested by them in the whole Dominion increased by 159,871 bushels, and the area under cultivation by 4,560 acres. The cattle herds owned by them in the North-west Territories have been steadily increasing numerically, and their standard has greatly improved. The growth of the agricultural industry among the Indians of Quebec has been retarded by improved conditions in the labour market. The pursuits of hunting, trapping and fishing brought them approximately \$1,000,000. In Quebec they made from these occupations \$90,754, and in Ontario their earnings were \$75,414 by fishing and \$115,145 by hunting and trapping. Fish, fur and game were reported to be plentiful in Manitoba. In the Saskatchewan district muskrats were unusually plentiful, and farm operations were interfered with owing to the money to be made from their pelts. The following is a summary of their earnings from all sources:—

| | |
|----------------------------------|-------------|
| Value of farm produce.. . . . | \$1,094,492 |
| Fishing, hunting, &c.. . . . | 990,765 |
| Various minor industries.. . . . | 576,310 |
| Wages earned.. . . . | 1,278,294 |

In Manitoba and British Columbia the main employment of the Indians is with the fishing companies and salmon canneries, lumbering, picking hops and fruits,

freighting and packing. In the North-west Territories they are limited to selling hay and firewood, freighting and working as farm labourers. The minor industries include the manufacture of mittens, moccasins, snow-shoes, barrels, boats, canoes, &c.

There was an increase of 9 in the number of schools among them, the number being 292, of which 224 were day schools, 45 boarding, and 23 industrial schools.

ONTARIO REPORTS.

Ontario Bureau of Labour.

Fourth Report of the Bureau of Labour of the Province of Ontario for the year ending December 31, 1903. Toronto, King's Printer, 1904. Pages, 215.

The fourth report of the Ontario Bureau of Labour for the year 1903 deals with the following subjects: Wage-earners statistics, business openings, directory of labour organizations, conciliation in trade disputes, strikes and lockouts, industrial statistics, legal decisions affecting labour, and Ontario labour laws. In order to obtain returns with regard to wage-earners, blank schedules were sent to trade organizations throughout the province, and information was thus secured with reference to the date of their formation, the work carried on by them, the wages and working hours of their members, the average number of days of idleness, and other important information with regard to them. Returns were received from 271 organizations in all, but many others were too incomplete to be of any use.

Reports were received from the various clerks of cities, towns and villages, with regard to business openings in their respective localities, and new industries which had been recently established.

Since the amendment to the Ontario Trade Disputes Act, which was passed in March, 1902, providing for conciliation in trades disputes, it is stated that it has been officially called into action in 23 cases, 12 times in 1902, and 11 in 1903. In addition to these, the secretary of the Bureau of Labour, who is conciliator under the Act, also acted as adviser in a number of other

cases in which disputes were averted or adjusted.

Industrial statistics were obtained by sending schedules to manufacturers, contractors and other employers throughout the province. Returns were received from 204 establishments. In these there were 13,505 employees in all. The aggregate number of days in operation was 59,768, and the gross value of the product was \$20,869,441. The amount of \$3,627,218 was paid in wages, giving an average annual earning of \$267.87, or a daily wage rate of \$1.22. The labour cost of production was 25 per cent, as against 21.69 in 1901, and 22.24 in 1902.

Among other subjects contained in this report are: Remarks from labour organizations with reference to general conditions of their trades, and suggested labour legislation and improvements in the administration of the law; a report of the annual convention of the Association of Officials of the Bureaus of Labour Statistics, held in 1901; a list of bureaus of labour statistics in different countries, and a number of other subjects relating to industrial conditions.

Crown Lands of Ontario.

Report of the Commissioner of Crown Lands of the Province of Ontario for the year 1903. Toronto, King's Printer, 1904. Pages, 88.

According to the report of the Commissioner of Crown Lands of Ontario for 1903, the following sales were made during that year: 94½ acres of clergy lands, to the value of \$80.25; ¾-acre of common school lands, valued at \$20; 100 acres of grammar school lands at \$100; 3,740¼ acres of university lands at \$1,891.37, and 80,466 acres of Crown lands at an aggregate value of \$55,569.25, sold for agricultural purposes, and 6,437 acres sold for mining purposes, for \$15,123.89. Collections on account of mining leases amounted to \$14,528.63, and the conversion of mining leases into patents produced \$14,528.63. There were leased for mining purposes 32,527 acres, at a rental of \$33,177.61. The total area of Crown lands disposed of was 123,995

acres, and the total collection on account of these lands was \$147,014.05. The volume of settlers in the newer parts of the province was satisfactory. Large numbers settled in the Temiscaming and Rainy River districts, and in the free grant districts. The towns of Port Arthur and Fort William are said to have a population approaching 12,000. There was an issue of 3,650 certificates for military grants, making a total of 10,250, including those issued in 1902.

The following statistics are given of the mining industry in Ontario during the year: The output of nickel was 6,998 tons, having a value at the works of \$2,499,068. The quantity of copper produced was 4,731 tons with a value in the ore or matte of \$641,726. The output of iron ore was 208,154 tons, valued at \$450,099, and the production of pig iron was 87,004 tons, worth \$1,491,696. Of the ore smelted, 48,092 tons were taken from Ontario mines, and 103,137 tons were imported from the United States. The amount of steel made was 15,229 tons, valued at \$304,580. The yield of gold was 10,383 ounces, worth \$188,936, and of silver 16,688 ounces, worth \$8,949.

The lumber trade was very prosperous, and the revenue collected from this source amounted to \$2,307,356.12. A sale was held of timber lands lying along the route of the Temiscaming and Northern Ontario Railway, which realized an average of \$4,461.38 per square mile. There has been a great increase in the stumpage value in the Rainy River district, due to the rapid settlement of the western prairies, which has opened up a market for sawn timber. At Rainy River town there are two large saw-mills capable of cutting 80,000,000 feet board measure per annum of sawn lumber. There are seven pulp companies in Northern Ontario, either in process of erecting mills or already engaged in the manufacture of paper.

Effective work was done by the Bureau of Colonization in obtaining farm labourers from England, for whom there was a great demand, owing to the movement to New

Ontario and the North-west in 1901 and 1902. An agent was sent to England in March and in December, who induced many farm labourers to emigrate to Ontario. In the winter of 1902-3 a bureau of farm labour was organized, and blank forms were distributed throughout the province, to be filled in and returned by farmers, giving particulars of the kind of help they required, and the number of men they wished to obtain.

Neglected and Dependent Children.

Eleventh Report of the Superintendent of Neglected and Dependent Children of Ontario for the year 1903. Toronto, King's Printer, 1904. Pages, 79.

In the report of the Superintendent of Neglected and Dependent Children, it is stated that 239 children were placed in foster homes during 1903. Since the establishment of this office in 1893, homes have been found for 2,030 children. There exist 27 Children's Aid Societies in the province, and a summary is given of the work performed by 24 of these societies. The demand for children for adoption exceeds the supply, and their treatment in foster homes is very satisfactory. About two thousand homes are under the supervision of official visitors. Owing to nearly all the children being placed in country districts, where temptations are fewer than in cities, there has been a marked improvement in their moral condition, although many were taken from debasing surroundings. Not one is known to be in prison at the present time, and only an average of three or four per cent have had to be sent to the Industrial Schools for special training.

A summary is given of some recent legislation relating to children passed by the Ontario government. The chief features of these laws are the introduction of the probation system in dealing with children charged with any offence, prohibiting their detention in jails, and the provision for the appointment of 'children's committees' for each electoral district in the province to attend to the needs of neglected or dependent children.

Department of Public Works.

Report of the Commissioner of Public Works for the Province of Ontario for the year ending December 31, 1903. Toronto, King's Printer, 1904. Pages, 67.

The report of the Commissioner of Public Works for Ontario, for the year 1903, contains a detailed account of the work performed on public buildings, repairs and improvement made to bridges, locks, dams and other works, a report on railway extensions of the year, a list of the colonization and mining roads built, and financial statements relating to this department.

The provincial architect states that, notwithstanding the numerous labour disputes, most of the public works for which appropriations had been voted, were completed during 1903, and others were well advanced, but in a few cases the works were deferred on account of the impossibility of obtaining reasonable tenders.

According to this report, the railways in Ontario have a total length of 7,176.64 miles, of which 1,447.50 were completed before confederation, and 5,729.14 after. At present there are 119 miles of railway under construction.

The expenditure on public works for the year was \$695,199.43, of which the sum of

\$454,785.52 was spent by the Department of Public Works, and \$240,413.91 by inspectors, &c.

Public Accounts of Ontario.

Public Accounts of the Province of Ontario for the year ended December 31, 1903. Toronto, King's Printer, 1904. Pages, 267.

The total receipts of the province for 1903 amounted to \$5,466,653.13, and the expenditure to \$4,888,982.57. Among the sources of revenue were woods and forests, which produced \$2,307,356.12; the succession duty, which produced \$386,948.24; licenses, which brought \$371,671.27; Crown lands, from which were obtained \$80,168.90. The chief items of expenditure were \$945,020.49 for education, \$922,037.20 for the maintenance of public institutions, \$378,846.02 for agriculture, and \$223,661.97 for hospitals and charities.

Liquor Licenses in Ontario.

Report of the Inspection of Liquor Licenses for the year 1903. Toronto, King's Printer, 1904. Pages, 116.

In the twenty-eighth annual report on the inspection of liquor licenses in Ontario, the following summary is given, showing the number of licenses issued and in force during the past three license years :—

| Years. | Licenses. | | | | | | | Extensions, transfers and removals of licenses. | | | |
|-------------|-----------|----------------|-------------|----------------|-------|------------|--------|---|-----|----|-----|
| | Tavern. | | | | Shop. | Wholesale. | Total. | | | | |
| | Yearly. | | Six months. | | | | | | | | |
| | Ordinary. | Beer and wine. | Ordinary. | Beer and wine. | | | | | | | |
| 1900-1..... | 2,582 | 39 | 46 | 14 | 303 | 24 | 3,008 | 20 | 450 | 11 | 481 |
| 1901-2..... | 2,577 | 36 | 57 | 10 | 308 | 26 | 3,014 | 15 | 278 | 13 | 306 |
| 1902-3..... | 2,593 | 35 | 53 | 13 | 307 | 22 | 3,023 | 23 | 491 | 18 | 532 |

The provincial revenue derived from this source was for

| | |
|------------------|--------------|
| 1900-1.. | \$304,676 60 |
| 1901-2.. | 301,369 17 |
| 1902-3.. | 304,789 59 |

For the same years the amounts paid to municipalites were respectively \$250,482.13, \$245,477.65 and \$250,229.76. The following amounts, in addition, were imposed by municipal by-laws in excess of statutory duties

for the same years, \$144,289.12, \$145,574.57, and \$147,935.47.

Game Animals in Ontario.

Report of the Ontario Game Commission for the year 1903. Toronto, King's Printer, 1904. Pages, 23.

The Ontario game commissioners report that in 1903, 259 non-resident licenses, 5,707 deer hunting and 153 moose hunting

licenses were issued. The receipts of this department were \$19,505.82, and the expenditure \$9,308.10, leaving a balance of \$10,197.72, nearly \$3,000 in excess of the previous year. Of the fur-bearing animals a marked increase in the number of beaver is reported, but there was no increase in otter. It is stated that there is a general desire among those engaged in the fur business that mink should be protected, as not more than 10 per cent of the skins obtained in the province are first class. With regard to the game birds, ducks are reported to have been very numerous, but there was a scarcity of grouse and quail, and woodcock are becoming fewer each succeeding season.

The Deaf and Dumb of Ontario.

Thirty-third Annual Report upon the Ontario Institution for the Education of the Deaf and Dumb, being for the year ending September 30, 1903. Toronto, King's Printer, 1903. Pages, 37.

The thirty-third annual report on the institution for the education of the deaf and dumb contains a résumé of the history of this institution and a description of the methods in use for the education of deaf mutes. During the session of 1902-03 there was an attendance of 283 pupils, of whom 140 were boys and 143 girls. Since the opening of the institution, it is stated that 1,294 deaf and dumb children have been educated there, and have been able to earn a livelihood for themselves, many of them having done well financially. The boys, in addition to their literary work, are taught printing, carpentry, moulding and drawing, shoemaking, barbering, and baking. The girls are instructed in domestic work, cooking, housekeeping, sewing, dress-making, and fancy work, besides the regular course in literary work.

Lunatic and Idiot Asylums.

Thirty-sixth Annual Report of the Inspector of Prisons and Public Charities upon the Lunatic and Idiot Asylums of the Province of Ontario, being for the year ending September 30, 1903. Toronto, King's Printer, 1904. Pages, 219.

The total number of inmates in the asylums of Ontario at the end of 1902 was 5,372, and at the end of 1903, 5,458. In September, 1902, the total number of insane

officially known to the department was 5,394, and of idiots, 659. In September, 1903, the insane numbered 5,546, and idiots, 690, showing an increase of 152 lunatics and 31 idiots. There were 61 more applications every month than could be immediately provided for at the asylums. The percentage of recoveries of insane patients was 28.67 on admissions, 5.06 on the average number resident, and 71.16 on total discharges. This is based on returns for ten years from 1894 to 1903.

Education of the Blind.

Thirty-second Annual Report upon the Ontario Institution for the Education of the Blind, Brantford, being for the year ending September 30, 1903. Toronto, King's Printer, 1904. Pages, 27.

In the report on the institution for the education of the blind, at Brantford, it is stated that the school was re-opened on September 16, 1903, with an attendance of 103 pupils, being four less than at the opening in the previous year. The total attendance for the year 1902-03 was 131, being 67 males and 64 females. Three pupils graduated in June, having completed their courses one in piano tuning, one in piano tuning, literary and music classes, and the third in music, literary and industrial subjects, receiving an artists' diploma, A.T.C.M., in music. The need is pointed out for a workshop in some populous centre where blind adults might be instructed in some trade, and where graduates of the institution might be temporarily employed. The favourite course of instruction at the institution is piano tuning, and there are at the present time 22 pupils in the tuning class. Basket-making is not as popular as in former years, owing to the demand for tuners in the piano factories at the present time inducing all the blind students who are able to do so to take up this trade in preference.

QUEBEC REPORT.

Industrial and Labour Conditions.

Report of the Minister of Colonization and Public Works of the Province of Quebec for the year ending June 30, 1903. Quebec, King's Printer. Pages, 219.

The report of the Minister of Colonization and Public Works of the province of Quebec for 1903, contains reports on the work of this department with regard to colonization and immigration, inspection of industrial establishments, and the enforcement of the Quebec Trades Disputes Act during the year, as well as reports on various other subjects. A summary of the reports on immigration and colonization is given in the monthly article on the Immigration and Colonization Movement on another page of the present number of the *Gazette*.

The report of the Chief Inspector of Industrial Establishments and Public Buildings is divided into the following parts: Western Division—enforcement of the law, age of children, duration of work, overtime (girls', children's and women's work), accidents to workmen—safety measures, boiler inspection, law relating to public buildings, and report of the Inspectors' Congress, various desiderata. In connection with the enforcement of the law relating to industrial establishments, attention is drawn to the general neglect of the heads of new factories to comply with the law requiring them to transmit to the inspector a notice in writing giving their names, addresses, names of their establishments and their location, the kind of industry exploited, and the quantity of motive power employed.

The amendment to the law fixing the age for boys in factories at 13 years came into force without any objection, and the change has already done much good, especially in textile factories, where formerly many boys of 11 and 12 were to be met with.

The ten hour day is said to be nearly general in workshops and factories employing men only, but many mixed establishments work only 58 or 59 hours per week. A certain number of large saw-mills are kept running day and night, with two squads, between May and November. Nineteen permits for overtime were granted in the western division of the district of Mont-real. In the case of women, girls and

children, work may only be prolonged to nine o'clock at night for a period of not more than six weeks.

A total of 497 industrial accidents were reported for the province of Quebec during the year, which is a greater number than for any previous year. It is stated also that accidents are not reported by employers as strictly as they should be.

A change has been made in the system of boiler inspection whereby a particular district is allotted to each inspector, which must be fully covered each year. Inspections were made of 1,383 boilers during the year. A recommendation is made for the inspection of the boilers of butter and cheese factories, which are at present exempt.

With regard to the sanitary conditions in factories, a great improvement in recent years is noted, especially in the case of large factories and those of recent construction. Mechanical ventilation is being rapidly introduced, and dry polishing by special machines which must necessarily be equipped with suction pipes to carry off the dust, is now in general use. In box, door and window sash factories, the dust, with the cuttings and shavings, is carried off mechanically to feed the boilers, and there is a similar arrangement in the large shoe factories. An improvement is reported with regard to sweatshops, partly because more ready-made clothing is made up in large factories than formerly.

The Clerk of the Council of Conciliation and Arbitration, in his report on the enforcement of the Quebec Disputes Act during the year ending June 30, 1903, states that it was instrumental in preventing and settling a number of disputes. A threatened strike in the boot and shoe factory of Messrs. J. B. Blouin & Fils, Lévis, was averted in October, 1902, through the mediation of a council of conciliation appointed under the Act. In 1903, the Act was amended by the addition of an article empowering the Clerk of Councils of Conciliation and Arbitration, called the registrar,

to proceed to any locality where a dispute exists, without waiting for a request in writing to be made to him, and to endeavour to induce the parties concerned to settle their differences between themselves, or to refer them to a council of conciliation. This amendment came into force on April 25, 1903, and the registrar forthwith proceeded to Montreal in order to try to promote settlements of the strikes of longshoremen and carpenters and joiners which were then in progress. The registrar claims that his intervention contributed to the final settlement of these two strikes, as his suggestions were carried out in both cases. In a subsequent report an account is given of attempts to settle a strike of roofers in Montreal, which occurred on September 1. Though unsuccessful, the registrar was informed by both parties that if they had known of the existence of a conciliation law the dispute would probably not have taken place.

The following recommendations are made in this report. That a bureau of labour and labour statistics be established in Quebec; that the Clerk of Councils of Conciliation be made a regular officer of the civil service, in order that he may have more time at his disposal for the work, and that additional copies of the law be printed for distribution among masters and men, in order that its provisions may be more widely known.

NOVA SCOTIA REPORT

Mineral Production of Nova Scotia.

Report of the Department of Mines, Nova Scotia, for the year ending September 30, 1903. Halifax, King's Printer, 1904.

In the March number of the *Labour Gazette* a statement is given of the mineral production of Nova Scotia for the year ending September 30, 1903, which is embodied in the report of the Department of Mines. Compared with the previous year, there were decreases in the production of gold, iron ore, pig iron and coke. There was an increase of 882,378 tons of coal raised, and there were manufactured 180,434 tons of

steel ingots, none of which were produced in 1902.

The principal markets for coal were the province of Quebec, to which were sold, 1,403,916 tons; the United States, which purchased 968,832 tons, and New Brunswick, which purchased 376,722 tons. In Nova Scotia itself there were sold 1,605,477 tons.

This report contains a list of accidents which occurred at the mines during the year, a statement of the number and classes of men employed in each mine, descriptions of the various mines and metalliferous regions, a report on the prospects of deep gold mining in Nova Scotia, and other particulars relating to the mining industry of the province.

UNITED STATES REPORTS.

Industrial Statistics of Maryland.

Twelfth Annual Report of the Bureau of Statistics and Information of Maryland, 1903. State Printer, Baltimore, 1904. Pages, 331.

The Twelfth Annual Report of the Bureau of Statistics and Information of Maryland begins with the recommendation of the passage of a Bill for the settlement of trade disputes by mediation, voluntary arbitration and the investigation of their causes. A section on industrial conditions gives some average retail prices of food in Baltimore in 1903, and comparative tables of wages in the United States for a number of years back, taken from reports of Federal and State Labour Bureaus. Among other subjects treated in this report are strikes and lockouts in Maryland in 1903, labour organizations, sweatshop inspections, employment of children in mercantile establishments, and of women and children in factories, recent labour laws, and the decision of the Court of Appeals of Maryland in the sweatshops case. This legal decision is of great importance, as it affirms the constitutionality of an Act passed by the legislature of Maryland in 1902, to abolish the evils of sweatshops by compulsory inspection and by the enforcement of regulations against unsanitary conditions prevailing in them.

Condition of the Negro in Massachusetts.

Social and Industrial Condition of the Negro in Massachusetts. (From the Thirty-fourth Annual Report of the Massachusetts Bureau of Statistics of Labour, pp. 215-320.) State Printers, Boston, 1904.

A report on the condition of the Negro made by the Massachusetts Bureau of Statistics of Labour begins with an account of the legal and political status of the Negro since the earliest times. Statistics are given of the Negro population at the different census periods from 1790 to 1900, compared with the total population of the State. In the 110 years, the Negroes increased from 5,463 to 31,974, but the ratio between the two races remained about the same, the Negroes having been 1.44 per cent of the total population in 1790, and 1.14 in 1900. Statistics are given of the occupations of Negroes, their wages and salaries, their places of birth, number of mixed marriages, death rate, education, religion, and commitments for crimes, as well as statistics of various other subjects which serve to indicate their present social and industrial condition.

BRITISH REPORTS.

Workmen's Trains.

Return showing (1) the Number of Workmen's Trains running on all Railways within the Metropolitan Area; (2) the Distance run and the Fares Charged on each particular Train. London, Eyre & Spottiswoode, 1903. Pages, 90. Price, 9d.

The railways in England running between London and the suburbs are compelled by statute to issue workmen's tickets at reduced rates, good for a limited time each day, except Sundays and holidays. A return to the House of Commons gives particulars of each railway company having a suburban service as to the statutes governing workmen's trains, the prices of fares charged and the number issued in 1902, and the mileage and stations of each railway. There are in all 16 railway companies entering London, all but one of which run workmen's trains. Statistics are given for each line, but there is no general summary in the return, except with regard to the total number and mileage of the trains.

The Metropolitan line, which has the largest local passenger traffic, issued in 1902 6,228,008 workmen's return tickets, in addition to which, the Great Northern and Midland railways issued 7,106,172 tickets for points on the line of the Metropolitan Railway. The scale of fares is as follows: For a distance not exceeding 4 miles, 2d., between 4 and 7 miles, 3d., between 7 and 10 miles, 4d., between 10 and 13 miles, 5d., and between 13 and 16 miles, 6d. Similar rates prevail on the other railways.

Railway Accidents in Great Britain.

Returns of Accidents and Casualties as reported to the Board of Trade by the several Railway Companies in the United Kingdom during the nine months ending September 30, 1903. London, Eyre & Spottiswoode, 1904. Pages, 172. Price, 1s. 5d.

In the February number of the *Labour Gazette* a summary is given of a report on railway accidents in the United Kingdom for the first half of 1903. Similar returns have been published, covering the 9 months ending September 30, 1903. In this period the total number of persons killed was 877, and the injured numbered 5,057, being an increase respectively of 66 and 171 for the corresponding period of 1902. In the list of fatalities were 116 passengers, 347 railway servants, and 414 other persons, including 208 trespassers and 126 suicides. There were 53 people killed when passing over level crossings. Reports of inspectors and sub-inspectors of the Railway Department are given on accidents which had been inquired into, and numerous recommendations are made for the avoidance of similar accidents in future.

AUSTRALIAN REPORT.

West Australia Labour Bureau.

Sixth Annual Report of the Government Labour Bureau of West Australia for the year ended December 31, 1903.

In the Sixth Annual Report of the Superintendent of the Government Labour Bureau of West Australia, covering the year 1903, it is stated that the main features of this bureau are (1) to assist employers to secure employees, and (2) to furnish men and women, when out of employment, with free and reliable information as to the

character of the work to be had. The following statistics are given to indicate the work performed by the bureau during 1903. The number of individual men who applied for work was 4,283, a decrease of 411 from the previous year. There were 3,040 single men, 84 widowers, and 1,159 married men, representing 2,974 children, of whom 2,147 were dependent upon their parents. Work was found for 2,018 applicants, being 213 more than in 1902. In 1,657 cases work was supplied by private persons, an increase of 549 over the previous year. The number of applicants for work decreased steadily each month from 912 in January to 381 in December. The three chief classes of work-people seeking employment were general labourers, numbering 1,400, 423 bushmen and 276 farm hands. Work was found for 599 labourers, 402 bushmen and 271 farm hands. There were 178 men assisted by railway passes to employment from the central office at a cost of £134 18s. 4d., of which amount £35 18s. 8d. was refunded.

EUROPEAN REPORT.

Work of Labour Departments and Bureaus.

Die Fortschritte der amtlichen Arbeitssstatistik in den wichtigsten Staaten. Erster Teil.

Bearbeitet im Kaiserlichen Statistischen Amt, Abteilung für Arbeiterstatistik. Berlin, Earl Heymanns Verlag, 1904. Pages, 212.

The first volume of 'The Progress of Bureaus of Labour Statistics in the Most Important Countries,' which has just been published by the Royal Statistical Bureau of Germany, deals with the Labour Departments and Bureaus of the United States of America, Great Britain and Ireland, France, Belgium, Austria and Holland. The origin and development of these branches of the public service are described in each instance. This account is followed by a list of all the publications issued by the labour bureaus of these countries, with a brief summary of their contents. In the introductory chapter, it is observed that many other publications having reference to industrial questions have been issued by the various governments from time to time, in the nature of reports of royal and state commissions, parliamentary returns and reports of other departments, but no special mention is made of these publications, as they do not fall within the scope of the inquiry instituted by the Royal Statistical Bureau of Germany.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada :—

ONTARIO CASES.

Unauthorized Conduct of Fellow-Workman.

The Court of Appeal has given judgment in an interesting question arising out of an action for damages under the 'Fatal Injuries' Act.

The trial court, with a jury, awarded the plaintiff \$1,000 damages. In appeal the judgment was reversed. The facts are as follows:—

The plaintiff is the widow and administratrix of one James Alexander, who was

a workman in the defendant's employ, and at the time of his death was working in the defendant's sash and door factory. His bench was on the first floor of the factory. There was an opening in the floor through which boards were passed from the lower to the first floor when required. The usual method in vogue at the time was when a load of boards was to be put upstairs a workman was sent up and stood by the hole to receive each board as it passed through the hole. When only a few boards were to be pushed up the man below pushed a board up a short distance and rattled it to attract the attention of those on the first floor, when one of the men engaged there would go forward to receive the boards. On the occasion in question, however, one

William Mills, an employee of the defendant, found three boards standing with their upper ends in the opening above, and desired to remove them out of the way. He pushed one of them up a short distance and rattled it. His signal not being attended to, he became impatient, and violently shoved the board up so that it shot up through the hole and landed on the first floor. He repeated this with a second and third. The last one, unfortunately, struck the deceased, who was walking past the hole at the time, and caused his death. At the trial it was contended for the plaintiff that the defendant should have had some rule or system for warning or protecting the workmen above when boards were being put through, and upon that theory questions were submitted to the jury, who found, first, that the defendant should have had a rule or system for warning or protecting the workmen, and, secondly, that he had no such rule or system, and, thirdly, that the system he had was not sufficient to give proper warning.

His Lordship the Chief Justice of Ontario was of opinion that the defendant was not responsible for the accident. The court was of opinion that the course adopted by William Mills was highly dangerous, and almost certain to lead to accidents of a more or less serious nature. Not only was it not the usual course, but it was wholly unprecedented. The defendant or her superintendent could not be blamed for not assuming that a workman would resort to any such unlikely and hazardous measures for removing boards from the lower floor. As it was usually and ordinarily performed, there could be no necessity for providing for giving warning. The accident could not have happened but for the unforeseen and unauthorized conduct of a fellow-workman.

Inasmuch as the plaintiff's case rested entirely upon the alleged want of a rule or system, the court allowed the appeal, and the action was dismissed.

(Alexander vs. Mills, Court of Appeals, Toronto, January 15, 1904.)

Breach of Contract.

This was an action tried at Toronto with a jury, the plaintiff being a merchant tailor, and the defendant until the end of May, 1903, being in the service of plaintiff under a written agreement as follows:

'I hereby agree to an engagement of your services as outfitter and salesman, from August 1, 1902, to January 1, 1904, at a salary of \$35 per week.

A. E. TREBILCOCK.'

'I hereby accept the above agreement.

FRANK BURTON.'

The plaintiff complained that the defendant in breach of this contract left his employment about the end of May, 1903. Defendant replied that he left with the consent and by the leave of plaintiff. Plaintiff also charged the defendant with wrongfully using plaintiff's books in order to procure a list of his customers, and, upon leaving, wrongfully used this list to the detriment of plaintiff's business. Plaintiff further charged the defendant with procuring copies of orders given by customers to plaintiff, and endeavouring to induce customers to break their contracts with him and to give them to defendant. Plaintiff also charged defendant with inducing his servants or workmen to leave his service, and also converting to his own use certain patterns, the property of the plaintiff.

On all these points plaintiff failed to establish his case by evidence, and the only point on which he was successful was his claim for \$75 advanced to defendant in January, 1903, for the purpose of enabling defendant to attend a custom tailors' convention at St. Paul, the object being that the defendant should have an opportunity of exchanging ideas with cutters of the principal houses in the United States and Canada. On this point the court held that this was for the benefit of both parties, and that this money was advanced to the defendant on the implied condition and understanding that he should remain in the employment of plaintiff during the

time called for by his agreement. Judgment was rendered for plaintiff for \$75.

(Trebilcock vs. Burton, Toronto, March 12; Falconbridge, C.J.)

QUEBEC CASES.

Duty of Party Using Dangerous Machines.

An action was brought by a lineman named MacDougall against the Montreal Park and Island Railway Company for damages resulting from an electric shock, which threw him from a pole to the ground, and caused serious injuries. The company pleaded that the accident was due to the negligence of the plaintiff, and this belief was maintained in the court of first instance, which dismissed the action. The case was finally taken to the Court of Review. In rendering the judgment of the Court in Review His Lordship, Mr. Justice Trenholme, confirmed the doctrine that a party using dangerous appliances must employ the latest known devices to protect employees, even against their own negligence. In the present case there was a guy wire which should have been insulated, and an iron bracket to which a new trolley wire was attached with a wire connected with the old charged trolley wire. Had the company caused the new trolley wire to be fastened with rope, as might easily have been done, the accident would not have occurred. Under the circumstances, the judgment was re-

versed, and damages in the sum of \$750 awarded.

(MacDougall vs. Montreal Park and Island Railway Company, Montreal, March, 1904; Court of Review.)

Damages for Loss of an Eye.

This was an action in damages taken against the Montreal Light, Heat and Power Company. The plaintiff claimed \$1,999, for the loss of an eye of his minor son while in the employ of the company at Chambly. The facts were as follows:—

Holes had been drilled in some concrete, and instead of using the ordinary spoon and pump to clear out the holes, the company was using old steam heating pipe. Plaintiff's son held the pipe while a companion struck it down. Chips off the pipe flown in all directions, and one of them destroyed the boy's eye. Mr. Justice Curran held that the company was not justified in using such apparatus, and that in any event it should have given some protection for the workman's face. On the other hand, however, the boy was aware of the danger of his occupation under the circumstances, and the court considered that while he had proved the amount of his claim, something must be deducted for the contributory negligence of the plaintiff. The result was that judgment was rendered for \$1,200.

(Charette vs. Montreal Light, Heat and Power Company; Superior Court, Curran, Justice, Montreal, March, 1904.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 11.

MAY, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,
OTTAWA, May 15, 1904.

The enlarged scope on which railway administration in Canada will be carried on under the new Board of Railway Commissioners was evidenced by the appointment by the Dominion Government during April of a special officer to investigate all accidents occurring on Canadian railways. The officer will report thereon to the Commission, with a view of fully determining the causes of accidents and of suggesting possible improvement in the means of prevention. Other duties of a less specific character will also be undertaken by the officer in question, such as the general supervision of the appliances required by law for the protection of railway employees, &c. A brief description of the legislation which it is the special duty of this officer to enforce is presented in a special article in the present issue of the *Labour Gazette*, in which a comparison is made of the present status of the law in this respect, as defined under the Railway Act of 1903, under which the Railway Commission was created, with its provisions as formerly administered by the Railway Committee of the Privy Council.

A brief special article of the issue relates to the organization at Hamilton, Ont., under the auspices of the local Board of Trade and the Trades and Labour Council, of a standing tribunal for the arbitration of trade disputes which may in future arise in that city.

A brief reference is also made under a separate heading to certain convictions recently made in the courts of Ontario under the Alien Labour Act, which illustrate the practical application and method of enforcement of the law.

During the session of the Quebec Legislature of 1902, an Act was passed authorizing the organization of a special commission to investigate the question of colonization within the province, and the relations existing between colonists in the newer districts and the holders of timber licenses. The report of the commission on this important matter was presented to the legislature during April, and a résumé of its findings is included in the present issue. The material which it presents is divided roughly under two headings, relating respectively to the facts elicited by the inquiry, and the recommendations of the commission as based thereon.

As in the April issue of the *Labour Gazette*, the reports of departments and bureaus are of unusual number in the present issue, owing to the sessions of the Dominion Parliament and of a number of the provincial legislatures. The article on trade disputes is also of some length, though it will be noticed that the number of disputes falls considerably below that of the corresponding period of 1903.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF APRIL, 1904.

I.—GENERAL SUMMARY.

THOUGH a number of the correspondents to the *Labour Gazette* report activity of employment, conditions in the general market for labour during April compared unfavourably, on the whole, with those of the corresponding month of 1903. This was particularly the case during the first three weeks of the month, as a result of the backward and unfavourable weather conditions which prevailed in almost all sections of the Dominion; in the closing week considerable improvement was noted, and a much more buoyant tone was apparent in the general situation. At several points, however, activity at the close of the month, was on a much lower level than had been expected for the season of the year, though it was pointed out that inasmuch as the opening of spring was exceptionally early last year, a basis of comparison was rendered somewhat difficult. The cities of Hamilton, London, Winnipeg (where heavy arrivals of immigrants caused a temporary overstocking of the labour market) and Vancouver may be instanced in this connection, to which may possibly be added Toronto as a result of the fire of April 19, and Montreal as a consequence of the trade disputes that were reported in that city. Elsewhere, as in the Maritime Provinces and at several points in Ontario, favourable conditions were reported, and the general outlook is for an active and prosperous summer season.

Changes in Wages and Hours.

Additional evidence of the less active conditions of employment during April as compared with last year, is afforded by the comparatively fewer instances of wages increases reported, April being a month in which changes of this nature are, as a rule, extensive, under favourable circumstances. In certain industries improved wage conditions were reported, as in the lumbering industry in Ontario and Quebec, in which men were employed for the 'drives' at possibly the highest wages yet offered. In

the unskilled labour market, however, the prevailing tendency was slightly downwards, though no marked movement on a large scale in that direction can be said to have shown itself.

The changes of the month, as reported to the Department of Labour, were as follows:—

Labourers and concrete men in the employ of a coal-washing plant at Sydney, N.S., were increased, after a strike, from 12'6 cents per hour to 13 cents, and from 13'5 to 14 cents per hour respectively. A number of carpenters, who were involved in the same strike, however, withdrew their demand for 25 cents an hour. At Quebec, Que., *painters* received an increase from 17½ to 25 cents per hour. *Freight handlers* employed by the C.P.R., in the same city, were advanced to the rate of \$1.50 per day. *Batteaux-men* also obtained slightly improved conditions. At Sherbrooke, Que., 12 *carpenters and joiners*, also *bricklayers and builders' labourers*, received a reduction in hours amounting to two hours per week, from April 1. *Cement sidewalk construction foremen* in the employ of the city of Hamilton, Ont., were advanced from \$18.90 to \$20 per week. At London, Ont., 350 *car shop employees* of the G.T.R. Co. had their hours reduced one per week, stopping work at 11 a.m. on Saturdays, instead of at 12, from April 4, with corresponding reduction in wages. At St. Thomas, Ont., 16 *bricklayers* received an increase of 1 cent per hour to 37 cents. The wages of *carpenters and unskilled labour* in the same city were also higher than last year. At Chatham, Ont., 24 *house painters* in the employ of six firms were increased from 22 to 22½ cents per hour, having their hours at the same time reduced from a 10 to a 9-hour day, the same class of labour in the employ of another firm having received the wage increase, but no change in hours, after a lockout of a week's duration. *Fur cutters* at Windsor, Ont., also received im-

proved conditions. In Winnipeg, Man., the wages of *carpenters* were reported to be lower than last year's schedule. At Vancouver, B.C., *civic firemen* received an increase in wages.

Cost of Living.

Cost of living showed only slight or local variations during April. Butter prices have been easier, and still lower prices are generally expected. The cheese market, similarly, has been quiet. Freer deliveries of eggs occurred during the month, and prices are now generally normal, though at Vancouver and other points high prices prevail. The price of bread in Ottawa fell to 5 and 10 cents per small and large loaf respectively. At St. Thomas also the price of bread declined from 6 to 5 cents per 1½-pound loaf. Coal decreased in price at Brantford, and at Hamilton dropped 50 cents to \$6.50 per ton. Pork was lower in price, but beef at Peterborough advanced 1½ cents per pound to 14 cents. Potatoes were generally scarce and high in price. The price of ice also shows a tendency to be high during the coming summer. A scarcity of workmen's houses at several points, notably at Montreal, Hamilton, Chatham, Brantford, Stratford, Galt and Windsor, was complained of, and at Guelph a special committee of the city council was appointed to take the matter into consideration.

Unfavourable Weather Conditions.

As was the case in February and March, unusually unfavourable weather conditions had an important effect during April on the labour and industrial situation in Canada. Heavy snow storms occurred during the first half of the month, one especially affecting the western peninsula of Ontario, and another causing widespread damage and interruption to transportation in Manitoba, the North-west Territories and part of British Columbia. This unusual prolongation of the winter season has, in many of these localities, caused a serious diminution of employment. The interruption in question varied somewhat according to locality, but may be stated as having

amounted on the average to at least three weeks. Nearly all classes were directly or indirectly affected, though agriculture, lumbering and railway construction among the industries, and the building and transportation branches among the trades, may be mentioned as having particularly suffered. Mining also suffered from interrupted railway traffic in the metaliferous branches in British Columbia, and in the coal-mining branches in Nova Scotia from the shortening of the season of St. Lawrence navigation and consequent impaired facilities for marketing coal. The delay in the opening of the navigation season, however, was the most serious single result of the backward season, the effect making itself felt in several branches of trade and commerce and on the material well-being of the large number of workmen who find employment during the summer in the various seaport towns. Coasting vessels reached Quebec on the second week of the month, and communications with Prince Edward Island by water opened on April 12, but the ice was fully three weeks later than last year in moving out of the St. Lawrence, and on the Great Lakes an even greater delay was indicated, the ice being of thickness and mass never recorded before. On the other hand, railway employment has been favourably affected by this delay in cases where the competition of water transportation usually diminishes employment at this season of the year. That this was only local and temporary in its effects, however, is shown by the heavy reductions in the staffs of car-shops.

Special reference should also be made to the floods which occurred in several localities from the melting of the unusual quantities of snow, and in certain cases to the rapid change to warm weather which followed the heavy snow storms above referred to. The provinces of Quebec, Ontario and Manitoba were those chiefly affected, though in New Brunswick much anxiety was caused, and in certain districts in British Columbia losses from landslides and wash-outs were reported. In Ontario and Quebec, the number of bridges

swept away, buildings damaged by flood, &c., was on a heavy scale. Railway companies were, perhaps, the chief losers, though several manufacturing establishments reported serious damage to plants, as well as to loss of time. Particular instances of this occurred at Smith's Falls, Ontario, where the breaking of a dam on Rideau lake caused a serious flood which inundated several large manufacturing establishments and did much damage to plant and dwellings. Several of the suburbs of Montreal, Que., notably Verdun and Laprairie, were flooded by the St. Lawrence and much damage to property done. Merrickville, Brantford, Toronto Junction, London and several other localities in Ontario suffered to a lesser degree, while in Manitoba and the Territories a number of localities, among others, Regina, Brandon, Gladstone, Emerson, Portage la Prairie and Winnipeg, were subjected to loss or serious inconvenience. A few fatalities resulted.

The death rate for the province of Ontario for March was the highest for any month since the systematic publication of statistics, amounting to 2,415 deaths, or a rate of 15.1 per 1,000. For the same month last year, the rate was 14.7 per 1,000.

Disastrous Fire at Toronto.

Of particular incidents during April of a disturbing effect on local and general industrial conditions, the disastrous fire which occurred in the city of Toronto on the night of April 19 was the most important in its consequences. In the neighbourhood of fourteen acres of the down-town district of the city, covered with manufacturing establishments and with some of the largest mercantile houses in Canada, were burned over, at a loss estimated at \$12,000,000, distributed among over eighty establishments. Eleven persons received more or less serious injury during the progress of the fire, which was beyond control for upwards of eight hours, and was checked at last only with the assistance of the Buffalo, Hamilton, London, Brantford and Peterborough fire departments, a high wind,

which fortunately was in the direction of the water-front, being largely the cause of the proportions reached by the conflagration. Apart from the enormous money loss, the fire was attended with many far-reaching consequences, both of a local and of a general nature. Some 3,500 work-people were immediately thrown out of employment, the classes affected being chiefly clerks and employees of mercantile establishments, and skilled workmen in the printing, clothing and woodworking branches, and, though large numbers of these found re-employment in the temporary quarters of their old employers, a considerable percentage was forced to look for entirely new fields of employment. Temporary demoralization of the entire local labour market ensued, and the effects, as will be seen in the reports of *Gazette* correspondents, was extended to several points outside of Toronto. The work of rebuilding, however, in the latter city will undoubtedly cause great activity in the building trades throughout the coming season, and the clearing of the ruins gave immediate employment to large numbers of men. Another immediate result of the complete disorganization of conditions was the settlement of the feeling of unrest which prior to the fire was in existence in the building and printing trades, six of the largest printing establishments in Canada being among those destroyed, and the prospects of their re-establishment in Toronto having not yet in all cases been decided upon. Some \$20,000 worth of printing for the Ontario government was among the losses. The rise in general rents which followed, was widely felt. Other important effects were the increasing of the fire insurance rates by 50 per cent, which will involve an additional outlay in the area affected in Toronto alone estimated at about \$125,000 per annum. Accompanying this was a general depreciation of Canadian fire risks among foreign insurance companies. The whole question of fire protection has also received increased attention. Important, also, was the shifting of trade centres, temporary or otherwise, which may result from the seri-

ous interruption caused by the fire in certain lines of manufactures and commerce. The wholesale stationery trade, of which Toronto was the leading centre in the Dominion, for example, has been particularly disturbed. A most satisfactory feature, however, was the excellent recuperative powers which were shown by nearly all of the firms included among the losers, and though it will be some time before normal conditions are regained, no permanent setback in the commercial and industrial progress of the city is expected to ensue.*

Other Interruptions to Industry.

Interruptions to industry other than those above mentioned were of lesser importance, though a fire which occurred at Fernie, B.C., on April 29, destroyed the main business part of the town, and caused damage estimated at over \$500,000. At Midland, Ont., the G.T.R. elevator, having a capacity of 500,000 bushels, was destroyed by fire on April 24, and at Guelph, Ont., the factory of the Magnet Cream Separator Company, employing about 100 men, was burnt on April 2. Sixteen buildings were also destroyed in a fire at McAdam, N.B., on April 21.

From the standpoint of industrial unrest, the month compares very favourably with April, 1903, showing in all 23 trade disputes in existence, as against 37 a year ago. As compared with March, there was an increase of 12 disputes.

Conditions in the Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada, as indicated by the reports of correspondents of the *Labour Gazette* for April, and by information collected by the department from other sources, may be briefly summarized as follows:—

Agriculture.

Backward weather conditions were a prevailing complaint during April from nearly all parts of the Dominion, and though the situation varied somewhat according to

locality, the general estimate is, that the season is at least three weeks behind that of 1903. Spring ploughing has in consequence been delayed; seeding, however, in some localities in Ontario, Manitoba and the Territories was begun in the closing week of the month. Another effect of the prolonged winter season was the scarcity and high prices of fodder which prevailed in several localities, and which was severely felt in the stock-raising branches. The latter branches also suffered in western Canada from the heavy snow storms of the opening weeks of the month, though the first statements of losses were found to have been exaggerated, about 12 per cent covering the majority of instances. The depression in the market for hog products was also an unfavourable feature of the agricultural situation in April, and the whole problem of markets and marketing was affected by the continued bad state of the roads. Prospects for the coming season, however, are considered as on the whole very bright. Fall wheat has suffered considerably in Ontario from the lateness of the spring, and from many quarters is reported as having wintered badly; favourable reports, however, have been received from other sections, especially those in which loams and light lands predominate. In western Canada, moreover, it is estimated that no less than four million acres will be seeded in Manitoba alone. The manufacture of maple sugar proceeded under much more favourable weather conditions than was anticipated at the beginning of the month, and the yield will be large and of good quality, and will obtain good prices. The scarcity of agricultural labour continued to be a prominent feature in Ontario, though arrivals of immigrants relieved the situation in some localities. The stringency was particularly felt in the dairying branches, a number of cheese factories having begun the season's operations during April.

Fishing.

Unfavourable weather conditions interfered with fishing in the Maritime Provinces,

* See also report of the Toronto correspondent in the present issue.

but preparations were actively under way for the opening of the herring, lobster and cod season. Several cases of serious damage to lobster-traps and gear from drift ice occurred. The first appearance of mackerel off the Nova Scotia coast was reported, and good hauls of gasperaux were made. The dog-fish nuisance, which has interfered so seriously with deep-sea fishing on the Atlantic coast during the past two years, was made the subject of a special inquiry by the Dominion government during April, the Dominion Commissioner of Fisheries having held an investigation in the localities chiefly affected, and received suggestions as to the most successful method to combat the nuisance.

In British Columbia, the leading incident of the month was the arrangement of the wage schedule for the coming salmon season at a flat rate of 25 cents per sock-eye.* The run of spring salmon in the northern rivers was reported to have commenced and to have resulted thus far in satisfactory catches. Good catches of halibut were also made. Work has begun in the installation of salmon-traps off Vancouver Island, from which the fish will be taken in scows to the canneries on the Fraser river.

The annual report of the fisheries commissioner of British Columbia, dealing exhaustively with operations during 1903, was published during the month.

The proposal to adopt a close season for all kinds of fish on Lake Erie from November 10 to March 15 was negatived during April by the action of the state legislature of Ohio in refusing to pass a bill providing for the same. As the restriction was made contingent on joint action by the several states and provinces in the matter, no change in the existing arrangements will ensue.

Work will be commenced early in May at the experimental station established at Canso N.S., for the catching and curing of herring after the Scottish method.

Steps were taken by the commissioner of fisheries for Ontario to ensure a better supply of fish at the points on the Great Lakes at which they are chiefly taken, complaints having reached the department to the effect that fishermen were inclined to dispose of their entire catch in bulk in the larger city markets, situated at a distance. Considerable discussion of the recently issued regulations of the department has also been carried on during the month.

The granting of a bait monopoly by Newfoundland to an American syndicate was discussed in the House of Commons.

According to the annual report of the Canadian Fisheries Department, published in April, 77,801 persons were employed in the industry during 1902, the craft and gear used being valued at \$11,305,959.

Lumbering.

The work of preparation for the drives, and the reopening of several large saw-mills* were the leading feature of the month in Ontario and the eastern provinces. Wages for men for the former employment reached an exceptionally high level, as high as \$45 per month and board being offered, owing to the prevailing scarcity of men. The slow melting of the snow hindered operations somewhat in Ontario and Quebec. In New Brunswick, however, conditions were of the opposite tendency, and it was feared that a considerable portion of the cut may be hung up in the woods. In British Columbia some depression prevailed, especially in the coast mills, and the large Hasting's mill of Vancouver announced that it would close down indefinitely owing to unfavourable conditions in the market in the United States, Manitoba and the North-west Territories. The mountain mills of the province, however, reported more favourable conditions.

Mining.

Weather conditions were a prominent factor in the mining situation, the delay-

* See report of the New Westminster correspondent to the *Gazette* in the present issue.

* See report of Ottawa correspondent to the *Labour Gazette* in the present issue.

ed opening of navigation, re-acting unfavourably on coal shipments in Nova Scotia, and considerable damage being done to mining properties in British Columbia by snowfalls and landslides. In Quebec and Ontario also the backward weather has delayed the resumption of activity in some localities. The industry, however, as a whole shows an improvement over March.

The closing down of the Northport Smelting and Refining Company, Northport, B.C., whose smelter handles the ores of the Le Roi mine at Rossland, caused the temporary laying off of about two hundred hands at the latter property. The suspension of shipments, however, was stated to be temporary only.

The Imperial Coal and Coke Company was organized during April to mine some 30,160 acres or about 94 square miles of coal lands on the Fording river, East Kootenay, B.C., a few miles from the town of Michel. The capital of the company is \$4,500,000. The property will be worked by tunnels.

On April 13, the agent for the Dominion Government paid over to the mine owners the first bonus payable under the Lead Bounty Act. Twenty-one mines received checks.

New strikes of oil were reported at Dunhill, Ont., and Cardston, N.W.T.

The first sluicing of the year in the Klondike began during April and the cleanup will be in full operation early in May.

Coal shipments from the Nova Scotia collieries for the first quarter of the year show a considerable decline, as compared with 1903. The Dominion Coal Company report a decrease of 64,105 tons; the Inverness Railway and Coal Company, a decrease of 221 tons; the Acadia Coal Company, a decrease of 19,207 tons; the Cumberland Railway and Coal Company, a decrease of 32,849 tons, and the Nova Scotia Steel and Coal Company, a decrease of 5,515 tons from their Sydney mines. On the other hand, the International Coal

Company showed an increased output of 2,227 tons, and the Nova Scotia Steel and Coal Company, an increase of 20,543 from their Marsh mine. A number of the larger Cape Breton companies are stated to have sold all the coal they can mine in 1904.

At the annual meeting of the Montreal and Boston Copper Company, Limited, on April 20, the stockholders approved of a proposed merger of the company with several British Columbia mining properties, the new company to be capitalized at \$7,500,000.

According to the third annual report of the president of the Nova Scotia Steel and Coal Company, the net profits for the year 1903 were \$859,397.19, or \$249,461.95 more than the profits of 1902, being sufficient to cover dividends and fixed charges both for 1903 and for the present year. The company was last year the second largest distributor of coal in Nova Scotia, with a total output of 500,000 tons, which it is proposed to increase to 650,000 tons during the coming year. During the past year, the company built 65 single and 3 double houses, chiefly at Sydney Mines, 10 having been sold to workmen. The sum of \$1,433,563 was expended on construction, plant and equipment.

New regulations recently went into effect in the Department of the Interior, Canada, with regard to oil lands in Manitoba, the Territories and the Yukon, unappropriated lands in these regions being now opened to prospectors, though an area of 1,920 acres may be reserved for an individual or company having machinery on the land to be prospected. In the event of oil in paying quantities being discovered by the latter, an area not exceeding a square mile of land will be held to any one making the discovery at the rate of one dollar per acre, the remainder of the area, viz., 7,280 acres reserved, being sold at the rate of \$3 per acre.

Manufacturing.

Busy conditions were uniformly reported from all parts of the Dominion, with the

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

exception of isolated branches of the industry and a few localities where floods caused temporary embarrassment or loss, or where interruptions to railway traffic affected the marketing of the product. Among the more important incidents of the month were the following:—

The status of the manufacture of woollens in Canada was much discussed during April, owing to the publication of a report early in the month that the Canada Woollen Mills Company, the capital of which is \$1,954,000, and which operates extensive plants, aggregating in value about \$1,000,000, at Hespeler, Carleton Place, Waterloo and Lambton Mills, Ont., had offered its properties for sale. In the closing week of the month the company was reported to have made an assignment, though no definite statement as to the future of the industry was obtained.

The annual meeting of the Ontario Sugar Company, of Berlin, was held on April 12. The report of the president showed a small profit on the year's operations, but not sufficient to warrant the declaration of a dividend. The outlook, however, was stated to be hopeful, and it was said that the company had demonstrated the possibility of manufacturing beet sugar in Canada at a profit. The total production of sugar was 7,000,000 pounds of first-class quality. The beets averaged 15 per cent of sugar, the farmers receiving, on an average, \$5 per ton. The chief difficulty of the company, however, was to induce the farmers to grow beets. With fuller deliveries, the factory, it was stated, could have been operated continuously at less expense.

The incorporation of a new company, to be called the Keewatin Flour Mills Company, with an authorized capital of \$2,000,000, of which the first issue will be for \$1,000,000, was announced in April. A flour mill, with a capacity of 3,000 barrels per day, it is stated, will be constructed at Keewatin, Ont., where water power has been secured, and elevators provided throughout Manitoba and the Territories. The construction of a new flour mill in

Winnipeg, Man., by the Northern Elevator Company, to have a capacity of 2,500 barrels daily and to be completed in time to grind the wheat crop of 1904, was also under consideration.

A deputation of tobacco growers, from the counties of Joliette, Berthier, l'Assomption and Montcalm, Que., waited upon the government on April 14, with a request that legislation be introduced forbidding the contracts which the American Tobacco Company makes with retailers, binding the latter to handle no other company's goods. An increase in the excise duties payable on imported tobacco was also asked, and that the distinctive stamp by which Canadian tobacco and cigars are now recognized be abolished.

The commission recently dispatched to Europe to investigate the electro-thermic process for the smelting of iron ore in the making of steel returned during April, after visiting several establishments in France, Germany and Sweden. The report is pending. A statement with regard to the manufacture of peat will also be made.

Transportation.

Active operations in railway construction were begun during April on an extensive scale throughout Nova Scotia and Ontario on the work of repairing tracks, rebuilding bridges and double tracking some of the most important lines. The construction of several hotels and depots will be started immediately in western Canada.* The work, however, has been very seriously delayed by backward weather, which also led to severe congestion in freight and passenger traffic in western Canada following the snow storms of the first two weeks of the month. Railway earnings, however, showed marked improvement. The most serious feature of the month was the delay in the opening of navigation, which was felt by all classes, and more particularly those whose work

* See report of Winnipeg correspondent to *Labour Gazette* in the present issue.

directly involved in water transportation, the present being the most backward season in many years.

The retrenchment policy inaugurated by the Grand Trunk Railway Company, as an offset to the heavy expenses of operation owing to the exceptional weather conditions during the past winter, seriously affected conditions of employment at a number of points. For example, about 250 men were laid off at Stratford, Ont., about 100 at Toronto, Ont., and about 300 at Point St. Charles, Que. Some superfluous help was also dismissed by the Canadian Pacific Railway Company, but not more than usual at this season of the year.

Important additions, it is stated, will be made to the Canadian Pacific Railway Company's Pacific and Atlantic fleets, the need of additional vessels for the former service being stated to be more urgent.

Increasing freight and passenger traffic was reported on the Intercolonial Railway system, and the Department was considering a proposal to add to the number of trains.

The Canada Atlantic Transit Company will increase its fleet out of Port Arthur for the coming season by the lease of additional vessels.

Several important additions to the motive power of the Michigan Central Railway were installed during April.

Conditions in the Trades.

In the *building trades* the backward weather continued to influence employment injuriously, though the concluding week of the month saw a general increase in activity. Particular instances of extreme activity occurred, as at Winnipeg and Toronto, prospects in the latter city for the coming season being profoundly affected by the fire of the 19, which also influenced the building trades of Guelph, Hamilton and other neighbouring cities. In Montreal and Quebec alone, among the larger centres, was there any serious disturbance of conditions through industrial unrest. *Painters and decorators* were generally very busy. *Car-*

penters were also well employed, while the branches less favourably affected were *stonecutters, masons and bricklayers*. In the *metal trades* the month was generally favourable, only a few instances of dullness being recorded. *Iron moulders and electrical workers* were busy, and *bicycle workers* were especially active. Similarly in the *woodworking branches* favourable conditions prevailed. The *printing and allied trades* were also, with one or two exceptions, reported active or busy by the correspondents of the *Labour Gazette*, the same statement being true of the *miscellaneous and food and tobacco preparation branches*. In the *clothing trades*, *journeymen tailors* were generally reported busy; *garment workers*, however, were less actively employed and at Hamilton were in idleness to the number of 200, owing to a disagreement between a wholesale clothing establishment and their contractors. The *unskilled labour* market showed an improvement with the opening of spring activity though an over supply was reported in a number of localities, notably at Hamilton, Winnipeg and Vancouver, and the whole range of activity was on a somewhat lower level than that of the skilled branches.

Notes of the Month.

The Pulp Wood Manufacturers' Association held its annual meeting at Sherbrooke, Que., on April 18. Mr. H. M. Price of Quebec was elected president.

The terminals for the new steamship service between Canada and Mexico were much discussed, it being undecided whether an Atlantic or a Pacific coast town should be selected. Canada's imports from Mexico amount to \$125,000 and exports to \$137,000.

Application is to be made for a charter of incorporation for *The Penny Bank of Canada* to take over and carry on the work of the St. Andrew's Church Institute Penny Savings Association and the Victor Five-Cent Savings Association of Toronto.

The *Master Plumbers' Association* of Ontario, which has branches in the cities and

larger towns of the province, held its annual meeting at Hamilton, Ont., on April 1 and 2. Mr. W. Mansell, Toronto, was appointed president, and Mr. W. H. Meredith, Toronto, corresponding secretary for the ensuing year. At Winnipeg also the local association of master plumbers, gas, steam and hot water fitters held an annual banquet on March 31.

The Quebec executive of the *Trades and Labour Congress of Canada* had an interview with members of the government of the province of Quebec on April 27, and seven resolutions passed by the Congress at its last meeting in Brockville were placed before the cabinet. A full discussion of the different recommendations was held and serious consideration promised by the Premier.

At a meeting of the Montreal City Council held on April 20, a resolution was adopted to the effect 'that it be resolved that the city of Montreal give by these presents, notice to the Montreal Gas Company that the said city at the end of its contract proposes to acquire all the real estate, the plant and accessories belonging to said company and requisite for the manufacture of gas and the furnishing of the same to the city of Montreal.'

A meeting of the *Toronto Milk Producers' Association* was held on April 27, being attended by 175 dairymen and farmers,

many of them representing from six to ten other members of the association. The subject of wholesale prices was under discussion and it was determined to maintain the price at \$1.15 per eight-gallon can of milk delivered at retailers' places of business.

The closing down for two weeks during April of the *Toronto Paper Company's* mill and two cotton mills of the Canadian Coloured Cotton Goods Company at Cornwall caused some loss of employment at that point, the reason being the annual unwatering of the Cornwall canal for necessary repairs to lock gates and the canal bank.

A by-law was passed by the city council of Stratford, Ont., authorizing the signing of an agreement whereby the municipalities of Toronto, London, Brantford, Stratford, Berlin, Ingersoll and Woodstock should raise \$15,000 for the purpose of investigating the cost of transmitting electric power from Niagara to these different localities, the cities named contributing to the cost on the basis of their assessments. In Brantford, likewise, the city council decided to join with other municipalities in bearing the expenses of acquiring information in connection with this subject. The expenses guaranteed by these two municipalities were \$342 and \$700 respectively.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during April showed an improvement over March, the collieries becoming very active during the latter part of the month. Other industries also felt the influence of the spring activity. The building trades are becoming very active, and there will be much to do in this line at Sydney mines, Glace Bay and Big Glace Bay during the summer. Wholesale trade

was more active than in March, but retail trade is somewhat dull locally, though good in the surrounding district.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Lobster factories are being put in repair, and nets, traps and tackle are being made ready to begin the lobster, herring and cod fishing as soon as the drift ice is blown out into the sea currents by favourable winds.

Mining.—Coal mining, like the fisheries, largely depends on free shipping. Navigation has not opened as early as last year,

hence the coal trade has been considerably hampered. It will require great effort on the part of the coal companies to get their St. Lawrence trade supplied in the now comparatively short shipping season before them. To ensure quick and uninterrupted loading of steamers, larger coal heaps than usual have been piled on the surface. These will be filled by steam shovels, and used to supplement the daily outputs from the collieries. There is, however, no dullness in the Nova Scotia coal trade, and labour conditions in the coal industry are good. A new colliery is to be opened up by the Dominion Coal Company at Big Glace Bay. At present the engineers are busy locating the site.

Railroad construction and employment.—A railway five miles in length will be built from the Sydney and Louisbourg branch. An old roadbed which was made many years ago will be used, and the laying down of the track will begin as soon as the frost is out of the ground. Dominion No. 1 colliery has been emptied of water. It was calculated that 580,000,000 gallons had run into the mine before the fire section was submerged. This colliery will speedily attain its normal output. There is no county in Nova Scotia producing coal that does not look forward to an active trade.

Other industries.—Sydney Steel Works will begin the month of May under more favourable conditions. The rod and billet mill was finished during the month, and give every satisfaction. Only one-half of the plant, however, is being operated, and until every part gets started labour conditions about Sydney will remain somewhat depressed. The large steel plant at Sydney Mines is nearing completion, and part of it will be operated early in June.

The sale of the talc areas at Louisbourg may result in the building of a paper factory, and a recent test and analysis of this material has proved its great value in paper filling. The pulp lands of Cape Breton would supply a factory.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, lathers and plasterers and stone-cutters report work dull. Carpenters and joiners are beginning to secure better employment. Painters, decorators and paperhangers are fairly busy, and plumbers are all well employed.

Metal, engineering and shipbuilding trades.—Iron moulders are all busy, and iron workers and helpers are fairly active. Coremakers have steady employment. Machinists and engineers, electrical workers and linemen are all very busy. Sheet metal workers and horseshoers are busy, and tool sharpeners are active.

Woodworking and furnishing trades.—Woodworkers are becoming active. Car builders and patternmakers have steady employment.

Printing and allied trades.—Printers and pressmen are all busy.

Miscellaneous.—Barbers are active, while clerks and stenographers are not very busy.

Transport.—Railroad employees are all well employed.

Unskilled labour.—There is a good demand for unskilled labour.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed considerable improvement in April over the previous month, but the weather prevented the full measure of the activity which usually prevails during this season. The building trades as a whole were much delayed. Several branches of labour, however, have been active, painters being busily employed, while printers, longshoremen and stone-cutters are also busy. At the end of the month also there was a general awakening of industrial activity, and much promise for permanent employment in the several

branches of outdoor work is now indicated. There has been a continuance of commercial activity and of the immigration business, many thousands of immigrants of good type having arrived during the past month. The wholesale and retail trades report a splendid business done, and it is said that activity in most lines is assured for the immediate future. To this end the Board of Trade is making a special effort to increase the sphere of general business.

The labour market is free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work has been kept back by the late season. The land is now being prepared for ploughing, and the frost is all out of the ground.

Fishing.—Conditions have been somewhat dull during the past month, but at its close there is considerable activity, and the first appearance of mackerel on the coast is reported.

CONDITION OF PARTICULAR TRADES.

Building trades.—Stonecutters and painters are very busy, but the other branches have not yet begun work on account of the backward season.

Metal, engineering and shipbuilding trades.—Iron moulders report work plentiful. Machinists are busy. Electrical workers find employment normal. Blacksmiths are fairly busy. Shipwrights and caulkers are busy. Horseshowers are somewhat dull.

Woodworking and furnishing trades.—There has been much activity in this industry during the past month, and indications are bright for the ensuing year.

Printing and allied trades.—Printers are busy, and are enjoying a good season. Pressmen are also well employed.

Transport.—All branches of railroad and steamship employees are busy. Ship labourers have had a good month. Longshoremen, teamsters and unskilled labour have shared in the general activity.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month of April was in better condition than in March, though the season was later in opening up than last year. It was near the close of the month before navigation was opened, and even then the presence of ice on the shores prevented the hauling of lobster traps, thus causing a late beginning for one of the most important industries of the province. Building operations in the city were mainly confined to work on the interior of the post office, the new market house, and the start of the new annex to the Queen Hotel. There was some activity along the water front in preparing vessels, but work at the Hillsboro bridge had not started. Schooners were beginning to arrive for produce towards the last of the month, but shipping up till then had been slow, the breaking up of the roads throughout the country interfering with marketing. Wholesale trade was good and among retailers the usual spring opening of dry goods and millinery caused activity.

A delegation of the Trades and Labour Council of Charlottetown waited upon the commissioner of public works of Prince Edward Island on April 11 and submitted a resolution adopted by the council at a meeting held on April 5, urging that every contract let by a department of the government should contain a *fair wage schedule* and other specified conditions such as would secure the carrying out of the contract in a manner to protect the interests of wage earners. The wage schedule suggested by the council was as follows: joiners, \$2 per day of 10 hours; carpenters, \$1.75 per day of 10 hours; ordinary labourers, \$1.50 per day of 10 hours. It was asked that the insertion of this schedule should be made compulsory in all government contracts and that the schedules should be published at the time the contract is awarded. In reply to the depu-

tation the Hon. Commissioner of Public Works undertook to submit the matter to the government, for full consideration, though definite legislative action was not promised.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The unusual lateness of the season and the breaking up of the roads rendered agricultural operations almost at a standstill during April, no ploughing even being attempted.

Fishing.—The lobstermen in most localities had their lines run out on the 20th, but were unable to haul their traps on account of the ice. A few herring were taken on the eastern part of the island.

Railroad construction and employment.—The straightening of the line at Curtis' Creek and the extension of the Belfast and Murray Harbour branch from Murray River to Murray Harbour south began this month, thus giving employment to several hundred men. Advertisements are still standing asking for more men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, plumbers and builders labourers were fairly busy. Carpenters and joiners were steadily employed. Painters, decorators and paper hangers were busy, especially during the latter half of the month.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers, machinists, blocksmiths and engineers were busy. Linemen had a good month.

Woodworking and furnishing trades.—Carriage and wagon makers were busy, on repairs chiefly. Car builders and coopers were also busy.

Printing and allied trades.—Printers and bookbinders were steadily employed.

Clothing trades.—Journeymen tailors, and boto and shoe workers were busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and tobacco workers were busy.

Leather trades.—Tanners and saddlers had steady employment.

Miscellaneous.—Barbers were fairly busy, and clerks and stenographers had a good month.

Transport.—Railroad men of every class were busy. Longshoremen in the city had little to do until the middle of the month when one of the winter boats was transferred to the Charlottetown-Pictou route.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A marked improvement was noticeable in employment in building trades during April, and the prospects are that the coming summer will be a busy one, as several new buildings are to be built, and a large amount of repairs and alterations are now going on. Six electric motors have been installed in the Jones brewery for running the machinery, and steam has almost wholly been done away with. The old Jewett mill at Milledgeville is to be dismantled and the best of the machinery, as well as part of the building, will be transported to Chipman, Queen's county, to be used in building and equipping the mill to be built there by the Sayre & Holly Lumber Company. Farm labourers are scarce in New Brunswick, and about seventy Danes have been brought from Montreal and placed in positions in Carleton county. The shipment of live stock from St. John West for the winter season compares favourably with that of 1902-3. Since last November 27,255 head of cattle, 21,643 sheep and 29 horses were shipped. Bank clearings for the five weeks ending April 28 amounted to \$4,357,312, against \$3,896,114 for the same period last year, being \$461,198 greater than for the same period of 1903, and \$1,123,944 greater than for the four weeks ending March 24 of the current year. The West India liner 'Ocamo' was prevented from sailing on a warrant on April 23, at the instance of Rupert Wry, a labourer, who sustained injuries on the steamer while on her last

voyage to this port. The damages claimed amounted to \$750. Bail was given, and the steamer proceeded on her voyage. Trade with the United States during the quarter ending March 31 totalled \$256,121.50. The provincial government introduced a factory Act during its recent session, but after discussion it was decided to postpone action, and a commission is to be appointed to make inquiry into the needs of such an Act. The government also decided to form a labour bureau.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The harbour fishermen are meeting with good results, the catch of gaspereaux being quite large.

Lumbering.—Large gangs of men have gone up on the various rivers and tributaries driving. Since the opening of the St. John river the mills have started operations.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons are fairly well employed. Carpenters and joiners report work plentiful. Painters and decorators are extra busy, a number having to work overtime to fill orders. Plumbers, gasfitters and builders' labourers are busy. Stonecutters report work fair, with a good prospect for the summer.

Metal, engineering and shipbuilding.—Iron moulders, iron workers and helpers, machinists, steam engineers, electrical workers and linemen are all well employed. Boilermakers, sheet metal workers, bicycle workers and horseshoers are busy.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon makers, are active. Shingle weavers are all well employed since the mills started.

Printing and allied trades.—Printers, pressmen and bookbinders report business as very good.

Clothing trades.—Journeymen tailors are all well employed.

Food and tobacco preparation.—Bakers and confectioners continue busy. Cigar-makers report work fair.

Miscellaneous.—Broom and brush makers are very active.

Transport.—Railroad trainmen, switchmen, trackmen and freight handlers are very busy. Steamboat men and steamboat firemen are also busy, the opening of river navigation giving an impetus to this branch. Ship labourers were well employed during the month, but as the winter port business is finished a slackness is anticipated. Street railway employees are busy. Carters, teamsters and expressmen are extra busy just now, as a great many people change residences at this time, and require their assistance.

Unskilled labour.—This class of labour is well employed.

DISTRICT NOTES.

Bathurst.—A contract was signed April 6 for putting in an electrical plant for the lighting of the town and village.

Fredericton.—The tannery of Mr. John Palmer & Co., Limited, was damaged by fire on April 21 to the extent of \$3,000.

St. Mary's.—The Martin Cultivator Co., of England, has been manufacturing cultivators in a small way, but will secure factory premises and enter quite extensively into manufacturing.

QUEBEC, QUE. AND DISTRICT.

Messrs. P. J. Jobin and Edward Little, Correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was better employed in April than in March, though the building trades suffered from delay in the re-arrangement of wages schedules for the coming season. Both Carpenters and Bricklayers' Unions presented new schedules, the former demanding a minimum rate of twenty cents per hour and the latter a rate of forty cents per hour. On April 1, about 150 members of the National Painters' Union

ment on strike, having demanded an increase from 17½ cents to 25 cents per hour. The men advertised that they are prepared to accept contracts and several are working on contracts for themselves. Suits against some of the men for intimidation are threatened by one firm. Two other firms in the closing week of the month re-opened negotiations and granted the increase asked for. In one of these shops, however, only one man at first returned to work, the others having taken contracts which had not been finished. Another demand for increased wages resulting in a short cessation of work was that of eight freight-handlers employed at the Canadian Pacific Railway freight sheds who asked for an increase from \$1.15 per day to \$1.50 per day and received the same after a short strike. The Batteauxmen have also made some slight changes in their last summer's scale, which will go into effect on the opening of transatlantic navigation. Eleven men in the establishment of Carrier & Laine quit work on April 7, owing to the refusal of the company to reinstate certain discharged employees. The shop continued in operation and the men obtained employment elsewhere.

At a meeting of the city council, on March 15, it was decided to establish a new office, to be known as an inquiry office, in the city hall, the salary of the person in charge to be \$600. This has been frequently demanded by labour organizations and citizens. The object is to facilitate citizens requiring clerks, servants and others to get what help they need, while people out of employment may secure work by applying at the office.

The term of the arbitration tribunal between the boot and shoe manufacturers and the three interested unions having expired, Mr. E. Chouinard has been named and accepted on behalf of the unions. Mr. Ludovic Brunet, clerk of the peace, has been asked by the manufacturers to again represent them on the tribunal. Mr. Brunet has not yet accepted. The third arbitrator will be chosen by the two gentlemen appointed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Maple sugar making was actively under way, and the crop, in spite of the fears that were entertained during the opening weeks of the month, will prove a good one. Climatic conditions have improved during the latter half of the month.

Lumbering.—Men for the drives are being actively engaged. Wages vary considerably, but may be quoted at from \$30 to \$40 per month, and even higher, with a keen demand for men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Employment was fairly active in the several branches, particularly on finishing work. Stone cutters, however, had a dull month, and painters and decorators lost considerable time through their strike.

Metal, engineering and shipbuilding trades.—Boiler making was active. Moulders, machinists and engineers also report a busy month. Electrical workers and linemen were fairly busy.

Printing and allied trades.—Printers and pressmen have had one of the busiest months known in the trade, without a man idle, and with overtime prevailing. The recent trouble between the employers and the men has practically disappeared, though a few shops are closed to the members of the union. Bookbinders also report a very busy month. A deputation from the Typographical Union No. 302 waited on Premier Parent on April 9, for the discussion of certain business in which the union was interested.

Clothing trades.—Journeymen tailors had a very busy month. Boot and shoe workers have had an exceptionally good month, the slackness, which as a rule, starts in the closing week of March and continues during the balance of the spring, not having as yet proved a factor in employment, and the different factories are still working full time.

Food and tobacco preparation.—Cigar makers had plenty of work.

Leather trades.—Tanners and curriers were busy, but the effects of the failure of a large establishment during March are still felt, sixty men having been thrown out of employment. The majority of these, however, found work during April.

Transport.—Ship labourers are still largely unemployed though navigation opened on April 8, and the smaller vessels engaged on the coasting trades have been going and coming throughout the latter half of the month. On April 24, the first ocean steamship arrived in port, being a collier loaded for the Dominion Coal Company.

Unskilled labour.—A fair month, considering weather conditions, was reported.

SHERBROOKE, Que., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The continued backward weather experienced until about April 20 had the effect of retarding operations in the building and allied trades, but otherwise all classes of labour were in good demand. The company that will take over the assets of the Dominion Carpet Company expects to have the plant in operation early in May. Contractors were delayed by the weather in starting building operations at the new court house, but a start has now been made, and it is expected that the work will be carried out with all dispatch. The contractor expects to have the walls up by autumn. Extra granite cutters have been put to work. The stone from Argenteuil is already dressed, and shipments will begin to arrive in a week or two. Wholesale traders report business good; retailers state that, while business has been somewhat slow owing to the continued wintry weather, it is up to the average. Messrs. Simoneau & Dion, contractors, adopted the 9½-hour day for their employees on April 1.

The new carpet factory to be established at Sherbrooke will occupy a three-story

structure, 80 by 100 feet in size, in which new machinery will be installed, chiefly for the manufacture of Wilton and Brussels carpets.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are preparing for the spring activity. Hay is very scarce, and is selling at \$14 per ton. Potatoes are also very scarce, and good prices are obtained. Those who have sugar bushes made large quantities of sugar and syrup during the week beginning April 18.

Lumbering.—The season has been a good one for lumbermen, and if the high water continues the most of the drives will be got down to the mills. The Brompton Pulp and Paper Co. has between 200 and 250 men on the log drives in the vicinity of Lake St. Francis. This company and the Champoux Co. will bring down this spring between 18 and 20 million feet of lumber.

Manufacturing.—All manufacturing industries are well employed, with the exception of the Lomas Woolen Mill, which is running only five days a week. The mill employs about 150 hands.

Mining.—The various mines in the district are opening up. The asbestos mines in Black Lake and Thetford have a full crew of men already employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—There are quite a number of contracts awarded for buildings to be erected this summer. A large number of stone hewers are employed at the new court house. Painters and decorators report business very good.

Metal, engineering and shipbuilding trades.—The metal and engineering branches are very busy; machinists are very well employed. The Jenckes Machine Co. are rushed with a large contract for the Niagara Power Co., and a night gang is still at work to keep up with the orders.

Woodworking and furnishing trades.—Shops report trade as very good. Carriage

and wagon makers have had a very good season.

Printing and allied trades.—The printing trade was well employed during the month.

Clothing trades.—There is a good demand for custom tailors; and garment workers report work as plentiful.

Food and tobacco preparation.—Cigarmakers have had a very busy month.

Unskilled labour.—This class has been in good demand during the month.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, sr., correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this city and district was very favourable during April. The early part of the month was dull. As the season advanced, however, a marked improvement was noticeable. The building trades became busy, and labour was more in demand, a lot of jobbing work being done, and a number of new buildings being started. Merchants report business good and sales large, with prospects favourable for a busy season's trade. It is now decided that the Belgo-Canadian Pulp and Paper Co. will begin the installation of a new paper machine. The company has given contracts to double the number of logs cut for the next winter. The Northern Aluminum Co. will soon begin the construction of a building. The first floor will be used for an office and the second floor as a laboratory. There are a number of men employed clearing off the ice on the wharfs for the opening of navigation, which is a month later than last year.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons reported a sufficiency of work towards the close of the month. Carpenters and joiners are now very busy, and paint-

ers, decorators and paperhangers are fully employed. The strike of the painters in Montreal has given the latter an opportunity to go to Montreal at higher wages than they have here. There is no painters' union here, and many of them will go. Plumbers, gas and steamfitters and stonecutters are doing well.

Metal, engineering and shipbuilding trades.—Blacksmiths, tool sharpeners, bicycle workers and horseshoers report work fairly good.

Woodworking and furnishing trades.—Carriage and wagon makers are busy.

Printing and allied trades.—All engaged in these trades are fairly busy. Steel and copper-plate printers report business fair.

Clothing trades.—Journeymen tailors are well employed. Glove makers are all employed, and there is some demand for labour.

Food and tobacco preparation.—Bakers and confectioners have had a good month. Cigarmakers and tobacco workers report more hands are employed than last month.

Leather trades.—Tanners and curriers are doing well.

Miscellaneous.—Laundry workers report conditions unsatisfactory.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been an improvement in the demand for labour during April both in this city and in the district. The construction of several private residences, hotels, &c., has been undertaken. Carpenters have found work at an earlier date than usual owing to changes and repairs being made in private residences and stores. Everything points to a favourable season for masons, bricklayers and labour generally. The city council is having several

streets cleaned up, and this has given employment to a number of men. Wholesale and retail merchants report that since the 15th of the month business has been fairly active. Banks also report a good month. No changes have occurred during the month in rates of wages or hours of labour. A slight difficulty among the metal roofers arose on April 11, the men demanding an increase of 20 per cent in wages and a nine-hour day. This request not being answered, a strike took place on April 11, which terminated on the 20th of that month, the men returning to work under the old conditions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers engaged in maple sugar making state that the yield of this product has been abundant this year. The price of the sugar is 10 cents per pound. The price of syrup varies from 60 cents to 75 cents per gallon, 90 cents being asked for the best quality of syrup for keeping. Pressed hay is this year selling for \$10 per ton; unpressed for \$8.50. Eggs are worth 13 cents per dozen, and butter from 18 cents to 20 cents per pound. Market prices are firm for other farm products.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons say they had sufficient work towards the end of the month. Carpenters and joiners have been very busy since the 15th. Painters and paperhangers are just now in their busiest season. Plumbers report conditions satisfactory for the present.

Metal, engineering and shipbuilding trades.—Work has been fair in these branches. Blacksmiths and boilermakers have been well employed.

Woodworking and furnishing trades.—In these trades work has been abundant, especially with carriage makers.

Printing and allied trades.—Printers and pressmen have plenty of work.

Clothing trades.—Journeymen tailors and garment workers report satisfactory conditions, their workshops running full time. Boot and shoe workers have had a brisk month, especially in the Ames, Holden & Co.'s manufactory.

Food and tobacco preparation.—Cigar-makers are very busy.

Leather trades.—Tanners and curriers still continue very busy, owing to the number of orders ahead. Everything points to an extremely active season.

Transport.—Cab-drivers report a very busy season.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of April has been remarkable for the number of strikes which have occurred in the local labour market. On the 1st of the month the stonecutters initiated a strike which has not yet been settled, the employers insisting upon an 'open shop,' whereas the men strongly oppose this and demand an increase in wages from 28 to 37 cents an hour. Twenty-five builders' labourers are also affected by this strike. Marble cutters also went on strike, alleging that their employers engaged sandstone cutters to cut marble. This strike was of short duration, lasting only two or three days, and being ended by an arrangement between the two classes of workmen. On April 10 the plumbers in the employment of Mr. D. Ouimet quit work, refusing to work with non-union men. They found employment elsewhere. On April 10 also, the Hebrew bakers went on strike and were successful in obtaining their demands. On the 19th painters went on strike, asking their employers to recognize the union and to admit the union's agent to their shops. Finally, on the 26th the joiners, carpenters and marble cutters working on the Imperial Bank struck because the police were present to protect some non-union painters at work on that building. They

returned to work the next day, the police having been taken away.

Strikes and lock-outs do not seem to be fewer nor less bitterly contested than last year, though the causes are not similar. This year the difficulties are mainly due to the question of the recognition of the union and refusal to work with non-union workmen.

Navigation is now open, the ice having moved out. The different branches of the building trades have been busy, although unfavourable weather had in some cases a deterrent effect. The hack drivers had a special meeting for the purpose of asking the City Council to make certain changes in their tariffs, and to take steps to combat the tourist cars run by the Montreal Street Railway Company in the principal streets of the city, which are depriving the hack drivers of a leading source of revenue. Under its new policy of retrenchment the Grand Trunk Railway Company has discharged 350 employees from the car shops at Point St. Charles. The Montreal Locomotive and Machine plant has passed into the hands of the American Locomotive Company. This company will nevertheless remain Canadian in its board of directors and its employees. More than 400 employees now find work with it, and this number, it is stated, will be increased to 1,000. Between 600 and 800 machinists will find work in the new workshops of the Canadian Pacific Railway at Rosemount. Since January 1, 1904, 76 building permits have been granted by the City Council for property to cost \$112,350. This is an increase of five in the number of permits granted during the corresponding period of 1903. The long-shoremen are ready for the first ocean liner which reaches this port.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The manufacturers of rubber goods, cotton, nails and sugar refiners report orders have been plentiful during the month. The employees of the Dominion Bridge Company have been extremely busy, working overtime.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades are well employed, except for the unrest that has prevailed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists, engineers, electrical workers, metal polishers, buffers, platers and brass workers report excellent conditions. Boilermakers are satisfied, and jewellers state the month has been a good one.

Woodworking and furnishing trades.—These trades are all fully occupied.

Printing and allied trades.—Bookbinders are busy.

Clothing trades.—Tailors, garment workers and boot and shoe workers reported work brisk.

Food and tobacco preparation.—These trades have plenty of work.

Leather trades.—Conditions are reported satisfactory.

Miscellaneous.—These branches are all busy.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was little idleness in April, the month being, as a rule, one of the busiest months of the year in all lumbering centres. Preparatory work for the sawing season, for the opening of navigation, and for building operations generally, employed all idle hands in Hull and surrounding towns. The first half of the month was given to repairing sawmills, flumes, improving docks, overhauling steamboats and barges, freeing the mill-ponds from ice, &c. Similar operations were carried on at Aylmer, Deschenes, Hull, Buckingham, Templeton and Montebello. About the latter part of the month operations started in all the mills. Opportunities for good

paying work are also offered to workpeople outside of the city in the bush.

Industry at large is in a flourishing condition. The latest addition to Hull's already large quota of factories is a mattress factory, which has obtained exemption from taxation, conditional upon its employing fifteen hands the year round, and paying out \$8,000 in wages annually. The exemption is also conditional upon its employing residents of Hull exclusively. These provisoes are now inserted in all exemption agreements made with manufacturers in Hull. The handle factory, cement works, the Beemer car shops, the Matthews packing house, &c., are examples of this rule, which works well. Water rates, however, have been increased 10 per cent, and this being collected on the assessment of property means a large outlay to the companies which otherwise do not pay into the civic treasury for a limited number of years.

The Eddy employees recently locked-out by the company, are yet out of work. A couple of smoking concerts have been given for their benefit, and efforts have been made to have the company raise the lock-out against them.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—A fair estimate is that 1,500 Hull people are now working in the saw-mills, of which fully one-half are employed at J. R. Booth's at the Chaudière. These mills are already running day and night, as lumber is scarce and the demand is in excess of the supply. Gilmour & Hughson and the E. B. Eddy Company employ the rest of this class of labourers in Hull. The new Fraser mills at Deschenes give work to some 200 hands. Ritchie Bros., at Aylmer; Ross, at Buckingham; McLaren at Templeton, Owen at Montebello, and scores of smaller hardwood and shingle mills, scattered all over the district, are said to employ another thousand men. Wages all over are the same—\$1.25 to \$1.75 per day for mill hands; \$2.50 and \$3 for saw filers; \$3.50 and \$4 for millwrights. Foremen are generally paid from \$2 to \$2.25.

Shipments of lumber by water are already being made, and repairs to the lumber-carrying fleet of the Chaudière, the Blue Fleet as it is called, which comprises 64 barges and 8 tugs, are being made with all possible celerity. The fleet employs over 500 men during the season, who are paid from \$16 to \$45 per month and board.

Lumbering.—While the saw-mill hands of the city are busy sawing and carrying away lumber, hundreds are being hired for the drives on the upper and lower Ottawa and its tributaries. Wages are \$33, \$40 and \$45 per month and board.

Mining.—An impetus has been given to mining in the city of Hull since the return of the government commission sent to Europe to study the reduction of iron ore by electricity. It would prove an immense boon to the city if the process already referred to was practicable with magnetic ore. This city's and surrounding water power would be a most important factor in the economic carrying on of such a process.

Building operations, although not generally started as yet, are promising unusual activity. A school will be built at Tetreauville, numerous residences are in course of construction and many others are contemplated, whilst the demand for stone for Ottawa's large buildings will keep our quarries busy. The cement factory will employ all other hands.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

April, as a whole, and more particularly the latter part of it, saw a marked increase in employment, especially for common labour. The opening of the lumber mills, the commencement of farming operations, and the preparations for navigation, gave employment to many who were more or less in idleness during the winter months. The trades are fairly busy, with the exception of the building trades, and in that

line there was signs of brightening towards the end of the month. The supply of labour was not equal to the demand in some lines. This was especially true in lumbering circles, where as high as \$45 a month were paid for men to work on the drives. Notwithstanding the lateness of the spring, commercial men reported a good trade, and banks had no complaint to make as to the way paper was met.

According to the twenty-seventh annual report of the assessment commissioner of Ottawa, covering the year 1904, the land values of the city are \$12,767,250; the improvement values \$16,728,125; income, \$758,350; personal property, \$2,068,200, making a total of \$32,321,925, an increase of \$2,959,430 over 1903.

The contracts for the large tannery to be erected on the east bank of the Rideau river, at a cost estimated at \$75,000, have been awarded. The establishment, it is expected, will be running by October, and employ about 150 men.

From January 1 up to the middle of April 45 permits for buildings, the aggregate value of which amounted to \$90,000, have been taken out.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm operations were delayed by unseasonable weather, the commencement of spring ploughing being fully three weeks later than last year. There was a brisk demand for farm labourers, and the supply is hardly likely to equal the demand as the season advances. The Ottawa Cheese Board held its seventh annual meeting in April, with a good attendance of members. Fifty factories were represented on the board in 1903, according to the secretary, an increase of seven over 1902. The total number of cheese boarded was 44,185 boxes, an increase of 10,371 over 1902. The average price paid was $10\frac{1}{2}$ cents a pound, a fraction higher than 1902. The value of cheese boarded was estimated at \$365,262.

Lumbering.—The lumber mills started the season's work about the middle of the month, and are engaged in cutting a supply of logs brought in by train during the winter. Whether these will last until the drives come down is a matter for conjecture, but there is not likely to be more than a few days' slackness. J. R. Booth gives employment, in all branches of the work, to about 1,200 men. A day's work will run 10 or 11 hours, with common labour receiving on an average ten cents an hour. There were no changes in hours of labour or rates of wages, excepting the advanced pay for men in the bush and on the drives. The conditions at the mills remain the same as last year.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were reported quiet, with prospects brightening. Building permits taken out at the city hall up to the end of the month totalled about \$200,000 less in value than a year ago, but the spring of 1903 witnessed the commencement of the erection of several large buildings, which partially accounts for the difference. The contract was let during the month for the rebuilding of Ottawa University, which was destroyed by fire in December last. The new university, including several buildings, will cost \$1,000,000, and will take several years to complete. It is hoped, however, to complete the main building this year. Peter Lyall & Son, of Montreal, were awarded the contract. The Plumbers and Steamfitters' Union filed a demand with the Master Plumbers' Association, asking for a nine-hour day, and an increase of five cents an hour in pay. No reply had been made by the employers up to April 30. A number of members have left the branch here of the International Plumbers and Steamfitters' Union, and propose organizing as a national union.

Metal, engineering, and shipbuilding trades.—The metal trades continue active, with steady employment for all branches,

especially machinists. Stove mounters and boilermakers were busy.

Woodworking and furnishing trades.—These trades were quiet, owing largely to the slackness in building operations.

Printing and allied trades.—The printing trades were busy, and there was ready employment for good linotype operators.

Clothing trades.—The clothing trades all reported a fairly active month.

Leather trades.—The leather trades were busy, particularly the larger establishments, which were kept rushed on orders for harness for Manitoba and North-western trade.

Transport.—Railroad employees were kept busy, and so far no lay-off of men has been put into effect on this section. There was a heavy movement of freight, and the Canadian Pacific Railway had an exceptionally early and heavy volume of immigrant traffic to handle.

DISTRICT NOTES.

Smith's Falls.—The Frost & Wood agricultural implement factories and other establishments were closed down for several days, owing to floods caused by the breaking of the government dam at the head of the Rideau canal.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was at the close of April almost fully employed, and there were few cases of idleness caused by lack of opportunities for employment, which are in excess of last month or the corresponding period of last year. The ending of the prolonged cold weather has caused a rush in nearly all departments of labour. This was inevitable on account of the season being necessarily short, and with the opening of navigation the busy season may be said to be fairly inaugurated, with every indication of success.

Building operations are going on rapidly. Steps have been taken to enlarge a local foundry to twice its former size, so that the owner may start manufacturing extensively a newly patented cylinder-oven stove. The necessary capital has been subscribed here. Plans have been accepted for a new Baptist church, upon which work will soon commence. Already several records have been broken by contractors, who have completed their work before the expiration of the time allowed them. The report of the Justice Department contains much information on construction work carried on at the penitentiary here. The work, much of which is unfinished, is done by convicts, under the supervision of trade instructors. Very few of the convict, when received, are skilled workmen, but the instructors train them until they become, many of them, capable workmen. It is expected that when the extensive operations now going on are completed, the Dominion penitentiary here will compare favourably with the best modern penal institution elsewhere. The total expenditure on the penitentiary for the fiscal year ending June 30, was \$190,000; the revenue, \$32,433, including \$24,742 from binder twine. There are 592 convicts at present confined here. The total cost of the nurses' home and the remodelling of the infectious disease building of the general hospital, completed and opened during the month, was \$21,026.88.

The Canadian Locomotive Company, during the month, closed a contract with an American engineering firm for the installation of an hydraulic riveting and flanging plant. It comprises a riveting machine of 150 tons pressure, an hydraulic frame, accumulator, flanging press and all the necessary pumps, &c. It will be one of the largest plants of the kind in the world, adding greatly to the equipment of the works, and permitting of from 12 to 15 additional engines per month being turned out. The plant will be installed during the next few weeks. During the month this company turned out an engine for the Prince Edward Island Railway, which will be sent to the St. Louis exposi-

tion and placed on exhibition. The engine is a small one, and is the best piece of work ever turned out by the Kingston Company. Several others like it are to be built at the works.

The proposed Ontario Electric Railway is meeting with success. Many towns along the route are holding mass meetings to discuss the matter, and are taking steps to purchase mortgage bonds.

Dealers in real estate report exceptional activity for the season of 1904. Many purchases and transfers are taking place.

During the month, considerable strain existed between the building contractors of the city and the bricklayers and masons over a new agreement involving some changes from last year. After several conferences the matter was amicably adjusted on the 20th instant by the contractors conceding the demands made.

For some time past the employees of the local branch of the Dominion Cotton Mill Company have been given a whole day holiday on Saturdays instead of half-holiday as hitherto. Beginning with the last week of the month they have been allowed to stop work at 6 p.m., instead of 6.30 p.m. Many hands have been laid off and the looms covered up for the summer season. The cause is said to be the condition of the cotton market.

During the month local railways suffered somewhat from floods and washouts. Beyond the carrying away of a few culverts and bridges and the cancelling of several trains, no very serious impairment of the service occurred. A large force of men were kept constantly on guard where danger seemed imminent.

On Wednesday the 28th the annual meeting was held of the Kingston Board of Trade. The memorandum of the council of the board touched upon the following among other matters:—The examination and appointment of an inspector of hides; the visits of delegates to the congress of the Chambers of Commerce of the Empire; the proposed discontinuance of the mail service

between Kingston and Newboro'; the visits of the transportation commission, and resolutions touching the same; an appeal to the present parliament for funds to dredge the Wolfe Island canal; and the construction of a canal to connect the waters of Desert Lake with the Rideau canal, and asking that a survey and report upon work be made as soon as possible. A committee was appointed to investigate the alleged discrimination in railway freight rates practiced by various lines in favour of Montreal and Toronto, and against Kingston.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural labourers of all classes are now in much demand. Spring work is in full operation.

Fishing.—Fishing has improved somewhat since last month.

Manufacturing.—Manufacturing generally is very active with the exception of the cotton factory.

Mining.—Mining is very active. Contracts for large consignments of felspar and other minerals from this district have recently been closed in the New York and old country markets. New machinery is constantly being put in to meet the demand. Mining operations will soon be in full force in this district.

Railroad construction and employment.—Railroad construction is fairly busy.

CONDITION OF PARTICULAR TRADES.

Building trades.—Nearly all branches of the building trades are rushed. A marked feature of the season is the amicable relations between employers and employees.

Metal, engineering and shipbuilding trades.—All engaged in these trades continue to be fully employed.

Woodworking and furnishing trades.—These trades have been rushed during the month. The opportunities for employment are far in excess of the corresponding period last year.

Clothing trades.—Journeyman tailors, garment workers and others in this line

were busy. Dealers in ready-made clothing report an excellent business.

Food and tobacco preparation.—Bakers, confectioners, butchers, cigarmakers, restaurant employees and laundry workers are rushed. Local cigar factories are advertising for assistance. Broom-makers also report good business.

Unskilled labour.—This class is in much demand. Corporation labourers in large gangs were extremely busy during the month opening up drains, cleaning the streets, &c. The expenditure of the board of works since the first of the year is reported at \$1,617.25.

DISTRICT NOTES.

Ten of the Canadian islands in the St. Lawrence river will be converted into public parks this summer, similar to those on the American side, and on each will be erected a large pavilion for the convenience of pic-nic parties and others desirous of making a landing. Each dock will be eighty feet long, affording a landing in eight feet of water. The contract has been awarded for the work by the Department of Indian Affairs. It is expected that all arrangements will be completed in three or four years.

BELLEVILLE, ONT., AND DISTRICT.

Mr. C. H. McDiarmid, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in April were more favourable than in March. The outlook at present is for a busy summer in this city and vicinity, and consequently a good demand for labour. The cement works at Point Ann are employing a large number of labourers from this city, owing to the opening of navigation in the latter part of the month. The industry employs a large number who follow sailing in the summer, and generally work at anything they can find to do in the winter.

An important change was inaugurated at the Grand Trunk Railway shops during April. Twenty-six locomotive firemen were

laid off indefinitely, and twenty engineers were put back firing. Some of the discharged firemen secured other employment on the road.

There have been no changes in rates of wages or hours of labour, neither was there any unrest in the labour market.

The cheese board of trade opened the second Saturday in April and will meet every Saturday during the season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in this district are very scarce of feed, owing to the severe winter, for which many were unprepared. Many are paying \$12 a ton for hay to feed their cattle.

Fishing.—Large quantities of rough fish are being caught.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are busy, especially bricklayers, masons, stonecutters, painters and decorators.

Metal, engineering and shipbuilding trades.—Iron moulders reported a good month, with satisfactory wages prevailing. Machinists are very busy. Blacksmiths are busy, with prospects of a busy season. Bicycle workers are exceptionally busy.

Woodworking and furnishing trades.—Upholsterers, varnishers and polishers all report a busy month. Carriagemakers are all busy, with a big demand for goods.

Printing and allied trades.—The printing trade was never in a better condition than at present, every man being employed. A new establishment has recently located here, which gives employment to quite a number of workpeople.

Food and tobacco preparation.—Bakers report a good month. Cigarmakers were busy.

Miscellaneous.—Barbers are very busy and all engaged. Bartenders are all working, and their union is in a flourishing condition.

Transport.—Employment on the railways is not so active as during the winter; the opening of navigation is responsible, to some extent, for this condition. Steamboat men and steamboat firemen are all busy, and a record season is expected, owing to the lateness of the opening of navigation this year. Cab-drivers, hackmen, carters and draymen report a very busy month, with all working.

Unskilled labour.—This class of labour is in good demand, and a very busy season is expected.

DISTRICT NOTES.

The starting of the lumber mills at *Deseronto* and *Trenton* gave work to a large number of men, who depend upon these industries for a livelihood. The many mines throughout the county will soon be in activity, and the busiest season yet experienced is expected.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnston, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for all classes of labour during April was exceptionally active, and at the close of the month was on the increase. The new power house of the American Cereal Company is nearing completion, the machinery being now nearly all installed. The most active trades during the month were the painters and sheet metal workers. Wholesale and retail trade and railway business were normal.

With regard to the outlook for the coming summer season, all indications are that conditions will be exceptionally active in the labour market. The building trades in particular will be busy, there being an urgent demand for dwelling-houses, and a number of industrial establishments will extend their premises in spite of the advance in the price of building material.

As shown by statistics recently published by the Dominion Census Depart-

ment, the population of Peterborough amounts to \$7.62 per head, or at the rate \$4,584,835, and the taxation \$83,753. This amounts to \$7.62 per head, or at the rate of 18.5 mills on the dollar, a showing which compares favourably with many other towns in the province of approximately the same population.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding has begun, though the season is backward. The making of maple sugar and syrup gave considerable employment during April, good prices (syrup \$1.30 per gallon) being realized for the product. The market for other farm products was also favourable throughout the month.

Lumbering.—Local dealers are very busy, having sold nearly all of their last year's cut, and being obliged to import large quantities of lumber for the local trade.

Manufacturing.—Very busy conditions prevailed, there being no establishment that was not running to its fullest capacity. As particular examples, the Peterborough Canoe Co., is working on an order for one hundred and fifty large canoes for the Hudson Bay Company, to be distributed throughout the North-west; and J. J. Turner & Sons, sale and tent makers, are exceptionally busy on large export orders. The removal of the Canadian General Electric Company from Montreal to Peterborough will bring from 150 to 200 additional skilled mechanics to the city. Another new establishment is that of Adamson & Dobbin, plumbers and sheet metal workers. A new blacksmith shop has also been opened.

Railroad construction.—Work on the new street railway system is about to begin. The system is to include a good local service, with connection with certain of the summer resorts outside of the city.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons and carpenters were very busy, as were also

plumbers, gas and steamfitters. The busiest class within the trades, however, was that of the painters, decorators and paperhangers. Lathers were also busy, but with plasterers employment was somewhat unequal. Stone-cutters had a fairly good month, the majority working in the marble and granite manufacturing establishments. The supply and demand for builders' labourers were about equally balanced.

Metal, engineering and shipbuilding trades.—Iron moulders and boilermakers were fairly busy, as were also metal polishers, buffers and brass workers. Electrical workers, linemen and blacksmiths were rushed with work. Sheet metal workers and machinists were very busy, and good men are in demand. A small passenger steamboat, 75 feet long by 16 feet beam, with a 4-foot draft, is being constructed for summer tourist traffic, to be running by May 24. Bicycle workers and horse-shoers are busy. Jewellers and watchmakers report an average month.

Woodworking and furnishing trades.—Woodworkers, upholsterers, polishers, carriage and wagon makers, pattern makers and coopers are all fairly active for the season of the year.

Printing and allied trades.—All branches report steady employment.

Clothing trades.—Journeyman tailors and garment workers are all fairly busy. Boot and shoe workers are also busy on ordered work and repairing.

Food and tobacco preparation.—Bakers and confectioners report a steady trade. Butchers and meat cutters were exceptionally busy. The retail price of beef advanced from 12½ to 14 cents per pound. Cigar factories report a steady export trade.

Leather trades.—Leather workers were fairly busy.

Miscellaneous.—Barbers report a good month. Clerks and delivery employees were exceptionally busy. Broommakers report a

steady local and export trade. With hotel and restaurant employees employment was active, especially on market days, and laundry workers in all branches were very busy.

Transport.—Railway employees in all departments had an active month, a good passenger business and heavy freight traffic being reported. Cab drivers, draymen, teamsters and expressmen had a good month.

Unskilled labour.—The supply was greater than the demand at the end of the month.

DISTRICT NOTES.

Millbrook.—A \$6,000 fire occurred, lumber, lath and shingles being the products destroyed.

Norwood.—A veneer factory, for which the demand is pressing and the outlook promising, is about to start.

Throughout the district generally, *millers, blacksmiths and lumber dealers* are exceptionally busy, while retail *storekeepers* report good business conditions, with the outlook promising for the summer.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET

Owing to the disastrous fire which destroyed a large portion of the wholesale business district, including many manufacturing establishments, on the night of the 19th instant, entailing a loss estimated at about \$12,000,000, labour conditions are at present entirely abnormal, and in some lines very uncertain. A conservative estimate gives the number of employees temporarily thrown out of employment by the fire at 3,500. A very considerable proportion of these are clerks, salesmen, bookkeepers and others engaged in commercial establishments. The industrial branches which suffered most severely are the printing and bookbinding trades, ready-made

clothing, millinery, neckwear and coffin manufacturing. As a great many of the firms affected have already re-established themselves in temporary quarters the business staffs have largely retained their positions. A large percentage thrown out of work were girls and women employed as typewriters, sewing machine operators and millinery workers, and in other of the lighter industrial callings. Most of these have obtained employment as there is a good demand for this class of labour. Though the ready-made clothing trade suffered considerably by the destruction of the leading houses, the workshops of the contractors escaped, being outside of the burned district. The effect of so extensive a fire is of course felt in almost every department of trade and industry outside of those directly affected. The most noticeable effect was the great increase in rents on all buildings or rooms in any way available for business purposes, which naturally reacted upon other classes of property. As rebuilding will be begun forthwith by many of the property-owners, the building trade will be greatly stimulated and a very busy season is anticipated. A shortage of material, more especially brick, exists at present, which will be overcome as soon as the season's supply is available. So far the building season has been very backward, and few new contracts undertaken, partly owing to the lateness of the spring and partly owing to the fear of strikes. At present it appears altogether likely that there will be no serious difficulties of this kind, as there seems to be a disposition on the part of the trades which have not as yet come to an agreement with their employers for the season to allow their demands for higher wages to remain in abeyance owing to the uncertainty of the situation, and continue working at last season's rates. There is a steady influx of labour from Britain, the effect of which is felt in most lines of industry, and the great demand for labour anticipated as soon as the rebuilding of the burned district commences is regarded as likely to attract an influx from other parts of Canada.

A movement recently set on foot to purchase the Athenæum Club House on Church street, to be converted into a Labour Temple, where labour unions can hold their meetings and find accommodation for recreations, has been put upon a successful basis. The Labour Temple Co. (Limited), is being organized as a joint stock company, with a capital of \$40,000, divided into \$1 shares, with a representative provisional board of directors, of which Alfred Raynor, president of the District Labour Union, is chairman; James Simpson, secretary-treasurer, and J. H. Huddlestone, R. Glockling and W. T. Thomson, trustees. The unions, as well as private individuals, are being canvassed for subscriptions, the committee having the matter in hand comprising A Raynor, James Simpson, James Wilson, J. A. McIntyre and Geo. Sangster. Subscriptions of stock to the amount of upwards of \$4,000 have already been secured, including Machinists' Union, \$500; Bricklayers' Union, \$500; Malsters' Union, \$50, and Builders Labourers' Union, \$50. The purchase price of the building is \$30,000, of which \$5,000 must be paid in cash by June 6.

CONDITIONS OF LOCAL INDUSTRIES.

Agriculture. The backward spring has considerably delayed farming operations. The demand for more help is still urgent, and British immigrants find an active call for their services in this neighbourhood.

Manufacturing.—In most lines of industry manufacturers are very busy, the normal demand having been increased by the destruction of goods in the recent fire.

CONDITION OF PARTICULAR TRADES.

Building trades.—A number of men in the various lines of the building trades are still out of work, owing to the unusual lateness of the season and the influx of British workingmen. The prospects are, however, that as soon as the ground of the burned section is cleared for rebuilding, the services of all will be in great requisition all through the season. A number of bricklayers have gone to Winnipeg,

where building is active. It is anticipated that competition will enable many skilled men to obtain wages above the scale. The painters have considerably strengthened their union, and may demand an increase from 30c. to 35c. an hour. The general disposition on the part of those branches of the building trades in which a raise of wages was anticipated seems to be to allow matters to assume a more settled condition before pressing any demand.

Metal, engineering and shipbuilding trades.—Conditions among machinists were unsettled owing to the fire, which threw a number out of work, many of whom have since obtained employment. Blacksmiths and boilermakers have had a fair month. The shipbuilding trade is active. Horse-shoers are demanding advanced wages. Jewellers and silversmiths are busy.

Woodworking and furnishing trades.—These lines are well employed, especially since the fire, which has created a great demand for furniture. Over 100 men engaged in coffin-making were thrown out of work, but are not likely to have much difficulty in finding places.

Printing and allied trades.—Printers, bookbinders, pressmen and lithographers in large numbers were deprived of their situations by the destruction of factories and workshops. Probably between 60 and 70 printers who suffered are still out of work, together with many of other classes. It will require some time for the employers burned out to re-establish themselves. In the meantime the question at issue as to new wage scale remains in abeyance.

Clothing trades.—Custom tailors report a good month and plenty of work. Garment workers have been a good deal affected by the disturbance of business conditions, but are likely to have abundance of work when matters assume their normal state. Boot and shoemakers are busy. Those of this trade who were thrown out of employment are not likely to remain long without work. The same may be said with regard to neckwear workers, milliners and cap workers.

Food and tobacco preparation.—Conditions in these lines are generally satisfactory. The bakers complain that two employing firms have violated the agreement made last spring with the union, having taken the union label off their bread and compelled the men to work overtime without extra pay. The union has taken the matter up. Brewery workers are agitating for an increase of wages.

Leather trades.—These trades are generally well employed with excellent prospects for the season.

Transportation.—All branches of labour engaged in land transportation are busy. Teamsters contemplate asking for a new wage scale, claiming that a number of the men belonging to their union draw less than \$10 per week.

Navigation is very dull as yet and will not fairly open until May.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The opening of spring increased activity in all lines of industry, and although the busy season is not yet fairly begun, nearly every workman is employed. The forces of the Power Development Company, and of contractors are being increased, and early in May the total number of employees will reach 3,500. One machine shop has been running overtime to keep up with orders. The building trades are beginning to feel the influence of the summer's activity. Freight traffic on the through lines of railway has declined, as it always does at this season. Business in both wholesale and retail lines is good, and the outlook is excellent.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Late snows, severe frosts and a generally backward season have retarded spring work on the farms. Ploughing only commenced in the closing weeks

of the month. In the fruit orchards and vineyards the work of pruning and trimming is finished.

Fishing.—Fishermen are preparing for a busy season.

Manufacturing.—Factories are generally well supplied with orders and the outlook is satisfactory. The City Council has granted exemption from taxation, cheap electric power and other assistance to a company proposing to build a flour mill.

Other industries.—A new steam laundry has been started, employing fifteen hands.

CONDITION OF PARTICULAR TRADES.

Building trades.—Stone masons have been rushed with work since outside operations became possible. Bricklayers are also well employed. Carpenters are nearly all working, though the rush season has hardly opened. Mill hands are very busy. Painters were extremely busy since outside work commenced. Decorators, paperhangers and plumbers have all that they can do.

Metal, engineering and shipbuilding trades.—Foundry men, structural iron workers, machinists, steam engineers and electricians were all steadily employed.

DISTRICT NOTES.

Allanburg.—Improvements to the Welland canal have given employment to many men here.

Sherkston.—The Quarry Company, is preparing for a rush season. Carpenters have been in demand.

Port Colborne.—The opening of lake navigation will be very late. Marine drillers and dredgemen are at work. Further harbour improvement have been decided upon, and will occupy two or three years.

Niagara on the Lake.—The collapse of Dennison's private bank has paralyzed business, and may cause some distress here. A by-law to give a bonus of \$15,000 to the Niagara, Queenston and St. Catharines Electric Railway was carried.

Welland.—The foundry, machine shops and engine works are very busy. Canal im-

provements and the building of new bridges have employed many men.

Port Robinson.—A number of men have been employed in building a new bridge across the Welland canal.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of April labour has been well employed, showing a marked improvement in the market over that of last month. A few factories have been on short time, owing to a temporary shortage of orders, but all others are running full time, and report business good. Some of the factories are having their plants enlarged, in anticipation of an increase in the volume of trade; particularly is this true of the canning factories, a number of which are spending thousands of dollars in improvements. The building trades are quite active again, having commenced their season's work, which by the contracts already let, and the tenders advertised for, will be on a very extensive scale. Contracts have been let for the erection of a number of fine residences, and the building of a \$15,000 bridge over the N. St. C. & N. Ry., and the Welland division of the Grand Trunk Railway tracks on Queenston street. With the opening of navigation, the bridge tenders and canal employees are at work again on the Welland canal. Transportation is quite active, especially in freight. The steamer *Lakeside* made her first trip on the 25th instant. Banks and business houses report the money market as very satisfactory, and business, wholesale and retail, as good and comparing favourably with last year. The retail merchants have organized, with the object of improving conditions in the retail trade. There have been no changes in wages or hours of labour, and no disturbances of the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers say the season is at least three weeks later than last year.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators, paperhangers, plumbers, gas and steamfitters and builders' labourers are all well employed.

Metal engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists, engineers, steam engineers, electrical workers and linemen, metal polishers, buffers, brass workers, blacksmiths, horseshoers and jewellers report trade good.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers, polishers, carriage and wagon makers and coopers report trade fair.

Printing and allied trades.—Printers, pressmen and bookbinders find steady employment.

Clothing trades.—Journeyman tailors and boot and shoe makers are busy.

Food and tobacco preparation.—Bakers, confectioners, butchers, meat cutters, cigarmakers and tobacco workers report trade good.

Leather trades.—Furriers, tanners, curriers, saddlers and leather workers are well employed.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers are satisfactorily employed.

Transport.—Railway conductors, engineers, firemen, trainmen, freight-handlers, street railway employees, cab drivers, hackmen, teamsters and expressmen have found steady employment.

Unskilled labour.—This class of labour is in greater demand than last month.

DISTRICT NOTES.

Port Dalhousie.—The labour market is improving with the opening up of spring

and navigation. Considerable repairs have been done to a number of hotels and residences.

Merritton.—Labour is generally well employed.

Thorold.—Labour was more generally employed than last month, and prospects are fair for a good season's work. A strike occurred at the Thorold basket factory, owing to a demand by the employees for an increase of 5 cents on the 100 baskets, which was refused, on April 8. The employees returned to work at the old scale April 20.

Power Glen.—The Hamilton Cataract Power Co. are employing a large number of men in the enlargement of its plant. There are also a number of fine residences in course of erection.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour is well employed in the building trades, but in many years there has not been such a surplus of labour of nearly all other classes of employment. The International Harvester Works has laid off over 200 men, and the iron trades and clothing trades are very slack. Civic work has started, but the forces usually put on are lessened. Cement sidewalk construction foremen have received an increase in wages from \$18.90 to \$20 per week. Cigarmakers are locked out; leather workers are out on strike; and 200 garment workers are out of work owing to a demand for more money per garment by the contractors for the wholesale clothing firm of Coppley, Noyes & Randall. The Hamilton and Toronto Sewer Pipe Company has been incorporated, with a capital of \$250,000. The local coal dealers have dropped the price of hard coal 25 cents, to \$6.50 per ton. Ice dealers have served notice that the price will be higher this year than last. The City Council signed an agreement for the establishment of a wire fence factory and is

negotiating with the Mansfield Glass Co., New York, manufacturers of preserve jars and similar articles, to build a \$200,000 plant in the annex and employ 100 to 150 hands. The A. B. Petrie Co., Guelph, makers of engines and machinery, will put up a plant to cost \$150,000, and will employ 100 hands. By arrangement with the assessment commissioner's department, the Canadian Tin Plate and Decorating Company, now doing business in London, has decided to remove its plant to this city. The company is now capitalized at \$50,000. It is the intention to increase this to \$100,000 and double the capacity of the plant. It will employ from 80 to 100 hands, the majority of whom are skilled workmen, for manufacturing fancy boxes for biscuits, tobacco, lards and canned meats.

During the month the Central Ontario section of the National Retail Furniture Dealers' Association met here in convention, as did also the Provincial Master Plumbers' Association. The former association met a committee of the National Wholesale Furniture Dealers' Association, and complained against their selling to dealers not members of the retail dealers' association.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing is rather slow in many trades, and many men are idle.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are fairly busy at present, although there are plenty of men in the city in the various branches. The master carpenters and the members of the carpenters' union have come to an agreement. The men will work nine hours a day and be paid 30 cents an hour, time and a half for all overtime, which will include Saturday afternoons. Building plasterers now receive 40c. an hour. Three months ago the journeymen plumbers made a demand for a new agreement to date from May 1, the chief change in which was an increase in pay from 27½ cents an hour to 33½ cents, with a nine-hour day instead of a ten-hour day, and five hours on Saturday.

Metal, engineering and shipbuilding trades.—Iron moulders and stove mounters are fairly well employed. The stove founders have asked the moulders to submit a decrease of 5 per cent, but the matter is not settled yet. Machinists are very slack, a large number being laid off at the Harvester works. Ship and boat builders are busy on the water front. Sheet metal workers are fairly well employed and are asking an increase from 22½ cents an hour to 25 cents. Horseshoers and jewellers report work fair.

Woodworking and furnishing trades.—All of the woodworking trades have had a good month, including patternmakers, carriage and wagonmakers.

Printing and allied trades.—The printing trades, including bookbinders, report a fair to good month.

Clothing trades.—Journeymen tailors have been very busy, but the ready-to-wear garment workers have been very slack, owing to a lock-out by contractors working for a wholesale clothing house. The workers themselves made no demand of any kind but the contractors by whom they are employed demanded more money per garment from the wholesale house, and were refused; they accordingly closed down and the workers are still out at the end of the month. Boot and shoe workers are fairly busy.

Food and tobacco preparation.—Cigarmakers made a demand for an increase of \$1 per thousand in standard goods, and, while some firms have conceded, one firm has locked out 120 cigarmakers.

Leather trades.—Leather workers, to the number of 25, are out on strike as a result of the dismissal of a union officer. A demand for a Saturday half-holiday was made.

Transport.—All transport workers are fairly well employed on steam and electric roads. Longshoremen have re-submitted their last year's scale for signature to the coal dealers.

Unskilled labour is very plentiful in the city at present, and hundreds of men are

idle. Those that are employed by the city receive 18 cents an hour.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, Correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

April has been an encouraging month to workmen, having been more favourable than March, and comparing favourably with the corresponding month of last year. By the middle of the month the building trades were active, and from present indications there will be much building done during the year, mostly private dwellings. Last year the union scale for bricklayers and masons was 35 cents per hour. By the middle of the season some were receiving 40 cents. Local contractors have not yet signed the agreement presented by the union. In the iron trades many of the factories have worked overtime. The plough factories have been particularly busy. Merchants, wholesale and retail, have experienced a satisfactory month. Coal dealers have reduced the price of coal to \$6.25 per ton. There are a few idle men on the market, but these, it is thought, will soon find employment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The spring has been backwards for agriculturists and very little work up to the last week in the month was done on the land.

Manufacturing.—In all branches of manufacturing carried on here, business has been very active. More men were taken on during the month, and some of the factories have been working overtime.

CONDITIONS OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have had about three weeks' work, bad weather preventing them from working a full month. Carpenters and joiners have worked full time. Plasterers and lathers had a fair month. Painters, decorators and paper hangers have been busy. Plumbers have been steadily employed.

Metal, engineering and shipbuilding trades.—The iron and brass moulding trades have been actively employed. Core-makers have also been active. Machinists in some cases have worked overtime. Metal polishers and buffers have had steady employment. Stove mounters have been busy. Machinery, general and carriage blacksmiths have had plenty of work. Boiler makers and sheet metal workers have had an extra busy month.

Woodworking and furnishing trades.—Woodworkers have been generally well employed. Carriage and wagon makers have had steady work. Pattern makers, millwrights and coopers have had a full month. The Brantford Cordage Company has been working its staff overtime during the entire month.

Printing and allied trades.—Local printers and pressmen have been fully employed.

Clothing trades.—Journeyman tailors experienced an increasing trade over that of last month, and all local men are employed.

Food and tobacco preparation.—Bakers and confectioners report all local men employed. Cigar makers and tobacco workers have had a fair month.

Miscellaneous.—Barbers, clerks, stenographers and delivery employees have had an average month. Hotel and restaurant employees and laundry workers had steady employment.

Transport.—Railroad trackmen have been busy. Freight handlers have experienced a busy month. Street railway employees have worked a full month. Carters were busy. Teamsters report plenty of work for sometime to come. Cab drivers and hackmen had a fair month.

Unskilled labour.—At the close of the month unskilled labour was well employed.

DISTRICT NOTES.

Paris.—The Alabastine Works, destroyed by fire during the month, will be rebuilt at once on a larger scale. The Penman mills have been running steadily; since

the first of the month the Saturday half-holiday, granted to the employees during the summer months, was observed. Towards the close of the month the building trades became active.

Blue Lake.—The Portland Cement Co. has been advertising for labourers.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has somewhat improved since March, but there is no noticeable scarcity of men, nor any number of men out of work. Thus, while there is sufficient employment for nearly all classes of work-people, there is not the activity that prevailed at this season of last year. The erection of a factory, 112 by 50, three stories high, was commenced during the month. It will be used for the manufacture of carriage woodwork in the white. The backward spring season has had a bad effect on outside employment. It was expected that there would be a large number of dwellings erected this summer, the scarcity of which is greatly felt, but it is now thought that the rebuilding in Toronto of the properties recently destroyed by fire will have the effect of raising the cost of materials, and in this way discourage building here. The Petrie Company, Limited, were burned out in the early part of the month, throwing about 60 hands out of work. The loss is about \$100,000. Temporary premises were secured, and a portion of the staff put to work. A strike of tinsmiths occurred during the month for a uniform scale of \$2 per day of nine hours for journeymen; \$1.80 per day for 2-year juniors, and \$1.50 per day for 1-year juniors, with time and a half for overtime, and double time for Sundays. Three firms signed the agreement, but two, employing 8 men, refused, and the strike followed. A strike of galvanizers also occurred at the Tube mills for a rate of time and a half

for overtime and double time for Sunday. The men were replaced by Italian workmen.

The shoe workers have organized an association and purpose putting a new bill of prices for repairs into effect on May 1. They say that the present bill of prices has been in effect for thirty years, during which time there has been a considerable increase in the price of leather and findings. The increase will amount to about 10 per cent.

Contracts have been let for a new factory, to cost \$16,000, to engage in the manufacture of carriage goods.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work in connection with agriculture of all kinds is considerably behind last year. In many places the roads are still almost impassable, and the farmers experience great difficulty in getting over them. The annual meeting of the Ontario in this district had been paid an average price of \$5 per ton for 28,000 tons of beets. Seven million pounds of pure granulated sugar were made. The average extraction of pure sugar was 246.46 pounds per ton.

Manufacturing.—All kinds of manufacturing had a fair month.

CONDITION OF PARTICULAR TRADES.

Building Trades.—The building trades are now all well employed, but the season is about six weeks later in starting than last year. There was considerable work left over from last year. Bricklayers and stonemasons are all employed. Carpenters and joiners had a fair month. Painters and paperhangers had a satisfactory month, with a rush of work at the close. Stonecutters had only a fair month, but all men are now employed.

Metal, engineering and shipbuilding trades.—Iron moulders had a fair month. Owing to a fire throwing about 60 machinists and machinists' helpers out of work, there has been a considerable number left here during the month. Others had a good month. Tube mill workers had a good month.

Woodworking and furnishing trades.—Woodworkers had a fair month. Upholsters had a slightly better month than March. Piano and organ workers report a satisfactory month. Carriage workers and trimmers were busy.

Printing and allied trades.—The printing trades had a very busy month.

Clothing trades.—Tailors are now rushed with spring work.

Textile trades.—Textile workers and Brussels carpet weavers had a good month. In one shop, where a Saturday half holiday is in effect, the staff worked the full week during the month.

Unskilled labour.—There is plenty of unskilled labour to meet the demand, but there seems to be employment for any seeking it.

DISTRICT NOTES.

Galt.—Messrs. Goldie & McCullough will erect new boiler shops 300 feet long just outside of Galt, with switches from both railroads. A company is about to erect a factory for the manufacture of metal ornamentalations for buildings. The C.P.R. Co. intends spending \$25,000 in increasing its accommodation here. A house building company is likely to be formed, the Board of Trade being the promoters.

GUELPH CO-OPERATIVE ASSOCIATION, LTD.

The Guelph Co-operative Association, Limited, recently organized here, commenced business on April 18th by the purchase of an extensive bake shop. Up to the present about \$2,000 of stock has been subscribed by about 400 subscribers, the amount of individual subscriptions ranging from \$2 to \$50. The sales on Saturday, April 23, were about 350 large loaves of bread, and 100 dozen cakes, but the capacity of the bake shop and delivery system was inadequate to satisfactorily supply the regular customers. The directors of the association have decided to purchase additional horses and wagons, and to arrange for a larger output. About

500 customers are being served with bread, but it is expected that this number will shortly be considerably increased. The business of the association is being managed on a strictly co-operative system. Each customer, when buying tickets for bread, receives a slip of tickets with stub attached, this stub is retained by the customer when purchasing. When buying and paying directly, a system of ticket punching is in vogue. These stubs and punched tickets are of different pattern for shareholders and non-shareholders.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The beginning of April was rather dull in the labour market, but as the month advanced a marked improvement was noticed. The building trades in particular became busier, a lot of jobbing being done, and the erection of several new buildings started. The plans are out, and tenders asked for, for the erection of a Roman Catholic church, which is to be built this summer, at a cost of \$15,000. The prospects are bright for the building trades, as a number of dwelling houses are also to be erected. On the 2nd of April 250 employees of the Grand Trunk Railway shops received notice that they were no longer required, as word has been received from headquarters to reduce expenses, owing to the heavy losses the road had incurred during the winter with snow blockades, etc. Upwards of 100 of the men, chiefly mechanics and labourers, discharged left the city. A number of those remaining, especially the labourers, have found employment in the city, while a number of the mechanics are still idle. The working hours of the 650 men employed in the Grand Trunk Railway shops are from 7 a.m. to 6 p.m., excepting Saturdays, when they quit at 11 a.m. Wholesale and retail merchants report business good, and real estate dealers report a scarcity of houses to rent and are doing a good business in the transferring

of properties. There were no changes in the hours of labour nor trouble of any kind in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are sowing their spring crop. They report that the fall wheat wintered well.

Manufacturing.—All the manufacturing establishment are working, and report having plenty of orders

Railroad construction and employment.—The only railroad construction at present under way is the laying of side-tracks in the G.T.R., yards, and the keeping of the old ones in repair.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are commencing their season's work, and expect to have a busy season. The paper-hangers and decorators are satisfactorily employed. Plumbers and gasfitters are rushed with work.

Metal and engineering.—The iron moulders and machinists are all working, excepting those discharged from the G.T.R. shops.

Woodworking and furnishing trades.—Woodworkers report steady work. Factory hands have had plenty of work this month.

Printing and allied trades.—Printers are fully employed. During the month they had their wages raised 17 per cent.

Clothing trades.—The tailoring trade was active, and garment workers were all employed.

Food and tobacco preparation.—Reports regarding these trades were very satisfactory.

Miscellaneous.—Barbers, clerks and delivery employees have had a steady month. There is a demand for girls to work in hotels and general house work.

Transport.—Railroad trainmen are all busy. Cabmen and draymen report business good.

Unskilled labour.—This class of labour is equal to the demand at present.

DISTRICT NOTES.

St. Marys.—Building operations were active. There is a large three story brick block to be built on Queen St., a part of it will be occupied by a branch of the Molsons bank. The large coal sheds of Messrs. Dunseith & Thompson, have been completed.

Milverton.—The Pepper Bros., have started a new chopping mill, with a capacity of 100 bushels per hour. The Milverton Cheese factory has commenced operations.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The late opening of spring has retarded work in the building trades considerably, and workers along these lines have poor prospects for the coming summer, there being no work of large dimensions in sight. A number of workers in these trades have nothing as yet to do and several are leaving this city for other places. In the foundries and factories, however, and on the railroads, work is as active as usual.

Houses renting from \$7 to \$10 per month are in demand, there being no unoccupied ones in consequence of the large influx of working people to the city this spring. Realty transfers during the month of March amounted to \$97,736.

The great fire in Toronto has thrown a large volume of trade to this city, principally to the wholesale dry goods and paper houses, and these places are exceptionally busy; another result of the Toronto fire has been a considerable increase in this city of insurance rates on mercantile and manufacturing risks.

A reduction of one hour per week was made at the G.T.R. car shops, and as all the employees work at so much per hour, it means a general reduction in earnings. In the supplementary estimates brought

down by the Ontario government is an item of \$2,243 for increased wages for the attendants of the London Insane Asylum. As nearly all the building trades have a two year agreement as to wages, which runs another year, no agitation for increased wages is taking place this spring.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Spring work on the farms has been much delayed owing to the heavy fall of snow in April, and the wet condition of the ground. This will mean a considerable increase of work in May. Farm help is very scarce.

Railroad construction.—A large force of men (mostly foreigners) are at work double tracking of the G.T.R. line between this city and Paris, one of the gangs working just east of this city. This work will not be finished until the fall. It is expected that the building of electric railways in this district the coming summer will be on a large scale.

CONDITION OF PARTICULAR TRADES.

Building trades.—The month of April was the worst experienced by bricklayers in this city for years; a few obtained work, but owing to the inclement weather could only make about half time; others have done nothing as yet this year. Carpenters are better employed, the armoury furnishing work for quite a number; the cost of this work has now increased to about \$180,000. Lathers and plasterers have little to do. Painters and paper-hangers are busy, as are also the plumbers. Stone-cutters and builders' labourers report trade as fair.

Metal, engineering and shipbuilding trades.—Moulders are very busy, especially in the stove line, the Toronto fire ruining the stock held by the McClary Manufacturing Co. there. Machinists are all employed. Electrical workers and linemen are not doing much. Metal polishers, stove mounters, boilermakers and blacksmiths are busy.

Woodworking and furnishing trades.—Carriage and wagonmakers are very busy. The force at the G.T.R. car shops was reduced by about fifty at the beginning of the month. Coopers are busy.

Printing and allied trades.—Printers are exceptionally busy, with no idle men in the city. A movement is on foot to organize a pressmen's union here.

Clothing trades.—Tailors have experienced one of the worst winters ever known in London, but at present are very busy. Garment workers are busy; the volume of trade in this line is increasing here. The Sterling Boot and Shoe Factory, which was burned during the winter, is nearing completion, and the firm expects to be able to resume operations in about a month.

Food and tobacco preparation.—For part of the month the force at the packing factory was reduced one-half, owing to the uncertainty of the British market. Two apprentices at a local cigar factory were summoned for leaving their work, but were let off by the police magistrate on suspended sentence. On Thursday, April 21, thirty of the employees of the Tuckett cigar factory here were laid off. The cigar makers in Hamilton have made a demand for an increase in pay to go into effect May 1, and Tuckett's employees here being a branch of the Hamilton firm, are under the jurisdiction of the Hamilton union, would have to go out on strike with them. The firm here has laid off the hands to forestall any action of this sort. There are still about 50 union men employed in the factory.

Unskilled labour.—Workers in this class are nearly all engaged now, street cleaning and other work being under way.

DISTRICT NOTES.

Woodstock:—Contracts have been let for the erection of the new factory of the Woodstock Lumber Company, to cost \$6,000.

The spring floods in this district did much damage to bridges, and many of the smaller ones were swept away. Two of the larger ones will have to be rebuilt, as will also all the smaller ones.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were employed during the past month, the demand for and the supply of workmen being well balanced. The outlook for the coming season also seems very favourable in all lines of industry. In the building trades there may probably be some stringency as the season advances. There is at present a keen demand for houses, and rents are firm and in many instances advanced. The assessment roll for the present year shows an increase of population of 212, the figures being 12,037, as compared with 11,825 last year. The number is likely to be largely increased during the coming year as the result of additional industries. The Père Marquette Railway Company's shops employees will add quite a number of families, and other smaller industries are springing,—notably, a couple of cigar factories and a knitting factory. These concerns, however, are as yet on a small scale. Wages in some lines show signs of advancement. Unskilled labour commands higher rates than last year; this is true also of farm labour, and in the building trades. The bricklayers' union has arranged with the employers for an advance of one cent an hour over last year's rate; 37 cents an hour will be the rate after May 1. The Carpenters' Union has asked for a 22½ cent per hour rate after May 1. Some contractors have granted the request, others have made increases from 17½ to 20 cents, and in individual cases granted the maximum.

The question of municipal ownership of lighting and power plant was much discussed in St. Thomas during the month,

a special committee being appointed by the city council to confer with the manager and board of directors of St. Thomas Gas and Electric Company re the purchasing of its rights and to report to the mayor and council at the earliest opportunity. The committee was also given power to investigate the various methods of producing power and light which the city might adopt.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Many farmers in the district report prospects for the wheat crop rather unfavourable, as much of the acreage is winter killed. The supply of farm labourers is reported scarce.

Manufacturing.—All reports invariably point to a prosperous condition among local industries. Orders are plentiful, and inquiries are good. The volume of business is in advance of that of last year.

Railway construction and employment.—Indications are favourable for a busy summer. Work is plentiful in the locomotive and car shops. An order for 160 new freight cars is on hand, and four new compound locomotives are being built, besides a large amount of repair work. It is probable that the men will be shortly put on full time. The Père Marquette Railway Co. has let a contract for the erection of a modern coal elevator, which will facilitate the coaling of locomotives and effect economy in labour.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work on house building and repairing, which is much in evidence this year, has fairly well commenced. The Père Marquette Railway shops are also under way. Among other larger items in the season's prospects are several business blocks, remodelling of the separate school building, at an estimated cost of \$7,000; the Carnegie library building, an extension to the Thomas Bros'. broom and brush factory, improvements to the gas works to the extent of \$50,000, the extensive works on the subway under the M.C.R. tracks, besides considerable work

in the country district. All building tradesmen were busy with the exception of the painters and paperhangers; the unfavourable weather was a great drawback in this line.

Metal, engineering and shipbuilding trades.—There were practically no changes in these lines, all being busy.

Woodworking and furnishing trades.—Lumbermen report stock somewhat hard to get. Planing mill hands and factory hands were all very busy.

Printing and allied trades.—A steady month's business was reported in these lines.

Clothing trades.—This trade was quite busy, and some difficulty was reported in getting coatmakers.

Food and tobacco preparation.—Bakers report trade normal. The local bakery firms have reduced the price of bread during the month from 6 to 5 cents for 1½ pound loaf. The cigarmakers report favourable conditions prevailing; the wholesale output was far in advance of that of last month.

Transport.—Railway traffic hands report the regular spring reduction in staff as being much larger than other years, owing to the recent addition of a number of the larger type of locomotives, which greatly increase the motive power, and effect a great saving in labour. Teamsters are in good demand, as are also unskilled labourers.

DISTRICT NOTES.

West Lorne.—The West Lorne Wagon Co., capitalized at \$50,000, formerly known as the 'Walkerville Wagon Company,' has let a contract for a new factory. The buildings will be of brick, two stories high. The main building will be 200 x 45 feet, with two wings 55 x 45 feet, and a warehouse 100 x 45 feet. The work will be pushed rapidly, as the firm contemplates moving from Walkerville to West Lorne.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been well employed during April, in contrast to March, which was unusually dull. Building operations were fairly active and contracts have been let for a number of buildings, several of which are already under construction. There is a scarcity of houses suitable for workingmen; the prospects are that a great many of this class of building will be erected this season. Manufacturing in some branches is especially active. The fanning mill and incubator factory have put on a night gang to enable them to meet the demand for their products. Contracts have been let for a large amount of paving and cement sidewalks, and the prospects are that there will be considerable civic work done this season. The steamers and sailing vessels which have wintered here are being overhauled and fitted out for the season's work, giving employment to many mechanics and labourers. Transportation is fairly active, and railway men are correspondingly busy. The journeymen painters asked for a nine-hour day, and 22½ cents per hour; this was agreed to by all the boss painters, except one, who made an arrangement with his men to pay them \$2.25 per day of ten hours. There were no other changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy getting ready for the spring work. There is a good demand for farm help.

Manufacturing.—All local factories were busy and running full time with full staff of hands; some are working overtime.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in these trades is fairly active. Carpenters, painters and plumbers are fairly busy.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers report trade very good.

Woodworking and furnishing trades.—Those engaged in the woodworking trades in the inside carpenter shops, wagon and carriage shops were all well employed.

Printing and allied trades.—Men engaged in these trades were fairly well employed.

Clothing trades.—The busy season for journeymen tailors is now on, and the members of the craft were all busy.

Food and tobacco preparation.—Cigar-makers have plenty of work.

Transport.—All railway employees are fully employed.

Unskilled labour.—Farm hands are in demand, but unskilled labour is not much called for at present.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The first three weeks of April were the quietest for the season that Windsor and district have experienced in many years. Owing to the cold and stormy weather it was almost impossible to work outside. During the closing week the weather was more favourable and all kinds of business improved. The Silex Cement Company has a large gang of men laying sidewalks, and the Street Paving contractors have also a large gang of men and teams paving the streets. Water commissioners are spending \$20,000 in lowering the water pipes and putting in new mains; this has created a demand for labour. The building trade is active. Contracts were let in the third week of the month to the amount of over \$100,000. Plans have been asked for a building 100 x 40 for the manufacture of boilers and tin roofing, which will give employment to fifty hands on opening. A great inconvenience at the present time is the scarcity of houses which prevails.

A number of families have moved here during the last month, and have had to store their furniture and board until they can secure houses. Wholesale and retail merchants report the month of April very quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the cold weather the farmers will be late with their spring work. The market gardeners should have certain products on the market but it will be three weeks before they will be ready. The fall wheat has wintered badly; some of the farmers will not have half a crop.

Lumbering.—The lumber firms report that, owing to the weather, business has been quiet but expect to have all the trade they can handle in a short time.

Manufacturing.—Manufacturing concerns are all running full time and have plenty of work on hand. Owing to the failure of the wheat crop H. Vollins & Sons have given up the manufacturing of flour and have installed one of the latest improved dry kilns in the mill for taking the water out of corn and are manufacturing corn meal, finding a ready market for the same. A large shipment to the West Indies was made this month, the meal being guaranteed to keep in any country.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are all working with plenty of work ahead of them. Carpenters are in demand and are getting from 25 to 30 cents per hour for nine hours. Painters are all busy. Paper-hangers and decorators, and plumbers, gas and steamfitters are working on short time yet, but expect to be on full time the first of the month.

Metal, engineering and shipbuilding trades.—Iron moulders are not very busy at present. Iron workers, machinists, engineers, blacksmiths and horseshoers are all busy.

Woodworking and furnishing trades.—Carriage and wagon makers are very busy getting out carriages for spring trade.

Printing and allied trades.—Printers and pressmen report plenty of work.

Clothing trades.—Journeymen tailors are all fully employed.

Food and tobacco preparation.—Bakers and confectioners report trade quiet for the month. Cigarmakers and tobacco workers are all working.

Miscellaneous.—The barber's union report all men working.

Transport.—All railroad and steamboat employees are busy. Teamsters are in demand.

Unskilled labour.—Unskilled labour is in demand.

DISTRICT NOTES.

Sandwich.—The Saginaw Lumber Company has started its large mill cutting lumber and it is giving employment to one hundred and thirty men. The Bishop Fur Company has increased its staff and is giving employment to seventy-five hands. Contracts have been let for several good dwelling houses to be built as soon as possible, and the chances are Sandwich will be a busy town this summer. There was a small strike at the Bishop Fur Company's works, but it was settled satisfactorily to both parties.

WINNIPEG. MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the latter part of the month the labour market was in a state of congestion. Employment agencies were literally besieged with applicants for employment. Large contributions to the ranks of the unemployed came from the camps, and there is a very observable influx from the United States. Immigration from eastern Canada is also apparently greater, and this, together with other arrivals, has thrown the market into an overstocked condition. Every year, however, April is a critical month with the mass of unskilled workers,

being the period when the many large camp operators release their thousands of employees, who make Winnipeg their headquarters. It is also an uncertain month from the standpoint of weather. In some years the frost will leave the ground in the earliest part of the month, and in others, like the present one, the weather continues cold well on towards the close of the month. This delays such work as railroad construction, which usually absorbs a large portion of the labour available. Another cause of the congestion was due to the influx of labour a week or two earlier than was necessary. It is conceded, however, that by the second week in May there will be work for all seeking employment. By that time the city of Winnipeg's public works will absorb at least one thousand workmen. In the skilled trades the most numerous class of unemployed is the carpenters; the influx of this class of workmen has been abnormal, and already has had the effect of slightly depressing the rates of wages in that trade. Other classes seem to be well employed.

Among new industries commencing, are a new machine works and iron foundry, a garment factory, and a planing and woodworking mill. A large lumber mill is also approaching completion.

A local chartered bank is being formed with a capital of \$2,000,000; the stock is being offered at par, and the provisional directors are prominent local business men. The name of the bank will be the 'North-ern.'

The Northern Elevator Company has prepared plans for the erection of a flour mill in Winnipeg. It will be constructed of concrete, brick and stone. Its capacity will be 2,500 barrels daily, and it will be completed to grind the wheat crop of 1904. The Vulcan Iron Works will add another large building to its plant. It will be 64 x 165 feet, and will be used exclusively for a blacksmith and machint shop. Plans are being prepared for an agricultural college. The Manitoba government has is-

sued an order in council providing for the election of ten directors, who will govern the college, appoint professors, fix the fees and draw up the curriculum.

Building has already commenced with vigour. The inspector has issued permits which aggregate \$2,000,000, being more than double that of the corresponding period of last year.

Business activity and expansion prevails. Some complaints are being made with regard to collections. This is ascribed to a proneness on the part of farmers and storekeepers to speculate in land. The money that should be used to meet their regular obligations is being invested in real estate.

There have been no change in the rate of wages, excepting with regard to carpenters. At the close of last season the rates generally paid to carpenters were 35 cents per hour. This year many are being paid 30 cents, and some even as low as 25 cents. No serious disturbance or change in relations between employers and employees has taken place during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding is general and so far the season has been good. The prospects are very much in favour of largely increased acreage. There has been a good supply of labour and all demands have been freely met.

Manufacturing.—Generally speaking, manufacturing in the city has been active, and the factory-owners are looking optimistically to the future.

Railroad construction and employment.—At the close of the month practically no arrangement had been made to start railroad construction by any contractor. The presence of frost in the earth is the cause of the delay. The Canadian Pacific Railway Company will require a large number of men to carry out its local Winnipeg improvements, in addition to a very large amount of construction work. The Cana-

dian Northern Railway's projects for the season include the completion, or as much of it as possible, of the line to Edmonton, which is now finished to Kamsack, where a divisional point has been established; the line to Prince Albert, a distance of sixty miles from the present terminus at Melfort; also the lines from Carberry to Brandon, Arizona to Carberry, the Greenway and Ridgville branches, the line from Winnipeg to Oak Point, Lake Manitoba, and the Clan William extension. The company also purposes to grade from both the east and west ends of the Edmonton line, and will make an effort to reach Edmonton by next winter. The Prince Albert line will be pushed to completion at once, but the bridge which has to be built over the South Saskatchewan, fifteen miles east of Prince Albert, will not likely be erected until next winter. The new mileage added to the system this year will aggregate something a little less than six hundred miles. This projected work alone will give employment to a very large number of men, and other companies are also making extensive plans. There will, therefore, be abundant opportunity for unskilled help before the end of May.

CONDITION OF PARTICULAR TRADES.

Building trades.—All of the building trades, with the exception of carpenters, are fully employed. In other lines the employers anticipate no difficulty in securing all the men they require. The influx of skilled mechanics has been very large already, and many more are likely to come. There is but little doubt that the building to be done will be twice as great as that of last year, but this has been fully anticipated. From the United States there is a large emigration, and the rate at which mechanics are coming in makes the possibility of an over-supply by no means out of the question.

Metal, engineering and shipbuilding trades.—Activity prevails. There is, however, no accentuated demand for men.

Woodworking trades.—Woodworking factories during the month have not been very busy, excepting in one or two cases. All the mills, however, expect to be running at their fullest capacity in the course of a few weeks.

Printing and allied trades.—These trades are normal. The negotiations initiated by the men for a shorter work-day have been suspended for a year.

Clothing trades.—Journeymen tailors and garment workers are all well employed. The former are enjoying a splendid spring business, and the latter, while a little slack at present, expect to be busier in the course of a few weeks.

Food and tobacco preparation.—Cigar factories are normally active, and likewise the bakers.

Leather trades.—The leather trades are fairly busy, but not particularly so. Some classes of work-people are needed, but only a very limited number.

Miscellaneous.—Miscellaneous employment is better than usual, but there is a very large influx of labour, which is more than supplying demands.

Transport.—The opening of navigation will as usual make transportation more rapid and call into requisition a larger staff.

BRANDON, N.W.T., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Business generally throughout the city is fairly active for this season of the year. The building season has not fully opened yet, but indications point to a very busy one in this line of trade. The supply of labour, both skilled and unskilled, exceeds the demand at the present time, owing chiefly to the recent great influx of settlers both from Europe, the eastern provinces, and the United States ; as soon as the season is fully opened, however,

a great number of these will find steady employment. There has been no exceptional activity in any line of trade, with the exception of the manufacture of building materials. Transportation companies also are very busy, owing to heavy shipments of merchandise from the eastern provinces. Wholesale trade is showing considerable expansion, the demand extending to all departments. There were no changes in rates of wages or hours of labour, and the labour market was free from disturbance.

Statistics recently issued from the office of the city clerk show a substantial increase in population and property values in Brandon, Man., during the past year. The assessment roll shows that assessable property has increased by \$675,000 and non-assessable property, such as churches, C.P.R. station and yards, &c., has increased by \$1,000,000. The population has increased by about 800 persons.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In some localities seeding would have been well under way in the latter part of April but for the snow storms.

Lumbering.—The action of the Canadian Pacific Railway Company, in dealing with the lumber supply of this province and the Territories, has given general satisfaction in so much that it is expected to result in the establishment of an open market for lumber. It is stated by the company that agents will be appointed at once and price-lists posted, to see that all lumber dealers live up to the conditions agreed on. Should the plan prove not satisfactory, the company, it is stated, will probably operate mills on its own timber districts in British Columbia, and supply settlers throughout the west and Manitoba.

Manufacturing.—Manufacturers of building material anticipate a very brisk season, as orders now on hand exceed those of any previous year.

Railroad construction and employment.—It is reported that active operations will

commence early in May, with a large number of men in employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report not very many employed at present. There are very few idle carpenters, however in the city, and a large number have had steady employment during the winter. With lathers and plasterers and builders' labourers the season has not yet opened to any extent. Painters and paper-hangers find trade fairly good. With plumbers trade is slack.

Metal, engineering and shipbuilding trades.—Steam engineers, machinists, blacksmiths and boilermakers are busy. With horseshoers trade is fairly good. Jewellers and watchmakers are busily employed.

Printing and allied trades.—Printers and pressmen report trade somewhat dull.

Clothing trades.—Journeymen tailors and garment workers are busily employed. Boot and shoe workers find trade good.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters find trade very good. With ice cutters and drivers business is slack. Cigarmakers are active.

Leather trades.—Tanners and curriers are slack. With leather workers, saddlers, &c., trade is active.

Miscellaneous.—Barbers are busy. Clerks and stenographers report trade good. Delivery employees are very busy. Furriers find business slack. Hotel and restaurant employees, and laundry workers are busily employed.

Transport.—Men engaged in all branches of the railway service were very busily employed. Freight-handlers find business brisk. Draymen, carters, teamsters and expressmen were busily employed.

Unskilled labour.—Quite a number of recently-arrived immigrants have been engaged by farmers throughout the district.

A number have also been employed by the city and railroad company in the work entailed by the snow blockades.

DISTRICT NOTES.

Business throughout the district is very satisfactory as far as can be ascertained, in spite of the snow storms during the last week in March, which were very heavy and which seriously affected the railways and business generally. It is reported that ranchmen in the west will lose considerably. It is anticipated that seeding will also be somewhat delayed, owing to the snow storms which prevailed up to the 7th of April.

ROSSLAND, B.C., AND DISTRICT.

Mr. R. A. Laird, correspondent, reports as follows :—

DISTRICT NOTES.

April was a month of badly interrupted traffic, owing to the many landslides which occurred in the interior districts of British Columbia. This is the usual feature of this period. The closing days of the month saw matters practically straightened out, however, and little further trouble is anticipated. The industries of the district are dependent upon unrestricted transport facilities, and the various blockades have affected the situation somewhat.

About April 10 the weather suddenly turned unusually warm, and the sudden thaw set free a huge volume of melting snow that would otherwise have gone off slowly. The sudden thawing of the ground, combined with the melting of the snow, also released great bodies of snow in slides, and where these carried with them boulders and earth the result was disastrous. At least two fatal slides are recorded, the death loss being four. Traffic was blocked on many roads and every man who could be secured was enlisted in the extra gangs sent out by the railway companies to cope with the situation. One road, the Spokane Falls & Northern, which constitutes the connecting link between Spokane, Wash., and Rossland, was tied up for an entire

week. On the Slocan branch of the Canadian Pacific a slide came down at Winlaw's mill and tore out 300 feet of rails. The damage was repaired but the work was no sooner finished than another slide came down in the track of the first and undid what had been done. This happened five times, a striking instance of the difficulties sometimes encountered in keeping mountain railways open in the slide season.

The most disastrous slide occurred on the 11th inst. at Albert Canyon, on the main line of the Canadian Pacific. A work train was making repairs at that point when a slide was heard on the hillside. The superintendent of the division, who was aboard the train, instructed all to remain within the car. One of the men, however, went to the car door to ascertain if there was a chance to escape by running. He was followed by two Jap labourers, and the three were caught on the car platform and dashed down the mountain side. The car was carried eighty feet down the canyon but the occupants escaped with more or less serious injuries. Had the three men remained within they also would probably have escaped death.

A second disastrous slide took place on the 15th inst. at the mining properties of the Great Western Company in the Lardeau. One man was killed and damage to the extent of \$50,000 to \$75,000 was done to the company's tramway system and ore houses.

Another incident of the month that received considerable public attention was the suspension of ore shipments from the Le Roi mine in Rossland, which had shipped 800 tons of ore daily for a long period. The product is treated at the Northport smelting works, owned by the Le Roi Company. The reason for the action taken was that the smelter ran short of iron ores with which the highly silicious product of the Le Roi is fluxed. Practically all the mines shipping ferruginous or heavy iron ores send their output to the railroad by wagon roads and the breaking up of the roads with the advent of warm weather shut off

their means of hauling. At the Le Roi all the men engaged in breaking ore were laid off, the crew being reduced from 430 to 270. Subsequently some of these men were re-employed, and it was intimated that at the end of the month the balance would be put at work again. On this understanding few of the men left the camp. In other respects the mining industry in Rossland has progressed smoothly, and in some instances crews were increased.

That the silver-lead mining industry of the Kootenays is entering upon an era of prosperity is evidenced by the fact the St. Eugene mine is resuming operations with a full crew. This property is considered to be one of the greatest lead mines on the continent, and the conditions surrounding it are such as to constitute it a particularly reliable barometer of conditions in the lead industry as a whole. The company announced two years ago that no more ore would be taken from the mine until a fair measure of profit could be realized therefrom. About 200 men will be engaged at the mine and milling works.

The East Kootenay Brick and Fire Clay Manufacturing Company, Limited, is applying for incorporation. The company is to be capitalized at \$30,000, and to have a capacity of 12,000 per day on the start. The company, it is said, will be able to put building bricks on the market at Fernie at from \$10 to \$12 per thousand.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions during April were exceptionally favourable. There is in particular a good demand for carpenters, painters, plasterers, bridge builders, tinsmiths, blacksmiths, farm and general labour. The city council has a large number of men at work on civic works. The provincial government is erecting another approach to the new bridge at the south side

of the river for the convenience of the farmers using the road to the lower Fraser. The Rat Portage Lumber Company is asking for a lease for fifty years of the foreshore and land to erect a sawmill, the condition being that the mill will cost \$30,000 and employ not less than fifty men. The new fruit and preserving company has its factory ready to handle the earlier fruits offering. The company expects to employ from 25 to 50 hands. The British Columbia Electric Railway Company is calling for tenders for the erection of a new distribution station for the electricity generated by the water power at Lake Coquitlam. There has been no general change in rates of wages or hours of labour, but the demand in some lines has a tendency to advance wages.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—A flat rate of 20 cents per sockeye was agreed upon during April as the rate the Fraser river cannery would pay fisherman this season, to apply from the commencement of the season in July to the close in August. The matter was finally settled at a meeting of the Fraser River Cannery Association held on April 12. Last year the initial offer made by the cannery was a flat rate of 12 cents, or a sliding scale, amounting to about the same. Later the offer was amended to one of 15 cents for July, and 14 cents for August. The arrangement for the present year has given general satisfaction.

Chinese conductors, at a meeting held on April 11, decided not to enter into any contract to pack fish unless the cannery guaranteed them the price of 75 per cent of their contracts. It is claimed that they operated during the past two years at a loss by the reason of having contracted to put up packs which did not materialize on account of the poor runs of fish, although their arrangements were made for a large pack. An increase in price of putting up salmon, from 48 cents to 50 cents per finished case was demanded, the reason alleged being the scarcity of Chinese labour

owing to the working of the increased head-tax.

CONDITION OF PARTICULAR TRADES.

Building trades.—All classes are very busy, a large number of new residences being under construction, and the usual spring trade being active.

Metal, engineering, and shipbuilding trades.—These branches are very busy, cannery work and steamboat repairs being under way. Shipwrights and caulkers report work not very active, many of the men making short time.

Woodworking and furnishing trades.—Work is reported plentiful in the local car shops. The management is increasing the staff each month. At the present time about 35 men are employed at wages averaging \$3 per day for metal workers, woodworkers and painters. Shingle weavers are all fully employed, with good prospects for some time to come.

Printing and allied trades.—Printers report work plentiful.

Food and tobacco preparation.—Cigar-makers report work plentiful.

DISTRICT NOTES.

A large number of new settlers continue to arrive and large transfers of farm property have taken place.

A large number of men are engaged at the *Slave River Falls* in developing the water-power there. A canal is being cut whereby this valuable water-power will be made use of for the steadily increasing requirements of this city and district.

Several new shingle mills are in course of construction throughout this district.

Kamloops has under consideration the establishment of a local creamery.

Chilliwack.—The Dominion government's Public Works Department has a large gang of men employed here on the river improvement work.

The farmers of *Surrey* have incorporated under the Provincial Act as the *Surrey Co-operative Creamery Association*.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month there has been a large number of arrivals of workmen from the United States, especially from the bordering states, as well as from the Territories in Canada. Applications for work are very numerous; as many as 150 a day have been made at the city hall, where a sign has been posted that *No men are wanted*. This inrush is accounted for by dullness in the neighboring states. The skilled trades, however, are nearly all employed. A large factory for the manufacture of wooden pipe for sewers, &c., has been started. The carpentering trade is exceptionally busy, as well as are the stonemasons. The strike of boilermakers and machinists in the Vancouver Engineering Works is still on. At the Sugar refinery another large building for office purposes is being constructed, worth probably \$10,000. Some 300 building permits have been issued during the month. Further improvement in business is reported by dealers. Collections are generally satisfactory. Northern orders are beginning to come in, some heavy orders for the Yukon being already reported. The lumber trade shows an improvement, and mining in the interior is active. Local fresh eggs are almost unobtainable, while California eggs are one and two cents a dozen higher. Hay is very firm at \$20 a ton.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from adjacent rural districts are that the putting in of the crops has been kept back by the weather.

Lumbering.—The lumber mills as a rule have been busy; with the factories business has been only fair. The announcement on April 23 that the Hastings mill and tributary camps were to close down temporarily was a severe blow to the labour market. Hundreds of men are involved, and \$30,000 was distributed monthly by

the firm. Unfavourable market conditions were alleged as the cause of the shut down.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report prospects good; work at present is only fair. Carpenters and joiners were busy, with good prospects. About 30 plasterers, including journeymen and bosses, were well employed. The 20 lathers are busy. Plumbers and steamfitters, painters and decorators are fairly well employed, with no openings. If it were not for the big inrush of men there would be plenty of work for builders' labourers who are permanent residents of Vancouver, but as things are the supply of men far exceeds the demand, and prospects are uncertain.

Metal, engineering and shipbuilding trades.—Iron moulders find trade quiet, with no demand for men. Machinists report trade very quiet, with several out of work, a large number of new arrivals having more than met the demand. Steam engineers report no demand for men. All resident electrical workers and sheet metal workers were employed. Blacksmiths find work quiet. Boilermakers report business good in the boiler shops, but no demand for extra men.

Woodworking and furnishing trades.—Coopers are very busy.

Printing and allied trades.—An association of the master job printers was formed for the purpose of regulating prices, and protecting the public from unscrupulous concerns. With the journeymen trade has been fair, but there is a surplus of machine operators. A committee has been appointed by the master printers and the Typographical Union to regulate the apprenticeship system. Indenturing appears to be favoured.

Food and tobacco preparation.—A co-operative bakery has been formed, and will begin operations on the first of May.

Miscellaneous.—Clerks are only fairly employed, and many are idle.

Transport.—Teamsters report work good.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market shows few changes since last month, excepting in the building trades, which are at present very busy, with excellent prospects for a good season. The usual series of local improvements, including cement sidewalks and sewers, will start immediately, giving employment to a large force of labourers. The British Columbia Electric Railway Company, has a large force of men extending its line along Government street. Point Ellis bridge has been completed and turned over to the city. Trade, both in the wholesale and retail lines, has been good. There has been no change in the rates of wages or hours of labour during the month, and friendly relations between employer and employees have continued up to the present.

CONDITION OF PARTICULAR TRADES.

Building trades.—This month has been good for the building trades. Bricklayers, masons, carpenters, lathers and plasterers report work brisk. Painters and plumbers report an abundance of work and all employed. Stonecutters have also been well employed during the month, and there is a good demand for builders' labourers.

Metal, engineering and shipbuilding trades.—Machinists and engineers have had a poor month, with a few still unemployed. Electrical workers, linemen and iron moulders report having fair employment. Blacksmiths and horseshoers are all employed. Boilermakers report a fair month. Shipwrights and caulkers report work quiet, and but few working.

Printing and allied trades.—Printers, pressmen and bookbinders are fully employed.

Clothing trades.—Journeyman tailors report work fair, and improving. Garment workers are all busy.

Food and tobacco preparation.—Bakers report business good, and butchers are all employed. Cigarmakers are satisfactorily employed, and report business very good.

Leather trades.—Leather workers report work good and all employed.

Miscellaneous.—Barbers, clerks and delivery employees have had a good month. Laundry workers are fully employed.

Transport.—Longshoremen, steamboatmen and firemen report work good. Teamsters are all well employed, and expressmen report having a fair month. Street car employees are also well employed.

Unskilled labour.—While there has been a good demand for unskilled labour during the month, there is still a great number idle.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district, while not up to the average, has improved slightly during the month, and prospects are better than at this time last year. The supply of labour, however, is still in advance of the demand. In the lumber trade there is a visible improvement with good prospects for a good season. The coal mining camps in the district are working to their full capacity, and in the city, while the output from the mines is not increasing much the company is making expensive and very substantial improvements to its machinery and other plants—a policy which promises to improve conditions here in the near future. In business circles, while there is no marked change, there is feeling that the times are going to improve. There have been no changes in the rates of wages during the month, and no signs of industrial unrest.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is little doing among the fishermen at present.

Lumbering.—Lumbering shows signs of improvement. The local mill is manufacturing cedar lumber on a large scale and a man is securing orders in the North-west.

Mining.—In the quartz mines there is very little change to report and the smelters in the district are running full blast. In the coal mines the different companies are working to their full capacity, and a good deal of development work is going on as well. The Willington Coal Company is building a short branch to its railway, but the work is done principally by Chinamen.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters report an improvement in trade during the month. Bricklayers and masons report very little doing. Painters report work as picking up.

Metal, engineering and shipbuilding trades.—Blacksmiths and carriage-makers report business as fair.

Printing and allied trades.—Printers report work as fair.

Transport.—Teamsters and expressmen report work as good.

Unskilled labour is doing better this month than during March, but there is no rush of work and there are plenty of men to meet all requirements.

DISTRICT NOTES.

At *Cumberland* the company is pushing development work and the output of the mines is steadily increasing. The same may be said of the mines at *Ladysmith*.

INVESTIGATION OF RAILWAY ACCIDENTS BY DOMINION GOVERNMENT INSPECTOR.

STEPS were taken by the government of Canada during the month of April to afford more adequate protection to the travelling public, as well as to the employees of railway companies, by the appointment of an officer, under the Railway Act of 1903, whose duty it will be to investigate all accidents occurring on railways, and report thereon to the board of railway commissioners appointed by the government in February last. The appointment was by Order in Council, dated April 5, Mr. Joseph E. Duval, formerly car service agent of the Canada Atlantic Railway Company, being selected for the position.

Legislation Relating to the Investigation of Railway Accidents.

The appointment of Mr. Duval was made under the sections (1) of the Railway Act of 1903, which relate specifically to accidents. These require, in the first place,

that every railway company shall give immediate notice to the board of commissioners, in a form to be specified by the board, of any accident causing personal injury or such damage to roadway as renders the road unfit for immediate use, under a penalty of \$200 per day for each day during which the omission to give notice continues. (2) Specific provision is also made (3) for the appointment of an officer or officers to investigate into all accidents thus reported as occurring upon railways, or into such matters as, in the opinion of the board, may be likely to cause or prevent accidents. Full reports in writing of all such investigations are to be made to the board (4), embodying the proceedings and opinions of the inspector, the board being given express power to act on these reports, and, if it thinks proper, to require

(2) 3 Ed. VII., chap. 53, sec. 235.

(3) Ed. VII., 1903, chap. 53, sec. 236, subsec. 1.

(4) 3 Ed. VII., 1903, chap. 53, sec. 236, subsec. 2.

(1) 3 Ed. VII., 1903, chap. 53, secs. 235, 236.

the suspension or dismissal of any railway employee whose negligence or wilfulness was, in the opinion of the board, the cause of the accident in question.

The duties of the inspector will include the general supervision and administration of the provisions of the Act which relate to equipment, apparatus and appliances on trains, more especially those which are designed for the protection of employees from accidents, with the possible addition of other duties, as, for example, the instituting of special investigations from time to time into cases of car shortages, track conditions, and the like.

Previous to the passing of the Railway Act of 1903, which provided for the appointment of the Railway Commission and the assumption by that body of the general powers and duties formerly exercised by the Railway Committee of the Privy Council, the law requiring notification of accidents to be given by railway companies was substantially the same, companies being allowed 48 hours in which to make their report, (5) at present, however, such

notice must be given immediately after the head officers have received information of the occurrence of the accident. (6) With regard to the investigation of such accidents under the previous Act, the Governor in Council was empowered to appoint a commissioner or commissioners, on the recommendation of the Minister of Railways, to inquire into the cause of the accident (7) and to report thereon to the minister, (8) the remuneration of such commissioners to be paid out of moneys provided by parliament for unforeseen expenses. (9)

It will be seen that the duties of the inspector under the new Act are of a much more general nature, including the investigation and reporting on the general principles governing safety in railway traffic and employment, as well as on particular instances of accidents to life or property.

APPOINTMENT OF A BOARD OF CONCILIATION AND MEDIATION AT HAMILTON, ONT.

DURING the month of April a permanent tribunal of conciliation and mediation for the settlement of trades disputes was organized at Hamilton, Ont., by the joint action of the local Trades and Labour Council and the Hamilton Board of Trade.

The movement for the appointment of a standing board of conciliation had its origin in a motion discussed before the Hamilton Trades and Labour Council in September, 1903, to the effect that a communication be addressed to the Board of Trade proposing the formation of a joint board of conciliation and mediation in the interests of industrial peace. The motion carried by a large majority, but before sending the letter in question the matter

was referred for approval to the several individual unions represented in the council. This was in every instance obtained, and the proposal was formally presented.

Proposal of the Trades and Labour Council.

In its original proposal, the Trades and Labour Council, after referring to the amicable relations existing between the employing and the wage-earning classes in Hamilton, and the importance of insuring the continuance of these relations, suggested that there should be formed a committee of conciliation, composed of three or five members of the Board of Trade and the same number from the Trades and Labour Council, this committee to be ready

at all times to tender its services whenever a strike or lock-out was threatened or had occurred, for the purpose of effecting a friendly settlement by inducing the parties to agree, if possible, by mutual concessions or otherwise. It was further recommended that in cases where a dispute had been referred to the committee of conciliation and both parties had bound themselves to accept its decision, the finding of the majority of the committee should rule, the committee being given power to add to its number, in case of a deadlock, one member, who should have no connection with the dispute.

In submitting this proposal, as above, the Council pointed out that its suggestions were to be understood merely as offering a basis for consideration, and that it would be happy to appoint a committee to confer with a similar committee from the Board of Trade with regard to any variation that might seem desirable, or any new proposal having the same general objects in view.

Subsequent Action.

Immediate concurrence in the suggestion of the Trades and Labour Council was expressed by the Board of Trade on receipt of the communication above referred to, and a special committee of three members was appointed to confer with the committee of the Council with regard to the formation of the proposed board of conciliation. A number of joint conferences were held by the committees of the two bodies, with the result that a scheme of organization was finally agreed upon. The main features of this are embodied in the committee's report to the Board of Trade.

Plan of Organization.

In submitting its plan of organization for the new tribunal to the approval of the

Board, the committee referred at some length to recent developments in the United States in the way of providing better machinery for the preservation of industrial peace. The late Senator Hanna was quoted as to the supreme importance of bringing labour and capital into closer relations. Reference was also made to the proceedings at New York, December 16, 1901, of the 'National Conference on Industrial Conciliation,' at which the public, the employers and the wage-earners were all represented by many of the most notable public men of the United States, including ex-President Cleveland, Mr. Hanna, Mr. Schwab, Mr. Gompers, Mr. John Mitchell and others. Several of the findings of the conference are quoted, among them one specifically advising the creation of boards of conciliation. The appointment of such boards in Chicago, New York and elsewhere is noted. The committee set forth the plan of organization of the local board which had commended itself to the joint committee, as follows :

'Your committee recommends that this Board appoint a permanent committee of seven, to be known as a "Board of Conciliation and Mediation," out of which there shall be selected from time to time a committee of three to co-operate with a similar committee to be appointed by the Trades and Labour Council, which shall constitute a board, which, at the initiative and upon the request of any employer of labour or any body of wage-earners, shall offer its services to secure the adjustments of disputes as they may, from time to time, arise.'

On unanimous ratification by the Board at the meeting held on April 11, and a similar recommendation having received the approval of the Trades and Labour Council, the proposal went into effect.

The organization of the new tribunal was not completed at the end of the month.

COLONIZATION IN QUEBEC.—REPORT OF PROVINCIAL COMMISSION OF INVESTIGATION.

THE report of the special commission appointed by the Government of Quebec in 1902 to investigate and report on matters pertaining to colonization and the forest industries of the province, was presented to the Provincial Legislature in incomplete form on April 7, 1904, the balance, extending in all to over 600 printed pages, being subsequently made public during the course of the month.

The proceedings of the commission have, from time to time during the past several months, considerably engaged the attention of the public, and the publication of its report, in view of the important issues with which it had to deal, has been awaited with much interest, having been mentioned in the course of the Speech from the Throne, with which the legislature opened, as one of the leading subjects that would engage the attention of the members.

The following is a brief résumé of the circumstances which led to the appointment of the commission, together with an outline of the more important results of its investigations, as set forth in the report.

Appointment and Proceedings of the Commission.

For a number of years past in the province of Quebec the whole question of colonization and the relations of settlers in the newer portions of the province to the holders of licenses to cut timber was the subject of much discussion, and of a number of conflicting statements. Specific charges were laid, both of injustice done to colonists by the timber licensees and of frauds committed against the latter by the holders of grants of land for agricultural purposes. In order to obtain an impartial and thorough investigation of the situation, and a statement based on reliable authority as to the best means of developing the great national resources of the unsettled portion of the province, a special Act was passed by the legislature in 1902*

authorizing the organization of a commission 'to assist in the advancement of colonization and in the development of forest industries.' The commission, it was stated, should consist of three members and a secretary, and the duties assigned to it were, briefly, to investigate the law and regulations regarding public lands and forests, colonization roads, &c.; to investigate the clashing of interests between settlers and holders of timber licenses; to report on the sections of the country most favourable for colonization, and on the roads and railways necessary to develop them, and to recommend to the province the extent to which it might be advisable to assist the colonization and development of the various industries.

The commission was appointed by order in council dated June 14, 1902, and held its initial meeting in Montreal on the 29th of the same month for purposes of organization and preliminary inquiry. From time to time during the succeeding three months meetings were held and various inquiries instituted, individual members of the commission examining witnesses in different districts. The death of Mr. Justice Bourgeois, one of the commissioners, however, in October, 1902, caused the original commission to lapse. It was reconstituted in February, 1903, and held meetings at Quebec, Montreal, Hull and other points, examining 325 witnesses in detail, as well as receiving valuable information from other sources.

In presenting its report, of which a summary follows, the commission divided its subject-matter into two parts, relating respectively to the facts ascertained, and to its recommendation as based thereon.

Relations between Lumbermen and Settlers.

The chief attention of the commission, in the part of the report devoted to the presentation of facts is directed to the rela-

* 2 Ed. VII., 1902, chap. 3.

tions existing between settlers and the holders of timber licenses, which have been the subject of so much discussion. The finding of the commission is that, practically speaking, *bona fide* settlers have no real ground of complaint. So far is it from the truth that antagonism is felt towards them by limit holders, that some of the very largest holders declared under oath that they regard *bona fide* settlers as allies who render them most valuable services. There may have been a few instances to the contrary, but the rule is as stated.

The charge preferred by the officers of the colonization society of Montreal, that license holders had sometimes cut timber on the settlers' lots after the latter had taken out their licenses was found to be without warrant, and the commission severely deprecates the publication of such statements by responsible agents without full verification having been obtained. On the other hand frauds committed against the lumbermen by speculators in settlers' lots were found to have been frequent. The charge that timber below the regulation diameter was being cut was also proved unfounded. Moreover, the statement that settlers' lots were stripped of timber by the licensees was contradicted, the fact being that wood sufficient to enable a settler to support his family for two or three years was usually left. On the other hand, speculation was stated to have reached such a degree as to imperil the existence of the industries of the country, rendering the establishment of pulp and paper mills, &c., almost impossible. The circulars issued by the Quebec government in April and May, 1903, to land agents, prohibiting the sale to settlers of lands under license, is regarded by the commission as being aimed at illicit speculation, and not responsible for the recent falling off in the volume of settlement, which is rather to be attributed to the prevalence of forest fires and the high wages prevailing in cities. As compared with Ontario, the situation of settlers under the Quebec regulations regard-

ing limit holders is stated to be very favourable.

The Agency Service.

The agency service of the Provincial Crown Lands Department is severely condemned, the majority of the officers being described as inactive, careless and negligent. The reform of the service should be undertaken at once, in view of the important results that active agents might achieve for colonization.

The Area of Crown Lands.

On June 30, 1903, there were surveyed and available for colonization purposes 6,600,747 acres, or sufficient for 66,000 farms of 100 acres each. Further surveying, therefore, is for the present unnecessary. Surveyors' reports, however, were found 'lamentably inaccurate,' with disastrous results for many settlers, who had relied upon them for their information relating to locations.

Colonization Roads.

From the union of Upper and Lower Canada in 1841 to June 30, 1903, the sum of \$5,262,889.88 has been spent on colonization roads in Quebec. Many counties, however, complain of lack of roads, and dissatisfaction, in the opinion of the commission, will continue as long as better methods of the dissemination of settlers are not followed. With colonization proceeding in detached and isolated groups it is impossible to provide sufficient roads.

Colonization Societies.

Societies whose method has been to purchase areas of land from the government and re-sell the same to themselves as settlers have been a source of much embarrassment and loss to the government. Those that obtained reservations of lands and to whom the government gave grants proportionate to the numbers of subscriptions paid by members, have proved of much benefit, but the system is now out of force. A third class of colonization societies, namely, diocesan societies collecting money in aid of the settlers, are recommended by

the commission, as are also, in some cases, societies that recruit settlers by advertising in Europe, the United States and in Canada, being composed chiefly of mutual benefit societies, colonization bureaux, &c. The Montreal Colonization Society, however, which belongs to this class, is condemned for its action in circulating inaccurate reports.

Forest Fires.

The report contains a reference to some of the more disastrous fires that have occurred and the causes that are chiefly responsible for the prevalence of this evil. Reference is also made to the effect that may be produced on the climate of the province by the denudation of the mountains, the effect of the same on the rivers and streams and water-powers which they furnish being specially referred to.

Other subjects referred to are the classification of lands into settlement lands and timber lands, which is recommended; the granting of public lands, in which matter it is stated the Crown Lands Department has been guilty of extravagance contrary to the interests of the country; the cancellation of leases; the preventing of clandestine transfers, and other matters.

The advantage of appointing trustworthy guides to assist settlers in fixing upon a location is also pointed out. The danger of allowing bush rangers to reside too remote from the field of action, and in general the tendency of exaggeration and false statements in regard to the whole subject of colonization are referred to.

Recommendations of the Commission.

The following are, in brief, some of the more important recommendations which the commission presents as a result of its investigation :—

(1.) *Re free allotments to settlers.*—Every means should be taken to avoid delays to settlers. The power of disallowance, which the government may at present exercise during four months from the date of the location ticket should be suppressed. The

public domain should be rigidly divided into settlement lands and merchantable timber lots, the former including only lots susceptible of proper cultivation. To put an end to speculation in timber, a settler should be compelled to give the preference for the sale of such timber as he may cut to the holder of the timber license in which his lot is contained. A system of automatic cancellation of licenses should be enforced. Location tickets should be forfeited for non-performance of conditions, with compensation to the dispossessed party for his outlay. More care should be taken by agents in securing proper declarations from intending settlers, so as to prevent the issuing of location tickets to persons buying solely for the timber. The immediate registration of transfers of lands should be compulsory under penalty of a fine. The affidavits of settlers for stumping dues should be more carefully attended to. Lots on which there is merchantable timber should not be granted under the Act providing for a free grant of land to fathers and mothers of 12 children, nor should it be possible for such grants to be sold or otherwise alienated. A policy of forest reserves on lands unfit for cultivation should be instituted, the action of the Bankers' Association in recommending this being pointed out. The proposal to sell the timber with the lands to colonists is condemned on the ground that it would stimulate speculation and virtually lock up the public domain against colonization and agriculture.

(2.) *Re protection of forests.*—The present system of fire protection is denounced as ineffective, especially in the eastern part of the province, where political influences have caused the post of fire rangers to be filled with unqualified men. This should be corrected at once. The statute which prohibits the making of fires for land clearing, except between June 15 and September 15, should be amended, as the most dangerous interval is between April 15 and June 15. The whole subject, moreover, should be left at the discretion of the fire

rangers. Settlers, moreover, should be instructed as to the proper method of setting fires. Roamers in the woods, squatters and Indians should be legislated against.

(3.) *Re cancellation of lands.*—Lands under location tickets upon which no improvements have been made should be immediately cancelled.

(4.) *Re firewood lands reserves.*—A system of reserves from which the inhabitants of the neighbourhood might procure firewood and building timber from the government would prevent speculation and ensure the prompt meeting of a legitimate want of the settlers.

(5.) *Re wood measurements.*—The least diameter for black spruce, which is the best wood for pulp making, should be lowered to eight inches at the stump. The limit for cedar, on the other hand, should be raised from 9 to 12 inches. Measurements of such diameters should be taken at 24 inches from the ground.

(6.) *Re sale of water powers.*—Water powers should be sold by auction, after sufficient advertising, to the highest bidder.

(7.) *Re the pulp and paper industries.*—Stimulation of these industries is advisable in the interest of colonization, as affording a market to settlers for the small timber they cut down in clearing their land. The commission accordingly recommends:—

(a.) The imposition of a stumpage surtax on pulpwood exported to the United States.

(b.) The compelling of license holders to manufacture in Canada pulpwood cut on their limits.

(c.) The imposition by the federal government of a duty on pulpwood.

(d.) Payment of bounty on paper manufactured in Canada and exported abroad.

(8.) *Re land subsidies to railway companies.*—The report points out the extreme importance of railways in the interest of colonization, specific instances being given in which rapid developments in settlement immediately followed the building of railways. Railways, accordingly, are stated to deserve the most favourable considera-

tion at the hands of the government, and the different districts of the province in which the best settlement lands not yet taken up are situated, are pointed out in this connection. At the same time all railways are not equally deserving of assistance from this point of view; those affording access to regions of fine arable lands should take precedence over others, and colonization railways should in particular be encouraged. Specific instances are given of roads which are particularly deserving of public support, it being stated that only those named would contribute materially towards the advance of colonization. Prudence, according to the commission, dictates the abandonment of the policy of cash subsidies, and the adoption of that of land grants. The maximum of the subsidy should never exceed 4,000 acres of land per mile of railway, except in extreme cases, and guarantees should always be required of the companies. The report in this connection gives a detailed description of the country annexed to the province by the legislation of 1898, amounting to 78,702,561 acres, known as new Quebec, and divided for administrative purposes into three districts, Ashuanipi, Wasnani and Abitibi. The projected line of the Grand Trunk Pacific, it is stated, will probably run through the finest part of this territory, and other railways will also have this region for objective.

General Remarks.

The report concludes with some remarks of a general nature as to the proceedings and results of the commission's investigation. Rich lands, easy of cultivation, accessible by railways, and with good wagon roads also, are stated to be a fundamental condition for the success of colonization. The methods of 50 and 100 years ago are now obsolete. Work-people now find employment in Canadian manufactures preferable to what was formerly offered them in the United States. Colonization, accordingly, must be put on a footing that will offer workmen tired of factory life and

sons of farmers in old parishes prospects calculated to attract them. The suppression of speculation in timber on new lots will be a great boon from the standard of the development of agriculture. The report concludes with a reference to the advantages offered by electric railways as a means of transportation, and to the prospect of the extensive building of electric roads through this territory, especially in view of the abundant water power available for producing energy.

Appendices to the Report.

A verbatim report of the inquiry held at Hull, Que., by the commission during the month of February, 1904, at which Mr. J. R. Booth, the Hon. W. C. Edwards,

Mr. Alexander Lumsden, and others prominently identified with the lumbering industry, appeared before the commission, is added in the form of an appendix, together with copies of various documents and exhibits bearing on the matter under inquiry. In a second appendix is printed the answers which were received to a series of 201 questions asked of various authorities by the commission through the mails, in order to avoid the necessity of a prolonged verbal inquiry. The questions and the various answers received are arranged under the following subject headings: Forest fires, timber supply, preservation of forests, sale of limits, settlers, colonization roads, custom mills, colonization societies, water powers, execution of the laws, pulpwood, &c.

CONVICTIONS AT TORONTO UNDER ALIEN LABOUR ACT

ON Tuesday, January 26, Isaac McClain and David H. Beecher laid an information before the clerk of the police court at Toronto, upon which a summons was sworn out against Edward Freyseng, of the Freyseng Cork Company, (Limited), of the city of Toronto, charging that in the month of July, 1903, Mr. Freyseng had violated the provisions of the Alien Labour Act, by having induced two citizens of the United States to come to Canada to work in his establishment by an agreement made previous to their coming and by prepaying their transportation. There were several adjournments of the hearing, and, on February 29, when the case was finally tried, the defendant was convicted by the presiding magistrate and fined \$50 and costs, or thirty days, for each of the two violations of the Act.

In his defence, Mr. Freyseng maintained that there had been a strike in his factory a short time previous to the time of employing the Americans, as complained of, and that during the strike a rival firm had employed some of his men, and he had been left short-handed; the men had not been

brought in to break the strike, but only because he was unable to get cork-cutters in this country. He maintained, further, that he acted in the matter without any knowledge that he was breaking the law. The magistrate remarked that he had no doubt that the defendant had not intended to break the law, but that ignorance of the law was no defence. The fines were paid into court by Mr. Freyseng and forwarded by the clerk to the Receiver General at Ottawa in accordance with the provisions of the law.

Informers Receive Part of Penalty.

During the month of March the solicitors for Messrs. McClain and Beecher applied to the Department of Labour to have fifty per cent of the fines imposed paid to them under the section of the Act which provides that 'the Receiver General may pay to any informer who furnishes original information that the law has been violated with such share of the penalties recovered as he deems reasonable and just, not exceeding fifty per cent, where it appears that the recovery was had in consequence of the information thus furnished.

On the recommendation of the hon. the Minister of Labour that fifty per cent of the fines should be awarded to the informers, the Receiver General gave instructions that half the penalty should be paid over to Messrs. McClain and Beecher, who, on April 15, were accordingly forwarded cheques through the Department of Labour for \$25 each, being fifty per cent of the fines imposed, as a consequence of the informations laid by them.

Provisions of the Act.

These actions were brought under the clause which was inserted as part of the Alien Labour Ant in the amendment passed at the session of 1901, which is as follows:

For every violation of any of the provisions of section 1 of this Act, the person, partnership, company or corporation violating it by knowingly assisting, encouraging or soliciting the immigration or importation of any alien or foreigner into Canada to perform labour or ser-

vice of any kind under contract or agreement, express or implied, parole or special, with such alien or foreigner, previous to his becoming a resident in or a citizen of Canada, shall forfeit and pay a sum not exceeding one thousand dollars, nor less than fifty dollars.

The sum so forfeited may, with written consent of any judge of the court in which the action is intended to be brought, be sued for and recovered as a debt by any person who first brings his action therefor in any court of competent jurisdiction in which debts of like amount are now recovered.

Such sum may also, with the written consent, to be obtained *ex parte*, of the Attorney General of the province in which the prosecution is had, or of a judge of a superior or county court, be recovered upon summary conviction before any judge of a county court (being a justice of the peace), or any judge of the sessions of the peace, recorder, police magistrate, or stipendiary magistrate, or any functionary, tribunal, or person invested, by the proper legislative authority, with power to do alone such acts as are usually required to be done by two or more justices of the peace, and acting within the local limits of his or its jurisdiction.

The sum recovered shall be paid the Minister of Finance and Receiver General.

Separate proceedings may be instituted for each alien or foreigner who is a party to such contract or agreement.

EMPLOYERS' ASSOCIATION OF TORONTO.

Through the courtesy of the secretary of the Employers' Association of Toronto, the department has been supplied with the following account of the work of the association during the past year, as reported to its members at the annual meeting held on the 7th of April.

THE work of the Employers' Association, from the end of April, 1903, until the annual meeting held on April 7, 1904, was devoted to many matters that were undertaken in the interests of its members, and for the general adjustment of industrial matters. Probably the greatest event of the year was the settlement by arbitration of the differences between the brass manufacturers of Toronto and their employees. This dispute affected between three and four hundred men, and was settled to the satisfaction of all, where a strike was considered imminent, by the good offices of the association, without loss to the men or to their employers.

The second arbitration, which occurred between the rubbers in the piano factory and the Gerhard Heintzman Company, was also satisfactorily settled. In this in-

stance a strike had actually taken place, but the men were induced to return to work and their complaints were brought before an impartial committee and the matter adjusted without loss to either parties.

It is in these matters that the good work of the association has been publicly known, but in other affairs, which it is not policy to give publicity to, the association has done excellent work.

Employment Secured.

During the year a 'Help Wanted' card was drawn up and has been sent regularly each month to each of the employers. This has proved a very valuable medium for ascertaining where vacancies existed, so that workmen applying at the office could be quickly directed where they were needed. During the year over fourteen hundred workmen applied at the office, and in every instance employment was found where the applicants were capable of filling the positions. Hundreds of letters have been received thanking the officers of the associa-

tion for their assistance in obtaining positions.

Articles of Apprenticeship.

In December the association was incorporated under the Benevolent and Provident Society Act of Ontario, chapter 211. One of the steps taken by the association in the interest of its members, and for the better education of the future workmen of Canada, was the introduction of the apprenticeship articles, which were issued during January. The sub-associations have all adopted the form, with such alterations as were necessary for their trade. Throughout the province and many parts of Canada inquiries have been made for copies of the form. In many places in the States it has been adopted as the form to be used in industrial centres there.

Other Work.

In March a business man's dinner was held, which was attended by a very large number of the employers of the city, and which was addressed by Mr. Millard F. Bowen, secretary of the Manufacturers' Club, Club, Buffalo. All the speeches delivered expressed the hope of better industrial conditions in the city, and their faith in the work of the association to accomplish this end.

Over two hundred association and committee meetings were held during the year, and nearly one hundred new firms were enrolled as members. The prospects of the association are of the very brightest, both with regard to the interest taken in its affairs by the officers and members and the respect with which it is regarded by labour organizations.

The financial position of the association is excellent, and a large reserve fund has been accumulated for emergencies where any of its members are wantonly attacked.

Officers Elected.

The following officers were elected at the meeting at which the above statement was presented:—

OFFICERS.

President F. B. Polson.
1st vice-president A. F. Rutter.
2nd vice-president D. H. McKay.
Treasurer W. T. Kernahan.

COMMITTEES.

Finance and Literature Committee.—J. P. Murray, W. T. Kernahan, W. C. Phillips, Thos. Roden, Ed. Freyseng.

Board of Conciliation and Arbitration.—P. W. Ellis, William Stone, Emil C. Boeckh, James Pearson, Edwin Hill.

Parliamentary and Press Committee.—James Pearson, P. W. Ellis, Atwell Fleming, J. O. Thorn, H. L. Thompson, W. C. Phillips, H. E. Bond.

Membership and Entertainment Committee.—S. Harris, Ed. Freyseng, H. A. Taylor, Noel Marshall, Fred. Diver, Thos. Roden, Robert M. Bertram.

Executive Committee.—F. B. Polson, A. F. Rutter, D. H. McKay, A. D. Harris, J. P. Murray, J. O. Thorn, William Stone, Emil C. Boeckh, W. J. Smith, Robert Bertram, Noel Marshall, W. H. Carrick, Edwin Hill, James Pearson, A. E. Chatterton, Fred. Diver, S. H. Chapman, Chas. Adams, W. H. Moore, W. T. Kernahan, W. H. Johnson, Atwell Fleming, E. B. Brown, Gerhard Heintzman, Henry Newcombe, P. W. Ellis, J. H. McGregor, George Brigden, S. Harris, Jos. Wright, J. M. Turnbull, Henry A. Taylor, S. B. Brush, Thos. Roden, C. F. Wheaton, Hedleigh Bond, Wm. Wilkie, W. C. Phillips, Ed. Freyseng, H. L. Thompson, S. Brown.

The treasurer's report showed a large surplus over expenses, the reserve fund established a year ago having grown considerably.

It was decided to amend the constitution so as to permit of the admittance of employers in other parts of the province.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

THE feature of the month of April in the immigration movement was the continuance on an advancing scale of the activity which had already set in during March, several steamships having reported at Halifax, N.S., and St. John, N.B., with

large lists of immigrant passengers on board. These, to the number of about 1,300 per week, were at once transferred to special trains, the majority being sent through directly to Winnipeg, Man., for distribution throughout western Canada.

A considerable number, however, remained in Quebec and Ontario, assisting in the latter province in relieving the stringency now prevailing in the market for agricultural and dairying labour. High rates of wages were obtained by these classes. The arrivals of April were reported as being of a uniformly good type, showing in this particular an improvement on those of 1903.

Though there were a few instances in which the accommodation provided by the transportation companies was complained of and some difficulty experienced in securing a sufficient number of colonist cars at different periods, the needs of the situation from this standpoint were stated to have been fairly well met and the prospects for a continuance of the movement for the balance of the season, on an even heavier scale than was reported last year, are considered promising.

Up to April 1, it was stated, about 25,000 immigrants had passed through Montreal on their way west.

Immigration from the United States.

The movement of settlers from the western states into the Canadian North-west recommenced on an extensive scale during the opening week of the month, several special train-loads, carrying several hundreds of colonists, having entered the country. The states of Kansas, Missouri, Iowa and Illinois were chiefly represented, though Wisconsin, Minnesota and Dakota continued to supply a considerable quota. The movement in southern Alberta from Montana and Utah has also been very active, and developments in that section are, in consequence, on an extensive scale. As in April, 1903, the class of settlers represented in this movement was most desirable. A vigorous campaign of advertisement of the resources of western Canada is being prosecuted, more particularly in view of the propaganda of certain railway and land companies interested in the development of the south-western states. In this connection, the action of the Dominion government in contributing \$5,000 each year

for two years to the funds of the Western Canada Immigration Association was an important event of the month, the aims of the association being to advertise and direct settlement to western Canada by the organization of agencies for the dissemination of accurate information, and the membership being composed of persons who will be indirectly benefited from the increased prosperity and development of the country.

Notes of the Month.

The possibility of a movement of settlers from New Zealand into Canada is being discussed.

An Italian immigration society, with headquarters in Montreal, Que., has been subsidized by the Italian government as a proper agency to direct Italian labourers and others finding their way to Canada. The society has secured new quarters in Montreal in which accommodation for over 200 immigrants at any time may be obtained.

The new immigration hall to be erected in Winnipeg, Man., will be four storeys in height and capable of accommodating 1,000 people.

The all-British colony, settled about Lloydminster, Sask., is reported as progressing favourably, and as likely to be increased by numerous arrivals during the coming season, as a result of representations made by colonists to their friends in Great Britain.

A proposal of the Salvation Army in Great Britain to send immigrants to Canada on a large scale has been approved by the Superintendent of Immigration for Canada.

The annual meeting of the Canada North-west Land Company, held recently in Toronto, Ont., showed that land sales for 1903 were considerably less in acreage than for the previous year, fewer sales *en bloc* having been made to syndicates and more to actual settlers at a higher average price than in 1902.

A circular letter was addressed by the Winnipeg Trades and Labour Council during the month to some 400 of the leading newspapers published in Great Britain, setting forth the opinion of that body with regard to the immigration of labour into Canada. Agricultural immigrants, without experience or capital, it was stated, will not at present find conditions favourable in Canada. With regard to the general labour market, skilled and unskilled, the council states that it is now overstocked. The statements of the council have been protested against and contradicted by the Canadian Commissioner of Immigration in London, Eng.

The report recently presented to the legislature of the province of Quebec by the special commissioner on colonization has been the subject of much discussion throughout the month.*

The Montreal Colonization Society held its regular quarterly meeting on April 4. The report of the secretary showed that 41 colonists had been entered in the books of the society during the month of January, 46 in February and 106 in March. These colonists were distributed as follows:—North of Montreal, 66; northern Ontario, 11; Lake St. John, Que., 2; western Canada, 21; Metapedia, Que., 6. It was pointed out that the time was opportune for visiting the various agencies of the society in the United States, and the secretary was instructed to make such visits in order to bring to the attention of such agents the projects of the society for the coming season.

A committee appointed by the Montreal Women's Colonization Club to investigate the conditions of English factory girls living in Canada found that of 22 factory girls who came out during the winter 19 had gone into domestic service. It was

stated by the committee that in the piece-work system English factory girls were, as a rule, behind Canadians in earning capacity.

The first contingent of old country French immigrants, consisting of about 175 members, passed through Montreal in the closing week of the month. The party was from Brittany.

The annual convention of the Lake St. John Colonization Society was held in Quebec on April 25, with about 400 delegates present. Hon. Senator Tessier was re-elected president and Mr. E. Beaudet general manager.

The growth of settlement in the Dominion is illustrated by the fact that 47 new post offices were established in Canada on April 1, of which 27 were situated in Manitoba and the North-west Territories.

Immigration Returns for March.

The following statement of immigrant arrivals during March, and during the first four months of 1904, was supplied by courtesy of the Department of the Interior, Canada:—

| — | Total for the Month. | Total from 1st January. |
|----------------------|----------------------|-------------------------|
| British..... | 4,431 | 6,565 |
| Continental, &c..... | 3,546 | 5,274 |
| United States..... | 3,629 | 5,651 |
| Total..... | 11,606 | 17,490 |

Homestead Entries for March, 1904.

The following statement, published by courtesy of the Department of the Interior, shows the number of homestead entries, according to the various agencies, made during the month of March, 1904, as compared with the month of March, 1903:—

* A resumé of the more important findings of the commission is given on another page of the present issue of the *Gazette*.

TABLE OF HOMESTEAD ENTRIES FOR MARCH.

| Agency. | 1904. | 1903. | Increase. | Decrease |
|-------------------|-------|-------|-----------|----------|
| Alameda..... | 53 | 92 | | 39 |
| Battleford..... | 149 | 46 | 103 | |
| Brandon..... | 40 | 78 | | 38 |
| Calgary..... | 243 | 156 | 87 | |
| Dauphin..... | 26 | 60 | | 34 |
| Edmonton..... | 119 | 290 | | 171 |
| Kamloops..... | 18 | 6 | 12 | |
| Lethbridge..... | 113 | 150 | | 37 |
| Minnedosa..... | 14 | 56 | | 42 |
| New Westminster | 1 | 6 | | 5 |
| Prince Albert.... | 73 | 205 | | 132 |
| Regina..... | 234 | 451 | | 217 |
| Red Deer..... | 61 | 135 | | 74 |
| Winnipeg..... | 76 | 111 | | 35 |
| Yorkton..... | 110 | 483 | | 373 |
| Total | 1,330 | 2,325 | 202 | 1,197 |

It will be seen that there has been a decrease in the number of homestead entries made during March, 1904, of 995.

The statement of entries made during the first nine months of the fiscal year 1903-04 is as follows:—

TABLE OF HOMESTEAD ENTRIES, JULY-MARCH.

| Month. | 1903. | 1902. | Increase. | Decrease. | Remarks. |
|----------------|--------|--------|-----------|-----------|---------------------------------|
| July..... | 3,438 | 2,622 | 816 | | Net increase for last 9 months. |
| August..... | 2,288 | 1,904 | 384 | | |
| September..... | 1,845 | 1,416 | 429 | | |
| October..... | 1,958 | 2,142 | | 184 | |
| November..... | 2,406 | 2,482 | | 76 | |
| December..... | 1,570 | 1,640 | | 70 | |
| | 1904. | 1903. | | | |
| January.. | 1,240 | 1,109 | 131 | | |
| February..... | 1,128 | 1,165 | | 37 | |
| March..... | 1,330 | 2,325 | | 995 | |
| Total | 17,203 | 16,805 | 1,760 | 1,362 | 398 |

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of March, 1904, were as follows:—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS.

| Nationalities. | Number of Entries. |
|--|--------------------|
| Canadians from Ontario..... | 199 |
| " Quebec..... | 33 |
| " Nova Scotia..... | 5 |
| " New Brunswick..... | 5 |
| " Prince Edward Island..... | 7 |
| " Manitoba..... | 41 |
| " North-west Territories..... | 23 |
| " British Columbia..... | 7 |
| Persons who had previous entry..... | 156 |
| Canadians returned from United States..... | 33 |
| Americans..... | 401 |
| Newfoundlanders..... | |
| English..... | 149 |
| Scotch..... | 36 |
| Irish..... | 7 |
| French..... | 10 |
| Belgians..... | 3 |
| Swiss..... | 1 |
| Italians..... | |
| Roumanians..... | 6 |
| Greeks..... | |
| Syrians..... | |
| Germans..... | 32 |
| Austro-Hungarians..... | 121 |
| Hollanders..... | 1 |
| Danes (other than Icelanders)..... | 5 |
| Icelanders..... | 13 |
| Swedo-Norwegians..... | 22 |
| Russians (other than Mennonites and Doukhobors)..... | 12 |
| Mennonites..... | 1 |
| Doukhobors..... | 1 |
| Chinese..... | |
| Total | 1,330 |
| Representing 3,659 souls. | |

Of the total number of entries made during March by persons coming from the United States into Canada, 98 were from Dakota, 87 from Minnesota, 33 from Iowa, 21 from Washington, 20 each from Montana and Wisconsin, 16 from Kansas, 15 from Michigan, and 14 each from Nebraska and Oregon.

Lands Patented in March, 1904.

Abstract of letters patent covering Dominion lands situate in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of March, 1903, compared with the month of March, 1904, were as follows:—

TABLE OF LANDS PATENTED IN MARCH.

| Nature of Grant. | Number of Patents. | Number of Acres. |
|---|--------------------|------------------|
| British Columbia homesteads... | 7 | 1,105.35 |
| British Columbia sales..... | 1 | 80.00 |
| Commutation grants..... | 2 | 82.73 |
| Homesteads..... | 358 | 56,682.65 |
| Hudson's Bay Co..... | | |
| Manitoba Act grants..... | 3 | 258.90 |
| Military homesteads..... | | |
| Mineral rights..... | 1 | 130.00 |
| Mining lands sale..... | 1 | 6.50 |
| North-west Half-breed grants... | 41 | 9,196.00 |
| Parish sales..... | 2 | 101.00 |
| Quit claim special grant (area 1,440 acres)..... | 9 | |
| Railways— | | |
| Canadian Northern Ry... .. | 4 | 22.76 |
| Canadian Pacific Ry. grants... | 131 | 191,518.05 |
| Canadian Pacific Ry. nominees..... | | |
| Can. Pac. Ry. Roadbed and Station Grounds..... | 7 | 177.20 |
| Great North-west Central Ry..... | | |
| Manitoba North-western Ry... | 5 | 30,202.43 |
| Manitoba South-west'n C'l. Ry. | 44 | 10,066.70 |
| Qu'Appelle, Long Lake and Saskatchewan Rd. and S. Co. | 8 | 4,479.00 |
| Saskatchewan and Okanagan Railway..... | | |
| Sales..... | 37 | 7,659.99 |
| School lands sales..... | 11 | 984.75 |
| Special grants..... | 4 | 164.80 |
| Yukon Territory sales..... | 8 | 538.13 |
| Yukon Territory special..... | | |
| Total..... | 684 | 313,456.94 |

In March, 1903, the number of patents issued was 564, covering an area of 214,950.02 acres.

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the number of the 'Canadian Patent Office Record' issued by the Department of Agriculture during the month of April.

In the month of January 453 patents were issued in Canada, a decrease of 110 compared with the previous month. There were 44 relating to electrical inventions, a larger number than for any other class, and 26 more than the number of electrical patents issued in December. There were 24 inventions relating to means of locomotion, 23 to the metallurgical and mining industries, 20 related to agriculture and

21 to building construction, besides 9 tools used mostly for building purposes. There were 14 new manufacturing machines, 8 patents for various parts of machines, 17 chemical and 3 mechanical processes, and 7 new articles of manufacture. Among the other patents were 8 adding machines, 8 pumps, and 11 relating to different means of heating and lighting.

Electrical Industries.

The largest number of electrical patents related to telegraphy, for which there were taken out no less than 15. Of these, 7 patents were for the ordinary system, and 8 were for systems of wireless telegraphy. There is a patent for a process of electrical smelting, a new use of electricity which is just now attracting wide attention. There were three patents relating to electrolysis, one of which was for an electrolytic apparatus, and another for the production of metallic calcium.

Among other new applications of electricity is a sawing machine for breaking or cutting up logs, sleepers, &c. The machine consists of a circular saw driven by an electric motor which is attached to a guided carriage. The guide for the carriage consists of a portable bar, which may be fastened to the log in the forest, so that it may be cut up there. While being cut the log is held stationary and the saw blade is shifted in the direction of its axis of rotation by the motion of the carriage.

Other electrical inventions that may be noted are two storage batteries, three railway signals, one light and power system, and two relating to telephones.

Metal Working and Mining Industries.

Out of the 23 inventions connected with the industries of metal-working and mining, 11 were processes for the treatment of ores and metals. Among these may be mentioned a process of treating magnetic ores carrying a small proportion of non-magnetic nickel compound, which is desired to be recovered. The process consists in grind-

ing the ore in order to free the non-magnetic particles, then adding to it a larger bulk of coarser non-magnetic material, and subjecting the mixture to a magnetic separator. The non-magnetic parts of the compound will then form the tailings, and by screening the tailings, the non-magnetic nickel compound may be obtained.

Industrial Machines and Processes.

Among the new machines were one for match-making, a hydraulic press, and a

machine for pressing water out of wood pulp. There are four patents in reference to the manufacture of cement, one of which is for an apparatus, and three for various processes. There is a patent for the treatment of cotton, flax or linen for the purpose of rendering it fire-proof by means of stannate of soda, and a soluble metallic salt. There is also a patent for a fire-proof plaster composed of clay, calcined plaster, asbestos fibre and glue.

CANADIAN TRADE AND REVENUE DURING THE MONTH OF APRIL, 1904.

The following article, intended as supplementary to the general Summary of Industrial Labour conditions, is based on statistics furnished by courtesy of the Departments of Customs and Finance, Canada, on the latest weekly reports issued by the Department of Trade and Commerce, Canada, and on current information collected from reliable trade and financial journals.

CANADIAN trade and revenue returns received during April were, on the whole, of a satisfactory nature, foreign and imperial trade continuing to expand, though the backward nature of the season and the impeded freight service in the railways caused a shrinkage in exports, and introduced a disturbing element on the general trade situation within the Dominion. The disastrous fire which occurred in Toronto on the 20th of the month was also a loss which severely affected the commercial interests of Ontario. The outlook, however, is considered promising, and a buoyant tone is evident in most of the branches of the general market.

Reference in detail to recent developments in the several branches of Canadian trade, foreign, imperial and domestic, and to the latest returns of Dominion and provincial revenue, is as follows:—

Foreign Trade Returns.

As will be seen from the accompanying tables, imports during March, 1904, showed an increase over those of March, 1903, amounting to \$950,754, while the returns

for the nine months ending March 31, 1904, show a gain of \$19,922,583 over the similar period of 1902-03.

Exports for March, 1904, show an expansion of \$142,102 over March, 1903. For the nine months of the fiscal year, however, exports showed a decline amounting to \$5,090,345.

Combining the above returns, a total trade of \$31,680,132 for March, 1904, is indicated, as against a total trade of \$30,587,476 for March, 1903, or a gain of \$1,092,656. For the first nine months of the fiscal year an increase is also shown, amounting to \$14,832,238, the totals being \$345,307,651 for the period ended March 31, 1904, and \$330,475,413 for the period ended March 31, 1903.

The heavy snow storms which were prevalent throughout the month by impeding traffic are held to be in a large part accountable for the decline in exports. It will be seen from the table that the most marked decline occurred under the heading of forest, the other branches being for the most part stationary, where gains were not indicated.

Imperial Trade.—Reports of Commercial Agencies.

The weekly reports of commercial agents and trade inquiries issued during April

by the Department of Trade and Commerce, Canada, show, on the whole, satisfactory market conditions existing in Great Britain for Canadian products. More extensive development of the trade in Yorkshire grease, general food products, especially butter, fruit and eggs, is stated to be possible. Careful packing and shipment of apples is again urged. Prospects of trade developments in Canadian barley, canned goods, cider, and mining timbers are considered excellent, though the market

for Canadian cheese and bacon has recently been characterized by dullness.

From *New Zealand* and *Australia* trade conditions are reported, and the outlook for an increase in the sales of Canadian imports considered good. The indifference of Canadian manufacturers with regard to the Australian market is criticised, and though extensive trade in the lines more open to competition is not anticipated, dealers are urged to join forces, and

thus economize in distribution. Canadian fish products are being well received.

Developments in wheat and flour exports to Norway are considered feasible.

According to returns of the British Board of Trade, imports into *Great Britain* from Canada during the month of March were as follows:—

| | Quantity. | Value. |
|---------------------------|-----------|-----------|
| Cattle..... head | 7,394 | £ 126,532 |
| Sheep and lambs..... " | 6,650 | 10,525 |
| Wheat..... cwts. | 469,000 | 167,974 |
| Wheat, meal and flour.. " | 288,837 | 145,240 |

| Cheese..... " | 74,995 | 186,853 |
| Eggs..... great hund. | 399 | 128 |

Domestic Trade.

The backward weather and the Toronto fire were the two leading factors influencing the domestic trade of Canada during April, both having an injurious tendency. The latter* destroyed the premises of over 100 business firms, among them a number of the largest mercantile establishments in Canada, the dry goods, stationery and paper trade suffering particularly. General interruption to distribution, and a general disturbance of trade centres, resulted, as well as the immediate losses of stocks and buildings involved. Still more general were the effects of the unusually backward character of the season, which by retarding industry and decreasing earnings had important effects on the trade situation. Under the circumstances, however, the record for April was considered satisfactory. The Easter trade, with which the month opened, was up to the average. With the gradual disappearance of snow in Ontario and

Quebec, moreover, the wholesale trade showed general improvement, the going into effect of summer freight rates on April 1 proving a stimulus. In the country districts, however, the bad roads and floods continued to affect retail trade injuriously, and the sorting trade in consequence was somewhat dull. In western Canada the severe storms which prevailed up to the middle of the month had a similar effect. Payments, however, were better met in the affected districts than was anticipated, and with favourable weather conditions and a good harvest in prospect the commercial outlook is generally regarded with satisfaction. The leather trade in particular showed a decided improvement during the month. On the other hand, hog products and cheese were dull as a result of the unsettled state of the markets in Great Britain. In British Columbia, with the demand for goods for the Yukon trade improving, active trade conditions were reported. The financial situation was favourable throughout the month, and a general and sound advance in Canadian securities was recorded.

The twenty-second annual meeting of the shareholders of the Western Bank of Canada was held at Oshawa, Ont., on April 13, 1904. The net profits of the year were stated to amount to \$76,415.33, or over 17½ per cent on the paid-up capital. Of this \$42,500 was carried to rest account.

Insolvency returns for the Dominion of Canada for the first quarter of 1904 show an increase over the similar period in 1903, though the record in 1902, 1901 and 1900 was higher than in the present year. The increase was chiefly in the trading branches, manufacturing losses being slightly lower than in 1903. The number of failures was about stationary; according to *Dun's Review* they totalled 288, with assets of \$1,089,954, and liabilities of \$1,754,173.

Revenue and Expenditure.

According to the latest official statement of the Department of Finance, Canada,

* A special statement relating to this disaster and its more important consequences appears in the general summary of industrial conditions during the present month in this issue. See also the reports of the correspondents for Toronto, London, Guelph and other cities in Ontario.

the revenue of the Dominion during March, 1904, amounted to \$5,674,776.50, or a total of \$51,303,567.29 for the first nine months of the current fiscal year. This is a better showing than for March, 1903, by \$181,020.89, and a better showing for the first nine months of the last fiscal year by \$4,706,325.43. As compared with February, also, an increase of \$363,798.91 is shown by the returns for the month of March.

Current expenditure in March amounted to \$2,181,143.83, as against \$2,144,999.15 in March, 1903. For the nine months the total was \$32,661,254.06, as against \$31,668,085.35 a year ago.

A total of \$841,249.09 was expended by the Dominion during March on capital account, the chief items of which were as follows :—

| | |
|--|--------------|
| Militia..... | \$351,175 89 |
| Public Works : Railways and Canals | 203,247 93 |
| Railway subsidies | 144,910 16 |
| Bounty on iron and steel | 119,627 02 |
| Dominion lands | 31,418 19 |

Receipts of the province of *New Brunswick* for the past year, as presented to the

legislature during April, were placed at \$878,547, and expenditures at \$856,967. Among the receipts, \$491,580 were from Dominion subsidies and \$210,089 from territorial revenue, the latter total being the largest ever reached in the history of the province.

The public accounts of the province of *Prince Edward Island* were submitted to the provincial legislature on April 11, showing ordinary expenditure to have been \$328,600 ; ordinary receipts, \$319,000 ; immediate liability, \$431,000 ; total debt, \$667,000. The largest items in expenditure were for education, \$124,000; roads and bridges, \$50,000; insane hospitals, \$28,000; and ferries, \$18,000.

The following return of revenues and expenditures was presented to the legislature by the Provincial Treasurer of Quebec on April 20 :—

| | |
|----------------------------|----------------|
| Ordinary receipts..... | \$4,699,772 87 |
| Ordinary expenditure.... | 4,530,616 88 |
| Surplus..... | \$ 169,155 99 |
| Extraordinary expenditure. | 65,443 77 |
| Net surplus..... | \$ 103,712 22 |

TRADE DISPUTES DURING THE MONTH OF APRIL.

WHILE the new trade disputes of April were more than double the number of the previous month, they were five less than the new disputes recorded in April, 1903, and the total number in existence during the month was fourteen less than the corresponding month of last year. They were also of a much less serious nature in their effects, the only localities where the cessation of industry reached any great magnitude for a prolonged period being in Quebec and Montreal. In twelve of the new disputes international trade organizations were involved, in three cases the strikers belonged to Canadian unions, and in five cases the men had no organization.

Analysis of Trade Disputes during the Month.

Number and magnitude.—There were 23 trade disputes in all in existence during

April, of which 3 began before the beginning of the month and 18 after. In addition to these, there were various minor disturbances, which were of slight industrial importance. There were about 108 firms and establishments affected by the new disputes, and 1,879 working-people, of whom 1,709 were directly and 170 indirectly affected. Including those concerned in the disputes which began prior to April 1, there were altogether 111 employers and 2,124 employees affected. Compared with these figures, there were, in March, 11 disputes in existence involving 16 firms and 310 employees, and in April, 1903, there were 37 disputes, involving nearly 160 firms and about 7,727 working-people.

The magnitude of the new disputes is indicated in the following table:—

| Magnitude. | Number of Disputes. |
|---------------------------|---------------------------|
| From 400 to 500.. | 1 |
| From 300 to 400.. | 2 |
| From 100 to 200.. | 2 |
| From 25 to 50.. | 5 |
| From 6 to 25.. | 9 |
| Unknown.. | 1 |

Loss of time in working days.—The approximate loss of time to employees by trade disputes during the month of April amounted to 14,630 working days. The fact that in several cases, particularly in the strike of painters at Quebec, many of the employees obtained work while their dispute was still in progress, renders it difficult to form more than a general estimate of the loss incurred through disputes. The approximate loss of time in March was 2,245 days, and in April, 1903, the loss, including only those directly affected, was over 76,100 days.

Trades affected by new disputes.—The following trades were affected by the new disputes of the month:—

| Trades. | Number of Disputes. |
|--------------------------------------|---------------------------|
| Building.. | 7 |
| Metal.. | 2 |
| Clothing.. | 1 |
| Food and tobacco preparation.. . . . | 4 |
| Leather.. | 1 |
| Transport.. | 1 |
| Telegraphy.. | 2 |
| Basket-making.. | 1 |

Localities affected by disputes.—With the exception of one strike in Nova Scotia, all the new disputes of the month occurred in the provinces of Quebec and Ontario. In the province of Quebec there were 7 disputes, 4 of which took place in Montreal, and in Ontario there were 12. With the exception of 2 disputes of the previous month in existence at Vancouver, B.C., industrial conditions were very peaceful in the other parts of the Dominion.

Causes of new disputes.—The following were the causes of the new disputes of the month:—

| Causes | Number of Disputes. |
|---|---------------------------|
| For increase of wages.. | 8 |
| For decrease in hours.. | 1 |
| For increase in wages and decrease in hours.. | 3 |
| For recognition of union.. | 2 |
| Against discharge of employees.. . . . | 2 |
| Sympathetic.. | 1 |
| Dispute between unions.. | 1 |
| Refusal of unionists to pay arrears.. . | 1 |
| Unknown.. | 1 |

Methods of settlement.—Of the 23 disputes which were in existence during April, 15 were terminated in the course of the month, leaving 8 still in existence at the close. Of the 15 that were terminated, 5 were settled by negotiations between the parties concerned, and the remaining 10 were terminated without any negotiations. The employers granted the demands of the strikers in one case, in four cases the men returned to work under former conditions, in four, most of the strikers were replaced, and in one work was resumed with a diminished staff.

Results of disputes.—Out of the 15 disputes that were ended, the employers were successful in 9 cases, in two or three of which, however, operations were resumed with a diminished staff. A compromise was effected in 4 cases, and in 2 the strikers gained their demands.

Disputes Commenced Prior to the Beginning of the Month.

The three disputes which began before April 1, and were in continuance during the month, were a strike of fur-cutters at Sandwich, Ont., and strikes of boilermakers and machinists at Vancouver, B.C.

The strike of fur-cutters at Sandwich, Ont., concerned employees of the Bishop Fur Company. The cause was a demand on the part of the men for wages of \$12 a week, which was refused. They had been working by the piece and were making from \$8 to \$10 per week. The dispute began on March 25 and ended on April 5, by the strikers deciding to go back on the former conditions. According to a statement received from the company there were six employees directly and 80 indirectly affected. The latter number included 30 men, 40 women over twenty years of age, and 10 women under twenty-one. The original strikers were all men.

Strikes of Boilermakers and Machinists at Vancouver, B.C.

The strikes of boilermakers and machinists of the Vancouver Engineering Com-

pany, which were in existence during the month of March, continued until April 19, on which date the company reported that some of the strikers had returned and the places of others had been filled. A brief account of these disputes is given in the April number of the *Labour Gazette*, but further information regarding them has since been received.

On April 19, a mass meeting was held in the interests of the strikers, at which the following statements were made by the president of the machinists' union. It was stated by him that about eight months before an employers' association was organized in Vancouver and that certain new shop rules were posted up in the Vancouver Engineering Works by this association on February 25. Objection was taken to a rule which stated that union and non-union labour would be employed by the company, and that any one interfering with the working of this clause would be subject to immediate dismissal. The boilermakers claimed that the company had an agreement with them to employ none but union men, and when their demand that this clause be removed was refused, they went out on February 27. The machinists then asked the manager of the company if these rules took precedence over the agreement between the company and themselves, and were told in reply that the company held themselves bound by any agreement made with any individuals or body of men in their employ, but that they knew of nothing in the shop rules which would affect any provision of the agreement. On March 13, the machinists' union offered the services of three of their members as a conciliation board to try and settle the dispute between the company and the boilermakers. The company, however, informed them that the matter had passed out of its hands, and was being dealt with by a conciliation committee, to whom they were referred. On March 19, the machinists' union declared a strike against the Vancouver Engineering Works. It was alleged by the strikers that a blacklist was

drawn up against them by the employers' association. The strikers thereupon appealed to the courts, and charged the association with conspiracy in restraint of trade. They also filed damage suits against it. The suits were still pending at the end of April.

New Disputes.

Of the twenty new disputes of the month, only three were of great magnitude. These were a strike of painters at Montreal, another strike of painters at Quebec, and a lockout of cigarmakers at Hamilton, Ont.

Strike of Painters at Montreal.

On April 19, a strike was declared by the International Union of Painters and Decorators of Montreal, on account of a refusal of the employers to recognize the union, and it continued throughout the month. The numbers involved in the dispute are estimated at widely different figures. A return received by the department from an employer gives the number of establishments affected as 60 and the number of employees as 600. The secretary of the union, however, states that 48 firms were directly, and 11 indirectly, affected, while the number of strikers directly involved amounted to 900. A more moderate estimate places the number of strikers at 450. There were two clauses in the agreement presented to the master painters to which objection was taken by them. These clauses stipulated that the business agent of the union be allowed to visit the different shops and that only union men should be employed. The other terms of the agreement were practically the same as those in force last year. On April 20, it was claimed by the union that out of 78 employers, 30 had signed the contract. Thirty-eight of the employers, all of whom held out against the strikers, were members of the Master Painters' Association of Montreal. There was no settlement of the dispute at the end of the month.

TABLE OF TRADE DISPUTES OF THE MONTH OF APRIL.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLES, SERIES C, No. 42.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No. of Firms or Establishments affected. | Approximate No. of Employees affected. | | Date of commencement. | Date of termination. | Result. |
|---|---------------|---------------------------|--|--|--|--------|-----------------------|----------------------|---|
| | | | | | Di- | Indi- | | | |
| | | | | | rectly | rectly | | | |
| | | | | | | | | | |
| DISPUTES WHICH BEGAN PRIOR TO THE BEGINNING OF THE MONTH. | | | | | | | | | |
| B. Columbia | Vancouver | Paidermakers | Change in shop rules, making it an 'open shop'. | 1 | 15 | | Feb. 27 | Apr. 19 | Some strikers returned. Places of others were filled. |
| " | Vancouver | Machinists | Discharge of a trade unionist employee... | 1 | 14 | | Mar. 19 | " 19 | " |
| Ontario | Sandwich | Par cutters | Demand for \$12 a week instead of piece work system of payment. | 1 | 16 | 80 | " 25 | Apr. 5 | Work resumed on former terms. |
| DISPUTES WHICH BEGAN DURING THE MONTH. | | | | | | | | | |
| Quebec | Montreal | Stone cutters | Decisions of employers to run open shops. | 8 | 25 | | April 1 | | No settlement reported at end of month. |
| " | Quebec | Painters | Demand for increase in wages from 17½ to 25 cents per hour. | 19 | 180 | | " 1 | April 30 | Eight firms granted demands, all strikers employed at wages demanded. |
| " | Montreal | Marble cutters | Employment of stonecutters on marble work. | 10 | 30 | | " 4 | " 7 | Settlement effected. Terms not given. |
| " | Quebec | Freight handlers | Demand for increase in wages. | 1 | 8 | | " 4 | " 9 | Increase granted. |
| Ontario | Chatham | Painters | Demand for 22½ cents per hour and nine hour day. | 1 | 12 | | " 4 | " 11 | Men returned at 22½ cents per hour and 10-hour day. |
| " | Toronto | Telegraphers | Discharge of employees. | 1 | 44 | | " 5 | | No settlement at end of month, but strikers replaced. |
| " | Thorold | Basket-makers | Demand for 5 cents more per 100 baskets. | 1 | 30 | | " 8 | " 20 | Strikers returned at former rates. |
| Quebec | St. Hyacinthe | Sheet metal roofers. | Demand for 20 per cent increase in wages and nine-hour day. | 3 | 15 | | " 11 | " 20 | Strikers returned on former conditions. |
| Ontario | Guelph | Iron workers | Demand for time and a half for overtime and double time for Sundays. | 1 | 15 | | " 11 | " 15 | Places of strikers filled. Men sought employment elsewhere. |
| " | Chatham | Tailors | Refusal of some employees to pay arrears to union. | 1 | 7 | | " 11 | " 13 | Work resumed by firm with a diminished staff. |
| Nova Scotia | Sydney | Labourers and carpenters. | Demand for increase in wages. | 1 | 300 | | " 9 | | Wages to labourers and carpenters increased. Carpenters withdrew demand. |
| Ontario | Ottawa | Telegraphers | In sympathy with striking telegraphers at Toronto. | 1 | 20 | | " 16 | | No definite settlement, but all but four strikers returned. |
| Quebec | Montreal | Bakers | | | | | " 10 | | No particulars received by department at close of month, but settlement reported. |

| | | | | | | | |
|---------|----------------------|--|----|-----|----|---|---|
| Ontario | Sheet metal workers. | Demand for 9-hour day at \$2 instead of 10-hour day at \$1.75 and \$2. | 60 | 450 | 19 | No settlement reported at end of month. | One man signed agreement on April 26. No settlement with other at end of month. |
| Quebec | Painters | Demand for recognition of union in wages. | 1 | 120 | 25 | " | " |
| Ontario | Cigar-makers | Lockout on account of demand for increase in wages. | 1 | 83 | 21 | " | " |
| " | " | Demand for increase in wages by Hamilton union—lockout. | 2 | 25 | 29 | " | " |
| " | Leather workers | Discharge of an employee following demand for Saturday half holiday. | 2 | 15 | 25 | " | " |
| " | Coal drivers | Demand for increase in wages from \$8 to \$9 per week. | 1 | 12 | 30 | " | " |
| " | Cigarmakers | Demand for increase in wages of \$1 per 1,000 cigars. | 1 | 12 | 30 | " | " |

Strike of Painters at Quebec.

On April 1, a strike was declared by the National Painters' Union of Quebec, after their demand for an increase in wages from 17½ to 25 cents per hour for an 8 or 9-hour day. The strikers advertised that they were prepared to take contracts, and succeeded in obtaining employment. About 19 employers and 180 men were involved in the dispute. Towards the end of the month, two master painters granted the demands of the union, and reopened their shops, but it was reported that they found it difficult to obtain the men required as all the strikers were working for themselves. The other employers, at a meeting held on April 26, decided not to accede to the demand of the men, but on April 30 eight firms accepted the terms of the union, and the strike was practically over, as all the strikers were employed at union rates and the other

firms had obtained apprentices and others to fill the places of the union painters.

Lockout of Cigarmakers at Hamilton and London.

On April 21, the Cigarmakers' Union of Hamilton, a branch of the International Union, made a demand for an increase of wages amounting to an additional dollar a thousand for making cigars, 25 cents a thousand more for packing them in boxes of fifty, and 15 cents a thousand more for packing them in boxes of one hundred. The Tuckett Company thereupon decided to close its factories both at Hamilton and London, their employees at the latter place being under the jurisdiction of the Hamilton local union. On April 21 thirty men were discharged from the London factory, on the 25th, forty-five more cigarmakers were dismissed, and on the 28th the shop was closed, putting out of work eighty-three

cigarmakers and ninety other employees. Simultaneously the men were being paid off at Hamilton, and the closing of the establishment there affected about 120 cigarmakers and 80 others.

Strikes of Telegraphers at Toronto and Ottawa.

On April 5, telegraphers employed by the Great North-Western Telegraph Company at Toronto, to the number of 44, declared a strike. The cause of the dispute was the dismissal of five employees, which the strikers alleged was due to their being members of the Commercial Telegraphers' Union, which had recently been established in Toronto. On April 6 20 telegraph operators of this company went on strike in sympathy at Ottawa. The company refused to recognize the union and immediately took steps to fill the places of the strikers. Neither strike was de-

finitely declared off by the union, but at Ottawa, according to a statement from the company, a majority of the strikers had returned to work by the fifteenth of the month, while at Toronto normal conditions were gradually resumed.

In addition to the disputes mentioned above, there was also a strike of 300 coal miners employed at Joggin Mines, N.S., on April 28, who ceased work on account of the failure of the Canada Coal & Railway Company to pay them their wages. As the company immediately went into liquidation, this strike has not been included among the disputes of the month.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of April, and which have been reported to the department.

UNIONS FORMED DURING THE MONTH OF APRIL, 1904.

The department has received notice of the following organizations having been formed during the month of April, 1904.

Quebec:—

Montreal—

Waitresses.

Ontario:—

Guelph—

Shoe repairers.

Kingston—

Seamen.

Niagara Falls—

Federal Labour Union.

Central Labour Union.

Painters' unions along the Niagara frontier have formed an International District Council.

Ottawa—

Railway mail clerks.

Sandwich—

Fur workers.

ENFORCEMENT OF FAIR WAGE RESOLUTION BY POST OFFICE DEPARTMENT, APRIL, 1904.

During the month of April the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the workmen and women of fair wages and the performance of the work under proper sanitary conditions:—

| Nature of Work. | Amount of Order. | |
|--|------------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other stamps and type and brass crown seals | 555 | 42 |
| Making and repairing rubber dating and other hand stamps and type..... | 25 | 65 |
| Supplying stamping material, inclusive of making and repairing pads, also post marking and cancelling ink..... | 317 | 48 |
| Making and repairing post office scales.. | 151 | 75 |
| Supplying mail bags..... | 115 | 65 |
| Repairing mail bags..... | 911 | 44 |
| Repairing mail locks and supplying mail bags fittings..... | 461 | 80 |
| Supplying letter boxes and repairing letter boxes, portable tin boxes and mail clerks' tin boxes..... | 158 | 73 |
| Miscellaneous orders for making and repairing postal stores..... | 4 | 65 |
| Making up and supplying articles of official uniform..... | 258 | 50 |

INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, to one of the factory inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with a statement of returns of accidents made to them.

THE Department of Labour has received notice of 197 accidents to workmen during the month of April in different parts of the Dominion, resulting in the loss of 59 lives and in severe injuries to other workmen to the number of 138.

Compared with the month of March a decrease of 77 is shown in the total number of accidents to workmen, the number of deaths being the same, and the decrease in the number injured making up the total.

By industries and groups of trades the record is as follows :

| Trade or Industry. | Killed. | Injured. | Total. |
|-----------------------------------|---------|----------|--------|
| Agriculture..... | 3 | 7 | 10 |
| Lumbering..... | 2 | 4 | 6 |
| Fishing and hunting..... | 1 | 1 | 2 |
| Mining..... | 11 | 12 | 23 |
| Building trades..... | 1 | 7 | 8 |
| Metal trades..... | 6 | 28 | 34 |
| Wood-working trades..... | 1 | 7 | 8 |
| Printing and allied trades..... | | | |
| Clothing trades..... | 1 | 4 | 5 |
| Food and tobacco preparation..... | 2 | 2 | 4 |
| Railway service..... | 23 | 15 | 38 |
| Leather trades..... | 2 | | 2 |
| Miscellaneous..... | 4 | 35 | 39 |
| General transport..... | 2 | 11 | 13 |
| Unskilled labour..... | | 5 | 5 |
| Total | 59 | 138 | 197 |

Nature of Fatalities and Accidents.

From the detailed table of accidents published herewith it will be observed that the three most disastrous accidents of the month both from the standpoint of loss of

life and damage to property, were on railways, namely, one on April 3 at Griffin Lake, twenty miles west of Revelstoke, B.C., caused by a rock slide in which two lives were lost; a head-on collision at Guelph, Ont., between two freight trains, in which two train hands were killed and two severely injured, and the destruction of a work train by a snow slide at Albert Canyon, B.C., entailing the death of four railway employees. A brief description of these accidents is as follows :—

Wreck on Canadian Pacific Railway near Revelstoke, B. C.

At an early hour on the morning of Sunday, April 3, a C.P.R., freight train, while going up a steep grade west of Griffin Lake, and about twenty miles west of Revelstoke, B.C., was struck by a rock slide. The engine was thrown from the track and fell on its side. The engineer jumped and escaped without injury, but a brakeman was instantly killed and the fireman was pulled from under the tender with both legs cut off and lived only a short time.

Collision at Guelph, Ont.

A disastrous collision occurred on the main line of the Grand Trunk Railway, about a mile and a half east of the city of Guelph, Ont., on the morning of April 9, 1904. The collision was head-on between two freight trains, and resulted in the death of a fireman and of a brakeman and in severe injuries to an engineer and to another brakeman. The engines of the two trains and twelve cars were destroyed.

A coroner's inquest was opened in the police court on the afternoon of the 9th and was continued on the evening of Monday the 11th April, when it was adjourned to the evening of the 14th. The verdict returned was as follows :—

That fireman Thos. Snowden came to this death by a collision between freight trains Nos. 713 and 715 on the Grand Trunk Railway at what is known as the Trainer's Cut, east of this city, at about 1.46 a.m., on Saturday, 9th April, A.D. 1904.

That the accident occurred through a mistake of operator Richard Finley McKinley, and while not exonerating him from blame in the matter, owing to the night being wet and foggy and from the evidence submitted that the wires do not work as well in that kind of weather, that it is possible that he mistook the figure four for the figure three and endeavoured to the best of the ability to find the O.S. clip and failing that, inquired from the nearest station, showing that he was anxious to find out the number of the engine which passed.

We condemn the system of the O.S. slips as at present in use by the Grand Trunk Railway.

Were conductors required to stop and register this lamentable accident would have been avoided. We also consider that a night-watchman besides the operator should be on duty.

We condemn in unmeasured terms the apology for a station which the Grand Trunk Railway has in this city. It is impossible for an operator to get out of the front door without climbing over the wire work in front, while valuable time is lost in having to get out the rear door.

It is also entirely inadequate for the passenger traffic which daily accumulates there, more especially during the month of June, and great rush during the holiday season. That serious accidents have not occurred before is a matter of congratulation.

We would strongly urge the proper authorities to have a copy of this verdict forwarded to the Railway Commission and request it to act upon the findings herein contained.

Destruction of Work Train at Albert Canyon, B.C.

In addition to the rock slide which occurred at Griffin Lake, B.C., on the 3rd instant, as above reported, a second accident of a similar nature, resulting more disastrously in so far as loss of life was concerned, occurred at Albert Canyon, B.C., on the night of April 11, through which a trainmaster on the Canadian Pacific Railway, a machinist and two labourers lost their lives. A work-train engaged in clearing the track in the canyon in question from the debris of a previous slide was struck by a snow slide, stated to be a mile in length and twenty feet deep in places. Several cars were swept over the embankment and down the canyon a distance of 80 feet. The above-mentioned workmen were caught by the slide and hurled to death.

The Record by Trades and Industries.

By industries and groups of trades, the table shows the following record for the month:—

Agriculture.—Three accidental deaths and seven other accidents constitute the record of this branch for April. Of the fatalities, two occurred to colonists, one through falling from a train in motion, and the other from being run over by a train. The other death was occasioned by the workman being crushed at a barn-raising. Three of the non-fatal accidents were due to falls, two from a hay mow and one from a kitchen roof which the person was shingling. Another accident was due to the kick of a cow, another to the falling of a tree which the farmer was felling, another was to a drover while loading cattle on a railway car, and another resulted from the person being accidentally struck by an axe in a companion's hands.

Lumbering.—Two fatalities were reported, one caused by a tree falling and one by being thrown into the tail-race of a mill and being drowned. One of the non-fatal accidents occurred through the slipping of an axe, one by contact with a buzz saw, one by tap of engine blowing out and striking workman in the face, and one by being caught in belting.

Fishing and hunting.—One fatality and one other accident occurred in this branch, the fatality being the drowning of a fisherman who fell out of his boat, and the other accident happening to a trapper, who was kicked in the abdomen by a moose.

Mining.—The returns received by the department show 11 fatal and 12 non-fatal accidents. Six of the former accidents were caused by falls of rock or coal, or by a snowslide; one by being run over in a run-off of a slag locomotive; one by being drawn into belting; one by being caught between ascending and descending buckets, and two by falls. The causes of the non-fatal injuries were: one, the breaking of a leg by slipping and falling while trying to avoid a coal car; one, being struck by a runaway pit-box; four by being struck by falling coal or rock; three by falls, two down chutes and one from a car; one by being caught under a 'trip'; one, in a

collision of two empty 'rake lines,' and one by being crushed between cars.

Building trades.—One fatality and seven more or less severe injuries were reported. The death was that of a carpenter who was struck by a railway train. Four of the injuries were due to workmen falling to the ground from scaffoldings, &c.; two were cuts received from edged tools and one was caused by the fall of a heavy piece of timber.

Metal trades.—In this group there were 34 accidents, 6 fatal and 28 non-fatal. One of the fatalities happened through the workman's clothes being caught in belting; one was caused by a fall from a scaffold, and one by a hammer head flying off, striking workman on forehead and causing concussion of the brain. Eight of the other injuries were received by portions of material or machinery falling on the workmen; seven by the workmen falling various distances to the ground; eight by workmen being caught in machinery, revolving gear, presses, &c.; one by the premature explosion of a cartridge; one by the slipping of an axe; one by an explosion of acetylene gas, and one by the bursting of a corundum wheel.

Woodworking trades.—One fatality occurred in this group, a factory hand at Montreal, Que., being struck in the abdomen by a deal flung back from a planer. The seven other accidents reported were all directly due to saws and other machinery.

Printing and allied trades.—No accidents were reported in these trades during April.

Clothing trades.—There was a total of five accidents in this group, one fatal and four non-fatal. An employee in the woolen mills at Stratford, Ont., was killed through his clothes becoming caught in a revolving shaft. Two of the other casualties were in connection with machinery; one was received while unloading cotton from a car, and one by the vibration of machinery loosening some bricks which fell on the workman's head.

Food and tobacco preparation.—In this group there were two deaths and two severely injured. An employee in a brewery at Guelph, Ont., died from blood poisoning through being wounded by the bursting of a beer bottle, and a milkman at Ottawa, Ont., while making his rounds, was drowned in a creek which had become swollen by the spring freshets. A meat cutter in Montreal, Que., had his foot badly scalded while at work in an abattoir, and a pork packer at Brantford, Ont., had his leg broken by a cutting machine.

Leather.—In the leather trades there were two fatalities, two tannery hands at Bracebridge, Ont., being drowned by the boat swamping while crossing a river.

The railway service.—This branch headed the list in numbers of accidents, with 38, of which 23 resulted fatally and 15 caused severe and in some cases possibly fatal injuries. Of these the accidents at Albert Canyon, B.C., near Revelstoke, B.C., and near Guelph, Ont., were responsible for 8 deaths and 2 injuries. Thirteen of the other fatalities resulted from workmen being caught between cars, being struck by and run over by trains or in collisions. A construction hand was also killed by a fall at Port Arthur, Ont., and another railway employee was killed by the premature explosion of a blast. In this group sectionmen and brakemen appear as chiefly affected by accidents, the former reporting 9 deaths and 3 injuries and the latter 5 deaths and two injuries. Of the 15 non-fatal accidents six occurred in collisions, one was caused by contact with circular saw, one by the premature explosion of blast, one was injured while coupling cars, five by falls of material, and one by being run over by a yard engine.

Miscellaneous.—Thirty-nine accidents occurred in the miscellaneous trades, of which 4 resulted fatally. A civic fireman at Paris, Ont., was killed during a fire by the falling of an iron smokestack; a chemical factory employee at Capleton, Que., was asphyxiated by gases from an acid tank which he was cleaning; the caretaker of a

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|----------------------------|---------------------------|---------------|---------|----------|--------------------------------------|---|
| 1904. | | | | | | |

| <i>Mining—</i> | | | | | | |
| Mine foreman..... | Glace Bay, N.S..... | " 12..... | 1 | | Leg broken..... | While avoiding coal car slipped and fell. |
| Engineer in smelter..... | Greenwood, B.C..... | " 12..... | 1 | | | Slag locomotive jumped track, crushing victim to death. |
| Smelter engineer..... | Michel, B.C..... | " 8..... | 1 | | | Drawn into belting. |
| Miner..... | Extension Mines, B.C..... | " 8..... | 1 | | | Buried under several tons of coal from roof of mine. |
| "..... | North Sydney, N.S..... | " 18..... | 1 | | | Crushed between ascending and descending buckets. |
| "..... | Lardeau, B.C..... | " 15..... | 1 | | | Buried under a snow slide 1,200 feet wide. |
| "..... | Dominion, N.S..... | " 11..... | 1 | | Leg, shoulder and ribs broken..... | Struck by run-away pit box. |
| "..... | "..... | " 14..... | 1 | | Shoulder and breastbone crushed..... | |
| "..... | Sydney, N.S..... | " 19..... | 1 | | Leg broken..... | By fall of top rock. |
| "..... | Greenwood, B.C..... | " 10..... | 1 | | | Fell from a structure. |
| "..... | Springhill, N.S..... | " 26..... | 1 | | Dangerously wounded..... | Caught under 'trip'. |

| | | | | | | |
|-------------------------|------------------------|---|----|---|---------------------------------|---|
| " | Halifax, N.S. | " | 25 | 1 | Ribs and leg broken. | Collision of two empty 'rake' lines. |
| " | Lardevau, B.C. | " | 26 | 1 | Ribs, &c., broken. | Fell 121 feet down a chute. |
| " | Ladysmith, B.C. | " | 5 | 1 | " | By fall of rock. |
| " | Nanaimo, B.C. | " | 11 | " | Fractured pelvis. | Squeezed between cars. |
| " | Roseland, B.C. | " | 20 | 1 | " | Accidental. |
| " | Wellington, B.C. | " | 4 | 1 | Head and body injured. | By fall of rock. |
| " | Phoenix, B.C. | " | 7 | 1 | Concussion of brain. | Fell down timber chute. |
| " | Wellington, B.C. | " | 9 | 1 | " | By fall of rock. |
| " | " | " | 10 | 1 | Dislocated hip. | " |
| " | Oreighton Mine, Ont. | " | 29 | 1 | Leg broken. | Fell from car. |
| " | Nanaimo, B.C. | " | 16 | 1 | " | By a fall from a trestle 15 feet to rock. |
| Quarryman | Hull, Que. | " | 8 | 1 | Foot crushed. | By fall of heavy piece of timber. |
| Building Trades | Niagara Falls, Ont. | " | 8 | 1 | Foot badly cut. | Chisel slipped. |
| Carpenter | London, Ont. | " | 25 | 1 | " | Struck by freight train at a street crossing. |
| Ship-carpenter | Montmorency, Que. | " | 27 | 1 | Leg broken. | Fell from scaffold. |
| Carpenter | Elelheim, Ont. | " | 26 | 1 | Four ribs broken. | Fell from pier, striking on a spile below. |
| " (pier) | Toronto Junction, Ont. | " | 26 | 4 | Leg badly gashed. | Adze slipped. |
| " | Montreal, Que. | " | 23 | 1 | Dangerously injured. | Fell from third storey of edifice being built. |
| Mason | Arthabaska, Que. | " | 27 | 1 | Serious internal injuries. | Scaffolding gave way, precipitating workmen 20 feet to ground. |
| Bricklayer | Jordon, Ont. | " | 21 | 1 | " | Fell 70 feet from a bridge. |
| Metal Trades— | Winnipeg, Man. | " | 19 | 1 | Very severely injured. | Fell from ninth storey of a building. |
| Structural iron worker. | New Westminster, B.C. | " | 19 | 1 | Dangerously injured. | Fell from a bridge. |
| " | Ottawa, Ont. | " | 2 | 1 | Mutilation of fingers, &c. | While tampering cap of fuse of cartridge the latter exploded. |
| Electrical worker. | Petrolia, Ont. | " | 7 | 1 | Leg badly gashed. | Axe slipped while repairing telegraph pole. |
| Electrical lineman. | Cahnet, Que. | " | 25 | 1 | " | Electrocuted while stringing wires. |
| Electrical worker. | Montreal, Que. | " | 13 | 1 | Ribs broken and other injuries. | While wiring a house fell from third storey. |
| " | Quebec, Que. | " | 14 | 1 | Severely injured. | Fell from a pole, a distance of 70 feet. |
| " | Peterboro, Ont. | " | 5 | 1 | Foot and hand crushed. | While repairing electric fire alarm bell in elevator. |
| " | " | " | 14 | 1 | Severe body injuries. | Fell while lifting a casting. |
| " | " | " | 20 | 1 | Arm badly lacerated. | By revolving gears. |
| " | " | " | 21 | 1 | Left arm broken. | By caving in of brick arch. |
| Plumber. | Nicolet, Que. | " | 23 | 1 | Badly burned on face and hands. | By accidental explosion of acetyling gas. |
| " | Montreal, Que. | " | 7 | 1 | " | Asphyxiated while working in trench. |
| Gasfitter. | Toronto, Ont. | " | 6 | 1 | Both legs broken. | By fall of an elevator. |
| Machinist. | " | " | 6 | 1 | Leg broken. | Iron plate fell while workman was lifting it from truck. |
| " | London, Ont. | " | 5 | 1 | Loss of right thumb. | Caught in press. |
| " | Toronto, Ont. | " | 7 | 1 | Left leg broken. | By fall of a quantity of steel plate. |
| " | " | " | 7 | 1 | Both legs broken. | Hoist gave way and fell on him. |
| " | Montreal, Que. | " | 13 | 1 | " | Clothes caught in belting. |
| " | Sydney, N.S. | " | 15 | 1 | " | By a fall from a scaffold. |
| " | Hamilton, Ont. | " | 21 | 1 | Leg broken and other injuries. | Caught between belting and floor and badly crushed. |
| " | Hull, Que. | " | 19 | 1 | " | Hammer head flew off handle, striking him on right cheek and causing concussion of brain. |
| " | Ottawa, Ont. | " | 20 | 1 | Hand crushed. | Caught in a roller. |
| " | Elora, Ont. | " | 11 | 1 | Badly cut wrist. | Fell on a set of harrows. |
| " | Hamilton, Ont. | " | 8 | 1 | Arm severely burnt. | Stumbled while carrying ladle of molten metal. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL—Continued.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------------------|----------------------|---------|---------|----------|------------------------------|--|
| <i>Metal trades—Con.</i> | | 1904. | | | | |
| Machineist | Hamilton, Ont. | " 8 | 1 | 1 | Back injured. | Fell about 20 feet. |
| " | " | " 9 | 1 | 1 | Severely injured about body. | Bursting of a cornidium wheel. |
| " | London, Ont. | " 4 | 1 | 1 | Four fingers badly crushed. | While stamping dish pan-handles. |
| " | Brantford, Ont. | " 26 | 1 | 1 | Right arm badly lacerated. | Caught in machinery. |
| " | Toronto, Ont. | " 22 | 1 | 1 | Right hand badly crushed. | By fall of a boiler plate. |
| " | Lachine, Que. | " 29 | 1 | 1 | Skull fractured. | Caught in a revolving shaft. |
| " | Montreal, Que. | " 11 | 1 | 1 | Leg broken. | Fall of piece of iron on same. |
| <i>Woodworking Trades—</i> | | | | | | |
| Factory hand | Montreal, Que. | April 5 | 1 | 1 | Hands mangled. | Caught in a shingle machine. |
| " | Woodstock, Ont. | " 9 | 1 | 1 | Loss of parts of fingers. | Caught in machinery. |
| " | Hamilton, Ont. | " 12 | 1 | 1 | Lost one finger. | " |
| " | Deseronto, Ont. | " 7 | 1 | 1 | Several fingers badly cut. | Caught in shingle machine. |
| " | Hanover, Ont. | " 9 | 1 | 1 | Loss of two fingers. | By glue-jointer machine. |
| " | Chesley, Ont. | " 9 | 1 | 1 | " | By finishing saw. |
| " | Toronto, Ont. | " 22 | 1 | 1 | Arm badly gashed. | By a cross-cut saw. |
| " | Montreal, Que. | " 19 | 1 | 1 | " | Struck in abdomen by a deal flung from a planer. |
| <i>Clothing Trades—</i> | | | | | | |
| Cotton factory hand | Quebec, Que. | " 8 | 1 | 1 | Loss of hand | Caught in carding machinery. |
| " | Hamilton, Ont. | " 13 | 1 | 1 | Leg broken. | While unloading cotton from car. |
| " | Stratford, Ont. | " 19 | 1 | 1 | Spine possibly fractured. | Clothes caught in shaft and wound him around same. |
| Woolen mill employee | St. Hyacinthe, Que. | " 19 | 1 | 1 | Dangerous wounds to head. | Vibration of machinery loosened part of supporting wall and three bricks fell on head of victim. |
| " | Stratford, Ont. | " 19 | 1 | 1 | " | Died on April 20 from injuries received by clothes catching in shaft on 19th. |
| <i>Food and Tobacco Preparation—</i> | | | | | | |
| Brewery worker | Guelph, Ont. | " 2 | 1 | 1 | " | Beer bottle burst, cutting him and causing blood poisoning. |
| Butcher's helper | Montreal, Que. | " 28 | 1 | 1 | Feet badly scalded. | While at work at abattoir. |
| Milkman. | Ottawa, Ont. | " 11 | 1 | 1 | " | Drowned in swollen creek while crossing same in milk van. |
| Pork packer | Brantford, Ont. | " 29 | 1 | 1 | Leg broken. | Foot entangled in cutting machine. |
| <i>Leather Trades—</i> | | | | | | |
| Tannery hand | Bracebridge, Ont. | " 29 | 2 | 2 | " | While crossing river on way to work boat swamped and they were drowned. |
| <i>Railway Service—</i> | | | | | | |
| Conductor | Windsor, Ont. | " 11 | 1 | 1 | " | While attempting to board a moving train. |
| " | Nixon, Ont. | " 15 | 1 | 1 | Internally injured. | In a collision between two passenger trains. |
| Engineer. | Guelph, Ont. | " 9 | 1 | 1 | Badly scalded. | In a collision between two freight trains. |
| " | Brantford, Ont. | " 23 | 1 | 1 | Head and face cut. | In a head-on collision between passenger and pay-car trains. |
| Asst. engineer | Alberta Canyon, B.C. | " 11 | 1 | 1 | " | While overseeing clearing of track was overwhelmed by a snow and rock slide. |
| Car inspector. | Chalk River, Ont. | " 19 | 1 | 1 | " | While operating switch, run over by freight train. |

| | | | |
|-----------------------|----------------------|----|---|
| Tram-master | Alberta Canyon, B.C. | 1 | While arranging draw-bar, arm crushed between two cars. |
| Brakeman | Brompton Falls, Que. | 2 | In a head-on collision between two freight trains. |
| " | Guelph, Ont. | 9 | A freight train struck rock-slide and four cars were overturned, killing workman. |
| " | Revelstoke, B.C. | 3 | Struck by a special freight train. |
| " | Moncton, N.B. | 10 | While coupling cars. |
| " | Welland, Ont. | 13 | A trunk fell on him while unloading baggage. |
| " | Chatham, Ont. | 27 | Fell between cars and was run over. |
| " | Carleton Place, N.B. | 10 | By fall of a heavy piece of iron. |
| Railway shop hand | Montreal, Que. | 15 | By contact with circular saw. |
| " | " | 18 | Tire of car wheel fell on leg. |
| " | St. Thomas, Ont. | 21 | While coaling engine, was caught between locomotive and coal chute. |
| Coal dockman | Montrose, Ont. | 17 | Freight train struck a rock-slide and four cars were overturned. |
| Fireman | Revelstoke, B.C. | 3 | In a head-on collision between two freight trains. |
| " | Guelph, Ont. | 9 | " |
| " | Port Arthur, Ont. | 10 | Fell from staging, a distance of 80 feet. |
| Construction hand | Patton, Ont. | 25 | By steam shovel slipping and striking him on leg. |
| " | Ladysmith, B.C. | 20 | Premature explosion of a blast. |
| " | " | 1 | " |
| Sectionman | Lindsay, Ont. | 2 | Run over by engine while working on track. |
| " | Paris, Ont. | 7 | Struck by a freight train. |
| " | Sherrington, Que. | 11 | Struck by a locomotive. |
| " | Clinton, Ont. | 9 | Crushed by 'gigger' when removing same from track. |
| " | Albert Canyon, B.C. | 11 | Work train struck by snow slide and swept over embankment, some 80 feet. |
| " | Welland, Ont. | 8 | Tie fell on it. |
| " | Quebec, Que. | 30 | While at work on railway line. |
| " | St. Thomas, Ont. | 30 | Run over by train. |
| Switchman | Halifax, N.S. | 28 | Got foot caught in frog and was run over by engine. |
| Yardman | Moosejaw, N.W.T. | 3 | Run over by yard engine. |
| " | Winnipeg, Man. | 7 | Run over by yard engine. |
| " | " | 13 | Run over by shunting engine. |
| Miscellaneous— | | | |
| Warehouseman | Brantford, Ont. | 7 | Jumped from crate of crockery on to a spike which protruded from ground. |
| Druggist | Sherbrooke, Que. | 20 | Fell from counter in store on to a glass show-case. |
| Caretaker | Hamilton, Ont. | 11 | While fixing chandelier, received electric shock. |
| Lime kiln employee | Port Colborne, Ont. | 8 | Struck by railway train while walking track. |
| Clerk, hardware | Toronto, Ont. | 18 | While cleaning windows of establishment, fell from fifth storey. |
| Cement works employee | Marlbank, Ont. | 3 | While lifting a barrel of oil. |
| " | " | 6 | " |
| " | " | 1 | While coupling dump cars. |
| Fireman, civic | Paris, Ont. | 14 | During a fire a smoke-stack fell on him. |
| Firemen, civic | Montreal, Que. | 1 | By falling glass from burning building. |
| " | Paris, Ont. | 14 | During a fire a smoke-stack fell on them. |
| Fireman, chief | Toronto, Ont. | 19 | By fall from third storey of burning building. |
| " | Quebec, Que. | 19 | Thrown from reel going to a fire. |
| " | Toronto, Ont. | 19 | By severe burns to eyes and limbs, shocks, chills, sprains, &c. |
| " | " | 20 | While loading fire-engine and reel on cars to go to Toronto. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL *Continued.*

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|-----------------------------|----------------------------|------------|----------|----------|----------------------------|---|
| <i>Miscellaneous—Con.</i> | | 1904. | | | | |
| Excise officer | Montreal, Que | " 23 | 23 | 1 | Dislocated shoulder. | While inspecting a factory, fell a distance of 16 ft. |
| Chemical Co. employee | Capetlon, Que | " 16 | 16 | 1 | | Died from effects of naphthegases inhaled while cleaning acid tank. |
| Paper mill employee | St. Catharines, Ont | " 8 | 8 | 1 | 3 fingers smashed | By a calender. |
| " | Toronto, Ont | " 23 | 23 | 1 | Leg broken. | Fell out of factory window. |
| <i>General Transport</i> | | | | | | |
| Stevordore | St. John, N.B. | " 5 | 5 | 1 | Right foot crushed. | Thrown down by railway car, which went over part of foot. |
| 2nd steward on vessel | Yarmouth, N.S. | " 19 | 19 | 1 | | Drowned. |
| Hack driver | Toronto, Ont | " 9 | 9 | 1 | | Fell from seat of hack, cerebral hemorrhage cause of death. |
| Teamster | London, Ont | " 4 | 4 | 1 | | Thrown from wagon to ground, through collision with street car. |
| " | Montreal, Que | " 8 | 8 | 1 | Left leg fractured. | Fell from his wagon. |
| " | Moncton, N.B. | " 7 | 7 | 1 | Head and body crushed. | Fell from wagon between wheels and box. |
| " | Port Colborne, Ont | " 6 | 6 | 1 | Head and body injured. | Kicked by a horse. |
| " | Toronto, Ont | " 5 | 5 | 1 | Leg broken. | While unloading boiler, which rolled. |
| " | Montreal, Que | " 5 | 5 | 1 | Head badly cut. | In a collision between his vehicle and street car. |
| " | " | " 29 | 29 | 1 | Concussion of brain. | By a fall from his wagon. |
| Expressman | Toronto, Ont | " 22 | 22 | 1 | Left side and leg injured. | Was thrown from his wagon. |
| Motorman | Montreal, Que | " 30 | 30 | 1 | Forehead badly gashed. | Thrown head first through glass of his car in a collision. |
| Drayman | Aylmer, Ont | " 21 | 21 | 1 | Dangerously injured | Fell from his dray and a wagon wheel he was carting slipped and fell on pit of his stomach. |
| <i>Unskilled Labour—</i> | | | | | | |
| Labourer | Niagara Falls, Ont | " 5 | 5 | 1 | Hand crushed. | By a fall of rock in excavation. |
| " | " | " 6 | 6 | 1 | Pelvic bone fractured. | Dump-car loaded with rock capsized. |
| " | " | " 9 | 9 | 1 | Leg broken. | By a landslide in excavation. |
| " | " | " 9 | 9 | 1 | Loss of left foot. | Run over by a dump-car. |
| " | New Westminster, B.C. | " 1 | 1 | 1 | Hand crushed. | While working with gang on Fraser River improvements. |

ACCIDENTS HAPPENING IN PREVIOUS MONTHS, BUT ONLY REPORTED TO DEPARTMENT IN APRIL.

| | | | | | | |
|-----------------------------|----------------------------|---------------|----------|---------|------------------------|--|
| Structural ironworker | New Westminster, B.C. | Mar. 30 | 30 | 1 | Foot crushed. | While handling heavy iron. |
| Section foreman | Oak Lake, Man. | " 23 | 23 | 1 | | Jury's verdict: Death due to his hand-car being struck by snow-plough. |
| Sectionmen | " | " 23 | 23 | 2 | Dangerously bruised | In a collision between hand-car and snow-plough. |

falling on a glass show case, and a workman at Port Colborne, Ont., had his left arm broken by being struck by a railway train.

General transport.—The record of this group shows 2 deaths and 11 injuries. A steward on a vessel at Yarmouth, N.S., fell overboard and was drowned, and a hachman at Toronto, Ont., fell from his vehicle and died from cerebral hemorrhage. Nine of the non-fatal injuries were caused by falls from wagons or other conveyances, one by the kick of a horse, and one by the fall of a boiler which a workman was unloading.

Unskilled labour.—There were 5 non-fatal accidents in this class of labour, 4 resulting from falls of material, and one being caused by a workman being run over by a dump car.

public building at Hamilton, Ont., while trying to repair a chandelier, was electrocuted, and a clerk in Toronto, Ont., while cleaning windows, fell from a fifth story and was killed. Twenty-seven of the non-fatal accidents occurred to firemen while in the pursuit of their calling. Of this number, the fire in Toronto, Ont., on April 19,* was responsible for 20 injuries of a more or less severe nature. Of the remaining accidents, an excise officer in Montreal, Que., fell a distance of 16 feet while inspecting a factory; a paper mill employee at St. Catharines, Ont., was severely injured by a calender; another papermaker at Toronto, Ont., fell from a factory window and broke his leg; a druggist in Sherbrooke, Que., was severely injured by

NOTES.

The Railway Commission at Ottawa held an inquiry into the recent accident at the diamond crossing, Leamoxville, which resulted in the loss of four lives. The newly appointed inspector of accidents,* after visiting the scene of the accident, held a formal inquiry at the Canadian Pacific Railway station, Sherbrooke. Witnesses were examined and the whole matter was thoroughly investigated. Representatives of the three roads, the C. O. R., the B. and B. M. and the G. T. R. were present. It was reported that, as a result of the inquiry, an interlocking switch will be placed at the diamond. This would make it necessary for every train to come to a standstill on approaching the crossing. The question of responsibility for the accident was not, at the end of the month, finally established.

* A special article relating to the creation of this office appears at another page of the present issue of the *Labour Gazette*.

GOVERNMENT CONTRACTS FOR THE MONTH OF APRIL.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties during the month of February, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule in each contract :—

Extension of close-faced cribwork in the River Ste. Marie at Sault Ste. Marie, Ont., April 12, 1904 ; \$65,000.

FAIR WAGES SCHEDULE.

| Trade or Class of Labour. | Rate of Wages. | | |
|--|-------------------------------|-----------------------|--|
| | Not less than the following : | | |
| Contractors' foreman carpenter.. . . . | \$ 3.00 | per day of 10 hours. | |
| Carpenters.. . . . | 2.00 | " 10 " | |
| Blacksmiths.. . . . | 2.00 | " 10 " | |
| Blacksmiths' helpers.. . . . | 1.50 | " 10 " | |
| Ordinary labourers.. . . . | 1.25 | " 10 " | |
| Driver with 1 horse and cart.. . . . | 2.25 | " 10 " | |
| " " 2 horses and wagon.. . . . | 3.50 | " 10 " | |
| " " 1 horse.. . . . | 2.25 | " 10 " | |
| " " 2 horses.. . . . | 3.50 | " 10 " | |
| Dredge captain.. . . . | 125.00 | per month with board. | |
| " engineer.. . . . | 125.00 | " " " | |
| " fireman.. . . . | 60.00 | " " " | |
| " deck hand.. . . . | 50.00 | " " " | |
| " craneman.. . . . | 90.00 | " " " | |
| " scowmen.. . . . | 60.00 | " " " | |
| Tug captain.. . . . | 100.00 | " " " | |

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus for the fiscal year from July 1, 1902, to June 30, 1903. Ottawa, King's Printer, 1904 :—

DOMINION REPORTS.

Railways and Canals.

Annual Report of the Department of Railways and Canals for the fiscal year from July 1, 1902, to June 30, 1903. Ottawa, King's Printer, 1904. Pages, 708. Price, 55 cents.

The total expenditure of the Dominion government on railways and canals during the past fiscal year was \$13,920,445.79. Of this amount, the sum of \$11,036,607.83 was spent on government railways, \$1,463,222.34 on subsidies to other railways, \$2,848,439.96 on canals, and \$35,398 for miscellaneous expenditures. The revenue derived from railways amounted to \$6,584,598.77, and from canals, \$230,213.15, of which \$153,538.20 were from tolls, and \$70,253.94 from hydraulic rents.

The number of steam railways in operation in Canada on June 30, 1903, was 167, but as many of these are amalgamated or leased, the total number of controlling companies was 79, not including the government railways. The number of miles of completed railway lines was 19,077. The paid up capital of all the companies amounted to \$1,146,550,769, an increase of \$47,698,562 over the previous year. The gross earnings amounted to \$96,064,527, an increase of \$12,398,024, and the net earnings showed an increase of \$2,260,092. The number of passengers carried was 22,148,742, an increase of 1,468,768, and the freight traffic amounted to 47,373,417 tons, an increase of 4,996,890 tons.

There were 759 miles of electric railway lines completed at the close of the fiscal year. The paid up capital of electric railway companies was \$47,274,853, their gross

earnings amounted to \$7,233,677, an increase of \$747,239, and their net earnings were \$2,760,819, an increase of \$77,236. The number of passengers carried was 155,662,812, an increase of 17,981,410, and the freight carried amounted to 371,286 tons, an increase of 105,104 tons. Returns were received from 45 companies. Of these 15 obtained their power by water and 30 by steam.

The gross earnings of all the government railways for the year amounted to \$6,584,598.77, an increase of \$665,608.30 over the previous year, and the expenses amounted to \$6,474,134.20, an increase of \$593,034.66, showing a net gain of \$110,464.57. The Intercolonial Railway showed a profit of \$127,670.53, and the Prince Edward Island Railway a loss of \$41,923.58. The Windsor branch, which is only maintained by the government, produced \$24,717.62, which is equal to one-third of the total earnings.

For the construction and enlargement of canals, a total of \$1,823,273.61 was spent, and the sum of \$1,025,166.35 was expended for repairs and maintenance. There was a decrease of \$70,200.53 in the revenue collected from the canals, owing to the abolishment of tolls for the season of 1903. Statistics are given of the canal traffic during the season of 1902. On the Welland canal, 665,387 tons of freight were moved, an increase of 45,178 tons. Of this freight Canadian vessels carried 327,107 tons, an increase of 36,574 tons, and United States vessels 318,990 tons, an increase of 4,573 tons. On the Sault Ste. Marie canal the movement of freight was 4,729,268 tons, an increase of 1,908,874. The number of freight vessels passing through was 5,043. Among the kinds of freight carried were 27,911,287 bushels of wheat, 3,661,904 bushels of other grain, 2,843,860 barrels of flour, 2,504,452 tons of iron ore, 563,835 tons of coal, and 49,084,942 feet of lumber, board measure. In comparing the transport of grain by canals and railways, it is stated that 208,215 tons of grain and pease, an increase

of 56,649 tons over the previous year, passed through the Welland and St. Lawrence canals to Montreal, while 263,861 tons, an increase of 36,161, were carried by the Canadian Pacific and Grand Trunk railways.

In addition to much other information, this report contains returns of railway accidents during the year, an account of which is given in the article on 'Industrial Accidents,' in the present number of the *Labour Gazette*.

Canadian Fisheries.

Thirty-sixth Annual Report of the Department of Marine and Fisheries, 1903. Ottawa, King's Printer, 1904. Pages, 435. Price, 25 cents.

In the Report of the Department of Marine and Fisheries for 1903 it is stated that the value of the yield of fish in Canadian waters in 1902 amounted to \$21,959,432, being divided among the several provinces as follows: Nova Scotia, \$7,351,753; British Columbia, \$5,284,824; New Brunswick, \$3,912,514; Quebec, \$2,059,157; Ontario, \$1,265,706; Manitoba and North-west Territories, \$1,198,437, and Prince Edward Island, \$887,024. There was a falling-off in the catch compared with that of 1901, in which year the value of the yield of fish amounted to \$25,737,153, but it was, however, greater than in any previous year except 1897. The chief decreases from the previous year were \$2,886,348 in the salmon fisheries, \$533,091 in mackerel, \$182,926 in haddock, and \$180,639 in sardines. During the last fiscal year the value of fish and fish products exported from Canada to foreign countries amounted to \$11,826,646.

In the year 1902, the fishermen of the maritime provinces received the sum of \$159,853 as fisheries bounties on their catches of deep-sea fish. Of this amount the sum of \$71,079 was divided among the owners and crews of 795 vessels, and \$88,774 were distributed among 20,229 boat fishermen. In that year 77,801 men were engaged in the fishing industry, using 5,623,717 fathoms of gill-nets and other

fishing gear, representing an aggregate capital of \$11,305,959.

The value of the lobster plants, comprising 723 canneries and employing 13,563 men, is estimated at \$1,287,656. The salmon canning industry of British Columbia, comprising 75 establishments valued at \$1,500,000, gave employment to 17,098 persons, and preserved over 30,103,776 cans of salmon. The British Columbia sealing fleet consisted of 34 schooners, with 129 boats and 206 canoes, valued at \$452,000, and manned by 858 sailors and hunters.

The expenditure of the department during the last fiscal year on the fisheries of Canada amounted to \$527,944, comprising \$114,719 on fisheries proper, \$77,330 on fish-culture, \$145,137 on the fisheries protection service, \$159,853 on fishing bounties, and \$30,903 on miscellaneous expenses. The revenue from fishery licenses, fines, &c., amounted to \$78,635, including \$9,057 for *modus vivendi* licenses granted to United States fishing vessels. The appendices to this report include reports on Fish-Culture Work in Canada for 1903, Oyster Culture, Fisheries Protection Service, Bait Cold Storage, Fisheries Intelligence Bureau, &c., as well as two special reports on 'The Dog-fish Plague in Canada,' and 'The Maximum Size of Some Important Fish.'

Insurance in Canada.

Abstract of Statements of Insurance Companies in Canada for year ended December 31, 1903. Ottawa, King's Printer, 1904. Pages, 70. Price, 5 cents.

The following statistics are taken from the Abstract of Statements of Insurance Companies in Canada for the year 1903. The fire insurance companies reported that the net cash received for premiums in 1903 amounted to \$11,434,856, and the net losses incurred came to \$5,815,860. The premiums received by Canadian companies totalled \$2,330,549, while British companies received \$7,336,485, and United States companies, \$1,767,832. The losses of Canadian companies amounted to \$1,228,691, British

companies lost \$3,740,352, and United States companies, \$846,817. Canadian fire and inland marine insurance companies had assets of \$7,816,492.44, and liabilities, excluding capital stock, of \$5,057,826.87.

In life insurance, the premiums of Canadian companies amounted to \$10,883,174. British companies received premiums of \$1,435,317, and the United States companies received \$5,924,608 in premiums. A noticeable feature is that there was an increase of 24,372 in the number of new policies issued by Canadian companies, compared with the previous year, while British companies showed a decrease of 9 and United States companies a decrease of 1,779. The sum of \$149,441 was paid in premiums for guarantee insurance, \$721,100 for accident insurance, \$85,728 for plate glass insurance, and \$398,611 for employers' liability insurance.

NEW BRUNSWICK REPORT.

Agriculture in New Brunswick.

Report on Agriculture for the province of New Brunswick for the year 1903. Fredericton, N.B., 1904. Pages, 255.

In his report for 1903 the Commissioner of Agriculture of New Brunswick states that there was a general increase in that province, not only in the yield of crops but also in the quantity grown. In 1903 there were produced 456,245 bushels of wheat, 5,791,607 bushels of oats, 105,117 bushels of barley, 1,424,728 bushels of buckwheat, 4,686,906 bushels of potatoes, and 2,595,156 bushels of turnips. With regard to special industries connected with agriculture, it is reported that dairy work was practically the same as in former years. The production of pork showed a considerable increase, and until the last few months of the year good prices were obtained for hogs. Three pork-packing establishments were erected during the year. There was a large increase in the quantity and an improvement in the quality of the poultry produced, which is attributed to the agitation started by speakers at the Farmers' Institute meetings and the establishment

of chicken-fattening stations by the Dominion Department of Agriculture. In order to improve the fruit-growing industry, the provincial Department of Agriculture proposes to plant model orchards of apples suitable for export, as those at present grown are mostly of too soft or early varieties. The hay crop was about up to the average, and a considerable quantity was sold in the markets of the United States.

ONTARIO REPORTS.

Prisons and Reformatories.*

Thirty-sixth Annual Report of the Inspector of Prisons and Reformatories of the Province of Ontario, being for the year ending 30th September, 1903. Toronto, King's Printer, 1904. 67 pages.

In his report upon the jails and lock-ups of Ontario for 1903, the Inspector of Prisons and Reformatories states that the number of committals for the year was 9,261, being nearly 1,000 in excess of the previous year. The chief increases were 300 for drunkenness, and 116 for crimes against the person. With the exception of the previous year, however, there were fewer crimes against the person in 1903 than in any other year since 1877. There were also fewer crimes against property than for twenty-five years. Offences against public order and peace were slightly greater in number, and other crimes remained about the same. There were 1,221 female prisoners. The number of married prisoners was 3,397, and the unmarried, 5,864. There were 1,662 illiterates among the prisoners and 6,363 inebriates. Eight new lock-ups were established in northern Ontario, on account of the increased population and the extension of lumbering and mining operations and railway construction. The average cost per day per prisoner was 24 cents, and the average total cost of food, clothing and fuel for each prisoner committed was \$6.18. It is noted that the total earnings of prisoners for the year in all the jails only amounted to

\$32.89. The number of committals was unduly increased owing to the lack of houses of refuge or homes for the care of the old and afflicted poor in many counties, which rendered it necessary to send them to the jails.

The committals to the Central Prison numbered 713. Of these 455 were committed for the first time, 130 for the second, 59 for the third, 25 for the fourth time, and the remaining 44 had been committed more than four times. There were 503 inebriates committed, 209 were temperate, and one prisoner was a total abstainer. The sales of the various industries of the Central Prison were as follows in 1903 :—

| | 1902. | 1903. |
|-------------------------------------|------------|------------|
| | \$ cts. | \$ cts. |
| Shoe shop..... | 3,740 81 | 4,432 61 |

Interesting extracts are given from the annual report of the Salvation Army Prison Gate Work. This work consists in visiting the prisoners with the object of effecting their moral reform, and obtaining employment for them on their discharge. In addition to private donations and a grant from the Salvation Army headquarters, the work is supported by a provincial government grant of \$750, a Toronto city council grant of \$300, and a grant of \$25 from the York county council. The sum of \$1,206.50 was expended in financial help to men on discharge from prison. The work of the Free Labour Bureau is shown in the following statement :—

| | |
|---|-------------|
| Number of men found permanent employment.. . . . | 397 |
| Number of men found temporary employment.. . . . | 930 |
| Number of men found employment for on their discharge from the prison and jails.. . . . | 514 |
| | <hr/> 1,841 |

The report also contains reports on the Ontario Reformatory for Boys, which is about to be abolished, and on the Andrew Mercer Reformatory for Females.

Agricultural Education in Ontario.

Twenty-ninth Annual Report of the Ontario Agricultural College and Experimental Farm for the year 1903. Toronto, King's Printer, 1904. Pages, 184.

The twenty-ninth annual report of the Ontario Agricultural College contains the usual reports of the members of the staff of this institution, outlining the work accomplished during the past year, which was mostly of an experimental and technical nature. In the report of the president a review is given of all the various forms of educational work with regard to the agricultural industry which is carried on in the province. There are a large number of societies and associations devoted to agriculture, stock-raising, dairying, fruit growing, horticulture and entomology, all of which receive provincial grants. The work of these societies consists of holding of meetings, delivering addresses, reading and discussing papers, and publishing annual reports for distribution among farmers. Township and county fairs are held annually all over the country, as well as larger ones at central points. Within the last five or six years winter fairs have been held at Guelph and Ottawa, which have proved to be of great educational value. Since 1891, travelling dairies have been sent through the province by the Ontario government which have been instrumental in producing a marked improvement in the quality of butter. There are eleven fruit experiment stations in the province, two experimental farms, and three dairy schools. Agriculture is taught in all

rural public schools in Ontario, and it is also made a compulsory subject in Manitoba and the North-west Territories. In 1903, there were 728 students in attendance at the Guelph Agricultural College. Early in that year work was commenced in the construction of the Macdonald Institute and Macdonald Hall. In the former instruction is provided in domestic science, nature study and manual training, the courses being adapted for teachers, farmers' daughters and others wishing to learn cooking, housekeeping, laundry work, sewing, &c. There were 21 students registered at the institute last year in the general course. Macdonald Hall, which is to be a women's residence, will be ready by next September and will furnish accommodation for 107 young women.

Ontario Fisheries.

Fifth Annual Report of the Department of Fisheries of the Province of Ontario, 1903. Toronto, King's Printer, 1904. Pages, 114.

The fisheries returns of the province of Ontario for 1903 indicate that the catch was smaller than in 1902, but the value was greater, owing to prices being exceptionally high. The cause of the diminished catch in a number of places is attributed to the fact that many fishermen, finding other employment more remunerative, abandoned their fishing operations for a portion of the year. A feature of the season was the return of the species of fish called ciscoes, which used to be caught in large numbers in Lake Ontario many years ago, but which afterwards became scarce.

Licenses were issued by the department to fish with 4,005,420 yards of gill nets, 488 pound nets, 523 hoop nets, 100 seines, 32 dip nets, three machines, and several thousand hooks. There were 2,443 men engaged in the fishing industry, using 24 gasoline boats, 109 tugs, and 1,370 other boats. The aggregate catch amounted to 21,194,205 pounds, compared with 23,714,570 in 1902, and the value of the catch was estimated at \$1,535,144. The capital invested was \$846,368.

Hospitals and Charities of Ontario.

Thirty-fourth Annual Report of the Inspector of Prisons and Public Charities upon the Hospitals and Charities, &c., of the province of Ontario. Being for the year ending September 30, 1903. Toronto, King's Printer, 1904. Pages, 100.

In the report of the inspector on hospitals and charities of Ontario, covering the year ending September 30, 1903, it is stated that there are in the province 59 hospitals, 35 refuges, 31 orphanages, 3 homes for incurables, two convalescent homes and two Magdalen asylums receiving government aid. Two more hospitals have petitioned for government grants under the Charity Aid Act. Two of the hospitals in the province, situated at Hamilton and London, are wholly under municipal management, but they are reported not to be so progressive or successful as the others. The number of patients under treatment in the hospitals during the year amounted to 35,368. The cost of maintenance of the hospitals was \$784,643.09, towards which sum the province granted \$110,000, being 14 per cent of the total expenditure. There are about one hundred old people's homes, orphanages, Magdalen asylums, convalescent homes, and homes for incurables in the province, having a total population of over 9,000, and an annual expenditure of \$358,559. In order to relieve the jails and asylums of the care of the aged poor, an Act was passed by the legislature in 1903 requiring every county or union of counties to erect and establish a house of refuge before January 1, 1906. One new house of refuge was completed during the year, and several more are in course of construction.

Electrical Development at Niagara Falls, Ont.

Eighteenth Annual Report of the Commissioners for the Queen Victoria Niagara Falls Park, Ontario, for the year 1903. Toronto, King's Printer, 1904. Pages, 39.

There are three companies constructing electrical power works at Niagara Falls, and a brief account of their operations during 1903 is given in the eighteenth annual report of the commissioners for the

Queen Victoria Niagara Falls Park. A great deal of construction work was accomplished by these companies during the year. The one furthest advanced is the Canadian Niagara Power Company, the charter of which provides that it should have 20,000 electrical horse power for sale by July 1 of the present year. The company, however, decided to complete the whole of their works at the same time, providing water connections for the authorized capacity of 100,000 horse power, and to instal sufficient machinery for an initial output of 50,000 horse power. Owing to the increased work involved in this change of plan, the company decided to apply for a six months' extension of the time limit and the park commissioners supported their application. The Ontario Power Company made good progress. The coffer-dam, which was built in 1902, having proved insufficient, a second one was constructed further up stream. Other work accomplished consisted in excavations for the pipe line and the power house, and the placing in position of 500 feet of a steel pipe eighteen feet in diameter, capable of carrying water to produce 50,000 electrical horse power. The Electrical Development Company of Ontario constructed two coffer-dams, prepared the river-bed for the sinking of the wheel-pit and commenced operations on the main tunnel.

The report of the park commissioners contains an account of many changes that were made in the surroundings of the Niagara Falls Park, and also a text of their agreement with the Ontario Power Company, dated February 28, 1903.

Education in Ontario.

Report of the Minister of Education, province of Ontario, for the year 1903. Part I. (with the statistics of 1902). Toronto, King's Printer, 1904. Pages, 207.

In addition to an account of the various educational institutions supported by the government of Ontario, the report of the Minister of Education contains reports from public libraries and from numerous

literary, scientific and historical societies in the province.

Statistics for 1902 show that there were in that year 5,671 public schools, 391 Roman Catholic separate schools, 6 Protestant separate schools, 120 kindergarten, 11 night schools, and 134 high-schools. The total number of registered pupils in 1902 was 454,088, a decrease of more than 4,000 compared with the previous year, although the school population increased in that time by 10,000, having been 584,512 in 1902. The average salary of male teachers for the whole province was \$436 per annum, and the salary of female teachers averaged \$313. In the country districts the salaries averaged \$372 for males, and \$271 for females, and in the cities they were \$935 for males and \$479 for female teachers.

Reports were received from 446 public libraries for the year 1902. In addition to these there were 35 public libraries which did not report, and 7 which were established in 1903. The 446 libraries which reported had a membership of 172,792, and contained a total of 6,044 newspapers and periodicals and 1,140,392 volumes.

In 1901, travelling libraries were established to meet the wants of new and sparsely-settled districts in northern Ontario. In most instances they have been taken advantage of by men working in the lumber and mining camps. Since their establishment 31 travelling libraries have been sent out, each case containing fifty books. Thirteen additional places were supplied in 1903.

Considerable progress was made in the formation of manual training and technical classes in connection with the various public schools and collegiate institutes. Five new schools for this branch of instruction were established during the year, and many other localities are contemplating their early introduction.

AUSTRALIAN REPORT.

Labour Conditions in New South Wales.

Labour Commissioners of New South Wales. Report for the year ended 30th June, 1903. King's Printer, Sydney, N.S.W., 1903. Pages, 60.

In the last report of the Labour Commissioners of New South Wales covering the year ending June 30, 1903, it is stated that the year was a bad one industrially in New South Wales, owing to the continuance of the drought, which only gradually began to break up during the latter half. The classes most seriously affected were unskilled labourers and those engaged in pastoral, agricultural and mining pursuits, and the professional and clerical classes. The building trades in Sydney, however, were fairly active, and there was great activity in the carrying trades. While the prices of commodities rose, wages were also generally increased, which prevented the distress being so great as in previous years of depression. The government assisted the unemployed by providing work for them at road-making and stone-breaking. An unemployed relief committee was formed in April, 1903, which established stone-breaking depots for applicants out of work, beginning on May 7. From that date until July 1, 3,707 work orders were issued, and 6,265 ration orders.

One of the duties of the Commissioners of Labour is the conducting of an Employment or Registration Office, as it is called. The establishment of two other government employment offices, for the benefit of those seeking positions on public works, has led to a restriction of this office to relief work, and a decrease in the number of applicants. There were 3,072 registrations during the year at the head office and branches of the department. There were 2,723 offers of work made to various men, of which 1,600 were accepted, 749 were refused, and 374 elicited no response. In the female registry office, there were 2,315 applications for help from em-

ployers, 1,685 applications for work, and sponse. In the female registry office there registration offices, the department had charge of a night shelter for homeless and destitute men, a labour depot and refuge, and a casual labour farm. The night shelter harboured an average of 200 men every night, and was reported to have been of great usefulness, but the commissioners received orders to close it at the end of last August. At the labour depot and refuge 298 men were admitted as residents, and 417 casuals were received, who stayed from one to three days. The cost of the establishment was £2,471 16s. 6d., and the revenue derived from the sale of produce was £119 15s. 10d., the value of produce grown and consumed was £342 19s. 2d., and the accrued value of stock was £61 12s. At the casual labour farm, 229 men were sheltered during the year. The cost of the farm was £3,101 15s. 10d., the revenue from sales was £1,736 2s. 8d., and the value of food grown and used on hand was £773 17s. 10d.

Recommendations are made in the report for the establishment of industrial farms, and for compulsory labour colonies for vagrants and loafers, and various suggestions are made for providing temporary relief for the unemployed.

UNITED STATES REPORTS.

Industrial Statistics of Michigan.

Twenty-first Annual Report of the Bureau of Labour and Industrial Statistics of the State of Michigan, including the Eleventh Annual Report of State Inspection of Factories. Lansing, Michigan, State Printers, 1904. Pages, 603.

The twenty-first annual report of the Bureau of Labour and Industrial Statistics of Michigan is devoted chiefly to descriptions of special industries of the state. The industries reported most fully are the manufacture of paper, beet sugar, beer, pickles, and butter and cheese. Statistics are also given regarding the manufacture of Portland cement, the flax industry, the manufacture of automobiles, and various other industries. A chapter is devoted to

an account of the production of copper and iron, and another one contains data of 26 successful Michigan firms engaged in various manufacturing enterprises. Other chapters contain statistics of penal and reformatory institutions, statistics of organized labour, and a report of the State Court of Mediation and Arbitration.

Part II. consists of the report of the State Inspection of Factories. In addition to the factories of Michigan, all stories employing ten or more persons, all hotels, tenement houses, or 'sweat shops,' and coal mines are inspected, and reports from all the inspectors are given in this volume. A paper read before the International Association of Factory Inspectors at Montreal last August, by the chief clerk of the Michigan department, forms the introductory pages of this part. The final chapter contains the laws of Michigan relating to labour.

Bound up with the volume there is an industrial map of the state, on which is indicated the location of the beet sugar factories, Portland cement factories, paper mills, chicory mills, flax mills, binder, twine factory, alcohol factory, silk mills, peppermint industry, and wood alcohol factory.

Connecticut Labour Statistics.

Nineteenth Annual Report of the Bureau of Labour Statistics of Connecticut, for the year ended November 30, 1903. Meriden, Conn., Journal Publishing Co., 1903. Pages, 550.

The nineteenth annual report of the Connecticut Bureau of Labour Statistics is divided into six parts. Part I. contains data with reference to new factory construction in the state during the year ending July 1, 1903, with particulars as to the location, size, style and cost of each establishment, the increase in the number of working people employed, and comparisons with previous years. Part II. contains statistics of manufactures, collected and tabulated in the same way as in former years. Part III. is composed of descriptions of seventy-three representa-

tive manufacturing establishments of the state, and contains illustrations of the different factories. Part IV. consists of a directory of labour organizations in Connecticut, of which 591 are mentioned. Part V. is devoted to an account of the strikes and lockouts which occurred in the state during the year. It also contains brief sketches of some of the important trade disputes which have taken place in the United States since 1796, and large extracts from the report of the 'Anthracite Coal Commission.' In Part VI. there are given detailed reports of the five free public employment bureaus. It is stated that these bureaus are becoming of increasing value to both employers and employees.

An appendix to the report contains the labour laws of Connecticut, which are found in the General Statutes revision of 1902, and amendments passed at the January session of the legislature in 1903.

New Jersey Labour Statistics.

Twenty-sixth Annual Report of the Bureau of Statistics of Labour and Industries of New Jersey, for the year ending October 31, 1903. Somerville, N.J.: The Unionist-Gazette Printing House, 1904. Pages, 637.

The twenty-sixth annual report of the Bureau of Statistics of New Jersey treats of the following subjects: Statistics of Railroads in New Jersey, the Fruit and Vegetable Canning Manufactories, the Negro in Manufacturing and Mechanical Industries, Cost of Living in New Jersey, the Social Aspect of Child Labour, Labour Legislation, Decisions of the Courts Affecting the Interests of Labour, and Labour Chronology.

In the first part statistics are given of 1,811 manufacturing establishments. Of these 803 are managed by private firms and 1,008 by corporations. A capital of \$45,377,398 is invested by private firms, divided among 1,408 partners, and the corporations control a capital of \$281,771,408,

divided among 48,802 stockholders. The average yearly earnings in all the industries in 1902 was \$467.13, an increase of nearly \$26 over the previous year. The total number of employees was \$243,525, of whom 184,481 were males and 60,044 females. The month of November is shown to be the period of greatest industrial activity, and January the month of least activity.

In the portion of the report relating to steam railroad statistics, it is stated that the number of persons employed by railway companies was 34,809 in 1902 and 38,363 in 1903. The average number of days of work for each employee increased from 292 in 1902 to 297 in 1903, and the average daily wages advanced from \$1.87 to \$1.92 in the two years. The number of accidents to employees was very great, four companies reporting that out of 29,325 men, 1,100 were more or less injured when on duty.

In the chapter on the cost of living in New Jersey the retail prices are given of 49 articles of table supplies in the principal centres in the state in the month of June, 1903. Compared with 1898, the total average cost of these articles decreased from \$11.46 to \$10.74.

In regard to child labour, the report states that out of 241,582 wage-earners, 8,042 are children under sixteen years of age. In order to ascertain the condition of children who were at work in factories, investigations of a number of particular families were made, the result of which showed that most of them were living in comfort, supported partly from the earnings of the children, but that the children were not debarred from acquiring the rudiments of education, and they were not found to be overworked. The worst feature discovered was the employment of young boys in the glass factories at night, and a recommendation is made that night work for children be prohibited by law.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada.

QUEBEC CASES.

Accident Caused by Employee's own Imprudence.

F. was employed by the Canadian Pacific Company. In the course of his work he was killed by a snow-slide on the railway line in the Rocky Mountains, where he was then working as assistant foreman of a track gang. F.'s father and mother brought action for \$10,000 for the death of their son against the railway company, alleging that the snow-sheds were badly constructed and insufficient for their purposes. The reason for so doing as well as the facts of the case are shown by the following extract from the judgment :—

'The plaintiff's son was at the time employed in removing snow from the tracks of the defendant in a mountainous region, which work is dangerous by reason of snow-slides, particularly in the spring. The plaintiff's son had experience of such work and knew the nature of the danger. The snow-sheds were erected for the purpose of protecting every person having occasion to use the road from danger from snow-slides, and were sufficient for that purpose. Occasionally a rock or other heavy substance becomes detached from the mountain and comes down with irresistible force, from which no possible construction could afford protection.

The deceased, just before the accident, passed through one of the snow-sheds, which was about 400 feet long, and knew while so doing that a snow-slide was coming, but, notwithstanding, left the protection of that shed and attempted to reach the next shed about 140 feet distant, but was struck and engulfed by the descending snow and killed.

Considering that the said accident happened by the imprudence of plaintiff's son in not availing himself of the protection of snow-shed number six, which he had just left, and that, in consequence, the defendant is not liable for the result of the accident. The action is dismissed with costs.'

(Falsoner v. C.P.R. Co. Judgment given in the Superior Court at Montreal, April, 1904.)

Liability of Contractor for Delay Caused by Strike.

L. contracted for a certain building—the agreement containing a clause that if the same was not finished by the 1st of April, 1903, he should pay \$25.00 by way of damages for every day until the same was completed. The building was not finished until 20th August. Subsequently L. brought an action against the owner for a balance which he claimed was due him for work done. The owner defended the action, alleging that the \$25.00 a day penalty made a set-off greater than the amount claimed. L. replied that the work had been delayed, first, by the action of the owner himself and his architect; and secondly by a strike amongst his own employees for which he was not responsible.

The court maintained L.'s contention that the main delay in finishing the building had been caused by the owner and his architect. It was also decided, however, that L. was liable for the 11 days' delay caused on account of the strike amongst his employees—and a deduction was therefore made to that extent from the amount which he claimed for work done.

(Long v. Stevenson. Judgment given in the Superior Court at Montreal, 23rd March, 1904.)

ONTARIO CASES.

Liability for Defective Boiler.

J. was employed in Toronto as a fireman by the Grand Trunk Railway Company. He was directed to clean a certain boiler—to do which he had to go into what is known as the pit. He found the ordinary way blocked by a flood caused by a defect in the boiler, and in attempting to get there by another way he inadvertently touched an unprotected valve of another boiler, the result being that he was severely scalded.

J. brought an action against the railway company, alleging that the accident was caused by the defective condition of its

appliances. Before the action was tried, however, a settlement was arrived at, J. being paid \$350.00 as damages for his injuries.

(Jouffret v. G. T. R. Co.)

Sunday Observance.—Work may be a Necessity by Reason of its Continuous Nature.

Recently an action was brought by the Provincial Lord's Day Alliance against two employees of the Ontario Sugar Co., Berlin, Ontario, on a charge of operating a beet slicing machine in the company's factory on a certain Sunday.

The action was brought before the police magistrate and a considerable amount of evidence was put in. The defence was to the effect that if the factory were to close on Saturday night the juices passing through the crystalizers would deteriorate, and the sugar would thereby lose its colour. It was also claimed that the factory could not be operated profitably if it was obliged to stop every week.

The evidence of an expert witness was also practically to that effect.

The police magistrate finally gave judgment, coming to the conclusion that the process of making sugar from beets, as followed in the factory, was a continuous one, and that it was a work of necessity that operations should be continued on Sundays. The charges were therefore dismissed.

(Judgment given by Police Magistrate Weir at Berlin, Ont., 7th April, 1904.)

Two Examples of Employers' Liability for Carelessness of Employees.

P. was employed as a railway fireman. While his engine was standing at St. Thomas he fell from it and sustained serious injuries. He brought an action against the railway company for damages, claiming that his engineer had ordered him to clean out the fire-box, and that when he was doing so the engine started suddenly, throwing him over the side of a

bridge upon which the locomotive was then standing. It was also alleged that some of his injuries would be permanent.

The action was tried with a jury which brought in a verdict of \$1,500 damages—the company being held liable for the carelessness of its employees.

(Parker v. The L. E. & D. R. Ry. Co. Judgment given at St. Thomas, February, 1904.)

S. was employed in a foundry in which was an arc lamp which the Toronto Electric Light Company was required to keep in order. One evening this lamp went out and a message was sent to the Toronto Electric Light Company, who sent S. to fix it. S. lowered the lamp, which was directly over the end of a mould-box into which was put molten iron for the castings, and commenced working at it. The lamp-trimmer for the Electric Light Co., who trimmed this lamp every day, arrived at that time and they commenced to trim it together. The men in the foundry were carrying a ladle filled with molten iron from the place where the iron was melted to the mould near the arc lamp. S. was one of the men carrying the front handle of the ladle. When he came near the arc lamp it knocked against him—the result being that all the men carrying the ladle were knocked down and that S. was severely burnt, being unable to work for ten or twelve weeks.

S. brought an action against the Toronto Electric Light Company, claiming that it was the negligence of its employee in letting the lamp swing when the ladle was near it which caused the accident, and that it was liable for such negligence. A jury awarded S. \$1,000 damages, and on appeal this was confirmed.

(Sedore v. Toronto Electric Light Co. Judgment given by a Divisional Court at Toronto, 5th April, 1904.)

MANITOBA CASE.

Employer not Liable for Accident to Skilled Manager.

S. and others purchased an electric light plant. They were entirely unacquainted

with the technical details of such matters, and they therefore engaged D., as a skilled electrician, to manage the plant and put it in proper working condition. In order that he might be able to do this, they arranged that anything he might require for such purpose would be furnished upon his orders by an electric supply company.

D. investigated the plant both before and after his engagement, commenced operations, and from time to time ordered such supplies as he thought necessary for repairs or alterations.

After he had acted as manager for some months, he went one day to examine the pump pit, as there was some trouble with the air pump. While down he took hold of the brass socket of an incandescent electric lamp and received a shock which killed him. The question was hanging from a wooden grating over the pit, and though it was not of the latest design, D. had not seen fit to change it when making alterations in the works. There was also an ordinary lantern for the use of any person going into the pump pit to examine the machinery, but D. did not take it with him, and it appeared that he meant to use the electric lamp for that purpose. Soon after the accident the lights in the power-house went out, and it was subsequently discovered that the electrical transformer had burnt out.

D.'s father, mother and sisters brought an action against the owners of the electric light plant under the Manitoba statute respecting compensation to families of persons killed by accident. They claimed that the proprietors of the plant were negligent in not having remedied defects in the same.

At the trial the jury brought in a verdict awarding \$1,500 damages. An appeal was taken, and the court ordered that the verdict should be set aside and that there should be a new trial, upon the ground that there was no evidence that D.'s father, mother and sisters had suffered

damages which would enable them to recover the same under the provisions of the statute above referred to. An appeal from this judgment was taken to the Supreme Court of Canada, which dismissed the appeal with costs, not on the ground that D.'s father, mother and sisters had not suffered damages, but because, in its opinion, it was shown that the owners of the electric plant were not in any way liable for the death of D. The judgment points out that the charge and control of the plant was in D.'s hands and that 'any of the defects complained of were the very matters which the deceased undertook to remedy, if discovered, and the failure to discover such defects must be attributed to him. There was no evidence of negligence of the defendants, having in mind the duties of the deceased.'

(*Davidson v. Stuart*. Judgment given by the Supreme Court of Canada, 30th November, 1903.)

AMERICAN CASE.

An Ohio statute imposes a penalty of \$100 fine and six months' imprisonment upon any employer who discharges an employee because he is a member of a labour union. A criminal action was taken under this law against the superintendent of the American Sheet Steel Company who discharged one of his employees on that ground during the Amalgamated Steel Workers' strike two years ago. The Supreme Court of Ohio, however, has decided that the statute was unconstitutional.

Another American judgment of some interest was recently given by the Supreme Court of Minnesota. It held (following a decision in a similar case in New York) that, as a labour organization was a lawful organization, it could not only advise its own members to strike, but that it also had the right to persuade, by peaceful measures, men who were not members of the union to join the strikers; and that, as a means to that end, it could refuse to allow its members to work where non-union men were employed.

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. IV—No. 12.

JUNE, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,

OTTAWA, June 15, 1904.

On the 23rd of May His Honour Judge Winchester was appointed a special commissioner by the Dominion government to investigate the alleged employment of American aliens by the Grand Trunk Pacific Railway Company on surveys in connection with the new transcontinental line. A statement setting forth the circumstances which led to the appointment of the commission, and of the terms under which its inquiry will be carried out, is included in the present issue of the *Labour Gazette*.

The action of the government in permitting, under an order in council dated May 2, 1904, the use of trap-nets, purse-seines and drag-seines for the taking of salmon in British Columbia was a development of

the month which will be attended with important consequences to the fishing industry of the Pacific coast. A brief reference to the steps leading up to this change in regulations, and a summary of the new provisions under which licenses for the employment of these methods of fishing will be granted, is given under a separate heading.

Special attention is also directed to a summary of the preliminary report of the commission which recently visited Europe for the purpose of investigating the electro-thermic processes there in operation for the smelting of iron ores and the manufacture of steel. A statement, published by courtesy of the superintendent of irrigation of the Canadian Pacific Railway Company, relating to the extensive project of reclamation of waste lands in Alberta now being entered upon by the company, and a brief report of the Western Ontario Labour Educational Association, which, under its new title, is to be known as the Labour Educational Association of Canada, are other features of the issue.

The directory of Canadian labour organizations, of which publication was begun in the February issue of the *Labour Gazette*, is concluded in the present issue, with a list of the unions at present in existence in Manitoba, the North-west Territories and British Columbia.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MAY.

I.—GENERAL SUMMARY.

CONDITIONS in the labour market during May showed, on the whole, an improvement over April, the opening of navigation and the various other activities attending improved weather conditions adding to the amount of employment at several points. As a result, the majority of the correspondents' reports were of a favourable tendency, and in some cities, as for example Winnipeg, marked activity prevailed. From several localities, however, including some important industrial centres, conditions were less favourable than a year ago. The cities of Montreal, Hamilton, London, Sault Ste. Marie and Vancouver may be instanced in this connection, the reasons for the depression varying according to locality. With the continuance of favourable weather, however, the outlook on the whole may be considered satisfactory for an active and prosperous summer season in the great majority of the trades and industries.

Cost of Living.

Cost of living showed few changes from conditions prevailing in April. Potatoes were scarce and dear throughout Ontario and British Columbia. Lumber prices also ruled high, and in Montreal, Toronto, St. Catharines, London and other localities the scarcity of houses noted for some time past continued, with rents on a high level, a further index to these conditions being the increased business of the storage warehouses. Coal went up in price from \$6.75 to \$7.25 at Ottawa, but declined at Brantford. At Brantford also the price of bread fell from 6 to 5 cents per single loaf, tickets for 18 loaves being obtainable for 80 cents, while at St. Hyacinthe an increase of 1 cent per loaf took place. Cheese prices declined as a result of the unfavourable conditions in the English market. A change that will be felt by all classes of the community was the material increases

in fire insurance rates which recently went into effect at many points.

Changes in Wages and Hours.

A number of changes in the rates of wages and hours of labour were reported to the department during May, most of them representing improved conditions for labour, though the month in this respect shows fewer wages increases than May, 1903. A prominent feature was the adoption of the summer schedules governing hours in several manufacturing establishments and stores, Brantford, Guelph, London and other cities furnishing examples. The changes reported to the department were as follows :—

Surface men employed at the *Port Hood colliery, N.S.*, had their wages, which had been reduced during the winter months, restored to the former schedule. *Telegraphers* in the employ of the *Intercolonial Railway Co.* had their minimum wage increased from \$38-\$41.50 to \$43-\$45. At *St. John, N.B.*, *journeymen tailors* received an increase. At *Quebec, Que.*, *batteauxmen* were increased in wages by from 12½ to 15 per cent, and *mill hands* to the number of 425 at *Etchemin, Levis county, Que.*, received an increase ranging from 10 to 25 cents per day. Several *builders' labourers* also received a nine hour day at *Quebec*, and a number of *carpenters* had their wages increased. In *Montreal, Que.*, the wages question was the cause of a number of strikes which remained unsettled at the end of the month. A number of *plumbers, marble workers and stonemasons*, however, received improved conditions. At *Ottawa* one hundred *stonemasons* had their wages increased from 36 to 42 cents per hour, and their hours reduced from 54 to 50, per week, being granted a Saturday half-holiday. *Plumbers* at *Kingston, Ont.*, received a slight increase, and at *Toronto, Ont.*, *drain diggers and pipe layers* had their wages raised from 20 to

22 cents and from 22 to 25 cents per hour respectively. At *Niagara Falls, Ont.*, rock drillers, drillers' helpers, steam engineers, hoist runners and channel drillers had their wages materially increased during May. At *Hamilton, Ont.*, leather workers, coal wagon drivers, plumbers, steamfitters and sheet metal workers received improved wages conditions. Twenty-five bricklayers and masons received an increase of 5 cents per hour at *Brantford, Ont.*, the union scale last year being 35 cents per hour, though 40 cents were being paid at the close of the season. At *Guelph, Ont.*, fifteen barbers were granted a half-holiday a week, printers a reduction of two hours per week, tinsmiths an increase in wages and a reduction in hours, retail clerks a reduction in hours, machinists, iron moulders and labourers a half-holiday during the summer months, with corresponding decrease in pay, and street car employees an increase of 1 cent per hour. Bricklayers, stonemasons plasterers and labourers at *Berlin, Ont.*, had their scales materially increased. Woodworkers at *St. Thomas, Ont.*, received 10 per cent increase, and car shop employees in the same city a decrease in hours. Plumbers and steamfitters at *Windsor, Ont.*, are now receiving \$3.25 per day of nine hours, an increase of 25 cents. Comparatively few changes were reported at *Winnipeg, Man.*, though 102 motormen and conductors were advanced about 10 per cent. Electricians at *Vancouver, B.C.*, had their wages raised 25 cents per day, while tailors had their wages increased and barbers their hours reduced at *Victoria, B.C.*

Interruptions to Industry.

Weather conditions on the whole were favourable throughout May, though heavy rains in some localities delayed out-of-door work in the trades, and the late opening of navigation affected employment during the opening weeks of the month. Floods did some damage at Brandon and other points in Manitoba and the Territories, and in a few localities in Ontario and Quebec. Loss of property, estimated at

\$25,000, was caused at Amherstburg, Ont., by a heavy wind storm on May 26. In British Columbia snow slides in the mountains did considerable damage to railway property. From the standpoint of industrial unrest the month compares favourably with May, 1903, with only thirty-one trade disputes in existence, as against forty-five last year, though an increase of eight disputes is shown over April. No exceptionally severe losses by fire were reported, though employment in a few localities suffered from the burning of industrial establishments. Among losses of this class reported mention may be made of the following: A boot and shoe factory at Shediac, N.B., loss over \$35,000; saw and flour mills at Grand Bay, Que.; a planing mill and lumber yards at St. Roch, Que.; the Ledoux carriage factory at Montreal, loss estimated at \$300,000; a wholesale hat and fur establishment at Montreal, loss \$75,000; twelve houses and a number of stables and sheds, occupied for the most part by working-people, at St. Henri, loss \$150,000; fourteen dwellings at Louiseville, Que., loss \$45,000; a heading and hoop factory at Sand Point, Ont., employing from sixty-five to seventy-five men, loss estimated \$25,000; a carriage factory at Peterborough; a harness and carriage factory at Gananoque, employing over one hundred men, loss estimated at \$75,000; the Conastoga flour mills at St. Jacobs, Ont.; a brush factory and wholesale warehouse at Toronto, loss \$15,000; a paper bag and box factory at Toronto; a metal and electrical manufactory at Hamilton; planing mills at St. Thomas and Petrolea; a saw-mill and sash and door factory at Durham, Ont.; a brewery at Port Arthur, Ont.; the Canadian Pacific Railway Company's large elevator 'B' at Fort William, containing between 250,000 and 300,000 bushels of grain; a saw-mill at Nanaimo, employing one hundred men, estimated loss \$75,000.

Conditions of Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada,

as indicated by the reports of correspondents to the *Labour Gazette* for May, and by information received at the department from other sources, may be briefly summarized as follows:—

Agriculture.

A busy month was reported from all sections of the Dominion, the late opening of spring having thrown forward into May a large amount of work usually in progress at an earlier date. Seeding was all but completed in Ontario and Quebec, and though the weather continued cool and wet a good growth was reported. In the west, wheat seeding was generally completed about the middle of the month, and farmers in the closing week were sowing oats and barley, the weather having been exceptionally favourable and much of the grain being already well sprouted. With regard to the outlook, materials for the formation of an opinion are as yet lacking. An Ontario crop bulletin issued in the closing week of the month by the Provincial Department of Agriculture, showed that although the fall wheat crops entered upon the winter full of promise, the winter proved very disastrous, the frost killing from 20 to 90 per cent. The Lake Erie counties reported the greatest damage to this crop, though the conditions above described were very general. Clover also suffered. The severe winter also told against fruit trees, more especially peaches, cherries and plums, and the damages done by mice were very extensive. The winter also was a trying one on live stock, and has left the farmers with unusually low supplies of fodder. Hay, however, as uniformly reported in May, is looking well, and many correspondents of the *Gazette* state that the entire agricultural situation is unusually favourable. In western Canada, where the winter was less exceptionally severe, the acreage in many sections, according to reports collected by the railway companies, has been increased, other sections remaining about the same as last year. At the present time it can

only be stated that conditions thus far have been most favourable and point uniformly to a heavy yield.

The general scarcity of agricultural labour continues, the majority of the correspondents referring to this feature as a prominent factor in the situation throughout Canada, though several localities have benefited by the influx of immigration, especially those situated in proximity to the points of distribution for this labour.

Unsatisfactory conditions were reported of the cheese and butter markets, with the result that the dairying industry throughout Canada has opened the season of 1904 under conditions which compare very unfavourably with those of 1903. The backward season and the low prices offering, together with the large accumulations of old cheese, have combined to depress the industry, and reports during May were that there is no immediate prospect of recovery. Farmers in consequence are sending much less milk to the factories, and in butter-making as well as cheese manufacture duddiness was a prevailing feature of the month.

The annual meeting of the Territorial Stock Breeders' Association was held at Calgary, N.W.T., on May 9. Mr. P. Talbot, Lacombe, was elected president.

Fishing.

Herring and lobster catches in the maritime provinces were good, and fair catches of cod were also taken. Mackerel were rather late in appearing. A scarcity of bait was reported as interfering with fishing operations in Nova Scotia. The commission recently appointed to inquire into the dogfish pest reported during May in favour of offering a bounty of 1½ cents on each dogfish caught. It was added that in view of the seriousness of the pest, the bounty should be granted at once without waiting for the construction of fertilizer factories for the utilizing of the product. If this method proves insufficient, it is suggested that government cruisers be manned with fishing gear or tugs secured

for the purpose, and the pest exterminated. Active work on the herring-curing experiment was begun at Canso, N.S. Representations were made by the government of New Brunswick to the Dominion government to determine whether the maritime provinces were entitled to a share in the Halifax award, and also to obtain a clearer definition of the rights of the provinces as against the Dominion in regard to the fisheries. On the great lakes good catches of rough fish were taken during May. In British Columbia spring salmon fishing was active, and good catches of halibut were reported. In the canneries active preparations are under way for the coming season. The granting to the cannerymen of permission to use traps, by order in council of May 2, was a development of much importance to labour during the month.*

Lumbering.

The heavy rains of the month throughout Ontario and the eastern provinces materially assisted in the work of the drives, and the season will compare favourably with last year from the standpoint of the number of logs hung up in the woods. In New Brunswick particularly the situation improved during May, the outlook at the beginning of the month being for heavy losses from this cause, and there is still a considerable quantity of timber to come down the streams. Sawmilling, as a result of the plentiful arrival of logs, was very active throughout Ontario and Quebec. In the latter province an important interview took place between members of the Province of Quebec Limit Holders' Association and the provincial government in relation to the land Bill before the legislature. In British Columbia dullness prevailed, the mills being reported as suffering severely from the competition of American lumber in the trade with Manitoba and the North-west Territories. The advisability of imposing an import duty

on rough lumber coming into Canada was discussed in the House of Commons on May 5. Later in the month a deputation representing the lumbering interests of British Columbia held an interview with the Dominion government with the object of securing a revision of the tariff to this effect. The proposition was vigorously opposed by representatives of Manitoba and the Territories.

The city of Ottawa is the centre of the eastern lumber trade and the most important distributing point for the labour employed in this industry. Already the question of the labour supply and wages for next season's operations are engaging some attention at this point. For a number of years past the establishmen of the pulp and paper industry, the extensive railway construction operations under way in Canada, the increased industrial activity of the cities, and the movement into the Canadian west, have caused a marked decrease in the supply of labour available for the lumber woods, and a rapid advance in the rates of wages paid to lumbermen, the schedule having doubled within the past few years. For the season just closed, axe hands received from \$30 to \$32 per month and board; teamsters, \$35 per month and board; and river drivers, \$40 to \$45 per board; road men, \$30 per month and month and board. The buoyancy of the lumber market, and the continuance of activity in many of the branches above-mentioned are stated as the chief factors that will tend to maintain wages on a high level.

Mining.

Conditions in the Nova Scotia coal fields were, on the whole, active, the opening of navigation having been a favourable factor. In Ontario also activity prevails in the different metalliferous fields. The situation in British Columbia was generally buoyant, though about two hundred and seventy-five men were laid off at the La Roi mine, Rossland, the gradual increase in the silicious contents of the ore of that property having caused difficulty in smelt-

* A full statement of the terms under which this permission is to be given appears under a special heading on another page of the present issue of the *Labour Gazette*.

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

ing. With this exception, however, employment has been generally very active throughout the province. Favourable reports were received from the oil fields in South Alberta. In the Yukon the spring clean-up is in progress, the work having

been facilitated by the early opening of the Yukon river.

Manufacturing.

The reports of correspondents show that marked activity continues in the industry

§ Steamboatmen and longshoremen dull.

Transport.

Final steps in the reorganization of the Consolidated Lake Superior Company at

paring favourably with last year, and employment throughout the service being plentiful. A result of the backwardness of the weather was a congestion of business among carters in some localities in connection with the spring moving season. The opening of navigation and the general adoption of summer schedules on the railways was the most important development of the month. The first ocean vessel of the season reached Montreal on May 4. On Lake Superior traffic was recommenced in the second week of the month, the Canadian Pacific Railway service between Owen Sound and Fort William opening on May 10. This had the effect of immediately and materially increasing railway business throughout the west, though in Ontario competition of water freight rates took business from the railways in some localities. The effects of the disagreement between the Lake Carriers' Association and the Master Pilots' Association, both United States organizations, though largely confined to United States ports, reacted to a degree on Canadian shipping, as will be seen from the report of the *Gazette* correspondent at Windsor. The grain traffic of the Canada Atlantic Railway also suffered in consequence, causing some diminution in employment in Ottawa and Depot Harbour. Generally speaking, however, Canadian ports were not affected by this strike, and both the Grand Trunk and Canadian Pacific railways continued to accept freight for lake transportation.

Railway construction opened on an extensive scale during May, and in western Canada especially the season will be very active, the contract for 500 miles of the Canadian Northern line to Edmonton having been let, and several other branch lines being projected. In Ontario, tenders were invited for the construction of the first 30 miles of the extension of the Temiskaming and Northern Railway from New Liskeard northward to the point of intersection with the Grand Trunk Pacific; the Canadian Pacific will begin construction of branch lines from Guelph to Goderich,

and from Toronto to Sudbury; the Michigan Central Railway Company is carrying out extensive improvements to road-bed; the Nepigon Railway Company will build a branch from the Albany river to Fort Churchill, a distance of 26 miles, and the prospects for extensive construction of electric railways, among them a line connecting London and Port Stanley, a second from Brantford through Thorold to Port Colborne and Fort Erie, and a line connecting Toronto and the city of Kingston, are very bright. In Prince Edward Island the New Murray Harbour and Belfast line is being completed, and in British Columbia the G. N. R. is putting through new branch lines to Fernie and Coal Creek, from Grand Forks to Grandby and Phoenix, and from Curlew, Wash., to Midway.

The Royal Commission on Transportation inspected the Welland canal and the Port Colbourne harbour in the opening week of the month, taking evidence as to the requirements of the latter in regard to elevator and wharf capacity, and the need of improving the canal. Buffalo was also visited in this connection. Later in the month the commission took further evidence at Midland and Depot Harbour with regard to the Trent Valley canal route and the railway route between the Georgian bay and Montreal.

A Royal Commission was appointed by the Ontario government on May 26 to collect information respecting the taxation of railways, with a view to the adoption of an equitable solution of the difficulty. Mr. H. J. Pettypiece was appointed chairman, and His Honour Judge Bell, of Kent county, and Professor Adam Short, of Queen's University, Kingston, were the other members selected.

The Hon. F. R. Latchford, Hon. R. Harcourt and Hon. John Dryden were appointed as the Railway Committee of the Executive Council of Ontario during May. The committee has jurisdiction over all railways, electric railways and street railways subject to the legislature. It is

authorized to superintend agreements regarding running rights, crossings, &c., and to settle disputes between railways and municipalities with respect to service and the speed of cars. It has the same power as the high court in regard to the summoning of witnesses, and may hold sittings at any place in Ontario.

The annual meeting of the shareholders of the Quebec and Lake St. John Railway was held on May 13. The directors' report showed that the number of passengers carried last year was 247,901, while the freight tonnage carried amounted to 318,730, of which 2,318,276 pounds was cheese, an increase of 207,276 pounds over last year.

It was announced that the Dominion government had decided to place two ice-breaking steamers on the St. Lawrence route between Quebec and Montreal.

It was announced by the Grand Trunk Railway Company that freight rates in Ontario north and west of Toronto would be advanced as a result of the increased expense of operation and maintenance during the past winter, and other heavy expenditures. The matter has been referred to the Railway Commission.

New regulations with regard to the testing of the sight and hearing of the employees on the Intercolonial Railway went into effect recently.

According to statistics compiled by *The Railway and Shipping World*, the total mileage of Canadian railways in operation during the year ended June 30, 1903, was 18,987.98. The gross earnings of Canadian railways were \$96,064,526.72, and the net earnings \$28,583,003.39, representing 22,148,742 passengers carried and 47,373,417 tons of freight transported. The train mileage was 60,382,920. For Canadian electric railways during the same period the statistics are as follows: Mileage, 759.36; gross earnings, \$7,233,677.35; net earnings, \$2,760,819.12; passengers carried, 115,662,812; freight carried, 371,286 tons; car mileage, 38,028,529.

The advent of fine weather materially increased street railway earnings throughout May. In Montreal, for example, the smallest increase in any one day was \$300, and the largest \$722.

The Trades.

The situation in the trades shows, on the whole, an improvement over April, particularly in the *building* trades, though the amount of building under way is generally less than last year. In the *metal* trades also most of the correspondents report busy or active condition, and the *woodworking* branches have shown a marked improvement over April. The *printing and allied trades* were quiet in Halifax, Toronto and Vancouver, but, with these exceptions, were actively employed. Similarly, the *clothing, leather and food and tobacco preparations* departments were well employed. *Unskilled labour* had a better month than April, activity being general and every change noted by correspondents being in the direction of improved conditions.

Notes of the Month.

There will be two factories producing *beet sugar* in the province of Ontario this year, one at Berlin and the other at Wallaceburg; the factory at Dresden having removed to the United States and the Wiarton factory having gone into liquidation.

A project for the erection of a number of *hotels* throughout Canada at different points on the Grand Trunk Railway system was completed by the organization of the Imperial Hotel Company, Limited, under a Dominion charter; the initial capital of the company will be \$100,000.

The four mills of the *Canadian Woollen Mills Co.*, at Hespeler, Waterloo and Carleton Place, will be sold during the first week of July.

The town of Orillia, Ont., has decided to restore the *power plant* at Ragged Rapids by building a tunnel of 1,500 feet through the granite rock, securing con-

tinuity of service and largely increased power.

The report of the directors of the *Canadian General Electric Company*, submitted at the annual meeting in May, showed profits for the year amounting to \$512,210.79, out of which \$103,132.51 was written off for deterioration. The total surplus of the company is now \$1,345,539.71. Including recent additions to the plant, the company has now a floor space amounting to 770,000 square feet, or 18 acres. About 3,000 employees are on the pay-roll, representing a growth from 400 employed in 1897 and 1,000 employed in 1900.

A deputation waited upon representatives of the Dominion cabinet on May 13 to request that all electric railways incorporated by the Dominion should be made subject to the *Sunday laws* of the province in which they operate.

The city council of Toronto is in receipt of an official statement relating to *power development* at Niagara Falls. The total available power is estimated at 5,500,000 h. p. The two American and three Canadian companies at present developing power at Niagara Falls have a united capacity of producing 675,000 h. p.

II. REPORTS OF LOCAL CORRESPONDENTS.

Mr. Thomas J. Griffiths was appointed correspondent to the *Labour Gazette* for the city of Montreal, Que., and district during May, and Mr. Edward Barry as correspondent for the city of Sault Ste. Marie, Ont., and the District of Algoma.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions through May showed a marked improvement over April. Mining was active, and shipping, although retarded by the lateness of the navigation season, was very active. The building trades were busy, but building was not on so extensive a scale as last year. The fishing and agricultural industries had good weather. Transportation by rail was not so heavy since navigation opened, though conditions were not dull by any means, as the winter season witnessed unusual activity. Wholesale trade was fairly prosperous, while in Sydney retail trade improved somewhat. The Sydney Steel Works are as yet operating only half their furnaces. The Chemical Works have added to the number of men

employed. The Sydney Foundry Co. has also enlarged its staff of employees.

There were no strikes or lockouts during May, though the men at Joggins ceased work for ten days owing to the company having failed to pay their wages.

The employees of the Sydney Steel Works, of the Dominion Iron and Steel Co., through the Provincial Workmen's Association, have asked that company to restore the wages to the scale prevailing previous to the reduction of December, 1903. The company was asked to give an answer before June 1, 1904.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather, though fine, has been backward and cold. Good work was done during the fine weather, so that when the rains and warm weather come the crops will not be much later than last year.

Fishing.—The herring and lobster catches during May were good. Cod catches were not so good. Much interest is manifested by the fishermen in the experiment proposed by the government to destroy the dog-fish which infest these coasts. If successful the return of many fishermen is predicted to the work they had abandoned

owing to the ravages of this pest. Another experiment exciting the interest of fishermen is that in herring-curing being carried on at Canso under the supervision of Mr. Cowie. It is admitted that the better curing of herring would greatly enlarge the market and stimulate this industry. Mr. Cowie has undertaken this work along the methods of herring-curing in Scotland, having secured Scottish help for this purpose. A schooner loaded with barrels and other supplies has been brought from Scotland to Canso, and the work will be begun immediately.

Lumbering.—Lumbermen on the mainland of Nova Scotia report a good year. The cut was large and little difficulty was experienced in getting the logs to the mills, the water supply being plenty and steady from the gradual melting of the snow in the woods.

Mining.—The collieries of Nova Scotia are, with two exceptions, the Inverness and Joggins mines, working to their utmost capacity. The cause of the dullness at Inverness is not known, while the Joggins mines, which had only been pumped dry, after a few weeks repairing, was permitted to partly refill with water, the men refusing to work until their wages were paid. At the advice of the P. W. A. the men resumed work. The lower workings of the mine will not be regained for two weeks. This mine has not been in condition for producing such a large quantity of coal for years as it was before the fire accident. One hundred men are working.

Railroad construction and employment.—The new power house for operating the electric tramway between Stellarton and New Glasgow is being constructed, and many men are working on the roadbed. A large part of the Intercolonial Railway on the Cape Breton side is to be repaired by laying down new sleepers. Traffic has been so heavy during the last three years that the road has suffered. The present lull in transportation will afford the department the time necessary to prepare for the coming increase of business.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, lathers and plasterers are fairly well employed. Carpenters and joiners, painters, decorators and paperhangers and builders' labourers are busy. Plumbers, gas and steamfitters are also busy.

Metal, engineering and shipbuilding trades.—Iron moulders, coremakers and blacksmiths are busy. Iron workers and helpers are active, also boilermakers, tool sharpeners and horseshoers. Machinists and engineers, electrical workers and linemen are all well employed. Jewellers are dull.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon makers, car builders and patternmakers are very busy.

Printing and allied trades.—Printers and pressmen are busy.

Clothing trades.—Journeyman tailors and garment workers are well employed. Boot and shoe workers are very busy.

Food and tobacco preparation.—Butchers and meat cutters are active.

Leather trades.—Leather workers and saddlers are fairly busy.

Miscellaneous.—Barbers are busy. Clerks and stenographers are not well employed.

Transport.—Railroad conductors, engineers, firemen, railroad telegraphers, railroad trainmen, switchmen, trackmen and freight handlers are all active, as are steamboatmen and steamboat firemen. Ship labourers and longshoremen are busy. Cab drivers, hackmen, carters, draymen, teamsters and expressmen have fair employment.

Unskilled labour is well employed.

DISTRICT NOTES.

Springhill.—A large force of men are employed on the Springhill waterworks. The Cumberland Railway and Coal Company intends straightening its railway between the collieries and Springhill Junction. A sash factory has been completed and started. An agitation is on foot for transferring the Oxford Woollen Mills to Springhill.

Work is progressing slowly on the new shafts which have been sunk on the Acadia coal areas.

Stellarton.—Stellarton is putting in a sewage system, which is giving employment to a number of men.

New Glasgow.—New Glasgow is adding to its water system by putting down a double pipe line through part of the town. The pottery at Pipe Town, $1\frac{1}{2}$ miles from New Glasgow, employs from 50 to 100 men. New machinery is to be introduced and the plant enlarged.

Trenton.—The steel works continue working steadily, employing 750 men.

Amherst.—The boot and shoe factory has all it can do to supply the demand.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was employed to a much greater extent during the past month than in April. This was largely due to the opening up of the usual spring operations. Labour also in the building trades has been very active. The general supply and demand, however, has been about equally balanced, except in the printing trade, which shows much relaxation. Commercial activity has been a marked feature of the month, and already the tourist season has caused considerable activity in transportation, while freight traffic also showed considerable stir. The wholesale and retail trades report conditions normally good, with fair indications for a promising future. The labour market is free from unrest, but the Typographical Union, which has had some difficulty with the Chronicle Publishing Company, by which the union men were displaced nearly two years ago, is making renewed efforts to bring about a settlement by which the union will be recognized. Negotiations to that end are being carried on.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This branch of industry gives promise of a successful year. Planting has commenced, and the soil is in excellent condition.

Fishing.—This industry has shown much improvement over April, though much disappointment has been expressed concerning mackerel, which are somewhat late in putting in an appearance. The local fishermen expect a fairly good season.

Mining.—The output from the Dominion Coal Company's mines for the month of May was highly satisfactory, being 310,555 tons, an increase of 69,000 tons over that of March, and an increase of 63,642 tons over the April output of 1903. In May last year neither No. 1 nor the Hub was producing coal, yet without these there is an increase of 21,000 tons in the other collieries. No. 2 mine beat all previous records by about 10,000 tons.

The detailed output for May is as follows:—

| | Tons. |
|--------------------------|---------|
| Dominion No. 1.. | 28,461 |
| Dominion No. 2.. | 81,167 |
| Dominion No. 3.. | 41,580 |
| Caledonia.. | 46,530 |
| Reserve.. | 75,265 |
| International.. | 21,850 |
| Hub.. | 15,702 |
| Total.. | 310,555 |

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches are now well employed, and a good season is assured. Stonecutters, however, while having much work, are handicapped at times by lack of stock, but it is stated that this will be remedied in future. Bricklayers, masons, carpenters, painters and builders' labourers are all very busy.

Metal, engineering and shipbuilding trades.—Moulders, machinists, electrical workers, shipwrights and caulkers are fairly busy. Boilermakers report work about normal.

Woodworking and furnishing trades.—Much activity exists in nearly all branches.

Printing and allied trades.—Printers are dull, and many men are idle.

Miscellaneous.—Clerks and stenographers are fairly busy. Delivery employees report work good. Barbers and hotel and laundry workers are busy.

Transport.—Employees of railways and steamboats are well employed. Freight-handlers find work fairly good. Longshoremen are normally busy. Hackmen and truckmen are fairly busy.

Unskilled labour.—This class has had a much more active month than in April, with the outlook favourable.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reports ports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during the month of May was active. Work was plentiful, and the supply was in excess of the demand, showing an improvement in this respect over last month. Building operations were fairly active, the most important being the erection of stations along the Murray Harbour Railway and the continuance of work on the new market building in Charlottetown. The demand for labourers was good, and the contractor for the Murray Harbour Railway is still advertising for more men. The shipping of produce was active, large quantities of potatoes being sent to the American markets. Commercial houses reported a good month. Wholesale and retail business men found trade up to the standard of last year. There were no changes in the rates of wages or hours of labour, and harmonious relations between employers and employees prevailed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—May was an exceptionally busy month with farmers, the majority of whom were well under way with seeding during the closing week. The grains are about all in, and the close of the month saw potato-planting general through the province. A considerable quantity of produce was marketed, especially at the beginning and towards the middle of the

month. Prices were good, and slightly better than at the same period last year.

Fishing.—The fishing industry was prosecuted vigorously throughout the month. The lobster catch in most localities has been good, and codfish were plentiful, especially towards the latter end of the month.

Lumbering.—Very little lumbering was carried on during the month, lumber being scarce in this province.

Manufacturing.—There was only a small output from the dairy factories during the month, butter being the only article manufactured. Next month, when the pastures are in better condition, the manufacture of cheese will be in full operation. Manufacturing in this province is not of first importance, agriculture and fishing being the main industries.

Railroad construction and employment.—The extension of the Murray Harbour Railway from Murray River to Murray Harbour South, the ballasting of the line from Southport to Murray River, the straightening of the main line at Curtis Creek, and the building of new stations, gave employment to a large number of men, and more are still required. Work at the Hillsborough bridge was started towards the close of the month, operations being confined mainly to the driving of piles on the northern approach. During the month part of the rolling stock on the railroad was equipped with the Westinghouse air-brake system, which is being gradually introduced all over the road.

CONDITION OF PARTICULAR TRADES.

Building trades.—Masons were busy and bricklayers report a fair month. Carpenters and joiners, painters and decorators, paperhangers and plumbers had a busy month. Builders' labourers had a good month.

Metal, engineering and shipbuilding trades.—Iron moulders and iron workers had steady employment. Machinists, engineers, linemen, blacksmiths and bicycle workers had a busy month.

Woodworking and furnishing trades.—Carriage and wagon makers, car builders, coopers and woodworkers had steady employment.

Printing and allied trades.—Printers and bookbinders had a busy month.

Clothing trades.—Journeyman tailors and boot and shoe workers had steady employment.

Food and tobacco preparation.—Bakers, butchers and tobacco workers were busy.

Leather trades.—Tanners and saddlers were steadily employed.

Miscellaneous.—Barbers and hotel employees had a good month.

Transport.—Railroad conductors, locomotive engineers and firemen, telegraphers, trainmen, brakemen, freight-handlers, steamboatmen, longshoremen and truckmen were steadily employed.

Unskilled labour.—May was a good month for unskilled labour; in addition to the works above mentioned, the city streets received considerable repairs.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During May the labour market continued to improve, especially in the building trades, but work on the harbour front has fallen off considerably since the closing of the winter port business. Several ship labourers have gone to Labrador to work in sawmills, and others have gone to Montreal to work on steamers sailing from that port. Excavations have been commenced for an addition to the Union Club building, and preparations are going on for a new building for the Canadian Bank of Commerce, and another for Messrs. Emerson & Fisher. The Mispec pulp mill has closed down, and it is not known whether it will be again started. Warner's saw-mill started May 25 on three-quarter time.

Wholesale and retail trades report business active, and it is anticipated that a great increase in trade will take place during the Champlain tercentenary celebrations in Quebec in June. The Central Railway was practically closed on May 19. The wages of employees were in arrears, and they refused to work. Arrangements were perfected to keep the road open. Branch No. 167, Journeymen Tailors' Union of America, inaugurated a strike on May 10, in four shops, which is still on. A scale of prices for the employers' signatures was submitted. The employers orally agreed to pay the scale, but refused to fix their signatures thereto, and stipulated that the men would have to apply as individuals. Piece-workers on sack coats asked for an increase of 50 cents each, 20 cents per hour for overtime, and weekly workers an increase of \$1 to \$2 per week, making the total wage \$12, with nine hours to constitute a day. Nine firms signed the new scale.

Last May the shiplabourers' Union and the Shiplabourers' Society amalgamated, under the name of the Longshoremen's Association. A split has now taken place, with the result that a number have started an independent body, to be known as the 'Shiplabourers' Society.'

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from country districts are that the farmers were progressing favourably with their crops, notwithstanding the backwardness of the season.

Fishing.—Large quantities of shad and garpereaux have been caught in the harbour, but salmon are not so plentiful. Cod and haddock retail at 5 cents per pound; halibut, 12 cents per pound; salmon, 30 cents per pound; shad, 15 to 30 cents each.

Lumbering.—It was estimated that 60,000,000 feet of lumber would be hung up this season, but a rise of water in the St. John river, above Edmundston, having taken place, 37,000,000 feet have been floated into deep water.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are busy. Carpenters and joiners report work plentiful. Painters and decorators are extra busy, some working overtime to supply the demand. Plumbers, gas and steam-fitters report work active. Stone-cutters find work only fair. Work with builders' labourers is active.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists, engineers and steam engineers were all well employed. Electrical workers and linemen were extra busy. Blacksmiths and boilermakers were well employed. Sheet metal workers are busy. Horseshoers report work fair.

Woodworking and furnishing trades.—Woodworkers are reported busy. Carriage and wagon makers were active, and shingle weavers were all employed.

Printing and allied trades.—Printers, pressmen and bookbinders were busy.

Clothing trades.—Journeymen tailors report trade fair.

Food and tobacco preparation.—Bakers and confectioners were actively employed, and butchers and meat cutters were busy. Cigarmakers report work as only fair.

Leather trades.—Tanners and curriers were only fairly employed. There is only one tannery in St. John, and very few hands are employed. Saddlers report work good.

Miscellaneous.—Barbers are kept busy. Broom and brush makers were well employed.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railroad trainmen, switchmen and trackmen, were all steadily employed. Ship labourers report business only fair. Street railway employees were very busy, and cab drivers and hackmen are doing a good business. Teamsters and expressmen are well employed.

Unskilled labour.—Work for unskilled labour is fair.

DISTRICT NOTES.

Fredericton.—R. A. Estey, lumberman, has made an assignment, with liabilities \$134,675, assets \$104,801. The log drivers' wages are still owing for this season's drive.

Shediac.—On May 9 the boot and shoe factory, with all its contents, was totally destroyed by fire. About seventy hands were employed. The factory and contents were insured for \$18,000, and were valued at \$40,000. It was owned by the Shediac Boot and Shoe Company.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and Edward Little, correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in general was well employed during May, with supply and demand well balanced. Activity in the building trades, however, was interrupted by the strike of the painters (National Union No. 1), which commenced on April 1 and was declared off by the union on May 18, the members going back to work on the old conditions, viz., 17½c. per hour, with a nine-hour day. Another disturbing factor was the strike of the carpenters (United Brotherhood of Carpenters and Joiners, No. 730), which began on May 9, one hundred men in nine shops going out, this number being augmented later. On May 28 eighteen firms were reported as having signed the scale, and conditions demanded by the union. The men received \$6 per week strike benefit from the union during the continuance of the strike.

Batteau men secured an increase in wages from the rate of \$1 per standard within certain limits, and \$1.25 outside of these limits, to a uniform rate of \$1.25 per standard. The increase amounts approximately to from 12½ per cent to 15 per cent. Longshoremen also received a slight increase over last year's schedule.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work was somewhat retarded by the wet weather. Ploughing and seeding, however, proceeded, on the whole, satisfactorily, and favourable crop conditions are reported. Good market prices prevailed for early vegetables.

Lumbering.—The heavy rains materially assisted with the drives, and the entire cut, together with the logs that were hung up last year, will be got out without difficulty. Many of the mills had already at the close of the month received their full quota of logs and had begun upon the season's cut.

CONDITION OF PARTICULAR TRADES.

Building trades.—The weather interfered considerably with the employment of bricklayers and masons. Lathers and plasterers also had a slack month, but plumbers reported fair conditions. Painters after the close of the strike were all at work. Builders' labourers had a good month, and in a few cases have obtained the nine-hour day at the same wages as last year.

Metal, engineering and shipbuilding trades.—Iron moulders and machinists had a good month, but boilermakers reported a falling off in employment, though other work in the same line, such as iron ship repairing, was plentiful.

Printing and allied trades.—Printers and pressmen had plentiful employment, with the exception of the opening week of the month, when dullness was reported for a couple of days. Bookbinders had a good month.

Clothing trades.—Tailors had an active month on summer clothing. There was, however, a marked falling off in the boot and shoe trade, few of the factories working full-handed or full time, with no immediate prospect of improvement. This slackness is usual at this time of the year, and is about one month later this year than last. The tribunal of arbitration which deals with difficulties between shoe workers and their employees was completed.

Transport.—The railways have begun to run on their summer schedules, and the river

passenger boats are now all in commission. Ship labourers and hackmen had a dull month.

Unskilled labour.—A fair month was reported, notwithstanding the unfavourable weather conditions.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, sr., correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour on the whole was well employed during May, and nearly every trade was busy. The building trades, though backward in the early part of the season, are improving. Several new buildings are projected, and quite a number of repairs and alterations are being done on old buildings. The work on the Cathedral is advancing very rapidly; the repairs will cost \$75,000, and give work to from 50 to 75 men at good wages.

Merchants report a busy month, and banks did a good month's business, with an increase over the month of April.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Most of the farmers have finished seeding. They complain of too much rain.

Fishing.—The month has been a good one.

Lumbering.—Lumbering is now in full operation, a great many men being employed in bringing the drives down the river. The lumber merchants will lose from 25,000 to 40,000 logs on account of the heavy rains, and rise of the St. Maurice river.

Manufacturing.—Manufacturers are all prosperous, and are working full time with full staffs.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report a good month. Carpenters and joiners report having plenty of work, es-

pecially of an inside nature. Lathers and plasterers are very busy. With plumbers business is fair. Stonecutters and builders' labourers are well employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists and engineers are doing well. Electrical workers and linemen have more work than last month. Bicycle workers are very busy at present.

Woodworking and furnishing trades.—These trades are very active at present.

Printing and allied trades.—Printers, pressmen and bookbinders are fairly well employed, and there is a demand for printers. Engravers are very busy.

Clothing trades.—Journeymen tailors and garment workers are very busy, some of the former working overtime. Boot and shoe workers are doing well.

Food and tobacco preparation.—Butchers and meat cutters are well employed. Cigar-makers and tobacco workers report a good month, with plenty of orders on hand.

Miscellaneous.—Laundry workers have been busier than last month, and will continue so, as there is one laundry less.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during May was well employed. Every branch of industry was in full operation, and there is every indication that the season now fully opened up will be a busy one.

The work at the court house is being rushed with a large gang of men, and a portion of the walls is already above the foundation. The provincial government is also placing an abutment wall along the sidewalk, and as it is a difficult piece of work, quite a number of men are employed. The Moore Carpet Co. has been incorporated with a capital of \$100,000. The full

board of directors has not yet been elected, but a start has been made in the works. Some twenty skilled workmen are now employed, and by the opening week of June the general manager expects to have thirty more at work. The Modern Bedstead Co. is looking around for larger quarters, as the present premises are inadequate for this growing business. The various saw-mills are now running to their full capacity as all the 'drives' have been secured. The Brompton Pulp and Paper Co. directors, at a meeting on the 18th of May, discussed the question of erecting a paper mill. The majority favoured starting the work not later than the 1st of July. The Sherbrooke Stove Foundry has been taken over by Mr. John Miller, and will be enlarged in the near future.

The building trade is exceptionally busy and several large contracts will be let in the near future, in addition to many private dwellings which have already been started.

Wholesale and retail merchants report business as being very good, especially during the latter part of the month. Since the first of the year the real estate agents also report business as very good, being far ahead of that of any previous year.

The only unrest in the trades was among the stonecutters employed by J. Parent, who is a sub-contractor for dressing the granite used in the new court house. The men asked for a nine hour day with the same rate as they were receiving for the ten, viz. :—\$3.00. The contractor said that he was unable to grant the request, and that he could get men to fill the men's places at the old rate. The men quit work and were paid off next day. Two days afterwards the contractor had engaged some ten men, and before the end of the week had all the men he wanted at the old wages and hours.

Municipal ownership of electric light in Sherbrooke is again prominently before the citizens. When the question was brought up, some weeks ago, as to whether the city

should give \$233,000 for the electric and gas plants of the Sherbrooke Light, Heat and Power Co., the majority favoured the by-law, while the valuation in property was opposed to it. As a result the by-law was defeated. The matter came up again before the city council, and by two of a majority it was decided to go to the Quebec Legislature to have the charter so amended that in future when any by-law comes before the people for the borrowing of money to develop an electric light plant, or the granting of any bouns, the vote shall be taken by ballot. The result was that a Bill was passed to this effect in both the legislative assembly and legislative council. As soon as the Bill has become law, and that is expected before the end of the month, it is expected that the ratepayers will force the council to bring up the question of purchasing the plants mentioned, or develop the power which the city owns at Westbury on the St. Francis river.

On Friday evening, May 27, a well attended meeting of the retail merchants of the eastern townships was held in Sherbrooke for the purpose of organizing an association. The organization was effected and officers appointed. Mr. L. A. Bayley, Sherbrooke, was elected president, and Mr. J. J. Mullins, Sherbrooke, secretary. While the by-laws and rules of the new association have not yet been formulated, they will be in accord with the Retail Merchants' Association of Canada. The retail merchants feel that a great deal of the trade which should belong to the townships goes to the departmental stores in the large cities, and an effort will be made to stop this system of mail orders. It is stated by those in a position to know that thousands of dollars yearly go from this section to the departmental stores in Toronto alone.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are now busy with their spring work and the crops are nearly all in. They complain of a scarcity of help, and while a number of old country farm hands have arrived and taken up work

in the townships, the cry is for more, and an effort is being made to direct more to this section of the country.

Lumbering.—The lumbermen have now got down most of their logs and as a result the saw-mills are in full operation.

Manufacturing.—All manufacturing industries are busy.

Mining.—Mining is now in full operation and a new asbestos mine is being worked at Coleraine. The city council rescinded the resolution to grant aid to the Eastern Townships Smelting and Mining Co. The promoters have now approached the provincial government to grant a bounty on the output of copper from the smelter. The eastern township members waited upon Premier Parent in connection with the matter.

Railroad construction and employment.—The various railway companies centering and running through Sherbrooke have not any special construction work this spring. The usual work of repairing the tracks after the winter gives employment to a large number of men. The Oxford Mountain Railway Co. has just commenced on the work of extension to Windsor Mills, and the work left over last fall has been taken up. The claims of the land-owners between Kingsbury and Windsor Mills, through which the railway will pass, have all been adjusted. Large gangs of men will be employed, as the company expects to have the work completed this fall.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are rushed and there are enough contracts in the city and vicinity to keep them fully employed during the season.

Metal and engineering trades.—The machine shops are still kept very busy. Some large orders have been received for mining machinery from the west and from the maritime provinces.

Woodworking and furnishing trades.—These trades are fully employed, and there is a demand for good men.

Printing and allied trades.—Trade has been exceptionally good during the month.

Clothing trades.—Custom tailors report work very plentiful and there is a constant demand for good coatmakers. Garment workers also report business good.

Food and tobacco preparation.—Bakers and confectioners are very busy. Cigar-makers have had a fairly busy month.

Leather trades.—The small tannery here is busy, as are also the harnessmakers.

Miscellaneous.—Barbers, clerks, stenographers, hotel and laundry workers are well employed, and there is good demand for all, now that the summer season has fully opened.

Transport.—Cab-drivers, teamsters and expressmen had a splendid month's business.

Unskilled labour.—There has been a keen demand for unskilled labour.

DISTRICT NOTES.

Lake Megantic.—At a public meeting held in the town hall to vote on the by-law to give a bonus of \$5,000 to the Lake Megantic Iron Metallic Bedstead Co., the by-law was carried, the voting being 45 for and 16 against. Very little interest was evinced by the townspeople, as is shown by the number of voters. The company will now proceed to establish the work and will commence at once in the foundry of the Lake Megantic Furniture Company.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity prevailed in the labour market during May, and all classes of workers were fairly employed. The busiest branch of industry was the boot and shoe factory of Ames, Holden & Co. This company was obliged to ask its employees to work overtime, after the 23rd of May, in order to fill its summer orders. This firm will close

its factory, though only for a few days, at the end of the month for stock-taking.

The Eastern Corset Co., has ceased operations for an indefinite period, in order to settle a disagreement among the directors. The factory was giving work to about 200 employees, male and female, several of whom have found employment with the Penman Co., Ltd.

Transportation facilities for all goods manufactured in this city are all that could be desired.

Bankers had a good month, and wholesale and retail merchants found business active.

There were no changes in wages or hours of labour during the month, and amicable relations existed between employers and employees. The 12th of May being a religious holiday, the manager of the firm of Ames, Holden & Co. notified the staff that they would be required to work on that day. A large number went to work as usual, but 25 refused to comply with the order, and on the 13th were told that their services were no longer required. They were all reinstated on the 16th, after three days' idleness.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have nearly finished seeding, and a good crop is anticipated, especially in the yield of hay. Those engaged in the dairy industry are complaining that the buttermakers have reduced the price of milk lately. The reason for the decrease is that there is an over-supply of butter this spring ; it is expected that the old price will soon be restored. At the market the farmers are selling first quality of butter at from 18 to 20 cents per lb.

Fishing.—The fishing industry is fairly active, but not of great importance in this district. Fish dealers are getting nearly all their stock from Montreal or the Richelieu river.

Lumbering.—Saw-mills, of which there is a considerable number in this locality, were active.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are all employed. Carpenters and joiners had a fairly good month. Lathers and plasterers were quiet. Painters were busy, but paper-hangers were not steadily employed. Plumbers and steamfitters were active.

Metal, engineering and shipbuilding trades.—Machinists and engineers find conditions very good. Blacksmiths and boiler-makers had a busy month.

Woodworking trades.—The woodworkers had fair employment. Organ makers, about 60 in number, were very busy. Carriage-makers report having had a fairly good month.

Printing and allied trades.—Printers and pressmen report abundance of work.

Clothing trades.—Custom tailors are well employed. Boot and shoe workers are all employed.

Food and tobacco preparation.—Bakers state that work is plentiful. The price of bread has increased one cent per loaf since April. Butchers and ice handlers are well occupied. Cigarmakers are fairly busy.

Leather trades.—Tanners, curriers and saddlers report business good.

Miscellaneous.—Barbers are satisfactorily employed. Clerks are very busy. Hotel and restaurant employees report business very good. Laundry-workers find business steady.

Transport.—Carters were busy.

Unskilled labour.—A large number of men are employed at present and ordinary labourers find work plentiful.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions have resumed their activity since the beginning of May, and, notwithstanding the existence of five strikes in this city, business is favourable. The painters, who were on strike in April, declared the strike off on the 17th of the month; all the employers have not signed the agreement, but the painters are working for the contractors who have signed it. Plumbers are demanding 35 cents per hour, instead of 25 cents, and the marblecutters, 27½ cents per hour, instead of 22½ cents. The granitecutters are also on strike since the commencement of April, as are also the bookbinders. In the building trades generally, however, workmen are well employed. Carpenters and joiners are in great demand, advertisements appearing in the daily newspapers for this class of labour. Commerce is very active since the opening of navigation. Work in the harbour is being pushed rapidly forward, the strike in the building trades apparently not materially interfering with operations. The work of construction on the Bank of Montreal building, which was suspended, has resumed activity since May 11th. About 50 stonecutters, who stopped work on May 2nd, have started again, the contractors having signed a contract with the union. The harbour workers are busy, but are dissatisfied with the action of transportation companies in bringing English immigrants to unload steamers, depriving the ship-labourers residing in Montreal of employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, joiners, lathers and plasterers have abundance of work, owing to the delays which occurred in February and March. Plumbers, gas and steamfitters, and stonecutters have been on strike since the beginning of May. Builders' labourers are in great demand.

The press reports 111 building permits taken out during April, at a total valuation of \$438,243, an increase of \$194,783 over

April, 1903. Permits for repairs amounted to 81, representing an outlay of \$62,895, as against 66 permits, representing an expenditure of \$123,020 in April, 1903.

Metal, engineering and shipbuilding trades.—Machinists and engineers, electrical workers, caulkers, linemen, and sheet metal workers and horseshoers report having abundance of work.

Woodworking and furnishing trades.—Carriage and wagonmakers, car-builders and pattern-makers have more work than usual, owing to the Canadian Pacific Railway Co. completing a number of cars, which must be ready by June.

Printing and allied trades.—All these trades are well employed with the exception of bookbinders, who are on strike.

Clothing trades.—Journeymen tailors and garment-workers state all are employed, but are not exceptionally busy. Boot and shoe workers report plenty of work.

Food and tobacco preparation.—Bakers, butchers and meat-cutters are all employed. Ice handlers are actively employed.

Leather trades.—Tanners and curriers, saddlers, trunk and bag makers are busy.

Transport.—Steamboat men, ship labourers, longshoremen, street railway employees, cab-drivers, draymen, teamsters and expressmen all find conditions favourable.

Unskilled labour.—This class is fairly well employed, but is complaining of the competition of Italian immigrants.

MONTREAL, QUE., AND DISTRICT.

Mr. Thos. J. Griffiths, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been generally well employed during May, although the supply of both skilled and unskilled labour has been greater than this time last year, owing to the exceptionally heavy influx of British mechanics and Italian labourers.

The Canadian Pacific Railway Company's locomotive shops, Delorimier avenue, have

been very busy, and the new Angus shops of the same company at Rosemount are getting into shape. There are 500 employed in the Angus shops, and it is expected that 8,000 will ultimately find work there. These shops will turn out new passenger cars, freight cars and locomotives, besides repairing the same. Complaints are being made by men employed in the Angus shops of the poor electric car service, only one car every fifteen minutes going to the works, and also of the difficulty of finding suitable dwelling houses near the works.

The new brass factory of the Robert Mitchell Co., St. Henri, is now running with a full complement of men.

The labour market has been disturbed by a number of strikes. The painters and decorators' strike, which commenced on April 19th, to compel employers to recognize the union by admitting the union's business agent into the shops during working hours, was declared off on the 16th of May, the union not succeeding in gaining its point. The plumbers and steamfitters' strike for an increase of pay and shorter hours, inaugurated May 2nd, remains unsettled. The bookbinders' strike, declared May 16th, in three shops, for the purpose of restraining girls from doing work previously done by men, and also to keep out non-union workmen, is still in progress. The strike of the marble and granite cutters and soft stone cutters for increased pay is also unsettled at the end of May.

Relations between the longshoremen and the stevedores appear to be of a satisfactory nature, and the harbour is taking on a busy aspect. Notwithstanding the presence of so many unemployed Italians and others in the city, the prospects for the coming summer's work and freedom from labour disturbances are of the promising character.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The Berliner Gramophone Manufacturing Co., Dominion Bridge Co., Northern Electric Co., and American

Locomotive Works, Longue Point, are all busy.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades, with the exception of those disturbed by strikes, are all well employed.

Metal, engineering and shipbuilding trades.—Iron moulders report trade quiet. Other trades were well employed.

Woodworking and furnishing trades.—Reports from these trades are to the effect that they had plenty of work.

Printing and allied trades.—Conditions were active.

Clothing trades.—Journeymen tailors and garment workers report trade, on the whole, quiet. Boot and shoe workers were fully employed.

Miscellaneous.—Hotel, restaurant and theatre employees report business rather quiet.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferriere, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There were no idle men among those who cared to work in Hull during the month just past, common labour and factory hands having all the work they could do. The general condition of labour may be said to be better than in May, 1903. Although a resumption of work at the cement factory was expected in May, this has not as yet taken place, though some 75 people, mostly labourers, are employed at good wages. When work has all been begun some 300 men will be kept busy, merely on construction. Much activity and progress on the works was reported during May. Almost a dozen iron and cement buildings of large dimensions have been built, a fire protection system and pure water supply installed for the men, and large operations in levelling and otherwise improving the grounds carried out. The whole process of cement making and a system of

conveyers of the raw material and manufactured product will be operated by machinery, comparatively few hands being employed.

Trade generally is in a healthy state. The factories are running, and the only loss of time reported was one or two days, at the beginning of the month, at Eddy's match shop and small saw-mill, owing to a break caused by the high water in the electric plant at Deschenes, which supplies electric current to these factories.

The mattress factory and a couple of private houses in course of construction are employing a few carpenters and joiners.

There was no change in rates of wages, no strikes or lockouts, and no commercial or industrial failures during the month.

There will be no corporation work in Hull this year. The contract for building a new Roman Catholic school in Tetreauville has been awarded to Mr. J. Labelle, and work will be started forthwith; some ten or twelve builders will be employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—In spite of the late spring and cool weather, country people say that the crops are as good as they ever were at this season of the year.

Fishing.—The fishing industry is of minor importance in the industrial life of this district; a handful of men fish on the tributaries of the lower Ottawa, and some on the Gatineau lakes for the Ottawa trade.

Lumbering.—This industry keeps in the usual active state, high water not interfering with operations. Shipping and sawing are very active.

Manufacturing.—There is no wood-working establishment proper in Hull, except two very small factories; the lumber is manufactured in Ottawa.

Railroad construction and employment.—There is no railway construction being carried on in this district just now, the Ottawa and Gatineau extension of the

Canadian Pacific Railway having been completed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Masons, stonecutters, and bricklayers work mainly in Ottawa, at union wages, viz., 33 cents per hour. Plasterers and lathers have very little work in Hull just now. Painters are busy at \$2.25 per day for Ottawa firms. Carpenters and joiners average \$1.75 per day, varying between \$1.50 and \$2. Builders' labourers, like mill hands, average \$1.35 per day, the only difference being that the latter work one hour less per day than the former.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Without a strike or anything to interrupt industrial progress, the month of May was especially favourable for labour of all kinds, and while no unusual rush was reported, there was a general activity which ensured employment for nearly every one able or wishing to work. The building season was entered upon without disturbance, and with no changes in the hours or rates of wages, except in the case of the stonemasons, who were given an increase of wages, and a nine hour day, in response to a demand for 45 cents an hour. There is no building boom in Ottawa, but so far as could be learned the trades were steadily employed, and there was no anxiety as to the future. A number of mechanics left the city this spring for Winnipeg and Toronto.

A number of female employees of a local laundry were discharged for refusing to work all or part of May 24th, a public holiday.

The new pulp mill of Mr. J. R. Booth commenced operations on May 23rd. The cost of the mill and machinery amounted to about \$150,000, and its capacity will be from 70 to 80 tons of pulp daily. About eighty men will be employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm operations in the district, while delayed by the lateness of the season, were reported comparatively well advanced, and with a continuance of favourable conditions a satisfactory harvest seems assured. There was a fairly active demand for farm help, and the Immigration Department placed a number of immigrants with farmers in adjacent counties.

Lumbering.—Lumbering operations continue active. The cut of square timber for the season was estimated at probably half a million feet larger than last year, and this despite the fact that several firms have abandoned that department of lumbering operations.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers were well employed and continue this year under the terms of last year's agreement, to work for 42 cents an hour, and a nine hour day, with Saturday a half holiday. The carpenters asked for a graded scale of 28, 30 and 32 cents an hour, with a Saturday half holiday, but so far as known no contractor has granted the demand. The carpenters are receiving the same scale as last year, viz., 22 to 25 cents an hour. Plasterers are receiving a varied scale, and it is said that the Saturday half holiday is not generally recognized. The plumbers and Steamfitters' Union asked for, but did not receive, an increase in wages. During the month a considerable number left the local branch of the International Union, and applied for a charter from the National Trades Council of Canada, the new union being in process of organization with about 25 charter members. The Stone Cutters Union on May 1st filed a demand with the contractors asking an eight hour day and 43 cents an hour, commencing August 1st, which date is the expiration of the usual three months' notice. In the meantime they continue under last year's scale, 36 cents an hour and a nine hour day. The builders' labour-

ers are working nine hours a day for 20 cents an hour, the same scale as last year.

Metal, engineering and shipbuilding trades.—The iron trades were reported steadily employed. The local branch of the Amalgamated Sheet Metal Workers' Union is disbanding through lack of interest, and a national union is talked of. Bicycle workers were kept exceedingly busy, especially in the repairing line.

Woodworking and furnishing trades.—The woodworking trades were somewhat busier than during April, a condition incidental to the more steady activity in the building trades.

Printing and allied trades.—The printing trades were busy.

Clothing trades.—The clothing trades enjoyed a brisk spring trade and employment was steady.

Miscellaneous.—The journeymen barbers have under way the organization of a union with a charter from the Barbers' International Union. An effort will shortly be made to reduce the hours of labour.

Transport.—The Canada Atlantic Railway Company laid off a number of men at the car shops during the month, owing to the shortage of work incidental to the prospective reduction in the grain-carrying traffic, as a result of the trouble with the masters and pilots on the upper lakes.

Unskilled labour.—This class of labour was well employed, but a rather exceptional condition was created by the presence in the city of some fifty Austrian immigrants who were without money or work, or a knowledge of the English language. They were given sleeping quarters in the exhibition buildings at Lansdowne Park, and supplied tea and bread by the city. It seems they were engaged to work near Sudbury, but were only ticketed as far as Ottawa.

DISTRICT NOTES.

North Bay.—Building operations are reported in the press as very active, the following being among the constructions

in course of erection: Town hall, to cost \$10,000; new church, to cost \$50,000; new school building, to cost \$12,000; a new high school, to cost \$12,000; two churches, costing each about \$15,000, and a number of stores and private residences.

Bracebridge.—A by-law that the town should take \$15,000 in preferred stock of the Hess Furniture Co., in lieu of a mortgage on the property of the company, was carried.

KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during May, as compared with April and the corresponding period of last year, was satisfactory. Activity characterized the building trades and all other departments of industrial life. Farmers and market-gardeners say that, from an agricultural standpoint, this district never was in a better condition. Manufacturing is very active. The new hydraulic riveting and flanging machine manufactured in Chambersburg, Penn., U.S.A., for the Kingston Locomotive Works Co. is arriving and being placed in position. When in operation it will increase the output of locomotives by from twelve to fifteen per month.

Application is being made to the parliament of Canada for an Act to incorporate a company under the name of the "Kingston and Dominion Central Railway," with power to construct and operate a railway from a point in or near the city of Kingston to, near, or through Newboro and Westport, in the county of Leeds, and thence in a generally westerly direction to some point on the Georgian Bay between Parry Sound and Midland. Something like fifteen or twenty localities on the route of the proposed new electric railway between Kingston and Toronto have endorsed the scheme and given promise of financial aid. The new ferry steamer for use between Kingston and Wolfe Island will be completed by

June 1st. The Kingston Street Railway Company is making extensive improvements and repairs to its lines. The new steel tug "Emmerson," built at Collingwood, for the M. T. Company, arrived here during the month. The dimensions of the tug, which is one of the finest in the country, being built of steel and equipped with every modern convenience, lighted by electricity, steam steering gear, etc., are as follows :—Length over all, 114 feet ; beam, 23 feet. The engines are triple expansion, and there are two Scotch boilers, 11 feet by 11½ feet, carrying 185 pounds of steam pressure. The tug cost about \$50,000.

From the sum of \$9,000 placed in the supplementary estimates the improvements and extensions to Kingston dairy school will be, according to the plans, as follows :—A second lecture room, 28 x 37 feet, a reading room, a dressing room for students, a milk-testing room, and an office for the director. The lower story will be used exclusively for butter and cheese making. The attendance at the school last session was 150.

The Militia Department has given the owner of lot sixteen in the township of Kingston notice that it will require the property in question on September 18th, 1904. This is said to be the first step looking to new barracks at Kingston for the R.C.A. The present occupants are the street railway company and others, who are leaseholders.

Persons interested in a newly invented and patented stove grate visited the city a site for a foundry, in which to manufacture this and other articles. They also have a fuel saver and a smoke consumer. The fuel saver has been placed in several factories.

A request of a citizen to be allowed to erect poles and wires for the transmission of power from Kingston Mills to his plant in the city, and for other purposes, is before the committee of the city council.

A number of domestics, brought to Canada under the superintendence of the Na-

tional Council of Women, arrived here during the month. They were met at the railway station by prominent Kingston ladies, who had engaged them.

The Canadian Fire Association, has issued notification to the effect that fifty cents must be added to all mercantile risks in the congested portions of Kingston. This extra rate does not include fifteen cents previously added, which, with this, will make a total advance of sixty-five cents.

So far as strikes and lockouts were concerned the month past off quietly, only two strikes occurring. The plumbers, some 18 in number, having been refused a flat rate of 25 cents an hour, instead of 19½ and 22¼ cents, as formerly, and their request that the apprentices, 37 in number, be not enlarged upon during 1904, being refused, went on strike about the first of the month. After nine or ten days of negotiations, and a number of misunderstandings being cleared away, the men returned to work, satisfied with the concessions granted them.

— question as to jurisdiction in the matter of the erection of scaffolding arose between the masons and bricklayers and their helpers. The situation was aggravated by the fact that the contractors, a few days previous to the difficulty, had on demand, conceded this work to the masons and bricklayers. After considerable debate it was finally decided to leave the question of jurisdiction to be settled by the internationals of the unions interested. In the meantime, the striking helpers, about 150, returned to work. During the difficulty a meeting of the Employers' Association of the city was held, and strong resolutions looking to the employment of non-union or other help to carry on the work, was passed. Under the amicable arrangements made this was found unnecessary.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists are very busy ; prospects of a bountiful harvest are bright.

Fishing.—This industry is somewhat improved since April.

Lumbering.—All branches of this industry were active.

Manufacturing.—Factories seem to be fully employed.

Mining.—Conditions are normal.

Railroad construction and employment.—The usual amount of railway repair work is being done, and considerable construction work is in prospect.

Building trades.—The various sections of the building trades are now fully employed.

Metal, engineering and shipbuilding trades.—The metal and engineering trades are rushed. Shipbuilders are still busy.

Woodworking and furnishing trades.—The woodworking and furnishing trades report business excellent.

Printing and allied trades.—Printers report business good.

Clothing trades.—The clothing trade is now improved and said to be better than during the corresponding period of last year.

Food and tobacco preparation.—Bakers and confectioners report business good. The recent holiday celebrations gave an impetus to these lines. Butchers report business satisfactory. A large trade is done here in the purchase and preparation of cattle for the British market.

Leather trades.—Tanners and kindred trades report business fair.

Miscellaneous.—Barbers, restaurants, laundries, etc., report increased business, caused by increased transient trade.

Transport.—All transportation business is very active, and as yet is locally unaffected by the Lake Carriers' Association's trouble with its employees in the United States.

Unskilled labour.—This class is in much demand, and commands \$1.75 to \$2 per day.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of May opened auspiciously for labour, and everything points to a very busy summer. There is a keen demand for all classes of labour. The city is putting down a large amount of granolithic pavement, which is giving employment to a large number of labourers as well as skilled artisans, all at good wages. There is a demand for men at the Belleville Cement Company's works, which is rapidly nearing completion, and is expecting to be in full operation in a couple of months. The Belleville Hardware Company is making rapid progress and is now employing upwards of seventy hands, many of them necessarily being skilled men. Locks of all kinds are manufactured and the company's products are in good demand.

There have been no changes in rates of wages or hours of labour, nor any unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Prospects are very promising. Fall wheat looks well, and the farmers are expecting a bountiful harvest. Seeding is about completed.

Fishing.—The fishing industry in this district is an important branch of employment, and the season promises to be favourable. At present only the rougher fish are caught; the season for bass and maskilonge opens next month. The fishermen express satisfaction with the government's new regulations.

Manufacturing.—All factories are keeping a full staff at work.

Mining.—The Mining Bureau here, under the management of Mr. M. A. G. Burrows, is proving a boon to the mining men. The Cloyne district, especially, is very promising, having a galena prospect that is showing \$7 gold to the ton. Several mining companies in the northern part of the county are actively at work developing.

Railroad construction and employment.—There is no railroad construction going on here at present.

CONDITION OF PARTICULAR TRADES.

Building trades.—There is not much building going on this spring, although the several trades seem to be busy. Several of the large stores on the main streets are making extensive alterations and this, with the new residences going up, keeps the different trades employed. Painters and decorators are all busy.

Metal, engineering and shipbuilding trades.—Most of the men employed in these trades are fairly busy, especially iron moulders, machinists and electrical workers. Since the city took over the gas works a large number of men are engaged in putting in gas services, owing to the easy terms offered. Bicycle workers and jewellers are all engaged.

Woodworking and furnishing trades.—Furniture and cabinet makers are working full time, with plenty of work in sight. There are four factories here. Carriage and wagon makers report good business and full staffs employed.

Printing and allied trades.—Printers and pressmen are all busy, and there is hardly a sufficient supply either of newspaper or job work hands. Pressmen also are all working.

Clothing trades.—All male and female hands are busy on spring work. Every tailor shop is working full time.

Food and tobacco preparation.—Bakers and confectioners are all busy, as are also butchers. Cigar makers are all working and predict a good season.

Leather trades.—The leather trade was never in a more prosperous condition; every harnessmaker is employed, and one large firm has been working day and night getting out orders, one of which was for leggings for the Fifteenth Regiment. They were completed for Victoria day.

Miscellaneous.—Barbers are all busy. Hotel and restaurant employees had a good month, as had the laundry workers.

Transport.—Railway employees had a quiet month, following the opening of navigation. Steamboatmen had a very busy month, and the season promises to be a record breaker. Cab-drivers and hackmen are doing a heavy business, as there is no street railway in operation here at present.

Unskilled labour.—This class is in fair demand, although there is a good supply.

DISTRICT NOTES.

Deseronto.—Labour conditions are very active, especially since the opening of spring, when the big lumber mills takes on between 200 and 300 men. The smelting works and the cement works also increased their staffs.

Trenton.—Gilmour's mill is very busy.

Brockville.—Messrs. Saulnier and Dezelles, proprietors of the Union Hat Works, assigned during May, as a result of a diminution in orders following the recent large fires in wholesale circles in Toronto and Montreal. The firm last year employed 125 hands.

Cornwall.—The cotton and paper mills, which were closed for a couple of weeks as a result of the annual unwatering of the canal, resumed operations on May 2nd. With the letting in of the water this portion of the St. Lawrence route was opened for navigation for the season.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnston, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the exception of bricklayers, the demand for all classes of workmen was exceptionally active during May. Considerable extra concrete work is being put in on the pit-lock here to prevent all leakage; about eighty labourers have been employed on the work throughout the month. The new brickyards have not yet started to turn out bricks, but will begin shipping about the second week in June. Trade

was exceptionally active and the railways report a good freight business. The banks report all paper well met. There were no changes in the rates of wages or hours of labour and no unrest in the labour market. Fire destroyed the leading carriage snop in the city during May, which at the time was working on large orders. Temporary premises have been obtained while the old building is being rebuilt.

A by-law to guarantee the bonds of the Sugar Beet Co., to the extent of \$100,000, was submitted to a referendum of the people, and voted down by a large majority.

The Canadian Machine Telephone Company has been granted a ten years' franchise of the streets and is installing a modern local system, putting all wires in the business part of the city underground. Residential phones are installed for \$15, and business phones for \$20; if a business man has one in his place of business and his residence, he gets them for \$15 each.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seedling is about completed throughout the district. Spring was a little late in opening, but most of the farmers report having their work all done in fairly good time. Farm help is reported very scarce in this district.

Fishing.—The fishing season has not opened yet.

Lumbering.—Activity is now general and lumber dealers find a ready sale for their lumber. Prices range from \$3 to \$5 per M. higher than last year.

Manufacturing.—Manufacturing establishments of all kinds are crowded with work, and are reported as being unable to keep up with orders. The Canada General Electric Works, the Cordage Works, Wm. Hamilton Works and J. J. Turner Works are among the busiest firms in town.

Mining.—Mining operations are not carried on in this district.

Railroad construction.—The C.P.R. and G.T.R. companies are very busy this month in putting new ballast on their roads. Operations have begun on the new electric street railway, and it will be in running order by September 1st.

Other industries.—One hundred houses are now under construction in Peterborough and all outside trades are rushed with work. Four sash and door factories are very busy, being rushed with orders. The corporation of Peterborough is putting down six miles of concrete walks, and also several permanent roadways, which is giving work to a large number of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Masons are exceptionally busy, and carpenters and joiners are rushed with work. Lathers and plasterers, principally the former, are very busy. The demand for painters and paperhangers is for about double the number of men who are in the business. Plumbers, steamfitters, stonecutters and builders' labourers are all fairly well employed.

Metal, engineering and shipbuilding trades.—Iron moulders are fairly busy. Iron workers and helpers are active. Core-makers' work is principally done by moulders, there being only two coremakers here. Machinists, electrical workers and linemen are very busy. Brass workers in all branches are crowded with work. Blacksmiths and sheet metal workers report conditions very active. Bicycle workers are kept busy, and horseshoers are moderately busy. Jewellers report trade very good.

Woodworking and furnishing trades.—Woodworkers of all kinds and upholsterers are busy. Varnishers are active. Carriage and wagon makers are working to their fullest capacity. Pattern-makers and wood carvers in the piano works are very busy. Coopers are very active.

Printing and allied trades.—Printers and pressmen report a good steady month.

Clothing trades.—Journeyman tailors and garment workers are very active; the

former find it difficult to keep up with the work, and are working overtime in some cases. Boot and shoe workers are very busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters are very busy. Ice cutters and drivers are very active. Cigarmakers report a steady trade, principally export.

Leather trade.—Leather workers are fairly well occupied.

Miscellaneous.—Barbers report a steady business. Two broom-makers are doing a good local and export trade. Retail shop clerks are very active. Delivery and hotel employees are quite actively engaged. Laundry workers are all very busy.

Transport.—Railroad employees report work on the average, with all fairly well employed. Steamboat traffic is just beginning with one or two small steamboats running irregular trips. Cab drivers and carters report business fairly active. Teams-ters and expressmen are well occupied.

Unskilled labour was fairly well employed.

DISTRICT NOTES.

In *Omeme* a saw-mill was burned. The loss is reported heavy, there being no insurance. Merchants in villages report a steady trade. Saw-mill operations have begun in a number of the small places. Grist mills are doing a good business. Farmers are busy planting for the vegetable crop, and from the very favourable weather, appearances point to a bountiful harvest.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The industrial situation is generally satisfactory, with employment plentiful for most classes of labour, excepting in so far as strikes and immigration in excess of the requirements of the market constitute disturbing factors. The criti-

cal period of the beginning of the month passed without any disturbance in the building trades, those branches which had not previously come to an understanding with the employers allowing their demands to remain temporarily in abeyance, but difficulties of a less important character have occurred in several other departments. The displacement of labour occasioned by the fire was comparatively small in proportion to the extent of the disaster owing to the quarter affected being mainly a distributive rather than an industrial centre, and nearly all those thrown out of employment for a time have again found work, the most noteworthy exception being in the case of the bookbinders and allied trades. A large number of firms whose establishments were destroyed have resumed operations. The fire caused some influx of labour from other points of Ontario, especially in connection with the building trades, but the principal accessions to the industrial ranks have come from the immigration of British mechanics. In a number of cases these men, including stonemasons, carpenters, plumbers, blacksmiths and others, appear to have come out under fraudulent contracts guaranteeing them employment for the season. A name and address was given them to whom to apply in Toronto, but no such person could be found. The matter has aroused considerable indignation in local labour circles.

The movement to acquire the Athenæum Club building on Church street for a Labour Temple is progressing satisfactorily, with every prospect of success. Subscriptions to the shares of the Labour Temple Company, up to the 28th amounted to upwards of \$9,000, including those from forty labour organizations, as well as about 1,700 individual subscriptions. It is anticipated that the cash payment required on the 6th June to conclude the purchase will be met without difficulty.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are all busy, but the season is decidedly backward. The de-

mand for additional help has been better met in this locality than in most Ontario neighbourhoods, owing to Toronto being a distributing point for the new arrivals, many of whom are engaged at once by farmers who meet them at the station. The wages paid range from \$18 to \$25 per month with board for experienced agricultural labourers, as high as \$30 having been paid in a few instances, and from \$10 to \$15 per month for inexperienced men.

Manufacturing.—There is marked activity in most manufacturing establishments with a normal demand for skilled labour. Production is stimulated by the prospect of a heavy demand for the Northwest owing to the continued influx of population, though orders have so far been comparatively light.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, carpenters, stonemasons, builders' labourers, are busy with few exceptions. Painters have all the work they can do, and plumbers are well employed. Steamfitters find trade a little quiet. The trade as a whole is adversely affected by the high price of brick. The brickmakers' strike, if continued, will have a depressing tendency, though its effects have not been seriously felt as yet, as the supply on hand, though limited, has been adequate to present requirements. The rebuilding of the burned district has been delayed from several causes, viz., the applications of the Grand Trunk and Canadian Pacific Railways to expropriate a large area south of Front street, now pending, the adoption of more stringent building restrictions by the city, and the fact that a considerable portion of the property is leasehold, while there is a growing tendency to prefer freehold sites. These reasons, combined with the uncertainties of the industrial situation, have considerably retarded rebuilding operations. The necessities of the case, however, render it certain that extensive operations must be undertaken this season.

Building permits for April showed a large increase over 1903, the total being \$491,482, as compared with \$348,763 for April, 1903. The total for the first four months amounted to \$1,187,962, which is approximately the same as last year. These statistics do not include any permits for the factories and warehouses which will replace those burnt in the recent fire.

Metal, engineering and shipbuilding trades.—These trades are as a rule well employed so far as local members are concerned. Blacksmiths, boilermakers and iron moulders are busy. Sheet metal workers have had a good month. Brass finishers find work plentiful. Electrical workers have steady employment. Jewelers and silversmiths find conditions satisfactory. The horseshoers who recently demanded an increased wage scale have compromised with the employers by accepting a reduction of hours without change of wages. They will in future work forty-five hours per week in place of fifty, getting the Saturday afternoon holiday.

Woodworking and furnishing trades.—Reports from the various classes of woodworkers, including piano makers, are favourable, indicating steady employment, with prospects of an active season.

Printing and allied trades.—This was one of the departments of industry most seriously affected by the fire. Matters, however, have almost resumed normal conditions so far as the printers are concerned, and the trade has had a fair month. Some of the bookbinders and other are still out of work. The movement on the part of the Allied Trades for a considerable increase in the wage scale has been resumed and negotiations are in progress. The number of men and women connected with the unions affected amounts to upwards of 1,600.

The Bookbinders' Union held a concert on May 27th for the benefit of its members out of employment owing to the recent fire. About 140 work-people, including women, are affected by the fire.

Clothing trades.—Custom tailors report trade duller than is usual at this season and not nearly so good as last year. Garment workers also find the season a slack one and a number are out of work. The reason assigned is the coolness of the season and the effects of the protracted winter in delaying orders. Boot and shoe workers are steadily employed, and hat, cap and neckwear workers are busy.

Food and tobacco preparation.—These departments have had a fair month. Cigar-makers report all members of the union at work. The strike of brewery workers in two establishments on the 6th instant, on account of the employment of non-unionists, was met by the employers by a lock-out of the union men in four other breweries, making the total number out about 250. The Licensed Victuallers' Association is attempting to effect a settlement of the difficulty. The strike has involved other classes of employees. The firemen in the breweries went out, but the engineers refused to do so, and instructed the substitutes engaged to take the places of the firemen in their duties. The engineers belong to the Stationary Engineers' Association, and in view of their action the delegates of that body to the District Labour Council, were expelled by the latter.

Miscellaneous.—The brickmakers belonging to the Brickmakers' Union, employed in the Eastern brickyards, struck on the 23rd for the recognition of the union and an increase of pay of five cents per 1,000 bricks. Between 300 and 400 men are out. Drain diggers and pipe layers, to the number of forty, employed in the city sewers department, struck on the 26th instant, for an increase of wages. The drain diggers now receive 20 cents, and the pipe layers 22 cents per hour, and they ask 25 cents all round. The city engineer promised to give consideration to their claims and some of them returned to work. The remainder, about half, are still out. Laundry workers are entering upon their busy season and have abundance of work. The Commercial Telegraphers' strike is still unsettled.

Transport.—Men engaged in all branches of land transportation find employment plentiful. Street railway employees have formulated a list of demands, said to include a considerable increase of pay besides full recognition of the union and the regulation of many matters of detail. Negotiations are in progress, but both parties are reticent as to the matter. The Team Drivers' Union has demanded an increase of pay and the team owners have agreed to make some concessions; matters however, are still undecided. Navigation is backward and work so far has been somewhat slack.

Unskilled labour.—Unskilled labour is in good demand owing to the amount of work to be done in cleaning up the debris of the burned district, in addition to normal requirements of the season.

NIAGARIA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, correspondent, reports as follows—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour is fully employed in this city and throughout the district. In the city conditions for labourers and craftsmen could hardly be improved upon. For a time the demands of employers for carpenters, masons and labourers could not be met. At present, however, they are pretty well filled. The Power Development works have given employment to several thousand men for the past year, and the number is larger than ever now. The majority are foreign labourers, but there are also hundreds of skilled Canadian workers of all classes. Public improvements in the city engage many labourers. The building trades are exceptionally busy, and new structures, chiefly houses, are going up in large numbers. Planing mills are running overtime. Trade and commerce is locally satisfactory, and merchants are handling a big business.

Rock drillers and steam engineers on the power works had their wages raised five

cents per hour. This was the result of a strike involving several hundred men. There were other strikes of lesser consequences, involving painters and carpenters, and a slight difficulty at the Suspend Company's works.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season being late, farmers are now very busy. Fall wheat and young fruit trees have suffered severely from the cold winter, and there are some cases reported of damage to meadows.

Manufacturing.—Factories are generally busy and prosperous, and are employing full complements of men.

Railroad construction and employment.—Railways are employing fewer men in train crews since navigation opened. Track improvements employ a few extra hands. Men have gone from this section to work on railway construction elsewhere. Two new electric railways are projected in this district, one from Niagara-on-the-Lake to St. Catharines via Queenston, the other from Thorold to Fort Erie via Welland and Port Colborne. The time for commencing the construction of the Welland and Grand Island bridge has been extended. The Père Marquette Railway Company has bought land in this city and at Welland for freight yards.

Other industries.—Natural gas is being extensively used in the city for household purposes and to heat steam boilers. The laying of gas pipes in the city has employed from 100 to 150 men for several weeks.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are rushed with work; at one time there was an urgent demand for carpenters, and seven cents per hour more than the union scale was offered. This very urgent demand is now past. Bricklayers and stonemasons are very busy; many are employed on the fine work in the power tunnels and wheel pits at high wages. Lathers are well employed, and builders' labourers are

in demand. Plumbers and allied trades have all they can do. Painters, decorators and paper-hangers are all working, and the outlook for the season is good.

Metal, engineering and shipbuilding trades.—Foundry and machine shop men are working steadily. Electrical workers and linemen are busy. There is said to be a slackness of work for structural ironworkers, riveters and boilermakers.

Woodworking and furnishing trades.—Carriage and wagon makers and pattern makers are well employed, though these callings are followed by comparatively few men in this district.

Printing and allied trades.—Printers are well employed; local shops have increased their equipment and staffs.

Clothing trades.—Tailors have plenty to do.

Food and tobacco preparation.—Bakers are well employed. Butchers' employees and ice handlers are busy.

Miscellaneous.—Barbers are doing well; the master barbers have organized and raised prices. Office employees are all engaged. Hotels, boarding houses and restaurants are increasing their staffs. The big summer hotels are open, and steam laundries are employing more hands.

Transport.—Railway transportation is employing a few less men, though no great decrease in staffs is announced. Employment is inclined to be less in all classes of railway work. All the summer steamboat crews and employees are working, though some passenger boats are not yet running; the outlook is good. Street and suburban electric railways have taken on many extra men for the summer. Drivers of all classes of wagons find plenty of employment. Teamsters have been in demand.

Unskilled labour.—This class of labour is, generally speaking, in demand.

DISTRICT NOTES.

Wellandport.—The cheese box factory has begun operations.

Stevensville.—A new planing mill has been established.

Sherkston.—The quarries are doing a very heavy business. Early in May 600 tons of stone per day were being shipped.

Bridgeburg.—Work at the shipyard has stopped.

Port Colborne.—A by-law to loan \$10,000 to a brass manufacturing company was carried by a large majority.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. James A. Wiley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during May was active and labour more generally employed than in April, and indications point to another very busy season for St. Catharines and district. Several contracts already let for public works and buildings, and for a number of residences, are under way. The regular civic improvements for the summer season, cement walks, new roads, sewers, etc., have been commenced; these alone will give employment to nearly all available labour. Tenders have been called for by the Dominion government for the erection at an early date in St. Catharines, of a new and modern armoury. The Ross, Sons & Co., manufacturers of traction engines, etc., have been granted a bonus of \$20,000 to locate in St. Catharines. They will employ at union wages 75 skilled mechanics, the number to be increased to 125 by the fourth year, the plant and building to cost not less than \$50,000.

Banks and business houses continue to report the money market satisfactory, and business good. The only industrial disturbance of the month occurred at the Riordan paper mills at Merritton; the company decided to return to the long hour schedule, and notified the men to that effect; the men refused to comply, and quit work, and although several conferences have been held

the men are still out. The company is using the time to effect some repairs.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The backward season has thrown farm work behind, and as a result conditions are very busy. Although the farmers of this district have imported 30 farm labourers, principally from Scotland, there is still a demand for men.

Manufacturing.—Manufacturers report trade fair; nearly all are running full time and a few overtime.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are very busy, and, in order to meet the present need of suitable houses for the working classes, 40 or 50 new houses will have to be built. Steps are being taken to this end. This, in addition to the work already on hand, will tax the available labour supply. Bricklayers, masons, carpenters, joiners, painters, decorators, paperhangers, plumbers, gas and steamfitters and builders' labourers are busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers, steam engineers, electrical workers and linemen, metal polishers, buffers, sawsmiths, sawworkers, blacksmiths and horseshoers report trade fair.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers are all well employed.

Printing and allied trades.—Printers, pressmen and bookbinders have had steady employment.

Clothing trades.—Journeyman tailors report trade good.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, ice handlers, cigarmakers and tobacco workers were satisfactorily employed.

Leather trades.—Tanners and curriers, leather workers and saddlers report trade fair.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees and laundry workers are well employed.

Transport.—Railway conductors, locomotive engineers and firemen, trainmen, freight-handlers, street railway employees, cab drivers, hackmen, teamsters and expressmen find steady employment.

Unskilled labour.—This class of labour is well employed, and is in demand.

DISTRICT NOTES.

Port Dalhousie.—The labour market has improved considerably over last month, and steady employment is reported by all branches of labour usually employed here.

Merriton.—The labour market is active, all branches of labour being well employed, with the exception of the papermakers of Riordan's mills, who are out on strike.

Thorold.—Labour is generally well employed, and all the mills and factories are running on full time. The building trades are busy.

Power Glen.—The work on the Hamilton Cataract Power Company's plant is being pushed as rapidly as possible. A large staff of men of different trades are employed on this work. Owing to the scarcity of unskilled labour the company has had to import 35 or 40 hands.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour is not as well employed as in former years at this season. There is less civic construction work this year than last, and the International Harvester Company has laid off several hundred hands, both skilled and unskilled, during the month.

The city council has appointed an industrial committee to look after new in-

dustries seeking sites. The Petrie Company, of Guelph, has secured a site of 20 acres, and will locate here. The Pittsburg Steel Company is operating its fence factory. The Mansfield Glass Company has also selected a site. Negotiations are going on for the re-establishment here of the old Diamond (flint) glass works, which left Hamilton many years ago.

Harmony again prevails between the journeymen plumbers and their employers. The men have accepted 30 cents an hour, with a nine hour day. An agreement was signed last night for a year. The men were formerly paid 27½ cents an hour, and had to work ten hours a day.

According to the latest estimates of the assessment commissioner an increase of about 5,000 in the population of Hamilton has taken place during the past year, making the population of the city, in round numbers, 60,000.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing is fair for the spring season, though shipments were not very large; prospects are, nevertheless, for a busy summer in the clothing, iron, cigar and woodworking industries. The Chadwick metal spinning and electrical works, was burnt out during the month, involving a loss of \$7,000, which was fully covered by insurance. Twenty men were thrown out of employment for a few days. The Semens & Ebel casket works also suffered by fire to the extent of several thousand dollars, and twenty men were out of work in consequence for a short time.

During the month a local solicitor issued a writ for the Westmoreland Coal Company, the headquarters of which are at Philadelphia, against the Hamilton Gaslight Company on a claim of \$4,789.26 for coal delivered in the winter of 1902-3. The suit is an outcome of the big strike of 1902, and the trouble the coal dealers had in getting railway cars with which to deliver their coal. The plaintiff company claims that as the strike and shortage of cars was

beyond its control, it could not be held responsible for the delay in delivering the coal contracted for by the Hamilton Gas Company.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are fairly busy, but none are rushed. The Building Trades' Council, a union composed of all the building trades but the bricklayers, has notified the contractors of the city that after May 1st, it will enforce the Building Trades' Council working card, and will not work on any job with non-union men. The plumbers and sheet metal workers received increases of wages and shorter hours.

Metal, engineering and shipbuilding trades.—Iron and stove plate moulders have had fair work. The Burrows, Stewart & Milne Stove Foundry Co. is making an addition to its premises, to make room for about 55 more moulders. Machinists are busy in some shops, but a large number of men in the erecting department of the International Harvester Company's works were laid off during the month. At the close of the month there appears to be a difficulty at the harvester works, in which the two machinists' organizations are involved, the International Association and the Amalgamated Association, owing to the dismissal of four men who refused to operate dual machines. Electrical workers, stove mounters, blacksmiths and horse-shoers are fairly well employed.

Woodworking and furnishing trades.—Furniture workers, carriage and wagon makers, coopers and pattern makers enjoyed a fair month.

Printing and allied trades.—In these trades business was fair.

Clothing trades.—Journeymen tailors are very busy, and had an excellent month. Garment workers report conditions fair, with trade improving. The several striking contractors have opened their shops. The local garment workers have protested against a prospective importation of operatives from Rochester, which thus far has not materi-

alized. Boot and shoe workers are fairly well employed. The Macpherson Company has opened its new building, which adjoins the present factory, making it now one of the largest establishments of its kind in Canada. The firm will employ an additional number of shoe workers.

Food and tobacco preparation.—Bakers and butchers report trade normal. The cigarmakers' strike was called off and all returned to work on the old conditions. Tobacco workers find trade fairly busy; several girls went out on strike, owing to the importation of labour from the southern states.

Leather trades.—The leather workers' strike is still unsettled in the two wholesale snops. Ten retail shops signed the bill and the men are at work.

Miscellaneous.—Barbers, clerks and hotel and restaurant employees are fairly well employed. Broom-makers find trade a little slack. The city police officers are asking an increase in salary; the following is the arrangement in force now:—First year men get \$1.65 a day; after that and until they have six years' service to their credit, they get \$2; the sixth year they get \$2.10.

Transport.—All railway employees, both steam and electric, were fairly well employed. Street railway employees are seeking increased wages, asking for 20 cents an hour; they are now receiving a minimum of 15 cents, and a maximum of 18 cents an hour. Longshoremen have been very slack, owing to so much coal being brought in by rail.

Unskilled labour.—This class of labour is not very busily employed at present, and many men are idle. A large number of foreigners were laid off at the International Harvester works, and are about the city, as well as a large number of immigrants seeking work.

DISTRICT NOTES.

Dundas.—The different factories were fairly busy. A large number of men are in town working for a construction com-

pany, which is double tracking the Grand Trunk main line from the Y near Hamilton, to Lynden. An employee injured at the Bertram machine works by a fall from a platform, died from the injuries he received. The town council has decided to put down cement sidewalks by contract system; one alderman protested in favour of day labour.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during May, and the month compares favourably with April and the corresponding month of last year. The building trades have been especially active, many private dwellings being in the course of construction. The contract for the alteration and addition to the drill hall, to cost \$30,000, has been awarded to Schultz Bros., of this city. The erection of a new school, to cost \$9,000, is to be started at once. The Grand Trunk Railway Company has let the contract for the erection of a new station to a local firm, and operations have commenced. The factories engaged in the iron trade have been busy and some overtime has been worked. The Barber & Ellis Company, formerly of Toronto, manufacturers of stationery and paper boxes, has located in Brantford. Civic improvement is affording employment to a large force of men in the laying of sewers and the construction of cement sidewalks. Many of the factories are again giving the Saturday half-holiday, which is to continue during the summer months. Merchants experienced a fair month. The demand for unskilled labour, which prevailed during the fore part of the month, has in many cases been supplied. Friendly relations between employer and employee continue.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the late season agriculturists have been exceptionally busy during the month. Farm labourers

are difficult to secure. Much of the wheat crop was killed by the severe winter and has been ploughed up. The clover crop also suffered in some localities, and many peach trees were totally destroyed.

Manufacturing.—Manufactures, in the various lines carried on here, have been active.

Railroad construction and employment.—The Grand Trunk Railway Company and the Electric Railway Company have given employment to large numbers of men on the new lines under construction; four miles of the electric road, between Paris and Galt, is practically finished.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, lathers and plasterers have had an active month. Painters, decorators and paperhangers have been very busy. Plumbers have had an average month, but nearly all local men have been employed.

Metal, engineering and shipbuilding trades.—Iron and brass moulders, metal polishers, buffers, platers and stove mounters have had steady employment. Coremakers and machinists have been busy, some of the latter working overtime. Electrical workers and linemen, and machinery and carriage blacksmiths report plenty of work. Boilermakers and sheet iron workers had an exceptionally busy month. Horse-shoers experienced an active month's trade.

Woodworking and furnishing trades.—Woodworkers in general have been busy. Carriage and wagon makers, millwrights and pattern-makers have had steady employment.

Printing and allied trades.—Printers and pressmen are steadily employed.

Clothing trades.—Journeyman tailors report a good month, and an improvement in conditions over April.

Food and tobacco preparation.—Bakers and confectioners report all local men employed. Cigarmakers and tobacco workers had a fair month.

Leather trades.—Saddlers and leather workers had an average month, all local men being employed.

Miscellaneous.—Barbers, clerks and delivery employees had a steady month. Hotel and restaurant employees and laundry workers had steady employment.

Transport.—Railroad trackmen and freight-handlers, particularly the former, have been busy. Street railway employees report steady employment. The cars on the Grand Valley line were operated on Sunday, May 22; if that continues extra employment will result. Teamsters, draymen and expressmen had a busy month.

Unskilled labour.—Unskilled labour was in demand.

DISTRICT NOTES.

Paris.—The new plant for the alabastine works is nearly complete. Labour generally has been well employed. The building trades are active. The new library is nearly finished. Farmers in this locality are looking for farm labourers, and offering \$25 per month, with board.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

May has shown considerable improvement in the labour market over April, but compared with last year conditions are hardly as good. There is, however, no noticeable scarcity of men, nor any number of idle men. Retail trade has hardly been up to the usual, the reason ascribed being the effect of the severe winter and the late spring, which especially affected trade with farmers. Outside employment of all kinds has been plentiful during the month, and a considerable amount of building is under way. A feature of the month is the number of factories which commenced for the summer months to close down on Saturday afternoons. The Retail Merchants' Association has granted the request of its

clerks for a half-holiday during July and August. When this takes effect about 1,300 work-people will be enjoying a half day off each week. A number of men at work cleaning out the salvage of a burnt-out machine shop for \$1.50 per day struck for the rate of pay they received before the fire; they have since sought other employment. There has been very little unrest in the labour market during the month, and little change in rates of wages compared with other years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have had a very busy month seeding, with the season about two or three weeks behind.

Manufacturing.—Manufacturers have had a good month, with considerable improvement in most lines over April.

Railroad construction and employment.—It has been announced that the extension of the Canadian Pacific Railway to Goderich will soon be commenced. All the municipalities on the proposed route, except Guelph and Guelph township, have passed bonus by-laws to provide the right of way.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had a good month, one feature of which has been the large amount of repair work done. There is considerable work on hand, and there are some tenders not yet awarded, owing to the present prices. Bricklayers and stonemasons had a good month. Carpenters and joiners, as well as painters and paperhangers, were especially busy, with a large amount of repair work. Stonecutters are steadily employed.

Metal, engineering and shipbuilding trades.—Iron moulders in some shops were well employed, but there has been some slackness in the stove foundries. Machinists and machinists' helpers had a good month. The men thrown out by the fire last month have about all found employment. The tube millmen had a good month, and sheet metal workers a very busy month.

Woodworking and furnishing trades.—The woodworking trades generally were better employed than last month. Woodworkers had a good month. Upholsterers had a fair month, as had piano and organ workers. Carriage workers and trimmers were actively employed. Coopers had only a fair month.

Printing and allied trades.—Printers had a busy month. One newspaper has started for the summer to publish on Saturday at one o'clock, making a six-hour day instead of an eight-hour. This was given voluntarily, in face of a union agreement calling for eight hours on Saturday.

Clothing trades.—Tailors had a very busy month on custom work.

Food and tobacco preparation.—Cigar-makers had only a fair month. Brewery workers have been very busy, and more men have been taken on.

Miscellaneous.—Textile workers and Brussels carpet weavers have had a good month. An opening of an addition to one of the plants here has given employment to quite a number of additional hands. Barbers were granted a half-holiday per week. The various trades and callings have improved with the opening of fine weather, and generally they have had a good month.

Transport.—Street railway employees have been granted a new rate of $15\frac{1}{2}$ cents an hour for three-year men; $14\frac{1}{2}$ cents for two-year men, and $13\frac{1}{2}$ cents for one-year men, in place of $14\frac{1}{2}$, $13\frac{1}{2}$ and $12\frac{1}{2}$ respectively.

Unskilled labour.—This class of labour enjoyed a good month, with a brisk demand for men.

DISTRICT NOTES.

Berlin.—Bricklayers, stonemasons and plasterers went on strike at the beginning of the month for 40 cents an hour. After three days they returned, getting $37\frac{1}{2}$ cents per hour for all contracts under way, and 40 cents for all new contracts. The town council has passed a resolution, setting the

corporation rate of wages for labourers at \$1.35, \$1.65 and \$1.75, in place of the former rates of \$1.25, \$1.50 and \$1.60 per day of 10 hours. About 50 workmen are directly affected, but the rates generally hold good for all similar kinds of work. The corporation will do its municipal work, such as sidewalks, sewers, &c., by day labour. The Berlin Felt Boot Company, recently burnt out, which took temporary premises in the Berlin Rubber Company's factory, will soon have its old premises ready again, when the Berlin Rubber Company will take over its own building.

Hespeler.—An addition, 60 by 60, and three stories high, is being built to the furniture factory.

Palmerston.—The pork factory has been sold and will reopen June 1.

Galt.—By-laws to expend \$50,000 on sewers and \$30,000 on a new collegiate institute have been passed. Real estate and rents have materially advanced during the past two months. New shops are being erected by the Goldie-McCulloch Company. The Galt Art Metal Company, and the Galt Down Draft Furnace Company, both new concerns, are putting up large foundries.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during May, but the supply of workmen was equal to the demand. The outlook for the coming season seems favourable in all lines of industry. The building trades are active, having commenced the work of the season, which, with the number of dwelling houses in course of construction, and some of the factories extending their premises and letting contracts for new ones, will be an active one. Messrs. Crowe & Nichols, of Superior, Wisconsin, contemplate starting a chair factory, to cost \$25,000, employing from fifty to one

hundred men. The city is granting \$1,000 for a site and ten years' exemption from taxes. The civic works have a number of men paving streets and laying side-walks, and the gas company is extending the area covered by its service, involving the laying of about three miles of gas mains, at a cost estimated at \$100,000, thus giving employment to a number of labourers. No changes in the rates of wages have occurred this month, nor any disturbances in the labour market.

Agriculture.—Farmers are through seeding and are busy planting potatoes and the root crop. They report the hay looking good.

Manufacturing.—All lines of manufacturing establishments report business active and orders plentiful, and in advance of last year.

Railroad construction and employment.—There is no railroad construction going on in this locality, but it is expected that the electric street railway company will commence laying tracks in a month or so.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were well employed. Bricklayers, masons, carpenters, joiners, lathers and plasterers were busy. Paperhangers and painters were rushed, gasfitters, stonecutters and builders' labourers were all well employed.

Metal, engineering and shipbuilding trades.—A few of the machinists that were laid off work in the Grand Trunk shops over six weeks ago, are still idle. Blacksmiths and boilermakers had a fair month.

Woodworking and furnishing trades.—All woodworkers in the different factories were fully employed.

Printing and allied trades.—All printers were well employed.

Clothing trades.—Garment workers and journeymen tailors report plenty of work.

Food and tobacco preparation.—Bakers and confectioners report trade good.

Cigarmakers and tobacco workers were fully employed.

Miscellaneous.—Barbers report business very good.

Transport.—Men engaged in all branches of the railway service are steadily employed. Cab-drivers, draymen and teamsters report plenty of work.

Unskilled labour.—This class was well employed.

DISTRICT NOTES.

Woodstock.—A branch of the Retail Merchants' Association of Canada was formed, with an initial membership of upwards of twenty-five business men. Mr. W. S. Hurst was appointed president, and Mr. J. H. Frank, secretary. The two new industries, namely, the automobile works and bent goods works report favourable conditions, 25 men being employed in the former and 18 in the latter.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fully employed during May. In the building trades, however, there is not nearly as much doing as during the corresponding period of the past five years. Very few building permits have been taken out, although a demand for vacant houses is felt, and a number of artisans have left the city, leaving enough work in those lines to keep those left behind going. On the railroads business is not as active as in 1903 and 1902, although no large lay-offs have taken place. The McClary Company continues to build new workshops, both at its central location and at the new foundries in the south end. Wholesale and retail trade continues active. The usual change to summer hours took place on the first of May. The changes affect a variety of businesses, but does not affect the wages of the employees.

The Canadian Tin Plate Company has decided to move from this city to Hamilton early in June.

CONDITION OF LOCAL INDUSTRIES.

Railroad construction and employment.—A force of men is at work building a radial road between London and St. Thomas, and from there to Port Stanley; they are now working between Lambeth and St. Thomas. The majority of the employees are drawn from this city. The double-tracking on the Grand Trunk Railway between London and Hamilton continues, the majority of workmen being foreigners.

CONDITION OF PARTICULAR TRADES.

Bustling trades.—Bricklayers and masons are all working, but with no prospects of being very busy this year. It is the worst summer in this line for the past five years. A number of bricklayers have left the city. Carpenters are all busy, having more employment than any other branch in the building trades. Lathers, plasterers and painters are in the same condition as bricklayers, though they are all working. Plumbers are very busy. Brickmakers have burnt their first kilns, and have plenty of brick on hand.

Metal, engineering and shipbuilding trades.—Moulders are extra busy. The McClary Company has 125 of them at work now, and could employ about 10 more. During June, July and August they will get every second Saturday off, all day. Coremakers, machinists and boilermakers are busy. Linemen and electrical workers find business only fair. Metal polishers and stove mounters are rushed. The present McClary buildings do not give sufficient room for the company's rapidly extending trade, and new buildings are being erected for these branches of the trade. From the 1st of May till the end of August they will quit work at 12.45 on Saturdays. At the rolling mills two gangs are working night and day.

Woodworking and furnishing trades.—Carriage and wagon makers are very busy,

large shipments of their products being made to the North-west. At the Grand Trunk Railway car shops work is fair. Coopers are very busy.

Printing and allied trades.—The printing trade is in a flourishing condition, with no idle men in the city. The pressmen have held several meetings, and a charter has arrived and a union will be formed shortly. The trades are on their summer time schedule, quitting work at 12 o'clock on Saturdays.

Clothing trades.—Journeymen tailors are busy, overtime being the rule in most shops. Garment workers also are busy. Sterling Bros., who were burned out during the winter, will open their new shoe factory early in June, and will employ all their old hands.

Food and tobacco preparation.—Bakers are scarce in the city, and business is good. Cigarmakers are busy again, the trouble at Tuckett's factory having been settled by the Hamilton union withdrawing its new scale. The employees here returned to work on May 3.

Miscellaneous.—Broommakers report trade good, and brushmakers are extra busy. The wholesale houses are on summer time, quitting work at one o'clock on Saturdays.

Transport.—Street railway spare men have asked for an increase in their rate of pay, but it is expected that it will be arranged on a basis of longer hours. The regular men are satisfied. They receive 16½ cents per hour, and work 10 hours. The spare men get the same, but only work about half the time.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

May was characterized by activity in all branches of industry, and labour was in good demand. Building contractors report being somewhat handicapped by a scarcity of bricklayers and carpenters, and

predict that the season will be prolonged as a consequence. The railway companies report an active passenger and freight traffic. Retail business was normal during the month.

Regarding wages, the most important change reported was a 10 per cent advance granted by the J. H. Still Manufacturing Co. to a large portion of its staff, commencing May 15. The company advanced the 12½ and 15 cents per hour rate to 15 and 17 cents per hour.

A strike of twelve cigarmakers employed in the B. F. Honsinger Co.'s factory occurred on May 2. The cause of the dispute was a demand on the part of the men for an increase in the schedule price, ranging from 50 cents to \$1 per thousand on the various lines of work, the minimum rate paid being \$5.50 and the maximum \$10. The cigarmakers allege that the advance asked on these rates is the schedule paid by other union shops in the city. Negotiations looking to a settlement were in progress at the end of the month.

The proposal of the city council to purchase the St. Thomas Gas and Electric Company's plant was advanced another step during May, and a valuation of the company's works is being made in the interest of the city. A proposal to extend the St. Thomas street railway to Port Stanley was also discussed. A survey of the route and estimates of the cost of construction was ordered to be made by the city engineer. This question is now a live issue, inasmuch as the Southwestern Traction Co. is seeking an entrance for its radial road from London and district points into St. Thomas, and ultimately into Port Stanley. The company's line is already being constructed from Lambeth to St. Thomas, and negotiations are in progress for the arrangement of an entrance to and running powers over the lines of the city.

CONDITION OF PARTICULAR TRADES.

Manufacturing.—Local industries continue to enjoy favourable conditions. The demand for products is firm.

Railway construction and employment.—As reported last month, the season is a favourable one from the standpoint of the demand for labour. Men are being taken on at the car and locomotive shops when available, and the working hours have been increased from 54 to 55 hours per week. Since the changes the men work 10 hours per day and have a half-holiday on Saturday afternoons, instead of 9 hours daily. A very large gang is employed in laying steel rails on the west half of the Canada division of the Michigan Central Railway. The new rail is of the heaviest class, weighing 100 lbs. to the yard. The Canadian Iron and Foundry Co. has decided to build a car wheel plant; the old one being erected on leased land, the company were forced to rebuild. Arrangements have been made with the city council for exemption from taxation and water supply at manufacturers' rates. The company intends to build on a large scale and to increase its output by from 40 to 50 per cent.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades are every active, and a good demand prevails for all mechanics, especially carpenters and bricklayers. The city water commissioners have decided on making extensive improvements to the waterworks plant, at an estimated cost of \$14,000. A new dam, repairs on the reservoir, extension of mains, &c., are among the items which will furnish employment to a considerable number of workmen.

Metal trades.—Workers in these lines report continued favourable conditions. The M. C. R. Co. met with some difficulty in securing skilled workmen for its shops here, most of the men who were dismissed a short time ago having found employment elsewhere. The increased staff was necessitated by the receipt of large orders for new freight cars and locomotives.

Woodworking and furnishing trades.—Factory hands are busy, full time prevailing in all local establishments.

Printing and allied trades.—Printers report a steady month, with normal conditions prevailing.

Clothing trades.—Journeymen tailors and garment workers were busy.

Food and tobacco preparation.—Bakers and confectioners report a normal condition of trade. The cigar-making trade was disturbed by the strike in one of the local factories, but, with this exception, this class was busy.

Transport.—Little change occurred in the condition of those employed in the transport branch. Teamsters were very busy.

DISTRICT NOTES.

Port Stanley.—With the opening of navigation, conditions have become more active. The Père Marquette car ferry commenced operations between Conneaut and Port Stanley about May 1. The yard engine and crew also commenced the usual dock work for the summer.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions show a decided improvement over April, and, although the season has been rather late in opening, labour has been fairly well employed, with good prospects for a prosperous season. The building trades are fairly active, and considerable civic work is being done, such as paving, constructing cement sidewalks and sewers, &c. Manufacturing is fairly active, with the exception of the wagon works, some of whose hands have been laid off lately owing to lack of orders. A large armoury is to be built here in the near future, and a site has been selected in Tecumseh Park. There is no exceptional activity in any particular trade, although every one who wants to work can find it. The cordage factory, which was in difficulties some time ago, has had its affairs straightened out, and is now running full

time. Transportation by rail is normal. A great deal of lumber is being received by water. Wholesale and retail trade is fairly active. There were no changes in the rates of wages or hours of labour, and the labour market is free from unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have about finished their spring work. Complaint is made that the wheat sown last fall is winter-killed.

Manufacturing.—All manufacturing is fairly active. Local factories are running full time, and employing full staffs.

CONDITION OF PARTICULAR TRADES.

Building trades.—All men employed in the building trades were well employed.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers, electrical workers and linemen were fully employed. Blacksmiths, boiler-makers and sheet metal workers were all busy.

Woodworking and furnishing trades.—Carriage makers are all well employed. Coopers were fairly busy.

Printing and allied trades.—Printers, pressmen and bookbinders had a very good month.

Clothing trades.—Journeymen tailors were all fully employed.

Food and tobacco preparation.—Bakers and confectioners had steady employment, and cigarmakers were busy.

Leather trades.—Saddlers and harness-makers report trade fairly good.

Miscellaneous.—Barbers report trade very good. Clerks, stenographers and delivery employees were steadily employed. Laundry workers had plenty of work.

Transport.—Railroad men of all classes were fully employed. Longshoremen, cab drivers, carters, teamsters and expressmen had steady employment.

Unskilled labour.—This class of labour was in fair demand, the supply being about equal to the demand. Farm labourers, however, were somewhat scarce.

DISTRICT NOTES.

The Père Marquette Railway Company has erected a second coal hoist at *Rondeau Harbour*, and put in several additional switches to enable it to handle its increasing coal trade. The company has also in contemplation the putting on of a passenger steamer on the route between Cleveland and Rondeau this summer.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has improved considerably since April, and activity is now general. The paving contractors are hiring all the unskilled labour that they can get, and some large contracts were let during the month. The school board is about to erect three additional schools, two containing six rooms and the other 12 rooms, at an aggregate cost of \$45,000. A company from Preston is building a large plant for the manufacture of stoves, and expects to give employment to 50 hands to start with. The Standard Paint and Varnish Co. has a large gang of men employed rushing the construction of its works. When these are completed the establishment will be one of the largest of its kind in Canada. Large numbers of private houses are going up, and there need not be an idle man in the city. Wholesale and retail business men report trade good for the season of the year.

The plumbers and steamfitters' union has settled its troubles with the bosses, and is to receive \$3.25 per nine hours, an increase of 25 cents. There was some trouble also with the painters and paper-hangers, but it was of short duration and was settled satisfactorily to both parties. Ten union men in Piggott & Sons' planing

mills went on strike because the firm refused to discharge a man whom the union considered unfair. The men were out nine hours when the man was discharged.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With the exception of the fall wheat crop, prospects appear promising for the farmers this spring, as the crops are looking well. The radish crop, which Essex county is noted for, is very promising. Unless something unexpected happens, there will be abundance of fruit of all kinds, both in and around the city. At Harrow and Kingsville the peach crop is a failure, several trees having been killed last winter by the severe frost.

Lumbering.—Business is particularly active.

Manufacturing.—All manufacturing firms are well employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are very active just now, and there is a demand for skilled labour, especially for carpenters, bricklayers and masons. Painters and paper hangers are very busy, owing to the recent strike. The plumbers and steamfitters are behind with orders.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers had a fairly good month. Owing to the large number of teams working in the city at present, the blacksmiths, horse-shoers and wagonmakers are very busy.

Printing and allied trades.—Printers and pressmen report all men working.

Clothing trades.—Journeyman tailors are all working, but no great rush is on, as the busy season is over.

Food and tobacco preparation.—Bakers and confectioners report trade good. Cigarmakers and tobacco workers were fully employed.

Miscellaneous.—The barbers' union report men all working. The union recently fined one of the barbers \$5 for shaving on Sunday, in violation of a rule of the

union. There is a demand for girls to work in hotels and at general housework.

Transport.—All railroad employees are fully employed. Owing to the masters and pilots' strike there is not much activity on the river front, and the steamboat men and longshoremen are not very busy.

Unskilled labour.—There still exists a demand for unskilled labour..

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. Edward Barry, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Dullness has characterized the general labour market throughout May, the effect of the shut-down of the Consolidated Lake Superior companies in September, which resulted in 3,500 men being thrown out of employment, being still severely felt. The difficulties of the situation have been increased by the fact that in many cases the men have been unable to find similar employment in Canada. The fact also that a large proportion of those thrown out of employment had purchased property here, and could not dispose of it except at considerable loss, was a further feature which added to the general embarrassment. Three plants, however, the saw-mill, the veneering-mill and the mechanical pulp-mill, have been operated from early in November until the present time. In the last named 114 men are now employed, at an average daily wage of \$1.98, while in the veneer-mill the number employed is 100, at a daily average wage of \$1.59. The saw-mill is at the present moment closed down owing to lack of material, but a good deal of longshore work has been available for employees, and 14 men are still working on repairs, &c., at average daily wages of \$2.14. The Sault Ste. Marie Traction Co., which operates street cars and ferry boats, has also been in continuous operation, and the general office employs 41 persons, at an average daily wage of \$2.35. The lumber industry has also been partially oper-

ated, about 8,000,000 feet of timber and 800 cords of pulpwood having been driven down the Zoulais river, and about 250 men having been employed all winter, at an average wage of \$33 per month. None of the company's mines have been in operation, but it is understood that the Helen mine, at Michipicoten, has been placed in readiness for resuming shipments. The organization committee has declared its plant operative, and it is believed that the new company will take possession of the works very shortly.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are not active, though nearly all carpenters, bricklayers and masons are employed at good wages. The new post office building is still under way, stonecutters to the number of 10 receiving from 45 cents to 50 cents per hour, masons to the number of 13 receiving 45 cents per hour, and labourers to the number of 17 receiving from 17½ to 22½ cents per hour. Painters and decorators, and plumbers and pipe fitters, report conditions fair.

Metal and engineering trades.—Tin-smiths are well employed.

Printing and allied trades.—There are eight printers at present employed in Sault Ste. Marie.

Food and tobacco preparation.—Ten men are employed at the brewery here, of which two receive \$2.50 per day; four, \$2 per day; two, \$1.75 per day, and two \$1.50 per day. The capacity of the brewery is 15,000 barrels per annum, and trade is at present satisfactory.

DISTRICT NOTES.

Copper Cliff.—This place stands next to Sault Ste. Marie in industrial importance in the district of Algoma. Mining and the partial reduction of metalliferous pyrothite, are the chief industries, other occupations being subsidiary. All of the mines of the Canadian Copper Company are now in operation. The mines are rock mines, a formation seldom requiring the use of

cribbing. The company has about 2,000 men on the pay-roll. For unskilled or semi-skilled labour the daily wage ranges from \$1.50 to \$2.25. At present this is the only company engaged in mining on a large scale, the Mond Nickle Company being shut down. Exploratory work is being carried on in the Shakespeare gold mine near Webbwood, and the copper mine near Massey, originally owned by the Oxford Copper Company, but now controlled by the Canadian Copper Company, is working, the company having leased the two ore smelters owned by the Mond Company at Victoria, and reducing the product of their mines to matte at that place. The saw-mills on the north shore, especially at Blind River, are in active operation.

The general situation throughout the district at present is that unskilled labour finds, as a rule, a favourable market to any one accustomed to prevailing conditions. With regard to skilled labour, however, the supply, as a whole, is fully equal to the demand.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the latter part of April the labour market was in a state of congestion, and the same condition continued into the early part of May. The good weather, however, enabled contractors and employers to start construction work of various kinds, and this had the effect of absorbing very largely the labour that had accumulated in the city as a result largely of the backward condition of things following the late spring. The foregoing applies more particularly to unskilled labour. The trades generally have had steady employment, with one or two exceptions, and conditions continue to be good. Building operations continue very lively and are giving employment to a much larger number of men than last year, but there is no demand for men that cannot be fairly well met on the ground.

Manufacturing conditions are very active. Several concerns are starting, but not of such size as to give employment to many workpeople. The large subway on Main street, Winnipeg, is being now excavated, and the foundations for the new Canadian Pacific Railway depot and hotel are being put in. The contract has also been awarded for the erection of new and extensive freight sheds. The city also has commenced the operation of its asphalt plant for the summer, and large numbers of men are being employed preparing the streets for the asphalt dressing. Before the middle of April the work laid out to be done in this connection for the summer was well under way. No one trade could be selected as being exceptionally active. Conditions generally are excellent and prospects are of the brightest.

Commercial activity and expansion continues. Bank clearings show increases, and in all branches of business difficulty is found in keeping pace with the growth. Immigration is almost up to the exceptional volume of last year, and the effect of this is to stimulate business. Retail trade is proportionately as active as the wholesale. The weather has been favourable, and the growth of the city has caused a rapid expansion in the number of small retail stores.

Wages have, on the whole, remained stationary, though one or two small advances have been made. Some relief to the pressure for dwellings is found in the fine summer weather by many working-people resorting to tents for temporary shelter.

The only strike reported was one that affected about 20 employees in the tailoring trade.

According to the Assessment Commissioner a large increase in the valuation of property and in the population of the city has taken place during the past year. In round numbers, the assessment of the city is said to have increased by about 33½ per cent, and the population by about 20 per cent. The local assessment for the

year is placed approximately at \$14,000,000.

Construction work is now complete on five of the eleven shop buildings which are in course of erection for the C.P.R., though a large force of roofers, carpenters and painters are still at work on these. The resumption of work was delayed by flood.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—General reports are to the effect that crop conditions are excellent. Up to the present time, however, there is no accurate or official information procurable as to the exact amount of acreage under crop. Estimates by grain men and others place the acreage at a higher figure than last year. Although the exceedingly large quantity of water in the country prevented many, up to the present time, from getting in their seed, the total crop promises, from present indications, to be better than the average. The growth up to the end of May was excellent and has been favoured by frequent refreshing thunder showers.

Manufacturing.—The woodworking mills are all busy, and also the jobbing iron-work shops. Other industries in the city are also doing a good business.

Railroad construction.—Railroad construction is now practically in full operation, and men are daily leaving the city for that class of work.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are all busy. Up to the present time approximately \$3,000,000 worth of building has been permitted for the present year. In addition to this amount, many of the larger structures which are now being constructed received their certificates from the inspector last year. Some of the quarries have introduced stone-dressing machinery which, to some extent, has reduced the number of men that otherwise would have been required. With the exception of carpenters, all the tradesmen are fully employed and prospects indicate that they

will continue to be so until the end of the season.

Metal and engineering trades.—In the metal and engineering trades conditions are good, but there is apparently enough men on the ground, with the exception of those that have exceptional skill.

Woodworking and furnishing trades.—The large amount of building that is taking place accounts for the activity in the woodworking trades. The factories are running to their full capacity.

Printing and allied trades.—The printers continue to keep fully employed and all the offices are busy. The union reports very few men out of work and the future looks bright. A new photo-engraving establishment started recently and also one or two small printing offices.

Clothing trades.—The journeymen tailors and the garment workers are fully employed.

Food and tobacco preparation.—All the food and tobacco preparation factories are active. A new confectionery factory opened recently and another one is adding largely to its capacity.

Leather trades.—The saddlers are busy and the one wholesale factory in Winnipeg is running at full time.

Miscellaneous.—Broom-making and other miscellaneous branches are not sufficiently active to absorb the numbers seeking employment. There is always a number seeking any kind of indoor work that they can get, and the market seems to be continuously overstocked with such a class.

Transport.—Transport is increasing and requires the addition of men to the regular staffs. The opening of navigation at the lake ports has made the railway companies exceptionally busy.

Unskilled labour.—Unskilled labourers, willing to adapt themselves to any kind of outdoor work, can secure full employment. At the present time, however, there are enough on the ground.

BRANDON, MAN., AND DISTRICT.

Mr. W. P. Stringer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the opening weeks of May labour was not generally employed, owing chiefly to the very backward spring. Later, however, business in all lines of trade became active, and there is every prospect of general industrial activity, owing chiefly to the great building boom now in progress. Small houses, and outbuildings in particular, are going up all round with great rapidity. Considerable inconvenience has been caused by the rising of the Assiniboine river, which caused a temporary flood in the low-lying portion of the city. The water entered a number of houses occupied chiefly by the foreign element of the city. The two bridges over the Assiniboine river were rendered impassable, and farmers living north of the city were forced to come over in boats. A great deal of inconvenience and loss also resulted from the closing down of the electric light plant, owing to lack of water-power. Some of the smaller motor powers are being supplied by means of the fire engine, but some of the larger motors, as in the firm of Alexander & Law Bros., closed down. This is a serious loss to these firms, as the demand for their product is exceptionally good at the present time.

In general, the dwellings to be erected this year will be of a much better class than those erected last year. The tannery and fur-dressing establishment of this city is exceptionally busy. Orders now on hand are double those of any other year, and they come from all over Manitoba and the Territories. During the latter part of April commercial men found business dull, owing to the disagreeable weather, but with the opening of spring wholesale and retail trade is expected to be very active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Weather conditions prevailing throughout Manitoba and the west

were for the most part favourable, and farmers are making excellent progress with the season's seeding. Reports from 90 points on the lines of the Canadian Pacific Railway in Manitoba and the Territories indicate that there will be an increase in seeded area of $12\frac{1}{2}$ per cent. None of the points reported on show a falling off, though in several of them the area will be the same as last year. The Prince Albert, Manitoba and northern branches show the highest percentage of increases. In the whole of the district named seeding has been completed, and in several districts the grain is well sprouted and is showing above ground. Farmers are all well pleased, and anticipate, notwithstanding the lateness of the season, that with favourable weather, this season's crop will be a heavy one, as it has been in other seasons equally late in commencing. Farmers are busily engaged in preparing lands for other crops, and the indications are that the area devoted to coarse grains will be greater than last year.

Manufacturing.—Manufacturers are exceptionally busy. One firm states that its orders at the present time are double those of last year.

Railroad construction and employment.—On the main line of the Canadian Northern Railway work was stopped last fall at White Sand river. A large amount of material is now on hand there, and the line will be extended to Edmonton. It is intended to centre the greatest activity on this line, which is now rapidly approaching some of the finest lands in the Territories. Besides building this line the Canadian Northern Railway Company intends to do considerable other construction work. The new mileage to be added to the system this year will aggregate nearly six hundred miles.

CONDITION OF PARTICULAR TRADES.

Building trades. — Bricklayers and masons, carpenters and joiners, lathers and plasterers, were busy. Painters, decorators and paperhangers report trade good.

Plumbers were slack, but stonecutters and builders' laboures were active.

Metal, engineering and shipbuilding trades.—Machinists were busy, but reported no openings. Blacksmiths were fairly busy. With pattern-makers trade was good.

Printing and allied trades.—Printers and pressmen reported trade good.

Clothing trades.—Journeymen tailors reported trade satisfactory. Boot and shoe workers were busily employed.

Food and tobacco preparation.—Bakers and confectioners and butchers reported business good. Ice cutters and drivers reported trade very good.

Leather trades.—Tanners and curriers found trade very good.

Miscellaneous.—Barbers, clerks, stenographers and delivery employees found steady employment. Hand laundrymen were busy, but the steam laundries were closed through lack of water-power.

Transport.—All men engaged in transport business were very actively employed, with the exception of men running on freight, who find business slack. Teamsters and expressmen were busy.

Unskilled labour.—A considerable number of men were engaged during the last month in cleaning the city streets, &c. Quite a number were also employed on railroad construction in the city.

DISTRICT NOTES.

Seeding is nearing completion in all districts, the weather having been perfect for the work, and the prospects being good everywhere.

It is reported that the output of coal in the Souris river district is most satisfactory, and that the neighbourhood of Souris is being rapidly filled with a most desirable class of settlers.

The *Brandon Electric Light Company's* power dam, situated on the Little Saskatchewan, fourteen miles north-west of the city, was carried away by the recent floods, which is a serious loss to the company.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, correspondent, reports as follows:—

DISTRICT NOTES.

General activity exists throughout the Kootenay districts of British Columbia, and the situation in respect to the employment of labour is, on the whole, most satisfactory. Exceptions to the rule exist, of course, where temporary setbacks have intervened, but generally speaking expansion is in evidence in the principal industries, and is fulfilling the predictions ventured earlier in the year.

Rosslund.—In the Rosslund camp proper matters are temporarily in rather an unsatisfactory condition, due to unforeseen contingencies at the Le Roi mine, which is the principal employer of labour in the camp. Recently it was discovered that the increasing percentage of silica in the ore produced at the mine, and other features that are not fully developed as yet, had complicated the problem of reducing Le Roi ores, and the management concluded to partially suspend shipments for the present. The crew at the mine was reduced from 425 to 150, the latter being the number employed on the 23rd inst. The men laid off were principally skilled miners drawing the maximum wage, and the effect was serious from the local standpoint. Most of the men have gone to adjacent camps, Moyie in particular, where miners were required. In other respects the camp is progressing favourably. The White Bear mine has a crew of 30 carpenters at work on a 100-ton concentrator, and the Jumbo is just putting a force on a compressor building to be erected at the mine for new machinery just purchased. The Le Roi Company is figuring on a large milling works, and if the company's plans take effect this summer a very large number of men in the building trades will be employed. Considerable lumbering enterprises near the city are resuming operations after having closed down while the roads were broken up, and this gives employment to

75 or 100 men in the occupations incident to lumbering.

Trail.—The principal feature of the month in Trail was the practical completion of the Rossland Power Company's 200-ton concentrator, the largest work of its kind in Canada. About sixty men have been employed steadily in the building trades at the plant for the past six months, and these will shortly give place to the men who will man the plant in operation. The Canadian Smelting Works is operating steadily, and employing a large crew. This smelter is of special interest by reason of possessing the only electrolytic lead-refining plant in America.

Nelson.—A satisfactory feature of conditions in the Nelson section is the success attending the operation of various mines close to the city. At least one of these is now arranging to place a stamp mill on its property. A lumbering industry on a large scale is being established in Nelson, and recently iron works on a comprehensive basis were also opened. Nelson is experiencing a period of considerable prosperity, an indication of which is the absence of unoccupied houses throughout the city.

Boundary.—Mines and smelters throughout the Boundary district have been operating on a normal basis throughout the month, with few if any incidents of importance bearing on the labour question. It is practically assured that early in June a start will be made on the extension of the Great Northern tracks from Grand Forks to Phoenix, and from Curlew, Wash., to Midway, B.C. The commencement of this work will stimulate business, and give employment to a large crew of men.

Slocan.—The silver-lead mines of the Slocan are actively engaged in getting out ore, the Federal bounty on Canadian lead having had a marked stimulating effect. Although little activity in the building lines is reported, good miners are in demand at several points.

Lardeau.—Much interest centres about the operations in Poplar camp, where remarkable strikes of visible gold have been made in the past year. The mining prospects of the section have, as a rule, been closed down for the winter, but all are beginning to reopen for the summer work, and men are going to work daily. In other sections of Lardeau considerable mining activity is being displayed, and no idle men are reported.

East Kootenay.—In mining a very great improvement has taken place in the past month. The centre of this improvement is at Moyie, where the St. Eugene group of silver-lead mines has resumed operations, with a crew of approximately 250 men. At Kimberley the outlook is much better, as the outcome of the re-organization of the Sullivan mine on a basis that assures active operations on a large scale at an early date. The coal mines of the district are steadily increasing their output.

Fernie.—Marked inducements are offered for men in the building trades. The conflagration that wiped out the business section of the city has necessitated the rebuilding of scores of structures, and the work has been taken up with vigour.

Cranbrook.—Lumber shipments to Manitoba and the Territories are being made on an extensive scale, and most of the local mills are running to their full capacity. Business is exceptionally good for the time of the year. Mechanics are in good demand, and millmen and bushmen are making good wages.

Lumbering continues to give employment to a considerable number of men, although there has hardly been the increase in production expected earlier in the year.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the past month was very favourable, both skilled and unskilled labour being in demand. General activity prevails in the building trades. The British Columbia Distillery Company has purchased 60 acres of land and will commence to erect buildings thereon, to cost in the neighbourhood of \$75,000. The company has agreed with the city council to operate eight months of the year for 20 years; that the output will be 1,800 gallons per day; and that nothing but white labour will be employed. The B. C. Electric Railway Company has a large force of men at work on its line between this city and Vancouver. The company contemplates establishing a half-hour service by June 1. A large number of men are employed on the company's power dam at Lake Coquitlam. A large saw-mill plant is being installed, with a capacity of between 10,000 and 15,000 feet of lumber per day, to be cut for the construction of the dam; it is estimated that fully two million feet of lumber will be required for the work. As the new railway and traffic bridge at this point is nearing completion a large amount of work is under way for the railway companies in clearing and building right of way.

The only change in hours of labour during the past month took place at the provincial hospital for the insane, when about 40 attendants had their hours of labour increased from 12 hours to 12½ per day, with no remuneration for the extra time. The matter was laid by the men before the government, but up to the present no alteration or settlement has been made.

Recent quotations from the local markets are as follows:—Beef, hindquarters, 8 to 9 cents per lb., forequarters, 6 to 7 cents per lb.; mutton, carcass, 9½ to 10 cents per lb.; veal, small carcass, 9 to 10 cents per lb.; veal, large, 7 to 8 cents per lb.; potatoes, \$1 to \$1.25 per sack, or \$20 per ton; carrots, 75 cents per sack; parsnips, 70 cents a sack; mangolds, \$8 per

ton; butter, 25 to 30 cents per lb.; eggs, case lots, 22½ to 23 cents, per dozen, retail, 25 cents per dozen; ducks, \$9 to \$10 per dozen; fowls, \$6 to \$7.50 per dozen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Spring seeding throughout the district is about finished, and a scarcity of farm help is noticeable.

Fishing.—Spring salmon fishing continues fairly good, a large amount being shipped east daily. Work is now well under way at all the canneries in can-making for the season's pack of salmon.

Lumbering.—The Brunnette Sawmill Co. has installed a new line of machinery for making salmon boxes, and has shipped its first lot of 20,000 salmon cases to the northern canneries.

Mining.—The Iowa Lillooet Gold Dredging Co., operating a dredge at Lillooet, recently handled 4,000 cubic yards of dirt in 24 hours, and washed enough to prove that the gold product will average one thousand dollars a day.

Railroad construction and employment.—A large amount of work is under way, and there is every likelihood of a busy season.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of these trades are very busy, with a demand for painters, carpenters and plasterers.

Metal, engineering and shipbuilding trades.—These branches report work very good, and all men working full time, with orders ahead. Tinsmiths were in demand. Caulkers and shipwrights report work fairly good during the past month, with prospects of a good season. Car builders report employment good, several new men being engaged during the past month, and a demand exists for carriage and wagon makers.

Printing and allied trades.—This branch is exceptionally busy, a large amount of job work being carried on.

Food and tobacco preparation.—The cigar factories here are very busy, several men finding employment during the past month.

Unskilled labour.—Work is plentiful, with prospects for a good summer.

DISTRICT NOTES.

The number of small holdings that have changed hands lately near New Westminster is on the increase. Real estate agents report a large influx of settlers seeking land.

Port Moody.—Several fine residences have been erected. There has been a considerable increase in the number of men employed in the Canadian Pacific Lumber Company's mill.

Enderby.—Building operations are proceeding apace, a large number of new houses being erected, also a new business block (69 x 69), of brick. The Mill Company, which has been making improvements to its mill and plant, has commenced cutting again, and is prepared to cut in the neighbourhood of 60,000 feet per day. The company has extensive timber limits and employs a large number of men all the year round.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Work has been fairly plentiful in practically all lines, excepting in the lumber industry. The local demand for lumber, however, is active, and the closing down of the mills is regarded as the result of lack of trade in the outside market, or the necessity of repairs to machinery. The supply of common labour far exceeds the demand. This may be attributed to the fact that in the neighbouring state of Washington there are large numbers of men out of work, and more tramps than in the last ten years. The number of workmen moving to and fro is partially explained by the closing down of many logging camps and saw-mills. Labourers em-

ployed in these lines in Washington state are moving either eastward in that state or are coming here. It may be added that from 70 to 100 people are arriving weekly from the United States to take up their residence here. False reports have been sent out from the Sound cities that extra men are needed for railroad work, and this also accounts for a large number seeking employment. The only new industry starting is the saw works. The work now going on in the building lines is limited to the construction of houses and stores.

Construction of the steel frame work of the new floating dry-dock to be installed at this port is stated to have been commenced in London, Eng. The structure, it is said, will cost over \$1,000,000, and arrangements for financing the scheme are progressing favourably.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—According to reports from the Fraser valley districts and the Delta, including Lulu and Sea islands at the mouth, the prospects are for good crops.

Fishing.—About 400,000 pounds of hali-but are shipped weekly from this port. The Chinese Cannery Union was reported to have disbanded in May.

Lumbering.—This industry is quiet.

CONDITION OF PARTICULAR TRADES.

Building trades.—About 100 bricklayers and masons are being employed, and prospects look favourable. Five hundred and fifty carpenters and joiners are working, and the outlook is promising for the season. Lathers and plasterers report that 30 plasterers and 20 lathers are at work, with the demand for men good at present. Painters report work plentiful on old residences. Plumbers and stonecutters report trade fair. Builders' labourers state that work has been very slack, and that the prospects are discouraging.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers, core-makers, machinists and engineers report

work as fair. The strike in the Vancouver Engineering works is still on, and this, in a measure, accounts for the trade being good with other similar concerns. Electrical workers are fairly well employed, but there is no demand for men.

Woodworking and furnishing trades.—In these trades business is reported fair, especially in the carriage and wagon business. Shingle weavers report trade dull.

Printing and allied trades.—Business is only fair. Heretofore the month of May has been considered one of the busiest, but this year the volume of work for April has exceeded that of the present month. There are a few idle printers.

Clothing trades.—With the clothing trades business has not been fair, i.e., with the white firms of tailors. The Japanese concerns were busy.

Food and tobacco preparation.—Cigar-makers report trade good, and all hands employed. Bakers are all at work. The new co-operative bakery is running to its full capacity.

Leather trades.—Harness dealers report good sales.

Transport.—A big business is reported with the transport concerns, and the full complement of men is working.

DISTRICT NOTES.

Howe Sound.—The Britannia Mining Company is constructing a wharf at tide-water and a gravity tram to the mines, a distance of three miles.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during May was satisfactory, there being very few unemployed, though the supply was quite equal to the demand. The contract for the new wharf to be erected by the Canadian Pacific Railway Company has been awarded, and work will soon be

commenced. This work will give employment to a large staff. The street railway company will soon begin work on the extension of its system. Merchants, both wholesale and retail, report business good. Journeymen tailors have received a slight increase in wages during the month, and journeymen barbers have been granted a reduction in hours without a reduction in pay. These were the only changes made, and are on an unusually small scale when compared with the demands made in previous years. Generally harmony prevails between employers and employees.

A special committee appointed by the board of trade to report on the conditions under which crews are at present shipped on foreign-going vessels in British Columbia ports, reported that the regulations now being enforced are prejudicial to the interests of Canadian trade on this coast, and must inevitably work in favour of United States ports. The shipping masters will not undertake the responsibility of finding crews for outgoing vessels, and captains are not permitted to employ any other person to assist them in securing crews. The extra cost involved by this course has caused a discrimination in freight rates against British Columbia, and it has also resulted in vessels obtaining their sea stores in the United States ports instead of at the British Columbia loading port. The committee is of the opinion that a continuance of the practice of boarding house masters charging a moderate fee for securing crews in British Columbia ports would be to the advantage of seamen and all other parties concerned, and recommend such amendment of the regulations as will permit this.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Part of the sealing fleet has returned to port from the winter cruise, and reports a very good catch. Five schooners left during the month for Copper Islands. Preparations are being made for the erection of fish traps on the southwest coast of Vancouver Island, but for this coming season no great activity is

expected, as the cannery anticipate a small run and are preparing only for a short pack.

Lumbering.—Lumbermen are complaining of the unsatisfactory condition of the lumber trade between this province and Manitoba and the North-west Territories. On the 13th instant a deputation from the mainland waited on the Victoria board of trade, to ask the co-operation of that body in sending a deputation to Ottawa, to interview the Dominion government on the subject.

CONDITION OF PARTICULAR TRADES.

Building trades.—Activity prevails in every branch of the building trades. Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, decorators and paperhangers, plumbers, stonecutters and builders' labourers are all fully employed. While trade is brisk in all the above branches there seems to be no demand for extra help.

Metal, engineering and shipbuilding trades.—Conditions are normal in these trades. Iron moulders, machinists, steam engineers, electrical workers and linemen, blacksmiths and boilermakers report employment good. Shipwrights and caulkers are only partially employed.

Woodworking and furnishing trades.—In these trades employment is limited, but those engaged are busy. Carriage and wagon makers report trade good.

Printing and allied trades.—Printers, pressmen and bookbinders were well employed; at times there was a demand for more printers.

Clothing trades.—Journeymen tailors were fairly well employed. Garment workers are still busy, and the factories are continually adding machinery to their plants.

Food and tobacco preparation.—Bakers, butchers and cigarmakers report conditions as active.

Leather trades.—Harnessmakers are very busy.

Miscellaneous.—Barbers were well employed, and were granted a reduction in working hours of an half hour per day. Laundry workers were in demand.

Transport.—Steamboatmen, steamboat firemen, longshoremen, street railway employees, hackmen, teamsters and expressmen report conditions active.

Unskilled labour.—Work is sufficient to keep unskilled labour fully employed.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district during May has not shown much change as regards employment. In some trades improvement was shown, but this was off-set by a large number of men being thrown out of work by the burning of the local saw-mill. The Western Fuel Co. is still employing a number of men about its new mine putting up buildings and wharfs. Work has been started in getting out stone for the addition to the post office, which will give employment to a number of men soon. In commercial circles there is little change from last month.

There have been no changes in rates of wages during the month, and the labour market is free from unrest.

On the night of the 12th of May the saw-mill in this city was destroyed by fire, throwing about 100 men out of employment. It is not known as yet whether the proprietor intends rebuilding or not. The destruction of this mill, which was a thoroughly equipped plant for general lumber, with a shingle mill just put up last year, will prove a great loss to this place, as the company was just commencing to work up a large business in cedar, having a man in the North-west getting orders, with every prospect of a good season's run.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is very little doing in the fishing industry outside of the supply for the local market.

Lumbering.—In the lumber camps work is fair, but is not busy for the time of year. The mill at Chemainus is working steadily.

Mining.—In the quartz-mining districts work is fair and there seems to be some prospects of an early improvement in the Alberni and West Coast districts. In the coal-mining camps work is steady, with a good deal of development work going on, but there are men enough to fill all demands.

Railroad construction and employment.—There is no railroad construction on, outside of the additions and usual spring improvements to the coal companies' roads.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, stonecutters and builders' labourers report very little doing. Carpenters report work during the month as fair. Painters report work during the month as good.

Metal, engineering and shipbuilding trades.—Blacksmiths report work good.

Woodworking and furniture trades.—With carriagemakers work was not up to the average.

Printing and allied trades.—Work is steady.

Clothing trades.—Business was up to a fair average. Boot and shoe workers report business as improving.

Food and tobacco preparation.—Cigar-makers report employment as fair.

Transport.—Teamsters and expressmen had a very fair month.

Unskilled labour.—There has been little demand for unskilled labour.

DISTRICT NOTES.

Work is steady at the mines at *Lady-smith* and *Cumberland*, and the smelter at the former place is running steadily. The farmers in the district are taking steps to get a regular market for their vegetables so as to regain the business from the Chinamen, who have controlled it for some time.

ROYAL COMMISSION TO INVESTIGATE ALLEGED EMPLOYMENT OF ALIENS BY THE GRAND TRUNK PACIFIC RAILWAY COMPANY.

ON May 23 a Royal Commission was issued to His Honour Judge Winchester, of Toronto, to inquire into the alleged employment of American aliens in connection with the surveys of the Grand Trunk Pacific Railway. For some time previous representations had been made to the government by the Dominion Institute of Amalgamated Engineering, and from other sources, to the effect that citizens of the United States and non-residents of Canada were being employed to the exclusion of Canadians and British subjects. On the receipt of these complaints the officers of the company were communicated with, and subsequently lists of persons alleged to be American aliens in the employ of the company were forwarded to the management, with the

request for a definite statement as to whether or not the persons therein named were Americans, and at what time they had been brought into Canada and given employment in connection with the survey work of the company.

Several communications having passed between the hon. the Minister of Labour and the management of the company, and the government having failed to receive satisfactory replies to its communications; also it being evident from such replies as were received that there was a conflict of statement between the complaints made against the company and its replies, the Minister of Labour recommended to His Excellency in Council the appointment of a commission to inquire fully into the facts.

Scope of the Commission.

The commission issued to Judge Winchester on May 23 is comprehensive in its terms. The commissioner is directed to ascertain the names, nationality, nature and time of employment, remuneration, and actual *bona fide* place of residence at the time of employment of each of the persons heretofore or at present employed in connection with the surveys of the proposed Grand Trunk Pacific Railway, and also as to the names of all Canadians or *bona fide* residents of Canada who had made application for such employment, the nature of the employment applied for, and the result of such application. The commissioner is empowered to summon before him any witnesses and to require them to give evidence on oath, and to produce such documents and things as may be requisite for a full investigation into the matter into which he is appointed to examine. The commissioner is required to report to the Minister of Labour the result of his investigation, together with the evidence taken before him, and any opinions he may see fit to express thereon.

Opening Sitzings of the Commission.

After due notice, published in the press, His Honour Judge Winchester entered upon the inquiry, and proceeded to take evidence under the commission at Montreal on the 30th of May. During the course of the inquiry at Montreal the general manager of the Grand Trunk Pacific, Mr. Charles M. Hays, Mr. J. R. Stephens, assistant chief engineer of the company, and other prominent officials, were examined. The commissioner also

spent some time at the company's offices, examining the files of applications which had been received, and other records having a bearing on the matter of investigation. The inquiry at Montreal was concluded on the 1st June, and the commissioner left on the day following to continue the sittings of the commission at the city of Winnipeg.

Almost immediately after the commission had commenced its sittings at Montreal, Mr. H. M. Mowat, K.C., of Toronto, was appointed counsel to represent the government before the commission, the desire of the government being to have the inquiry as complete and thorough as possible. The company was represented at Montreal by Mr. W. H. Biggar, K.C.

At the opening session of the commission, Judge Winchester announced that he desired to make the investigation full and complete, and that he would be happy to receive evidence from any outside source of a reliable character. He wished all parties to feel perfectly free to come forward and give evidence. The official notice in the press also stated that the commission would welcome evidence from any source which would throw light on the matter of investigation. With a view to furthering this purpose it was the intention of the commissioner to hold sittings at Winnipeg, Edmonton and North Bay during the month of June, and at such other points as might appear necessary or desirable.

Mr. G. G. V. Ardouin, of the staff of the Department of Labour, is acting as reporter to the commission.

SALMON FISHING REGULATION IN BRITISH COLUMBIA.—THE USE OF TRAP NETS PERMITTED.

FOR some time past representations have been made to the Dominion government to the effect that certain changes were required in the regulations applying to the salmon-fishing in-

dustry in British Columbia, whereby the operators of canneries in that province might be placed in a better position to meet the demands of the market, with more particular reference to the competi-

tion of American manufacturers located on Puget Sound. The chief privilege asked for in these representations was that the use of trap nets should be permitted. The points urged in favour of this proposal were its comparative cheapness and the fact that it would enable the Canadian packers to fish the salmon schools on their first arrival in British Columbia waters off the coast of Vancouver Island prior to their depletion by the American trap nets located on the coast of the state of Washington along which the fish subsequently passed on their way to the estuary of the Fraser. It was with this question, and the kindred one of the use of purse-seines, that the special fisheries commission appointed by the Dominion government in 1901, was chiefly concerned, holding several sessions during 1902 and reporting in May, 1903.* No action, however, with regard to the trap nets followed the work of the commission, though the use of purse-seines was permitted as an experiment during the season of 1903.

Use of Trap Nets, Purse-seines and Drag-seines Permitted.

During the past winter season representations were again addressed to the Department of Fisheries, Canada, with the object of securing the change in the regulations above referred to, with the result that, after careful consideration of the needs of the situation, the Order in Council of March 3, 1894, which previously set forth the general fishery regulations for the province of British Columbia, was amended by an Order in Council dated May 2, 1904, allowing of the change in question. The amendment referred only to section 5 of the regulations of 1894, which provided that no nets other than drift nets should be used for catching salmon of any size. This section is now rescinded and the use of purse-seines, drag-seines and trap nets permitted under cer-

tain defined conditions. The more important of these conditions are as follows :—

Granting of Licenses.

The use of purse-seines, drag-seines and trap nets is permitted only under license, and strict conditions are enjoined before the granting of such license is made. Every applicant for a license must be a British subject resident in Canada and must furnish satisfactory evidence of his *bona fide* intention to use the privilege for which he applies. The application for a license must be accompanied by a 'marked' check for the amount of the fee, which for a trap net is \$75, for a purse-seine \$50, and for a drag-seine, \$25. Fishermen may only obtain one trap net, purse-seine or drag-seine license, and cannery operators not more than four such licenses for each establishment operated. Various conditions are imposed regarding the transfer of licenses. All applications for licenses must be made before June 1 of each year. Salmon taken in trap nets must be put up in Canada, the exporting of fresh salmon for canning or other process of manufacture being punishable by cancellation of the license. Nets and fishing boats must be numbered and must have the initials of their owners painted thereon in such a way as to be visible at all times, under penalty of seizure and confiscation by any fishery officer. No purse-seines, drag-seines or other fishing gear may be fished with within two hundred and fifty fathoms of any trap unless they be those of the owner of the trap.

Licenses may be granted to persons about to construct a cannery on the condition that the establishment in question is completed and properly equipped within one year after the date of the application for the license. Failing this completion all claim to priority is forfeited.

Size of Traps and Seines.

Purse-seines must not exceed five hundred fathoms in length; drag-seines, three hundred fathoms, and trap nets, two

* For reports of the proceedings and findings of this Commission, see the *Labour Gazette* for March, 1902. Vol. II, p. 532, and for June, 1903, Vol. III, p. 976.

thousand five hundred feet. The mesh of purse-seines and drag-seines must not be less than $3\frac{1}{2}$ inches extension measure, and of trap nets not less than $2\frac{1}{2}$ inches extension measure. The mesh of the trap net leader must be of not less than six inches. Hearts, cribs, pots, &c., must be of moderate size and must not extend unduly from the leader.

Location of Traps.

With regard to trap nets the location must be definitely described on the license. Locations must be at least four hundred fathoms apart. The use of trap nets and seines is prohibited within three miles of the mouth of a navigable river or within half a mile of the mouth of a salmon stream, or in any special locality named by the Department of Fisheries.

Infraction of the above regulations is punishable by cancellation of the privileges they convey.

IRRIGATION PROJECT OF THE CANADIAN PACIFIC RAILWAY COMPANY, CALGARY DISTRICT, ALBERTA.

The following statement with regard to the project of the C.P.R. Company for the opening up to settlement, by means of irrigation, of a large tract of land in the neighbourhood of Calgary, Alta., has been supplied to the Department by the courtesy of the Superintendent of Irrigation in charge of the work of construction.

The irrigation project of the Canadian Pacific Railway Company at present under construction in Alberta embraces a block of three million acres of land lying east of Calgary, which is intersected by the main line of the Canadian Pacific Railway. The soil in this vast area is first-class, but during the majority of years the rainfall is not sufficient to mature crops.

The water for irrigation in this block is being taken from the Bow river near Calgary in a main canal, having a bed width of sixty (60) feet, and carrying water to a depth of ten (10) feet. This main canal is about twenty miles in length, and from it the water will be distributed through a system of secondary or smaller canals which will ultimately reach several hundred miles in length.

The surveys so far completed indicate that about one-half the block, or 1,500,000 acres can be irrigated, and the remaining one-half will be devoted to grazing and dairy farming.

The first section of the undertaking, which is now in hand, included the construction of the main canal and about one hundred miles of secondary canals, and this section will irrigate and bring under cultivation 300,000 acres and open up an additional 500,000 acres for grazing and dairy farming. The section of the scheme which is now being proceeded with is estimated to cost \$1,300,000, and if it proves a success, further sections will be added from time to time until the whole scheme is completed at an estimated cost of between four and five million dollars.

Work on the construction of the main canal has been commenced. The completion of this main canal involves the moving of about $2\frac{1}{2}$ million cubic yards of earth, and the work is being done with power plant, including steam engines which operate large power scrapers moving from four to eight yards of earth at each trip. In addition, some powerful elevating scrapers which are operated with ten teams of horses, are being worked, the material from these scrapers being delivered by special dump wagons. A large force of men is being employed along the line of the canal, and the work now in hand will take about one year to complete.

WESTERN ONTARIO LABOUR EDUCATIONAL ASSOCIATION—SECOND ANNUAL CONVENTION.

THE second Annual Convention of the Western Ontario Labour Educational Association held its opening session at Berlin, Ont., on the evening of May 23. About fifty delegates were present, representing the Trades and Labour Councils of Sarnia, London, Stratford, Woodstock, Berlin, Galt, Guelph, Brantford and Hamilton; local unions at Hespeler, Preston, Elmira, Welland and St. Mary's, as well as at the points above mentioned, were also represented. The meeting was a most successful one, being characterized throughout by rapid despatch of business.

Reports of Committees.

The report of the finance committee showed an income of \$615.69, and an expenditure of \$555.25.

The report of the editor of the *Industrial Banner*, the official organ of the association, showed an increase in the circulation since the holding of the last convention amounting to two thousand copies.

The President's address recommended several changes in the constitution, having the effect of extending the scope of the association. These were adopted substantially as offered.

Changes in the Constitution.

In view of the fact that the *Industrial Banner* has now a considerable constituency of subscribers in the province of Quebec, it was decided to change the name of the association to *The Labour Educational Association of Canada*, dropping the term "Western Ontario".

The association, it was decided, will rigidly confine its activities to the sphere of education, thus avoiding possible conflict of jurisdiction with the Trades and Labour Congress of Canada.

A resolution was unanimously carried to amend the constitution so as to grant representation in the association only to such unions as are eligible to representation in the Trades and Labour Congress of Canada, thus excluding independent or national unions in localities where Internationals exist.

Other Resolutions.

It was decided to establish a literature and lecture bureau from which speakers might be furnished from time to time to trades councils or unions desiring to hold special or open meetings.

All International union labels were endorsed.

The question of sending one or more representatives to Great Britain to combat alleged misrepresentation of labour conditions in Canada was dealt with by a special committee, which reported in favour of the proposal and that action should be taken immediately. A committee to raise funds for this proposal was appointed.

Power was given to the Executive Committee to enlarge the *Industrial Banner*.

Election of Officers.

The following officers were elected for the ensuing year: President, Stephen L. Clark, Galt; first vice-president, A. J. Voegelé, Berlin; second vice-president, Joseph T. Heintzman, Stratford; third vice-president, Daniel Bolender, Guelph; secretary-treasurer, A. E. Starr, Woodstock.

The next meeting will be held at Galt, on Victoria day, 1905.

THE ELECTRO-THERMIC PROCESS OF IRON ORE SMELTING AND STEEL MANUFACTURE—PRELIMINARY REPORT OF THE SPECIAL COMMISSION OF INVESTIGATION.

THE special commission appointed by the Dominion government on December 22, 1903, to inspect the various plants in Europe that are using the electro-thermic process for the smelting of iron ores and the making of steel, presented its preliminary report to the hon. the Minister of the Interior during the past month. A copy of extracts from the report was received at the Department of Labour during May, and the following brief reference to the proceedings of the commission during its investigations in Europe and its conclusions drawn therefrom are based upon the information thus obtained.

Places Visited.

The report sets forth the following facts with regard to the different places visited by the commissioners:

Gysinge, Sweden.—Steel of superior quality was found to be manufactured here by the smelting together of charcoal-pig and scrap in an electric furnace of the induction type, a process corresponding to the crucible steel process, but without exposing the melted materials to gases. The furnace produced on an average four tons of steel in twenty-four hours, at a cost of \$1.16 per ton.

Kortfors, Sweden.—The Heroult process of making steel is in operation here, but the furnace is at present employed in making ferro-silicon.

La Praz, France.—Steel is made here from melted scrap, as at Gysinge, but the process permits of the purification of the material employed. The furnace is of the tilting pattern, two electrodes passing through water-cooled joints in the roof. Different classes of steel are made, at a cost of \$1.50 per ingot. Interesting experiments were made for the commission in the production of pig iron from the ore.

Turin, Italy.—The furnace built for the Italian government here was found not to have been in operation for several months. Permission was obtained from the Italian government to inspect the furnace.

Livet, Italy.—The most important experiments witnessed by the commission were those made by Keller, Leleux & Co., of Livet, some 90 tons of iron ore being used to demonstrate the economic production of pig iron by the electric process. The furnace employed is of the resistance type, fully described in the report of the commission. The electric current passes from one electrode through the metal to be reduced to a carbon block, then outside of the furnace by a copper conductor to another carbon block, through the charge, and thence to a second electrode. An ingenious arrangement enables the furnace to be worked continuously. Three sets of experiments were made for the commission, the first demonstrating the electric reduction of iron ore to different classes of pig, the second being conducted with a view of ascertaining the amount of electric energy absorbed in the production of a ton of pig iron, and the third showing the manufacture of original steel of good quality from pig-iron manufactured in the preceding experiments. The experiments were thoroughly successful, the workmen employed being ordinary Italian labourers without any special training. Castings made from the metal showed sharp edges and a smooth surface, and were sound throughout. The electric energy absorbed per ton of pig-iron was found to be 226 horse-power years. The cost of producing a ton of pig-iron, including ore, coke, lime, labour, electrical energy, &c., was found to be \$10.60.

Other processes, with regard to which papers have been published and patents obtained, were found to have as yet no

plant in operation by which their methods might be tested.

Conclusions.

The conclusions of the commission, as based upon the above observations, were set forth as follows :—

It must be pointed out that the results obtained at Livet were the results of experiments in furnaces not specially adapted to the work required to be done. With the improved furnaces, of which the Commission has secured detailed drawings, permitting, on account of higher column of charge, a more effective use of the reducing power of the carbon monoxide evolved and the employment of machinery for charging the furnace to reduce the cost of labour, a much better figure than the one given may be expected.

Processes of electric smelting must as yet be regarded as in the experimental stage, no plant existing at present where iron ore is commercially reduced to pig by the electric process. The more remarkable, therefore, it appears that experiments made off-hand, so to say, in furnaces not at all designed to be used for the production of pig should give a figure of cost which would enable an electric plant

properly designed and managed to compete with the blast furnace. It is, moreover, reasonable to expect that as experience in electric smelting accumulates, the design of the electric furnace best suited to the conditions of the high temperatures with which the metallurgist has to deal will undergo changes which will reduce the absorption of electric energy to a minimum. The electric engineer will also be called upon by the new industry to design electric plants specially suited to the conditions of electric smelting. When it is considered that the electric process is applicable to the smelting of all other ores, such as copper, nickel, silver and so forth, that the furnaces are of simple construction and the regulation of the heat supply under perfect control, we may expect that the application of electric energy to the extraction of metals from their ores will not be long delayed and that familiarity with handling large currents and experience gained in electric smelting will result in displacing some of the costly and complicated methods by comparatively simple and economic processes. The immediate effect of a plant erected for the smelting of iron ores which will demonstrate the economic production of pig and the making of steel will arouse the faith of the industrial world in the new metallurgy and other industries dependent upon electricity as the agent, or to which electricity can be applied, will follow as a consequence in the wake of this pioneer plant.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

DURING May the influx of immigrants into Canada was on an exceptionally heavy scale, and it is now anticipated that the present year's return will exceed or equal that of 1903, which in turn showed a vast increase over all previous seasons. The increase was especially noticeable in the number of arrivals from the British Isles, the number leaving Great Britain this year for Canada exceeded those leaving for the United States. Several difficulties tended, on the other hand, to impede the securing of immigrants from the continent of Europe. Steamship companies are now advertising that many steamers to sail have full passenger lists.

With the opening of the St. Lawrence river to navigation, the majority of immigrants were landed during May at Quebec. The arrivals on May 16 alone reached a total of 4,013, and on several other days exceeded 2,000. The majority of these were booked directly through to Winnipeg for distribution in western Canada, and consisted almost exclusively of strong and

healthy individuals, many of whom were sufficiently provided with funds to enable them to begin farming at once on a satisfactory basis. A small proportion of skilled artisans was among the number.

The immigration of farmers from the United States is being actively encouraged, more particularly in view of the counter attractions now being offered to this class within the boundaries of the United States.

Returns of British Immigration during April.

The following is a classification of the immigrants who left British ports for Canada during April :—

| Nationality. | Number of Immigrants. |
|-------------------|-----------------------|
| English | 7,699 |
| Irish | 487 |
| Scotch | 2,280 |
| Foreign | 2,260 |
| Total | 12,726 |

For the first four months of the present year the arrival of immigrants numbered 15,693, as against 14,738 for the same period in 1903. The arrivals from the continent of Europe numbered 10,268, as compared with 11,382. Statistics furnished by the British Board of Trade show that out of a total number of 36,563 immigrants leaving the British Isles for the colonies since January, 22,599 were reported as sailing to Canada, and though a total decrease of 5,000 is shown for the four months, as compared with 1903, there is an increase of over 1,000 from the British Isles to Canada. The returns include all classes of travellers.

Notes of the Month.

Up to the 20th of May 59 special immigrant trains had arrived in Winnipeg from Montreal.

The subject of colonization was discussed at some length in the Quebec legislature during the month.

One hundred domestic servants from the north of Ireland and Scotland were among the arrivals of the month.

A party of 131 Quakers arrived at Montreal on May 25 from England, 60 of the party being destined for Winnipeg and the balance for Saskatoon, N.W.T.

Some complaints were received from a number of Scottish immigrants who had been given fraudulent agreements for employment in Toronto.

The new Quebec immigration hospital received its first contingent of detained immigrants during May, 28 immigrants being brought from St. John on May 1.

The Department of Immigration of British Columbia received notice from the Agent General of the province in London that a party of upwards of 250 persons, most of whom possess capital, is about to start for British Columbia.

A party of 500 French immigrants, it is stated, will sail from Bordeaux during June for Manitoba and the Territories. A party under the direction of the Dominion immigration agent in Paris sailed on May 15.

Reports submitted to the Colonization Society of Montreal during May showed that the outlook for colonization in the northern sections of Quebec was very favourable this year.

A circular letter warning people not to immigrate to Canada without serious previous consideration was sent to the Scottish newspapers by the Winnipeg Trades and Labour Council during May.

The Lake St. John Colonization Society held its annual meeting in Quebec during May, with about 800 members present. The annual report of the society showed that 2,927 new settlers were sent into the Lake St. John district last year. An attractive settler's guide has been issued by the society.

According to the statistics published by the Ontario Commissioner of Crown Lands, 12,725 settlers bought tickets in Great Britain during 1903 to Toronto and points west of Toronto in Ontario. In 1902 the number was 5,567, and in 1901, 2,520. The total over-sea immigration to Ontario in 1903 was 17,056. Land sales to actual settlers during the year averaged 168 acres for 509 farms, or a total of 81,440 acres. There were also free grant locations amounting to 1,383 farms, or 220,960 acres, and 2,000 military land grants of 160 acres each.

Homestead Entries for April, 1904.

The following statement, published by courtesy of the Department of the Interior, Canada, shows the number of homestead entries, according to the various agencies, made during the month of April, 1904, as compared with the month of April, 1903:—

TABLE OF HOMESTEAD ENTRIES FOR APRIL.

| Agency. | 1904. | 1903. | Increase. | Decrease |
|-------------------|-------|-------|-----------|----------|
| Alameda..... | 91 | 185 | | 94 |
| Battleford..... | 146 | 116 | 30 | |
| Brandon..... | 33 | 51 | | 18 |
| Calgary..... | 388 | 373 | 15 | |
| Dauphin..... | 27 | 39 | | 12 |
| Edmonton..... | 183 | 465 | | 282 |
| Kamloops..... | 18 | 7 | 11 | |
| Lethbridge..... | 251 | 248 | 3 | |
| Minnedosa..... | 15 | 51 | | 36 |
| New Westminster | 4 | 3 | 1 | |
| Prince Albert.... | 130 | 388 | | 258 |
| Regina..... | 573 | 1,273 | | 700 |
| Red Deer..... | 123 | 216 | | 93 |
| Winnipeg..... | 40 | 159 | | 119 |
| Yorkton..... | 300 | 2,204 | | 1,904 |
| Total | 2,322 | 5,778 | 60 | 3,516 |

It will be seen that there has been a net decrease in the number of homestead entries made during April, 1904, of 3,456. The reason for this decrease is on account of 1,716 entries having been made during the corresponding month last year at the Yorkton agency by the Doukhobors.

A statement of entries made during the first ten months of the fiscal year 1903-4 is as follows :—

STATEMENT OF HOMESTEAD ENTRIES, JULY-APRIL.

| Month. | 1903. | 1902. | Increase. | Decrease. |
|----------------|--------|--------|-----------|-----------|
| July..... | 3,438 | 2,622 | 816 | |
| August..... | 2,288 | 1,904 | 384 | |
| September..... | 1,845 | 1,416 | 429 | |
| October..... | 1,958 | 2,142 | | 184 |
| November..... | 2,406 | 2,482 | | 76 |
| December..... | 1,570 | 1,640 | | 70 |
| | 1904. | 1903. | | |
| January.. | 1,240 | 1,109 | 131 | |
| February.. | 1,128 | 1,165 | | 37 |
| March..... | 1,330 | 2,325 | | 995 |
| April..... | 2,322 | 5,778 | | 3,456 |
| Total | 19,525 | 22,583 | 1,760 | 4,818 |

It will be seen that the net decrease for the last ten months amounted to 3,058.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia during the month of April, 1904, were as follows :—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS.

| Nationalities. | Number of Entries. |
|--|--------------------|
| Canadians from Ontario..... | 324 |
| " Quebec..... | 41 |
| " Nova Scotia..... | 26 |
| " New Brunswick..... | 13 |
| " Prince Edward Island..... | 11 |
| " Manitoba..... | 45 |
| " North-west Territories..... | 29 |
| " British Columbia..... | 12 |
| Persons who had previous entry..... | 199 |
| Canadians returned from United States..... | 40 |
| Americans..... | 671 |
| Newfoundlanders..... | |
| English..... | 437 |
| Scotch..... | 123 |
| Irish..... | 34 |
| French..... | 11 |
| Belgians..... | 6 |
| Swiss..... | 6 |
| Italians..... | 1 |
| Roumanians..... | 23 |
| Greeks..... | |
| Syrians..... | 1 |
| Germans..... | 42 |
| Austro-Hungarians..... | 138 |
| Hollanders..... | 8 |
| Danes (other than Icelanders)..... | 4 |
| Icelanders..... | 13 |
| Swedo-Norwegians..... | 39 |
| Russians (other than Mennonites and Doukhobors)..... | 18 |
| Mennonites..... | 3 |
| Doukhobors..... | 4 |
| Chinese..... | |
| Total | 2,322 |
| Representing 5,522 souls. | |

Of a total number of 711 entries made during April by persons coming from the United States to Canada 139 were from Dakota, 126 from Minnesota, 64 from Wisconsin, 39 from Washington, 51 from Iowa, 50 from Montana, and 45 from Michigan.

Lands Patented in April, 1904.

An abstract of letters patent covering Dominion lands situated in Manitoba, the

North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of April, 1903, compared with the month of April, 1904, is as follows:—

TABLE OF LANDS PATENTED IN APRIL.

| Nature of Grant. | Number of Patents. | Number of Acres. |
|---|--------------------|------------------|
| British Columbia homesteads... | 7 | 805.13 |
| British Columbia sales..... | 8 | 1,996.00 |
| Coal Land sales..... | 1 | 160.00 |
| Commutation grants..... | 2 | 94.73 |
| Homesteads..... | 335 | 53,063.18 |
| Hudson's Bay Co..... | | |
| Manitoba Act grants..... | 1 | 74.80 |
| Military homesteads..... | 1 | 320.00 |
| Mineral rights..... | | |
| North-west Half-breed grants... | 52 | 8,630.64 |
| Parish sales..... | 2 | 253.00 |
| Quit claim special grant..... | 1 | |
| Railways— | | |
| Calgary and Edmonton Ry. Co..... | | |
| Canadian Northern Ry. Co..... | 6 | 1,999.99 |
| Canadian Pacific Ry. grants... | 8 | 13,753.00 |
| Can. Pac. Ry. Roadbed and Station Grounds..... | 8 | 138.82 |
| Manitoba North-western Ry..... | | |
| Manitoba South-west'n C'l. Ry..... | 96 | 30,077.40 |
| Qu'Appelle, Long Lake and Saskatchewan Rd. and S. Co..... | 5 | 1,592.64 |
| Sales..... | 49 | 36,882.35 |
| School lands sales..... | 4 | 802.00 |
| Special grants..... | 8 | 227.00 |
| Yukon Territory sales..... | 5 | 366.84 |
| Yukon Territory special..... | 2 | |
| Total..... | 601 | 151,237.52 |

In April, 1903, the number of patents issued was 708, covering an area of 315,735.34 acres.

UNIONS FORMED DURING THE MONTH OF MAY, 1904.

The department has received notice of the following organizations as having been formed during the month of May, 1904:—

Nova Scotia:

Amherst—Tailors.

“ *Carpenters.*

New Brunswick:

Moncton—Tailors.

Quebec:

Montreal—Tailors.

“ *Garment Workers.* (The

garment workers were formerly members of the Knights of Labour, but owing to the break-up of that organization in Montreal, the members affiliated with the National Trades and Labour Congress).

St. Hyacinthe—Printers.

Ontario:

Ottawa—Machinists.

Guelph—Clerks.

Manitoba:

Winnipeg—Steam Engineers.

“ *Structural Iron Workers.*

“ *Railway Carmen.*

CANADIAN TRADE AND REVENUE DURING THE MONTH OF MAY, 1904.

The following article, intended as supplementary to the general Summary of Industrial Labour conditions, is based on statistics furnished by courtesy of the Department of Customs and Finance, Canada, on the latest weekly reports issued by the Department of Trade and Commerce, Canada, on current information collected from reliable trade and financial journals, and on the references contained in the reports of correspondents of the *Labour Gazette* published in the present issue.

Canadian trade and revenue returns received during May show, on the whole, a slight falling off as compared with April,

1904, and with May a year ago, though for the ten months of the fiscal year both departments show material increases upon the same period of 1902-3. The comparatively poor showing is attributed almost wholly to the severe winter season and the late opening of spring. With continued favourable weather conditions, the outlook is regarded favourably, domestic and imperial trade being particularly encouraging.

Reference in more detail to recent developments in the several branches of Canadian trade, foreign, imperial and domestic, and to the latest reports of Dominion revenue, is as follows:—

IMPORTS.

| | MONTH OF APRIL. | | TEN MONTHS ENDING APRIL. | |
|-----------------------|-----------------|------------|--------------------------|-------------|
| | 1903. | 1904. | 1903. | 1904. |
| | \$ | \$ | \$ | \$ |
| Dutiable goods..... | 12,041,840 | 11,945,999 | 109,030,545 | 120,115,878 |
| Free goods..... | 8,502,772 | 8,154,769 | 66,954,103 | 75,508,602 |
| Total..... | 20,544,612 | 20,100,768 | 175,984,648 | 195,624,480 |
| Coin and bullion..... | 564,933 | 139,719 | 4,234,331 | 3,648,024 |
| Grand total..... | 21,109,545 | 20,240,487 | 180,218,979 | 199,272,504 |

Foreign Trade Returns.

From the accompanying tables of exports and imports, supplied by courtesy of the Department of Customs, Canada, it will be seen that imports during April showed a slight decline as compared with last year, though the records for the ten months ending April 30, 1904, was over \$19,000,000 in advance of that of the similar period of 1902-3. Exports also show-

ed a decline of about \$700,000 during April, as compared with April, 1903, and for the ten months period a decline of about \$6,000,000, the adverse weather conditions of the winter and early spring seasons being held largely accountable for the diminution. The total trade returns showed a slight decline for the month, but an increase amounting to over \$13,000,000 for the ten months period.

The export butter and cheese trade was particularly dull during May, low prices ruling in the British markets. Shipments of potatoes from Ontario, however, to the United States were unusually active.

Imports from Germany are reported as steadily declining as a result of the putting into force of the surtax, the decrease being particularly noticeable in orders for iron and steel by the railway companies.

Tenders were advertised for by the Department of Trade and Commerce, Canada, for a monthly steamship service over a period of five years between Canada and Mexico. Tenders will be received up to August 1. Vancouver, B.C., will be the Canadian terminal port on the Pacific, and Montreal in summer and Halifax in winter the terminals on the Atlantic. The Atlantic service will touch also at Nassau, the Bahamas and at Havana, Cuba. The vessels are to run under the British flag, and are to have a carrying capacity of not less than 3,000 tons, with passenger accommodation, being capable of maintaining between ports a minimum speed of ten knots per hour.

Returns of the winter shipping business from St. John, N.B., which closed during the month, shows the export trade of the port to have been the largest on record. There were ninety-six sailings in all, and the total value of shipments reached \$50,875,189. Four vessels sailed for South Africa with \$772,727 worth of goods on board.

Imperial Trade—Reports of Commercial Agents.

The weekly reports of commercial agents and trade inquiries, issued during April by the Department of Trade and Commerce, Canada, show openings in Great Britain for Canadian starch, fruit, pulp, prussiate of potash and potatoes. Considerable attention is paid to the trade in butter and cheese, which is dull at present, and the selling qualities of waxed cheese in the British market is referred

to at length, with reference to the opinions of individual buyers. There are also stated to be openings for 'process' butter. In Australia trade conditions are reported generally satisfactory, and the market for Canadian manufactures is improving, obtaining as a rule the preference over foreign goods. Canadian chenilles and curtains, underwear, steam radiators, sawmill machinery, pulp, breakfast foods, furs, paints, fish products, sulphite of copper, acetate of soda, are mentioned as articles for which a demand is now evidenced. From Jamaica it is reported that Canadian flour and meal is growing in favour; Canadian exporters generally are urged to take more trouble in finding out the requirements of the trade, especially as to packing and method of shipment.

It was announced that the Elder-Dempster Steamship Line would carry a certain quantity of cargo to Cape Colony free of charge, the steamer *Monarch* leaving Montreal in the middle of July in order to enable Canadian manufacturers to show their wares at South African ports. The matter will be placed in the hands of the Canadian boards of trade.

According to returns of the British Board of Trade, imports into Great Britain from Canada during April were as follows:—

| | Amount. | Value. |
|----------------------|---------|---------|
| | | £ |
| Cattle..... | 5,568 | 97,698 |
| Sheep and lambs..... | 1,680 | 2,771 |
| Wheat..... Cwt. | 242,100 | 85,943 |
| Meal, flour..... | 121,700 | 61,364 |
| Pease..... " | 32,670 | 10,239 |
| Bacon..... " | 31,157 | 64,702 |
| Hams..... " | 3,523 | 8,556 |
| Butter..... " | 1,458 | 6,250 |
| Cheese..... " | 79,334 | 194,211 |

Domestic Trade.

Backward weather continued to affect trade injuriously during May, though considerable improvement was noted in this respect as compared with April. The

leading wholesale centres reported a uniformly active trade, and among country retailers a fair average business was done, stimulated in western Canada by the heavy arrivals of immigrants. In Quebec and Ontario, however, the effect of the hard winter and late spring still made themselves felt, especially in the districts where the unusual depth of snow and severity of the weather more or less permanently damaged the season's wheat, clover and fruit crop, and where the congestion of the country roads has led to the carrying over of retail stocks. Country paper, however, was fairly well met, and the general outlook, in view of the progress that has been made in the leading industries during the past few weeks, is of a uniformly hopeful nature.

Failures in Canada during April numbered 91, involving liabilities of \$981,179. In April, 1903, only 62 failures occurred, with losses aggregating only \$509,826. Manufacturers' failures were 29 in April, for \$600,757, as compared with 15, for \$207,338, a year ago, and traders' failures 59, as against 44 last year. The excess in the returns for this year was provided almost wholly by the failure of a beet sugar manufacturing company in Ontario. Eliminating this suspension, the month's exhibit, according to Dun's Review, compares most favourably with the corresponding month in recent preceding years.

The forty-fourth annual meeting of La Banque Nationale was held in Quebec on May 18. The net profits of the year were \$152,777, or over 10 per cent of the paid-up capital. \$50,000 was transferred to rest account.

Subscribers to the stock of the Crown Bank of Canada met for organization at Toronto on May 9.

Revenue and Expenditure.

According to the latest official statements of the Department of Finance, Canada, the revenue of the Dominion during April, 1904, amounted to \$5,425,149.10, or a total of \$56,728,716.39 for the first ten months of the current fiscal year. The returns show a decline as compared with April, 1903, of \$339,450.42, but an improvement for the ten months of \$4,366,875.01. As compared with March, a decrease of \$249,627.40 is shown. Current expenditure in April amounted to \$3,141,559.12, as compared with \$3,257,588.98 in April, 1903. For the ten months the total expenditure was \$35,802,813.18, as against \$34,952,674.33 a year ago.

A total of \$951,751.82 was expended by the Dominion on capital account, the chief items of which were as follows :—

| | |
|------------------------------|------------|
| Public Works, Railways and | |
| Canals.. . . . | 536,001 71 |
| Militia.. . . . | 174,609 30 |
| Bounties on iron and steel.. | 113,003 45 |
| Federal lands.. . . . | 100,141 30 |

GOVERNMENT CONTRACTS FOR THE MONTH OF MAY.

(Information supplied by the Department of Public Works.)

THE following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties in the last days of the month of April and during the month of May, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule in each contract :—

BIG HARBOUR, N.S.

Wharf and approach thereto at Big Harbour, N.S., April 28, 1904; \$3,785.

FAIR WAGE SCHEDULE.

| Trade or Class of Labour. | Rate of Wages, Not less than | | |
|-------------------------------------|---------------------------------|----------------------|------|
| Contractor's foreman carpenter.... | \$2.50 | per day of 10 hours. | |
| Carpenters..... | 2.00 | " | 10 " |
| Blacksmiths..... | 2.50 | " | 10 " |
| Blacksmiths' helpers..... | 1.50 | " | 10 " |
| Ordinary labourers..... | 1.25 | " | 10 " |
| Driver with 1 horse and cart..... | 2.00 | " | 10 " |
| Driver with 2 horses and wagon..... | 3.00 | " | 10 " |

McKAY'S POINT, N.S.

Public wharf at McKay's Point, N.S., April 30, 1904; \$5,442..

FAIR WAGE SCHEDULE.

TRADE DISPUTES DURING THE MONTH OF MAY.

THE month of May was marked by numerous trade disputes, particularly in the provinces of Ontario and Quebec. The cities of Quebec and Montreal were the localities most seriously affected, and building operations in both these places were greatly impeded. The effects of the disputes, however, were only felt in the districts where they occurred, and did not have any appreciable influence over the general industrial conditions of the country.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of disputes of importance in existence during May was 31, compared with 23 in

the previous month and 45 in May, 1903. Of the 31, eight commenced prior to May 1 and 23 after. About 232 firms and establishments were concerned in the disputes, and 3,578 employees, of whom about 570 were reported to have been indirectly affected.

The magnitude of the new disputes is indicated in the following table, according to the number of working-people involved:

| Magnitude. | Number of Disputes. |
|----------------------|---------------------|
| From 300 to 500..... | 4 |
| From 200 to 300..... | 1 |
| From 100 to 200..... | 4 |
| From 50 to 100..... | 2 |
| From 6 to 25..... | 4 |
| From 25 to 50..... | 7 |

Loss of time in working days.—The total loss of time to employees by trade

disputes during the month of May was approximately 33,058 working days. The difficulty in estimating the loss of time in the case of disputes such as those of the building trades in Quebec and Montreal, where the numbers of strikers were daily diminished through agreements being reached with different employers, or through the strikers undertaking contracts on their own account, or leaving the country, renders it impossible to give more than a general estimate. It is sufficiently accurate, however, for purposes of comparison. In April of the present year the loss of time was estimated at 14,630 working days, and in May, 1903, there was a loss of 170,364 days, including only the working-people directly affected by trade disputes.

Trades affected by new disputes.—The following trades were affected by new disputes of the month :—

| Trades. | Number of Disputes. |
|--------------------------------------|---------------------------|
| Building.. . . . | 12 |
| Clothing.. . . . | 3 |
| Food and tobacco preparation.. . . . | 3 |
| Printing and bookbinding.. . . . | 1 |
| Unskilled labour.. . . . | 1 |
| Miscellaneous.. . . . | 3 |

From the above, it may be seen that the disputes in the building trades amounted to more than half of the total number. The three miscellaneous industries in which there were disputes comprised a cordage factory, a paper factory and a paper-box factory.

Causes of new disputes.—The following were the causes of the new disputes :—

| Causes. | Number of Disputes. |
|--|---------------------------|
| For increase of wages.. . . . | 8 |
| For decrease in hours.. . . . | 2 |
| For increase of wages and decrease of hours.. . . . | 5 |
| For recognition of union.. . . . | 2 |
| For increase of wages, decrease of hours and recognition of union.. . . . | 1 |
| Against employment of certain per- sons.. . . . | 4 |
| For taking holiday without leave.. . . . | 1 |

Methods of settlement.—Out of the 31 disputes which were in existence during the month of May, definite settlements were reported in the case of 17, leaving 14 still unsettled at the end of the month. Of the 17

that were terminated, 8 were settled through negotiations between the parties concerned, and one by negotiations aided by the friendly mediation of the Secretary of the Ontario Bureau of Labour. The remaining eight were terminated without negotiations, in six cases by decision of the strikers, in three by their places being filled, and in the remaining one, which was a lockout, by the company voluntarily taking back its employees.

Results of disputes.—Of the 17 disputes which were settled, six resulted in favour of the employers, three in favour of the employees, and five ended in a compromise, more or less favourable to the working-people. In two cases, both sides were partially successful, some firms having granted all the demands of the men, and others having refused them all. In the remaining case, conditions remained the same, the cause of the trouble having been merely absence from work without leave.

Disputes commenced prior to the beginning of the Month.

There were eight disputes in existence beginning of the month. Of these, only ginning of the month. Of these, only two remained unsettled on June 1, namely, strikes of granite cutters at Montreal and cigarmakers at St. Thomas, Ont. There was little change in the situation of either of these disputes. It was reported that many granite cutters left Montreal for other places. The cause of this dispute was a decision of the employers to conduct 'open shops.' In the case of cigarmakers at St. Thomas, Ont., who demanded an increase in wages amounting to 50 cents and \$1 respectively per 1,000 cigars, according to the class of work, negotiations were conducted with the firm during May, and were still in progress at the end of the month.

Six of the old disputes were definitely settled. These were strikes of painters at Quebec and Montreal, lockouts of cigarmakers at Hamilton and London, Ont., and strikes of coal drivers and leather

TABLE OF TRADE DISPUTES OF THE MONTH OF MAY.

| Province. | Locality. | Occupation. | Alleged Cause or Object. | No. of Establishments affected. | Approximate No. of Employees affected. | | Date of commencement. | Date of termination. | Result. |

| Quebec..... | Montreal..... | Cordage workers . | Demand for increase of 10 per cent in wages. | 1 | 210 | | " 2 | " 9 | Employees returned to work, and increase granted. |

| | | | | | | | | | |
|--------------|---------------|---|---|----|-----|-----|---|---------|--|
| Ontario | Merittion | Papermakers | Decision of company to return to longer working hours. | 1 | 41 | 26 | " | 1 | No settlement reported at end of month. |
| " | Niagara Falls | Rock drillers and helpers, steam engineers & hoist runners. | Demand for increase in wages | 3 | 165 | 325 | " | 7, 8, 9 | Demands granted with slight change in drillers' demand. |
| " | Toronto | Brewery workers. | Demand for increase in wages from 12 to 15 per cent and shorter hours in some departments. | 2 | 100 | | " | 6 | No settlement reported at end of month. |
| Quebec | Montreal | Stonecutters. | Demand for higher wages and shorter hours. | 39 | 309 | 15 | " | 9 | Five employers signed agreement. Only 60 strikers were left at end of month. |
| Ontario | Windsor | Painters and decorators. | Decision of employers to run open shops. | 8 | 34 | | " | 9 | Employers agreed to recognize union and pay union scale. |
| Quebec | Quebec | Carpenters and joiners. | Demand for increase in wages, shorter hours and adoption of union rules. | 16 | 115 | | " | 9 | Eleven firms signed agreement; about 70 men still out at end of month. |
| N. Brunswick | St. John | Tailors. | Refusal of employers to adopt new scale of wages. | 4 | 11 | | " | 10 | No settlement reported at end of month. |
| Quebec | Sherbrooke | Stonecutters | Demand for day of nine hours instead of ten. | 1 | 15 | | " | 10 | Men sought work elsewhere and their places were filled. |
| " | St. Hyacinthe | Shoe workers. | Lockout on account of refusal to work on Ascension Day. | 1 | 25 | | " | 12 | Employees were all taken back. |
| " | Montreal | Bookbinders | Employment of girls on work previously done by men. | 5 | 39 | | " | 16 | No settlement reported at end of month. |
| Ontario | Toronto | Brickmakers | Demand for recognition of union. | 11 | 350 | | " | 20 | Men returned to work. Union not recognized. |
| Manitoba | Winnipeg | Journeyman tailors. | Refusal of firms to sign schedule | 2 | 27 | | " | 18 | No settlement reported at end of month. |
| Ontario | Toronto | Brewery workers. | Employment of non-unionists, causing strike in one brewery, followed by lock-out in three others. | 4 | 100 | | " | 23 | No settlement reported at end of month, but breweries claimed to be no longer affected. |
| Quebec | Montreal | Paper-box makers | Objection to change of foreman | 1 | 18 | 12 | " | 23 | New foreman retained. old foreman given job on cutting machine; all hands returned to work except one. |
| Ontario | Hamilton | Tobacco workers. | Importation of 30 coloured tobacco workers from United States. | 1 | 14 | | " | 23 | No settlement reported at end of month. |
| " | Toronto | Civic labourers | Demand for increase in wages from 20 and 22 to 25 cents per hour. | 1 | 40 | | " | 26 | Wages of pipe-layers and tinmen increased from 22 to 25 cents per hour, and some drain-diggers advanced from 20 to 22 cents. |
| " | Toronto | Brickmakers. | Demand for higher wages. | 1 | | | " | 30 | No settlement reported at end of month. |

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true, that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interest of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention. Moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

workers at Hamilton. With regard to the strike of painters at Quebec, this dispute was stated to have been practically over by the end of April, eight firms having accepted the terms of the union. It was not, however, until May 18 that the strike was officially declared over, and the painters' union definitely abandoned their attempt to induce the other employers to sign the agreement for higher wages. On May 17, the strike of painters at Montreal was officially declared off, all the men being at that time employed by contractors who had signed the agreement, although there were still some who had not done so.

The lockout of cigarmakers employed by the Geo. E. Tuckett Company at Hamilton and London came to an end on May 3, when the local union of cigarmakers at Hamilton withdrew its demand for higher wages, the International Union of Cigarmakers having refused to sanction the demand. With the settlement at Hamilton, the lockout at London naturally ended, as it was only due to the action of the Hamilton union.

A strike of leather-workers at Hamilton, which began on April 22, was terminated on May 14. The dispute was due to a demand for a Saturday half-holiday, and it affected two wholesale and ten retail shops. All the retail shops granted the men's demand, but the wholesale shops refused to do so, and their former employees therefore sought work elsewhere.

With regard to other old disputes, mention may be made of the fact that a strike of machinists at Vancouver, B.C., which was reported in the April and May numbers of the *Labour Gazette*, was still in existence throughout the month of May, so far as the trade union was concerned, although the company claimed, on April 19, to be no longer affected by it.

Early in May the strike of papermakers of the E. B. Eddy Co., of Hull, Que., which began in January, was formally declared off, and the following resolution was adopted and forwarded to the company by

the Hull lodge of the International Brotherhood of Papermakers :—

That we do discontinue the fight for shorter hours, which has been in operation since January last. We would ask that any hard feeling that may have arisen through this trouble be allowed to drop, and the same cordial relations shall exist between your company and your former employees that existed previous to this trouble.

New Disputes.

The most important disputes of the month were those connected with the building trades at Montreal, which seriously interfered with the work of construction. Building operations were also hampered at Quebec by trade disputes. Although there were others of considerable magnitude, such as a strike of rock drillers, engineers, &c., at Niagara Falls, Ont., brickmakers and brewery workers at Toronto, and cordage workers at Montreal, their effects were not seriously felt beyond the establishments directly concerned.

Strikes in Building Trades at Montreal.

On May 2, two new strikes in the building trades at Montreal were added to those of the granite cutters and painters, which were already in existence. The new ones affected about 400 plumbers and 100 marble workers. In addition to these, about 300 soft stonecutters struck work on May 9. No definite settlement was reached in the case of any of these disputes in the course of the month.

The demand of the plumbers was for 35 cents an hour and an 8-hour day, instead of 25 cents an hour and a 9-hour day. About 100 shops were affected. On May 3 the striking plumbers reported that 13 master plumbers had signed the agreement, and at the end of the month the majority had signed. The following are the terms submitted to the employers for their signature :—

Whereas, it is the desire to have a better and fuller understanding between the master plumbers of Montreal and vicinity, and Local 144 of the United Association of Journeymen Plumbers, Gas and Steamfitters of the United States and Canada, it is hereby agreed that this contract being signed by both parties is to go in full effect on May 1, 1904, and to continue until May 1, 1905.

Article 1.—Eight hours shall constitute a day's work. Working hours to be from April 1 to Oct. 1, 8 a.m. to 12 a.m., 1 p.m. to 5 o'clock p.m.; from Oct. 1 to April 1, 7.30 a.m. to 12 a.m., 1 p.m. to 4.30 p.m., and the salary paid shall not be less than thirty-five cents an hour.

Article 2.—That all master plumbers, employing journeymen plumbers, gas, steam or hot water fitters in the city of Montreal and vicinity, bind themselves to employ none but good standing members of Local 144.

Article 3.—No gas, steam or hot water fitters shall work more than one helper. That only one apprentice plumber be allowed to each shop and before entitled to another apprentice there shall be four journeymen plumbers employed.

Five years shall constitute the time each apprentice shall have to serve before he shall be recognized as a journeyman plumber, gas, steam or hot water fitter, and be entitled to admission and protection of Local 144, and that each apprentice must serve three years before using tools, and that not more than one apprentice using tools be employed in any one shop, but before another apprentice using tools be employed there must be five journeymen of Local 144 employed.

Article 4.—All overtime work shall be paid at the rate of time and a half, and double time for the following holidays: Sundays, Christmas, New Year's, Labour Day and Dominion Day.

Article 5.—All members of this Local working outside the city shall be governed by the rules of Local 144, and shall have their transportation and board paid, and shall receive single time pay during travelling day or night, Sundays or holidays (night time excepted if sleeping berth is furnished), and that all work done in the city outside a radius of one mile from shop where member is employed, his car fare to be paid to and fro.

Article 6.—That no member of Local 144 shall perform any labour pertaining to his trade, or install any material supplied to him by or for other than his employer, who shall be a bona fide master plumber, that is, one keeping a place of business and paying taxes to that effect. But incorporated bodies or concerns to be an exception to this article.

Article 7.—Members of Local 144 do not bind themselves to work on jobs where there is labour trouble.

Article 8.—All members starting the day's work shall be employed by the employer the entire day, or shall be entitled to a day's pay, but will only be paid the time he has worked provided he quits the job on his own account.

Article 9.—In case of any grievances arising, said grievances to be referred to a committee of three named by Local 144, and three by parties interested, this committee to have full power to settle said grievances, and in case of failure to agree, the question to be referred to two disinterested parties to be chosen one by each committee of three, and in case of no agreement from those two parties, the question to be referred to some one appointed by those two, and decision to be final, but the whole of grievances to be settled within fifteen days from first meeting of first committee.

On January 16 the marble workers' union of Montreal addressed the following letter to the master marble dealers, which was endorsed by the Building Trades Council on April 14:—

'Gentlemen,—Since our representatives met you last April, the condition of the labour class has become more serious than we expected, the cost of domestic life has increased more in proportion than the small increase we received from you during the past year. After careful inquiry we find that the condition as well as the wages of marble workers (especially in Montreal) is much inferior to that of marble workers elsewhere. On the other hand the agreement we signed has not given us satisfaction on several points. Therefore we are obliged to send you the following resolutions adopted at No. 34, : x' r, p, et aoin shdriu cmfwy cmfwyp by the members of the Marble Workers' Local No. 34, said resolutions which we hope that with your spirit of justice, you will study and adopt, and which will we firmly believe give satisfaction to both parties interested.

Article 1. None but members of local union No. 34 of the International Association of Marble Workers shall be employed.

Article 2. Nine hours shall constitute a day's work. Labour hours to begin from 7 to 12 a.m., and from 1 to 5 p.m.

Article 3. Extra hours shall be paid as follows: from 5 p.m., to midnight, time and a half; after midnight and Sundays and all legal holidays, which are as follows: New Year's Day, Dominion Day, Empire Day, Labour Day, Thanksgiving Day and Christmas, which shall be paid double time, and all members of Local 34 sent out of city to work shall receive full pay for time spent on railways or steamboats.

Article 4. The minimum wages for cutters, setters, cutters and planners on machines and marble and mosaic tile setters shall be \$2.50 per day of 9 hours.

Article 5. The minimum wages of bed rubbers, sawyers and polishers on machines, shall be \$2.25 per day.

Article 6. Hand polishers, whether male or female, shall receive \$2 per day, only female polishers belonging to Local 34 International Association Marble Worker shall be employed.

Article 7. All piece work for all members of Local 34, shall be abolished.

Article 8. No foreman of any branch of the trade shall be imposed on members of Local 34, if he is not a competent marble worker.

Article 9. Any foreman working at the bench, whether cutter or polisher, must be a member of Local 34.

Article 10. Apprentice marble workers must serve four years, before being considered a journeyman; after four years said apprentice will be considered a journeyman and competent to command local union wages.

Article 11. One apprentice to each group of six cutters or polishers, number to be limited to six in every shop, average number of journeymen in each branch during the year to be the basis of this article.

Article 12. Employing less than six cutters or polishers, shall be entitled to one apprentice.

Article 13. No employee bearing a card which entitles him to work as a cutter or setter shall be allowed or forced to polish, or vice versa.

Article 14. All work regarding marble industry shall be worked by marble workers of Local Union No. 34, only.

Article 15. No firm shall force their men to go to do work or replace men who would be in difficulty with their employees on any buildings or other contracts.

Article 16. The difficulties that might arise between employers and employees and not pro-

vided in these regulations, shall be exposed to a committee of six persons, three representatives of the employers' association and three from Marble Workers' Local 34.

Article 17. No employer, should he be in conflict with his men, shall be authorized to act on such a committee. But may be allowed to explain his reasons, after which he will retire; question to be settled by the committee. If said committee should fail to come to an understanding, they could have power to select an umpire whose decision should be accepted as final.

Article 18. This agreement, contracted between the Master Marble Workers' Association of Montreal and International Marble Workers' Local Union 34, shall take force on the 1st of May, 1904, and end on the 1st of May, 1905. Three months notice to be given by both parties to put an end to his treaty of Local Union 34; should either fail to give such notice this may be considered for another year.

An answer is respectfully solicited by the first of March instant.'

At the end of the month only four firms had signed the above agreement.

On May 9, about 300 stonecutters of Montreal declared a strike, their demand for higher wages and an 8-hour day having been refused. At the end of the month five employers had signed the agreement, and there only remained 60 stonecutters on strike, many of them having left to seek work in other places.

Strike and Lockout of Brewery Workers at Toronto.

About the beginning of the month the brewery workers' union of Toronto presented a demand to their employers for increases in wages amounting to from 12 to 15 per cent, and for shorter hours in some departments. Their demand was refused by all the breweries, and on May 6 the members of the union employed by the O'Keefe Brewery Co. and Reinhardt & Co. ceased work. It was claimed by the brewers that the strikers were unskilled labourers and drivers, and that their places were immediately filled. About 100 men in all went on strike. On May 13 about 15 men employed at the Qormann brewery joined the strikers on account of the employment of two non-unionists. On account of these strikes, a meeting of the Brewers' Association was held that afternoon, and it was decided to pay off the workers in the other three breweries forthwith. This action affected about 100 more men.

The following facts with reference to these disputes were furnished by the Employers' Association of Toronto, with which the Toronto Brewers' Association is affiliated:—

It is claimed that in April, 1903, the brewery workers' union made a demand to each of the breweries in Toronto for a substantial increase in wages. Increases were granted to them amounting to from 23 to 45 per cent of their wages. In April of this year a demand was made for further increase of from 12½ to 15 per cent, with a reduction in hours. The brewers said that they could not make any further advance this year on account of the unfavourable conditions in which the business had been carried on during the past year. A committee was then appointed by the brewers to negotiate with a representative of the International Brewery Workers but failed to meet him. A strike was then declared in the O'Keefe and Reinhardt breweries. On May 10 the Toronto Brewers' Association issued a statement showing that all negotiations with the men had been carried on by the secretary of the association, acting for all the breweries, and announcing that the other brewers of Toronto would decline to accept orders from the customers of the O'Keefe and Reinhardt breweries.

Four days after the lockout in the other breweries, which is mentioned above, the brewers claimed to be no longer affected by the strike, having engaged a full complement of non-union men. The brewers also claimed that the wages they had been paying were higher than those generally received by the labouring classes from whom the brewery workers were drawn.

Strike of Rock Drillers, Engineers and Others at Niagara Falls, Ont.

On May 7 a strike was declared by men at Niagara Falls, Ont., who were engaged on the construction of the works of the new electric power companies there. On the two following days the strikers were joined by others, until there were three firms and 165 men directly involved, and

325 men indirectly involved in the dispute. The classes of people involved were rock drillers and helpers, steam engineers and hoist runners. The cause of the dispute was a demand of the rock drillers, engineers and hoist runners for an increase in wages from 25 to 30 cents per hour. Channel drillers demanded an increase of from 30 to 35 cents per hour, and rock drillers' helpers demanded an increase from 20 to 25 cents per hour. Mr. Robert Glocking, secretary of the Ontario Bureau of Labour, was invited to assist in bringing

about a settlement, and after some negotiations the dispute was terminated by the three firms involved conceding all the demands of the men, with a slight change in the case of the channel drillers, on May 17, 18 and 25.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of May, and which have been reported to the department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, to one of the factory inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with a statement of returns of accidents made to them.

THE Department of Labour has received notice of 270 accidents to individual workmen during the month of May in different parts of the Dominion, resulting in the loss of 78 lives, and in severe injuries to other workmen to the number of 192.

Compared with the month of April, an increase of 73 is shown in the total number of accidents, being an increase of 19 in the number killed, and an increase of 54 in the number injured.

By industries and groups of trades the record is as follows:—

| Trade or Industry. | Killed. | Injured. | Total. |
|-----------------------------------|---------|----------|--------|
| Agriculture..... | 11 | 9 | 20 |
| Fishing..... | 2 | | 2 |
| Lumbering..... | 12 | 7 | 19 |
| Mining..... | 5 | 7 | 12 |
| Building trades..... | 7 | 9 | 16 |
| Metal trades..... | 2 | 57 | 59 |
| Woodworking trades..... | 1 | 14 | 15 |
| Food and tobacco preparation..... | 1 | 7 | 8 |
| Clothing trades..... | | 1 | 1 |
| Textile trades..... | | 4 | 4 |
| Leather trades..... | 1 | 1 | 2 |
| Railway service..... | 16 | 24 | 40 |
| General transport..... | 16 | 24 | 40 |
| Unskilled labour..... | | 10 | 10 |
| Miscellaneous..... | 4 | 18 | 22 |
| | 78 | 192 | 270 |

Adding to these returns the numbers killed and injured in accidents which happened in previous months, but of which the department only received information during May, and total returns of 80 killed and 226 injured were received at the department during May.

The Record by Trades and Industries.

By industries and groups of trades the table shows the following record for the month:—

Agriculture.—The table shows eleven killed and nine seriously injured, seven

farmers, two ranchers and two farm hands being included in the former, and six farmers, one rancher and two farm hands in the latter. Two of the fatalities resulted from men being run over by railway trains while following their occupation; one by being struck by lightning while at work in a corn-field; one at a barn-raising; two from drowning; one from a runaway team; one from being pierced by a pitchfork; one from being thrown from a load of hay; one from the kick of a horse; and one from being crushed beneath a truck while moving a house. Three cases of injuries received were caused by the fall of an upright while tearing down a barn. The others were caused by the fall of a tree, a fall from a load of hay, a fall in front of a disc harrow, a blow from an axe while building a fence, in a collision with a street car, and by the fall of a timber at a barn-raising.

Fishing.—The only accident reported to the department under this heading was the drowning of two fishermen on the Saguenay while hunting a porpoise.

Lumbering.—Twelve fatal accidents were reported, and seven resulting in serious injuries. Nine of the fatalities were drownings of shantymen or river drivers, the remaining three being fatal injuries to sawmill hands about machinery. Four of the seven injuries reported were also received by mill-hands about machinery, the remaining 3 being caused by a woodyard employee being jammed between a cart and a railway car, and by falls sustained by mill-hands.

Mining.—Five fatalities were reported, one to a coal miner in Nova Scotia, one by a fall from a scaffolding in an asbestos mine, one to a driver by being run over by a loaded coal truck, one to a driver by being thrown from a coal truck, and one by a fall into a chute. Five of the cases of severe injuries were reported from coal mines, one from being buried in an ore chute, and one to a rock driller by the fall of a casting from the drill.

Building trades.—Seven fatal and nine other serious accidents were reported. Five of the fatalities and three of the injuries were received by carpenters. A painter was drowned while painting the hull of a vessel, and another fell from the roof of a house which he was tarring, dislocating his shoulder and breaking an arm. A stonemason had his leg injured in a fall from a scaffold. A labourer was killed and a second injured by falls of stone, and a third had his jaw broken by a swinging chain. A contractor's foreman received a shock while arranging some electric lights.

Metal trades.—A total of two fatal and fifty-seven less serious accidents was reported. Machinistes reported the largest total of killed and injured, with one of the former and twenty-eight of the latter, the fatality being caused by the fall of an elevator. Among electrical workers one fatality and four serious injuries were reported, the fatal accident being caused by the fall of a timber in a powerhouse. Sheet metal workers reported four cases of serious injuries received. Nine moulders were injured, six of them by molten metal. A blacksmith had a finger crushed. Two iron-workers at Hamilton received severe injuries. Two structural iron-workers and two bridge-workers were also in the list of injured. The balance of the table refers to injuries received by a hardware factory hand, who had his hand crushed between a punch and a steel bar, a labourer in a machine shop who was injured by a fall from a scaffold, an employee of a steel company who had his hand amputated in a broom bridge hoist, a stationary engineer who fell from a ladder while oiling shafting, a bridge foreman crushed by the fall of a piece of steel, a foreman at Shawinigan Falls who fell a distance of thirteen feet, and an asbestos mill-worker who had his hand cut off in a chrome mill.

Woodworking trades.—One fatal accident, the victim's head being cut off by coming in contact with a band saw, was

reported under this heading. The 14 serious injuries reported were to factory hands, ranging in severity from lacerations to the loss of fingers, all the injuries reported being received about machinery.

Food and tobacco preparation.—The only fatal accident reported was the falling of a meat cutter on a meat hook, which caused injuries resulting in his death. Another meat cutter received serious injuries to his head in the same way. Three brewery workers were on the list of injured, one having lost an eye as the result of a blow from a wooden stopper. Two ice cutters were injured, one by being thrown from an ice wagon and the other by a fall in an ice-house. A pork packer had his hand and arm cut in a chopper.

Printing trades.—No accidents were reported under this heading.

Clothing trades.—A rubber worker at Montreal had his right hand cut off by a machine.

Textile trades.—Four mill employees suffered injuries from machinery, three having a hand cut off and the fourth losing a finger in a loom.

Leather trades.—An employee of a leather company was killed by coming in contact with an electric wire, and a leather worker had his foot injured by the fall of a cylinder.

Railway service.—Sixteen employees of railway companies were killed and twenty-four were injured during May. Four conductors were run over by trains and killed. An engineer was badly scalded in a rear end collision between two freight trains, and another engineer was crushed to death between a traction engine and a boat which was being shipped on a car in the rear. Two brakemen were killed between cars while shunting. Another was scalded in a rear-end collision, a fourth had a hand crushed while coupling cars, and a fifth had his leg cut off by a train. A fireman was scalded to death in the rear-end collision above-mentioned; two other firemen

had their legs broken, one an arm broken and one a foot crushed. A sectionman was run over by a train and killed, and five men were more or less seriously injured by a hand-car jumping the track. Two switchmen were killed, one by a yard engine and one by being caught between two cars, and three others seriously injured. Three yardmen were also seriously injured and one killed by being run over by a train. A shop hand was killed at Montreal by a moving train, and a night watchman at Niagara Falls was crushed to death under a car. Two construction hands were fatally injured, one being run over by a train, and the second being crushed between two cars loaded with rails. Severe injuries to a car painter and to four construction workers made up the balance of the list.

General transport.—Thirteen sailors drowned in the wreck of the ss. *Turret Bay* off Halifax, on May 20, account for the large showing of fatalities in this group during May. In addition an elevator boy was killed at Toronto, a longshoreman at Montreal, and a grain elevator employee at Winnipeg. Among those receiving severe injuries, teamsters figure most largely, with a total of 13, nearly all received by falls from their wagons. Four longshoremen were injured by cargo falling on them. A ship labourer, three sailors and a dredge hand complete the table.

Miscellaneous.—Four fatal accidents were reported, one to a dynamiter by a premature explosion, and one to a paper mill hand who was caught in a belt, a second workman losing an arm and a leg at the same time. The most disastrous accident of the month, however, was that by which two laundrymen lost their lives and two others were severely injured in the burning of a laundry at Montreal. Seven firemen were more or less seriously injured, and two paper factory employees in addition to those above mentioned. Two rubber factories sustained severe injuries to a hand. Two clerks, a watchman and a domestic servant complete the list.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F, No. 7.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|----------------------|---------------------------|-------|---------|----------|---|---|
| 1904. | | | | | | |
| <i>Agriculture—</i> | | | | | | |
| Farmer..... | Chesley, Ont.... | May | 1 | 1 | Struck by train while crossing track. | Struck by train while crossing track. |
| " | Shelburne, Ont.... | " | 2 | 1 | While at a barn-raising was struck on head by rafter. | While at a barn-raising was struck on head by rafter. |
| " | Eli, Man..... | " | 5 | 1 | While crossing farm on horseback was thrown into <i>coulée</i> and drowned. | While crossing farm on horseback was thrown into <i>coulée</i> and drowned. |
| " | Guelph, Ont.... | " | 10 | 1 | | A pitchfork thrown to a companion fell and prong entered eye and brain. |
| " | Duart, Ont.... | " | 10 | 3 | Back and hips hurt. | By collapse of uprights while tearing down a barn. |
| " | Moncton, N.B.... | " | 14 | 1 | Rib fractured. | By being thrown from a load of hay. |
| Rancher | Wingham, Ont.... | " | 16 | 1 | | Struck by train while crossing track. |
| " | Calgary, Alta.... | " | 10 | 1 | | Drowned while en route to stock show. |
| " | Medicine Hat, N.W.T. | " | 10 | 1 | | Team ran away. Deceased thrown from wagon and killed. |
| " | Port Moody, B.C. | " | 24 | 1 | Left leg broken. | Struck by falling tree. |
| " | Montreal, Que.... | " | 18 | 1 | Face and head injured. | Collision with street railway car. |
| " | Little Narrows, N.S.... | " | 15 | 1 | | Thrown from load of hay which fell on and smothered him. |
| " | New Canaan, Ont.... | " | 21 | 1 | | While engaged in plowing was kicked by horse. |
| " | Middlesex County, Ont.. | " | 25 | 1 | Feet crushed. | While raising a barn a timber fell on him. |
| " | Fulleton, Ont.... | " | 28 | 1 | | Crushed beneath trucks while moving a house. |
| Farm hand. | Ruxton, Ont.... | " | 3 | 1 | Foot severely cut. | By fall in front of a disc harrow. |
| " | Mountain Grove, Ont.. | " | 7 | 1 | Hand cut off | Struck accidentally by axe while building fences. |
| " | Deerham, Ont.... | " | 25 | 1 | | Struck by lightning while at work in a cornfield. |
| <i>Lumbering</i> | | | | | | |
| Shantyman.... | River Du Sud, Ont.... | " | 26 | 2 | | Drowned while driving logs. |
| " | Calumet, Ont.... | " | 27 | 1 | | Drowned while rafting. |
| " | Winnipeg, Man.... | " | 13 | 1 | | Drowned while trying to shoot a rapid in a boat. |
| " | Beauce, Que.... | " | 13 | 1 | | Drowned while driving logs. |
| " | Bloomfield, N.B.... | " | 13 | 1 | | Drowned while crossing creek on log. |
| " | Cutler, Ont.... | " | 7 | 1 | | Fell from end of boom into lake. |
| " | Huntsville, Ont.... | " | 16 | 1 | | Fell from a log while fixing a boom. |
| " | Les-Soixante Arpents, Que | " | 27 | 1 | | Drowned when driving logs. |
| Employee in woodyard | Kingston, Ont.... | " | 16 | 1 | Leg badly crushed. | Jammed between cart and railway car. |
| Saw-mill hand | Adamston, Ont.... | " | 6 | 1 | Loss of right hand. | By contact with circular saw. |
| " | Verona, Ont.... | " | 11 | 1 | Loss of right foot. | Amputated by machinery. |
| " | St. Pacôme, Que.... | " | 12 | 1 | Leg broken, &c. | By falling a distance of 50 feet. |
| " | St. Jude, Que.... | " | 14 | 1 | Loss of hand | Contact with large saw. |
| " | Maniwaki, Que.... | " | 19 | 1 | | Struck by plank rebounding from buzz saw. |
| " | Chipman, N.B.... | " | 21 | 1 | Loss of arm. | Caught in cogs of machinery, amputated at shoulder. |

| | | | | | | | |
|---|----------------------------|----|-------|-------|-------|------------------------------|---|
| Fishing— Fisherman..... | Fredericton, N.B..... | 25 | 1 | | 1 | Probably fatal injuries..... | Struck in abdomen by board which flew from machine. By fall from car on to pile of rocks. Decapitated by band saw. Caught on shingle machine. |
| Mining— Miner..... | Parry Sound, Ont..... | 14 | 1 | | 1 | Two fingers lacerated..... | Drowned when hunting a porpoise. |
| " | Deseronto, Ont..... | 20 | | | | | While at work in a coal mine. |
| " | Saguenay River, Que..... | 26 | 2 | | | | " |
| " | Ladysmith, B.C..... | 2 | | | 1 | Leg fractured..... | " |
| " | Union, B.C..... | 6 | 1 | " | 1 | Body crushed..... | " |
| " | Comox, B.C..... | 7 | 1 | " | 1 | Collar bone broken..... | By being caught between a pillar and a box. By fall from scaffolding in asbestos mine. By falling in front of a loaded coal car. Buried for 21 hours in an ore chute. On entering manway fell into chute and was suffocated. Thrown from coal car and neck broken. By fall of coal. Fall of casing from drill. |
| " | Glouce Bay, N.S..... | 10 | 1 | | 1 | | While ranging electric lights. By fall from scaffold. By fall from building, 30 feet. By bottom of chute for conveying brick and mortar of burnt building to ground falling out. Blood poisoning from wood splinter in arm. While adjusting blinds fell distance of 20 feet. Run over by an electric car. Died from effects of fall from a ladder on 21st Dec. last. By falling of beam on him. Bar of capstan swinging swiftly back crushed in skull. Struck by a piece of wood. Drowned while painting hull of a vessel. |
| " | Asbestos, Que..... | 10 | 1 | | 1 | | Fell while tarring the roof of a house. |
| " | Coal Creek, B.C..... | 14 | 1 | | 1 | | Struck by swinging chain. By stone falling on them. By stone falling on him. |
| " | Phoenix, B.C..... | 11 | 1 | | 1 | | Crushed by heavy timber falling on him in power house. Riding on crest of an avalanche. Contact with live wire. Injured by a short circuit while pulling switch. While chipping some wire, a small piece struck the eye. Fell a distance of 13 feet. Struck by an iron splinter. By fall of heavy piece of iron. Caught in machinery. While lifting heavy bar of iron. While fixing an elevator fell a distance of 30 feet. |
| " | Frank, N.W.T..... | 23 | 1 | | 1 | | |
| " | Fernie, B.C..... | 13 | 1 | | 1 | | |
| " | Glouce Bay, N.S..... | 5 | 1 | | 1 | | |
| " | Niagara Falls, Ont..... | 13 | 1 | | 1 | | |
| " | Niagara Falls, Ont..... | 16 | 1 | | 1 | | |
| " | Niagara Falls, Ont..... | 13 | 1 | | 1 | | |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY—Continued.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------|-----------------------|-------------|---------|----------|---|---|
| <i>Metal Trades—Con.</i> | | 1904. | | | | |
| Machinist..... | Ottawa, Ont..... | May 18..... | 1 | 1 | Left leg broken, &c..... | By fall down elevator shaft, 50 feet. |
| "..... | Hamilton, Ont..... | " 18..... | 1 | 1 | Foot badly crushed..... | Run over by cart load of iron. |
| "..... | London, Ont..... | " 14..... | 1 | 1 | Fingers cut off..... | When placing tin for stamping in the press, the drop fell and crushed the hand. |
| "..... | Toronto..... | " 3..... | 1 | 1 | Two fingers crushed..... | Crushed while making strainers with a press. |
| "..... | Hamilton, Ont..... | " 10..... | 1 | 1 | Right side bruised..... | Struck by tongue of hose cart in harvesting machinery factory. |
| "..... | "..... | " 12..... | 1 | 1 | Fourth right finger burst at end..... | Injured while working on a trestle in harvesting machinery factory. |
| "..... | "..... | " 23..... | 1 | 1 | Right foot bruised and strained..... | By fall of a heap of iron, in harvesting machinery factory. |
| "..... | "..... | " 10..... | 1 | 1 | Finger pierced..... | By sliver of rusty iron. |
| "..... | "..... | " 9..... | 1 | 1 | Finger badly cut..... | When loosening a set-screw, hand slipped and struck sharp edge of die. |
| "..... | "..... | " 10..... | 1 | 1 | Two fingers badly burst..... | By falling of trip-hammer when being fitted up. |
| "..... | Peterboro', Ont..... | " 9..... | 1 | 1 | Foot injured, toe broken..... | By fall of heavy casting. |
| "..... | London, Ont..... | " 14..... | 1 | 1 | Left hand badly lacerated..... | Fingers caught in gearing of machine when cleaning it. |
| "..... | "..... | " 16..... | 1 | 1 | Three toes crushed..... | Foot caught between floor and hoist. |
| "..... | Galt, Ont..... | " 23..... | 1 | 1 | Hand cut..... | Caught in lathe. |
| "..... | Brantford, Ont..... | " 9..... | 1 | 1 | Finger cut off..... | Caught in teeth of milling machine. |
| "..... | Hamilton, Ont..... | " 9..... | 1 | 1 | "..... | Crushed in an ending machine. |
| "..... | "..... | " 11..... | 1 | 1 | Arm taken off above elbow..... | Caught in gearing and had to be amputated. |
| "..... | Brantford, Ont..... | " 19..... | 1 | 1 | Finger crushed..... | Caught in machinery. |
| "..... | Ottawa, Ont..... | " 11..... | 1 | 1 | Two fingers cut off..... | Caught while operating a press. |
| "..... | "..... | " 16..... | 1 | 1 | Tips of 3 fingers cut off..... | Caught while operating a button-making machine. |
| "..... | "..... | " 20..... | 1 | 1 | Two fingers cut..... | Caught while casting, slipped and cut head. |
| "..... | Hamilton, Ont..... | " 3..... | 1 | 1 | Hand and head cut..... | Hand cut by casting, slipped and cut head. |
| "..... | "..... | " 4..... | 1 | 1 | Loss of left arm..... | Caught in belting. |
| "..... | Walkerville, Ont..... | " 4..... | 1 | 1 | Body seriously crushed..... | Caught between two steel girders. |
| "..... | London, Ont..... | " 19..... | 1 | 1 | Left thumb badly cut..... | Injured while working in stove factory. |
| "..... | "..... | " 4..... | 1 | 1 | Three fingers cut off..... | Caught in machinery. |
| "..... | Hamilton, Ont..... | " 2..... | 1 | 1 | Chest and body badly bruised..... | By explosion of molten metal. |
| "..... | "..... | " 2..... | 1 | 1 | Arm badly burned..... | " " " " |
| "..... | Brantford, Ont..... | " 2..... | 1 | 1 | Eye badly burned..... | " " " " |
| "..... | "..... | " 13..... | 1 | 1 | Foot badly burned..... | " " " " |
| "..... | Hamilton, Ont..... | " 25..... | 1 | 1 | Leg burnt and subsequently amputated..... | Struck by a bar coming from Pony Rolls. |

| | | | | | | |
|-------------------------------|---------------------|-----|----|---|--|--|
| " | " | " | 3 | 1 | Left hand cut. | By slipping of casting. |
| " | " | " | 6 | 1 | Left leg badly bruised, bone splintered. | By rumbler falling on leg. |
| Blacksmith. | Chatham, Ont. | " | 3 | 1 | Finger crushed. | Caught in machinery. |
| Iron worker. | Hamilton, Ont. | " | 25 | 1 | Leg amputated. | Result of a burn while working rollers. |
| " | " | " | 23 | 1 | Leg broken. | Struck by swinging crane. |
| Moulder | " | " | 3 | 1 | Right foot severely burnt. | By splashing of iron. |
| " | " | " | 16 | 1 | Foot badly burnt. | By spilling of molten iron. |
| Structural iron worker. | Smith's Falls, Ont. | " | 4 | 1 | Very seriously injured. | By fall on him of iron girder weighing about 3 tons. |
| " | Walkerville, Ont. | " | 26 | 1 | Skull fractured. | By fall of a heavy piece of iron. |
| " | Komoka, Ont. | " | 18 | 1 | Foot badly crushed. | Iron dropped thereon. |
| Bridge foreman. | Hamilton, Ont. | " | 26 | 1 | Skull fractured. | By fall on him of piece of iron. |
| " | Walkerville, Ont. | " | 4 | 1 | Hand crushed. | By fall from scaffold. |
| Labourer in machine shop. | Hamilton, Ont. | " | 7 | 1 | Hand cut off. | Jammed between punch and steel bar. |
| Hardware factory hand. | Brockville, Ont. | " | 21 | 1 | Hand cut off. | Caught in broom budge hoists. |
| Employee of steel company. | Sydney, N.S. | " | 14 | 1 | Hand crushed; amputated. | By fall from ladder while oiling shafting. |
| Stationary engineer. | Hamilton, Ont. | " | 20 | 1 | Hand crushed; amputated. | Caught in chrome mill. |
| Asbestos mill worker. | Black Lake, Ont. | " | 20 | 1 | Hand crushed; amputated. | Caught in chrome mill. |
| Woodworking Trades— | | | | | | |
| Factory hand. | Ottawa, Ont. | " | 16 | 1 | Loss of three fingers. | Caught in machinery. |
| " | Montreal, Que. | " | 18 | 1 | Loss of two fingers. | " |
| " | Hamilton, Ont. | " | 18 | 1 | Hand badly crushed. | " |
| " | Niagara Falls, Ont. | " | 10 | 1 | Hand mutilated. | Contact with saw. |
| " | Montreal, Que. | " | 28 | 1 | Four fingers cut off. | Crushed in a box making machine. |
| " | Owen Sound, Ont. | " | 23 | 1 | Right hand middle finger cut off. | Injured while operating a dadoing machine. |
| " | Parry Sound, Ont. | " | 25 | 1 | Two fingers severed. | Head cut off in contact with a band saw. |
| " | Guelph, Ont. | " | 5 | 1 | Stomach and ribs hurt. | By a wood shaper. |
| " | Vancouver, B.C. | " | 26 | 1 | Struck by piece of wood. | When fixing a belt on a moving pulley. |
| Spinning wheel maker. | St. Hyacinthe, Que. | " | 21 | 1 | Finger almost cut off. | Caught in a machine. |
| Box factory hand. | Toronto, Ont. | " | 5 | 1 | Two fingers cut. | On trimmer machine. |
| " | " | " | 25 | 1 | Finger cut. | Cut by shaper machine. |
| " | Deseronto, Ont. | " | 27 | 1 | Finger and thumb lacerated. | Hand slipped on saw. |
| " | Toronto, Ont. | " | 17 | 1 | Thumb crushed. | Crushed by door of car. |
| " | " | " | 5 | 1 | Three fingers crushed. | On groover machine. |
| Food and Tobacco Preparation— | | | | | | |
| Brewery employee. | Montreal, Que. | " | 2 | 1 | Internal injuries. | By fall from wagon which passed over his body. |
| " | " | " | 6 | 1 | Injuries to head. | By fall down brewery stairs. |
| " | Sherbrooke, Que. | " | 30 | 1 | Loss of eye. | Struck by a wooden stopper. |
| Ice cutter. | Montreal, Que. | " | 4 | 1 | Head seriously injured. | By fall of ten feet while working in ice house. |
| " | Dartmouth, N.S. | " | 16 | 1 | Serious body injuries. | Thrown from wagon by team running away. |
| Meat cutter. | Montreal, Que. | " | 4 | 1 | Head cut. | By fall on iron hook while hanging a quarter of beef. |
| " | Ottawa, Ont. | " | 32 | 1 | Hand and arm badly cut. | By effects of fall on meat hook which entered eye on May 10. |
| " | Woodstock, Ont. | " | 6 | 1 | Hand and arm badly cut. | By being caught in clipping machinery. |
| Pork packer. | " | " | 6 | 1 | Hand and arm badly cut. | By being caught in clipping machinery. |
| Textile Trades— | | | | | | |
| Cotton mill hand. | Hamilton, Ont. | May | 18 | 1 | Finger amputated. | Caught in loom. |
| " | " | " | 18 | 1 | Loss of hand. | Crushed in machine. |
| " | Marysville, N.B. | " | 21 | 1 | Loss of hand. | Caught in machine. |
| Woolen mill hand. | Bracebridge, Ont. | " | 4 | 1 | Loss of hand. | In 'picker. |
| Clothing Trades— | | | | | | |
| Rubber worker. | Montreal, Que. | " | 20 | 1 | Right hand cut off. | Caught in a machine. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY—Continued.

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|---------------------------|------------------------------|-------|---------|----------|--|---|
| <i>Leather Trades—</i> | | | | | | |
| Employee Leather Co. | Bracebridge, Ont. | " 6 | 1 | | | Came in contact with a live electric wire. |
| Leather worker..... | Toronto, Ont. | " 12 | | 1 | Left foot crushed | By falling of a cylinder. |
| <i>Railways—</i> | | | | | | |
| Conductor..... | North Bay, Ont. | " 6 | | | | Run over by train while coupling cars. |
| " (freight), | Bridgeburg, Ont. | " 6 | 1 | | | Fell from train, run over. |
| " (freight), | St. Catharines, Ont. | " 10 | 1 | | | Fell from car and run over by train. |
| " | Winona, Ont. | " 10 | 1 | | | While going to engine struck by fast train coming in opposite direction. |
| Engineer. | Barrie, Ont. | " 7 | | 1 | Badly scalded. | Rear end collision between two freights. |
| " | Carleton Place, Ont. | " 5 | 1 | | | Caught between traction engine and a boat being shipped on a car in rear. |
| Brakeman | Barrie, Ont. | " 2 | | 1 | Badly scalded. | Rear end collision between two freights. |
| " | Canam, N.B. | " 1 | | 1 | Hand badly crushed. | While coupling cars. |
| " | Brantford, Ont. | " 9 | 1 | | | Crushed between cars while shunting. |
| " | Port Credit, Ont. | " 9 | | 1 | Loss of leg. | Struck by a train. |
| " | Beeton, Ont. | " 10 | 1 | | | While shunting fell between cars and run over. |
| Fireman. | Barrie, Ont. | " 2 | 1 | | | Rear end collision between two freights. |
| " | Windsor, N.S. | " 4 | | 1 | Leg broken. | Collision between freight train and car containing lumber. |
| " | Ymir, B.C. | " 2 | | 1 | Leg broken. | Thrown from train in motion. |
| " | Atonvale, Que. | " 14 | | 1 | Leg and arm broken | By fall from moving train. |
| " | Montreal, Ont. | " 17 | | 1 | Right foot injured | By fall from an engine. |
| Sectionman | St. Thomas, Ont. | " 1 | 1 | | | Run over by train. |
| " | Maniwaki, Que. | " 20 | | 5 | More or less seriously injured. | By hand car jumping track. |
| Switchman. | Winnipeg, Man. | " 1 | 1 | | | Caught between two cars. |
| " | Windsor, Ont. | " 9 | | 1 | Leg severely crushed | While switching thrown down and run over by a car. |
| " | London, Ont. | " 2 | | 1 | Head dangerously injured | Struck by yard engine. |
| " | Windsor, Ont. | " 11 | 1 | | | Cut in two by yard engine. |
| " | Winnipeg, Man. | " 18 | | 1 | Dangerously injured | Kicked over right eye by horse. |
| Yardman. | Prescott, Ont. | " 3 | 1 | | | Run over by train. |
| " | London, Ont. | " 13 | | 1 | Skull fractured. | Struck by engine. |
| " | Adamsville, N.B. | " 20 | | 1 | Left foot cut and great toe amputated. | |
| " | Bay Shore, St. John Co. | " 27 | | 1 | Two toes almost severed | Foot caught in turntable. |
| Shop hand. | Montreal, Que. | " 25 | 1 | | | Struck by a moving train. |
| Car painter. | Niagara Falls, Ont. | " 4 | | 1 | Shock and bruises. | By fall from ladder. |
| Night watchman | Prescott, Ont. | " 4 | 1 | | | Crushed to death by a car. |
| Construction hand | Keewadin, Ont. | " 3 | | 1 | Leg broken and scalp wound. | Struck by a freight train. |

| | | | | | | |
|---------------------------|---------------------|-----|----|-------|--------------------------------|---|
| " | Oak Point, Man. | " | 12 | 1 | | Fell from and was run over by work train. |
| " | Yellow Grass, Assa. | " | 10 | 1 | | Crushed between two cars laden with iron rails. |
| " | Harcourt, Ont. | " | 23 | | Left foot cut. | Slipping of axle. |
| " | Brantford, Ont. | " | 26 | | Head badly bruised. | Struck by bucket which fell through breaking of chain holding it. |
| Teamster, C.P.R. | London, Ont. | " | 26 | | Internal injuries | Thrown from his rig. |
| <i>General Transport—</i> | | | | | | |
| Sailor | Montreal, Que. | May | 16 | | Body severely injured. | By being struck and thrown down by a moving pulley. |
| " | Fort William, Ont. | " | 16 | | Fracture of skull. | By fall of 25 feet, on ship. |
| " | Halifax, N.S. | " | 20 | 13 | | By fall into hold of vessel. |
| Teamster | Montreal, Que. | " | 3 | | Leg broken. | Drowned in wreck of SS. <i>Turret Bay</i> . |
| " | " | " | 3 | | Internal injuries. | While moving household goods fell from wagon. |
| " | Wellesley, Ont. | " | 3 | | Face badly gashed. | " |
| " | Newtonville, Ont. | " | 9 | | Leg severely injured. | Team ran away, teamster fell from load. |
| " | Victoria, B.C. | " | 9 | | Leg and head severely injured. | While unloading telephone poles was struck by one of them. |
| " | Montreal, Que. | " | 17 | | Leg seriously cut. | Run over by vehicle he was driving. |
| " | Kingston, Ont. | " | 14 | | Dangerously injured. | By collision between express wagon and electric car. |
| " | Hull, Que. | " | 18 | | Badly cut about legs and body. | By being run over by his rig. |
| " | Montreal, Que. | " | 21 | | Head badly cut. | Thrown out of wagon by team running away. |
| " | Hamilton, Ont. | " | 18 | | Head badly gashed. | By fall from his wagon. |
| " | Montreal, Que. | " | 18 | | Two fingers cut off. | " |
| " | " | " | 6 | | Foot crushed. | Right hand was caught in a machine. |
| " | Victoria, B.C. | " | 9 | | Scalp wounds and leg injured. | By wheel of cart while moving a barrel of cement. |
| Street car employee. | Montreal, Que. | " | 3 | | Face terribly burned. | Thrown from wagon. |
| Dredgeman. | Welland, Ont. | " | 15 | | Head cut. | Explosion of can containing coal oil. |
| Ship labourer. | Quebec, Que. | " | 31 | | Leg crushed. | Knocked down fire hole by timber. |
| Elevator employee. | Toronto, Ont. | " | 19 | 1 | | By fall of a piece of timber. |
| Grain elevator employee. | Winnipeg. | " | 18 | 1 | | Crushed between elevator and woodwork of shaft. |
| " | Fort William, Ont. | " | 18 | | Severe head and body injuries. | Caught in belt and whirled around shaft. |
| Longshoreman. | Kingston, Ont. | " | 20 | | Head severely injured. | Caught in arm of friction pulley and whirled around shaft. |
| " | Montreal, Que. | " | 23 | | Hand mutilated. | By piece of coal falling on head while at work in hold of schooner. |
| " | Windsor, Ont. | " | 23 | | Broken back. | While handling iron rails. |
| " | Montreal, Que. | " | 21 | | Arm broken. | Heavy bucket weighing 1,800 lbs. fell on him. |
| " | " | " | 30 | 1 | | Struck by a piece of timber when loading a ship. |
| <i>Unskilled Labour—</i> | | | | | | |
| Labourer. | Dundas, Ont. | " | 4 | | Internally injured. | By fall from a scaffold. |
| " | Berlin, Ont. | " | 11 | | " | By fall of ten feet from a scaffold. |
| " | Ste. Cuthbert, Que. | " | 15 | | Leg crushed. | Run over by a train. |
| " | Montreal, Que. | " | 17 | | Head badly cut. | By fall from revetment wall to wharf. |
| " | " | " | 20 | | " | By accidental blow of an axe. |
| " | " | " | 21 | | Left arm broken. | While unloading rails. |
| " | Hamilton, Ont. | " | 16 | | Body badly bruised. | Pile of bags of cement rolled on him. |
| " | Niagara Falls, Ont. | " | 4 | | Internal injuries. | Struck by gas pipes while unloading a wagon. |
| " | Montreal, Que. | " | 24 | | Hand crushed. | While carrying a piece of wood. |

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY—*Concluded.*

| Trade or Industry. | Locality. | Date. | Killed. | Injured. | Nature of Injury. | Remarks. |
|--------------------------|-------------------------|-------|---------|----------|-------------------------------|---|
| <i>Miscellaneous—</i> | | | | | | |
| Drug clerk..... | Kingston, Ont..... | 16 | 1 | 1 | Severe bodily injuries..... | Fell from third story, 30 feet, to ground. |
| " | " | " | " | " | Hand badly gashed..... | By contact with broken glass in basket. |
| Dynamiter..... | Toronto, Ont..... | 14 | 1 | 1 | Legs badly lacerated..... | By premature explosion of fuse. |

| " | " | 28 | " | 1 | Left foot burnt..... | By splashing of iron. |
| " | Brookville, Ont..... | 28 | " | 1 | Foot badly burnt..... | By spilling of molten metal. |
| " | Hamilton, Ont..... | 20 | " | 1 | Foot injured..... | By fall of molten metal. |
| " | " | 21 | " | 1 | Chest and leg hurt..... | Caught in belting. |

| | | | | | |
|---------------------------------|-------------------------|----|---|--|--|
| Electric railway employee..... | Niagara Falls, Ont..... | 16 | 1 | Thumb and finger of left hand cut off..... | Crushed while coupling cars. Caught in shafting. |
| Labourer in machine shop..... | " | 26 | 1 | Eye badly injured. Will lose sight..... | By splashing of molten metal. Out on rip saw. |
| Foundryman..... | Brantford, Ont..... | 29 | | Top of thumb cut off..... | Out while working a press. |
| Factory hand..... | Toronto, Ont..... | 28 | | First joint on second finger cut..... | Knife flew off sticker. |
| Machinist..... | " | 29 | | First finger on right hand cut..... | Collision between four ore cars and yard engine. |
| Factory hand..... | Deseronto, Ont..... | 25 | | Internal injuries..... | " |
| Engineer..... | Grand Forks, B.C..... | 27 | | " | " |
| Contractor..... | " | 27 | | Badly bruised..... | Struck by car. |
| Fireman..... | Bridgeburg, Ont..... | 24 | | Rib broken, &c..... | Run over by his runaway team. |
| Yardman..... | Guelph, Ont..... | 20 | | Body badly bruised..... | By fall from his rig. |
| Teamster..... | Hamilton, Ont..... | 12 | | Arm injured..... | Between barrels. |
| " | " | 21 | | Right hand crushed..... | Caught between floor of elevator and well of shaft. |
| Freight handler..... | Welland, Ont..... | 14 | | Leg badly torn..... | Struck by hammer when hammering a frame. |
| Employee in rubber factory..... | Toronto, Ont..... | 27 | | Finger badly burst..... | By load of iron when putting it on elevator. |
| Ironworker..... | Hamilton, Ont..... | 27 | | Hand and ear cut, shoulder bruised..... | Struck by an iron bar. |
| " | " | 28 | | Right foot bruised..... | When fixing a bolt die fell on foot. |
| " | " | 29 | | " | By water from hot water exhaust. |
| " | " | 21 | | Leg badly scalded..... | Cut by chisel while repairing a cold sett. |
| " | " | 18 | | Tendon of finger severed..... | Piece of steel flew into eye, eye removed on April 27. |
| " | " | 22 | | Left eye cut..... | |
| " | " | 21 | | Right side bruised, arm bruised and cut..... | Fell 15 feet when putting up scaffold. |
| " | Toronto, Ont..... | 22 | | Fingers crushed badly..... | Hand jammed between a steel plate and floor. |
| " | " | 25 | | Two fingers crushed..... | Caught while using a sheet iron press. |
| " | Hamilton, Ont..... | 26 | | Finger crushed and broken..... | Injured while lifting mower frame. |
| " | " | 21 | | Two fingers cut off..... | By a double cut-off saw in organ factory. |
| Woodworker..... | Goderich, Ont..... | | | | |

Unskilled labour.—Ten cases of injuries, none of them fatal, were reported. Four were the result of falls, a fifth was caused by an accidental blow from an axe, and three from materials which the workman was unloading. A labourer at Montreal had his hand crushed by a piece of wood, and a second his hand crushed by a railway train.

Municipal Insurance of Work-people against Accident, Winnipeg.*

On May 31, the board of works of the city of Winnipeg decided to recommend to the city council of that city the adoption of a contract with the Employers' Liability Assurance Corporation for the insurance of

their workmen against loss by accident and the payment to their representatives of a stipulated amount in case of death from accident. For some years past it has been the custom of the city of Winnipeg to continue the wages of men who were incapacitated for work by accident until they recovered. This has involved an average annual expense of about \$700. Conditions are, however, changing in the direction of greater liability to accident. The adoption

* The following statement was supplied to the *Labour Gazette* by Mr. John Appleton, correspondent of the *Gazette* at Winnipeg.

last year of the large trestle shovel for sewer excavation increased the number of accidents. Another fruitful source of accidents is the extended use of machinery at the quarry, asphalt plant, waterworks, and on the streets. For this reason the board of works found it necessary to make some provision for dealing with accidents. Accordingly they advertised for offers for the insurance collectively of the workmen they employ. The most favourable tender received was from the insurance company already named. By the proposed contract, the company will pay to the city in the case of death of a workman from accident a sum equal to, but not exceeding, one year's wages, but such sum is in no case to exceed \$2,500; the same amount will be paid for the loss by actual separation of two entire hands or two entire feet, or one hand and one foot, or loss of sight; for the loss of one hand or one foot, half a year's wages up to \$1,250 will be paid; for temporary total disablement or the inability of the workman to attend to his work by reason of his injury a sum equal to one-half of his weekly wages for the period of disablement, such sum not to exceed \$25 per week, and for a period not to exceed 26 weeks.

The cost of such a contract to the city of Winnipeg will be 90 cents per \$100 of the pay-roll. The last fortnightly pay-roll was, approximately, \$21,000, and for the whole of the present fiscal year, which expires April 30, 1905, the wage-roll is estimated to be \$500,000. The city, therefore, will have a premium estimated at \$4,500 to pay, part of which will be deducted from

the workmen's wages. The exact proportion of this is not yet finally determined, but it is estimated at half a cent on each dollar earned. This will practically place about half the cost of the insurance contract on the shoulders of the workmen.

**ENFORCEMENT OF FAIR WAGE
RESOLUTION BY POST OFFICE
DEPARTMENT, MAY, 1904.**

During the month of May the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system, and securing payment to the workingmen and women of fair wages and the performance of the work under proper sanitary conditions :—

| Nature of Work. | Amount of Order. | |
|--|------------------------|------|
| | \$ | cts. |
| Making and repairing metal dating and other stamps and type and brass crown seals | 398 | 92 |
| Making and repairing rubber dating and other hand stamps and type..... | 24 | 30 |
| Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and post marking and cancelling ink | 545 | 71 |
| Making and repairing post office scales. | 514 | 83 |
| Repairing mail bags. | 769 | 18 |
| Repairing mail locks and supplying mail bag fittings | 646 | 05 |
| Supplying street letter boxes and railway mail clerks' tin boxes and repairing portable tin letter boxes..... | 1,233 | 00 |
| Miscellaneous orders for making and repairing postal stores..... | 30 | 30 |
| Making up and supplying articles of official uniform..... | 2,969 | 50 |

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaux were received at the Department of Labour, Ottawa, during May, 1904 :—

DOMINION REPORT.

Crime in Canada.

Report of the Minister of Justice as to Penitentiaries of Canada for the year ended June 30, 1903. Ottawa : King's Printer, 1904. Pages 228. Pri celtsne :5 gtPn,t -ao,etaoin etaol eao Price 15 cents.

In the report of the Inspectors of Penitentiaries for the past fiscal year, it is stated that the average daily population of the penitentiaries of Canada in 1902-3 was 1,224, a smaller number than the average of the eight preceding years. There was an increase, however, of 16 per cent over the previous year in the number received from jails, and Manitoba showed an increase of 123 per cent. There were

113 prisoners liberated on parole, 35 were pardoned and 16 died. The total number in custody at the end of the fiscal year was 1,250, compared with 1,214 in 1902, and 1,382 in 1901. One-eighth of the convicts were under twenty years of age, and 504 were between the ages of 20 and 30. In order to prevent the contamination of youthful offenders the probation system is recommended, which consists in suspended sentence, combined with official surveillance. The number of unmarried convicts was 822, the married numbered 388, and 40 were widowed. As regards social habits, there were 162 abstainers, 646 were temperate in the use of intoxicants, and 442 were intemperate. There were 217 illiterates, 113 could read only, and 920 could read and write. As regards nationality, 858 were Canadians, 200 were from other parts of the British Empire, of whom 121 were from England, 117 were from the United States, 15 from Germany, 11 from Italy, and the remainder from various other countries. Classified by races, 1,131 convicts were white, 53 coloured, 31 Indian, 28 Indian half-breed, and 7 Mongolian.

BRITISH COLUMBIA REPORT.

Mining in British Columbia.

Annual Report of the Minister of Mines for the year ending 31st December, 1903, being an Account of Mining operations for Gold, Coal, etc., in the Province of British Columbia. Victoria, B.C., King's Printer, 1904. Pages, 275.

The report of the Minister of Mines of British Columbia for 1903 states that the gross value of the mineral products of that province for the year was \$17,495,954, being an increase over the preceding year of \$9,404. The small increase was due to a diminished production of placer gold and coal. Placer mining was affected by unfavourable weather conditions in the Cariboo and Lower Fraser districts, and the output of coal was greatly diminished by strikes during the earlier part of the year. The coast collieries also suffered from the competition with fuel oil in California, and alterations in the plant on one of the large properties, following a change of ownership,

also caused a temporary cessation of production. The tonnage of ore mined by the lode mines in 1903 was 1,286,176 tons, an increase of 287,177 tons, or about 29 per cent over the preceding year. The value of the ore, however, did not show a proportionate increase. This was largely due to the fact that improved methods of mining have rendered profitable the treatment of low grade ores, which formerly could not be worked to advantage. Another cause was a change in the value of ore deposits in the more important mines, high grade ore bodies giving place as depth was reached to masses of lower grade requiring treatment by milling.

The following table shows the amount and value of mineral products for the year in British Columbia :

| — | Quantity. | Value. |
|-------------------------|------------|------------|
| | | \$ |
| Gold, placer..... Oz. | 53,021 | 1,060,420 |

BRITISH REPORT.

Railway Accidents in Great Britain.

Returns of Accidents and Casualties, as reported to the Board of Trade by the several Railway Companies in the United Kingdom, during the year ending 31st December, 1903. London, Eyre & Spottiswoode, 1904. Pages, 49. Price, 5¹/₂d.

In the April number of the *Labour Gazette* a summary is given of the returns of railway accidents in Great Britain for the first nine months of 1903. Returns for the whole year are now at hand, which give the following statistics. The total number of persons killed on railways in the course of public traffic was 1,159, an increase of 63 over 1902. The number of injured was 6,785, an increase of 124 compared with 1902. In addition to these, there were 83

persons killed and 11,772 injured upon the premises of railway companies but not by trains or engines. Twenty-five passengers and nine employees were killed by railway accidents, and 769 passengers and 146 employees were injured. There were 446 employees killed and 3,659 injured by the motion of trains and engines. Of these, 23 were killed and 506 injured while coupling vehicles, 16 were killed and 404 injured while braking, 28 were killed and 435 injured by shunting operations, and 130 were killed and 278 injured while walking, crossing or standing on the line of duty.

UNITED STATES REPORTS.

Industrial Statistics of Maine.

Seventeenth Annual Report of the Bureau of Industrial and Labour Statistics for the State of Maine, 1903. Augusta: Kennebec Journal Print, 1904. Pages, 227.

The special features of the report of the Bureau of Industrial and Labour Statistics of Maine for 1903 are an account of the mineral springs and minerals in the state, and of the industry of apple culture.

The report also contains statistics with regard to labour organizations, returns of manufacturing establishments which were enlarged, completed or in process of erection during 1903, and statistics of the manufacture of lumber, pulp and paper, as well as other useful information.

There are 81 mineral and medicinal springs in the state of Maine, which yield a revenue of over \$300,000. The chief mineral wealth of Maine consists of quarries of granite, slate and limestone. In 1901 the value of granite produced was \$2,689,300. The production of slate amounted to \$202,325, and the value of lime was \$715,272 for that year. There are also rich deposits of iron, lead and copper, and many other minerals and precious stones are also found within its borders.

With reference to labour organizations, there were, according to this report, 174 trade unions, with a membership of about 13,609 in the state. Only two union were reported to have disbanded during the year.

A brief account is given of requests made by the unions to the employers, the results attained, and the disputes following on the rejection of their demands. There were few strikes in Maine during the course of the year, agreements with regard to hours and wages having been reached peacefully in the majority of cases.

Ohio Labour Statistics.

Twenty-seventh Annual Report of the Bureau of Labour Statistics to the 76th General Assembly of the State of Ohio, for the year 1903. Columbus, Ohio, State Printer, 1904. Pages, 725.

The annual report of the Ohio Bureau of Labour Statistics for 1903 contains statistics of the manufacturing and mining industries, and an account of recent labour laws and court decisions, and the annual reports of the free public employment offices of the state. There were received 5,865 returns relating to manufactures, and 815 relating to the mining industry. The increase in manufacturing establishments reporting amounted to 536 over the previous year.

In 1902 the free employment offices of the state found employment for about 22,300 persons. Since the establishment of the five employment offices in 1890, the statistics show that 364,345 applications for situations and 303,288 applications for help were made, and positions were secured in 204,862 cases. The total population of the five cities in which the employment offices are situated is 1,050,385. A request is being made by these offices for legislation to curtail alleged evils from independent employment agencies.

Trade Disputes in New York State.

Summary of Seventeenth Annual Report of the New York State Board of Mediation and Arbitration. Albany, N.Y. State Printers, 1904.

In the report of the New York State Board of Mediation and Arbitration, an advanced summary of which has recently been issued, it is stated that during the year which ended September 30, 1903, there were recorded 192 industrial disputes in the State of New York. This was a large increase over the preceding year, in which there were 142 disputes. Very

nearly 100,000 employees were directly affected by the disputes of 1903. Employers were successful in 82 disputes, involving 62,460 work-people; the men were successful in 51 cases, involving 10,730; compromises were effected in 45 cases, involving 20,612 employees, and 14 disputes were unsettled on September 30. Demands for increased wages caused 80 disputes, questions of trade unionism were involved in 41 cases, and 37 were due to a demand for a reduction in working hours. The strikers were wholly or partially successful in their demands for increased wages in 54 cases, failing in 19. The employers were successful in the majority of the other disputes, winning 22 out of 41 strikes where the issue was some question of trades unionism, 20 out of 37 where the issue was a reduction of hours, 6 out of 8 where the employment of particular persons was concerned, and 3 out of 5 sympathetic strikes.

The State Board of Arbitration intervened in 28 disputes, 23 times on its own initiative and in five cases on receipt of requests for intervention from employees. In 13 cases the intervention of the board resulted in bringing the disputing parties together, and in eight of these settlements were effected. In four cases the employers refused to reopen negotiations, in two the services of the board were found not to be required, and in three the services of the board were declined. In six cases the efforts of the board had no perceptible immediate effects, although in two of these it may have helped towards a settlement.

EUROPEAN REPORTS.

Overtime in Factories in Austria.

Arbeitszeit-verlängerungen (überstunden) im Jahre, 1903, in Fabriksmassigen Betrieben, Wien. Aus der Kaiserlich-Königlichen Hof- und Staatsdruckerei, 1904. Pages, 33.

The report of the Austrian Bureau of Labour Statistics on overtime in factories in 1903 contains five statistical tables, of which the first gives the number of establishments which worked overtime in the several districts of Austria. In the sec-

ond table the establishments are classified according to industries. In table III., they are classified according to the industries in the different districts. In table IV. a comparison is given of the past five years, according to districts, and in table V., according to industries. In 1903, there were 627 factories which worked overtime. These employed altogether 124,857 working-people, of whom 43,120 were employed beyond the maximum of 11 hours. The number of extra hours worked amounted to 2,541,033⁵. The largest proportion of factories were engaged in the textile industry, of which there were 240, employing 56,465 working-people, of whom 19,403 worked a total of 1,120,617 hours overtime.

Rag-pickers of Paris.

L'Industrie du Chiffon à Paris : Imprimerie nationale, 1903. Pages, 110.

A report on the rag-picking industry of Paris has recently been issued by the Labour Bureau of France. It is estimated that there are 4,959 persons engaged in this occupation, of whom 4,799 actually gather the rubbish and 160 purchase it from them. The rag-pickers are divided into three classes, according to their methods of procedure. In former times, when householders used to throw the garbage on the streets, rag-pickers used to gather up the scraps during the night at their leisure, but a law having been put into force ordering all garbage to be placed in closed boxes, ready for the scavenger, they were compelled to adopt other means. One class of rag-pickers attach themselves to certain houses, where they have received permission to help in sorting the boxes before being removed by the scavenger. Those of another class run ahead of the scavengers, being allowed fifteen minutes to examine the rubbish before it is taken up. A third class obtains permission to accompany the scavengers in their carts, and help to load and unload the materials on condition of being allowed to look over them before they are finally disposed of. When their baskets are full, the scavengers return to their dwellings and arrange the contents

according to their several kinds. Articles composed of more than one material are broken up, buttons, for instance, being removed from clothing and placed in one pile. When the business of sorting is completed, the rag-picekr sells his goods to a wholesale rag man who sells them in turn to a large rag factory. Here they are again sorted out, and all things which possess a marketable value are thoroughly cleaned and sold to the factories, where they go to make up new articles of merchandise. Rags of all kinds and scraps of paper are used for the manufacture of paper, but the inferior kinds of paper are made into cardboard. Rags of wool and silk are unravelled and made into shoddy goods for the poorer classes. Bones are used to a small extent in toy factories, and also for the production of various chemicals. Old boots are taken to pieces, and the best parts of the leather are sold to manufacturers to be made into new boots. Glass forms an important part of the gatherings of the rag men, and all the broken pieces are sent to glass factories, to be made over again into new bottles and other articles of glassware.

NIGHT WORK FOR WOMEN.

Memorial explanatory of the reasons for an International Prohibition of Night Work for Women issued by the Board of the International Association for Labour Legislation, 1904.

In a memorial recently issued by the Board of the International Association for Labour Legislation on the prohibition of night work for women, an account is given of the steps leading up to the issuing of this memorial, with a general summary of the legislation in force in the various countries of the world bearing on this subject.

In September, 1901, the International Association for Labour Legislation, at the assembly held at Basle, instructed the International Labour Office to institute inquiries as to the state of night work among women in the various countries. As a result of these inquiries, a resolution was passed in the following year declaring that

the condition of legislation on women's night work in most states with important industries, and the influence of such legislation on the general conditions of industry, justify the abolition in full, on principle, of night work for women, and instructing a committee to inquire into the means of introducing this general interdiction, and how the exceptions still existing as to this interdict might be gradually suppressed. In 1903, this committee passed a resolution instructing the Board of the International Association to address the Federal Council of the Swiss Confederation, and to request it to take the initiative in an international congress with the object of forbidding, by means of an international convention, night work for women in any industry. The board was also instructed to address a memorial on this subject to the various governments, explaining the resolutions carried by the committee and showing the desirability of prohibiting night work for women by international regulation.

Legislation regarding Night Work for Women.

In respect to legislation affecting women, the countries are divided into the following four classes :—

1. States that have issued no interdict against night work for women.
2. States where this interdict is issued solely in respect to young females up to a certain age limit.
3. States where this interdict only refers to certain kinds of manufacturing establishments.
4. States where the interdict against night work for women of all ages and in every kind of industrial work is laid down in principle, with certain exceptions.

Of the countries placed in the first category, Japan is the only state where no restrictions exist regarding the hours of labour either by night or day. In South Australia and fourteen of the United States, as well as Oklahoma Territory, the labour of women is limited to a maximum

of ten hours a day or sixty hours a week, no distinction, however, being made between day and night. In Spain, women's work is restricted to eleven hours a day, but females between 14 and 16 years of age are allowed to work eight hours a night.

In Belgium, Portugal and Georgia night work is forbidden to females under 21 years of age. In Denmark, Norway, Sweden, Finland, New South Wales and Ohio the age limit is 18 years, and in Hungary, Luxemburg and Wisconsin those below 16 years are forbidden to work at night. In 1907 a law will come into force in Italy prohibiting night work for women of all ages.

The following countries are enumerated in the third class. In Russia the prohibition of night work only applies to women working in mines and in the textile industry. In Austria, the East Indies, Luxemburg, Finland and Sweden the prohibition applies to women working in factories, mines and smelting furnaces. In Germany the prohibition is extended to workshops with motor power, and in Switzerland to all workshops employing more than five hands. In the following countries night work is prohibited to women in all industrial pursuits in establishments employing a staff exceeding :—Five hands, Denmark, Portugal, Ontario; four hands, Victoria; three workwomen, Basle City; two workwomen, the Swiss cantons of Glarus and St. Gall, Queensland and New Zealand; one workwoman in the Swiss cantons of Zurich, Berne, Lucerne, Solothurn, Aargau and Neuchâtel.

In the following countries night work for women is forbidden without distinction as to age : Germany, New York, New Jersey, Indiana, Massachusetts, Nebraska, France, Great Britain, Manitoba, Quebec, Nova Scotia, Queensland, Victoria, New Zealand, Holland, Switzerland, Austria, East Indies, Russia.

Justification for the Interdict against Night Work for Women.

The benefits arising from the prohibition of night work are enumerated as fol-

lows : It is stated that there has not been any general diminution in the opportunities of employment for women in the countries where night work has been prohibited. In many places women's work has been substituted for children's and a more intense form of day work has supplanted night work. Workwomen have not generally suffered any abatement of wages, but in many cases their earnings have been increased, owing to greater celerity of machinery and larger and improved production. Coincidentally with the prohibition of night work for women a decrease in the mortality among women and children has been observed, and in Great Britain and Germany the death rate among workwomen dropped much quicker than that of workmen. Neither the prohibition of night work for women nor the restriction of their working hours has influenced to any appreciable degree the export trade, especially of cotton goods.

Hours of Rest.

In discussing the hours of rest at night required by workingwomen, it is estimated that the minimum should be 12 hours, leaving 10 hours for regular daily work, one hour for rest during working hours, and one hour for any authorized extra work that might be required on special occasions. The interval between two days' work varies greatly in different countries. In New Zealand and New Jersey the period is 13 hours; in Ohio and New South Wales it is 11 hours; in Denmark, the Netherlands, Norway and Sweden it is 10 hours; in Switzerland the night's rest is 10 hours from September to May, and 9 hours from June to August; in Italy and Portugal the night's rest is 10 hours from November to April, and 8 hours from May to October. A rest of 9 hours is allowed in Germany, Austria, the East Indies, Great Britain, Ontario, Manitoba, Quebec, Nova Scotia, New York, Wisconsin and Victoria. In France women cannot work between 9 p.m. and 5 a.m., and in Indiana, Massachusetts and Nebraska the forbidden hours are from 10 p.m. to 6 a.m. In

Hungary, Luxemburg, Finland and Russia the principle of an 8-hours' rest is recognized.

Cases when Night Work is permissible.

On special occasions and in particular industries exceptions have been made to the rule prohibiting night work for women. These exceptions include hindrances from unforeseen catastrophes, and *force majeure*, and cases where night work is necessary owing to the perishable nature of the materials, and industries in which there is a press of work at certain seasons of the year.

The only industries recognized in the memorial as coming under these exceptions owing to the perishable nature of their materials are those connected with the preserving of fish, fruit and vegetables. With regard to the industries that have an increased amount of work at special seasons, the International Association for labour legislation passed resolutions advocating the abolition in such industries of permits to work at night, and stating that allowing a maximum day's work for women of ten hours, and an unbroken night's rest of ten hours, there would remain, deducting two hours for meals, two hours for overtime during the period of greatest production.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are taken from the latest law reports and other legal records of the different provinces of Canada :—

QUEBEC CASES.

Agent of Employer extorting Money from Employees.

An interesting case, the first of a number arising out of the same incident, was recently tried in Montreal. The action was brought by V., an Italian, who claimed that on July 25, 1903, he, together with thirty other Italians and their foreman, was hired at St. John, N.B., by the Canadian Pacific Railway Co. The company furnished the men with passes to Montreal, and they were met at the station there by one C, also an Italian, who stated that he was the agent of the company; that C. took the check for V.'s baggage and demanded from him the sum of \$2, which V. paid under threat; the company subsequently refused to give V. work, and also refused to give up his baggage, which he valued at \$90. V. therefore claimed the return of the \$2 paid to C., \$7.50 for loss of time, and damages for breach of contract. He also asked that the seizure issued on his behalf for the recovery of his baggage should be declared valid.

The company defended the action, pleading that it had received no benefit from the \$2 alleged to have been paid to C.; that, as a matter of fact, V. had refused to work for the company; and that the latter was entitled to be paid for the full transportation with which it had furnished him from St. John, N.B., to Montreal.

The court came to the conclusion that C. was the agent of the company, being employed in translating documents into English, and in preparing contracts, &c., and being paid \$5 per day for each day spent in the service of the company. The court also found that C. had exacted \$2 from each of the men, which, in the opinion of the presiding judge, was an act of extortion; it also appeared that when it came to the foreman C. had demanded from him a larger sum than \$2, and that when he refused to pay the same, C. refused to allow him to sign his contract. The foreman being thus barred, the other men refused to work without him, and demanded the return of the money which they had paid, which was refused. They were also unable to obtain their baggage, and were finally obliged to take out a seizure for it.

As the evidence showed that the engagement of the foreman was part of the bargain made at St. John, N.B. (none of the men being able to speak either English or French), the court was of the opinion that this illegal act of C., the agent of the company, violated the whole agreement.

Judgment was therefore given in favour of V., and he was held entitled to recover the \$2 paid C., and also the sum of \$7.50 for five days' loss of time. The seizure taken out by V. was also held to be good.

(*Vaccho v. Canadian Pacific Railway Co.*, Judgment given in the Superior Court at Montreal, by Mr. Justice Curran, 7th May, 1904.)

Liability of Employers for Lack of Proper Supervision of Work.

C. was employed by the Locomotive and Machinery Co. of Montreal, and in the course of his work he was engaged with a number of fellow-employees in placing a large piece of iron, called a 'monitor,' on top of another. While doing so the end of the monitor slipped and crushed his foot, rendering him unable to work for a long time, and possibly injuring him, to a certain extent, permanently.

C. brought an action against his employers for \$500 damages, claiming that the accident was caused by their fault and negligence, inasmuch as there were not sufficient men on the work, and those that were there did not all understand each other, being of different nationalities. The employers replied that the accident was attributable to C.'s own negligence; that he was accustomed to the work and knew the dangers to be guarded against, and that, moreover, he had been specially warned to be careful about his hands and feet in handling the monitor.

The court was of the opinion that the evidence showed that C.'s end of the monitor had been placed first on the ground, and that had it not been for the action of the men at the other end the iron would not have slipped; that the foreman, who was some distance away, had not ordered these men to let go, as they had done;

and that, moreover, while the number of men was sufficient to carry the iron, it probably did not suffice to allow it to be laid down quietly and cautiously.

The court therefore came to the conclusion that the employers had not exercised sufficient supervision and prudence; but considering that the negligence was not very serious, and taking into account the fact that C. was only earning \$1.50 per day, it placed the damages at \$300, and judgment was therefore given for that amount with costs.

(*Clanflore v. The Locomotive Co. of Montreal*. Judgment given in the Superior Court at Montreal by Mr. Justice Lavergne, 7th May, 1904.)

Dispute about Terms of Agreement between Employers and Employee.

K. brought an action against S., alleging that under the terms of a certain agreement he had deposited \$10 with S., and had undertaken to work for him for one month free of charge, the understanding being that at the end of that period K. was to be employed for eleven months more, receiving \$4 per week for the first two months, \$5 for the next three months, \$7 for the following three months, and \$10 per week for the last three months. It was also agreed that S. should teach K. how to cut garments.

In his action K. claimed that he had fulfilled his part of the agreement, but that, while it was still in force, he had been told that there was no work for him to do, and that he would therefore have to wait for a certain time, during which his wages would be suspended. S. denied this, and claimed that he did not refuse to pay K., but that the latter was himself in fault, as he had abandoned his work of his own free will.

In giving judgment the court stated that the evidence was very contradictory, but that, on the whole, it had come to the conclusion that S. had been unwilling to pay K. during the period of idleness. S. was therefore ordered to take K. back in his service and to pay him \$60 for the loss

which he had actually sustained; or, in default of so doing, to pay \$151 in full settlement for everything due the contract.

(Kaulman v. Simon. Judgment given in the Superior Court at Montreal, by Mr. Justice Curran, 26th May, 1904.)

ONTARIO CASES.

Employer liable when Accident caused by defective Machinery.

Joseph Graham was employed by the International Harvester Co. as a blacksmith's helper. On August 19, 1903, while attending to his work in the ordinary way, he was killed by a piece of steel which was sent flying from under a steam hammer. The widow and six children brought an action against the company for \$5,000 damages, alleging that the defective condition of the steam hammer had caused the accident. The company contended that there was no defect in the hammer, and that the accident was caused by Graham's own negligence.

The action was tried with a jury at Hamilton, and a verdict was given for \$1,500, of which \$500 was apportioned to the widow and the balance to the children.

(Graham v. International Harvester Co. Judgment given at Hamilton, 30th March, 1904.)

In a somewhat similar case, H., who was employed as a blacksmith, had his right eye destroyed by a splinter from a large hammer which suddenly broke while he was using it. He sued his employers for \$2,500 damages, alleging that the hammer was defective and that the employers were aware of the defect before the accident happened. At the trial judgment was given in his favour, and was afterwards confirmed by the Court of Appeal, to which the employers took the case.

(Henry v. Hamilton Brass Co. Judgment given by the Court of Appeal for Ontario, 18th April, 1904.)

Verdict set aside by Judge.

H. was employed by the T. H. and B. RR. Co. as a brakeman. While in the yard of the company he was fatally in-

jured while working at a brake. This brake was stiff at first and then suddenly gave way. His widow brought an action against the railroad company for \$5,000 damages, alleging that the brake was defective, and also that the foreman, under whose orders H. was acting, had been negligent. It appeared from the evidence that this foreman was also working at the brake, and that when it seemed to be stiff he got off the car and pried down the dog, releasing the brake and causing the T handle to fly around and to strike H. and knock him off the car. The company denied all liability.

The action was tried at Hamilton with a jury. The judge charged strongly in favour of the company, but submitted a number of questions to the jury. In answer to these questions the jury found that the brake was dangerous, and that the company was negligent in allowing it to be used; also that the foreman had been careless, and that there had not been any negligence on the part of H. The jury therefore awarded \$1,000 damages.

When the verdict was brought in the presiding judge stated that it was directly contrary to the weight of evidence, and he subsequently set it aside.

(Hodgson v. The Toronto, Hamilton & Buffalo Railroad Co. Action tried before Chief Justice Meredith, March, 1904.)

Action Dismissed on account of Contributory Negligence.

One Ineson, a minor, was employed by the Hamilton Cotton Co. A carding machine at which he was working becoming clogged, Ineson pulled off the belt which was on the machine, and commenced to remove the cotton waste which occasioned the stoppage. While he was doing so the belting slipped on the pulley and set the machine in motion, and Ineson's hand was crushed so badly that it was necessary to amputate three fingers.

Ineson brought an action against his employers for damages, alleging that the machine was defective, and that there should have been a guard to prevent the

belt from slipping on again. The company denied all liability.

The action was tried with a jury, which found that the accident was caused, not by any defective machinery, but by Ineson's own negligence and carelessness. He appealed from this decision, but a Divisional Court confirmed the judgment given at the trial, and dismissed the appeal with costs.

(Ineson v. Hamilton Cotton Co. Judgment given by a Divisional Court at Toronto.)

Employer's Right to Dismiss Employee.

An interesting point recently arose in an action taken by an employee for wrongful dismissal. From the evidence in the case (which was tried in an Ontario police court) it appeared that the employer had asked the employee on a certain Monday to print a sign 'Mechanics Wanted' to put in the window; the employee had refused to do so, because at the time his fellow-workmen were on strike. He was therefore dismissed at once, although his week did not end until the following Thursday. The employee claimed his wages for the whole week, and the magistrate decided that he was entitled to them, holding that while the employer was justified in dismissing him, yet he should have given him notice.

BRITISH COLUMBIA CASES.

Accident in a Mine.

H., who was employed as a miner, was working at the bottom of a main shaft; in a drift above another party of miners were driving an upraise, and while doing so they suddenly worked into the bottom of an old shaft which extended down near the drift from the surface. This old shaft was partly filled with water, and when the connection was thus made with the drift the water poured down, ran along the drift and emptied into the main shaft where H. and some other men were working. As a result H. was drowned.

H.'s widow brought an action for damages on behalf of herself and her chil-

dren, alleging that the accident was caused by the negligence of the mine-owners, inasmuch as they had failed to provide proper and accurate working plans for the shaft. At the first trial the jury brought in a verdict in favour of H.'s widow; but its answers to some of the questions submitted by the judge were such that the court held that their finding was really in favour of the mine-owners. According to these answers the plans under which the work was carried on were made by certain other competent employees, who, however, had ceased working for the mine-owners before H. commenced doing so, and had never been employed since that time. The court, however, was of the opinion that these men must nevertheless be considered as being fellow-employees of H., which would disentitle H. at common law to recover damages from the mine-owners on account of any mistake made by any such employees, though damages might have been recovered under the Employers' Liability Act. An appeal was taken, and the majority of the Supreme Court of Canada held (1) that the B. C. Mines Act did not impose upon an absent mine-owner the absolute duty of making sure that the plans used for working the mine were accurate; and that unless he was actually aware of such inaccuracy he could not be held liable for an accident caused by the failure of his superintendent to bring the plans up to date; but (2) that though the owner would not have been liable at common law for the negligence of the superintendent, yet he would be under the British Columbia Employers' Liability Act.

As the damages given at the first trial were greater than allowed under the Employers' Liability Act, the Supreme Court directed that there should be a new trial.

At the second trial the jury brought in a verdict of \$3,223.50 damages, two-thirds of which were apportioned to H.'s widow, and one-third to his children.

(Hoskings v. Le Roi No. 2, Limited. Judgment given by the Supreme Court of Canada, Dec., 1903. Verdict at the second trial at Nelson, B.C., 3rd March, 1904.)

Right of Employers to have a Black List of Employees.

An important question regarding the mutual right of employers and employees has recently arisen in British Columbia ; and it is expected that a decision of the highest court will be obtained as to the legal position of the matter.

It appears that during the progress of a recent strike at some engineering works in Vancouver, the employers' association compiled and issued to its members a list of the names of the men who went on strike, the result being that these men were unable to obtain work from other factories.

On behalf of the men affected legal proceedings were taken against the employers' association. When the case was called before the magistrate the counsel for the association admitted that the list in question had been made, and had been sent to certain members of the association. They also stated that they intended to argue that if employees were allowed to organize and take action regarding employers, the employers could also form an organization and take similar steps about not employing men of whose conduct towards themselves they disapproved. At the request of the counsel for the association, the accused were committed for trial so that the points of law might be dealt with by a higher court.
